7. Habit and Habitat: Climbing Palm. Evergreen forests, grows in the lower hill forests especially on the drier slopes.

8. Life Form: Phanerophyte

9. Economic Importance: The Miri tribe of Assam plains made their thatched nuts on bamboo pillars raised about 1 - 1.5 m above the ground level to protect them from flood and wild animals. For making the huts they use split *Dendrocalamus* bamboo and strong canes of *Calamus erectus*, leaves are used as thatch. Stems and leaves of *C. erectus* are also used by them for making poultry houses. In Sylhet, Bangladesh, people chew the seeds of *C. erectus* in place of betel nuts (*Areca catechu*).
