

Boston Hall Jan 4th 1820

Sir

I beg you & Mr Wallis will accept my
best thanks for your very kind attention, the
Sovoy Screens & Boxes came quite safe & have been
successfully received, they are the first of the kind there
have been seen in England. I am sorry to say the
Plants were all Dead, as I had got into the Port,
I have been most importunate with the Plant & you
have so kindly undertaken to send me, for I
have not had a single Plant lately that has
survived the Voyage, & two lately sent by
my Friend Genl. Handwisher have shared the
same fate. I enclose a list of Seeds that my
Gardeners Offered, I wish they were our choice,
Gardeners here are rarely Scientific, you will
excuse his rough List. I am much obliged to

you of the seeds of the *Phloxodendron Abnormale*
& *Abba*, they were well produced & have come up
abundantly, seeds always acceptable &
seldom fail. **S's &** Plants are not so certain, but
& out valuable when they **Jt & r S** * seed** —
My gardeners shall continue to collect seeds
& I shall **i A ^ g ^ ^ * >** file **< . . 4 ^ L J f - >** **v ^ ^ .** bring
them by any opportunity — (St. Beaumont
joins me in offering best compliments to yourself
& Mr. Wallace — I am Sir
your very sincere friend
Diana Beaumont

My dear Mr

By the way I have
I have dispatched the three of
a book which may probably
be interesting to you
if so be so great as to
send with my best compliments

I have not yet succeeded in
procuring a "Chair" for some
I have packed the
book in such a manner
that it may be sent as

a letter in the regular Dutch
if the Colonel knows of any
good mode of preserving
in this I should be
Thank you

Thankful for the receipt
of your kind
offer of assistance

Yours truly

Bombay 11th Dec 1858

Dear Sir -

The similarity of pursuits will I

do unnecessary say I have a copy of your
address from a

sw^fav-^C^'^^*^_ 4Ens%->*

are at the head of the books of Natural History
in India, such intimacies must be familiar to you

I have for some years been known to have paid
attention to the history of this part of India, and
have in consequence lately been appointed to
make a Report & that is to say Survey of the
Provinces acquired in the late war with the
Portuguese -

In the territory on a level with the Sea, with
the natural productions of which I am best ac-
quainted, I have constantly had occasion to note
species, and not infrequently genera, of plants,
not described in any system, or botanical work,
that I have been able to procure. I imagine
this will still more frequently occur to me in
the task I am now commencing on, and the
necessity of affixing new names is thus imposed
on me - The *Antur* *Phragmites* has never fallen
in my way, nor is there a single copy of it in
this place, or probably many of the species with
regard to which I am in difficulty have already
been taken up in that work, the perusal of it
would

very desirable to me, and as I have
sent in Calcutta, I venture to request
will procure me a copy of it. Mr. Smith
of Civil Service, who kindly takes charge
of the Books to me by the
mail, will send the Books to me by the
mail.

If you can favour me with any further
information regarding what Forbush left
behind him, and how procurable or acceptable
I shall deem myself highly obliged.

It will always afford me great satisfaction
to answer any of your queries, or to forward
in any way within my narrow ability the
science in which we are both engaged. Should
you honour me with your commands, please
to direct to the care of Miss^{rs} Forbes H. Bombay

I remain dear Sir

Your very faithful servant

Thomas Marshall.
Bengal.

Reply 5th Feb together with a copy

Forward by
Mr Smith

Calcutta

My dear Willm.

You must again excuse a very
humble Epistle - You were aware that I meditated
deserting from my Post for a short time, and
since I have been at Lucerne I have been
so ^{been} ~~indisposed~~ that I have not ^{been} ~~been~~ able
to get to my desk - however I set off
again in 2 days more, and when I again
cross the Alps you shall hear from
me more at length - in the mean time
to business -

My object to-day is to send you
Subscribers names for 5 Shares in the
Ed. Natl. Inst: to return Humboldt's
Pamphlet

which belongs to the Asiatic Society;
and a section of the Calcutta Journal
which you were kind enough to send
for my perusal. I think I have a
heap of that newspaper which shall be
returned to you when I get back to
my own Camp.

Have in Col. Lambton's favor,
Darby's despatch in which I hope sub
carbonates of Potash will prove a misnomer
as Soda Water cannot be made from it
without Noth's Machine, the ingredient
Commissioned was Soda Supercarb:
Rec'd also Mr. Bosky's parcel for which
many thanks. A Cylindrical Package

recently came to hand containing
Suppose Paper. I have made it over
without opening it to Kamoo's, whose
curiosity impelled him to follow my
steps here. He promises to make up
for lost time as soon as we get back
to the Mills, and we have just heard
that the Burkams I sent in search of
Leeds &c. have returned from Ohio. We
have made up of a collection
they have made when I got back
to Paruly.

I shall (since I had settled to do
before here yours) employ Kamoo's
brother as his assistant upon trial, and think
both

June 12.

The contingent expenses for the P. 33, I suppose will not be great, except by the way - I had paid him up, and he has continued to disturb his salary here on your account - You can cause the expenditure by payment to Mr. Jackson, who are my Agents.

It has been atkinson I have been informed by Mr. Gibson who is esteemed a skillful Surveyor. He says that the lower part of the District Grants adjacent are in a state of great, unusual degradation - that they are fullness, or slight enlargement of the Prostate, but that as yet there is no hardness, or appearance of Scirrhus.

My dear Sir

The beaver Dr Tod is the son of a lady
with whom I was acquainted when young and on
for etcwvw^t although I have not the pleasure of
Dr Tod's acquaintance I will be much obliged to

Uthmaniyah 13th 1820

My dear Sir
I think I know the arrival
here a few days ago - I had
given me the enclosed
to forward to you - I had
said that in a day or two
I would be on his return
I will give you notice of
the departure of the boat
and I trust there will be
no delay as I have given
orders to the linen store

to provide what may be
necessary by the time that
we reach it. Mr. Brown
says that he will be in the
city & desires me to say
that there are no more letters
no prints, no news, or see
to be put to the work all
around here every day
I think of it often - so
that his usual style to
the school was for years
longer than I have told

My dear Sir,

Deolva sets off tomorrow morning on his return to Calcutta ^X, and will deliver to you this - I am glad to be able to say that his conduct here has been very correct and satisfactory - and if he continues to behave as he has with me, he cannot fail, I think, to merit your approbation - He has received his pay up to the end of this month - I hope the various articles under his charge will arrive in good order - and that the boats will make a quicker passage than that of last year. I march tomorrow downwards - proposing to meet Gardner at Kichiakoh at which place I expect him to arrive by Dak on the 22nd - I will write **&6** you,

92 Howard
15 January 1820

Calcutta January 20: 1820

My dear Sir,

At ~~Calcutta~~ this morning I opened the Pak
from Calcutta, and received your very
acceptable letter of the 18th instant - I have
thus far to meet our friend Gardner, and
keep him company on his return to Kipacib-
to be in not very well in health, I think he
will not be sorry to have a companion in
his journey through the Hills - and I am
truly happy in the prospect of hastening our
meeting - I expect him here on the morning
after tomorrow - and shall **b** ^ pack to give
you a few lines after having seen him
Dilova is with me - and has begged permission
to halt with me tomorrow, in order to pay his
respects to Gardner, which I could not deny him -

Shave spoken to him particularly, & repeatedly, about
~~the~~ his return - directing him to enquire
about the state of the rivers - and advising him,
if there is a doubt about his getting down by
the direct route, to go at once by the ~~direct~~ ^{indirect} route
~~which~~ which will obviate the delay which occurred
last year - He is very attentive, and I doubt not
will do all in his power to join you quickly.
Devi Bhuggite promised me to visit you, and
I am happy to find he has done so - He is a
very good & an intelligent man - and the
attention you have been pleased to show him
will not, I am sure, be thrown away - for he
has invariably expressed his gratitude for similar
favours - and he really is deserving of them -
You may rest assured that I take the warmest
interest in your scheme for visiting Nepal
and though I cannot offer to be your host
^ W ; ^ ^vrnii*^ need that we are to
have further in that character - We shall

have much interesting conversation on the
subject, when we - and you may expect
to hear from him - on these points. I
all things, however, wish, I shall be
delighted to come down to meet you in any
part of the plains for the purpose of acting
as your guide & Mohammed during the
to Khairabad. I have walked almost
every inch of the way on this occasion and shall
be tolerably experienced by that time - I wish
it was nearer at hand - yet ten months pass
away pretty quickly - I hope there will be no
objection to Mr James Stewart officiating for
you - When opportunity, pray
offer him my remembrances & I have
a great deal of kindness from him - and would
not wish to be thought unkindful
I am very sorry to observe that his brother is
compelled by ill health to quit Bengal - I take it
he would that he is known to you also.

No. 2
6/4

My Dear Sir:

Since I last had the pleasure of writing ^{you} I have been for the most part of the time absent from Glasgow on business, consequently, I regret to add, could not despatch the remainder of the Leads, & the Plates & Stones. I have added considerably to my stock of the latter while moving about the County. I discovered in vain the collect Leads that they had all disappeared no doubt owing to the early fall of Snow - the latter end of November & beginning of December.

I have now got by me almost ready for despatch a kind of Piece but unfortunately I have expended the small supply at Wexelock in my paper as I cannot trust them unless well wrapped up, in consequence of the state of a former batch of Leads, these despatches will be delayed for some days till I can make some.

I must add from your information that I neglect business & necessary other cases - my absence from Glasgow k 4*. /£*••

No. 2 - Koolun or Kolum Dhan is cultivated with success with out that but in a lower situation, in part the Nepalese I now send you are not subject to injury

No. 3 - Kaleri Dhan subject to Snow & as No. 1 before noticed, grows at the height of 6000, was put above the sea.

No. 4 - Heera Dhan as No. 2.

No. 5 - Kulkas Dhan as No. 4, Thelemi &

No. 6 - Kora Dhan as No. 5.

I hope you to have the pleasure of seeing you by both specimens of the other two kinds and when I receive them.

My dear Wallis

of Louisa

I have just finished one
or two Europe letters which I
meant to have sent to you per
dispatch, but we found the
Carnatic here, and I shall
therefore send them on board
her. I entirely forgot before
leaving you the bundle of Menan
Kabor specimens, which I meant
to have taken back with me as
they are Dr Arnold's, and he I
would wish to keep them as

Memorials of his journey
and may perhaps wish to
have an account of them as
an appendix to his tour. —
They are in a different kind
of paper from the rest and
separately put up. I think
you will recollect them.
I may let them follow by
Capt Watson. — We are
now off Saugor, but how

Much farther we shall get
this tide I know not. - Shall
keep this open till the boat
leaves us in case of having any
thing to add, and go on with
Europe. letters.

My dear brother!
I have just seen your very interesting
and all your things about it.

W. Lloyd
27 July 1850
3/100

^ & my, London, January 30th 1820.

Dear Sir,

Upon the arrival ^jfir^&^&Z}
and Mr & Mrs Hogue in London, I made inquiry
of them after your welfare, and was gratified to learn,
that the wishes of your friends had been confirm'd for your
permanent appointment by the court of Directors to be
Superintendent of the Company's Botanical Garden at
Calcutta. Your own deserts, ought long since to have
procured you this nomination, for it was the opinion
of the Publick in India, that no one had such qual-
ifications to it as yourself. I have therefore only
to add my sincere Wishes that you may have health
to enable you to discharge, ^{the duties} with ease to yourself, and
that the emoluments of the Station will in the end secure
to you that comfortable independency, ~~in~~ which your
requirements **S** give you so just a right to expect.

When I drank tea with you in /£*-**+&£ 1815
at the Botanical Garden, on the evening I embarked on the
Pilot schooner to proceed to England, you were so obliging to
give me a small assortment of Seeds. The late Dr
Roxburgh, used to put ^{annually} up for me a packet of various kinds,
which I regularly sent to persons in England, to whom
such articles are peculiarly acceptable, and now that I am
here, I am often besied by applications from Ladies &
others who have a taste for flowers & plants & who
engage themselves with the fashionable study of
Botany. To whom ^{can} I apply with more propriety
to aid me in assisting the wants of my friends in
this Line, than to him who now presides over the
Royal Botanical Institution at Calcutta? I shall
therefore consider myself as much obliged to you,
if you will occasionally put up for me a packet of
seeds, with the botanical name written on each paper.
My friend Mr John Palmer of Calcutta, or the House
of Hogue Davidson & Co: will readily undertake the charge
of forwarding them to me, if you should not know any of
the

Commanders of Indiamen or other Ships that might be
leaving Bengal when your Seeds may be ready. Only let me
know by what Ship they are coming, & I will take care upon
its arrival in England, if bound to London, to take the necessary
means to send for them, as well as relieve the person to whom
they may be entrusted, from all trouble of getting them
from the Ship. The drawing of the Luchee, the Logant,
(in Colours) would be also very acceptable, when any of
your native draughtsmen have an hour's leisure. Pray
excuse all this trouble, and if you could only tell me
how I can make you a return from England.

I shall have very sincere pleasure in attending
at any time to your requests. —

C. F. Martyn, Esq.
Major, 1st Regt of Calcutta.
Many anecdotes are
sent of time as
with
(them)

I am, dear Sir,
with much respect,
your obliged & most obedient Servant
Charles Fuller Martyn. —

Plants are too great a responsibility for any person
to charge himself with the care of, but any other produce
from the Botanical Garden of Calcutta is sought
with avidity here, & probably seeds never come better than in
small baskets, or paper parcels that can be hung up in a cabinet
& in some place where wet or damp cannot reach them.

he was an accepted gentleman: he socially
much courted. But he was the most perfect
miser I ever knew. That he followed cunningly
got from all the way and as I had in my
house all the day he always in his
He wanted them for his cabinet
and it was a great hit to
set them free of charges!

Secretary to Government,
in the Public Department.

Sir

Having in consequence of
Mr. Foster's proceedings to Europe been
to take charge of the works & monuments upon
by that officer in concert with Doctor
Wallis for the protection of the bank upon
which the House belonging to the Colonial

weeks been employed in this undertaking
& as the year 7 nally attested as the
work are now very nearly exhausted

been done & the most
Excellent the most
Given
Proceedings.

In
nation I am about to
submit the accompanying sketch of the
bank & with the aid of the Repre-

^{intending}
therein I hope to make myself understood
in the following report.

It will be necessary first
to mention shortly the original plan submitted
by ^{y*} ^{y*} ^{s.} . . . ¹/_{1x1} Report with the
reasons for departing from it & the
in which the work was when delivered into
my charge of . . .

done since I have been
it with . . . ²/₂ further in
to be . . .

put a little
in this sketch, at the same time . . .

any . . . between

plan . . .
was . . .
Giant in the manner represented in
the plan in the very neck of the eddy
where strongest, and also by means of

water become so much a depth as to render
prolonging further, even slightly difficult.

Accordingly a fresh line was
commenced upon within the other at (E) or
the work had proceeded as far as (E) when
it was found that the water was so deep
the object of this line was to

for I <
and as the formation of a spur
was
to
the strengthening of this part of the bank
by a line of piles as far as the funds
allowed by Govt. would admit was the best
indeed the only course left for their adoption.

Accordingly in this view

started on the line in the same station
as In the mean time, however
observing that the water was deepening
on the ^{interior} of the vessel below the Chaul &
that much wear of the pukka work &
stones thrown in to protect the Chaul
& form a bed for the vessel was gradually
washing away. I began to be apprehensive
for the safety of the Chaul and vessel
which were still more exposed
to the eddy. I found moreover from
observations made at different times

that the Tidal was daily rolling over
outwards & this in a degree beyond what
might be attributed to the water settling in
its bed I accordingly proposed to Dr. jfc=
Wallish to drive a few piles below the
raft in ^{such} manner as to prevent
or at least check the working of the eddy water
its down. Also with the hope of binding
the soil well together f .& . perhaps even of
inducing a deposit. I proposed driving
1 these piles by pairs thro' fascine platforms
with the ^{by} them. This proposition having
met with Dr. W.'s entire assent there
have been 12 pairs of piles driven in
the manner & positions noted the sketch
II. I have likewise caused ^{f** Je.} one pair
to be similarly driven between the
Shaft & Tidal (7) for the protection
of the ^{ry-^n^f} as well as to the ^{^A,} the
force of the stream & prevent its wear-
ing itself between the Tidal & the
Shaft.

I shall now proceed to
explain how the funds allowed have been
employed & for that purpose I draw
and the enclosed abstract account of

water become so much a depth as to render
further ascendingly difficult.

Accordingly a fourth line was
descended within the other at (V) &
the work had proceeded as far as 15' at A, i.,
where was found a small quantity of

It is seen from it that the sinking
of the vessel involved an expense of 1787.14.3
The original Estimate of Lord Forbes allowed
2160 £. for this object. It should be
mentioned that there is included in the
above sum an expense of 200 £. for
cables and anchors as stated in the
Report. There however it is proposed
to take up at some future period which
will give perhaps or create a small
sum to be deducted.

The whole of the remaining
of the sum of 6000 £. viz. has gone to
defray the expense of shedding & covering
the piles. The largest *V of expense
will be seen to be the hire of the 2 boats
in which the pile barge was constructed
and the pay of the establishment a few
months. In the original Estimate
a sum of 1800 £. was allowed for
the purchase of 50 piles assuming 30
£. as the price of each. The whole
of this has been saved in consequence of
the superintendent Doctor Wallack
having supplied some from the garden,
which were cut by the action of his

of his own Establishment. The consequence
of this has been that the original
a defense of 50 piles only as contemplated
there have been increased to the same
funds the number of 110. The bed of
fascines had also been made from the
branches of the same trees, and the piles
are very superior in quality to any that
could have been procured elsewhere being
of oak & from 30 to 65 feet in length.

