Sir Sir

Mr. deers Sir

I have the pleasure  
of sending you <sup>^</sup> a specimen  
of a plant called 'Mowkda' from  
the fibres of the bark the natives  
make fishing lines of a very  
excellent quality - very strong and  
elastic - a specimen of the  
fibre accompanies -

it strikes me this  
would be a good succedaneum  
for the paper plant -

I remain my dear Sir

Yours very sincerely  
R. B. Colquhoun

Hawaii

14<sup>th</sup> June 1820

Saturday June 16<sup>th</sup> 1820

My dear Wallis

On my arrival here a few days ago for  
purpose of passing the names which it is almost impossible for  
any constitution to stand in these hills in tents I had the pleasure  
of receiving a new proof of your kind attention in the form  
of a Bot. of the Flora Indica, thinking it was probably to have  
been a much more expensive work that I supposed it just  
as good duty to have furnished it at their expense to the  
Saharmpoor institution I am now so much in your debt  
for various kind attentions that I know not what I shall  
be able to do in return —

At the same time received a copy which it appears has  
also been sent to you of the letter of the Board of Com<sup>rs</sup>  
forwarded to you along with the Local agents report.  
upon the Botanic Garden at S. — The Board appear to  
it to have been influenced by no friendly disposition  
towards the Saharmpoor establishment when they  
thought proper to remark that it contained no plants which  
plants that were to be found in similar institutions  
under individuals and to presume that the Local agents  
report contained an enumeration of all that was to be  
found there — it appeared to me when calling the atten-  
tion of the Local agents to the improvements in the  
Garden that I could not with propriety point out to

them or require their attestation of the existence of the  
many genera and species I have introduced as they  
could not know one from another. They agreed with  
me in this entirely when I asked if they wished  
me to introduce Botanical genera and species into the  
Garden - This fact must be immediately communicated  
by them to the Board and by the Board to you -  
I have too many matters to the Public, who certainly  
got more attention paid to supplying them fully with  
cauliflowers before my improvements commenced  
The local agent of the Board of Gen<sup>l</sup> but if you  
have to retain the appointment the latter must have  
no concern except with the pecuniary arrangements  
of the garden. Specific instructions drawn up by you  
and approved by government respecting the objects  
to be followed and the degree of attention to be paid to  
each must be furnished to whoever is in charge or he will  
never be able to reap any credit from this change.  
I have had the mischievous (and disagreeable) task of diverting  
the time of the establishment in some degree from employ-  
ments more beneficial to the people at the place in order  
to follow purposes which can only be appreciated by those  
who have made the science their study - The garden which

was formerly a common <sup>& A9 /</sup> <sup>resu defru fj</sup> <sup>sftUL^sr?^CM~^^</sup>  
really valuable it proposed by the different powers to which  
it had successively been subjected and The Marquis saw  
it a more than a promise almost in 1816 - Without greater  
than human power the creation of good garden is impossible  
except time be given for effecting it and even the most  
necessary expense in this place has been procured after volumes  
of correspondence as if it was coming from the hearts of the  
donors - but for the support it met with from his Lordship  
I believe nothing whatsoever would have been done for  
it - If kitchen vegetables except merely for the improvement  
of their species and supply of good seed are at all admitted  
to be cultivated <sup>v^C« ( - \* . /' /^^</sup> some of the greatest part of  
a small establishment of 30 gardeners to taken up with  
that - and the large city which is contiguous to it  
from the ready sale afforded for its produce makes it al  
most impossible to prevent the gardeners from trading  
and making that their principal object - I wish can be better  
looked after accordingly I have not insinuated myself  
~~then~~ at all into the good graces of the public by restricting  
my improvements on such products as are immediately  
edible by the community to them as much as possible  
because the benefits I have derived are more prospective  
Having hitherto reaped nothing but vexation and disappoint  
ment from the wish to please all parties as much as possible  
I shall propose that The only made responsible to you

for the direction of the employment of the establish ment  
when I forward my list of the plants I have introduced  
My chief objects have hitherto been <sup>to</sup> a correct knowledge  
of the Geographical and Physical distribution of the  
plants of the Himala between the rivers Pinna and  
Sutlej - of the most useful of them particularly such as  
might with advantage <sup>\*s\*c. 'Cr >? £\*</sup> be introduced into Great Britain  
and other parts of <sup>-4L</sup> the Empire - after which I should have  
to solicit your kind assistance in settling <sup>the</sup> prices  
or working under you in any <sup>of</sup> the branches  
pointed out - in promoting <sup>and</sup> commerce <sup>between</sup> the two countries  
to both countries between the North East India Company and  
the British Government as well as their medicinal and  
economical plants and <sup>the</sup> edible vegetables of Europe  
with which the hill provinces must be supplied  
from us not vice versa as the Board seem to  
imagine - My exertions in this field have only hitherto  
been impeded by the state of my health and by the con-  
sumption of my time while at Simla <sup>in</sup> the service  
the medical duties of the Native and European troops - the latter be-  
ing amounted to about 1200 men - and I may men-  
tion that this part of my duty has been the only one  
which has made my situation in a pecuniary point  
of view equal to what it was in London in the same  
I would have enjoyed the regular line of the medical  
service - but for the opportunity of seeing the country

being absent in the hills, I would long ago have resigned  
the situation on finding the difficulties with which  
I had to contend in holding it and unless some  
satisfactory resolution of them be the result of the  
application I am about to make through the  
U.S. I shall apply for my discharge on such  
certificate in September.

I have a collection of minerals for you which I hope  
to be able to bring you myself as I have found no  
opportunity of sending them with notes respecting  
their situation. I shall continue to forward  
them as I fall in with and as I hear of them  
respecting which you are particularly in forma  
I am, pray favor me by specifying. I have re-  
ceived large packets of seed from Europe and  
I occupy now a small spot in the hills elevated at  
least 1000 feet above the plain. I hope to raise many  
offspring as our climate is well suited to be  
most successful in introducing hill plants into  
the low order by first accumulating them  
there in rows, then bound in the cold season.  
The only thing that would make me inclined to content  
longer with health in India would be being appointed  
to the charge of the proposed convalescent hospital  
with a small garden attached solely as an appendage

£ you establishment and to have a <sup>^</sup> more do  
with that at Saharun for than to furnish it with  
plants or take a general charge of it <sup>v</sup>

Loach Behan 16 June  
1842

My dear Sir

May they be favor of your  
acquainting me with the botanical  
name of the plant of which I  
enclose some seeds. It is a species  
of grain called by the people  
here Shemsee and cultivated in  
this district and in Pshastan  
seeds of the S. Phaspen that have  
been sent me have all proved  
rotten but I expect some young  
trees may grow. Yours truly  
Blot

Book Peter 1848  
W. J.

My dear Sir  
I have the honor of your  
communication in relation to the  
value of the land of which I  
enclose some seeds. It is a species  
of grain called by the people  
the Shames and another in  
this district and in other  
parts of the State that has  
been sent me being all known  
to them but for best value you  
will say I am, Yours truly  
W. J.

27 Aug 1840  
Mr (of Bankipur)  
Mr Cooper  
in

Trust approval of the Alabama  
cases & habeas corpus as well  
as of the numerous letters  
crossing papers &c. that you  
have purchased for me. The  
Alabama articles are coming  
up very rapidly if the government  
picked well. Think what  
you have bought with some  
things which have been mentioned  
recently, as the price differences  
they are very cheap. It is not  
but require prompt payment  
& they therefore that you will  
desire him to send me the account  
of all the things you may have

taken for me and I will send  
them a draft for the amount  
Kalu's copies are essential  
therefore do not hang up  
that you can help and I  
am sure have plenty and  
I will contribute the best  
to buy up any more I need  
I must assure you that I  
do mean to acquire the  
the expense of the  
thing, nothing of the kind  
is expected, and I am sure  
in the good work of the  
see without any great proportion

But as you seemed to wish to  
make some little supplement  
of this nature. I mentioned that  
I had some in my pocket but  
I don't know if you had the receipt  
I might send it to you as you  
required it. I guess you will  
also be happy to see which  
I have found out with regard  
to your business with the  
Missions that you proposed I  
understand that because the  
Missions here seem little  
about 1/2 of the other  
things. I am in want of a good

watch for myself, and of the  
Principles of a wide West  
of folk and more than a  
new play being in the world,  
as good as this a pretty one, they  
purchase it for me - of your own  
old for the same as mentioned  
256 - on the Alabama Table  
black, if tolerably good & cheap  
with do well enough to give away  
think you do me the favour to  
read to these things for me, as  
of the new reading argument  
of which it Roger says because  
me at your house, if such a  
thing is to be procured in Calcutta

perhaps, for an engraver  
about the thermometrical  
Spirimeter. I am afraid the  
instrument itself is all the  
bad. but it would be sufficient  
for our purpose if we could  
ascertain what height is allowed  
for a degree of the scale of  
Fahrenheit. The  $m$ : would  
say then - how many feet  
would, be a degree perhaps  
the paper you are sending me  
will do this - for we may  
not about the money of 760  $m$ ,

which you mentioned having paid  
on my account to Richard  
of - for the advances we made  
to your people for wages & food  
which they receive here regularly  
in the proportion you directed.  
I have lately been sending you  
some new specimens which we  
procured from the Northwest  
I am just now about dispatching  
an expedition to Japan than  
which I think the specimens  
I enclose be forwarded as  
usual to the Museum Sunday  
at 10 pm . ^

you wish them to be distributed  
during your absence from  
the garden. Let me know your  
wishes in this respect.

I must again assure you that  
to bring up any important  
articles of present requisition  
part is no way necessary & it does  
quell the contrary. But if the  
should reach you in time that  
before the use of your departure  
from Calcutta. Such things as  
the following are those which  
I think might be most acceptable  
for the way or giving to our institutions.

... and if they should face  
you any special cheap  
... you might purchase them  
... must. Such as  
... guerra ...  
... if they are to be had  
... expensive. A magic lantern  
... Microscope ...  
... spider web. ...  
... person ...  
... large ...  
... and similar ...  
... There is a ...  
... that I saw ...  
... with ...  
... if you can ...  
... still frames for two ...

that have of pictures  
by his "Blaze" politician  
Hend. Adler as he gave at  
of the same dimension the size  
might be easily ascertained probably  
for reference to paper which must  
be in fact correct. The size however  
time they up than  $2\frac{1}{2}$  to  $2\frac{3}{4}$   
 $5\frac{1}{4}$  inches broad and you  
could perfectly without much  
inconvenience try them up  
with you for me. But if the  
letter should find you about  
to commence your journey  
a small drawing party  
at least out of your way. They are

S-

the weather let this or the other  
nature which I have now seen  
introduce it all with your  
class of talent and the kind of  
arrangement upon your  
lawyer's part but the  
you pleased with the thing  
sent to him. he account the  
dearly animal. of which there  
were two others. but the  
but I don't know whether we  
we are in this support  
have a young one in a  
we which for that see  
in other hands and not  
we have the pleasure of

I'm to the point - they would  
make my best regard on that  
not to be such; with the  
acknowledgments for the  
interest she has been kind  
enough to take in my play  
and papers by you - and believe  
me by your letter  
I am very truly  
your affectionate son

Edward Minter

The Minister here has taken a  
great liking to Swedenborg &  
is an admirer of your parables - &

Libris - asc. • 3 ^ ' 120  
1420  
rec<sup>d</sup> 11 July

My dear Sir  
Many thanks for your very  
kind letter of the 9<sup>th</sup>. Your wishes respecting  
the preservation of the seeds shall be  
attended to and when the cones are  
ripe (in October) you shall have  
a supply packed as you direct.  
The collector of plants is now on his  
travels so I am sorry I shall not  
have it in my power to convey your  
instructions to him. I was however  
very particular in giving him my  
own as to the mode of preserving  
the specimens and made him up  
a series prep so I hope his third  
collection will be more creditable  
I have the pleasure of sending  
you a drawing of the Cuckoo (called by the  
natives Cukoo) the body depicted it is a  
very

grateful thank of the Board, be so  
kind as present it to General Macdonald  
with my best Compliments.

The parcels of Seeds  
you were so very kind as  
send to my friend Adams  
Singapore have been safely  
received and acknowledged  
with most grateful thanks.  
Another commission of mine  
in Scotland has petitioned for  
a letter of indulgence, if therefore  
it be not asking too much  
when you have an opportunity  
I should take it particularly  
kind your sending a small  
supply to "William Macdonald Esq  
St Martins Perthshire" - as this is  
Gullman

Yulman has many fine green  
houses & Hot Houses - my seeds  
leads you may be so kind  
as send <sup>PC-</sup> some will not be  
thrown away - & if anyone  
interested <sup>\*.Λ./.</sup> to you I can get him  
to report their success -

I believe me  
most sincerely yours  
A. H. Cole

Dear Waltham

P.S. I have just received a  
most splendid parcel of seeds  
from you - But oh what  
disappointment they have  
been

completely worked in  
water-paper and stuck  
in one confused mass  
however I do not despair  
as some of the seeds  
have germinated.

W. J.

W. J. Fisher  
24 June  
21 July 1820

Paris le 26 juin 1820.

Monsieur

J'ai reçu avec une grande satisfaction la lettre que  
vous m'avez <sup>fait</sup> l'honneur de m'écrire de Calcutta, en date  
du 29<sup>th</sup> X<sup>th</sup> 1819. j'en ai pas été moins flatté de  
X<sup>th</sup> XII. même en leur quelques plantes que vous avez décrites.  
La collection de ce recueil serait bien intéressante et  
M<sup>th</sup> à l'égard dans aucune de nos bibliothèques ici, ni  
probablement chez aucun botaniste français.

J'ai dû vous marquer toute ma reconnaissance  
de la promesse que vous m'avez faite de m'envoyer des  
plantes, par la dernière occasion qui se présentera. Le  
jeune homme qui vous remettra cette lettre est le  
fils d'un négociant de Bordeaux, second de la  
navire l'anna, et qui le chargeait volontiers  
de tout ce que vous lui remettiez pour moi,  
parqu'il a des occasions fréquentes de me  
lui faire passer de Bordeaux à Paris.

Je suis bien, sachez vous en, Monsieur,

1851

D'être aussi éloigné d'un botaniste aussi éclairé  
en savoir que vous. M. BROWN, qui j'ai  
aussi l'honneur de connaître personnellement,  
vous, faites bien attention à l'Angleterre - et  
à la menton parmi vous que de votre  
immense et superbe jardin de botanique,  
qu'on dit avoir plusieurs lieues de tour,  
en 300 jardins. C'est un univers en  
miniature. Il est heureux qu'un si bel  
établissement soit dans des mains aussi  
généreuses!

Vous aussi, Monsieur, qui en suis que un  
chétif serviteur de flore, j'en atteste à  
glorieux vos campagnes qui en vous offrent  
par grand choix à découvrir, en parcourant  
par grande gloire à acquiescer. j'en lève  
par la vue dans vos belles régions, et je  
en suis de même végétation qui en  
jeur manquent de vos très acquiescer.

vous. Je suis très gracieux que être confié  
à un de vos plus habiles cultivateurs,  
et il en desespérer pas de pouvoir un  
jour faire lire vos ouvrages à vous

verump 1804 l'ombroy De plus glorieux arbor  
del'indes, le rhododendron arborescent

Monsieur, comme j'ai fait un étude spéciale  
de la matière médicale, j'aimerais bien avoir

des détails sur celle de l'inde, sur les plantes  
qu'on y emploie, ainsi que les plantes <sup>indes</sup> exotiques,  
avec les produits. j'espère que vous n'êtes pas

même que vous de me procurer l'un ou l'autre.  
Ces matières me fourniraient quelques matériaux dans  
une histoire naturelle des médicaments à laquelle

j'ai travaillé depuis longtemps et que j'espère  
publier bientôt que j'espère après avoir écrit  
cela. vous en rendrez un grand service, et

surtout à la science, en me fournissant l'état  
de cette partie de la médecine dans l'Inde  
contrairement à vos habitudes

Mais j'ai remarqué que j'ai vu demander bien  
des choses, et que cela va jusqu'à l'indiscret:  
j'aimerais aussi, Monsieur, en faveur de  
vostre, et en faire toute attention à mes diverses  
questions.

J'ai l'honneur d'être avec les plus hautes  
estimer, et les plus parfaites considérations  
votre dévoué serviteur

to which I believe  
My dear Mother  
I am very sincerely  
Edward M. Butler

Benecoleu 28<sup>th</sup> June 1820

My dear Wallis

We are still without any arrival from Bengal and consequently not a line of advice from you. The time must be approaching for your trip up the country, and I am not even certain whether this will find you in Calcutta. The London a large Libana ship arrived here some time ago direct for England, and we have taken advantage of that opportunity to send home the greater part of the Zoological collections. — The ~~last~~ second part of the description of them is finished and goes home now via Bengal. Mr S. is very desirous to get the drawings home at the same time as it will give the people at home the means of examining and comparing the whole, and making any corrections in the paper that may be necessary before publication. As there was likelihood of any direct opportunity from hence, we have determined to send them via Bengal. They are put in charge of young B. Poole, one of the officers of Watson's corps who is going up on duty and his directions are

& £\*

S / ,

to take them direct to you, if you are in  
Calcutta, and if you should have left  
it, to entrust them to Calcutta. They will  
be put up ready and fit for transcription  
to England, and it is therefore an object  
to avoid their being opened at the Custom  
house or in any way over hauled until  
they arrive at their destination. We were  
thinking at first of addressing them to you  
in case you might wish to look at them

£s >

would some the chance L <??<4/0\*\*~#U.\*6\*\*f <2\* <.i  
and moreover that L > ^ are not of much  
interest to you, and that your time is too  
fully occupied otherwise, we thought it  
best to save you all trouble

sdsj ^kr.

dispatching them. This I am sure you  
will readily undertake \$J», ^PyS  
them off by the very first opportunity.

It is of great consequence their arriving  
early, as if they are much delayed the  
paper will be sent without the advantage  
of reference to the pieces justificatives as  
the French would say. They ought to

^ I think regularly manifested, and with

a letter of advice to enable Bro. Jos. to  
get a Treasury order for their landing. —  
There is lots of trouble for you, and I cannot  
think of giving you so much without  
taking example in some degree by the native  
custom of not making <sup>^\* &</sup> citations empty  
hands. As they conclude their letters with  
"I have nothing to offer my friend but —  
— which I request him to accept." I  
shall conclude the above request with  
specimens in spirits of our gigantic flower  
*Quercus portunculata* neque *militaris*  
*India in later alii esculenti*  
*Præ Subae telus general Comum*  
*Amida nutrix.* —

I have dispatched a case of them to Eng-  
land, and here are some for you. You  
cannot imagine what abundance we  
have procured of them, and I have then  
been enabled to ascertain every point  
respecting them. I must I give you  
by my last the particulars. That it is  
a parasite on a species of *Piper*, that it  
is dioecious, and that the seeds are  
minute & situated in the centre of the  
column of fructification. —

Botany I am sorry to say has been  
most grievously at a stand, but I hope  
soon to resume it and make up for  
the way. — Among our other plans  
and schemes have y 6\* St<+ a^f~i~£-£ etical  
Society which we have established and  
of which I am deep dur. \*4&€-\*£ are more  
practical, than to make a figure on  
paper, and the people will feel the bene-  
fits of it most. — If however I frame  
any report on the subject, which I have  
some idea of doing on the state of the  
country generally with reference to it,  
you shall see our lucubrations. — We  
have no intelligence from home on  
the points of immediate interest to our-  
selves, and there is so much else to occupy  
people at home, that I do not think any  
thing will be speedily decided. Perhaps the  
all the better, the longer they are  
about it, the better it probably will  
be done.

As the winter will be soon off, and I have  
a good deal to do to get everything ready  
I must make this a short letter. — Hope  
to hear soon from you and then you  
shall hear more.

Remember me to Mr. Wallis  
and believe me always ~~his~~

My Dear Wallis

yours most sincerely

William Jackson

P.S. The box of Drawings will be addressed  
to Sir Jos. Banks & Mr. Meadows jointly.

A letter containing a list of the contents  
will be written to them & sent to Calcutta  
to forward. You can therefore com-  
municate with him.

