**7.Economic Importance:***Pterocarpusindicus* is an economically important legume timber species. The wood of several species including *P. angolensis* DC. (African teak, bloodwood, Kiaat, muninga) and *P. soyauxii* Taub. are highly valued and used for fine furniture, cabinet making, paneling, joinery, musical instruments, implements and curios. The resin supplies dyes (e.g., *P. tinctorius*Welw.), other uses are in revegetation and soil improvement, as shade trees, ornamentals, cosmetics and baskets (from the inner bark)