The above will have
sufficiently explained the state of the
work & the manner in which the funds
have been disposed of. Owing to the
additional number and very superior
quality of the piles I have no hesitation
in giving it as my opinion that a
much more effectual defense has been
given to the bank than could have been
expected from the original plan.
But nevertheless when the great
depth & rapidity of the stream in
that part of the River adds to
the great despatch of the bank are
taken into consideration, I cannot
venture to assure Govt. that the

defence are yet so complete as that further measures of precaution may not become necessary in the ensuing rains much will depend upon whether the Rapids maintains its position & the Gorge & cables hold. It will be obvious from the plan that the water is almost at its full depth immediately under its stream consequently the effect of this stream upon it will require to be carefully & continually watched for fear of its being undermined.

Mr. Walker and myself are both of opinion that it will not be worth the while of Government to go to any great additional expense for the security of the bank below the Rapids & Cable. If what has been done should not succeed a more substantial defence might certainly be made but at a much greater expense & after all there would still be risk. The bank above the Rapids we think to be entirely defended for some time to come & would the only object of alarm remaining is, the security of the lower Rapids situated

as it is. The piles ² fascines we
also driven below it, have certainly
helped in a small
way.

It may be noted in the
sketch that the line of piles stops short
at (G) about 30 feet short of the Ghaut.
D. Wallis is rather anxious to have it
continued up to the Ghaut so as in some
measure to protect it and at the same
time to form a line with the works on
the other side. I myself agree perfectly
with him that it would be advantageous
to unite these lines. And as the piles
might as hereafter be furnished from
the Garden the whole additional expense
would be exactly that of the Establishment
for the further time required. This could
not exceed 500 Rs. as the work might
be finished in a month or more.

It remains for Government
to determine whether this additional
expense shall be incurred or not. The
only objection I feel is of a personal
nature. For the Government at Pillestha
which have likewise been entrusted to
me, must remain wholly independent

while they give one there being but one
Engine which has been in use at the
Gardens. I state that every thing
has been prepared in the interior at
Potters. The tools & bars are lying
ready to be down & they may crash
and split in this dry weather. I
however this proposal: I
will have to remain perhaps
rather month before I can commence
driving them. The care & loss of the
Pete Engine is likewise another object
of consideration for it has been in
constant use for 6 months & is almost
much the worse for what it has
sustained at the Gardens, in driving piles
to sink a wharf & in many instances
thru a bed of brick and other hard
substance, thrown in at different times
before the work commenced to check
the encroachment of the river.

All this will however
doubtless meet with due consideration
when his Excellency in Council shall

determine > < i* - this is not any thing
further shall be undertaken for the defence
of the bank at the Botanical Gardens.

I have the honor to be
Sir

Your most Obedient Servant

The King

Patent. Sent in 3rd February 1720.

Copy
of a Report of
Lieut. W. Trinsep
to Government
dated 3^d Feb 1870
on the state of
the River Side
of the Bolon
Garden.

Winnipeg the 9th February 1920

My dear Mr. Kitchin

I have been very busy for some time and have not had time to write you for some time. I have been thinking of you and of the work you are doing for the cause of the people of the North West. I have been thinking of you and of the work you are doing for the cause of the people of the North West. I have been thinking of you and of the work you are doing for the cause of the people of the North West.

K.*

I have been thinking of you and of the work you are doing for the cause of the people of the North West. I have been thinking of you and of the work you are doing for the cause of the people of the North West. I have been thinking of you and of the work you are doing for the cause of the people of the North West. I have been thinking of you and of the work you are doing for the cause of the people of the North West. I have been thinking of you and of the work you are doing for the cause of the people of the North West.

150
not attribute to any negligence
or inexperience to your affairs &
wishes. I shared with great
pleasure from the trust the people
that had been placed of your favour
and with a great deal of care
in the present. I could have no better
hope of the great execution I should
derive from the accomplishment
of our mutual wishes in this respect
and would be safely anticipated
every assistance which I might
be able to afford and which you
may rely upon. I am unable
however to speak with any degree
of the present moment to the

testimonials of your personal
interest in the subject, as I find
that it has not yet been touched
for a hint in either way
by the numerous acquaintance
with you, and would understand
think you ought to mention this
and should hope to be able to
remove, without much difficulty,
any obstacles which they might
oppose to your coming up. But
such be the first instance in
which a change we have been
omitted, and we can only
expect to remove them in actual
prejudices in this respect by
slow and gradual degrees. I must
now shut up the volume of

Success if the application were to
be intended in favor of a large part
the thing to be done satisfactorily
should be done by a good man
and I should not be so if proper
to ask a ^{by asking too much} ~~request~~ should be
very sorry to obtain even an impatient
and ungracious consent. You will
know the pleasure I should have
in seeing and giving peace. I am
where society would be in a great
solitude - but more especially
happy I should be to welcome
my friend, Citron, to visit. I am
with respect to me at once of your
careful & pleasant of making
difficulties where they do not
exist - It will be practicable I have

My dear Sir,

your kind offers to my brother the Baron de Saxe, encourages me to ask you a favour, which I hope may be usefull for the progress of exchange of plants between the Ile of Bourbon & Bengal. - I desire to try to take with me a boxe of young trees arranged as those sent from Europe, without any earth laid down flat in boxes & wrapped up in mats, but as there is some sun, light straws may be used. The present season is favourable for the experiment, as it is the time when the vegetation is stopped. I don't see why it would not succeed in this climate. the month of may & june being also the winter ^{season} at Bourbon, I will be able to return you very shortly a invoice of any trees you may wish. - I do not believe that what I propose has ever been tried, ^{in hot climates} & I have no doubt you will be glad to make the experiment yourself.

as I intend to leave Calcutta for Bourbon in the course of next week, I hope you will be

kind enough to order the Boze to be ready
directly. allow me to point out to you some few trees
we have not at Baulben. —

the long Gonyava. —

the good Shaddock or Pamplesmouffe.

the Orange of Silet

the Portugal lemon which I have seen at Baulben
Some of the Bombay Mango. —

Some of the trees intended to be sent by you &
asked by Mr. Lechenan

the myrtle tree &c. if any you think worth sending.

the beautiful Shrub called Warren Hasting I
believe & which you had the goodness to offer to
me. — if all your varieties of Oranbloss in

roots could be sent it would be a great advantage
a couple of very small Sago trees. — I suppose
very young trees may be sent in this way. the
passage will be only of 4 or 6 Weeks, I have
known trees sent from France & having grown at
Baulben after ^{having been} ten months in boxes wrapped up in
moss & put in the hold of the ship. —

I beg you to be kind enough to favour me
with an answer by the bearer. — I have
mentioned to The Marquis of Hastings &
Melady my intended demand to you & they told
me that they had no doubt you would make
the experiment with pleasure. —

I hope to be able to have the Honour to see you
at your delightful garden before I sail.

I remain My Dear Sirs Most truly

Yours.

Wm. Adamson

Calcutta February 20th 1820. —

I think a number in lead or wood attached to a
tree & referring to a note or Catalogue will be absolutely
sufficient.

This was the last letter I ever had from that short *f*E11ent
man. He died on the 14th of the fall month. In towards
end of the year I saw the memorial on his grave, and after
V <' r-r #?***•*
part of January 8. 1820.

My dear Sir,
I did myself the pleasure of writing a few lines
to you some days ago on my way down
must far be. He returned together to the
Residing on the 20th and you (<'ff

spirits T-*J & ^K***JF. thank you for your
kind letter of the 25th and its interesting
enclosures, which confirm my belief that
the animal preserved here is the tail-less
Deer mentioned by Latro - for the
of Remant & have corresponded with it in
all material points. I wish I could send it
down to Mr. Hartwick, but independent
of the season being now far advanced I fear
it would not survive. I should be good deal puzzled how to

Tf^/f^r^r

it was a powerful animal, and quite untamed. It attempts to charge with its horns every person that approaches & can only be approached with safety when its head is raised & held up by means of a ring through the nostrils.

Xr.^

| 4±

fe

^ S

I am delighted to hear of the embarkation of the Musk Deer, and have little doubt after its long confinement & treatment, that it will arrive safely in England. I have one with me now & mean to season it here during our summer.

trf-^/

Gartner & I have had much conversation about your plans. & you may be assured that he will exert himself to the utmost to realize them. He has had a good deal to do on his first arrival, and is still very unsettled but he desires me to say that he will write to you on the subject in a very few days.

I spoke to him about the accounts of your people to which I have been referred. I should be very glad to see you.

JL* JUrivd, erf,

7

Let my request has furnished me with a
 copy of it which is enclosed. I also send you
 that which I paid from
 hands to December 1874, as I fancy you must
 be aware when you say that the people have
 drawn the whole of their pay here. In my time
 Dwidon has received 40 Rs a month, leaving
 20 Rs to be paid by you to his family. In the
 same manner Bhanut Singh has received 24 Rs
 leaving 12 Rs to be paid in Calcutta. The
 amount of family money in his case, paid
 by you, corresponds exactly with the deduction
 made from their full pay here, as you will
 see on reference to the memorandums enclosed
 in your letter, which I return to you for
 that purpose. If I mistake the business, you
 can settle accounts with Dwidon on his arrival.
 & in your reply, you can tell me how I am
 to adjust matters with Bhanut Singh. Any

MHJ

j

expenses which are metted in these accounts
were undertaken by ourselves, & with our own
people, & not chargeable to you -
I told you that DeSloa went down with me
last month - I have not yet had notice of his
departure from Vepouly - but I hope he is
the fanges by this time - I anticipated
wishes in the event of his learning that the
was impossible, or that any risk of detention
should be the consequence of entering that paper
D. Rogers has not yet joined us - but he will
be here in the course of ten days -
keys to be kindly remembered to you -
will write shortly - believe me always
to remain, My dear Sir,

& Sir

y 7

I am directed to acknowledge
the receipt of your letter ^{4c[^]} ^{t * . * =}
describing the proceedings which have been adopted
with the view of securing the bank on which the house
of the Superintendent of the Botanic Garden is
situated, and requesting further instructions on the
subject.

The measures already pursued for
the protection of the Bank in question appear to have
been judiciously and skilfully executed, and afford a
reasonable prospect of attainable success in preventing
any dangerous encroachment of the River on that point.
Under these circumstances the Governor General in Council
will not object to sanction the estimated additional expense
of 400 Rupees for retaining the line of Piles from the spot
marked G. in the sketch which accompanied your letter
to the point, the Piles being furnished from the Garden.
The Governor General in Council however attaching
considerable importance to the early completion of the
experiments entrusted to your direction at Ettagumb
desires that your attention should be first directed to the
accomplishment of that object, and your operations may
then be resumed at the Botanic Garden. If however
any material objection should occur to you to this

A. Kaim
Paris 20 Feb 1820

prospere of the completion of the Work at the Botanic
Garden, you will be pleased to state it to me for the
information of Government and suggest some arrangement
under which that work may be conducted without
interfering with the operations at Sitagumb.

I am

The following friendly communications along with the three boxes of plants... have all arrived... the death of Dr. Paterson... the plants as they are expected had suffered severely in their way home especially that by the ship... good many of these in it... The seeds were a very valuable acquisition to our botanical institution... your obedient servant... to beg your acceptance of their grateful thanks for the kind... donations... take the liberty of expressing my thanks... usually for the additional gratification... collection... to state that I will at all times be ready to receive your benevolent gifts to honour me... without hesitation by your commands upon me for any thing you may wish for from this country in the way of plants or seeds... may be very faithfully executed... the Lelythale Captain McNeil

leaves this for Calcutta in a day or two. I have
taken the liberty of putting up a few plants mostly
North American / /**. ^fc

Advised to your former notes. I also a box
of such seeds as by short notice, and
having had no specific list for my guidance
it is possible they may prove of less importance
to you. They are
I ^i^r-- <#!Gl*s '•' *x^*«t /^^.^^ X^**.- >> « K ^ ^

to pay attention to them on the
way - I am
to us
entirely on the way home with the addition of a few
more which I am very desirous to obtain if perfectly
convenient for you at some future period - I should
general if it could be ascertained. I hope plants
are best to arrive here between the end of May
the first of October or I

of the far less than I (although from your list
of the rarest kind in the collection at home) I cannot collect
up a single plant recovering - those in the open
I am happy to add were much more fortunate
these one day at any future period replaced
of the 1 or any part of them would be - <* x<*^^C^^

im.

Our supplies of North American seeds have
very scanty but I have lately got a good correspondence
in that country on whom of place considerable dependence

H* tot***!

I am happy to inform you Sir that the Botanic
Garden here is given to William Jackson Hooker
Esq who very justly ranks high among the
Botanists of this Country - but as you I doubt
acquainted with his works I need not advert to them
Although we have felt sorry for the loss of Graham
yet the appointment of a Gentleman of such eminence
is the best that could be expected

Graham writes along with that by the same paper
I must repeat that I am extremely sorry for the loss
of the contents of my No 10 the whole of which was
sent to us with the exception of *Roscoea purpurea*

hoping that you will pardon the familiarity with
which I write & desiring the honour of hearing
from you when your other avocations permit

I am Sir Your Much obliged
& most obedt servant

Paris 20 Febr 1820

My Dear Halliok

N^o 1. The b^o of the Indiana off
Tappanwooly 27th February 1830
rec^d 12 Mar 7.

There is a small vessel in company with
us, which goes soon to Madras, I shall therefore com-
mence an account of our proceeding, ^{SS & t#} by her.
We had a delightful breeze and a most excellent pas-
sage down the bay till we approached the coast of
Sumatra. There and particularly about Bag Island
we were delayed by calms. We reached ^{}*u£/*^0-4L}
~~Bag Island~~ on the 23^d and left it again yesterday.
If I had anticipated so long a passage, during which
I have had very little to do, I would have carried
down with me a part of the specimens to work at
on the way. - The mischance befel me, the box which
contains ^{*^^*} my descrip^t ^{£+>>>} book happened to be in a
cabin below which was set afloat one night by
a sea through an open port, and it got most thoroughly
& completely soaked. I have been obliged to make
a copy of the greater part of it, but one good effect
has resulted, that in doing so I have perfected the
descriptions & put them in shape to be immediately
printed, and shall commence there on as soon as
I arrive at Bencao-line.

I hope when we arrive there I shall receive letters
from you by the Concordia which will probably
arrive almost as soon as we ourselves. & also by
Watson. I hope in dispatching the specimens, you
have taken care to procure for yourself a com-
plete set. We may wish to refer to
I wish we had not done away with the arrangement
of the *** of which there were duplicates from those
which are the only specimens which is the case with
a great many, and certainly with all of which
you had previously received of us. There were
several of the plants which we had
ascertained & made descriptions of along with you -
You will however distinguish in going over them
as well as I could, such as are of interest, and when
necessary we can refer to them in the work. I shall
be anxious to hear what discoveries you make
among them. - There are several particular points
& queries I want from you, the best way will be
to put them down in order, that you may have
them before you at once, and comply with them
when convenient & at leisure. At the first place
I wish to have copies of the descriptions you made of
several plants, some before, & some as we went along
These are

- These are principally your description of -
- 1 *Fagraea obovata*. Sylhet etiam Singapore.
 - 2 *Do* of *Strophanthus* — Penang
 - 3 *Do* — *Celtis attenuata*. — Frequent at Tappanooly.
 - 4 *Do* — *Pasus* ^{Stalk} *3-ovifolia*: ^{3.7.26} *Thunbergii*, Nepal & Singapore.
 - 5 *Do* — *Mucaria lanosa*. —
 - 6 *Do* — *Passerina aristophylla*. *hookeri* during examination
 - 7 *Do* — of *'tffa- *t*J-i* / *Patinac*. —
 - 8 *Do* — of *Ardisia paniculata* affinis.
 - 9 *Do* — of your *Myrica* *Kay* plant
 - 10 My descr. of *Limonia*? *leptostachya*, accordg the spec: have no other.

Robt! should char: of *Urtica nana* *flora*, & names stamens
 what species of *Castan* and that which goes from seed from Penang
 C — *folia* also its spec: char. —

If Robt: has a fig: of *Mucaria* ^{*^/t<t+4*L} A, what the color of ^{the} flowers
 think name it described with desc. this also among the spec:
 I may see the berries of *Mucaria grandiflora* angled, as in the
 fig: in your Tentamen, or round as descr^d by Robt:

// < *, JU -- \$* are a pencil outline of *Ternstroemia tocaloculata*
 of *Thunbergia* fig: *Lin* 8^o 235 of your spec^t: is a *Ternstroemia*
 What is brown mark on *Memecylon* in *Thunberg* *long*.
 Also what his char: of *Anguilla* in *B.* —

at Tappan, & the number of what from the fruit alone are called *Justia longifolia*, (Singapore)

L*/ what say you, it is only pentandrous; there are

v#* * < ^ Zc / ^ ^ W ^ w ^ i / ^ return call ^{the} stamens. found

also two more species of *Conarus*. We examined five all new. One from Penang (*C. ferrugineus*, of which I have the description, three from Singapore of which I have none, and I fear no duplicate specimens. If you have made any memoranda of them let me have them, for these *Conaroidae* must be attended to. I have been looking over Roemer

that's Decandolle (try to get it for me) will be invaluable when complete. What does Roemer mean by saying that

Mangifera Indica has fol: *venenatisissima*. True?—

I happened also to observe that he gives *Helicia Cochinchinensis* in one place & then in the next under *Alphala Cochinchinensis*. quotes it; somewhat tautological?