By the by, in a late letter from Sir  
Jos. & Mr. Stamford, he acknowledges the  
receipt of seeds of my Peperatus through you

The specimens of the Pitar, are large birds.  
The opened flowers are sufficient to produce, and the birds  
exhibit many things singular. I desire you to prepare a good  
large Microscope against the arrival of these remarkable  
fellows —

M. Pack

... of Directors  
dated f/lf June 1856.

... to the ... 86

S&&S-' s&\*-\*\*\*>^e\*\*~c

... the management great pleasure the very interesting  
... Memoir by Dr. ... upon the  
... from the  
Botanic Garden at Saharunpore,  
connected with the object of exploring  
the Natural History of the Himalaya  
Mountains near the base of which  
the Garden is said to be situated

Although it is  
at its first formation in 1799,  
a very liberal provision was made  
by the Maharattas for its maintenance,  
which was continued till 1856, and the  
revenue ...

there is but too much proof in the  
documents now before us of the  
Garden

Garden having gone into a state of  
rapid decay whilst under the same  
state charge of the Station.

88.

As you have a  
strong impression from the various  
local advantages of the Garden &  
especially in regard to Climate and  
Soil, and the rich resources of the  
neighbouring Countries, that, with  
proper management Considerable  
advantages would be derived not only  
to Science, but on the Conduct of  
the affairs of the Company, we  
shall not withhold our sanction to  
any moderate expence which may  
be incurred in promoting the objects  
of so useful and laudable an Institution.

89. With this view, we  
approve of your having appointed  
Dr. Linnæus the Civil Surgeon at  
Serampore, to be Superintendent  
of the Botanic Garden, whom you  
have

have represented from his education  
and pursuits to be well qualified  
for the trust with a Salary of 100  
Rupies per Month, and an allowance  
for a <sup>1/2</sup> of Rupies 50 per  
Month. We, also, sanction the charge  
for the Subordinate Establishment  
of Rupies 200 per Month.

190. The total expense there-  
fore to be incurred on account of  
the Garden, is about 5400 Rupies per  
Annum, includ<sup>ing</sup> the out-  
allowance for the <sup>s/</sup> <sup>s</sup> <sup>sf</sup> <sup>y/</sup> <sup>y?</sup> <sup>f</sup> (charged) to  
Dr. Green of 6 Rupies per day,  
when employed on the hills in pro-  
- <sup>y</sup> <sup>y</sup> of Botanical Researches.  
Of this sum 2350 Rupies per  
Annum, arise from the Rent of  
the three Villages formerly appro-  
- priated by the Maharattas for  
the maintenance of the Garden, but  
as we consider it only as an

appendage

154

Dear Sir

I am very happy in having the opportunity  
of forwarding a few Plants to you by our very  
kind Friend Capt. Farrer of the Ship Albion.  
Whom I have no doubt will have great pleasure  
in delivering them to you in safety as as  
much as the length of the Voyage will  
permit; Also a small packet of seeds

which are in small papers &  
secured from the contents of a trunk the  
new I add some things to your  
collections; and to be sure of their  
safe arrival will give the great pleasure  
and remains

Dr. Sir

Yours very obedt Servant

Monsieur le Docteur,

M. le Gouverneur, Baron Milin, éloigné des quartiers pour  
raison de santé, m'a chargé des vœux adressés sur la cause de  
plante, que le pieux doit prendre et n'a pu  
subarquer. je la confie au capitaine des Génies,  
et j'espère qu'elle vous arrivera en bon état.

Monsieur le Docteur recevra toujours quelques envois de  
l'Intendant de Madagascar; M. le Baron Milin  
sera très-empressé de partager ses nouvelles, et de  
avec l'établissement dont vous êtes chargé; c'est par  
cette réciproque d'échange, Monsieur le Docteur,  
que l'Inde & les côtes de l'Afrique dont nous  
sommes ici les voisins & comme inséparables

pourront des avantages, <sup>concluantes,</sup> à départir, à chacune -

J'ai l'honneur d'être avec une très haute  
considération,

Monsieur le Docteur,

Veuillez agréer de très obéissantes assurances

2 July 1820

W.D. Brown 211 Lexington St

My dear Sir

I have received your note on  
the 26th 1/2 and thank you: the note is very  
good and it was as good as new, but an  
acknowledged gemment of this kind due from  
Gentleman German and resident at the Crisibury  
of laid over a long time after it became dull.  
and no successful account recited between  
the parties in the meantime may render it  
suspectious on the part of the holder, was the  
reason for my asking you to renew it, but  
you may say for when it is most convenient  
to you.

You have acquired an unconquerable  
frame, which I pray God will add riches  
and health, and in a few years I hope  
to see this expectation fulfilled. I am  
sensible of your kindling attention and  
solicitation to do me good, and what little  
services, which you were kind enough  
to acknowledge, if I have done any, it was  
in hearty reference for the obligations I feel  
myself to be sensible to refer to your mind

our day so much but believe me

My dear Sir  
I have ever thought in  
Yours self the best person

Yours ever

Dr. Wood

My dear Wallis

I had kept <sup>^</sup>Mr,rt <sup>\*/</sup> receiving your very obliging

Ufa <\$\$\*>\* A\*\*<sup>th</sup> some time ago but deferred answering  
until I received the seeds which have arrived safe. I have

sown | If these from Gossaign show and sent part

to Nainab and part to Shampley. I have also sown

part of the rice and sent part to Nainab. The remainder

with all the other seeds I sent to the Botanical Garden

at Glasgow where there has been lately appointed

a <sup>finjUft</sup> or likely to be somewhat distinguished. Mr

Hooker this person is I believe a correspondent of yours.

Should you be able to procure any more seeds from

the Swiss alps especially of trees I shall be much

obliged to you for them. I have no hot house and it

is hardly plants therefore alone that I can cultivate

and an addition to our hardy trees is very desirable

the number of those which bear this climate well

being rather confined

I went lately to London and have got my dried specimens and descriptions in arranging which for the Linnaean collection and for publication in *Philos. Mag.* *as may*

accept them I am now very busy

The paper which Mr Macculloch took charge of for me has not yet arrived and poor Dr Ferriar is dead.

quite

8

My dear Mr. Wick  
I have just received the pleasure  
of receiving your letter of the 27<sup>th</sup> for  
and now I will drop a few lines in the post  
concerning the matter as I may tell  
you that the 20<sup>th</sup> & 28<sup>th</sup> past certainly  
the latter will have arrived at  
last for you to have attended  
any of the Commission meetings  
then. I mention it to you for the  
the will not be of the least  
consequence as you have already  
received the same in more than  
a present stack of things for me

has been already in a great number of men  
in Calcutta has brought forward  
as he says a copy of the book  
called the "Royal Pedigree"  
which you have procured the  
original in your collection  
Macque and should have had  
a copy of it on your way up the  
river of parting with it to one  
of the who may wish to possess  
a copy of it. A duplicate copy  
of the original may be left  
with the same person if you  
desire of it, being with you  
of public use and a book which is  
a present upon any occasion.

unfortunate being the vitality of  
the human body which he can  
live through, and indeed we  
that have made a museum  
when you find a number of canoes  
and other articles of the  
culture of the Indians. I have  
found the canoe  
myself and delayed in my  
return to the coast by  
with a very good pattern of  
work a few weeks in the  
stages, and delay at the different  
stations. I shall send this to  
Koorshidabad. When the party  
is found you will be satisfied  
with and pleased to see the

your gift. The dried specimens  
that used to go of the Sabal house  
been discontinued after the  
dispatched at the sea. They  
from the Northwest, I fear  
nothing more goes to  
Bitane India but the  
of roots, seeds &c. of the  
in the house as you wish  
You may be sure to be very happy  
to hear of you & I request to  
prayer up towards us as often  
as you may favor me with  
letters - and you shall receive  
some from me at all the places  
we have mentioned. My next

/ > \* a < ^ £

greetings to your family  
I should be glad to hear  
from you.

I wish to know do you put up  
at Paris? include you name  
provided in this matter but  
if you had in need of any  
thing of the kind I can give you  
a letter if indeed I may be  
friend of mine have you  
with it. - fc ->-

Saturday July 18<sup>th</sup> 1820

My dear Wellich

I have now stopped sending  
dried specimens as I fear in the rains they cannot  
arrive in a state of preservation - Roots of Arums  
or Orchidea may be sent but I fear the distance is  
too great I shall try however - About 10 days ago  
a letter was dispatched to the Bd of Com. in relation  
to explain the mistake under which they or  
rather Mr Newham their secretary who was  
then acting board laboured when they sent  
their observations to you - I have since  
forwarded a list of the plants which I have  
introduced into the garden of which I have  
at different times forwarded you dried spe-  
cimens of those I thought might be new to  
you - I have also noticed that I did not thank

It was my business to point out what forms I was  
to communicate my progress to (which  
the Board had they upon the  
7 the order should have furnished me with  
but I have however received from you com-  
munications in the most liberal manner on every  
subject on which I thought it necessary to  
address you. I have requested that they in  
future act under specific instructions for the  
sake of my own credit as the different authorities  
under whom I am put seem to differ widely  
their opinions respecting what a Balance  
should be and as it will be impossible for  
any one in this situation to please all parties  
I have however stated also that I conceive neither  
the Local Agents nor the Board of Com-  
should have any thing to say respecting the  
internal management of the order and

4

that I may have no instructions to receive  
I except from you. - - £c

agree to this which is indispensable, to my being  
able to do **u** my duty where it is the interest of so

many **s\* f\*** to take the garden converted into a kitchen  
garden - I shall tender my resignation of the appoint-

ment - I have also stated that my health will  
not admit of my being at Sahampoor during the

rains and hot weather and that I should like  
to know whether under these circumstances - e~w

**f** I wish me to retain the situation  
my health will not admit of my doing both

duties of a civil station and 1200 troops **#\*** well

as that of the garden by attempting to stay at  
Sahampoor I have every year been obliged to

leave it and unable from indisposition to accept  
 myself as I should wish in my Botanical per-  
 spective while in the hills where I have been mo-

occupied in getting rid of them; than to inform  
you as you may have perceived - on my  
return to the Plains again during the cold  
weather my medical duties gave me comfort  
ment enough - If they sanction this plan I  
would put my bill depot in the vicinity of the  
proposed Convalescent hospital which will  
probably require a medical attendant - a doctor  
my whole time to my Botany <x^Λε J&T. s^Λc^εr \*\*+  
which if allowed to live in the hills shall  
have some health to enable me to exert my  
self - Failing these I shall go home as  
I can get a note certifying I know when I please  
of the being absolute necessity that I should  
either remain in the hills during the whole of  
the hot season and return or go to Europe  
I have not been able to send seeds except about  
the month of October when only they can be procured  
when I get my bill order properly settled

shall be able to do much more - in that way also  
I hope the forms with which I am to be saddled will  
be as little burdensome as possible as I know they  
will if it depends upon you - I hope no duplicates will  
be required and triplicates for the Bd and Local agents  
for in this way the forms will eat up the substance  
of what I could do - and in a situation where the  
salary is 200 p<sup>r</sup> month and the expense of gardeners  
200 also - I have been obliged to renew the whole  
of the soil of the garden - to turn off water with which  
it was inundated in the rains - to root up useless  
trees innumerable to fence the whole of the garden  
& all this without any extra expenditure by  
myself and now from having no authority placed  
over me inclined to appreciate what I have done  
for it or apparently aware that it was not already in  
a high state of perfection before my arrival I regret  
to make to you what I would have not called  
down upon me some severe observations -  
The difficulties too which were to have been expected  
in preserving the hill plants are not likely to

JCC

+\*

difficently appreciate /fi 35 i - Pray C of me how so  
you and if you can spare me some seeds of any  
kind I shall be much obliged IC\*\*

Wm. Simpson of Calcutta

No. 13. Bangalore 1<sup>st</sup> May 1821.

My dear Wallcut

Now I not an extreme philo-  
sopher, I should be for sending  
you to the D. C. for your research  
I have had any arrival from  
Bengal, and I have no letter later  
than the 1<sup>st</sup> July last from you. You

must have been kept with  
me very poor. The only letters  
I have from you since I left Bengal  
are No. 2. May 27<sup>th</sup> 1820

No. 3. June 7<sup>th</sup> 1820 } sent brief  
No. 4. July 7<sup>th</sup> 1820

187. Now I fear have fed the fishes.  
I know not whether my letters have  
been more fortunate than yours. I was  
very probably under many circumstances

papers I saw and you No. 2 & 3 of  
Majesty plants, and I am no longer

before this vessel sails of being able  
to send you a volume of Agricultural  
and proceedings from the trans-  
action paper. I do not know that you  
will find much to interest you in it  
but it will give you an idea of what

we are about here, & will show you  
the flourishing condition of our  
sugar cultivation, which we find to  
be now equal to the supply of Great  
Britain. - There is a paper on it by  
Linnæus where you will find some  
curious remarks on the "sapidous  
properties" of these hot blooded trees! -  
Linnæus generally writes very much  
to the point, but is often very quaint  
in his expressions. - The first report  
is perhaps the most readable part of the  
Vol. but you will perhaps wonder

what the D. l. has to do with Nepi-  
culture. In fact our Agricultural  
Society allows itself great latitude,  
and it had need, for the agriculturist  
(strictly speaking) of Beauvois might  
be occupied in a few words.  
At the fascicle N° 2. I sent you  
the first three sheets before my depart-  
ure for Nias; I now send the whole  
corrected & with additions from per-  
sonal observation. The part printed after  
my departure is full of errors.  
of *Dedy mocassin* have since discovered  
three additional species: *D. racemosa*,  
*D. elongata* & *D. barbata*. I thought I had  
other two, but on lately finding their fruit  
I find it baccate, they were therefore false-  
long to *Cyrtandra*. In *D. barbata*  
I have fully ascertained the sub-  
pendulous. - I have also discovered

Here *Microvillia parasitica* Noxb.  
but without the fully ripe fruit  
The seeds however do not seem to  
be winged & Noxb. does not say that  
they are. are they *Microvillia*?  
It differs too much in habit to be  
a true *Dideymiscarpus*; what then  
is it to be. an *noobium* of some  
subgenus?

I have found *Stroma* now  
I add *Stroma* *serripila*, a very distinct  
species.

I have very lately found a new  
very distinct *Tacca* with palmate  
leaves.

I found *Strombosia* which you  
may recollect from observing a *Saxifraga*  
*quadrata*, at Tappan only with fruit  
farther advanced but not ripe. The  
seeds are enveloped in an umbilical aril.

and the capsules burst internally, but are not quite distinct. An affiner *Rutaecis*? I also found the stamens twenty in number.

Of *Fernstroemia* I have two more species. Robt. *F. trilocularis* might be added all of them & must I think be dropped. I may suggest not the trilocular *Fernstroemia* be separated from those with two cells & few seeds? They appear to me to differ very widely. See a figure of the fruit in Michel's *Annuaire* to Bot.

In *Fernstroemia arborescens*, I fell into a mistake; the only tree I had then seen was an old sturdy individual that had choked its support and was then standing alone as an independent tree, which I called it "arborescens" but in using a greater number since, I find it to be a real climber, though a very strong one. I ought therefore

The specific name "arborescens" I have retained, or should it be changed. Had I known its real char. at first: I certainly would not have so called it. It comes near to *T. Euryandora*: the corolla is really three petalled & the calyx five sepalled! for the calyx is persistent & has ciliate leaflets, which is not the case with the corolla.

Ms. will I think please you, but you must observe that though called an appendix to the *Mat. Med.* it has been kept back till we hear what is done at home about the great flower. It is brought forward in *Surfand* then this is to be suppressed & not published, if not, then this may be used in the event of the French getting hold of it, as a proof of priority of publication. So you understand that it is at present, "inedita", but then compensated.

*Rafflesia, Doyobalanops, Sapiis, & Nepen-*

these are subjects of no small interest.

Tell me what you think of *Stygnosia*;

being a Pen: Trig. v. Mon. it will be of

use to you in Nostr. and you can intro-

duce it either from Mal. Musc: gene-

rally or at any communication direct

to you. Since printing it an idea has

come into my head whether this may

not be Linnaeus's *Glypta Rainghas*,

erroneously for *Rainghas*, which has

been discovered by no one since Linnaeus

see Sm: Kees. Cycl. - The point can

only be ascertained by a comparison

with the specimens in the Linnaean

Herbarium, & should a good mind be

sent a specimen to Mr J. E. Smith for

the purpose.

From the characters of our *Sago*  
which must be admitted to be a true one

I am inclined to suspect that *S. Kuffneri*  
is not a true *Sagrus*, though its fruit is  
similarly imbricated. I observe in the  
Catalogue that Roxb. has two species of  
*Sagrus*, but I have not his descriptions.  
Does he give a full account or had  
he ever their fructification?

I am at present at a country  
residence of Mr. Hanford in the midst  
of forests & jungles, from which I am  
daily receiving treasures. Materials  
are accumulating so fast upon me  
that I should like to clear off arrears  
by getting out descriptions. When a  
thing is wanted, it is a matter done  
with, and you go on business here.  
I have prepared a Monograph of our  
East Indian Melastomae containing  
15 species all new except two one of  
which is Roxb? *M. dianthifolia*, *M. ...*  
H. B. K.

I am thinking of sending it home for the  
Linnæan or some such period. public<sup>ly</sup>  
but I wish first to hear something from  
the folks in England, particularly from  
Mr. Socp adopted the plan of  
printing their papers as they came  
in: if they knew, I would not care  
to give them one. Do they know it?

I am anxious to learn how Robt.  
Walpole comes on, that I may know  
what to send you for it.

I am making an abstract of Ruess  
plants for the purpose of improving  
for his plants by their native names,  
and in the course of it, have ascertained  
several of his hitherto unnamed species,  
such as his *Maclurea* *Medica* III. t. 44 = *Lau*  
*rus involucrata* Michx., *Arbor* *Spicularum*  
III. t. 106, quæ *Euphorbiacea*, *Glycyrrhia*  
*rubra* III. t. 112. *Nidus* *gominans* *fornicatus*  
*rubri* III. t. 55. f. 2. quæ *Rubiacea* *tetrandra*.

I look anxiously for the first arriv-  
al from Bengal, that I may know  
what you have been able to do for me  
towards procuring my detractional disburse-  
ts. particularly Rowmer. Secandalle &  
the last of the Eve. Math: & J. I am not sure  
that I could not get some of these foreign  
works by the way of Batavia, but  
I do not care to send the correspondence  
till I hear from you. - I have advised  
of the dispatch of the Emperor of the late  
Vol. of Press & Co. but they are not yet  
arrived. I see by some English advertisements  
inserts that the work is bro<sup>d</sup> to a close. -

Have you heard yet of George  
arrival in Copenhagen, & received  
an answer from my father. I have  
not yet heard, none of my letters coming  
down so late. - My best compliments to Mrs  
Mallish & believe me always  
your affectionate son,  
William Lark

P.S. I have lately found here another  
*Strophanthus* whose fruit differs toto  
caelo from that of the Penang species.  
It produces two enormous gollies  
about a foot long, very thick and  
diverging horizontally from each  
other, so as to form a straight line  
but the most wonderful thing is that  
the seeds are comose at both ends!!  
The superior coma being the longest, vide  
the margin. That this is a true *Strophanthus*  
there can be no doubt; it has the  
ten leaved corona on the pappus, which was  
wanting in the Penang species; may  
this last be therefore a diff.<sup>t</sup> genus; if  
not what becomes of ~~various~~ <sup>various</sup> grand di-  
visions. Of the new *Strophanthus* I  
must send you the description in case  
it may be in time for you.

May 10<sup>th</sup> - There is no end to Discoveries; I  
wrote this I have got another still more  
splendid Strophanthus, as yet without  
fruit which I must call *S. speciosus*.  
I enclose descriptions of both. I have  
also discovered that my new *Tacca* is  
figured by Kunthius, T. t. 115 as his  
*Tacca montana*, which has never yet  
been quoted, so it now becomes my  
*T. palmata*, of which I add the descrip-  
tion. - Yesterday got a most magnifi-  
cent *Avicennia* which is without doubt  
Kunth's *Papaya litorea* I. t. 52. *hactenus*  
*inominatum*, I send you a description  
of it as *A. ~~palmata~~*, together with  
another species still more extraordinary  
from the curious form of its leaves  
which are digitate flabellate or radiate  
pectenate, or - in short there is no describing  
it except by a picture, which shall be given.