When do you begin on Noth. Vol. II, and, . . . ^ . ^

j r

proceeding to Napaul what will be the arrange

'PL***/, Hope it will not stop. i. // * > * got to ask whether

you «* ~ t ~ % of S* I comes yet under your patronage, if not

how would you like that your critical acumen should be commemorated by taking those acuminated gentry the Patimas under your wing. *Mallicha? glabra* is a Papuanian. I am not however decided that it should be. I shall perhaps have something more splendid to name, only

I should like it & the Protestantism that Henry
came and soon -

During the two days we staid at Tappanwooly
I scrambled over not a few hills & forest tracts,
but the season is not the best. The night we came
in, we had a narrow escape. We went ashore on
Mansilar Island in the evening, the vessel con-
tinuing under slit, night came on, the ship out-
sailed us, we lost sight of her, and had to row
about twenty miles in the dark without com-
pass & no stars visible. Ten minutes after we did
get on board, (which was at one o'clock at night)

There came on a most furious squall w^{ch}
nearly drove us from our anchors, and would
have sent us & the boat had we been out in it, to
the d—l in double quick time. However we were
born under lucky stars. In Mansilar, found
what I take to be Schochena Swieteniaoides Roxb.
a delightfully fragrant tree. The camphor trees
were not in flower, but we cut down one
and got some camphor out of it, a piece of
good fortune, as one in a hundred only is found
to contain it. They are indeed the Monarchs

of the forest. The one cut down measured
go feet to the first ~~the~~ branches, diameter in
proportion and perfectly straight. —

JUN

Young plants, & also of the *Agave* *Banksiana*.
Chalcid is a compound *Chalcid* name,
and is *Acromyza nimis affinis*. — What think

you of a fourth species of *Chalcid* mesocephus, which
I had a great mind to call *Chalcid* *metastrophus*, for the
Cephalic are arranged in such a way as to look

very like *Chalcid*. I am almost at a loss how to
pursue the *Chalcid*. The ground on the
margin tells you an idea. The *Chalcid*

are irregularly furnished on the summit
of the *Chalcid* & all the *Chalcid* stem
one way & one level at an angle to the
pedicel would. *Chalcid* *Chalcid*

Chalcid *Chalcid* *Chalcid* *Chalcid*.
The young *Chalcid* *Chalcid* *Chalcid*
or opposite *Chalcid*, *Chalcid* *Chalcid* *Chalcid*.

There is a great mind to bring this genus into
great families, with a tracing of *Chalcid*
characters of the others. *Chalcid* *Chalcid*
and also become a place.

The people ^{in the country} ~~at~~ *Chalcid* are *Chalcid*, and
are more curious to ascertain whether they were
really cannibals as has been reported. The
inquiries have placed the fact beyond a doubt
and the circumstances attending the practice are
such as are almost afraid to mention as they
are so many. He is said. It appears that by
the *Chalcid* law the capital punishment is
for certain crimes is to be eaten, and the execu-
tion of the sentence is the occasion of a grand
feast. But the most horrible part of the story
is that the prisoner is actually eaten
alive, and has the pleasure of seeing his
flesh devoured before his eyes. Cutting off
his head is the conclusion of the execution.
But you give credit to this tale, however
credible I fear it is a fact. However
it is so in truth some time ^{or other} to pay
them a visit, and have the evidence of
go to the matter. He is said to eat
a human feast. I shall send you a *Chalcid* *Chalcid*
found in *Chalcid* *Chalcid*. The *Chalcid* of the land
an *Chalcid* *Chalcid*, or will you have a *Chalcid*
one. — None of this however is another *Chalcid*

enclose to you the letters for Mr. G. G. ...
Mr. Lambard which you forward -
read them & tell me if you approve
I wrote them in hopes of being able to send
them to you but was too late. I
know by this they have gone on the
Rebort. Had I gone in, I wish me could
I am finished it together but it will
be just as good otherwise. I shall be an-
xious to hear what it produces. The next
step in view the bringing in about a con-
nection between us in the Dept. -
I shall also enclose letters for Calder &
Lindsay, you see I do not give you an
easy way. There is enough
I am very sorry for me. I shall be
I shall be very sorry for me.

Extrait de la lettre de M. de Fontenay à M. de Fontenay

M. de Fontenay

Je vous remercie de me proposer de
répondre à votre lettre amicale, ajoutant que vous devez être
très satisfait de votre ouvrage. Je lui envoie cette lettre pour vous en
faire un souvenir de l'intérêt que vous m'avez toujours pris
à en avoir fait une si grande affaire, et que vous m'avez
si bien fait sentir que vous n'avez rien fait de semblable
depuis que vous avez été à Paris. Je vous envoie
de recevoir de M. de Fontenay que j'ai fait par votre ami
M. de Fontenay qui m'a écrit souvent et toujours en me
me rappelant à votre souvenir comme vous le faites
distinction. Je me suis fait tel vous a fait savoir tous les
jours de la même manière à M. de Fontenay. Je vous envoie
beaucoup de choses et vous m'avez toujours écrit de vous
même de votre satisfaction avec M. de Fontenay. Il faut à une
lettre faite complaisance par un homme vertueux et sage dans
votre consolation que le bon droit de -f « ^ ». Si je puis faire
à votre satisfaction de cet ouvrage de M. de Fontenay. Je vous
envoie que les M. de Fontenay de la compagnie ont un grand
intérêt à ce que vous soyez content de ce que vous en faites
surtout lui faire la grande perspective de l'avenir et
de l'avenir de tout état semblable à celui de l'État de
Fontenay de l'État de Fontenay. Je vous envoie
planches en quantité et de proposer de continuer son travail.

Dans chacune de ses lettres, il me parle et appelle par son nom
 une partie de ses manuscrits, et la partie qui appartenait
 à son grand-père, et il pense que je pourrais être intéressé de votre collection
 que vous lui avez fait voir. Il est sûr que peu de gens ont
 fait probablement attention à de pareils ouvrages, écrits sans
 but et en tout fait avec la dévotion des hommes qui ont
 recueilli et au quel ils tiennent ces livres - votre nom deviendrait
 connu et cher à tous les amateurs de la nature et vous pourriez
 en échange d'une collection que vous saisissez - *immense* une collection
 après laquelle sans doute vous aspireriez qu'il vous en
 soit fait. *A... fm* à cela en résumé *t... V... avec tout le...* *Xr...*
 notre ami Monsieur Machet attaché à votre collection et tout le cas
 qu'il fait de votre ouvrage - et il était riche d'avoir ce monument en
 son temps et qu'il est intéressant, je ne doute pas qu'il se soit pour
 acquiescer ce que pour vous est peut-être le lieu de valeur et
 abandonné et oublié dans quelques vieilles armoires - écrivez
 moi par le retour de tout ce que vous écrivez aussi à Monsieur Machet
 et j'ai agi en tout parlant de votre ouvrage et de ce que dans
 le désir de lui procurer de l'impression une disposition particulière
 professionnelle au cas qu'il en ferait un jour.

Adieu, Mon cher Monsieur Lachon, croyez-moi bien,
 Sincèrement votre ami, *P. Siquier*, *L. Siffert*

Péronne
 20 Juin 1820

Mon cher & honneur le faire, Je suis venu a gay
Egoudu & de la réception de votre lettre amicale du 28-
Jou dernier que je n'ai eue que le 9, devant aussi dernier par un
hoir de M^{de} Cozy, C'est que devant me rendre en ville, a cette
Epoque et ayant formé depuis longtemps le projet d'aller vous voir,
a Belombre, je devois vous donner une leçon verbale, j'envis
a M^{de} Jany Lemaire de vous le demander, j'en suis revenu par elle
qui divers contrariétés qui lui sont survenues qui ne ont
Empêché de partir, difficultés que f ^ . ^ ^ ^ & ^ / < a ^ * l ~ de
surmonter si j'en avois trouvé depuis quel que temps, sans que
j'en cherche un bon.

En attendant l'avantage d'aller vous visiter, j'en ai pour
Egoudu au sujet de la demande du Docteur Monville, Je suis
tres sensible a tout ce qui vous dit f^o moi de flatture, pour devoy
vous l'appeller qui avoit été de f^o Europe, j'en suis de qui
Je lui avois écrit plusieurs fois dans l'esperance de vous
me dire de vous remettre une lettre f^o lui: Lorsqu'il me fit
l'honneur de venir me visiter avec son M^{de} Perrel, que je
regrette beaucoup, j'ai moi m'a été aussi sensible que celles
de votre ami M^{de} Novate, pour qui il a affecté d'aller habiter
Le hui domini plusieurs Echantillons de son herbier qui étoit
considérable, C'étoit le fruit de plusieurs années de travail, j'en ai eue
les grands Botanistes qui sont vos herbiers d'aujourd'hui, -
surtout M^{de} Michaux, le grand Botaniste de Gabon français,
qui a demeuré plus d'un an chez moi, j'en ai eue f^o j'en ai eue

- Les Botanistes, Car je n'ai pas, je ne suis qu'amateur, -
M^r. Woualick, me témoigna le désir d'avoir la totalité de mon herbier,
je lui dis que je le destinai à un beau frère, grand Botaniste que
j'avois en France, mais ayant eu le malheur de perdre ce beau frère
fait d'un vieil docteur habile, je résolus enfin de l'envoyer au Docteur
Woualick, et par détours après il se présenta, une occasion que je crus
favorable, M^r. Brown Cap^{te} de Marine qui vint ici, du Bengale,
avec un Chacquois Indigo, à la Colonne d'un M^r. Sunden et Mihia
Le Cap^{te} de Sunden séjourna ici, il étoit malade d'une obstruction au
foie, il vint à se faire traiter chez le Docteur Woualick hab^{te} de la Canton,
il me fut présenté et vint ensuite plusieurs fois dîner avec moi il me parla
du Docteur Woualick, et d'un autre Docteur, qui l'avoit engagé de venir
me voir, attendant de son départ, il logeoit à la ville, chez la femme
du Docteur Woualick, derrière M^r. Smith près le Champ de Mars, est-ce
que je lui lemit mon herbier en plusieurs Balots, M^r. le Docteur Woualick
je n'en ai que l'effelle par la date de l'époque de Soudogant, mais j'ai en
fait copie de ses lettres, qu'il m'a écrites sur la date, dit que j'y
étois parvenu en informant auprès de M^r. Mihia et de M^r. Woualick
ce qu'il devoit de la Capitale Brown, M^r lui en fut arrivé
quelque temps après à son départ, je vous en ai fait de la copie /to*
en fait de son départ et ensuite j'en ai au Docteur, d'un autre Cachy
Euliferas e* Ewan, je lui demandai au Docteur un bon S^r. fa
Blanc de Cachowira, par le même moyen: j'ai aussi de lui plusieurs
feuilles de M^r. Ravel, qui se croit de tous, en tant de ses lettres
M^r apprit qu'il avoit perdu la place de gouverneur du Jardin de
Plantes à Calcutta et qu'il étoit retenu à Sicanpore, Comptoir
Banco, j'en ai eu l'achat que vous me disiez qu'il est Ecritog^{ie}
& am la place j'oli en fera tout compliment, quand j'oli Ewan
à votre première Lettre, M^r. Woualick de bon et aimable
Docteur et si je puis lui être bon à quel qu'autre chose, je
me feras que je le ferai.

quoique je n'aie pas l'avantage de la naissance de votre Dame,
Veuillez cependant lui faire agréer les hommages les plus tendres,
en attendant que l'avantage de la naissance.

Adieu, et sachez Monsieur l'abbé, que ce sera un
plaisir de vous voir, avec toute l'affection et une sincère
attachement et croyez moi, Je vous prie,
P. de la Roche, Secrétaire

My dear && < . . .

As I do not know how

to address the Caledonia Horticultural Society
I have to day forwarded a parcel of seeds
for them by Sanger to your address
I trust they the favor of your sending was
you are in the habit of doing. I have also
written to my father who is a friend of S. Du
Cane about a share. I am trying much
to hear what you are doing. I have not
this season sent you a share of my hill
seeds as L. V. Grand promised

f^ & h^

Send one half of what he collected black
of us and as I have had numerous
demands from home and from different
parts of the country I am anxious to
hear if you have ever received any
of the subsequent drawings. Went
you after the unhappy 1st dispatch
The people here would willingly have
my garden turned into a kitchen
Garden if they could and have all my
plants turned out to make room for
Cauliflowers and Cabbages. This you
will allow would be too much to expect
from me however, as I would like to

K ii C

able to furnish good seed of kitchen
 vegetables and even have a few for special
 occasions in Superior; > ; < ; you would do
 me a great favor if you could send me
 a few either of those procured from Europe
 which are for sale in the city ^{inquire what some you}
 you can get them fresh or any thing **A**
 else in that way you can spare me
 Pray favor me with more seeds
 Am anxiously expecting a despatch from
 you - I'm only inland being in Chi > ^ ^ ^
 in the end of this year & I hope to
 present you with a good lot of seeds
 With best respects to Mr. Wallace
 Believe me My dear Wallace
 Yours Truly

Sir

Sydney M. Pease March 19th 1848

I have the honor of acknowledging
the receipt of your Letter of the 10th E. S. P. 19, and
likewise the packages, all safe, for which I beg
you acceptance of my best thanks, I feel obliged
particularly, by Prof. S. P. Pease, and I feel
pully J/f- , c : etc the hope j&. Science has not been
taken, in the ~~the~~ death of that eminent Gentleman

I am glad to hear of the safe arrival
of the Seeds for the Sept, Baring, and May, but I
long to hear of the ^{7*} state of the ^{1**} ~~to~~, I am afraid
they have [^] been neglected.

The Seeds received for the Scabellia
Polestina, and the Plants and Seeds for the ^{**~<£;}
are doing remarkably well, and are a great
ornament to our Garden, particularly Thinking in
Grandiflora, I feel obliged by your kindness in
endeavouring to procure me a copy of Pease's
I have some need, a copy of that work, and

of the Parties themselves -

On receiving the receipt of your kind
Letter, I had embarked, for San Domingo Land
and had actually proceeded to Sea, but fortunately
put back in a few days. I did not receive
your Letter until last night, although the Mail
has been here 8 Days, this morning will see some
equally unfortunate, but I hope that tomorrow
the Winds will be more propitious, should the
Mail depart previous to my return from San
Domingo Land, I hope you will excuse, any
apology - in not receiving anything by her
departure is precluded until my return, you
may expect everything required in your Letter
with the exception of Specimens in fruit or
flowers of *St. Anacardium Dombeyi*, the Geomorph
has promised me a plant ^{of *Argemone Fendleri*} from you, which shall
be sent by the first opportunity,

I send this by Capt. Pittman, of the
Ship *La Amable Aubrey* (the ship and crew are under
the Command), he has kindly offered to take charge of a

Box containing Seeds of *Telopea speciosa*,
Sybasclonus Pynfaminis, *Lambertia*, *Gomora*, *Bombax*
 of *Sar*, ξ , $f^{\wedge}jidC^{\wedge}A^*$ \wedge $<\&$ *Sar*, and *Cucalypta*, which I hope
 will all ^{be in the paper} *be in the paper*, I have no person who I can
 trust to put up a collection of Seeds in my absence
 by the next opportunity you may expect
 several Specimens of *Chrysanthemum* and some Plants
 of the *Cachiboe*, but least anything new.

I hope the Seeds for the *Sar* Mission,
 and the Plants and Seeds for the *Bombax*
 have arrived safe.

Receipt Dr. *Sar*, *three* *specimens*
 $\wedge\wedge J$ which I have the Honor
 to be

the danger to the world in
two hours of the fatal termination
of the war which was his great complaint
but it is supposed that it was occasioned
by some cold that had fallen
upon his lungs. - His own last
time he did a remarkable something
before he got over the throat. I have
felt on this occasion - and last
in a profound manner. I hope for
my country's happiness towards you
I am happy to hear that
she has reached the golden
age with all his complaints
I have relieved you
I pray about the hopes of the world
I shall be - I wish to be able
but the gates of Hell.

senting specimens - and I have shown
them the Model of the one which you
particularly require - supplies of and
as soon as I hear from you that they
have succeeded in sending you plenty
of the right kind. I shall give them
the present of the Gold Medal each -
which you desired me to purchase in
your name. Altho' our friends here
do not like to receive a head of a
European - I have written to the
Secretary and we are that they will have
no serious objections to my sending
you yours & I am all please
that they have hesitated, at all at least
that however you may safely make
your preparations - which I hope to
send you in as soon as possible

I shall be just delighted to see you
then, I think the arrangement which
you mention for Mr. Wallcut you
will find to be the best. - When
you are once here, you will have
no difficulty about remaining
with us as long as you like
I must now beg your acceptance
of my best thanks & acknowledgments
for the present of the Flora
India which I have received safe
as the you intended for per Mr. Wallcut
arrived at the same time & I have
placed it among his private papers
as his friends will be I will value
it on many accounts. I hope
it will be profitable. - I am
the mention I must close this for

My dear Mother
I have just received your letter
of the 10th and was glad to hear
from you. I am well and hope
these few lines will find you
the same. I have not much news
to write at present. I am
still in the city and will
be home in a few days.
I have not much news to write
at present. I am still in the
city and will be home in a few
days. I have not much news
to write at present. I am still
in the city and will be home

April the 27th Manchester

My dear Mother
I am very happy in being able to
report you out of the care of my
illness. I was prepared to wait for
the arrival of the Ministers and to
be disappointed about the expectation
of settling your journey. No operation
further than the little puncture
which was made, while made to
your coming up. You may therefore
apply yourself to business as usual
as soon as you like and safely
make all your preparations. I
will not delay communicating

What I expect to be a great
intelligence to you and I have
send you these few lines
to day. I have hereafter
you need any information
regarding the road, mode of
traveling &c. and the time which
I would recommend you to
your journey from the Bureau
the management which you
propose respecting the
is certainly, I think, most
advisable and I make no
doubt you will agree with me

Here (a few days) for your
Mountain Expedition about the
myself. I would recommend
such things as few people will
see as people and as little
baggage. I hope I shall be able
to secure material for everything
that will be required for the
and for the outfit and require a few
personal servants, a dome
clothes. Capt. Rogers has gone
to make the arrangements for the
Wade by but regards acceptable
to the Council. I believe we
will see very little of

of the paper
25th March 1920
3 April 1920

N. B. Providence March 15th 1820.

My dear Waltham

You must have just taken plan
in subject similar you may have in some
anticipated. But I conclude here, and themselves

in your French ^{of the} / . t. A. one word, several **O**
in your name just or ^{«^*e»*} *J«*+ they like to take it

believe you were fully prepared to expect, but not
perhaps for the utter disregard of all principle of honor.

and having opportunity of which I shall have to
give you the detail. You know how they were
taken up and brought forward by Mr. L. Waffles

in Calcutta at a time when their means were ex-
hausted, and they despairing of being able to effect

~~any~~ anything, and you know with what
hardship they have been treated, the important

aid that has been afforded them, the opportu-
nities that have been given them in short

the manner in which they have been patronized
by that powerful man, at never men were pa-

troned before. They have been allowed 1000
pages

...approbation of the Supreme Gov^t, and that
the period of their employment would be re-
gulated by that authority. The reply of the
Supreme Gov^t was received in Calcutta,
disapproving the arrangement, sanctioning
the expence already incurred, but directing
it to cease for the future. The two ar-
rivals here you found that they had been
very industrious and had got a considera-
ble number of animals of our kind or
other. As therefore they had exerted them-
selves to Stamford, with all the reason which
you know he had the discontent with them
before, felt unwilling to disappoint them
in any way and resolved to make an exer-
tion in their favor rather than at once
put a stop to their labours. He accordingly
afforded them an allowance of being
... months out of his own pocket
... chance of its eventually being approved
the Company, following them at the
... more than that as a sufficient number

sg,

f <x

of the principal specimens had already been
obtained, the expense might readily be kept
within those limits by avoiding an unne-
cessary number of duplicates. Now what
do you think was the reply to this or the
proposal? No words but those of the letter
itself can convey to you the full idea or
measure of the ingratitude and impudence
of it. I shall ask Mr. T. if you have a
copy of the correspondence which is perhaps
unique of its kind, and will show you better
than any thing else the true character of a
man. The fact is they think they have nearly
exhausted America, and now meditate their
retreat with as much as they can carry off
either by impudence, chicanery or claudes-
trinity. Several things have shown that
this has been in view for some time and
that they have been in wait for some
opportunity or pretext to effect their
purpose. They have accordingly laid
hold of this, and thrown off the mask!

It must a little prematurely, and that they
will find they have rather overrated their
own dexterity and the weakness and gullibi-
, & try of those they have to deal with. They
p.r. • A t-T-ti*+ today that as the*, are not allowed
to continue at the same rate as a S' / (and
T^A, decline the offer on a *-J and scale) they can no
longer consent to withhold from the world
the important results of their observations. :- / * <
that being disappointed in their expectations
by the S * they cannot consent to give
up the collections; that as advances have been
made, they offer either to repay the whole
and take the collection to their selves, or divide
it with the Company. But I am not going
to justify in substituting any other words for
their own, which far surpasses in effrontery
& disregard to truth what I am capable of
putting into English. I shall therefore refer
you to the original, that you may see how these
proposals can be carried. They say they were obli-
g'd to come here, and in compliance therewith
abandoned the business they had successfully
commenced in Bengal, with many similar bus.

and probably insist on bringing forward their
own parcels of nonsense, what they call their
"idées spirituelles", and thus put the economy to
the test, by exposing their igno-
rance as well as ingratitude. You have seen
some of their "notices" as they call them, and
know pretty well what kind of productions
they are. I should now be very glad if Mr.
would content himself with taking simply
the collections & drawings, concerning which
not a question can be made, and make them
a present of every scrap of observation
with full permission to go and to what
they like with them. It would really be pu-
nishing them in the best & fairest way and
then **CAL** subjects themselves might be dis-
cussed properly. The words, which
would complete the contract. There is only one

to be made that they be not supposed to be
the Gov^t by any means, for they may
say they are willing to pay for the collections, and
the Gov^t in a job of economy might buy them
and give them the collections which in no case

stark and stop these fellows mouths: In these
 there is no knowing what
 may be done. The fact being already established
 at the expense. They will of course try to make
 a good case and you know pretty well that
 they are not over scrupulous in making assertions
 do you see they... * > w ^ - * A O ^ ? ^ * ^ ^ f c < - . They
 ought to be exposed. - Let Genl. Barwicke
 (to whom I beg my compliments on his late
 accession of ' j C t r i ^ - T - r f / A * *) see the story, and see
 the correspondence. - If possible prevent
 Lord Hastings from being misinformed. - I mean
 humbug. (like the word & is do you) not being one
 of the things that his Lordship is quite proof
 against. - There is a report here at present
 that will take: . . * great part of the collections
 at once to England, which will be so much
 secured, by the bye I must mention an incident
 that occurred some days ago before this rupture that is
 ill. . ^ ^ r . i . 4 . of the man. And make the idea of their claim the
 more extraordinary. A stuffed squirrel of a peculiar kind
 had been sent to Lady to present some...

the animal had been sent some... to the... but they
 do not seem to know how to... when one...
 it was produced... and...
 was...
 to every thing...
 was...
 packet...

and promised to return it, which however they failed to do, making use of it in fact to make a drawing & description from, without any acknowledgment of course. Now the idea of their refusing to deliver the skin and remainder of specimens are in these collections in the same manner is really super excellent. One more anecdote. You remember Mr J. brought up the Legation with him to Bengal for the purpose of sending home. He desired that the whole should be put up in a cask of spirits, & the bones separately. It was ^{not} while we returned here that ~~they~~ discovered that they had kept back the skin, and sent the remainder. Fifty similar things (by what name shall I call them) I could mention. The fact our return perhaps was fortunate, as it appears that they had actually been preparing to steal a march and to be off with the whole. I much was this expedient that the acting Resident had actually his eye upon them to place a guard over the house and property, if they should make the attempt. —

Some commenced at once within us many
uppermost at the moment, before even acquainting
you with our safe arrival here. I wrote
by a vessel ^{* /} parted with us at Padang and
has proceeding from thence to Madras.

In that I gave you some account of Sep-
panooby and the discoveries in that
quarter. We arrived here on the 3^d March
but the weather was so bad, and the snow
so great in consequence that we were
unable to land till next day. Rather tan-
talizing this, particularly to Mr. Row-
ley we are now once more quietly settled
and beginning to resume our old position.
This business of the Frenchmen will give
me some additional occupation & disturbance
as all their collections come in here, and there
will be the plague of stowing and arranging
them: cum stragulis, et filthibus, et ceteris
et ceteris. -- Found here some of your former
dispatches which had not appeared on my
leaving this, particularly the valuable
one by Mr. Stuart. Beyond of this
series appears to be totally missing, that
of March 1819 p. 1019 & 1020 of which not a
trace, and what is provoking it probably
contained a portion of Roxburgh's Rep-

as I find the part from "Polygonum la-
tatum" & "Cassia siccata"; wanting. Pray
make some enquiry respecting the proba-
ble parts, and of last. The writer, says as
well as myself, it is known to have been
found in it lately in examining a species
of Laurus called by the Malays, Rays
Labis, or the Virgin tree, which name I
find subjoined in the Catalogue D. S. L.
L. porrecta. Why the devil did he give it
that name; I can hardly think
of letting it stand when a much more
decent one might be given in allusion to
the nature of the appellation. Let hence-
forth be called Laurus Rays, or Laurus
~~Pentoxylon~~, alias the Virgin Laurus.
Which do you approve? It yields an oil
much valued by the natives and is called
Labis.

Cepini. — Watson arrived here not
long after us, but, prob dolor! brought
nothing from you. There however that
another vessel is I follow, by which

May I send your dispatches:—

Naturalists have a grand affair to inform you of, nothing like them, specimens of the gigantic flower of Sumatra: *Rafflesia Titan*? *Ind. dicis*?— Marten in a letter to Mr. Hanford, proposes *Rafflesia elephantina*, HL.t^u. 1 /
I must send you a pencil outline of its fructification, in which respect it appears to be as singular & unique as ever. — It is no *Asclepiad*, as was at first guessed. nor does it appear to belong to any known Nat. family. It is *Polyandrous* or rather *Gynandrous*. The anthers are large & thick, lobes, sepals and calyx in hollow under & covered by the lower & projecting edge of the stipe. They are of a spongy porous texture ^{internally} and have on the summit an umbilicate spot of a lighter color, in the center of which is a pore or foramen. The stamens & pistil are in a yet unopened bud, of the size of a good cabbage. I have information of others and as soon as these of this being blown, I mean to take a journey to see them in their natural spot.

March 22^d - The business with the French-
men is drawing ^{^y} &- A close. The correspondence
has become so long, and ^P his S. is anxious to
send a copy home ^{t ^c,} yfci «4tL^L &* &*£_ a*+ < &
tomorrow, that I fear I shall not be
able to enclose it in this, but it shall
follow. The committee have done their
/ *
duty in taking charge of all the speci-
mens in the course of which the Frenchman
showed further than his mean jealous spirit
in refusing to give specific names to the
subjects ⁾⁺ & taking off all the distinguish-
ing tickets that they had previously appended
to them. The specimens being received, the
committee were desirous to inform them that
by the terms of 4- • • • • • ment they were
-£} <* < & < / +jt 4 +*£^ ^zt
that if they agreed to this and gave their
word of honor that the whole of the collection
were made over without reservation, they
were authorized to make them an offer.
which was, that if they would agree not

and that Deand has more cunning and
duplicity that would always prefer arti-
fice & indirect, smooth methods to
more open & violent ones. Deance
Sunbustand is going to Batavia, thence
to Bengal, and Deand talks of going to
Pahang to prosecute further researches.
The sooner they get the letters & a good
guidance. Let me know what they
say or do in Calcutta. —

I send by the ship the many Indian ink
drawings of the two Nepenthes, the gigantic flower
the Campylor. & of that beautiful pentandrium with
femly veined & serrated leaves & white fruit. I have
named it *Euthemis* ab. *subopur.* com. in. *quid* *thin*
The two species are *E. leucocarpa* & *E. minor*. — I have
also sent descriptions of these & of the tree Sago. They
go to Mr. Marden with instructions to take such notice
of them as may prevent anticipation at the same
time that he is apprised of the intention of publish-
ing some of them in a journal. I would not I
think be easy to select other plants so interesting
I must soon send you a copy of my account
of these. Shall we long have lots of descriptions

The singular Combretacea with
crimson flowers & thick fleshy leaves
I found here on the banks of the
'to** - River, mounted to the side
of a good tree. The native name
is Api Api. (pine) I propose there-
fore in allusion to that to be **Jt**
Pyrrohanthus. 4-ruJ** - **+*

There now **u*S*** ***+*** **<*** of the
great flower within thirty miles not
[^] **i** [^] but will be within a month
A<< them! ***||** **A** once these ships
& French are gone off I shall
set to work & sail, and you shall
see. I have found among the convicts
a fellow who was employed (he says) in
your seed house. Etc. There is
a tremendous letter, and yet if I could
settle myself properly to work I shall

fifty hundred more things to say.

A hansom carman chap of boldness
Lieut. Kele is going up to
Calcutta Dept married & re-
turns here with his wife. He
asked to take any commissions
for me, and I told him to let
you know when he was coming
down & take charge of any
thing you might have.

I trouble you with a letter
for our friend Mr Gittiman
as I know not whether to ad-
dress it to Calcutta or Mon-
glyn.

I am anxious to hear your
plans in relation to Nepal
&c. - Have you any
accounts of George since the
Nepal Expedition. - My very best
regards to Mrs. Weller -
and believe me ever

My dear Weller
yours very sincerely

William Jackson.

Mr & Lady R. always desire to be
renewed to you both. The
West Borneo arrived in excellent
condition & was most acceptable
as also the other things in the
two boxes. -

WJ

W. Jack

March 15 & 22

1820

Recd per Commodore

x5 V,

1820

5

The Honble Sir Augustus Keppel
Lieutenant Governor

Gentlemen

I have thought it proper to appoint
you to be a Commissioner for the purpose of
taking charge from Messrs. Briers & Co. of the
several accounts of the several settlements in
this Department, and of superintending the packing
shipment & delivery which is intended
to be transmitted to Europe by the Mary.

You are accordingly directed
to proceed forthwith to Messrs. Briers & Co. &
after appointing three gentlemen of your appoint-
ment, to assist you in the discharge of your
charge the whole of their collections of every
description whether done in the Colonies or in Europe

In the first place you will
take charge of the whole of the drawings and
Musters of every description & forward them with-
out delay to me.

Afterwards you will proceed
to take an account of the several subjects in
the Colonies, and forthwith to send me of each

the Government thought proper to lay claim to
the collection, & to propose towards **"* > - & &** they
would voluntarily and voluntarily to deliver
it over in the best state of *******W4&L** **10**

having them packed in the best manner
& with the least possible delay.

5 In the packing of them last it
is expected that Mr. Blair's allowance will
himself give you aid under your general
superintendance; you will of course attend to
all their suggestions in the subject for the
preservation of the articles, and you are to furnish
all further materials which may be required,
such as boxes, spirits, Coals &c.

6 Rooms in the lower part of
the old Government House have been appropri-
ated for the deposit of the collections beyond those
two sets above mentioned, and you are to take
measures for removing **JFS* *' <4r« **/&&** **10**

7 You **/^AVA-//4/f-** attention
should be directed to a general catalogue of the
whole collection according to the accompanying
form. Each individual object is to be listed
with the number corresponding to that in the
Catalogue. This is an object of essential importance
and will demand your particular care.

The early departure of the ship
may perhaps induce the Committee to
report... fully to Government the progress
they had made in the duties assigned them in

at your acquaintance, and will be held
subsequently responsible for their conduct.
You will of course take an account of the
contents of each Case, & affix a number & date.

It is to be hoped that no diffi-
culties or delays **++fs s& *** A*** may
be met by Messrs. Davis & Co., and that they
will go hand in hand with you in carrying
these measures into effect. ***^ 4&+** A contrary
disposition, however, you will of course
use your discretion in the adoption of all
necessary precautions for preventing injury or
defalcation in the collection, or delay in the
remittance of the duties imposed on you.

Enclosed I transmit an intima-
tion to Messrs. Davis & Co. of your appoint-
ment.

Fort Moultrie
B. Maultrie

James O.
Jr. G. H. Ruffin

Collected by me and to be considered as the property
of the Government of the Kingdom of the Netherlands
Bengal of which information is furnished as the
subject and to be subject to the order of

Miss Reed & Susan.

Gentlemen,

I have to acquaint you that a
Committee consisting of Capt. Watson, &
Mr. W. Lewis, & Lieutenant Ticeborn has
been appointed to receive charge of the North
Company's Collection under your care, and
further to request my reputation that
you will afford every facility to these
gentlemen in the execution of the duty
confid'd to them.

Yours truly
15 March 1721

Yours truly
J. J. Knap

1
Gentlemen,

As you have verbally agreed
that you will in the copies of tomorrow
recur over the whole of the remaining
Collection of Subjects in Natural History I
request to give you the following additional
instructions with regard to the descriptions.

1. By the enclosed copy of the
terms on which I engaged the services of Messrs
Linné & Swartz you will perceive that they
are bound to deliver over not only the whole
of the Subjects contained in the collection but
also their descriptions and observations on the same.

2. You will on my former call upon
Messrs Linné & Swartz to fulfil their agreement by
delivering over to you the whole of their papers
on the subject.

3. In the event of a ready compliance
with this and their giving you their assurance or
promise that they had made over the whole of

f

Honorable Sir,

Mr. Kew's letter under date the 15th instant, appointing a committee to review the collection of specimens of Natural History, which have been made by Capt. - - - - - under the sanction of the British Administration at Fort Marlborough.

Jb

Having reported at the Board of Directors on the evening of the 11th instant, we communicated to Capt. - - - - - the object of our nomination, pointing out, at the same time, your letter accompanying them, but we were sorry to see that the

4£*j£,-

specimens of Natural History, which have been collected by them during the period of their having remained an allowance from the Board of Directors might be delivered over to us, you are distinctly understood that they would not give us the specimens of them, but that they protested against our doing so, yet,

A

£/*

We accordingly took charge
of the drawings they proposed to have made
which we forwarded forthwith to Government
transmitting a list of the same.

We then commenced making
a catalogue of the different articles, agreeable
to the form transmitted with your letter of
instructions, which we have the honor to
enclose, & having separated them according
to the form prescribed, forwarded each set
to the destination allotted, but in doing
one set the most complete since Government,
one duplicate **SS~** of the paper for immediate
transmission to Europe, and a duplicate to
old Government & House for deposit. It
will be seen from the accompanying
catalogue, ***** that the duplicate for Europe
is wanting in several articles contained in
the original set sent to Government, and
the ***** duplicate is still more deficient generally,
whilst in the other **im* sS*** more than complete
in some particular articles.

[Signature]

Consequence of which Government thought
proper to direct that the specific names of
each subject should be affixed to the report
numbers in the Catalogue in addition to the
general classification which has been adopted.
The Committee accordingly requested Messrs. Smith
& Son to affix their epithets in regard to
this object, these gentlemen however excused
themselves on the plea of unwillingness to
venture a positive opinion, when they had
no extensive means of reference as it might
ultimately prove detrimental to their scientific
reputation.