Among other unexpected personages  
that I have here popped upon, what  
I think of a Peter (any Petrocarpa)  
in Parinarium sub & sup:— You shall  
have this quite <sup>g^, ^, \*\*^\*</sup> too.—

Among my <sup>Jt & ^' ^ ^ i</sup> old acquaintances  
I have one that puzzles me; it seems  
to be monosporous, and the fruit is  
only one seeded, which seed has a re-  
gminated albumen with a small in-  
verse embryo lodged in its upper part;  
I have not yet been able to ascertain whether  
the ovary is monosporous. but I  
suspect it is. It is a straight stick of a  
tree with pinnate leaves, and dividing  
at top into a large <sup>£ & \* - \*\* - £ L & £ £ £ & - \* the same</sup>  
cellular & umbellulular.— <sup>Ss</sup>

On further consideration  
4UJy <sup>^ C</sup> monocarpus: <sup>^ C</sup> are some doubts <sup>-i«V</sup>

to its affinity with *Preponia*. In that  
family, the dipipiment is free, the seeds  
transverse & attached to the edge of the par-  
tition near where it joins the valves &  
when the seeds partite as in *Node*  
*B. quadrilocularis*, it is by a thickening  
of the centre of the dipipiment. In *U. S.* /£&&, *U.*  
*inocarpus*, the dipipiment is not free  
but parts in the middle, and the seeds are  
pendulous at the edge of the lobes  
of the dipipiment. *Cytandra* agrees  
perfectly in this structure, but its fruit is baccate, and the seeds  
are attached to more of the surface of the  
lobes. *Incarvillea nequassii*  
& *k^f\*-z^*, P part. /A\* *calitica*. May  
they not form a new order between  
*Preponiaceae* & *Scrophulariaceae*, and  
*Cytandra* be added to them

~ /£&> I have mislaid my description  
of *Aralia flabellata*, and cannot at  
present have recourse to the speci-  
men, so I must content myself  
with a rough idea of the leaf, which  
is so uncommon & remarkable,

'•^PT^^

that it is alone <sup>the</sup> character-  
istic of the species, if the description which  
shall follow, should be too late. I am  
extremely puzzled for a good phrase  
wherein to describe it. I would  
like too a better name than *flabell-*  
*ata*, if you think of a fine one pray

£i £cis?\*r~4^

I have some very singular *Picci-*  
*deas* plants which puzzle me a good deal.  
There is one <sup>^Atf^^^^</sup> the male flowers is in  
the margin of ten or 12 solid lanceolate lobes disposed  
in a circle with anthers lodged in the sides of each  
lobe. Female with an ovate fruit with a thick  
one seeded, with three abortive ovula. Styles 2. Seed  
abundant. Sub: superior. What can it be?

I send further a description of my *Sonchica declinata*  
with remarks on the genus. It is a scrawled & corrected  
copy of a paper I was composing, but by accident I have  
lost the original of it. It contains also *Macrolobium* & *Bauhinia*  
compare my *Lonchocarpus* with Roxb. *S. scandens*. If the same,  
my name is preferable, for it cannot fairly be called *scandens*,  
because although the branches being long and weak, gene-  
rally hang forward, but are not scandent, much less  
voluble.

2<sup>d</sup> P. More delays. I am now in town &  
have referred to the specimen of *Arabis*. I wish  
I add a further notice. What say you to *S. ...*  
*Thylla*. a hand & fingers? I have observed that  
Knox has a *Pterospora*, but it is different from  
mine, I think. Sales lighted accidentally on his  
*Androsoma* which I at once recognized as being  
near to my plant which you formerly pronounced  
to be *Guarea*? *Hexandra*. Have two species &  
send you descriptions of both. (*Leptocarpus* or *ocypus*  
to be in *Monagynna*, all analogy forbids it  
to be found in *Loxophaea*. by the by. *Androsoma*  
is preoccupied by Brown. Will *Kohitoka* be in its  
place, see a quizzical derivation of this Sanskrit  
word from the Greek at the foot of the letter. —  
in the manner of *Pelopata*, grass from *Koupala*  
*parhama*. ... ..

My dear Mr. [Name],  
I have just received your letter  
concerning the [unclear] volume  
is already ready and have got a few  
copies to go by this occasion, of  
which I have held one for you. I  
~~am sorry~~ I have had some  
time I cannot have that some  
of the [unclear] Mr. Catbrooke  
I have only had once to the  
[unclear] subject. He should also  
have one of the [unclear] family.  
I believe on [unclear] thoughts it will  
be best to consider the [unclear] as  
published & give the widest cir-  
culation practicable, as we may  
now be sure that whatever [unclear]  
[unclear]

is taken up at home with in  
the name of a reputation of mine.  
and therefore there can be  
no clashing. And if anything  
has been done, the more that  
is said of this the better, to  
put the French superintending  
the French and a copy of the  
book which was presented by  
the other as the said manuscript  
being mentioned in the second  
of the proceedings.  
The said manuscript, which  
is a paper of 10 pages, he  
ought to have copies of these  
papers in the name of the

I believe it would be useful  
to send copies of the botanical  
papers to the Library of Botanical  
Characters at home. but I  
shall wait till the arrival  
of some further intelligence  
before I make them  
New York

July 1840

London. 22<sup>nd</sup> July 1824

My dear Sir,  
By Mr. Hoagly I had the  
pleasure to receive your esteemed favour of the  
28<sup>th</sup> Dec. and also the Boxes of Seeds and  
Plants, in excellent order, for all ~~&\*,&&&f'\*~~  
by which to return you my sincere thanks.  
Mr. Hunt also received his Box of Seeds at  
the same time, and we have made a division  
equally to your wishes. The Packing is also  
excellent, and by his the two Boxes of Plants  
in the finest order I ever saw. Your note  
to Capt. Lamb kindly announced that they  
were for me and Mr. Hunt, but since  
Leopold had ~~conveyed~~ intelligence that he  
was the foreigner and as they were directed  
to him and a doubt existed I waived  
my claim in his behalf with great pleasure  
and his Royal Highness has expressed  
himself in very handsome terms on the  
occasion. You need not trouble yourself  
to

D. Hallid,  
Calcutta

to send you anything more at present, for your  
supplies have been very liberal and I and  
my friends profited by them.

We shall have the Globe, Capt<sup>d</sup> Blyth,  
sailing soon for Calcutta, and if I can collect  
any specimens worth your attention they  
shall go by her. The Wrighty will probably  
return to Calcutta in September.

Dr Hunter takes his passage I understand  
in the Eclipse, Capt<sup>d</sup> Kirby, to join you as  
Assistant. A report has been spread that  
he is to take your place, but I do not  
believe it, and I sincerely hope and trust  
it is untrue.

For Mr Banks the venerable President  
of the Royal Society is lately dead. Dr  
Sydenham Hutton is his Successor for London.

With great regard,

I am, my dear Doctor

Your obedient Servant

Walter Buchanan

Paris 29<sup>e</sup> July 1890

My dear Walter

I had just had the pleasure of  
receiving your letter of the 7<sup>th</sup>  
and the same day brought  
me one from Mr. Willshire

his account, for  
I have not had a day

in my apartment - the things you  
have purchased for me from  
him I am sure I shall be much  
pleased with - as well as with  
the Argand lamps which from  
some description must be very  
elegant ones, and the whole I  
think very cheap as you mention

'ist^&~&fy  
cj!L.¥0&

nothing more about the "Thermal  
L/K.\*&e  
have not brought it. on my last  
tell us we have informed you  
g» c > r & A ;  
which is not way from Calcutta  
and I shall be perfectly content  
with the fine things which you  
have ^ ^ 7 \_ ^ ^ ^  
me - I mean by this time I  
S include with a gun or gun  
so much so I dare say that I  
shall not send this to Khandalpur  
as I thought of doing but I will  
it as my desire to Khandalpur  
where I hope it will arrive in

fl/?^S

10  
time to meet you. Any  
mention Putnam in the list of  
places for addressing my letters  
I perhaps do not intend to  
go that way but to come up  
the Nhang mitter which I believe  
is practical though I never  
went that way. But you have  
to do all accidents all these  
times before you selected your  
class; I hope you wish have  
good weather on the river and  
not experience any bad storms  
which frequently occur and  
which reach Natchez without  
any accidents. - You must  
be bringing up the botanical

4r~\*E<+—&\*^&+

Guided with you to require 1200  
Mounds of boating for the  
Collection of plants with you  
I would require more room than  
our ground affords to dispose  
of half of them - but unfortunately  
happens that our friends here  
have taken a decided turn  
towards gardening - they are  
amusing themselves with laying  
out new grounds for this purpose  
and your stock of plants will  
therefore be very acceptable  
presents to the Court and to  
the Ministers and this is all  
in favour of your pursuits -  
Chief object is enriching the tables

where I trust we shall believe  
you in good health and  
spirit - by the middle of Nov  
and that on experience you  
will not be greatly disappointed  
in your speculations of a  
letter - All kinds of papers  
I trust appear to be of your  
hand - perhaps indeed you have  
a copy with you - however  
I much have no doubt a  
good deal of rushing wind  
will be by in the river if you  
will not delay much at the  
several stations -

I had told your people to  
discontinue collecting specimens

But I have now directed them  
to go on and keep them here, and  
the Bagg parcels of costs, seeds  
&c. shall be sent down as usual  
to the Atlantic Judge direct  
to Mr. Stuart.

Write to you on the 9th  
from the island which letter  
I hope you have got  
I suppose Messrs. (roll and  
Others who understand them better  
for the Asquith Lamp, &  
you must let me know all  
that I may be enabled to pay  
for any other sums which you

We have laid out on my  
account that I may repay  
you - Pray make me best  
advantage Mr. Wallick and  
with my sincere good wishes  
for you pleasant and  
safe journey - believe me  
My dear Wallick  
Yours very sincerely  
Edward Gardner

Pray was there any talk when  
you left (about) of D. Hastings  
a Mr. Stuart. going home this  
year? - Hope you will let  
me hear of your progress -

27/6

Dear Sir!

I take an early opportunity of returning you my thanks for your letter of Dec<sup>r</sup> 20<sup>th</sup> 1829, & for the Ordeal seeds, also for the box of roots address'd to Mr. Buchanan, in<sup>d</sup> June by the Houghly Capt<sup>n</sup> Lamb, the roots came in very good order only a few having perished during the voyage the whole of the following spec<sup>s</sup> were lost, *Pledy chinii* *thyrisifera* *American dealbata*, *Alpinia Allughas*, *A. calcinata* & *A. malaccensis*; but fortunately all the *Alpinia* I possess already we observed that all the roots, which were dead, had a larger proportion of the earth left about them than the others, whether this occasion'd them to decay or not, is another worthy further attention, for nothing is of greater importance than to discover in what manner plants can be transferr'd from this country to India & vice versa with the least injury & loss, the *Dendrobium*, *areolatus* & *Cymbidium*, were all dead, they appear to have rotted, I should suppose from the moisture of the soil, the latter tribe of plants, I should expect would come best in a box by itself themselves, with merely a little dry moss laid round the roots & perhaps the box fill'd with dry sawdust, but this latter may be of no use if the air is well excluded, the former part of the list consisting of bulbs & tubers,

roots I firmly believe from the observations I have been able to make, would  
come equally well if no soap was used, as with it, let the roots be got  
freed from earth, laid in the shade to dry for two or 3 days, &  
then pack'd as they are in a case of some dry sand or soil might be in-  
-troduced merely for the purpose of preventing their shaking about, this  
prevents you a great deal of trouble in the packing.  
I must now express my great concern, at my folly in not writing  
you sooner by the regular post of my having ship'd the cases of pla-  
-ntes in Feb<sup>r</sup> last year to which is certainly to be attributed the  
delay at the Custom House, it arose greatly from my ignorance of  
this sort of business, & I shall be more attentive in the future, and  
you will find before this can reach you that I have adopted a  
proper method with a case forwarded you by Capt<sup>r</sup> Ganish, I  
am glad however that you received the *Glycine* also & hope  
you will have also *Maranta jobina* sent by Capt<sup>r</sup> G- the  
latter I expect will prove an acquisition in your garden, it  
grows in my Hot-house to a large size having leaves 3<sup>rd</sup> long  
it loves the shade; the *Glycine* increases very fast, by planting  
a leaf with the roots, bark in the earth a bulb is speedily pro-  
-duced & soon becomes a plant, it flowers best when only one  
stem, it is better therefore to cut off the eyes as they appear except  
one from the center, I shall have much pleasure in sending you  
out a collection of bulbs & tuberos roots as you request, I shall  
every day to hear when my friend D<sup>r</sup> Shute sails, by whom I  
propose sending them & am preparing a collection for that pur-  
-pose, I have also a small collection of seeds to send at the same  
time still hoping they may remain uninclosed before they are  
packed, & in the Autumn I will again make the attempt

to introduce some living roses, & fruit trees, I assure you for it would be  
- for a once as much pleasure to add any thing acceptable to your  
- collection as it would to receive any thing from it; Thus Mr. Shepherd  
of Liverpool I received N. Columbus's species: what a variety, the seed unfor-  
- tunately was bad, only one vegetated, if I succeed in keeping it thro'  
- the Winter it will do, - Capt. Lamb of the Bering has received &  
- informed Mr. Buchanan that he had two chests of living plants  
- on board for himself & me, & sent your note stating having sent  
- them, they have been attended to with the greatest care & arrived  
- in a state of perfection scarcely known to the India plants; in these  
- cases P. Leopold laid claim having the lists sent to him & upon  
- examination found his address upon /FJu\*\*s #. ^Ua, you intended  
- for us never came on board, altho' in Mr. B.'s own ship  
- I understand the case of his Cousin which Capt. Lamb is, we of  
- course merely inform'd the Prince of the circumstances & they  
- were forwarded to him, altho' this discovery was to me a greater  
- dis-appointment than to Mr. B. - he having no garden of his  
- own (but many friends whom he wishes to oblige) there is no  
- individual to whom they could pass from me with so little  
- regret as His Royal Highness, when he first settled many  
- plants & cuttings went from me to Clavmont & / £\*U \*S{&L+^  
- received others from thence I can generally obtain any thing they  
- can spare - you kindly sent me abt 2 of the same kind of Rhodo-  
- dendron arboreum, from which I have now plants 12 to 15 inches  
- high, they appear difficult to manage, the leaves damping off  
- I kept them during the winter in the stove but lost great  
- numbers of them, I have now planted out in the open ground

form of them in different situations when I mean them to stand the  
winter & the others I shall try some in the greenhouse some in  
arcs - in the last of each just rec<sup>d</sup> is *Cornus obovata*, ~~some in~~  
England most of the Botanists & cultivators of bulbs consider this  
to be *paniculatum-ambrosiense*, now as also allow Dr Roxburgh to  
/ V of deep purple  $k\epsilon \sim \sim, r$  by his opportunities to have  
collected more of this genus than was known before his time, I  
was much ~~at~~ to see both standing in Hortus Botanicus  
which caused me to enquire that the Dr had some doubts as to  
<sup>^</sup>UJ idu&£f but surely as you must see them both constantly  
in flower, if different, the great generic distinction between *Cornus*  
& *paniculatum* must be evident; I shall endeavour to flower in  
you have sent for *C. obovata* to see if it differs from what I  
have already for *P. ambrosiense*; I had like to have omitted  
mentioning that in May last <sup>s</sup> sent in a case of books going to  
Mr Thacker of Calcutta a small parcel of seeds for you, which  
if not rec<sup>d</sup> you had better enquire <sup>M</sup> of him for the parcel, Mr  
Thacker is Agent for Black Riverbury & Co Booksellers London, &  
whom frequent <sup>n</sup> offers of sending, but I find from experience  
it will always be best to write you by post, altho' <sup>s</sup> may occur  
myself <sup>w</sup> this mode for conveyance of parcels. altho' *Populus* *can-*  
*-mosa* is plentiful in England, it has never seed, I will forward you  
a plant at the request of its living having several by one, & what  
other species I can, I will also endeavour to <sup>v</sup> it to Mr Thacker to take  
charge <sup>\*\*</sup> - the Cabin of a plant of *Mauronia americana*, has  
I send some fine plants last year, state this <sup>t</sup> \* - <sup>i</sup> *can-*  
with us, I will endeavour to procure *Cordia Sebestena*, but am doubtful

of success - I will now venture to state a list of my present desiderata  
 in addition to what I have before forwarded; altho' it is not impossible  
 some may have been named in those preceding by you, I am now con-  
 sidering to complete a collection of *Amargolis*, *Truncus* & *Panicotium*,  
 & the following or any part of them I should value that you can  
 furnish me with

<i>Amargolis asiaticum</i> Robt.	<i>Panicotium zeylanicum</i>
- <i>ensiforme</i> - d.	- <i>longifolium</i> Robt.
- <i>dumetorum</i> d.	- <i>biflorum</i>
- <i>concentrum</i> fig in Bot <sup>ic</sup> Reg <sup>is</sup> 171	<i>Alpinia pumila</i>
said to be from East Indies	<i>Heliconia baccinata</i>
- <i>lacifolium</i> - Robt.	<i>Ambrosinia ciliata</i>
- <i>brachyfolium</i> Robt.	<i>Kanfferia ovalifolia</i>
- <i>canaliculatum</i> Robt.	<i>Musa superbum</i>
- <i>angustum</i> Robt.	
- <i>lobifolium</i>	

You may rely upon my forwarding  
 by every favorable opportunity European  
 Inds whenever I have any in possession  
 I have began to collect in my own garden & shall do it with  
 as they ripen in order to send out to them you may depend  
 upon as being fresh - I beg leave to subscribe myself  
 with much respect & Sir

Chapton  
 24<sup>th</sup> July 1820.

Yours truly

ANNO

Calcutta

Dr Wallick.

Hon<sup>ble</sup> E. J. Comp & Botanici

Garden

✓

Nov 21 Feb 1831

from Mr Mackenzie

in London

J.H.

Glasgow. July 26<sup>th</sup> 1820.

My dear Sir

I have lately had the happiness of receiving your letter of the 8<sup>th</sup> of last October & I rejoice to learn that the Books I have sent have proved interesting to you. Before this reaches you, you will have got a former letter I wrote to you from this place, in which I mentioned my having been appointed Regius Professor here, & also which I know will give you great pleasure the safety of the parcel of Books by the L<sup>d</sup>. Cathcart! I did not doubt but some accident must have happened to it. It was sent to the Custom House & by some strange neglect or forgetfulness on the part of Mr. Capt. Brown or the Custom House Officer I never received any notice of it till two days before the sale by public auction!! I had just time to commission a friend to buy it for me & it has been sent to my house in Suffolk since I left my home, so that I have not yet seen the parcel; but Mr. Brown has, I pronounce that there are as I could not doubt, some good things among them. All the plants you have now so liberally sent to me up to the 20<sup>th</sup> of last February in the last year, in obedience, are received. You are kind enough to mention that in some boxes sent to Mr. Lambek by the L<sup>d</sup>. Cochrane Capt. Williams, an Index of which I shall probably share the duplication. So I should probably if I could go to London & look them out myself. But Mr. Lambek tells me there is nothing of any consequence. In short I have never been able to get anything of any kind, whatsoever from Mr. Lambek: he is wholly occupied with his

own collection. And this <sup>indeed</sup> makes me to make  
the request that when you may in future intend  
to send to me many be sent direct, as I shall  
probably not get them. There are some whose greatest  
& almost only pleasure is to increase their collection.  
I have my collection, too, very much at heart. — but  
I have a still greater source of gratification in  
publishing new discoveries, as much as ever I  
am able, & in distributing duplicates to others who  
are interested in the cause of Botany. It is  
with the view of devoting my whole time to plants  
that I have accepted the Bot. Professorship here.  
It was one of Sir Joseph Banks' last acts, connect-  
ed with science, to recommend the situation to  
me. You will have heard of his death by the  
public papers. The library & collections are  
left to Mr. Brown during his life & then they go  
to the Brit. Mus. I believe, however,  
that as Mr. Brown's income is limited, he will  
give it up at once to the Museum.