In conformity with additional
instructions from Government dated 11th Instant,
the Committee again assembled at Messrs
Edgewood, and having submitted to Messrs. Smith
& Son a copy of their original engagement
with Government, whereby it is stipulated in
consideration of a certain monthly allowance
that their researches are to be made for and on
account of the British Company, but their
collections

"I have been assured by the local
Government, providing a reference to the Superior
Authorities."

Having pointedly brought this
engagement to their notice **v*£fcrv-f*** «
I have been assured by the Government
as follows.

"As it appears that you were
bound by the terms of your engagement
with Government to deliver over the whole
of the subjects of Natural History which
you have collected since the date thereof
together with their descriptions and your obser-
vations on them, we now call on you to
complete its fulfilment by **im ^ JI&IM' VvLA^^t^^tf^** over
the whole of your papers, connected with your
Researches during that period in the event
of your dying to, and giving up your papers
or papers that you have made over the whole
of your collections, drawings & descriptions
without reservation, we are authorized to make
Yours

In Evidence
of the

j Mr. **,m+++M ff£,,** as in charge of the
Government during the month of January 1864,
and it appears that the refusal of their
services was not signified to them at the
point specified in their Note, or at any time
whilst he was in **4 €&+*** of the Government,
it further appears that this refusal **□** was not
yet have officially communicated, and that a
Call

whether the amount of paper has been yet
received by these gentlemen or not does not
concern the Committee its having acknowledged
is sufficient to oblige the Executive Justice
as the amount is of course payable on
demand & should these gentlemen refuse
to receive any part of it, it acts with them
as if the money appeared to Government
to that effect, and should the Government think
proper to consider the services of these gentlemen
discontinued or having ceased from the time
specified by them & until they will be permitted
to receive such part of their collection as they
can find to have been made since that
period, and to have been obtained altogether
independent of the aid and assistance of
the public establishment of Government.
The Committee believe on their hands the bill
of these gentlemen for the whole of their accounts
for 15 months ending 1 April 1821, which
has received the sanction of Government,
must consider them as in the service of
Government

5th

In conclusion it is mutually agreed that on the fulfilment of the above conditions the present shareholders of the Company, who have previously having pledged their word of honor that they have fulfilled their public engagement with the Company as expressed in the Letter addressed to them under date the 7th March 1844. Sir Stamford Raffles is happy to return to them the consideration which he has always been desirous of showing them, and in order that no possible misunderstanding may hereafter arise this Memorandum is exchanged between those Gentlemen and Sir Stamford Raffles.

6th

Sir Stamford Raffles on his part pledges himself not to publish in France or in any Country foreign to England, any particulars regarding their concerns in the Eastern Islands until the expiration of a year from this date.

7th

Sir Stamford Raffles on his part will return to them as their

Agent

50

In conclusion it is

mutually agreed that on the fulfilment
of the above conditions the pecuniary
be a full acquittal of all pecuniary
demands on both sides.

Miss Leonard's Journal

Should they wish to supply your services under any circumstances and have only to convey to you my determination to bring your engagement to an immediate close.

Thos Moultrie
15 March 1820

Jan 24
Jas T. Moultrie

to point out to you the arrangement which
appears to me best calculated for insuring
the efficiency of your labours and my own
- success. It is essential towards a proper conduct
- of business that you should be in a
- situation most entirely dependent on your prompt
- compliance with my directions. I am, I
- myself that you will be in an opportunity
- which can neither be supported by honor or justice.

Before mentioning the matter
I further inform you that even had the British
Government sanctioned the continuation of the
allowance to you of \$1000 per month, should
in the knowledge how large of your labours,
and the disregard you have lately shown
to my repeated instructions have felt it my
duty at once to have discontinued your employ-
ment. On having this plan for Calcutta left
with you, I have directed for drawing up a correct
business description of every subject, but it
now appears that you have thought fit
- actually to disregard these orders. Your neglect
in this respect will oblige me to supply
the deficiency myself and whatever may
be the source of the consequence to
yourself will be entirely attributable to

Yours

...the extent of my wishes in this respect
/ - :
the general character, as well as the **41** particular in

part of the **#L** for character, I would recommend
to be invariably **^#r** adhered to, the ****r** following points

which you will observe you were so good
that many of the subjects were not collected
by you, for instance, the deposition both

of subjects of which **Af>** we debated with you
the **..+*** by way of an introduction for the lower class

the larger class, and a summary of the **tf.** In short,
you would ***** as you **A** are of the highest order

have been unable to effect any thing whatsoever
with the aid of my influence and authority,
what opportunity you can propose for that is
more than I can imagine.

7 This supposition of yours therefore
being as you must be well aware, absolutely
impossible, I must take into consideration the

conditions you pretend to dictate in the subsequent
part of your letter, as you can have no right

to make ****7** speculations **•pi *t . . .** in any case
whatsoever and in the performance of your duty **<****

the whole of the article concerning the rights of the people
under your charge and has been referred to you

to be considered and acted upon as you see fit
I have been very pleas'd to hear of the success of your mission

Hi
I am
Dear Sir

Completed the circumstances of these animals
you already possess. However that it will
be easy for you to make me a succinctly
Report of your proceedings accompanied

Mean to acknowledge the
receipt of your letter of the 14th instant in
reply to my communication of the preceding day

The explanation on what you
perceive it is impossible in **JH*****
*4 of argument with you on the subject, the
type you pretend to make of reimbursing the
Government is altogether **rfyd**** and excessive,
that has much surprised you should persist in it.

You would wish to make it
appear that the Government is reimbursing
from Bengal, that you make great sacrifices
for the purpose. This is altogether at variance
with the fact that you requested to
accompany me, & refused to place the whole of the
collections and observations at my disposal on any
terms I might think proper. You subsequently
represented that notwithstanding the assistance
otherwise enabled to offer you, you could not
procure as great a number of primary specimens,
as your own party had already been employed in
Bengal. I have given to pay you a share not

concerning

At each of the Assemblies
will be held, and of course open to admission
of all persons, provided as your observations
may be consulted and enlarged.

It is a great opportunity to see witnesses
to you the usual constitution, which it
was always my intention to show you.

Fullerton
the 13th March
1790

Yours
John T. Roper

Sunday 2^d March 1821

My dear Sir

I have the pleasure to inform you
that the collection he received and noticed in
England in the first instance after this &
the scientific description has since appeared
in England I shall be most happy to transfer
to you the same subjects, and you will of
course be at perfect liberty to publish in
France any more detailed or elaborate account
that you may think proper on your own
account.

Yours truly
J. L. Reptier

1819

and not a matter
of right

The propriety of the East India Company, as
it was formerly established, that you
could report an authority for ^{1/2}fe^{1/2}
in your own account. You were bound
of you to attend, respectfully to the forms
that I submitted, I am imposing an
intrusion and perhaps in your opinion
in some respects an unnecessary laborious
task, but you are to consider that however
unpleasant these details and forms are to
persons whose time is devoted to the subject,
and when acquisitions are copious, I have
than above such considerations, I am
myself a plain man, and do not possess
these advantages. I have undoubtless
that your labours shall be duly appreciated
in England and to effect this, I am
I should go have in hand with you and
that you should discuss the forms which are
indispensable for my assistance.

In conclusion I request to call
your attention to the importance of making
a selection of some of a few sheets of
papers in spirits or prepared as specimens
for transmission to the East India Company

you represent yourselves to have examined, but
request respectfully to state that there is not a
single instance in which any reputation held
out by you has not been ~~and~~ ^{<*fsm**~} realized.

~~For the purpose of the~~
most during the preceding month.

I should wish you to lose no
time in sending me the descriptions of all
the subjects you propose to present in the journals
you had down, and would then be fully
completed, to be happy to receive your
daily labours in preparation to writing

*tf. If you have completed any given number
or date. **4'** There are some I have been a

certain portion of each day to your pursuits
and communicate to you without delay on
all questions which may occur. As your
collections are ~~of~~ ^{of} ~~great~~ ^{of} ~~importance~~
it appears to me that it would be advisable
to bring up the account of descriptions of the
flora now prepared in preparation to the common
and of more extensive researches in the
history of the flora, a few days delay will
be of no material consequence, and the advantage
of arranging your materials as you find it
convenient.

To

Major General & Council

Gentlemen,

I have to acknowledge the receipt of your letter of the 5th instant explaining of the object of your Researches and of the circumstances, in which you are placed.

It is my intention at an early period to submit to the Most Noble the Governor General in Council, and also to the Most Noble the Board of Directors, my opinion on the advantages which may result to Science and general Knowledge, by the prosecution of the pursuits in which you are engaged, and in the mean time request to enable you the following offer.

Your Researches to be confined to Sumatra and the smaller Islands in its immediate vicinity.

The draughtsmen you engaged by you to be entertained at the charge of Government, who will also defray all incidental and necessary expenses to which you may be subjected in the prosecution of your Researches, on

condition

condition that such Researches are made for
and in account of the Honourable the East
India Company, and that your Collections you
are considered as their property.

5 An estimate to be formed
of your Monthly Expenses for such Establish-
ment, in which a fixed sum will be paid
to you to cover all charges of every description,
and the arrangement and transmission to
Europe or to Bengal of such information and
materials as you may collect to be subject to
the order of Government.

6 With reference to your present
Establishment, and the Expenses you must
necessarily be subjected to, a fixed monthly
allowance of 500^{Rs} is considered adequate to
cover all your disbursements and at the
same time to provide for the Station &c for
the Botanical Department, the sum will
therefore be authorized until may be reviewed
with the further orders of the Supreme Govern-
ment, and what sum you have the honour to
communicate with you previously my
Sentiments regarding the arrangement of
your materials, and the plan which
it be advisable to pursue in order to

28 March

My dear Walter

I am better than my
word. I have fortunately got the
English part of the correspondence
which I enclose. It is so difficult
to get this French writing copied
that I cannot send it now but
it shall follow. The present
will give a tolerable idea on
the subject. The first letter is
the original agreement which
one would have thought precise
enough. I enclose a note

for Lindsey. which money
forward.

Camp of Wood Vabudh,

Believe me in haste

Yours ever

William ~~Stark~~

27 May 1836

N^o 3. Bencoolun 29th March
1820

My Dear Mullick

I avail myself of a vessel pro-
ceeding to Batavia to send you the conclusion
of the correspondence of which part was for-
warded by the Commodore. When I wrote
you ^{the} ***s/k;** Committee had just closed their
proceedings, and the Frenchmen had given
their word of honor that they had given up
every thing. On that he I wrote to them that
as they had concluded every thing with the
committee, the question of regret being no longer
in dispute he was enabled to offer them
the same consideration that he always in-
tended, and I do this in the most gratifying
manner, desiring them to send in a list

of such duphcates as they esteemed most
valuable, which he would be happy to
present to them. They sent in a list
accordingly, which was complied with.
One would have thought this conduct
had some effect, and at first they
were rather submissive, at least in
direct communications, though

4 every one with whom they had any
intercourse, they spoke in a high tone
& made the grossest misstatements.

They **Jl<~*s 4<~0-1** shew it much however un-
til the Indiana came in, and they
agreed to go in her to **Portage**, when they

3

you flew out, and on one occasion

JU*s£' said so rudely that Mr S. was

obliged to order him to walk out of the house. The next day assembled the committee to close finally every thing with them, and they signed the documents of which the enclosed is a copy. It will

/

if

& <U+

D

$j^{\wedge\wedge}fy \bullet \quad \wedge \wedge \vee 4 - \sim \wedge * - ? \quad \wedge$

that the day the committee concluded the ^{Ar.} \wedge _{Ar.} \wedge of receiving charge of the collections, ^{Dr. D} they reported that a robbery had taken place the night before by which they had lost all these papers.

A robbery of nothing but papers looked a little suspicious, but no comment was made. Yesterday morning however

a man came in and reported that a box had been seen among the junk near the house where the Frenchmen had been living, but that he was afraid to touch it for fear of being accused of having stolen it. It was then sent for and brought in to Sir J. while in Court which happened to be sitting that day. It was a box securely nailed up & well tarred outside & at the joints. On opening it there appeared first a quantity of tools and then a quantity of papers rolled up & laid in as if hastily packed; these proved to be the Frenchmens papers who were informed of the circumstances & were somewhat surprised at the circum-

coming to light of the precious deposit.

The box was handed over to the Com-

mission from the French side

such part of the contents ^{*^&d} ~~was~~

related to Nat. History. They gave a

few scraps, and sketches and gave

their word of honor that all the rest

were private papers. Unfortunately

for the value of this word, some of the

rolls of paper had been looked at, and

known the descriptions & sketches.

but these were not ^{delivered up} given, so that they

have given their word of honor to

what the whole court know. The

entire. So much for that part of it.

As to the finding of the box, from the

place where it lay, untouched and
unopened, the way in which the
papers were stowed, not laid in
order as if it had been the usual
depository, but rolled up hastily
as they came to hand, the way in
which the box itself was secured
with nails & sawn-wood, & further the
box having been recognized to have
been made only the very day before
was said to be mysterious, there
was little doubt that it was lost when
it could readily be found, and that its
discovery was a disappointment to
those who had been awaiting its loss.

But I am sick of the subject

Thank heaven for! is done with them.

Grand Lunders tried to go on & Pa-
tience and Duvarcel talks of going

to Patay, to make, he says, in three
months a better collection than that

of Mr. L. in a year. Grand says he goes

from Patay to Calcutta. He is a little

to be apprehended, from any thing

two such (what shall I call them) called

them already. Do you to be prepared

to see **•NS?** my mistake meant they

may spread, for which purpose

I have wasted so many words on them

They having ^{<^*^} over

the collection without ^{4^*Mi.-.} or obser-

ptions or at least with very ^{**+*} it

320
becomes necessary to supply the defi-
ciency and prepare an account of it
for England. This task of course
falls on me, and is no trifling one.
As the object is to have it out soon
I am obliged to devote myself to it
and must therefore let my own per-
suits stand still for a little. I have
been at work for some days, and
have got pretty well through the Man-
ualia. It is a devil of a job, but there
is no helping it, it must be got through.
I have not time for more at present so I
conclude with best regards to you & Mary.

and am ever My Dear Wallech
yours very truly William Lusk

W. Lusk
to Mr. Wallech
3 Feb 1842

My Dear Sir,

I have just a few moments to spare to, a piece
wishes to reply to your most excellent & kind letter
of the 11th instant & to thank you for the pleasure of receiving
the same in the manner on the 12th.

I am most happy to hear that all my despatches
have reached you in safety and be equally glad to find at
the same time pleased that they are in a fair way of getting
to you.

The Dictionary I have despatched for my acceptance
will be most valuable addition to me and on the
importance of a Dictionary I hope to profit by your lessons
drawn by its valuable contents, in return for which

I can only request you to accept of my very best and
thanking you, being unable to express my sentiments
in the fewest of words in the manner I could wish

Since my last enclosing a specimen of the same I regret
to say that my long and continued absence from
England has prevented me fulfilling the promise I
made you as I know you must be looking out for

me this for the promised despatch by David Barclay
but I am sure you will excuse the delay
owing from unavoidable & unexpected circumstances

I am now about half a way and at present must
cannot say when I expect to return to that and but
I wish that place you may not appear and sleep

on the early dispatch of the remaining Leds and Quains
in my paper, also all the dried plants, Plants,
Mosses, Lichens, Stone Specimens &c. I have to inform
you that my long absence is the usual and only cause
On this trip I have added considerably to my collection
of Stones, Mosses, plants, & Lichens, having with me an
excellent Pentahedron barometer.

Yesterday we attempted the Chataul on the
Pap among the Dymaluk but could not get within
4 miles of it. With such opposition we could
only attain yesterday the height of 13500 feet.
The immense fields of Snow between us & the Pap
compelled us with reluctance to return. The
man on our way to try the crossing Papson shot

London March 31st 1820

Wm. W. W. Superintendent of the B. G.
do do do

Dear Sir,

^ > £*** << fAS* s by

So regret that decisions my residence in London,
circumstances successively intervened to
prevent our entering into correspondence.
I can cordially assure you that my wishes
were strongly directed, towards it, and
I flatter myself that my situation and oppor-
tunities would have been favorable to
useful *** news, * r a direct.

Soon after j£ K x Island was taken
by the English forces in 1810, I made, by the
means of Dr. Hunter, an attempt to open
a reciprocal communication with Dr.
Ratburg; but his state of health at
that time was unfavorable to the pur-
pose, so perhaps, he was absent from
India; as it was, my communication
remained unacknowledged. During the
year 1819 I was removed from India;

but from the beginning of 1814 to the end of
1816, my pursuits, travels and collections
in Java might have contributed to
render me useful to you; I & several
of my friends whom you all know,
particularly Colonel Johnson, who
passed me with a communication
subject, paid me the comple-
ment to say that my ardour in
botanic pursuits, was nearly equalled
your own.

When you forwarded your com-
munication by Mr. Van Prosen, I am
sorry to state, it was too late for me
to contribute to your review. I received
your letter (of December 1817) late in
1818. At that time I had just returned
from Sumatra, my collections were
already shipped on board the Latona and
I was proceeding to join that vessel
at Amboyna to proceed to England.
If I have, in the hurry of the arrange-
ments for my departure is now likely
reflected to answer your letter, I ask you
many excuses for this. I cannot

* ft *. J - "

sufficiently express to You my gratitude
for the very obliging contents of Your
letter and the kind offer of assistance con-
tained in it; and it is my responsibility to
this kind offer, that I now take the liberty
to address You.

I had the pleasure to inform
You, that after many years labour, and
travels as well in Botanic collections as
in those of various branches of Zoology,
I had succeeded in bringing all my
collections with me to England in good
condition. They are now deposited at
the India-house (as they belong to the
East India Company). The beginning only has
been made to arrange them, and I am
as yet advancing very slow.

Now my Dear Sir, as You have
most kindly permitted me - "to recommend
Your services" to use Your own expression
as far as relates to the Botanic Garden
under Your superintendance, I am free
to show my views to You without re-
serve. As far as relates to Botany, there
is no unparalleled industry of hands, in

this country, an excellent opportunity of be-
coming acquainted with and comparing the
resizable productions of various parts of
India: but in Larlay this is hindered. I
greatly feel the loss, and I $*M^{^^}+2ufr_J$ in some
degree to supply it. Willst thou for this
purpose pray your assistance? I will ex-
plain myself. I wish by no means to
trouble thee with an application for
specimens of Larlay generally: my object
is to procure Coleoptera ^{specimens} in as far
as the Rohani Gorge and the vicini-
ties vicinity would afford an op-
portunity of making them. I have
in Laa confined myself chiefly to
Lepidoptera and Heteroptera insects
and in the collection of these I have
been pretty successful; but I wish
to compare my collections with those
made in other parts of $t+r$ $*/*\ll$.

But unless I have made some progress
in arranging my Laa collections, I can
only state my plans and views; I will take the
liberty by an early opportunity to explain
them to you more fully: and Mr. ~~Alley~~ will
take care to inform thee of my wish $< r$, $***+$

would be their practicability. I have
thought, as I have done in Java, to profit
by the assistance of intelligent natives.
Having received the first simple medicines
they would gradually improve by prac-
tice; and they would receive a monetary
value according to their proficiency. The
means for this would be supplied by me;
I should remit to necessary funds or make
provision for drawing on me for the amount.
As the Java Collection was the property
of the Hon^{ble} Company I wish to make them
for my previous use and information.

9 t

There are generally my views: but
they are not yet matured. In how far
they may apply to your part of India I know
not; but in this manner I think I can be use-
ful in introducing my poor ***** s* s S
and I find that nature *** . *^ . - . - has been em-
ployed in in North
Encouraged by I have taken
them the liberty of translating your visit.
Your remarks, pressing upon to allow
me to address you again on this subject,
when you
>* s/i^ _ rA* >~f***● *****

opportunity.

Allow me to offer to you respectfully my services in this country. The first thing I can do in relation to you, is to make you acquainted with the similarity of our Alpine plants and those of the Upper mountains of India; the collections of Sir Joseph Banks and Mr. Pancher, first seen by Macleay, will afford ample materials for a useful comparison. My *Herbarium* however is not yet unpacked, so I cannot give you a proper place for the comparison.

I have the honor to present you my sincere respects and to remain

Dear Sir

Your faithful servant
Thos. Horsfield.

To
London, first event, 1820.

To
C. Lushington Esq.
Secretary to Government
in the General Department

Sir,

I request that you will do me the favor
to present the enclosed to His Excellency the most
Honble the Governor General in Council on a subject, which
has for some time engaged my thoughts and which ap-
pears to be of considerable importance to the prosperity
of the Madras Company's Botanic Garden.

Ever since the first commencement of
this Institution it has been indebted for most of the Indian
plants which it cultivated to the liberal contributions
of a great number of gentlemen, residing in various
parts of India who, without aspiring to the title of pro-
fessional botanists, have pursued their zeal and talent
in promoting the cause of that science by collecting and
communicating whatever appeared to be new, or
known, or otherwise deserving of being introduced. The
number of plants with the characters and qualities which have thus been accumulated
is so great, that it is difficult to estimate the number of
contributors, which the garden may justly boast of
possessing. Indeed, of the difficulties and dangers of an
active research into the Natural History of India are
few persons are apprized.

*4*Ly Z*Mts jmt*

Cm*

These are the objects of his situation at the garden
 it is to them also that his attention should be devoted
 while abroad, desirous to such specific instructions
 Government might please to furnish him with that
 the requisite means for production of the best results
 I cannot doubt it is one that is adopted in most
 botanical institutions of a similar description as this
 and which, as I shall presently have the honor to
 demonstrate will in the present instance be shown.
 To with ^{J^M.} ^{fl} y

With reference to the preceding obser-
 vations and most anxiously desirous to be afforded
 an opportunity of attempting in trial of my own
 eye in this to my usual field of \$/ Indian Botany,
 having so long enjoyed the easy task of reaping at
 the garden, the harvest prepared as it were by the
 laborious exertions of others, I humbly entreat the
 Most Noble the Governor General in Council to
 sanction my ^{ML} ^{t+} tour this year to Nafal, one
 of the richest parts of ^m ^{^L^} and from whence
 the Garden has already derived such numerous and
 valuable additions in the difficulties which seemed
 to oppose the way to my visiting that are strange
 as a stranger, and which I thought it my duty
 to enquire into ^{*t* < X** ^ "XTflu.!} ^{< ** 4tZ' < u*j£J**£} be-
 fore Government, I am happy to say may be en-
 tirely removed, ^{ar} [^] Mr. Gardner having seen

£

1840

... I consider to secure every advantage
which may be derived from the proposed excursion, I so-
licit that His Serenity in Council will sanction my
taking with me an establishment consisting of some pain-
ters, and a couple of galleys and apprentices. It is well
known to His Excellency in Council, that the measure
of attaching four apprentices to this garden has been atten-
ded with the most happy success, and that
their behaviour and improvement have been equally
satisfactory. I am therefore desirous to take with me
with the view of assisting **#** **> JL**
more laborious part of their destined profession, and in
order to render this branch of the establishment more
suitable to the extent of the garden I request, that
I may be authorized to increase any present number of
apprentices I see, by engaging two additional boys
from the Orphan or Free School. The draughtsmen at-
tached to the institution will form a most essential
part of my travelling establishment, and as they are
willing to accompany me at an increase of their con-
gest to double their present amount of 115 Rupees per month,
I take the liberty to recommend, that the sum of 115
Rupees and 1/2 be granted for their subsistence. I have
a set of certain printers, who are employed to copy my
Natal Drawings, and during my absence be appro-
priated for that purpose. The remaining balance of 5
Rupees together with the increased wages of a couple of
experienced

experienced Gardeners whom it would be very desirable to take with me, will not exceed the small monthly sum of \$500 applied to the outposts, thus forming the whole amount of extra charges incurred on the account of my travelling party.

Finally I venture to appeal to the generosity of the Supreme Government in soliciting that I may be indulged with the permission to demand such and such kind of allowances as may be deemed to be necessary for the necessaries of myself and the establishment which I have taken the liberty to propose.

J* < ifc

T ^

I have the honor to be, Sir, Your most obedient humble servant,

Edw. Wallich M.D. Superintendent of the Botanic Garden

To H. Wallich Esq. M.D. Superintendent of the Botanical Garden

laid before His Most Excellent the Governor General in Council in the month of April 1820. I have the honor to be, Sir, Your most obedient humble servant, Mu li ^

v - mm ^ /

i

1

satisfied that the adoption of your proposition to proceed to Nepal with the view of prosecuting Botanic researches in that country and its vicinity will be attended with beneficial results to the Institution under your charge, and generally to the service to which it is associated. It appearing also that no objection exists on the part of the Government of Cochin to the measure, His Excellency in Council is pleased to permit you to be absent from your immediate duties for the period of one year dated from the commencement of the ensuing Rainy Season.

<2Mm**+', f**r Ji*sf<*4Ji**±'> **> spM*t£Z

You are also authorized on your departure to transfer the charge of the Botanic Garden to the Honorable Mr. Stuart, in conformity to his Offer.

Your Suggestions regarding the establishment which you propose shall accompany you, and the extra expense of about 450 Rupees per Mensem to be incurred on account of the maintenance of the Institution as well as the attachment of two additional apprentices to the Institution.

The Governor General in Council is likewise pleased to authorize you to draw a Monthly sum equal to the duties and allowances which he deems to enable you to provide for your accommodation according to the mode in which you may travel.

You will be pleased to submit

with great ease. No one
could have known ^{him} without
being impressed with the
excellence of his character & the
great worth and few equals.
Certain will be so much more
sincerely regretted with
the ^{loss} of him that every thing
richer added to your satisfaction
regarding you but to us ^{as well}
could be nothing. In case of ^{any}
now make every preparation
without any further delay
and leave Calcutta whenever
you may think proper. There

insufficient time between that
the time of your arrival at
the frontier for any details
on the subject of your journey
that may be necessary for your
information, and which will
give you an account of the progress
of the war, or as you may wish
for information, but the fact is
that you will get extremely
well and without any inconvenience
that I can perceive, by your leaving
Patna & arriving at Murshid
nagar about the time
mentioned in my former letter
there will be no objection that

I am aware of my bringing up
De Silva and two or three
parents, but let them come
as students without making
any particular display of their
arts and no notice will be
taken of them. There you will be
able to employ them as much
as you please. There will be
no impropriety in allowing
young up and to the parents
you the Minister on hand
will be best bestowed. Few
kinds of curious things are
at the same time acceptable
and you might probably be
able to pick up some articles

at no great expense at the
French shops which might
please you. I have
begged you to purchase a few
such things on my account
I have begged you to do to the
amount of a few hundred
rupees and take charge of them
for me when you leave Calcutta
Receiving the book to be sent to
V, I wish speak to you
people about the shop. I
am sorry they have not yet
hit upon the right sort. I
am sure we had the same
before. I wish you were the
present you desired me to pay

the Ash also endeavor to
have some bags of the
down for you. I have given
her the notes which were
in your last letter.

I have also another quantity
of your check is that when you
leave California you wish to
up for me with you a plate
a ^{j ^ , ? /} Sweet Mountain and of
V
Honeycomb if you can spare
them and also a couple of the
S. Wales. I am very good
enough to send you these before
I have had one - but whether

I want to care a other cause
to get to know more of them have
been pursued. If they will
advice me make you therefore
so much. please let them
accompany you up. A few
words of English if some is all
would be very acceptable.
I am very glad you have heard
from Hancock and that
he was well and making
progress. I am sure of tongue
however that he will succeed
in his object even in the new
post, in which he is now
endeavouring to penetrate the

With him all success. The
Royal Society will be required
to pay after me to W. W. W. W.
and Helms.

Your most obedient
servant

J. G. Jackson

The works of engraving which
mention are probably expensive
then people would not perhaps
appreciate them, you could probably
pick some preferable things at a
Dubast. but I hardly know what
to suggest. You have had the
exercise your judgment to
make a selection of a number
of curious notes. J. G. J.

Capitulum
1867
1867
1867

Archaeological Society

Regent Street, London

22 April 1820.

J have the pleasure of transmitting a correspondence with

you, by transmitting the thanks of the Society for the collection of
Tute, which the Court of Directors sent to you, together with
a copy of your Communication to the Society, of the
date of November 11. 1818.

It has flattered ourselves with the expectation of receiving
a further supply before this time, but it is probable that you waited for
an acknowledgment, previous to your repeating it, in some
other circumstances, which I will not trouble you with the detail
of.

Pursuant to the request of these Lords, the Society, knowing
W your ability and inclination to contribute to assist and promote
the various matters which it is the principal object of this Institution
to attend to, has elected you one of its Corresponding Members, in con-
sequence of this, your Diploma, with the name and List of the Society,
and the papers relating to it, accompanying this dispatch. You will
also receive with it, the Silver Medal of the Society, which the Court
is desirous to be presented to you in acknowledgment of your attention
to its interests, in transmitting the Loans above alluded to.

The safe arrival of these things, is your most obliged servant,
The Secretary

Business with a copy of the use of the Botanical Establishment if ft course, brought your copy of our the subsequent publications v iU it regularly transmitted ueff ei , j, (vW you will continue to be acquainted with our proceedings.

It will be, no doubt, very much i* vruu power to aid our endeavours in promoting and improving every branch of Horticulture in iU country, whether ^ ^ ornamental or useful, and to this end we shall be obliged i> you A such articles as resources which you command, can supply ornamental plants of a kind we gladly receive, and mt/U*-itii fa 0[Ci. con, which though at present, not very large, we expect soon will be great extent h vegetables and Fruits of all xi- miltion we eagerly look for.

With respect to JUd.s, we rather prefer receiving a greater quantity of v * few articles than a great variety in small quantity, because we not only grow them ourselves, but distribute them to our subscribers and to the chief gardens in England, but also send them to other countries. Plants from Nepal, which are likely to bear our climate, will be most acceptable. To the genus Stora, my attention has been particularly ^L. directed, and I believe y r< #J* furnish us with many new species J * . * ffit> which, all of which will be most well come. The stock of the Stamburum Seed you sent last year, has been very greatly distributed by us *r.^ and provided a great acquisition.

The names and descriptions of Stamburum Seeds and their uses are given in the enclosed paper and you will find them very interesting.

the description of Plants. Some of the most splendid amongst
them as *G. Sonchifolia* &c. should greatly receive

Mr. K. Leake has mentioned to me some species of
moss, which I wish much to obtain. I believe some plants of the
same kind that we had years ago, but from some accident they are now
lost.

7. at

Whatever package, should be directed to
the care of David Mathew
Esq. at the House, all articles destined for the Society being
sent to the same, Mr. Mathew receives the whole for us.

7!

You mention 7 A*^y Plants, which I have seen, and
will, but I observe that the seeds which you send over in paper, are
frequently destroyed by the moisture of it. I have found that by plac-
ing seeds in any sand in bottles (when they are liable to freeze)
that they were in better Jtai. so, than in m other way.

Of the vegetable *j the last we know very little, the long
bunches you sent us seeds of, will k f grow very extensively this year
by our various experiments, as well as by ourselves, every thing will
be sent for the Dutch Garden us, of course, with at least a copy.
The cultivation of the Fruits of the tropical climates is now become
a matter of attention here, so that plants of these are amongst the
kinds we wish to obtain. In relation to the River of the Uf *
from Natal, we shall be glad to receive seeds of dt A*^y Trees *^
kinds of the latter 4U+1 kind, especially of the great Rhododendron a *^.

The above sketch will give you a general view of the plants
in which you may require us assistance, which we shall be always ready
to furnish.

W. Hallish

to advantage and highly interest.

When announced as a subject of the Society, you
ought to know, should you feel disposed to favor us with a
contribution, I will endeavor to suggest that, and especially
the State of the Law, which is very interesting and important.

The Board of Directors have referred us to you, for any
information of the Society, and other parts of the Society, you
will see by our Lists such as we have already mentioned, and we
shall have great pleasure in receiving the names from you, of any
persons you think likely to be useful to us. We must, however, be
chosen down to length: etc.

The Council of the Society has ^{if} ^{is} to request
your assistance in another point, in the forming a very extensive
Library of Drawings of Trees and Plants both what are common
at home, as also in other countries. We have an artist in our sole
employ in that, and even find him ^{very} ^{greatly} ^{valued} ^{for} ^{his} ^{services}
of the enormous quantity of the British Garden.

So it appears a plan arranged of a similar collection,
especially of the State of India, would be a very valuable
the expense of which we shall, of course, defer in any manner that
shall be pointed out. I shall be glad to receive your views on
this subject, and if you could send us a few drawings or patterns
of what we might expect to obtain hereafter, you will greatly oblige us.
I have the honor to remain,

Your very obedient servant
James Selkirk
Secretary to the Horticultural Society.