Your Secretary Sr. Hamilton (late Buchanan)  
has lately sent me from his garden here a packet of  
seeds which he had from you. They are mostly the  
most common plants of India; but three accom-  
panied them 3 kinds of rice from the mountains  
of Nepal. I have heard Mr. Barrow of the  
Admiralty state, that they grow at the height  
of 15,000 feet above the level of the sea. Is this

correct? They are all growing with us & I am much  
pleased with them.

I have been bold enough to ask you in my last letter  
for your assistance to this our Botanic Garden, in the  
way of living plants or seeds of the rarer kinds. I am  
sure that the establishment is upon so respectable,  
& even magnificent a scale, that it bears bids fair,  
with proper encouragement, to be one of the very  
first gardens in the Kingdom in the course of a few  
years. If there is any thing in the garden, either  
that you think worth sending us, or if you, you  
have only to say so & we will send you all we  
can. We have correspondents in the W. Indies &  
get all we are able from thence, & we are very  
rich in hardy plants. Succulents & Orchid  
across parasitics, I am much interested in.  
I have also taken the liberty to solicit dried & fresh  
sagittaceous plants, for my Herbarium, which you  
may suppose will be highly valuable in  
new situations. It is not here in Glasgow, as you know,  
that I can go to some extensive Herbarium & collect  
the specimens. I must depend entirely on my own col-  
lections & my own Library, for there is, at present, hardly  
a single botanical book in the College. I do not, however,  
despair of seeing Botany flourish in this country. If I did  
not think so I would not come to live here. I return  
to Suffolk in about ten days, as my lectures are just  
concluded & then I shall remain further winter. In April  
I come here with my whole family to reside for a continuance.  
Whatever is sent to me in future for me had better be directed  
to me at Dr. Hooker (for the degree of L.L.D. has lately been con-

<2L

—S, &

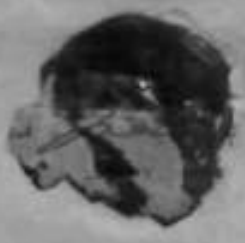

found upon me) at the Royal Botanic Garden, Glasgow.  
 Then whatever may be the size of the parcel there will be  
 no duty at the Custom House. Perhaps you will some-  
 times hear of a Glasgow, or what in the same thing, a Liverpool  
 vessel to forward parcels by, which may be more convenient than  
 a London: - but in either case I hope the Capt will inform me  
 if the parcel is sent to the Custom House: that I may write  
 without delay to the officers. Dr. Taylor is quite well &  
 was appointed, at the same time with my self here, to the

My dear Sir

I have the pleasure  
sending you two Botanic  
Drawings by the artist  
generally mentioned.

Trade requests  
me to advise you of the  
despatch of a Book on  
the Tibet language  
left to his care by  
Mr Masscroft for  
transmission to the Society.  
In pursuance sending the  
Plates from Budekath  
under my charge after  
the rains. This will be a  
favorable opportunity for  
transmission.

bringing down any particular  
growing plants you may  
wish to have for the  
Garden, or may mention  
your wishes in this respect  
and as far as practicable  
they shall be attended to.

I send you a  
very rough attempt at  
paper from the Mokla  
bark, which I formerly mentioned  
to you, but I do not think  
it would be possible to  
turn it to any advantage  
as it has neither the smoothness  
of texture or toughness of  
the Set Baroak —  
Believe

Believe me  
my dear Sir

# SOCIÉTÉ ROYALE ET D'AGRICULTURE.

Monsieur,

M. Thoreau, professeur au Muséum d'histoire naturelle de Paris  
 a rendu compte à la Société royale d'agriculture, qui a l'honneur  
 de le compter au nombre de ses membres, d'un objet qui vous lui a été  
 fait de Siam d'une espèce de riz, qui est cultivé, à une grande  
 hauteur, sur les montagnes de l'Himalaya, dans le pays de Ségol  
 Il a bien voulu mettre à la disposition de la Société une portion de ce  
 grain et se charger d'en faire la distribution à ceux de ses associés et  
 correspondans qu'elle lui a désignés, et qui ont été invités à en essayer la  
 culture. L'acquisition de cette précieuse variété, si elle réussit dans nos climats,  
 sera un grand bienfait pour le pays, qui en a besoin particulièrement  
 sensible à votre zèle éclairé. Sur un magnifique riz en France, pour la  
 multiplier, la répandre, et chercher à la reproduire dans les contrées qui  
 lui conviennent. A cet effet, nous faisons bien  
 des vœux pour sa culture et pour sa prospérité. Il est assez probable que

31 July 1820

Rec<sup>d</sup> in a letter  
from Prof<sup>r</sup> Thunin  
dated 24 Feb<sup>r</sup>y 1821

during my absence  
in 1825; the whole

enclosed in a

box of seeds. —

My Dear Sir

:A~^

I regret to say that many circumstances  
prevented me till now sending the Paper I have  
since promised you containing a very particular  
regarding all the ~~articles~~ <sup>articles</sup> mentioned within the Dynamite paper  
sent to you some time ago. I mean those of last year  
I am very sorry I cannot now furnish you with

a <sup>full</sup> account of each of the seeds found in the interior  
in consequence of my having little leisure from my  
business and employment. I have only given the  
f^ ^ f^ v < \* nearly as far as possible, ascertained from  
packing and compared with theoretical observations  
M Tt^ such as they are I hope may be acceptable.

Since I last had the pleasure of writing you, the  
weather has proved most unpropitious for gathering  
plumage & seeds, owing to much & continued rain,  
nothing almost can be effected in this way till the  
weather becomes fair. I have another but very small  
supply of seeds but shall dispatch very soon.  
Some of them are not sufficiently dry yet.

I shall be happy to ascertain at a future opportunity  
that all the Papers for Letter Journal & Review

I despatched the end of May & beginning of June have  
reached you in safety.

A few days ago **X** was highly gratified by the arri-  
val of the large parcel containing a quantity of seed  
from which I hope I by you **Li** accept of my very  
best thanks.

Wemau My Dear Sir

Very Faithfully Yours

Botanical Garden

4<sup>th</sup> August 1872

My dear Sir,

I postponed writing you until I could do it from this place & the hot weather put & then a succession of business, College Disputations & so on prevented my getting down until to day. I find every thing in good order & going on well. The Bell has come to me & been swung & the other bells are answered exactly well. The Bachelors are going on happily. & so far the Bachelors seem to go on. I have to thank you for several obliging letters & have been happy to receive such good accounts of yourself & the weather. As our thing is nearly wound up here I have so doubt that you will have a delightful rest up the year & enjoy & make a fine paper. I do not believe that I know any thing

very particular to commence with, 5<sup>A</sup>  
in an instance of your plant Books  
was very expensive. but there is  
some excuse in the haste and great  
demand for books. & if the Series  
has not succeeded in other respects  
but may find you from this accident -  
I have sent you a paper from a  
friend Naturalist with a note from  
the Editor. Now you will see so good  
as to do upon it whatever you may  
find convenient & agreeable to me.  
By a paper which the Editor may see so  
good as to send me & a paper that  
the Editor intended in his command.  
You will be a parent in respect you  
will naturally be anxious to see his  
improvements. I trust that you will be  
careful & not expose yourself too  
much in the pursuit of your success,  
more especially in this season and in  
juncture. With my best regards to  
Mrs. W. & C. Yours faithfully  
S. M. M.

P.S. I was happy to hear you were so  
comfortable with the three sons. I was  
sure they would be happy to pay you  
every attention in their power. I

had almost neglected to thank you for  
the fine specimen of the bear you  
sent from Capt. Sawyer.

Ser (J. S. M. P. S.)  
29 Aug. 1820

Saturday August 15<sup>th</sup> 1820

My dear Wallich

As my friend Capt<sup>l</sup> <sup>Robt</sup> Young  
of the 27<sup>th</sup> is certainly to go to Calcutta in the <sup>^":</sup> of  
October if I should not, I have committted to his  
charge a volume containing about 70 drawings  
of plants which from being unable to keep  
my draftsman at my own private expence  
I have been unable properly to finish they may  
perhaps as being drawn from living specimens  
enable you to add some parts to your own  
drawings which the want of that advantage  
cannot render difficult occasionally - and  
perhaps the dried specimens I had sent as well  
as others I hope to send or bring you may enable  
you to complete them - they should have been  
sent long ago could I have found an opportu-  
nity - some of them you will see are already  
well known so I might have saved myself the

trouble of taking them - if I get an unfavorable  
answer to the proposition I have made to you  
I shall be down myself along with them  
I am therefore very anxious to hear from you  
especially after the letters of respect I've written  
to you the contents have had some reach  
you in course of public communication  
I have been confined here with constant rain  
for nearly two months - The Calcutta Dispatch of  
several days was carried away by a rain close  
by this and the man nearly drowned - The  
Dispatches of 11<sup>th</sup> / 12<sup>th</sup> / 13<sup>th</sup> July from Calcutta lost  
I hope nothing from you was in either or from  
Gordon from whom I have been expecting to  
hear

I had begun to scribble from the plans of you this  
season before leaving them but merely scribbled  
from getting away earlier than would have  
been better than for three years during this  
rainy season which is always my word

time — I there any one you would wish to re-  
commend for this situation in the event of my  
leaving it for even should all my requests be  
complied with I shall go home if I am not in  
pretty good health in September and October.  
Pray let me hear from you my journals are not  
to be decyphered except by myself but when  
I have time and health will furnish informa-  
tion respecting the geography of the plants  
which has hitherto been the chief object  
of attention — I hope I shall be able off — and  
to devote myself to this subject with your  
assistance in time to arrange a communication  
either to you as my immediate superior or  
through you for the society I should you  
think it worthy of their notice —  
With my means and knowledge however  
I must trust to you entirely for the arrange-  
ment and places of the species — Pray write as  
soon as you have leisure for I shall have no heart

Page 2

to do anything until I know how my affairs are  
likely to be arranged and if they are to be arranged  
one or not from other Yours Prof G. Gould

Hipswal 8<sup>th</sup> Aug: 1890

My dear Wallich

You will have heard I dare  
say, before this reaches you  
of the death of poor Major  
Bog at Muthye on the 27<sup>th</sup>  
of last month, a sudden  
famine, occasioned the same  
by fever after only a few days  
illness. The authentic  
intelligence of it only reached  
me yesterday and as it will  
interest you materially at all  
your plans, I've no time in  
giving you the information but  
I should not have put you

the quarters. I know not  
where this is likely to find you  
but will send it to a friend  
in London - if, as I fear, you are  
coming up the Rangoon by river  
this sad event will, I apprehend,  
put you & Mrs. Walker to much  
inconvenience for accommodation  
at Mandalay - but should you  
have proceeded up the Ganges  
to Patna, as I hope you have done,  
the disappointment will doubt  
be less felt - or the crews, with no  
doubt, in that case, reach you in  
sufficient time to enable you  
to make at that place some other  
arrangement. In Miss Wallis's  
than the one you had determined on

Comfort during your Mountain  
Expedition. This is a very  
unfortunate affair - but  
grieving is vain.

Write you last on the 23<sup>rd</sup> by  
to Mongolia, which I think you  
must have feared - but I believe  
this letter by Putnam - we have  
had very heavy rain & much  
frost, and our communication  
with the plains has been quite  
cut off of late. But yesterday  
brought us 6 days home  
have still several deer - I hope  
to hear that you have got on  
in your voyage without any  
accidents or serious annoyances

I have paid Mr Wittchen and  
Messrs. Carl & Co. their  
bills some time ago.

Pray make my best regards  
to Mr. Wallick and let us  
have good accounts of you.  
Believe me  
My dear Walter

Yours very sincerely  
Edward Tucker

Mr. Monkworth has just brought  
me the enclosed - he is a very  
good good lad, & works hard  
surprisingly - I hope will do better  
than meet with any savage head  
and end his life! when can't you  
help to kick the brute & drag to jungle.

Dear Sir!

My friend Dr Shuter not being ready to sail at present, & an opportunity offering by a young protégé of mine Mr Smith, whom Mr Buchanan has kindly got appointed 2<sup>d</sup> Mate of the Ship Globe, I have forwarded by him what seeds I could get together, & hope to send others by the Dr when he leaves England also a box of roots, the seeds sent are part of some I <sup>received</sup> ~~had sent~~ from Berlin ab<sup>t</sup> 2 or 3 months, they appear fresh having vegetated freely with me, that is the portion I have had sown, the papers are rather dirty occasioned by their being so small, that my Gardeners found them difficult to fold up again after taking part out for ourselves, this I hope you will excuse - the others I gather'd myself from my own plants, therefore I am sure of their being both fresh & ripe, & I sincerely trust you will be more successful than

with those I sent you last year, I have requested Mr  
L- to forward them to you on his arrival, but I  
have written by the Ship least he might from his  
engagements omit it, & that you might apply ~~for~~  
for them should this happen, I have also desired him  
to wait upon you & state whether he can bring any  
boxes of plants home (seeds of course he can) if you have  
any to forward me, & to name the time of the Ship's  
leaving Calcutta - Mr Buchanan requested me to  
procure some prints & caricatures for him to send by  
this conveyance, & I gave my gardeners directions ac-  
-cordingly; but the pipings of the former are too small  
& layers of the latter too recently laid to admit of the  
removal of either for the present, but I will get a  
box planted with them so soon as it can be done,  
for Mr B- to send you when another opportunity  
occurs, indeed I believe the Hoogly is likely to sail  
in a few weeks - I shall every day be collecting  
seeds as they ripen & will send them w<sup>A++\*4^+~</sup> i I can  
whether few or many, that you may receive <sup>>\*</sup> J%\*-/'K\*C  
14

I think I shall be able to add to the next packet  
some from Chili at 20 spec: without names - having the  
*Papiflora racemosa* in bloom we have endeavored to take it  
for seed without success, but trying the pollen of the ear-  
-lea & serrata with it, the fruit has swelled immediately  
- Some of this I hope to forward you, but of course it will  
- not produce plants of the true *racemosa*, but a plant  
- I hope to convey to you, as I have written so recently  
- I do not recollect anything particular one to communi-  
- cate; I am very desirous of obtaining the

*Hastingsii* *occurens*, if any gentleman  
coming would take the charge & you could forward me  
a strong plant I shall be greatly obliged, you pos-  
- sibly lists of these things I am most desirous of receiving  
- therefore when disposed to make a dispatch for one, I  
- may have to refer you to these lists. Subscribe  
- myself & Sir Yours truly & oblig'd

Clapton

15<sup>th</sup> Aug 1820

Wm Kent

P.S. - Any attention you can show to Mr French will be esteemed  
a favor done to me.

Garden 18<sup>th</sup> August 1852

My dear Sir

I am again in the garden  
I find all right for the  
present birds well - but now  
I have my best  
I have for the first time  
a quarrel took place between  
the Wren & the Sparrow on one side and  
the other - the latter  
was the victor on the other - the latter  
I find proper by order of the  
I know - & I find the entire  
I look of the affair well prevent a  
I was much concerned to  
know the death of poor Major Key - I  
am it will be a very painful  
I find that it may  
I am much obliged  
by your letter from Rep. Robert -  
but a little uneasy at your  
botany.

The receipt of the paper was a late one  
but at least you left him in the  
jungle. But a fever might accompany  
you into. Pray be careful in this  
land. Remember that you are now  
a Botanical General in Chief. &  
that even duty forbids your going  
upon further hopes. You would I  
am sure be glad to see my Brother  
safe arrival in the paper. I have  
Luther from here with a very good  
account of himself. He had already  
commenced before by \* \* \* \* \*  
with the protest. He was pretty  
successful in the plants he carried  
down. but the Beyonic Subrosion  
is probably perished. but the other  
provisions arrived in excellent order.  
At your convenience I should be  
glad to leave for the Cape all the  
fruit. I wish you can give me  
some especially the coconut, and  
indigo tree. With best wishes  
I am

27 Aug -

London. 17th August 1820

My dear Sir,

I should have written you by the  
conyans, and which I conjoin, that I have  
retropebbled to procure you any Conventions,  
Point, or other deeds by this emergency get  
to send out, but that I hope by the thought  
or any other ways which we may have to  
follow the globe, your wishes will be met  
before the beginning of the globe, when  
I have said, but attend most readily  
to your wishes.

I am, with great regard

Yours obediently  
Walter Buchanan

M. 'S' Braccolini 19<sup>th</sup> August 1820

My Dear Wallcut

It is not long since I received

your letter No<sup>o</sup> 4. Mr Bull, but it has  
not yet made its appearance. I hope it  
will soon, <sup>ft-r</sup> I am anxious to have  
copies from you on many points:—

I rejoice to hear that the Napaul. <sup>^£-</sup>  
Station has been so happily <sup>#SWc4,4L'/ A.-</sup>

restored, both as regards your self and as  
regards science it is most glorious. You  
will spend a year or more most delightfully  
in a Hyperborean climate, with no  
idle Calcutta cares & vexations & I trust  
you, restore your health to its pristine  
dignity" (that phrase is a favorite of yours  
& mine) and descend again into the  
plains like a sun-plodged Rajah from  
his mountain eyrie. But what is the  
harvest before you, & the gl. <sup>S> \*\*^</sup>  
discoveries that await you, you are

about to meet among the living  
Swiss, whose dead anatomies have  
been exciting our admiration during  
past years. Regularly as I am  
situated here, I could wish to trans-  
port myself in a twinkling to your  
side in a scramble over some pine  
covered hill, or enormous snow  
crowned mountain. What exclama-  
tions, what triple marks of admiration!!  
Nearly and truly, friend of mine, we  
lose a positive pleasure in turning  
all our wonders with calculating eyes.  
I wish in place of your present trip  
we could have carried you with us  
to this island of wonders, but we  
cannot have every thing, we wish

I enclose for your edification  
two copies of the first prints of our  
Invention. Exp. It is my part of  
the first volume of the Magazine

Miscellaneous, (to see them entitled our  
collections). The first Volume is not par-  
ticularly interesting, consisting chiefly  
of papers that Mr. S. left to keep the  
press at work during our absence &  
taken at random out of a mass of ma-  
terials, without undergoing examination  
or revision. As however when we  
returned we found enough to make  
the small Volume, for the **ty** come, as  
they are, & to help it out I have given  
a few descriptions of minor interest.  
We have also got **&S\*L\***, or two of the  
Frenchmen's papers, **\*\*\*&** of which I have  
written <sup>an</sup> and enable us if  
they attempt any thing to judge them  
out of their own mouths. — Let me  
have ~~the benefit~~ of any remarks  
that suggest themselves to you  
upon the ~~points~~ <sup>points</sup> here mentioned.

Our second <sup>10k!\*~</sup> will <sup>SZ< -j^t/vt</sup>  
interestingly, it is proposed <sup>J?</sup> to contain  
the proceedings of the <sup>af</sup> Agricultural  
Society, the first Report of which  
I have just completed. - This in fact  
rather a statistical than agricultural  
paper, and forms a kind of sup-  
plement to my former Report  
on the State of Society. - I am  
now <sup>S\*-t~/ft-4</sup> revisiting <sup>\*\*-.a+~</sup> projected for  
a cycle, and plan a considerable ex-  
tension of the original idea. It  
strikes me that such extended  
plates as they are intended to be  
ought to be accompanied with  
more than the few sheets of letter  
press that the more scientific des-  
criptions would occupy. - I am  
therefore thinking of a <sup>6</sup> <sup>several</sup>

view of the natural History of the Eastern  
Islands. To which the Descriptions will  
be an appendix. It will take me some  
time to execute this up to the plan I  
have in view, but I think I shall be  
able to get sufficient materials, and  
it will be a pity not to make use  
of them.

I am very glad you had an  
opportunity of mentioning the circum-  
stances about the Frenchmen to Lord  
Bastin. I have heard very little a-  
bout them lately; they will probably  
sink into merited insignificance and  
then let them rest.

I read your letter on the  
subject of timber plantations with  
interest. I have from you some of the collateral  
history of it, that is to say, of the cir-  
cumstances which called for it &c.

The teak forests in Siam were a very  
important object of attention, and I  
have there were some able Reports  
made on them. I mean to see if I  
can summarise them out of way  
for 1<sup>st</sup> papers, and I find any  
thing in them likely to be interesting  
to you. I will let you know.