My dear Sir

Your kind letter of the 24th July &
16th Nov. 1844 - reached me at the same time
with the box of Plants which I have planted
with great care at this estate - & which I
value [^] very high - At. [^] me in much
doing very well - & I hope to add several
formances ^{rt} to our Botanical treasures here -
your letter has given me the most
heartfelt / warm * / one that I / share with
which you have entered into the same
kind paper here - and I am grateful to you
for the delicacy of attention with which you
anticipated my wishes - we are in daily
expectation of the arrival of our good friend
Governor Barington - I shall not fail to
read him that part of your letter which
relates to him - as I am sure he will
be gratified by your expressions personally -
I will be happy to avail himself of your
kind offer to visit our island by the
contribution of your Paradise - There are
many of our friends here who remember
with interest your share in our colony
& who speak of you in terms of lasting regard

Mr. Goume of the Black River among others
begged to be kindly remembered to you - &
added that ¹ y' visit us again - you
will still find the same affectionate welcome
in his family - The inscriptions you carried
are unaffaired - in 7%* ^ his plantation
he has reported seeds here as long since
memorandum of you - I took no leave
in writing to Mr. Wainwright on the subject of
the hortus sicca - & hope I may succeed
to your wishes in obtaining from him the
remainder of it for you - I enclose you
a copy of my letter to him - I have not
yet received his answer - he is preparing
to sell all his property & proceed to France
the hurricanes have desolated all his
fine spice plantations - when they came
arrived at this instant 6~
he begins now to feel too old to recommence
planting - 2
his musca sapida you gave
he has not yet flowered - and I fear the
climate of Bois Chery where it is planted
is too cold to ripen its seeds - I should
be * ^ -
glad to receive some seeds from
you in earth - as I fear to transplant
mine while in the only seed in the island

I shall propagate it if possible on the warm
climate of Baltimore, which I mean to make
my principal residence - I send you
five by the Dove the largest chest
of the Puffin seeds - which I have yet
seen - I trust it will reach you in
good preservation as I have taken great
care in gathering it at the proper period
and drying it properly before packing -
otherwise it is liable to rot - you
will find however that the vegetable
life of the [^] [^] ^v is still perfect should
you plant any of the chest - but I shall
send you by the next occasion some of
the seeds in earth which will last
longer - you need not stir it up
if you wish

I have multiplied this tree very much
in my state - you will
also find a bed of the same in the
box with the ripe chest - it is curious
on observing the mechanism of nature
in these wonderful productions -
My people shall constantly collect
in our woods the seeds of all our

... to you - I wish we could send you some
of our gigantic ferns which are so beautiful
but they love our coldest climate & I fear
would not bear even the heat of our
sea side - much
y* ;
your chest which is the Ravine
sands - & I should mention to you that
they are a long time in the Earth before
they sprout - I planted some at Bois
Chery - after waiting several months
without any appearance of germination
in the sands - I planted other things in the ground -
yet in a year of six or seven months after
all these neglected - unpromising seeds
came up - & are now flourishing - I
shall endeavor to send you all
the other seeds & plants you enquire of
you mention from Felix Bonnet - the
Garden - he was one of that excellent
Halle first - he used him with
such wanton & unprovoked cruelty as to
turn his brains - & he has not recovered
his mind - he would have been a
great assistance to me in forwarding them to
you

I personally receive some plants and
seeds from James by the reports which
reach us from them - I shall write
to you more at length on this subject
but am now pressed for time to leave
the office early by the coach. I thank
you most [^]heartily for the beautiful present
you have sent me of your plants -
described & engraved ~ This is ⁺* valuable
addition to science - & I trust you will
continue to render such services to the
world for many years. Mr. Soliman
who is fond of Botany ** ^vdelights with
them & [|]* proposes to send you some of
his sketches of our native plants which
he is now making - it is an elegant
& delightful amusement in our seclusion
from the gay world - /O./
ours Mr. Deane has with affection
regard & esteem - very truly
& faithfully yours
y W. Soliman

Chas^r Lefevre

St James's Place No 28

Rec^d. 19 May 1820.

surface with rocky composition; even a few
miles from the line of steep descent
it is very partially brought into subjection, and
is proportionally rich in the most valuable pro-
ducts of nature, which seem on the whole to corre-
spond much with a part of Roxburgh's farms on the
hills on the Eastern Coast, as well as with the spe-
cies so long and so well made known to us in the
Himalayas. *Artocarpus integrifolia* &
Sparganium occidentale are so common that I
conclude they are native. Two or three fine Gardenia
an undescribed *Sabernaria*, *Luzonella*
horridiflora, *Sassaparilla undulata*, *Coccoloba*
Delantoma *undulata*, a *Buddleia*, one or more of
gent *Celastrus*, *Carex arborescens*, two or three *Passiflora*
Wideria, *Pongamia heptaphyllon*, two **r* three
Vicia, *Sida*, and (in fact at least **o%**
character of) *Laurin* *Campanulifera*, fall in one
or every side of the. I mention them that you
may have some idea of the flora of the part of
the woods. About 30 miles fartherward we fall
in with the *Strobilifer*, and with whole forests
of the beautiful *Morus foecia*. The country
through which I pass since I left Pombay a
ground in *Labiata*, both herbaceous & shrubby,
but unluckily their season of flowering and seeding
are

so distinct that a travelling botanist has no chance
 of catching them in both States. I met with three
 species of Willdenow's *Lepidagathis*, and two of his
Chlorophia, all I'm for as I know un-described; sev-
 eral species of M. Brown's *Laues*, 2 cut-leaved *Verbena*,
 two fine *Nepeta*, a beautiful bell'd *Monarda*, an un-
 described *Cuscuta* &c. The same />* at yie <*£s Mrs **£L.Jr-**
Crotophaga, stinging most charmingly, on the top
 of the hills a **i*(f s-A+c#** *ferretata*, a fine plume-like
Lobelia, some beautiful *Indigofera* & *Gallego*, *Amorpha*
latifolia - a *Cyrtia* 'if *Roxburghi*' tenent on his plate
 is a very bad one) a *Dian*, a new form between *Har-*
subum, *Amorpha* & *Sorbaria*, a fine *Balsamorhiza*
floribunda, two beautiful *Quercus*, *Bambusa*, a very
 elegant **r<e±^l*** *As* *Thunbergia* *capitata*, a very handsome
 large *Coralium* !! in other very beautiful species,
 all of which I saw in Java when I kept it though I
 had no opportunity of seeing seeds. Lately I fell
 on with a new I believe *Alnus*, *Cyrtus* *sericeus*,
Alnus integrifolia, *Acacia robusta*, *Sipanea*
fruticosa, *Melaleuca* **&>*** *fruticosa*, *Swietenia chloroxy-*
lon, a handsome climbing *Convolvulus*, whole forests
 of *Cadaba indica*, *Euphorbia antisyriaca*, two *Dios-*
corea and a *Figella* having nothing but the seed
 vessels without even a leaf; so that I cannot even
 name at the species & barely at the genus. One of the
 greatest curiosities I saw was a *Giantia* creeper which
 grew itself over the tops of the highest **** ,,+,** *Dapen*

9 April 1821

Sir!

Having an opportunity thro' my friend Mr
Matter Buchanan of Mack Lane of sending to Bengal
I have pack'd & forwarded to you a box of plants by the
Hessine Capt. S. L. Gaudet, the Capt. also has kindly
undertaken the charge of a plant in the Cabin for you, of
the German sort which I originally proposed forwarding
by my friend Mr. Gaudet, but who has not yet left
England, I trust the whole will be received safe -

SA<

y

plants are pack'd upon quite a speculative plan
& I shall feel particularly obliged if you could inform me
in what state they arrive, as I am anxious for the sake
of some mode of pack, a shall be able to give
you experience to sea water this would save much trouble
during the voyage, for I may venture to say scarcely
one plant in 50 sent to other Country at present arrives

m\ • ^V Z-***~ when an tW**+^ <f* </£/£& <*' *!

may have any thing to send me, if you could by his Capt^d
decided for me to the care of W. Buchanan Esq it will be
sure to have due attention - my principal work is devoted
to what is scarce know, I only successful with two of the
Nepal seeds you sent me by W Taylor the Rhododendron
is a beautiful one, the latter very beautiful but being an annual
I don't produce seeds I have lost, I suppose by this time
you have received many valuable plants from that part -
The list of my desiderata W Taylor left with you, if you
t.JU favor me with any of them, - as for the enclosed list,
or you see] things from Nepal I should be greatly obliged,
& I have no doubt Capt. Garrowick would cheerfully take
charge of them - should any plan of sending you not
acquaint success, perhaps you will further oblige d*+- by
forwarding me some pack in the same way, as acquaint
as what I cultivate with more success than any person in
England & it is my wish both to keep up herbarium
my collection, it would always afford me pleasure to add
to yours in any way I can, I shall make no point
of forwarding *m part of whatever I may receive
either from America, or Germany - I have kept my

*i**.*^/ *X<- J£.* the last hoping seeds I am daily expecting
from Berlin would arrive & enable me to enclose a part
4 you. As they have not yet come to hand, I have there-
fore only, [^] *&****> -vT /+t* forwarded a few which I gather
myself from my own collection. *•*.. J* 4' Xx+C-* would have been
more numerous, had not a severe illness confined me
months in the house during the autumn & winter of
last year but I forgot by whom they I think by
Lamb to send a list of tuberos & bulbs, & other plants
requesting the favor of you forwarding one ~~way~~ way
as several of my friends received them from you;
amongst them Sir J. P. Somers, Carl Linnæus, & another
but then the Bishop of Calcutta - I have mentioned in
my list those which I believe have not been rec^d by
either of these parties, as by this means an interchange may
be effected as they receive & the benefit thus obtained;

if **AL, *~** any particular description of plants you see
from England, if you could inform me, I shall have
much pleasure in sending them out if in my power to
procure them, I am Sir
Ours truly
O. W. Hervey

 7* April
 /Hi

Report the 27th of April 1870
My dear Mr. [unclear]
I think you will be interested
what Mr. [unclear] has
requested me to forward from
him which I suppose ^{^*} related
to his pursuits here. He and
I have not long since sent you
about several parcels of papers
You must tell me how they
they have hit upon [^] particular
kind which you required and
sent back a specimen of it
then they can collect a quantity
Some books of Miss [unclear] have also
been prepared & will take an

Early opportunity of despatching
them to Legation where
must of course precede
boat down the river.

«--££&.^

;^>^L^<*< ^*.

Hamilton's Depart. that you
took enough to forward
of the oak bark and have
written to General Bairdwick
to thank him for his valuable
presents - he proposes requesting
you to take charge of some
Boxes, when you come to Legation
purpose for the reception of presents
of which rather things. He will

... to make a collection
I have got the skins of two
mammals to the head of a porcupine
and some other little things that
I wish to send before long, as they
may perhaps be acceptable.

Believe me to be dear to you
I am most sincerely
Edward Mearns

... Among the things which I was
troubled enough to regard you
would purchase on my account
to be sent with you when I shall have
the pleasure of seeing you here, you

might perhaps make a selection
(if they answer the description given
of them) of a couple perhaps of the
"Alabaster Ornaments" which have
been advertised for sale at the
Green-walkers - merely mention it
as they appear to be pretty things
and would, at any rate, serve
to decorate my (remains-price)
some portfolios of good prints also
if you should happen to over-look
£4t + j£*J&*^ which are cheap
may purchase for me and I
must request you not to fail
to reply, if they will not
succeed for too much, the want
of money will be a great
obstacle to their purchase.

Alfred the 27th of April 1870
My dear Walcott
I forgot in my letter of yesterday
to tell you about a paper on
work the scale for the thermometers
& barometers which you probably
had a child learn of
some of my unfortunates and
which if I know of a few
tell me what elevation is attained
by a degree of Fahrenheit, then
would give the height of several
of our mountains and other
positions with tolerable accuracy
perhaps. When I published up
I ascertained at what degree

located at several places, between
 Kalamazoo & Memphis, &
 at all Rogers to the same at
 the traps below that place. The
 Memphite used was not sufficient
 recorded in its scale, to have
 allowed as to be any correct
 populy, but that the result constant
 measure be far from the truth
 they will as follows:

at Hopwood (near the	2 1/2%
Lamb forest,	2 1/2%
at Bickiakh (at the	2 1/2%
foot of the Kites).	2 1/2%
At Hounkath (beginning	
the Chesapeake)	208
Memphite (at the foot	
South of Chesapeake)	206

at the summit nearly
of Cheesapance Mountain at 202°

at Kooce Khance (after
descending Cheesapance
to the north - 204°

at Shitlong - South
foot of Chandrigeri - at ~~208~~ 208° 208°

(Height was what elevation this was not
given - the peak is much higher)

Summit of the Peak of
Chandrigeri Mountain - barely 206°

Than Kote - at the North
foot of the Mountain - 204°

at the Residence near
Khatmandoo - at barely 206°

I am afraid you will think me a
great plague for tormenting you

Philadelphia 5th mo 1st 1820
D^r N. Wallich
Calcutta

I am directed on behalf of the
President and Directors of the Pennsylvania
Botanic Garden to return their thanks for a
box of plants and two packages of seeds received by
the Neptune from Calcutta

Our establishment is not in its infancy,
and although a considerable sum of money has been
raised by private subscription and a lot of ground
purchased, we have not yet been enabled to erect
suitable buildings and go into the cultivation of
the garden -

We have placed the seeds in the hands of
some of our most successful cultivators of plants,
who have promised to aid us another season, in
making a suitable return of American seeds and
plants. The box of plants we regret to discover
in too small a quantity, not a single plant vegetated
notwithstanding we had them carefully re-planted

I remain on behalf of the Directors
Very respectfully
Ruben Haines

Dr. N. Wallich

Superintendent

of the
Botanic Garden

Calcutta

for the
Bengal

1 May 1820
Recd per Bengalee
addressed in
20 Oct. 1820.

Very (over) respectfully
Yours, Wm. Smith
P. M. Lockhart

The Academy of Natural Sciences of Philadelphia
through the kindness of its corresponding secretary, most
thankfully acknowledge the receipt of a packet of seeds and
a box of living plants which Dr. N. Wallich Superintendent
of the Botanic Garden of Calcutta was so good as to send to it
by the *Princ Palmer* also a packet of seeds by the *Ship*
Armenia and one by the *Edward*.

To reciprocate the favor as far as in the power
of the Academy it has directed to be put up for Dr.
Wallich, at the Botanic Garden in this vicinity
late *Bartram* and under the superintendance of one
of its members *Robert Barr*, a box of selected seeds con-
taining 101 species of American plants. These
the hope may prove acceptable. They go by the
Ship Bengal under the special care of the
supercargo *William Foster*.

In another box by the same conveyance for
William Jones Esq are put also for Dr. Wallich, and
in marked two or three small papers of seeds, among
which are some belonging to new genera or species
or the more rare of such as have been noticed.

In the box for Mrs Jones is a set of the Journal of the Academy intended for the library of the Botanic Garden

The different packages of seeds received from Dr Wallick have been distributed among our best gardeners and botanists some few of them have given testimony did not vegetate.

Of the plants put up in the covered box either from their having been too much exposed to the sea water or from their having been put up in a hurry by the gardeners and the roots too much crumpled together very few indeed of the seeds are of life those that did were immediately sown & the plants in a few weeks are all that survived are now in the house of Dionn Pratt Esq on the Schawhill these are a plant of *Sterocandren nutans* 3 of *Panax* 2 of *Diopisporos glutinosus* and 1 of *Pteris per- scrifolium*.

When the Academy shall be in possession of the catalogue of the plants of your garden it will direct its paternal remembrance to the seeds and seeds of our native plants as you appear deficient in some

Very respectfully

My dear Sir your kind favours of the 10th inst. were
by the Albion both of seeds scraped to the use of
which for my self & on behalf of our friends I return my most
sincere thanks, and I can assure you that it will always
be my greatest pleasure to do every thing in
continuance of your kind favours

I have also recd. through Mr Pascoe the large
of growing plants the large quantities of plants of Mass & the
seeds in bottles Cases & Swainsan. Packs, Mr Pascoe
complete and also the 2 boxes of seeds which were from
our good friend Dr Cory & which you were so good as
to take care off on board the Albion, and for
which on behalf of myself & my friend Mr Cooper accept
my best thanks, in the chest of growing plants the
included The following are those that I received

/£& 'xUt**j'

Globba subulata 7 stems Vitis peruviana = 25 seeds with parasitica
Cissampelos glaucocarpa = 29 Sarcifraga Lingulata = 30 Cypripedium speciosum
+ 31 Cypripedium Insigne These all appear to be doing well, and I
am that to /tr4jt->/»4X. * Short statement of the valuable seeds of plants

in the Box Packed with Maps too Much can not be said
for the packing & well secured indeed equal to any I ever
saw; but after all Nothing but experience can perfect
any thing, all the different Trees, as *Paniculatum*, *Ballyper-*
Orionensis, *Calocasia* & *Cuscutatum* were all in excellent
order in the Moist Map, but I am to say that
our favourite *Hydrochium* had suffered much indeed only
two above, *Spermatum* & *angustifolium* and those two survived
I believe in consequence of the Map being quite dry, and believe
that the roots may be packed up in perfect dry Maps or hemp
when the eye down & will come well in that way, the
Mantle I allude to, to be packed in dry Maps or hemp as
the following *Hydrochium*, *Curcuma* - *Kemfferii*, *Globba*
Moranta & *Alpinia*; Next *Canora* the most be packed
in Moist Maps, as the two in the Map came in excellent
order; *Limnium recurvum* was so fine that it might not
have been packed two says; several of the seeds in the
Map were vegetative beautifully in particular the Palms
the following in particular *Sapras* *Rumphia*, *Coen*, *Maifer*,
Peraps *filiformis*, *Hogata* *wrens*, for the consequence
of Palm seeds to a distance I think packing in Moist Maps by
for the best Method, he also used the Box of seed
top in the Eastern Cases & have seen them & hope

• \$ L A ^ ^ * t sell; but after all this his heart
should not be dismayed but rather double other efforts
until he finally succeeds

Mr Q*J^ « / K^»*-^»- whom is in our

/2L months in London & am sure to you & had from
the office a package of seeds all fresh which I hope
will reach you in safety; I hope by some of
the autumn ships to send you a Chest of roots
& Bulbs &c, such as I think may prove acceptable
if you may prefer Garden's kind in the mean
time remain

Glasgow University
May 1st 1825

My dear Sir

I am anxious to lose no time in informing you of the safety of the parcel of Coins which for a long time had supposed was lost & which in my last letter gave you reasons to think it should never recover. A few days ago I received a letter from the Custom House, ^{in London} to say that if I did not claim immediately a parcel which had come directed to me from India by the last boat, it would be sold by auction. This was the first time I had had any account of it, & I showed it to a friend, who applied without delay at the Custom House, but it was too late. They were sold by auction & bought in for me, & I have the pleasure of saying that the parcel was safely received at my house two days after I left it for Scotland. Of course I have not yet seen them, but I have no doubt of its great value & I can hardly express to you how much I am obliged to you for it. And this is not all I owe to your liberality & for which, tho' at present unseen by me I have also to thank you. Since I left England I have heard that there is another pack **V** arrived

for me in London, containing plants which were known
to me so kind as to send me from the Biscayan mountains.
The letter is also arrived at Kew with the rest of
from the address I am sure must come from you & it
will be forwarded to me without delay. But I should
therefore say dear Sir, of the safe arrival of them, &
that they are sent to one who is sincerely grateful
for them.

And now I must tell you what has brought
me into this northern part of the Great Britains.
There was, two months ago, a vacancy in the botanical
chair of the University & the Regius Professorship
was offered to me in as handsome a manner & so pro-
pitiating to my feelings that I made no hesitation
in accepting it. I am just arrived here & have
been received in the kindest manner by all the
Members of the University. A very fine new
garden of 3 acres in extent with capital Hot & Green
houses have been established & there is not only in
the people but of the College, but of the town too,
the greatest inclination to promote the cause of
Botany. My former Regius next week & last three
months. In the Autumn I return again to Kew
with a view of staying & come here with my whole
family for a constant residence, & here I shall
hope to devote the remainder of my life to the
study of plants.