I send this up by Capt. Pitt-  
Rennie a brother of Robt. Murch<sup>rs</sup>;  
~~he~~ is appointed Resident of  
Singapore, and goes up to Calcutta  
previous to taking charge.

Imagine he has no chance of seeing  
you in Calcutta, but if it should  
so happen, I should wish you to  
see him and he is equally desirous  
of paying you a visit.

This vessel goes round by the  
Strait of Sunda, and we expect another  
one soon on its way to Calcutta

direct, so I shall write again &  
more at length by that occasion  
and may perhaps in the interim  
receive some more of your letters

Lady Hastings has requested  
me to send a *Portus Liccus* for the  
Edin<sup>g</sup> Museum, which of course I  
must do, and shall take care that  
at least the things be neatly put  
up and in good paper, which perhaps  
are points that will be better un-  
derstood than the value of the  
specimens. Were it not that it would  
be as well on Sir S's account to keep  
her in good humour, I should hardly  
be induced to take even that trouble  
for any attention I have ever received  
or good I am ever likely to get from  
her. - I shall conclude with best regards  
to Mr Wallis & yourself and am always  
My Dear Wallis yours very truly  
William Park

W. Jack

Com my return  
from (see below)

4-1820

St Paul 24<sup>th</sup> Decy: 1890

My Dear Sir -

The purpose of this letter is to  
send you a few of our seeds and to introduce  
to your notice Mr Doct - son in law of our  
Pe',-:w...y \*s~  
eye in the Court of First Instance for  
these colonies. I take the same occasion of  
enclosing for you Mr Pauliers letter about the  
remains of his Mother's seeds - which I fear  
is not to be found - you will have heard  
with much pleasure that the Governor Engelke  
arrived here on the 5 of last month with  
unmixed joy of all the colony - & I have received  
by office of Provincial Secretary to Mr Sauter  
I did not fail to show him that part of your  
letter which relates to him - & he was much  
glad by it - he desired me to express the  
interest he took in your welfare & success -  
I am constantly receiving & planting the seeds  
which come to me from all parts - a trust  
in time to have something worth looking at  
I am  
yours truly  
J. G. / ^ \* - 7  
larg. collection lately from Cape

the greatest part of which is doing very well - & my friend Mr Barclay of Bury Hill near Dorking in Surrey has put me in correspondence with Mr Eddy of New York who has engaged to send me all the treasures of that part of the world which we require - He has sent me a new publication the Flora of North America which appears a very excellent work - Mr Eddy is at the head of the magnificent Botanical Gardens a colticulturist of that city. & I trust I shall find him a valuable correspondent -

Since my last letter to you of Montreal I have the satisfaction to acknowledge through you of a very valuable collection of your own seeds - I have sowed and distributed the greater part of them and forwarded a small proportion to my old friend Mr Barclay informing him to whom liberality & indulgence I was indebted for them -

Love as you may please by my writing in  
style must be written at the moment - therefore  
have only time to add what I am

Pray send his - your every  
affectionately a daughter,

W. L. G. G. G.

27 Aug 1888

my absence  
Baltimore

\*4A

at 24<sup>th</sup> Aug: 1890

My dear Wallace.

I have this instant received your  
kind long letter of the 11<sup>th</sup> from  
Boston which I was very  
glad to get for I did not know  
where you might be and feared  
you were already perhaps on  
your way up the Niagara valley.  
I had from the late melancholy  
local at Muller's would  
probably have put you to  
inconvenience to say the least  
if I had and I must give you  
a hasty answer to it for I am  
pressed for time as the day  
is selling out and with reply to

It runs in detail afterwards  
about blurs & such &c.  
In the first place you cannot  
do better than make Palna  
your central point, and if  
you should be able (which I  
have little doubt of) of making  
Mr. Wallich comfortable there  
for a season, and should be  
induced to prosecute your  
travels by water up the Ganges  
the most advisable way there  
would be to send the boats, and  
the plants, your packers and  
people. Two small ones will  
be perfectly sufficient) and few

things you bring with you, I will  
up the fundak, either to a place  
called Goundance or to Bektan  
from either of which the great  
with very little land carriage  
no trouble be conveyed to  
Leyule. Now the plan has  
blamed, & my man there  
that he is allowed a case of  
one then at a certain  
money so which the great  
require, and if you had  
as particular object in  
returning to Patna (I would  
not want further). You could  
not at the place up to

a ^ < ? .

| . ^

Burjapon - make some account  
from thence, return to Burjapon  
and you see people from that  
place by that I require you  
not to reach it by the 15<sup>th</sup> of Nov  
or later if you were proper  
in time - I fear thence you  
would be with a marked  
line - with no annoyance  
on the contrary at that  
season I am sure you will  
enjoy the trip much, if you  
were so much pleased as  
you mention, on the skirts of  
the Rajmahal Hills -  
Remember when you get in

our hits - that is, at Mexico  
- your best mode of  
proceeding (as it will be)  
cold weather is to wrap  
your feet and not get up to  
about 8 o'clock - then send  
me the made hats or for  
dinner - I take your breakfast  
very comfortably - commence  
your day much about 1/2  
past 9 a.m. - taking something  
perhaps to eat <sup>^VC</sup> the way  
as a slight dinner - and  
supper the 1/2 day - which  
in Canada - such as  
early on foot - (with a hammer)

for ascent, which I don't  
send down to meet you, but  
you arrive at your next  
encamping ground, generally  
about 4 o'clock in the evening.  
'Then you will have just time  
to look about you - dine -  
go to bed!'

— MacKenzie's  
letter about funds was quite  
unnecessary. There shall be  
all to supply you with all  
you can want for any  
purpose whatever, without  
any inconvenience to you  
or to me either. At the first

matter gave you, there fore  
a moment's thought -  
indeed at your difficulties  
I wish find all great  
in prospect then really  
must you all find every  
obstacle - (as it appears) going  
mother as she appeared  
it - As for the triumph you  
have wanted yourself with  
for me - with the but thank  
for your kind help in doing  
be assured but I am most  
pleased, with what you have  
done & wish what what is

undone - the last thing I  
mentioned to you I meant  
to buy for me - but  
they were more fancies &  
as you have got is more  
near much, as is sufficient  
of your self, as I believe  
I mentioned before, really  
nothing is required to  
propitiate our friends  
here - & hope you will not  
have you to any expense  
on this account. and if so  
I would leave the matter

part of such things at  
Patrol - ~~or~~ believe me  
that nothing is expected  
a receipt. I thought  
I might like perhaps  
to make a nice compliment  
and that was on the  
occasion above I and  
the most useful thing  
with any success for  
this - you have no idea  
how natural and  
unsophisticated we  
are in these mountains.  
I have a great deal to say

to go but I must come to a  
conclusion as the date here  
is passed. I will buy  
a post note on the 8th, not  
knowing where you were  
nearly to let you of your  
major base, death. Had  
not heard from you for an  
age. What wish to you  
something more connected  
you, and thank you for it  
dearest for your letter  
of the 11th. For this, you  
must make excuses for  
the busy I am scribbling

W. and with my best  
 regards to Mrs. Wadsworth  
 believe me

Yours most sincerely  
 James Edward Safford

F. Gardner  
29th August 1820  
ser 2 of Volume 31<sup>st</sup>

London 24<sup>th</sup> Aug 1840

My dear Walter  
I wrote to you a hurried letter  
yesterday - but after all, I believe  
I noticed every thing that  
was essential - and have little  
to add now in business - as  
my wish doubtless be at Paris  
before this, I have thought it quite  
superfluous to send you any  
letters on that place - particularly  
as you say you know them - and  
I had written to my friends there  
to expect their attentions &  
on I do not write - I am very  
sorry that there is nobody at  
Paris that I can sufficiently

intimate with <sup>you</sup> to write to. but  
should, extend your regard of  
the river as you proposed, I and  
you two letters for Bannar  
& Muzaffer (the other two places  
you mentioned) which may be  
serviceable to you if you go so  
far. - I must have no difficulty  
in procuring at Patna letters  
of introduction for Bannar  
or to Capt. Hunter who will  
immediately apply to it.  
I hope you followed by Glas's  
advice about bringing on your  
boats to Patna. The best plan  
undoubtedly is to send them from  
thence, up the great Bunduck to

Should be water enough <sup>in the night</sup> both  
places are within a short distance  
of Legunee and I have to dis-  
sent an order to Beg and Churn  
my friend there. To be on the  
look out, do give your people  
every assistance in bringing  
over & settling at the packing  
plants etc. and to advance your  
folks any money they may  
require. If you would write  
a note to Beg and Churn when  
your boats leave Patna - it might  
be so well to prepare her to  
receive them & you could then  
give her any particulars

Instructions you liked - I must  
have no difficulty in joining  
you people at Separation by the  
middle of Nov. whether you  
decide upon doing so from  
Dennis, if you go as far as from  
Patna - if you prefer returning  
to it - What Sam. and I  
Anxious about is to hear that  
you are safe at Patna - to know  
where you & Mrs. Walcutt are  
living, and to be assured that  
you have been able to make  
arrangements for her comfort  
and that you will have left  
cause to feel the disappointment,

in your place, you are Muller  
K... You will get a rough  
part at al Palma. for  
your drafts. In here you will have  
no difficulty **H>(&\*\*\*** the whatever  
in your that account. In  
people of the (Munk work &  
Mand type) the me quite  
that because is want of a  
quantity of Palma paper &  
make books for preserving  
specimens. **w \*tc<<** around a ma  
now, during the crisis, but  
our people probably **\*\*\*\*G\*C-**  
bring up some with them,  
and up here there will be  
places further **f<sup>2</sup>\* . ^** **^\*^**

gent and hope, what you  
can think can be done,  
quarters for you. That is, we  
will divide the House between  
us, notwithstanding what  
I think worth <sup>say</sup> of the arrangements  
of wandering from hill to  
hill a few miles back.  
You will find them more  
practicable & pleasanter  
altogether I think, than those  
of Raghunath. I will not  
say of "coming to ground"  
as he calls it. You will be  
w. I shall endeavor with  
your assistance when you are

to attend to Lady Hastings' commands regarding objects for the Edinburgh Museum - Alas I should be able to do nothing, as your husband <sup>well</sup> knows. I have <sup>not</sup> sent him anything for this age. Why did not all the vessels come up the country with you? his right I think to leave at Fifty shars - or perhaps all at least to Calcutta. Pray do me see Mrs. Ricketts at Morshedabad. - If you do not wear flannel trousers I am pulling it on when you come

My dear Sir

I have the pleasure  
of informing you that I  
have this day despatched by  
Derek Bangs a Box composed  
of Cedar Pine, containing con-  
taining specimens of that tree -  
which I trust may reach you  
in good condition -

Believe me my Dear Sir  
Most sincerely yours  
R B Colquhoun

Amund Bush

C. Telfair

25<sup>th</sup> Aug 1820

Rec<sup>d</sup> Telfair

3<sup>rd</sup> Nov 20

(by Mr. Telfair's file)

Dear Sir

The intercourse which subsisted between us has certainly for a long time ceased but I feel confident you will with pleasure renew it, upon a subject in which you take so lively an interest - as one of the corresponding members of the Horticultural Society. I will not make any apology for thus addressing you, in the conviction of meeting your most ready cooperation in affording me your assistance towards the object in view.

Strial which I have made of the common grass (Pennisetum or Poa) having succeeded so well as to induce me to make attempts to cultivate in this country other descriptions of

of grain hitherto not known in England, and  
w<sup>is</sup> sa forth a prospect of being an  
usefull article, <sup>in</sup> <sup>the</sup> <sup>assumption</sup> it occurs  
to me, that the grain known in Bengal by the  
name of Sewar, Bajra (they are different, I believe  
but generally sown together) might <sup>A>9^&\*4\*i-</sup> <sup>8</sup>  
<sup>fi\*\*^&\*44&rly</sup> <sup>^C<fA\*f</sup> the produce of Nepal  
could be obtained - I should therefore esteem  
it a favor, if you would exert your influence  
to obtain for me a small quantity, (sufficient  
to sow on here by way of experiment, a difficulty  
perhaps will arise, in ensuring its preservation on  
board of ship - for if consigned to the hold its  
excessive heat will inevitably destroy it.

My Lord Hastings I understand  
&CU<C\*+U\*L, <sup>^</sup> <sup>^^^</sup> (k&K^HP seed which he  
to Ireland - if any seed could be obtained from  
the Hill bamboo the growth of Nepal or the  
Gorkha Hills. I should be delighted to attempt

its introduction into this Country -- if to the above  
you would <sup>add</sup> any other seeds which your extensive  
knowledge might suggest to you - I can only  
say that I shall esteem it a particular favor  
and that I shall pay every attention towards  
their culture and management which you may  
recommend -

Hoping that this will find you in  
the enjoyment of perfect health

I remain

my dear Sir

Yours very faithfully

J. P. Keyser

19 April 1884

P.S. Also a member of the Association  
I should perhaps be more regular  
but should accept you through  
the medium of our country - but  
as the article follows to an  
extent of the following to the  
extent of the Association's  
more & no any object is not of a  
nature it can not be seen in  
any more...

Botanical Society, London.

28 August 1826

Sir

I had the pleasure of addressing a Letter and Packet to you, on the 21<sup>st</sup> of last month, to which I hope in due time to receive an answer, but as accident may have prevented its reaching you, I now enclose a copy of the said Letter, which will require some repetitions unnecessary on my part, in this.

With this, you will receive the last published List of the Society, and a packet which Mr Dudley has requested me to assist in conveying to you.

I have also added a parcel of Seeds, part of a Collection which the Society has just received from the Director of the new Botanic Garden, recently established by the Spaniards at the Hacannah; there may possibly be some things amongst them, you will be glad to receive. I have put the seeds into  
D<sup>r</sup> Nathaniel Wallich

My dear Sir-

I had the pleasure of  
sending you a small supply  
of the produce of the Danish  
Lectis- also a parcel of Plover  
(Greenagar) seed a portion of  
which I should be glad if you  
could send to the Edinburgh  
<sup>here</sup> ~~intention~~ - I suppose by  
this time you have left  
Calcutta, & as Gaidner  
writes to me that he expects  
you to be with him in  
November it is possible I  
may have the pleasure  
of meeting you at Patna  
I suppose starting from  
this

As the beginning of the

year may be seen in

the first number of the

20 Oct

My dear Sir

I arrived here about 8 this Morning and

immediately seen **7\*** - 11 Adjutant's Barrack Masters, both of whom to my great Regret I found not at home, and had it

not been for my accidentally addressing a young Ensign like myself, **if** I knew what I should have done, he immediately got Quarters

for me, told me where General Toome lived and lent me his Horse to proceed there with, I am exceedingly fortunate in that respect so

kind a young Man. I am now getting all my things conveyed from the Boat, and shall dispatch it immediately with this. As I have

great deal to do excuse the Brevity of this at present from yours sincerely

James Oxborough.

P.S. Kind regards to Mr. W. Mich

D. Wallcut  
Barrackpore

Wednesday Evening

My dear Sir

I have enjoyed a very  
good Breakfast and hope to have the

pleasure of joining you at Barrackpore to-  
morrow evening at about Ten o'clock. I received

your very kind letter yesterday, and should  
I have set off sooner, but I found it utterly  
impossible, owing to so many horses  
crowding upon me, so that I am afraid

I shall be too late for seeing Mr. Corbridge.

Mr. Todd is very good as say he will send a

Man with this early to-morrow Morning to  
and as it will be getting dark when I ar-  
rive, I shall be much obliged if you  
will visit a while May (and I will) that

I may find you need the more copy.  
I have sent you about the Draft -

The Wharves are much exposed, - it was  
only about an hour ago the Agreement was  
settled. They to be bound by necessary  
to Mr. W. still and Mr. W. to be, do,

Yours very sincerely  
James Buchanan.

been admitted

to the service.

M. General Lawrence

Dear Sir  
I have the honor  
to acknowledge the  
receipt of your  
kind letter of the  
10th inst. and in  
reply to inform you  
that the same has  
been forwarded to  
the proper authorities  
for their consideration  
I am, Sir, very  
respectfully,  
Your obedient servant,  
J. H. [Name]

Wm. [Name]  
[Address]

10th [Month] [Year]

London 5 Sept 1870

My dear Walter  
I have just received your letter  
of the 26th regarding your dissatisfaction  
in the course of the things  
have not at least as far as  
concerns I am happy to  
find that you are not  
have escaped the danger  
you encountered and I trust  
are not yet this state and such  
at Paris - I have to go to  
to that place of the 24 & 25  
I trust that you have got a  
I notice, I think all that  
I am in the new position of your  
affairs - I am yours truly

with you would be the most  
convenient place and where  
Mr. Wallis would be most  
comfortably situated, if a good  
bungalow can be had here - the  
Lodge by the lake probably  
the best I do not know as I never  
was there myself - Mr. Fleming  
himself, with whom you have  
no doubt got acquainted well  
to talk to about all these questions  
with whom I am sure of you & his  
advice would be of great use in  
arranging my next plans  
& movements - I am very  
sorry for the loss of the plan & particularly  
as they would have been acceptable  
perhaps for our friends here - but

There is no use in saying  
anything more. The lamps  
probably are not much injured  
and if the Queen's favor  
should not be such a spirit  
in appearance. I hope  
you will bring them with you  
for. I am very glad the water  
& Musical Box are safe.  
I don't altogether I might  
have been much worse -  
The carrying of the things was a  
grand stroke of policy on your  
part, but the worst happens  
your people, I flatter myself with  
to take good care of all to please

of your own do benefit public  
to offer every assistance and  
aid in his power in the  
I think with respect to  
the old heat I had  
perhaps had on your  
I hope you will be  
most of your difficulties  
are now over. Retreat to  
never do for Mr. Wallace's  
Hayat. It is a more large  
place without any annex  
house a comfortable whole  
Myself for I really think

inmate to any other place  
Dr Thompson I hope has put  
you on foot - as to your tests  
& petri dishes & that were making  
you feel everything down your  
back how you said smoothly.  
Thank you much for the news  
I feel me in your letter of  
calves going to  
Hyderabad - is certainly rather  
odd. The allopathic I am  
rather inclined to think that  
there may be some truth in  
the report. Hope Dr. Baskin  
will not go here either this  
or

^S^C 0\*^>

Next year either, for he will  
be a great help to the country  
whenever he leaves us - My  
2-leaf from your sister  
I concluded you had better  
to the people there - where are  
you living? If you go further  
up the river you should  
proceed as far as New York  
to the chief place - I think  
you will be pleased. My  
love to Mr. Balthus may  
then be of use to you - You  
may perceive I am writing  
in a hurry for it is near

He had him, but I could  
not help giving you a few  
lines 4 - Day - to send the work  
you are now doing. - May  
I make my very best regards  
to Mr. Wallace - who I am  
glad to hear - has  
come up so well again.  
at present take trouble &  
Believe me My dear  
Wallace.

Yours most sincerely  
Edward Gardner

**S,**

I send this by the vessel N<sup>o</sup> 7<sup>th</sup> of Sept<sup>r</sup> 1828. Please  
over-see that it follows by the same. The former has just dropped.

My Dear Mallick

I have just received your  
letter of the 7<sup>th</sup> June N<sup>o</sup> 3, but have no tidings  
of N<sup>o</sup> 1. I begin to fear it may be lost,  
in some of the dreadful gales that  
occurred in March and April. As  
your two last letters have been brief  
I conclude that it must have been  
long and full, - & so it will be most  
melancholy to find that it has  
gone to the bottom where

All its hidden treasures sleep  
known but to Genii of the Deep,  
who (D—n their eyes) will be none  
the wiser. — Pray recapitulate  
the contents thereof, and mention  
whether it had any accompani-  
ments. I am without information  
from you on a number of interest-  
ing points, such as the particulars

of your arrangements for your  
trip & during your absence, your  
notes & obs.<sup>s</sup> on the specimens  
ē multis et ceteris. — I see you  
have been able to make some  
use of them in the 2<sup>d</sup> Vol. of Rep:  
I will presently give you a  
few remarks on some of these.  
And as you are going on so  
briskly I must make <sup>^c-o ^t^d^</sup>  
to send you such further re-  
marks as may eventually be  
useful to you in this class. —  
I sent you a few pointed descrip-  
tions by the Frolic which left  
this some time ago. —

In concluding paragraph  
of your letter respecting George  
depend upon it shall be fully

complied with. I am glad you  
have written yourself to my  
Father, and he assured I shall  
follow it up.

I am sadly out of spirits  
with some late news from home,  
the most grievous however of which  
I as yet have only from the public  
papers, I mean, the death of my  
valued friend Mr. Beany Gibbs.

I have at this moment on my table  
a letter from Lady G. which I must  
answer, hers is long and tedious  
to this extent and in what terms  
to reply I know not. - It is tedious

I think how my circle of friends  
has been narrowed in the short  
time that has elapsed since I

left home, and the fatality has  
fallen more among those which my  
personal connection was the most  
intimate, <sup>with</sup> them among relations  
whom from less personal intercourse  
I cannot be  
so warmly attached to. —

It is in fair hammer to admit on your  
my lamentations, but I know  
not how it is when a subject is  
depressed in my mind, it must  
come out before I can go on,  
and in turn it is a reward  
for a disappointed letter as you  
see this will be. —

In a late advertisement  
respecting the Rev. Journal  
I think I saw an article  
under your name, "History, Progress  
of Botany in India" which I think  
correct.

I am glad to find the Patrons favour  
of yours. They are very much so  
of mine. — I received by young  
Bull the 1<sup>st</sup> of Nov: & duly  
presented the copy to Mr. Stimpson.  
I returned to Dr. Carey the portion  
of a copy still remaining here  
which had previously been acc-  
by the bye. Hope you do not mean  
to make this copy <sup>JT</sup> <sup>>A</sup> in place  
of being my <sup>^</sup> <sup>rf.</sup> <sup>^,</sup> <sup><</sup> subscription to the  
work. Between you & me, such  
is <sup>/</sup> <sup>,\*</sup> <sup>^</sup> <sup>r</sup> no misent necessary. — I wish  
further that you would order  
— <sup>j-t^</sup> <sup>'&\*,</sup> account a copy to be  
sent to my Father. Think he  
would like to see it, & Calber will  
forward it.

J£\*

T

that we started here some time  
ago regarding your discovery  
of the Daphne laurata. A  
gentleman whose name I forgot  
but who seemed to be a scheming  
sort of character, wrote to Mr.  
making a variety of requests such  
as for the different kinds of grain  
pulses &c of this country, and  
among other things whether there  
was any material for paper  
peculiar to the East, as an idea  
had been started that if bank  
notes could be made on paper  
of some kind & difficultly  
procurable material prepared  
of qualities different from  
common Europe paper, that  
the

6\*->\*-AA

<£.

would be materially increased.

I suggested that the paper  
as answering the required  
conditions & further being capa-  
ble of being monopolised, and

for I sent in consequence a copy  
of your account in the Ad-  
vertiser and the specimen of the

paper which I gave ~~him~~ only  
a specimen of the same. - The idea seems

to me feasible enough, and who  
knows but your name may soon  
figure in the annals of the Bank of  
England, not in their books I mean  
which would be much better, but  
as a contributor to their security.

If they adopt it I think they should  
give you a present of the annals of  
the former paper by Foy, or at least  
make you their contractor for the

Supply of paper, which would per-  
haps be better. At all events the  
discovery may be the means of  
saving a considerable number

**-A**

of my late. Where from  
Lindsay he communicates a re-  
quest from ~~the~~  $\text{c}^{\text{t}} \wedge \text{-r} \wedge \text{c} \wedge \text{j}$

~~that~~ I would send ~~some~~ ~~papers~~  
pieces for **As > A** ~~to~~ the Museum

I comply with it; this occasion  
had mean to  $\text{L}^{\text{t}}$  ~~in~~ the

matter. My best specimens have  
all gone home, as you know, but  
even if I had them, I'd see how I - I  
before she should have them.

I have therefore put up a parcel  
of second rate ones with plenty  
of good paper, and -

consequence (Kalidoscopically\*) & and  
sent her such a flaming list  
as will make her think <sup><sf \*^€ <S^</sup>  
got the <sup>^ \* ></sup> most precious & learned  
collection ever sent from India.  
I trust to her indulgence never  
to look into them; indeed if she  
did, I don't suppose she'd know  
a Mangosteen from an Apple  
and then as for the most learned  
body to which they are to go,  
the name of the Marchioness  
will be <sup>++++ H^< f</sup> them, and I  
dare say the sapient professor  
of botany will in reply extol  
her ladyship's skill & discernment  
in the selection, and send the  
press of that which he knows  
nothing **At+aJf, \_**

Now for remarks is •?\*

*Fragaria fragrans*. I think Hooker is wrong  
in saying it was brought from China.

I found it also in the same garden at  
D, where nobody knew where it had  
come from, but afterwards got a  
hint of it from the Kibak shore  
where it is a timber tree & well known  
to the natives.

*F. auriculata*. I suspect to have given  
you my name on this abundant  
kind of fine fruits as large as

following is my  
note: *F. auriculata* <sup>0</sup> *clavata*  
*perispermata* *perispermata* *perispermata*, *peris-*  
*perispermata* *perispermata* *perispermata* *perispermata*  
*perispermata* *perispermata* *perispermata* *perispermata*  
*perispermata* *perispermata* *perispermata* *perispermata*

I have your \*S. doubts as to identity of  
*F. maximiliana* & *vulgaris* in the first  
place I question the latter being volu-  
bile it is straggling & often with twisted  
branches, but I think I have seen it

grow to a great but small tree, I al-  
ways considered them the same.  
Numerous Swiss make a more care-  
ful examination & report to you  
accordingly. -

Your name of Neuroptis N. like much  
^ ^ / or it is the one I was thinking of  
Neuroptis which is too like the fam-  
ily of Insecta. My acc. of the fruit was  
follows. Capsula 4-valvis, monosperma.  
Semen globosum, album, fere  
Mucilaginoso. coty. adnatae contorta  
plicatis, vaticula umbilico obserta  
inferior.

Shelton's Insecta Z72 ^ an honey  
found what I took to be a new  
Macrolobium. Happened after  
and accidentally I refer to Louis  
& Rhod. Argem. when the similarity  
with my Macrolobium struck me  
You further comparison I was

convinced of their identity in genus  
not in species, mine being tetrandrous

An analyzing however Roxb.'s descrip-  
tion which is unaffably bad. for who

would call the bracts a bophyllous calyx p  
& give a leguminous plant a tubular

monopetalous corolla, bearing not only  
the stamens but the pistillum, a

thing. hactenus mandatum, I have

arrived at the conclusion that *Sonchus*  
is nothing else than *Macrobolobium* <math>U^+</math> J-CS

guised under a blinding description.

The only single point of difference

is that *Sonchus* wants the petal which

*Macrobolobium* has. They are both equally

possible in the act of Stamens, and

I think it questionable whether the want

of petal is a difference of generic value.

Both ought certainly to be placed in *Decandrea*

in place of their present absurd situations, & such  
as good will as *Thouinia* & many other cases

As I have so far altered my plan  
 of a fascicle that it will be a work  
 of some time to complete it. I begin  
 to think of getting out all my plants  
 & giving consequence in other ways,  
 which I may at any time resume  
 again in the fascicle with the addi-  
 tion of figures. You shall hence  
 whatever I can give in Plantarum  
 & the other claps as you go on. &  
 in the mean time <sup>the</sup> work <sup>of</sup> ~~of~~  
 some of the Linnæan or other Soc<sup>y</sup>  
 at home. Do the Asiatic Societies any  
 <-.£ - &\*^CL~\$£2 bring them out on any  
 recent time. — I think for home  
 the best way will be to group them  
 of instance I think of making one  
 paper on the Leguminosae that I  
 may <sup>Ai^^e..</sup> in which the Macrolobia  
 may come. I thought of another <sup>d^^</sup>

The *Thungiferus*, but my materials  
are not yet complete. I shall  
send you what I have as it  
comes into Paris. I have lately  
got two new ones besides my  
former *M. quadrifida*, and  
have information of several  
others. One of these I have des-  
cribed as *M. caesia* (at least I think  
that shall be the name) which is  
a very remarkable species.

I perceive you quote *Racines*  
by it. viz. Vol IV. Hope you have  
taken measures to have a copy  
of that work for me. *Scapan*  
*falli* is another consideration.

We are busy making a final  
edition of all Zoological Subjects

when I think all concerns may  
be considered brought up and  
we may make a fresh start. -  
I have been long intending a  
trip into the interior, but the  
number of things that have occur-  
ed to keep me employed has  
prevented it as yet, and the  
Season is now so far ad-  
vanced that a voyage of one  
mile in all this can be attempted.  
The Bommer Sam is no  
want of materials so it is  
not difficult. - Let me know how  
your letter had best be addressed  
My best regards to Mr. Matthews  
for I shall be in a few weeks  
By your letter - From over

William Smith

P<sup>r</sup>. Lady Gibbs tells me that they have made  
 a <sup>zCsf £+&£-t</sup> in England that all Tropaeol  
 bulbs with stinks in the open air of fresh  
 in a pond, near the surface in summer  
 & deeper in winter so as to be out of  
 the reach of the Frost, and with greater  
 experience than in hot houses. She  
 therefore begs me to send her bulbs &  
 handy seeds; may I request you to  
 remember her in this way at the  
 dispatching season. The bulbs of course

W. L. has 9<sup>th</sup> Sept. 1820  
 16 Octob. 1820. P. V.

I try in a box. I am glad we sent her  
 some last year, they will be acceptable.

The stones you mention may  
 be sent you.

There are some large *Manisuris*  
 plants going up to Lady Ashurst  
 who I hope will send them to the  
 garden. as I think they are large enough  
 to be sent. I have also a few of the

garden a few plants of our noble  
*Datura arborea*.

Bancroft Sep. 10<sup>th</sup> 1820

My dear Mallin

A delay of a day has  
occurred which gives me time to  
send the enclosed <sup>papers</sup>, which may  
be of some use. More  
will follow.

Yours truly

W. Mendenhall

P.S. What is the structure of the maxilla  
of *Bursera polyperous*? - I mean  
a tree which I take to be the second  
*Canarium odoriferum*, Camacoran  
dictum of Kunth. Bot. II. t. 54. -  
& which may be <sup>the same as</sup> *Canarium* <sup>not</sup>

I believe that figure has been ever quoted

Walesworth  
Sept. 11<sup>th</sup> 1820.

My dear & excellent friend

I am at length after an absence of five months, spent in Scotland, returned to Walesworth; & the first thing I have sought for among the many botanical papers which I find waiting my return, was your precious one containing the long lost Fern. I have given you an account in my former letter of the recovery of this at the Custom House. It now remains for me to assure you that I have never since at any one time a packet of plants that has proved so truly interesting, & among which were so many species entirely new to me. I have devoted all my time hitherto to their examination & I have arranged specimens of each in my Herbarium. Most of the rest

have it probably before I shall have the  
opportunity of writing another letter; & you  
will see how much it is indebted to your  
kindness that of Col. Gardner. You will  
see I have named a curious tree in honour  
of this invaluable friend of yours.

Do you ch<sup>erish</sup> <sup>J A \* \* \* . A . A . A \* A \* ~ + +</sup> many dupli-  
cates of the most common E. Indian  
plants? & may I beg a few of such as  
you can best spare. All would be  
to me & I need not say, very  
prized. Could you also spare me  
a curious seed, useful for my collection  
you would gratify the study of which  
I am <sup>^</sup> fond of. But not to lose  
sight of my favorite Coffretogamba, may I  
ask if you know any Antennaria living near  
the coast in different parts of India or the  
islands who could pick up sea-weeds? I  
have studied the tribe a good deal while I  
was making the drawings for the Herb. Tacoma  
Flora Father in Law, Mr. Dawson Turner.  
You see there is no part of Botany that I

would willingly neglect.

At this time I am engaged in publishing a Flora Sertica, which will be printed by April next, when I shall take up my constant abode in Glasgow. Till then I shall reside in Halesworth.

With the most sincere good wishes for every  
happening to attend you, believe me to be  
my dear Sir,

your grateful & obliged friend

N. J. Hooker.

Columbus. Botanical Garden  
S2 The Superintendent's Office.

My dear Sir

I to be sure will have got down here after a longer interval than usual owing to constant rain. I find every thing going on smoothly. Sir Bull has cracked but is to be restored. The Bealwoods are coming on well. & I have bought the Sultan to substitute the green & white for the chosen to be the coloured part. The Beal is so far stands well. The Mass has passed. & we got the slaves to put another rope round him. They refuse the other is jumping into the head & will not be carried away. I am indebted to you for three oblong letters from New York Sultan & reporter. The last is in the last to hand. I am concerned to hear of your illness. but that you & Mrs. Co to be so well suffered in health. & that the slaves were lost must be your consolation. Reports are about that the Dyls & Saunders have suffered more severely. I hope it may not prove true. I am obliged to the Hon.

have been in what you said about  
the Society employing Hugh Johnson  
in a more logical survey of the  
character of thought. He says he  
wishes that you would <sup>to the Society</sup> make  
/:\*- <£^~ ' ^h^\_- <sup>to the Society</sup> that effect  
& appears to think that it would  
succeed. I shall not fail to remember  
you & your W. to my Mother. Her I shall  
also not unkindly wish me very  
unhappy. & the intelligence of her  
safe arrival was the more welcome.  
The Sunday of the subject was  
a mistake between Boland and  
/£~rS\*-\*£;^\_- but as I paid the people  
from my own funds, was of no  
consequence. I am happy to hear  
that you have a prospect of  
sitting yourself comfortably  
at Chapra until it is time to  
attend the Mounts. The only  
possibility in the Botanical way is  
a seat which I have got of a  
new size bearing excellent seeds.  
Looking the other day over some  
Malthusian lists of importations  
from Calcutta. I observed the article

of excellent pine seeds. They are  
termed "chilytoch" ". It may very  
likely be the same tree of which  
you have got the seeds from the  
Hawaii let. But I still wish to  
be assured. To send us some and  
first as to how preserve them. I  
was much pleased with your  
account of finding the white tree. So  
perhaps by growing some Houghton.  
Many years ago I made a visit  
to the District. I was so much  
pleased that it was a beautiful spot.  
I beg my best respects and regards  
to Mrs. W. I am, my dear Sir,  
Yours faithfully  
J. M. W.

1s\* September  
1820

My dear Sir,

I to me got your letter  
from Newcastle I should to me send  
Barrister of the 6th & 7th Street  
the local pole shall of course to me  
be pleasant & I will not fail to  
attend to your wishes about the  
Gyrate. but I hope you will agree  
with me that to ensure peace &  
safe passage of a boat 20  
days when the weather will be  
settled will be advisable. I was  
happy to hear that you had been  
happy to hear to me so agreeably  
to propose at Newcastle. I  
am satisfied Government will  
your despatch of the matter  
watch you can ensure the knowledge  
in the measure which you may judge  
best for the public interests. I am  
satisfied that this should be to you  
while a time of the year. I  
trust you will be glad to hear that

JL. f.

S\*y

consider of a little plan to be  
back. I had known this movement  
to set off the Building. All wanted  
is that you should have the ground  
marked off where you want the  
pines should be. The description  
of pine may be thought of at  
least. I may then I should venture  
to suggest the Cedars as lofty  
stately trees which however you  
will we **At Jf^, ^f.-ε** ^ ^ ^ ε < **I** G+r-t-C\*ε- ^ " ^  
likely call the seeds of the Yew  
& here is nothing else new. I  
have expected to be seeds the  
collector of the seeds for  
information respecting the plant  
called "Kusnathya" found  
among the rocks for preventing  
the Scorpion from stinging off the  
back that place you will so  
doubt satisfy yourself in order  
as to the plant & its alleged  
properties. In the Bazaar District there  
is a sort of grass mat used in  
the manufacture of sugar, being  
employed in drawing the sugar.

The  
 but I knew that you would be  
 to use any and the books  
 of the in books-papers as you  
 perhaps the best. Reporting  
 to Mr. H. the history, of  
 that there is here. I cannot  
 on request for the to the in  
 the names of the books were  
 and then from them. He soon  
 is that he gives but he thought  
 from the appearance of the book  
 these was in the of some  
 the part of the room. There  
 remarks of interest were  
 at about the character of  
 the school. I was not able  
 to see the book reported to  
 to that I see key down  
 now; for  
 M. W.

Mrs. M. C. H. H. H.  
2nd Oct.

and so! you are anticipated. For  
this thought I had made a capital  
invention of Aegialites, but on turn-  
ing to Mr. Prodromus beheld it

then I have somewhat altered my plan  
in regard to my descriptions, and have  
determined on forthwith printing here  
every thing that I think worth it. That  
once done, it is secured, and the number  
of copies being very small I can make  
use of any of them again when necessary  
in any other work. They can also be  
circulated and I can better have the  
advantage of remarks upon them. -  
In a country like this where new things  
& new subjects are perpetually occurring  
the old ones lose their interest unless  
taken at the moment, and what is once  
printed may be considered as finished  
& disposed of, whereas if you go on  
accumulating, the map becomes too great  
and you are prevented by arrears from  
advancing them ~~to the printer~~  
to attend to them ~~at the printer's~~  
at hand.

I have thought <sup>-4\*</sup> *Styfia* need, and  
had fixed on it, but ~~it~~ it turned  
and otherwise - What says you  
of *Strophanthus* <sup>^</sup> *d&t* *ata* from  
obvious to point. Some think I  
now and you will be contained

*/fr>^ ^t\*^t-.\*-^ -^fci* | but that is of no conse-  
quence, if mine is first out, you  
can quote, and if not, your bringing  
it out is no prejudice to the other.

The *Manijerac*, *Scamvolfea* *Scama*  
*trana*, *Euthymis*, *Styphelia*, *Celas-*  
*trus* *trivalvis* & *Morindae* will proba-  
bly be in this number. Some I

shall not for fear of crop purposes  
about names. *Patiniae* not in case  
you should adopt *Mallichia* which  
I left <sup>A^></sup> your option. I have not found

another *Pentandrous* <sup>^4V<-iV</sup> to which  
of your that worthy name. *Euthymis*

unluckily has **r~** <sup>T^</sup> *horeae* & even come  
out under that appellation, and I can  
not here adopt it to any plant of any  
other class till I know whether you  
have approved the *Patiniae* or not

N<sup>o</sup> 9. - Remoulin. 19<sup>th</sup> Sept. 1828

My Dear Wallace

O<sup>^</sup> £u.t-/^U\* &&^~f

I have read the remainder of  
my *Portulacaria* descriptions. Since I wrote  
the plants not squamous leaves.  
Mind, not your original proposal  
of my name, which I do not wish  
to see figure in that way at all  
at all. It is no object of my ambi-  
tion, and then cacophony must  
not be suffered by such admir-  
ers of the <sup>classical</sup> grace of Euphony  
as you and I. So mind only,  
put down that! My *Dicymus*  
*carpi* & *longicauda* are now in

&kzyC~±?0

By you recollect a  
Singapore tetrandrous *Scabiaceae*  
which we examined together &  
determined to be a new *fc\*^ms\**. I have  
called it *Epithimia* (i.e. *littorea*  
from its habitat). How often when  
making a name when you think  
you have hit on a highly classical  
<sup>one</sup> ~~name~~ which you flatter yourself  
is unoccupied, turn to borrow

how can we promise that we shall  
have the same a year hence.