You will not wonder therefore that besides the in-
crease of my Herbarium I should have the collection
of plants in the Botanic garden here, very much

at heart. If therefore I may still be allowed to
be a beggar, I would ask for some seeds or living
plants for this rising institution. I have
sent something to you; but I know not from what
accident some plants that you have lately sent
to me have suffered from the voyage. What you
may be good enough in future to send me,
whether dried or living plants I should much
have sent to the University, Glasgow to the
Prof. of Botany. By this means all duty
is ~~avoided~~ which cannot be done in the case
of a private individual. Do not suppose that
I send this myself. There is nothing I fear
with so much tenderness. Doubtless that
you consulted with a public institution
this may as well be avoided.

I am not yet sufficiently acquainted with Glasgow
to know of those are many vessels from Liverpool
which go to Glasgow. But I should presume there
are a that some of the Captains would take
charge of a packet for me.

I shall not fail to send the continuation of
my *Miner's* history. I only wish my words were
better worth your acceptance. Believe me
to remain, my

++**++

your very grateful & faithful
servant
W. S. Hooker.

4C. Dear Sir,

I take the liberty of informing you of the present state of my health, which I am sorry to say continues much the same, my cough being very troublesome and causes a shortness of breath. Doctor Manohatten (who kindly prescribes for me) has this morning ordered me another blister which I have now on my breast.

I am extremely sorry my illness causes me to be so long absent from my duty, which I should feel a pleasure in returning to immediately would my health permit me, and for which purpose every best endeavours are used in carefully abiding by the Medical Advice I receive.

I am,
Sir,

To,

N^o Wallich Esq^r. M.D.

Ye Ye Ye

Honoured Sir,

Encouraged by your kind
reply to my former letter I again venture to
intrude myself on your notice sincerely hoping
you will not consider me troublesome.

With regard to my health
I beg leave to inform you that I am a little
better than I was, and that the blister has removed
the pain in my breast but still I am troubled
with a remarkable shortness of breath, and am
very weak, my pulse has been as high as 102
the last three days and still continues so.

My Wife having informed
me of your wish to know the price of the three
blister purchased for the boys, and that it was
your intention to pay for it, I beg leave to
state for your information that I have kept
a regular and faithful account of the expen-
diture of the 9 Rps^{ts} allowed for clothing year
of the boys, that they have been supplied
with Shirts, St. J. Stock and Pocket Handkerchiefs.

Yours
W. Wallich

Several stockings there, hats &c. &c. also
a tailor has been employed monthly for
keeping these clothes in repair &c. and that
after paying for the blue cloth above
mentioned there still remains a balance
in my hands in favor of Julius and
William of S. P. 10. & cash. 13 R. of the
money I had intended to appropriate to
the purchase of two good strong pairs of
Shoes (3 pairs each) to be made by an
European shoe maker who charges 2 R.
for pair, one pair of these shoes last the
boys two months, whereas those purchased
at a cheaper rate from natives will not
last them a fortnight. Their bedding
will consist on their leaving me of
a Mat. 5 pillows & cases 2 pairs of sheets
one blanket and some cotton quilted beds
-doy which I have ^{at} passed by over the
winter blue clothing purchased last
Autumn will with a little repair
answer very well for common wear and
will do, and as my wife has
at present 2 tailors in employ she
can superintend the making of any
clothes

Nothing you may wish to be made for them
I should be happy to receive your commands
as to the disposal of the money I have men-
tioned. I cannot go to the Bazar in my
present state but can send for cloth & such
other necessaries as may be required.

I am

Dear Madam
St. James's
5th May 1820

Sir

With respects

Your very Obedient

and humble Servants

George Porter

Mr. Wallich Esq. M.D. -
Superintendent
Honourable Company's
Botanic Gardens

Dear

Enclosed you will receive a box of Lardner's
 box of plants shipped for you on board the Horn
 Capt - Gannet, which I hope will arrive safe & free
 with your acceptance, the case contains 90 specimens
 of herbaceous, insipid & American species, some of
 them aquatic - as they are packed probably differs
 from any before sent out I should feel greatly obliged
 by your particular examination of them at the time
 the case is delivered by your forwarding on with a letter
 by the return of Capt Gannet, informing me the state
 in which they come to hand, I am very anxious
 about them in the time case should deliver, but not
 to mix with those in hand, I may however
 be mistaken, X. *-** </****

m

i

tf

object of some little importance, & I intend trying various
 experiments this summer in order to accomplish it, - if
 my life is spared until the Autumn. I propose forwarding
 some medicinal plants after their leaves are off, pack'd in
 tin - as I have for... with a small packet of
 a letter by Capt - Gamble, I shall refer you to that for
 particulars, he is also the bearer of a plant of *Marrubium*
Zoboma, which he promises to take care of for you in
 the Cabin - I am sending these things to the ship
 I have heard there is a packet of seeds for me from the
 Continent lying at Hambro, which of course I may see
 upon part of them I shall forward to you the very
 finest *Alp - Black - Juniper* by which I have an
 account at Scotland, I send at good to the very
 best, I am...

Of the...
 O H...

Clapton
 5th May 1820

P.S. - The tin box attached to it is pack'd within the case -
 if you could get me a collection of aquatic seeds & put them all
 - together in a bottle of water which tightly down & put in a bit
 of paper to keep them from being spoiled by the water. I have no
 doubt but you would be able to do this. I have no
 doubt but you would take charge of it - by this means I might get some
 new aquatics, but from experiments I have made, I am assured the

very j... of plants were vegetated, after the seed has
kept j / L I am equally convinced many the seed
ought to be... AS a vegetating simJL/ *-i... apparently
now do not know the way, of S**~u in earth... J~S S//~*
in a clay box, a box of Lamin paper can be used in this way, &
placed a seed inside making a plant, & Miller notes of this plant
that the seed or seed about an hour after it is separated from the
Honey, splits of itself into two or three pieces, & that of course it
"the ground in that state no vegetation occurs, so that there can be
"could propagate these plants from seed, must see the seeds the mo-
"ment they are taken out of the pulp. Therefore a better specimen
could not be selected for the experiment, I have
of 4 various growing plants I * to 18 0000 etc
of height & at a dozen or more I sent to the
Botanic Garden - I think therefore it would be well worth trying
again this experiment with various seeds that may be deemed difficult
to forward from similar experiments.

My dear Sir

I wrote you a few lines in
June last on leaving England for the Continent
from whence I have lately returned, and
one of my first acts is to beg your acceptance
of a box of seeds shipped by the *Mercur*
of which a List and Bill Lading are
enclosed.

By the same vessel I have also
forwarded a Box and a seed plant from
our mutual friend Mr Bent. Captain
Garrick has promised every protection to
the latter, and I hope it will reach you
safely. I have likewise forwarded a letter
by her from Mr & by Mrs B Lambert to
you. It will afford me at all times
much pleasure to be of service to you or
your friends, and to hear of you or your
family.

I am, with great regard

my dear Sir

12/6/1920

Posttown June May 8th
1819.

I had the pleasure of receiving your very
obliging letter of Dec^r 25th 1819 on 4th 1st of this month
for which I beg you will accept my best thanks
& for the enclosure of seeds, which came perfectly
safe, & I sent them down immediately to my garden
M^r Duff who informs me he never received seeds
in better order, my gardens are at my residence
Beeton Hall at Wakefield, Yorkshire, & are under
the superintendance of M^r Duff who is an intelligent
excellent Man, much devoted to his profession &
I give him every possible encouragement, I have
not yet had the pleasure of seeing M^r Duff but the gentleman
to whom I sent your letter, & the Post of York, &
I am very sorry to say supplying him with a Post of seeds

that will admit of being divided, or of any others in the
Collection, ^{s-^ ?**/} he may wish to have for ^{v*} Duff is
extremely fortunate in our ^{*+-y, /£} to, ^{f/Z.} in our House
- ^{*^ty. &} for the ^{<^} purpose of propagating Plants, he was
I believe the first in this Country that raised Plants
of the Rhododendron Arboreum, & from the seeds that
you was so obliging to send me, carefully packed
in Sugar, ^{AA} ^{?<'} a single seed, ^{+ J t # a} taking
I have no doubt that ^{^u'} it will equally succeed
as [/] Mr Duff thinks they will prove a most valuable
Acquisition to our gardens, as they appear to be ^X
hardy, last Winter was very severe in England, & I tried
some of the Young raised Plants of the Rhododendron Arboreum
in the Hot House, others in the Conservatory, & some in the
Cool Greenhouse, & a few under hand glasses out of Doors,
^{-_#s>} which certainly have succeeded better than those
with heat. My Agent has not yet been able to get the
Box of Tools from the Indian House, the Mission is not yet
^{|*}

and I do not think it may be some time before we can clear the
the Proc. General Handwritten knows the difficulty attending
the procuring the release of anything £- the Indian House
of Customs wherever any is taken of them, & they are in
general, please or displease when received, not a single Part
reached here of the last Box you so kindly sent, V^i I
trust they shall be more lucky with the present one
Mr. Pandy is the proper Person to take care of the
care of the I have sent a Letter to him, & by my
will do to him the Agreement he arrives at the
India House, I call'd upon Mr. Lee & Messrs
Hammersmith on a Receipt of your Letter, & they assured
me they had never seen the Box of Seeds that you had
sent to them by the ³⁰ of the ^{4m} of the ^{4m} of the
the Ship was lost, I have given Orders to my Agent
to make enquiries if the Ship is lost, or only delayed
I hope you have seen this recd. the Box of Seeds sent
from my garden by the care of Capt. Thompson, I shall
be very glad to see you, & shall be very glad to see you
and shall be very glad to see you, & shall be very glad to see you

Dr. W. Wallick

Resolved: that the Sub-committee considers
the question relative to the satisfactory
terms, and the means to be adopted for
the recovery of their account to be of
a nature to require the mature deliberation

of the ^{full} Committee of Papers and
not to be ^{subjected} to the ^{specification of the} ^{voices} ^{of the} members
but to conclude their ^{own} ^{views} ^{thereon}
and to ^{recommend} the adoption of the ^{most} ^{conciliatory} ^{means} for the accomplishment
of the object in view.

Read a letter from Dr. Wallick to the Secretary
dated the 10th March and another from ...

Councilmen dated the 25th April.

Resolved **Y/U**+/*** the unanimous opinion of
the Committee that the Museum of the Society
can only be kept in a proper condition by
a suitable establishment, whereby to be
devoted to its care & preservation for
which purpose they propose the following
arrangement.

1st A European Keeper to be nominated
possessed of such **p*s &:-** ^{in regard to} ~~as to~~
education and requirements, as to
be enabled to attend satisfactorily
to the following duties, viz. the preparing
of a correct catalogue of the articles
~~now deposited in~~ or ~~to be~~ ^{after} ~~acquired~~
by the Museum & carefully attending
to the preservation & arrangement
~~of them~~. It will of course be expected
that he is to devote the whole of
his time to these duties, that he is to
attend at certain regular hours - not
less than seven - each day in the week.

Edward M. ...

...accepted. It is to be under the immediate order
of the Secretary and the meeting shall
be free to be proposed, and to be strictly
to put questions as may be communicated
to him by either of them. The latter
are aware of the impossibility of finding a
suitable person in this country, willing to
undertake these duties at a salary so small
as that which they imagine to be
be inclined, under the present state of
finances to offer. They are persuaded
however that a suitable person can
be found who would be glad to accept
of a more than ordinary ¹⁰⁰ ~~100~~
salary ^{exclusive} ~~exclusive~~ ^{of} ~~of~~ ^{the} ~~the ^{expenses} ~~expenses~~
of his quarters to be ¹⁵⁰ ~~150~~ ^{per} ~~per~~ ^{annum} ~~annum~~
exclusive of transport. This amount
they conceive to be the lowest that
can be offered as a compensation for
the services required of the person.
The ~~Secretary~~ ~~Secretary~~ ~~Secretary~~ ~~Secretary~~ ~~Secretary~~
is ~~entirely~~ ~~entirely~~ ~~entirely~~ ~~entirely~~ ~~entirely~~
exclusively ~~exclusively~~ ~~exclusively~~ ~~exclusively~~ ~~exclusively~~
to be placed ~~in~~ ~~in~~ ~~in~~ ~~in~~ ~~in~~
the hands of the Secretary.~~

It appears highly desirable that a certain
number of members of the Society, without
reference should be requested to attend
by rotation to the affairs of the Museum
The succession in turn, each for the
period of one month, or any other term
but that which appears most convenient. The
gentleman, whose ^{turn} it is to inspect
the Museum, be requested to call there
as often as possible, at least once a
week, examining the proceedings and
conduct of the Keeper, and to report
any matters to the Society that ^{might} require
their attention or notice. With the
view of ^{assisting} promoting the adoption of
a plan which to them appears to well
calculated to ^{promote the good of the Society} ~~benefit~~ the members
of the Society, now present, and
before this process in the execution
of which will be happy to ^{take charge} attend
~~conjointly with the other members who may be designated~~
in rotation.
It occurs to them further, that it would
be ^{proper} desirable that the place of ^{member} ~~member~~

' X

This Committee of the Museum ^{created by his} ~~also might be leaving~~
the Presidency should be as speedily as possible
to explore provided for by the Society ~~and~~
entirely suitable, and that timely notice should
be given by the Secretary to the gentleman
whose name ~~was~~ ~~is~~ ~~to~~ ~~be~~ ~~added~~ ~~to~~ ~~the~~
Listings of the Museum.

Resolved that so soon as the ^{establishment} ~~arrangement~~
now proposed shall have been ~~decided~~
upon by the Society, the ^{arrangement} ~~detail~~ of the
business of the Museum to be ~~forthwith~~
taken into consideration ^{by} the
Sub-committee.

Resolved that the ^{adoption} ~~proceeding~~ ~~suggestion~~
now superseded the necessity of nomi-
nating any superintendant ~~of~~ ~~the~~ ~~Museum~~ ~~to~~ ~~be~~ ~~named~~ ~~Dr~~ ~~Walker~~, who is
understood to intend resigning that
charge shortly, on his approaching
departure for Nepal.

Read a letter from Major General Hardwick to
the Secretary dated the 16th March last.

Resolved that the proposal of the Major General
appears to the Committee to be very judicious
and that they strongly recommended it to
the Council for adoption, under the
supposition that the expense attending
it will not exceed £100. Perhaps.

Read a letter without date from W. G. Johnson
concerning an increase of salary
to the furthest in the maintenance
Resolved that the Johnson letter be
referred to the Committee of papers
concerning the proposed increase of salary
to the furthest in the maintenance
Resolved that the Johnson letter be
referred to the Committee of papers
concerning the proposed increase of salary
to the furthest in the maintenance

Draft of a
series of Resolutions,
agreed upon by
a sub-committee
of the Senate
Court, at
~~the~~ meeting
on the 10th May
1820.

Chelmsford 12th May.

recd 1 July.

My dear Sir

I have now the plea

sure of sending you a box
containing mineral specimens

from the Lulworth and a
small collection of seeds.

I send you **jrj** the books

presented to me by Mr Bruce

and as I am desirous of

making some enquiry relative

to the medical & other properties
of some of the plants men-
tioned. I should be obliged
to you to return the books
to Mr. D. Clark after you
have ascertained whether there
is in them anything new
for me to send you. If
it would not be too much
trouble to Mr. Culbrenne
I should be glad to receive
a list of the racks as num-
bered by me with the names

James Ding

Vepery the 14th / 1820

My dear Doctor Wallich

Accept my best & sincerest thanks for both your kind letters accompanied with a copy of the 1st Volume of Proxb. Flora Indica and your Tract of the Camellia, which last your nephew Mr Cantor has delivered to me personally, and with whom my Collyer the Rev. Mr. Hambro and myself had yesterday a very pleasant evening; by him you will receive a small collection of plants of the Pentandrous Class from Mr. ~~Hillebrand~~ agreeably to your request, so as the short time would permit, ^{together} with a short description, which I had collected on my journeys in former years, of some of them rU*k{- bc'rft/Lfa find a place in the valuable publication which you & Dr Carey have undertaken: I rejoice to see how much Botany has already gained by your indefatigable endeavours & pursuits, and how many new plants will still be discovered on your intended journey to Nepal; and I heartily wish that the Lord will grant you health and strength to execute your intentions to your own satisfaction & that of your friends. I am sorry to see from your letter that you lately did suffer so much in your

health; but it is expected that by the blessing of God You will be much
mfi/tt, -fo excursion. How happy would I be could I have the
opportunity of going to Bengal & seeing You and Your excellent garden
at Calcuttah, but I must give up the thought entirely.

I make no other remarks to the plants which accompany
this letter, You may judge Yourself of them, - I could only wish
they were better preserved, some have been gathered a long time
since. I hear from Your >> * • <<-t You are printing a new Ca-
talogue of the plants in the Botanic Garden; a copy of it would be
be very acceptable and enable me to judge what seeds or plants
might still be sent, tho' I fear but little will be added by me to
treasures.

Now My dear Friend I finish this letter with my & Mrs
A's heartiest Wishes for You & dear Mrs Wallich's & Your Family
prosperity. We join in kindest regards to You & them, and I re-
main in love and esteem

C^AV very sincerely
J.P. Botler

I beg to be respectfully remembered to Dr Carey
I did add to the plant Nob. signifying that they have been des collected
described by Dr Klein & myself