On all these accounts I have de-

gracing the shores of New Bolton  
instead of Singapore. - So I was  
reduced to a vile Epithimia -

Of the enclosed descriptions the latter  
birds have gone home. - The  
Eubelae & Aodilia are copies of our  
common Mems. - Styphelia you  
will see them completed, we were  
interrupted in the middle of it. -

There ascertained in other specimens  
that the authors to burst in the

middle so as to be only one celled as  
so admirably described by Brown  
we did not find any authors sponta-  
neously burst, and therefore put  
a "viz non ut in Brown Pr. 8." )  
which need not now be so care-  
fully stated. -

For the three valued capsular plant  
 which follows Patina. I have not  
 thought of a name yet. It comes  
 near to Baracca, but is valued not  
 Baccate. You have had *Spici*  
*mens opit*. What may it be  
 or what shall it be called?  
 On second thoughts it must belong to Pittosporaceae for: viz, *opuntia* *quadrata*  
*paris*, the fruit hanging in pitch on stalks. *Resopopae*

^g/T^t^ & (\s\$^c^f jif^e-. s\$£<r jfe+a^C. ts&t^&^ZZU^^

Getting an answer to a question  
 and some hundreds that would  
 ask of me were nearer. Read  
 but the list of queries & descrip-  
 tions that I gave you in one  
 of my early letters. The fair  
 Monsoon is approaching for  
 vessels to come here, so feel  
 not to write fully, now that

You have fewer vexations and interruptions. Let me know all your arrangements, how the editing of Prox. is to go on - How do you manage for books of reference, you cannot carry all with you -

I find Roxb. *Murraya* Sumatrana is nothing more than *Loureiras Chalcas paniculata* Rumphius's *Camunium*, so unjustly degraded ~~from~~ from the rank of a species & compounded with *Murraya exotica* Presc. To restore it as *M. paniculata* a bad name by the bye because  
**/pt\*/ d^^^it^J**. I think you would do well to alter Roxb's *Camunium* which is improperly applied. The *Murraya* is the true *Camunium*.  
P.S. I find it is *Delaba* of Loureiros, so pray adopt ~~that name~~ that name which is good. I mean to do so in the present h. of my description.

y^/\*ye> / £ ^ . Petalonia in reality  
it has nothing to do with Petalonia  
and I suspect it of being composed  
of a coccineous Combrataea  
which I was thinking of calling  
~~Pyrhaanthus~~ An affinis  
Laguncularia Gaertn: \*

Pray is Avicennia semipera, distinct  
from A. tomentosa. The former is  
perhaps Plumbr: Mangium album  
which I have here & is a good  
figure. I do not precisely remember  
but the Avicennia of the Lunderbush  
but I think this is different. The  
fruit, <sup>is much</sup> is much smaller being less  
than one inch long. The leaves are  
cuneolate, pointed, white but not  
tomentose below. —

My very best regards to  
Dr. Waller and believe me  
always them affectionally  
William Lusk

 the end of 1821

Wpued the 19<sup>th</sup> Sept. 1870

My dear Wallich

We had been shut up for a  
long time, and our communication  
with the plains cut-off by  
the swelling of our mountain  
streams, when at last tea  
dats arrived together - and  
among a heap of letters I had  
the pleasure to receive yours  
of the 31<sup>st</sup> August & read of  
it. from Patna. and I was  
very happy to find they gave  
such good accounts of you  
Mr Wallich - the accounts  
which you have decided upon

are I think the best you could  
have adopted. The mode you  
have settled of papering the  
intermediate two months  
if you do not play too much  
with the sun - which I am  
afraid is easily done - will be  
a most pleasant way of  
getting thro' that time. Had  
you had remained at these place  
I dare say you w<sup>d</sup> manage  
very well to get so far as Allahabad  
but I scarcely think (except  
you are very fortunate in being  
in your way up) that you will  
find time for visiting Lucknow  
No. as there is no absolute

Accepting for your being back  
by the beginning of Nov, you  
might, if you are convenient  
to see Securus, take a fortnight  
more time and look at it at  
your leisure - I am very  
happy to hear that Mr. Wallis  
will be so comfortably situated  
at Muggerspool - this I  
really think in every respect  
a far preferable place to  
Mullge - over which it has  
many advantages - as in  
climate - medical assistance -  
the hope Mr. Wallis  
requires nothing of that sort  
and society - and being a

<f\*^Z-^

little greater distance from  
the frontier as a matter of  
no particular moment. I  
do not know another place  
near at hand which on all  
accounts is half so convenient  
as the one you have chosen.  
Legowlee is the place you  
must make for after having  
seen Mr. Wallick establish  
at Muzuppu-pou - you will  
arrive without any difficulty  
& will find  $r^{\wedge} - \wedge eT^{**} - *^{\wedge} X2\xi^{\wedge} - *a^{\wedge}$  the best  
from one gentleman's endigo  
factory to another all the way  
in a buggy perhaps, which will

enable you to send your tent  
to on a head to Leguilla  
Fleming will be able to  
put you in the way of doing all  
this - and from Leguilla you  
can march regularly up to  
us without any difficulty  
as a matter. My men there  
will provide horses or whatever  
may be necessary I will do the  
needful in forwarding on  
all your things from San  
Luis from all our fine things  
of silk & wool - particularly  
for the bronze lamps which  
would have just suited for

O<sup>e</sup>— <Z&

road. The only places you can  
stop at, from the edge of the  
forest are Beichia-koh - Hittorundan<sup>2</sup>  
Bynsa<sup>3</sup> dooban. (in the Raptai.)  
Bheemphedee - Tambu-Kharu<sup>5</sup>  
a rather near that place. Chitlong<sup>6</sup>  
Shankote - & thence to Khatmandoo.<sup>8</sup>  
breakfast <sup>always</sup> before you set out,  
you can then wander at  
your leisure, on foot, thro' the  
whole day to your next ground -  
but none of this as you approach  
us. Thus quite rare you could  
like Clemens, who is certainly  
a most capital fellow and  
a great favorite of mine and

the climate. but there is no  
help for these little disasters  
and I am only thankful that  
matters were no worse

Thank you much for the seeds,  
I have sown them all, and  
have had ground prepared for  
them which may precede you  
from Legwalee and which  
shall as you desire be sown <sup>also</sup>  
on their arrival

From Legwalee you can march  
as slow as you please <sup>to Bisoulee</sup> - but within  
the limits you wish not to be able to  
make above 8 days of fit, unless  
indeed you are to halt on the

fully overtook all your  
of them. I was much surpris  
to you for the news, which owing  
to the delay in our daks was  
all news to me. Some of the  
changes appeared a little  
strange though. But there is  
nothing too strange for this  
world. (Captain Cooper is a  
very gentlemanly man and  
I am glad he has got the  
Chumbarans. Wonder  
who will be private secretary  
to the Governor. I am afraid  
you will have paper knives  
before this can reach it.

Just send it to her for the  
chance during it might  
be forwarded on to Allahabad  
if you should have left it.  
Pray make my best regards  
to Mr. Wallis  
believe me -

Yours very sincerely  
Edward L. ...

W. Buchanan  
27 South 8th St  
Dec 4th 1882

My Dear Sir

Since I had the pleasure of writing you  
my unavoidable absence from the town has pre-  
vented me fulfilling the promise contained in  
it of despatching the seeds then in my possession.  
But I have now the pleasure to say that a  
small <sup>parcel</sup> by yesterday's coach and another will go  
off to day along with this: both contain between  
50 & 60 Papers not before sent you. I have a few  
more by me but they not yet sufficiently dry to  
send. Unfortunately the rains still continue  
in the quarter: had they terminated I should have  
been able to have collected many before this:  
but as soon as they are over you may next after-  
noon or by day the utmost to procure for you  
a variety of <sup>'AJU-JU-</sup> to be packed in this neigh-  
bourhood: these I now send <sup>>Lrt^t <fciiw</sup> all gather-  
ed beneath.

The Stone Specimens for Mr. &.\*-St-d~\*~xs/ZjC  
are ready for despatch & shall be forwarded as  
soon as possible after boxes have been made up  
from them and also the Dried Plants, a few Papers

4 Penns of last year pay you.

Extreme Parts 3 witness me

to remain. My dear Sir

Recd. of

3rd Nov

The Hon. Jas Stuart Esq.  
Sir,

More than a year since I had the pleasure  
of facilitating a correspondence between my friend Dr. Wallich and  
the Directors of the Pennsylvania Botanic Garden, near Philadel-  
phia, U. S. A. The Doct. at same time forwarded with his  
letters a collection of seeds and plants which my friends advise  
highly acceptable to the Society who have reciprocated  
by sending for the Anar. Sh. Bengal now off Calcutta  
collection of seeds which you will find specified in the accom-  
panying letters which (being on that subject alone) will  
if I presume J \*5T> / A&'t/& The Box will be delivered from  
the Ship on application, and when you may have  
them I will do myself the pleasure of waiting on you with the  
hope of renewing the correspondence.

Cal: 29<sup>th</sup> Sept. 1820.

I am, With regard  
Yrs. m. ob. S<sup>r</sup>  
Signed J. Cryder  
N<sup>o</sup>. 31 Pollock St. Rada Bazar

Montreal,

Je vous ai adressé, par trois lettres différentes, dans le  
mois de Novembre et de Décembre de l'année  
dernière, trois paquets contenant des graines de nos  
arbres fruitiers d'Europe, j'espère que vous les avez  
reçus, mais la distance qui nous sépare ne  
m'ayant point permis de recevoir votre réponse,  
je profite de l'occasion que j'ai de faire passer un  
coffre à Bordeaux, pour vous expédier une petite  
boîte renfermant de nouvelles graines de la dernière  
récolte. Ces graines sont de trois espèces  
d'abricots, de plusieurs espèces de Prunes, de  
plusieurs espèces de Pêches, de plusieurs espèces  
de Cerises, et enfin de plusieurs paires.  
J'ai métissé toutes ces graines dans un sac  
de tulle afin qu'elles vous arrivent dans le  
meilleur état possible.  
Je vous renvoie la prière de profiter des  
Voyages Français qui doivent revenir en Europe,  
pour me faire passer soit des échantillons

Des belles plantes de vos contrées, sans  
ces graines de celles qui peuvent augmenter  
les collections de nos jardins.

Mon Parent M. Deville, qui a tant de peine  
sur Voyage de Die dans le Lyonnais de  
nos provinces méridionales de France, me charge de  
le remercier à votre service et de vous présenter  
ses très-humbles respects.

Je suis l'honneur de l'État, et l'honneur  
de l'État avec la plus haute considération,

À l'ère très-humble et très-respectueuse  
de votre très-humble et très-respectueux  
serviteur

Paris, le 20<sup>e</sup> 8<sup>bre</sup> 1790.  
O. M. que de jours, n° 8.

St. Michael's Gardens  
27. October 1832

My dear Son

I am here once more & take  
the opportunity of giving you the news  
of the Garden. It found every thing  
going on well. The Boat appears to  
me to have pulled up wonderfully &  
has a fine lot of <sup>^ ^ ^</sup> cargo. We  
cannot still expect things to expect  
but I shall <sup>SS</sup> <sup><</sup> <sup>S</sup> <sup>?</sup> shall hold  
what we have got & if we do the  
improvement will be very great.  
The very day after I wrote my last the  
Peter <sup>^^^</sup> <sup>S</sup> <sup>S\*</sup> would <sup>^</sup> but the  
Gipsy had shared some days previous  
with <sup><<</sup> they had covered over the things  
to prevent it to me when I was here  
last. The Peter told me to day that the  
boat had died very suddenly as all  
the rest went off. I expect the loss very  
great as it was <sup>^^</sup> <sup>X.</sup> a disappointment  
to you after procuring it to be Gipsy.  
But this accident will make it not  
necessary to search a boat from here to  
Peter. You had better perhaps request  
the Gipsy to be so obliging as to send  
me with her first news & a proper

... person to take care of them  
& we will thankfully repay the expenses  
I have got your letter from Buenos  
& am sorry to hear you had been  
unpleasantly. but **A** wish that you  
found **y^.** ... covers the power. But the  
affair for your care. It is indeed  
a very curious place. & altho' I was  
pays for it for **3.** or 4 years I do  
**i\* A-** saw half to wait about it as I  
should. The best part for the land  
in **J&** ... which produces flowers  
for the temples & is better for the people  
would surprise you. I wish you had  
sent me an extract from Sr C. Smith's  
letter. I should be great interest in  
so powerful a testimony to your  
professional character. We got the  
plants from Sr C. Keller & I have  
promised Lt. J. ... to make the  
best of the Cabana he asks for. We also  
got the Ben from Sr G. ... I was  
careful in sending you all letters  
of this sort. & in getting the plants  
from the shops. & thank you here who  
bring them with offers of Cabana this  
I do not always mention them to you.  
Lt. J. ... has got the large shop  
you may remember build for ...  
shops. He is to be launched in a  
few days. & I may not probably go  
down with him to ... for I have

resolved to go on leave to the Cape and  
to stay for a year. of my health I shall  
a Chew. in what case I shall be the  
the pleasure of me more seeing you  
in the garden. We have seen ever by  
got over our business. & at this moment  
a seed weekly wood is flowering which  
can say how as the paragon of the  
old world. Since I wrote you about  
the chelydrot I have purchased some  
of the kernels from the Dutch. but did  
not see them in order to judge of the taste.  
They are cylindrical & slender. A native  
of the Cape the other day brought me a  
number of these in plants & trees which  
he had an account of two sorts of  
chelydrot. The one which bears one sort  
is from his description very evidently  
a pear which he calls "Lambour." The  
other he says tho' popularly called by  
the name of chelydrot in Surinam is  
borne by a very different tree & is the  
kernel of a different <sup>fruit</sup> which he describes  
as a sort of fleshy trepe. If I  
understand him right. I say as there  
be an almond. What this may be  
I have no notion. but I have  
thought we may get information by  
procuring some specimens. We have just  
a receipt in the garden: some fruit  
of the Syntelia Lambour. The fruit the

The trees have even borne. The fruit did not  
however appear to me to have come  
to its perfection. I sent I sent it many  
years ago at Ponce. Kermec says  
it is very like the fruit of the  
Pueraria lupulina - or tuberosa which  
he tested a great many years ago.  
I sent the fruit as a novelty to  
Lord Hastings. With best respects and  
regards to Mr. Wallcut I am, my dear Sir

Yours faithfully  
J. M. M.

If you will please be copied by  
that I sent it subject to address  
you at Ponce.

The Windsor's house is finished  
and the Sud. House nearly roofed in.

1811

Wm. M. M.  
12th Feb 1811

Dear Sir,

I return you a great many thanks for your kindness in  
sending me a box of <sup>•£\*--''</sup> seeds, which though unaccompanied  
by any letter, I judge from the W on the seal to have come  
from you. I understand also from my brother that you were  
so good as to supply some of the Bulbs with me by Dr. Carey, post  
& that I am sorry to say have been lost, in consequence of the  
box being broken & spoiled at Liverpool. I have but  
acceptable to you, judging that Dr. Carey's desiderata will  
be gone also. I shall esteem it a great favor if you  
can send me a good bulb or two of *Croton* <sup>*Thalictroides* *gambianus*</sup> *gambianus*  
roots of *Medychina* *goacila*, and the <sup>several</sup> ~~other~~ new species of  
*Medychina* especially the sorts which you have not sent to my  
brother — <sup>•^</sup> & most ornamental parasitical plants of Asia  
especially *Epidendrum* *pauciflorum* & any other orchids especially  
*Grandiflorum*. *Zingiber* *elatius*: *Malaysi* *Phalaris*, *Cymbidiums*,  
*Liparis* *cyperoides*, *Limnorchis*, *Acridia*, *Andropogon* (*Andropogon*)  
*Alpinia* *sp.* to *Peruvia*. *Glabella* *oxyceras*. *Spatulata*: —  
The *Croton*, the *Medychina*, & the most ornamental parasitical  
plants included are my principal objects. — I am sorry  
to say the most interesting of the Nepal seeds were spoiled; <sup>with</sup> the  
*Bignonia*, *Jordania*, <sup>*Euphorbia*</sup> *Compositum* &c. — *Bignonia* — <sup>—, & ^ z: ^ jz ^, \*..</sup>  
& *Rhododendron* seed are always spoiled unless sent in an unbroken  
pod: the pod should be twisted up tight in paper to prevent its opening  
on the voyage. I have got up two plants from your seed of the Dwarf  
aromatic Rhod. & of the long-podded Japan than, 9 or 10 Black, &  
many of the red, & the white tuberosum. Pray send seed of both  
the Dwarf *Rhododendron*, & the long-podded sort. & pray mention

... of the ... is a tree or a shrub. I wish  
also for seed of the Silbete Rhododendron. of the 3 Buttons, of  
*Euphonia Resopinata* ... the yellow ... £8.

I don't wish for any of the seeds you are in the habit of  
sending which I have had 20 times over, nor for seed of any  
inconspicuous species, but only such as for beauty or fragrance  
would be worth their room in my stores, which are daily becoming more  
crowded. Any new bulbs from Nepal would be particularly accept-  
table. *Panicum* & *Lilium* for ...

If you should have the good day, send me \* \* \* \* \* thing, pray  
address it to the care of S.

and across to London, because the expense of a little box  
to London; five or six guineas, & not many more shillings  
to Liverpool; & I get them much sooner by Liverpool  
than by such delays in the river. The *Rosae* has shown a species  
of about the species of the *Hedychium* for you; I have only *Coccinea*

*Asperifolium* & *flavum*. - Pray pack my roots for me  
in dry paper; the *Epidendrum* in dry rags. Your roots to  
my brother packed with & in sand got on the way as

*Hedychium Sardinicum* has just flowered beautifully at Liverpool  
from whence I have promised the first effort. My brother I have  
had with difficulty saved alive a chip of each of the sorts you  
sent him, & when they increase he will supply me; the other  
sorts therefore would be more particularly acceptable, if you  
can pray send me a bit of each. ?

I send you a pint full of seed of  
*Papifloras Edulis*. I understand from your letter that my brother  
that you would seed of *Papifloras*; I hope to be able to send  
other sorts the next opportunity. The inside of *P. Edulis* is very  
good with a little sugar. - I have a fine bulb of *Crocus Augustus*  
from St. Croy, which seems to be different in leaf from what he sent me  
*Augustus* & *Superbum* before both of which seem to be one plant & the

same as *Asarula* of the *Mexicani*. The *Asarula* now sent  
appears to have a leaf pitted like *Picrophyllum* on the surface  
while the *Superbum* (our *Asarula*) has a smoother surface. I  
should be very glad of another bulb of the *Asarula* with the  
pitted leaf. Dr. Carey had somehow confounded his *Superbum*  
& our *Asarula* & we thought they were one plant. (*Asarula*  
is decidedly a sterile *Passiflora*). I have sent some of my *Asarula*  
to you & a *Passiflora* *Scabra* (Cape) & *Passiflora* *Scabra*  
it is very beautiful, the same that was called *Scaberrimum*. I  
believe I sent you a *Passiflora* *Scabra* <sup>in the fruit</sup> as *Scaberrimum* - (Cape); but  
there was a mistake in the label & I believe it was really  
*Passiflora* *Scabra* - Cape. I have got a little bit of *Cyperus*  
*Peruvianus*, & *Passiflora* & *Passiflora* *Scabra*.

The *Passiflora* *Florida* I sent you before.

The only *Passiflora* naturalized on the  
coast of Florida, a *Passiflora* sent out of a garden  
by *Passiflora* who reported that he had found it  
old. I have put in Dr. Carey's  
box a small bulb for you of the

*Passiflora* *Florida* of Bot. Mag. which was left out  
of yours. It is not that of *Passiflora* & *Passiflora*, but  
rather a variety of *Passiflora* *Florida* from its <sup>leaves</sup> differs only in  
size & color, **f\$+.^ c ££ if^ji** differs more.

Yours truly  
J. P. M.

1. Cornu

D<sup>r</sup> Sir

I have received 3. kind favours  
& 3 small packages of seeds for which I am  
much obliged to you — Those in Sugar are  
quite useless, the Sugar (preserving under the line  
& the hold of the Ship being damp) had run  
into Molasses & the seeds quite ruined & none  
have grown — There are a few from Nepal come  
up but they appear weedy like European plants,  
being in Trade I only want the handsomer  
kinds of plants, Le Palms & rare handsome bulbs,

I shall never repay the obligation I  
am under to you for the handsome manner you  
have sent me these seeds, I shall endeavour to repay  
you by the collection I am making for you of  
fresh seeds, when D<sup>r</sup> Shuter goes out I mean  
to send you a collection of double flowered Dahlia  
& a collection of fine Roses as many kinds as he  
chooses to take many of which are the most splendid  
flowers known, I will also give him any plant  
I have for you that **JL^Atf-** get seed of if he  
can take them — I am anxious to get the pine  
or Fir trees of Nepal, the Rhododendrons, helios  
& fine flowers of any kinds or any thing but  
weeds — The reason of my wishing to send by  
D<sup>r</sup> Shuter is I think he will take great care  
of

them. Several fine plants which you have sent to other people have come into my hands as they have no hothouses to keep them such as some Lily roots *Arum odoratissimum* &c &c -

I will not tire you with a long letter at present, I only write now to acknowledge the receipt of the seeds for which you will ever find me gratefull.

I am D<sup>r</sup> Sir  
with great respect  
Y<sup>r</sup> faithfull serv<sup>t</sup>  
James Lee

Hammermith  
7 Oct. 1820

I have just had a visit from the Duke of Gloucester and the Princess, to whom I have mentioned your Grand Establishment, they seemed highly delighted. I am alone now Mr. Kennedy having retired, I have a hundred acres cultivated by the Spade, I employ 170 Men & Foremen three Clerks & several Shopmen, & I have about two acres of Glass -

S < r €

I will send you seeds of all the fine Peaches, Plums, Cherries, Strawberries, Raspberries, Gooseberries, Currants, of all the new kinds which will grow well in cool, mountainous situations.

None of the Syria seeds grow unless fresh gathered before sent.

not wonder if on his recovery he should wish  
to cancel his bill - I have paid up his account  
and as this closes mine for the present, you can  
settle Cash concerns by paying to Mr. [unclear]  
for me as under,

**L**, my Salary a bill of \$100 from April 1<sup>st</sup> 1819  
to Feb 28 1820 18 mos. \$360-  
Contingent Expenses at say 20% of \$100 \$20-  
Mr. 246-

On the balance due to me on this account should  
you have paid to them, as you purposed, the  
amount of the Memo. last sent to you.

I shall be glad to hear that you are getting  
on pros[perously] in your Tour, and, as  
I am sure you will do, enjoying all the  
novelties

You are likely to meet with -

You see the Secretary's Remarks

have covered the point at issue between us, and  
in a private note of the writer in my possession

but which I have not now time to copy, he says

that the present information is all that was  
wanting to corroborate my former observations

to that subject. Has the <sup>the</sup> great spur  
and is now that state -

Give my kind remembrances to Gardner  
who is I hope quite well, and happy.

Colquhoun is off to the Treasury for a  
space of some months. Adieu to

My dear Madam

Most sincerely Yours

W. L. Kelly

Coleridge is the author  
1832.

My dear Sir,

The enclosed will explain  
itself. I do not understand exactly  
what you mean by a few days  
since from the Garden. I have  
nothing to add, but application  
has been made to me for a notice  
for the *Edinburgh Review*. Be so  
good as to let me know whether  
you think the Garden could afford  
a man that would recover his  
purpose. The enclosed shows  
you that there may be of some  
interest to you, if you should  
not have seen it before. The Review  
should have mentioned that Dr de  
Lacroix obtained the Review from the  
best sources to the W. I am very  
dear Sir, yours for #104

Eighty Nanyang. A. 42.

By the British or from the Rice preserved  
by the Chinese of Yunnan - I tried in the  
house where the owners or been ready to the Board.  
It is very difficult to find. It would  
be better probably in the country which is not  
the way which part of the Rice  
any other rice preserved in the place by the  
Nanyang.

RP1!

think the things all looks as  
 the better, Dr. G. says were packed  
 probably had been taken up on  
 when packed they arrived in high  
 immediately, some were in a  
 moderate, but vegetation in the  
 reviews than proper. I got rid when  
 but they are all alive & growing. The  
 with the exception of some small  
 dead & in a very state of decomposition  
 between the two which contributed to  
 the quality of the water. The  
 some small pieces of coal except  
 the few varieties of them  
 the specimens are all alive but  
 they had been in the water  
 & them in lots will be very  
 I have not seen any successful  
 beyond the *Phyllocladon*, & the  
 have not vegetated any seeds  
 plants will at all time be  
 that, any return I can ever  
 by any independent of what  
 already confined on me, but  
 that is near the poles where  
 nothing to adorn a tropical  
 from a fine limited number  
 the land situated to be under  
 the same conditions as the  
 Carriacou

Graham says that, and says, in  
 from me now, I do you are  
 to really allow him to do the  
 in order to see whether the  
 Graham says that, and says, in  
 from me now, I do you are  
 to really allow him to do the  
 in order to see whether the

Simon  
 Long appears disappointed in  
 having delayed till this day  
 the receipt of a very valuable  
 if not a seed by the length  
 in respect, I am sure you  
 been guilty of this mistake  
 neglect, but I am sure making  
 for some safe means of  
 a few *Phyllocladon*, with  
 of finding a Captain who  
 the of the plant through  
 voyage is great. I rather  
 received *Phyllocladon* to

An board the *Natal* Schooner  
off Padang 11<sup>th</sup> Oct<sup>r</sup> 1820.

My Dear Malloch

When I last wrote you little  
thought to be so soon on the move; but  
so it is. Mr. S. & I had some conversation  
one morning at breakfast about Palo Mias  
which ended in his proposing to send to go  
there on a special mission, and so in two  
days thereafter I put myself on board  
a native vessel for *Natal* the point of  
appui for Mias and am thus far on  
my way. — Of the objects &c of this  
trip I shall hereafter write more fully.  
I only sit down at present to be prepared  
for any chance opportunity that may occur to  
give you a few of my botanical discove-  
ries that may be in time for Ross's second  
It is more than doubtful whether Schob.  
be able to send this before my return to  
Bencoolen, so it would be idle to say  
more than a few words on this subject. — For the last  
few days I have been bothered with colds,  
but (to speak in that case like an Irishman)  
it's an ill wind that blows nobody good,  
so instead of getting for a wind that  
would not come I ordered, and the

boat and proceeded to ransack the  
hundred beautiful little Islands  
that stud this part of the Sumatran  
coast. Pulo Kumbay, Pulo Kintangor  
Pulo Digang, Pulo Shytan! We have  
thus been explored and their plants  
rescued from oblivion. You can  
hardly imagine anything more beauti-  
ful than these little Islands rising  
in little hills out of the blue waters  
and covered either with forests, or planted  
with coconut trees. The access to them  
is not however always easy, their shores  
being generally fringed by coral reefs  
in which a heavy sea is always  
beating, a good sail in which is often  
the price of landing.

I am now up with you  
in Didymocarpi, having found my  
fifth in one of these excursions a didy-  
manous species, which I mean to call  
*D. elongata*, from <sup>iv^f^nf</sup> the lower  
lip of the corolla and its tube unusually  
elongated and long slender spikes.

I found also fresh specimens of  
what in my little dispatches I called  
Myrsyne, and on referring to  
No. 6\*./^4l^\*^L I had not with me when

I first found it at Cappawash, find  
that it is neither more nor less <sup>than</sup> ~~this~~  
Lohnia, but a new species. *Suma-*  
*trana* (*si velis, mihi*). With all due  
deference I think it is a great pity Robt.  
discovered it first, for I like my own  
name best. I found at the same  
time a *Hippocratea*, which agrees with  
Robt's *obtusifolia* in having four seeded  
capsules, but has serrated leaves. very

I think new. - Have you not often re-  
marked what singular want of precision  
is in all Robt's descriptions and particu-  
larly in his *charis*. He does

not seem to have understood the  
true intention of them, and gene-  
rally is very much out in the  
selection of essentialities. Compare  
in this respect that wonderful  
'/' an *Pravum* - I must send

you remember a pentandrian species  
of his which perhaps you would not  
expect from hence and which in  
some cases enters into No. 1. it is  
*Sensalicia abocta* Br. Prodr. N. H. p. 539  
(under a Sideroxylon of Linnean nomenclature)

I have one other very interesting pent-  
andrian for you. *Boya grandiflora*. No.  
a most splendid personage; flowers  
two inches in diameter, red shading  
into white, corolla thick & polished  
like a Japan tea tray — The whole  
plant hirsute!! — *Boya viridiflora*  
I have also found in considerable  
abundance.

I have also found a new  
*Begonia*. Do you remember a  
*Nyctoides* from Acheen among the  
specimens we ex<sup>d</sup> together, with three-  
nerved leaves; I have again found it &  
another nearly related species, which I think  
I must make a genus of, as it has a six celled  
ovary; many ovula attached to parietal recep-  
tacles. I decided. Now if the genus  
of the *Nyctoides* is more dependent on their own  
form than it, they will not come under any of the present

Pray what are the affinities of *Hippocrepis*  
*tra* & *Lobelia*. Their flowers are so exactly  
 alike that without the fruit they would  
 pass for the same genus, & their three-lobed  
 berry and a three-capsuled fruit are not  
 incompatible with a junction. I doubt  
 however their affinity to *Aceris* Sep:  
 Their resemblance is strong to *Phaenocarpa*  
 in habit but an exalbuminous fruit  
 is against, an *Hippocrepis* are exalbuminous.  
 They seem to be somewhat intermediate  
 between *Trochodaceae* & *Phaenocarpa*, at  
 least as much as between *Aceris* & *Phal-*  
*logium*. I confess I do not see any great \*  
 distinction between a calycine  
 acetarial disk & a hypogynous one.

J! dL

Wattal. is: A?? fi'' ~-'-

I arrived here last night & find a  
 off now for Cadang of which I shall myself  
 as it is the most likely way of thus reaching  
 you. I intended to have put up a  
 specimen of *Leucaena* but my

W2-' r^v^

My traps have not come ashore  
and the hatch is going off so I  
must content myself with the  
description -

W. L. G.  
11-13 Feb  
1820  
New York

The Dear Sir  
Having lately dispatched some Linnaean  
\* to you by the same packet I have  
\* to enclose you some very best bottles .fiu^J  
traces containing dried flowers, Ferns, Plants, Lichens  
& Mushrooms the third \* with a few more y ^ ^ - by  
to-day I am the honor I have the pleasure to enclose  
you the Papers containing all the local information  
& particulars regarding both 'AV' > I am extremely  
sorry to say that I have been under the necessity of re-  
-moving the Stones as they came without regularity.  
but the I hope will not much signify having given  
the height at which they were found, the Latitude,  
Longitude &c. Had I had sufficient time to spare I  
might have lengthened the local particulars but the  
purpose of these success, presents me daily so, such  
as they are I am in hope they may not prove unac-  
-ceptable.

I have much pleasure in here stating that some  
myself I have gathered a considerable quantity of plants  
seeds in the very broad which shall be dispatched  
as soon as they are sufficiently dry -

If I thought that a similar quantity of Stone  
specimens to that lately dispatched from Mr. C. would  
be acceptable to the Museum of the Botanical Society under

your charge. The same, I shall be most happy  
to reply to this & make a selection hereafter  
not being aware of any objections from  
any yet had printed to it. I paid in  
some that says you are I suppose to  
please best  
I do not know what you mean by  
Always your truly  
Wm. H. Deane

Delaware Garden  
17<sup>th</sup> Dec 1890

My dear Sir

I am over here yesterday  
evening & find every thing going  
on well. We began to work our  
old garden this morning & found to  
be a good deal gone. There is the  
same company as several others  
by letters to me have made up for me  
for the seeds, & for the compensation  
of its not being overfilled. I wish  
you could see our house. The  
kitchen has filled up admirably  
& as the freezer may be used and  
as it is for this year we may  
expect with confidence in what  
we have gathered. We have had  
a great supply of seeds & bulbs  
from the Cape. My brother has sent  
you a box of bulbs with his  
kind regards to yourself and the  
wishes. There is also a box of  
bulbs from the Barren. & a box  
of seeds of wild flowers. The

The Dutchman brought me some better  
plants growing in fine order. among  
them a species of *Philodendron*. a tree  
some plants of the Hop Rose. in  
tolerable order. All these I have  
brought to the garden. I have had  
the pleasure to receive your letter  
from Calcutta and the tools of  
the Karmuker. were in excellent  
order. I have desired them to  
be planted as you suggest. As  
to the matter I am quite surprised  
to hear that it is one of those  
delusions which are so common  
in all countries. Newton's however  
about which but I feel persuaded  
are always interesting; & it is  
some thing to explode these popular  
errors of error they know. You  
say nothing of my Beavers plant  
used in the manufacture of  
Sugar. The Sultan told me that a  
man offered to pay some thousand  
Rupies a year for the monopoly of  
it. & to me done well to take  
the opportunity of visiting the  
court of Lucknow. I should wish  
the King of Oude to have a

I beg my best regards to you & Mrs. &  
Yours faithfully  
Wm. M. M. &

Sir,  
The bill today has been  
described from her situation of  
Presidency Surgeon in consequence  
of the investigation made into  
her charges. The matter I believe  
will succeed.

John  
121 Gt. St. 1842  
De W. M.  
3rd Nov. 1842

Political Garden but for my fear that  
of he had one - I am sure you would  
wholly ignorant of Botany would  
immediately in it into it. you  
will be surprised to hear that the  
Garden has submitted to the  
under your supervision. The  
fact is between ourselves that the  
Government desired the Board of  
Commissioners & local agents to  
look closely into the accounts &  
disbursements. & I suspect that  
the Garden wished to exchange a  
distant & somewhat awkward for a  
near & effective one. He was desired  
to put himself in correspondence  
with the Superintendent of the A.  
Garden. but told that the local  
agent was most disagreeable. I have yet  
his own views on this. I had  
doubted - every so doubt to its being  
for a month before I had seen the  
man but for some years. but  
I have not at present time in  
charge in this branch. a year  
of the life I trust will enable me  
to return. & to talk over your  
papers & troubles with you in person.

Nipaul 17<sup>th</sup> Oct. 1870

Monsieur Wallich

Had yesterday great pleasure  
in receiving your letter of the  
3<sup>d</sup> giving me a good account  
of your progress, for I began to  
fear that you might have  
met with <sup>some</sup> more disasters -  
squalls on the river - If you  
have visited Lucknow you  
will scarcely be back to Mehar  
before the first week in  
Nov. and I now scarcely  
expect to see you here sooner  
than the 10<sup>th</sup> Dec. - His very

Why indeed, I think, that you  
will have met with Sir  
Robert Colquhoun, or, if not  
yet that you may meet with  
him at Patna perhaps he  
was to have left Buxar on  
the first of the month  
on his way to Calcutta, and  
Mr Hodgson, the assistant  
here, will be accompanied  
if you should feel on  
with them - and it should be  
convenient to both of you - it  
might be a good plan to join  
Company with Mr Hodgson

and come up to Newport  
together. I had no doubt  
that I would make the journey with  
pleasure than I have ever  
made before. I was  
at regular intervals along  
the coast as I have  
before. I had my men  
take care of that which  
I advanced them what they  
required. The letter for my  
men which I had ordered has  
been sent to Newport. I have  
sent a portion of all the

X

<£&^\*£^t A

\*?\* \$£

think you sent up by the mail. I  
am much afraid that our  
winter will prove too cold to  
allow them to vegetate, and I  
have therefore preserved about  
half the seeds, to be sown after  
the cold weather if they do  
not succeed now. I do not  
wonder I think, that you felt  
the effects of wintering about  
in the first of August or Sept  
as you have been driving. I  
was very glad to hear that you  
had got over your slight attack  
at Kusnau and hope the  
change of weather will prevent

any return of such symptoms.  
The cold season here has  
already set in we have had  
fries morning & evening since  
the 11<sup>th</sup> and am now setting  
me and intend to have  
carpet down my room - In  
the event it cold enough  
on you march up - I shall  
send this at a venture, to  
Dunnes' if you have paper  
from it can be forwarded  
after you. Chartered it seems  
to be private Secy. at least  
to report says - but you must  
know more of a part of it. When

give me than I do here I am  
most happy to hear that the  
article which is so essentially  
detached in Messrs paper  
is the best of all the plans  
you could have adopted. I am  
under my best regards  
believe me My dear Madam  
Yours most sincerely  
Edward Sumner

Edward Sumner

indeed have been with all  
Lyncham - but if you only  
staid there I can be sure you  
would not have had sufficient  
time to see all the lions and  
spots worthy of inspection &  
I have suspected you, <sup>we</sup> induced  
to prolong your visit? we shall  
at all events, however suffice  
keep up here by the end of  
of Dec. but there is no  
hurry if you have anything  
to detain you, as you have now  
fine weather before you - and  
are your own master as to  
time. Hope you may have a

35 Newport 28th Oct 1890

at the Bay of Amoy arrived  
at Peking where  
I arrived 27th

My dear Wallick

By the time this reaches Peking  
perhaps you may possibly have  
arrived. There on your return  
from the late summer and

I hope it will meet you in  
good health quite without  
suffering or pressure altogether  
with your trip. Had the  
pleasure of receiving your  
letter from Constantinople some  
days ago. You could not  
help being much with that  
very odd place as you must

taken in with Mr. Bodger  
but at any rate you can  
have a companion from  
Muller or Legwiler - St  
Robinson - one of our party  
here, will leave this for  
the former place on the 1st  
Inst., and I have begged him  
to write to you, and if you  
should go by Muller for  
we arrange with him to  
put you at Legwiler <sup>perhaps</sup> the  
last night, and come up  
with you <sup>your time</sup> and pilot you  
through the intricacies of

me Mountain songs -  
I have not a syllable of news  
to give you but what you  
must have heard of - May  
offer my best regards to  
Mrs. Watrick who I hope  
has met with no more squalls  
of that horrible <sup>sort</sup> - and  
believe me My dear Mother  
Yours most affectionately

Edward Smith

London  
28 Feb 1783  
Ed Smith

Singapore 30<sup>th</sup> Oct 1890

My dear Willemit

I cannot tell you how much  
I obliged feel to you for your  
letter from Singapore of the  
20<sup>th</sup> which I have just recd.

That the communcation you  
made to me in it is an  
additional proof of your

unselfish interest in the  
welfare and happiness  
of those I should do - but therefore

say a few words on the subject.

Now I know why Mr. W.  
should have been anxious

on account of the  
of respect for

Had heard from a confidential  
man from Calcutta that  
it was not improbable that  
he might go home this year  
and a hint was given that  
I might possibly be invited to  
ascend from my mountain  
to not particularly with  
reference to his post. I have  
always however, anticipated  
more delay and situation  
as to my inferior to health  
and comfort and as long as  
both these blessings have  
C^ a greater degree, according  
to my own 2-t^<. notion than  
I think I could in any way  
/ £ £2 \*

prefer, sometimes to do so, my  
great retirement here - which  
gives me of credit and  
honor - I being office which  
might be offered to me - my  
health - which has suffered  
since I saw you - has been  
gradually improving here  
& this is a very great point  
worth all the means and  
that that India can afford  
After this you must not be  
disappointed of your friend.  
We here value a Country  
Gentleman than the Resident.  
I am afraid after the time

any other translation in English  
I am not at all desirous of  
any change - certainly would  
not go any round about way  
to seek it, and in writing  
below privately to my friends  
I have decidedly said that  
I am quite content and  
that I do not wish for any  
translation - I think it <sup>un</sup>likely  
therefore that any person be bound  
to me - my services are of course  
at the command of Govt, but  
if the option is left me, it is  
most preferable I think that I should

... which you have  
been watching at Buchman.  
You wish - when you find us  
think our message has  
very inferior and stupid  
but we create thereby a  
great deal of the immense  
disturbance and as you will have  
a good field for working  
botanizing in. I must stop  
at this time that you may  
fall into our hands with  
ease & enjoy our friendship  
as much perhaps as you did  
the Father at Buchman.  
I am very glad you will please

% • Z

with Singapore. The Bathurst  
scaly are English and very  
fine people. and so far from  
some that you would like  
the place - - You have now  
seen something of India at  
any rate. & one of our friends  
(if I may be called so) Constant  
asked me to welcome you  
here - You shall tell me  
from your <sup>own</sup> experience whether  
I have taken a right view of  
Matters - as to my audience

among my friends. I want to  
write to you -  
the 28<sup>th</sup> a short letter - and  
as you may perceive have  
been writing in a hurry - I do  
not think that Mr. Robinson  
would go down early next  
month - to Muller for the  
purpose of meeting you  
wherever you may, in America  
- in California with him, make  
it most convenient, & to  
accompany you - I have not

without hope that you will  
also take in with our baggage  
by a post. I come up together  
this hope will find you safe  
at Patna atleast. a few  
days before at Bunnar  
& a few for pond? (cross water)  
but will be all the delay  
necessary - you will take  
the opportunity, I am sure, to  
see the fair at the junction  
of the Ganges & Ganges  
opposite Patna for which  
I imagine you will be a very  
good time. What be the delay

to see you here, as you know  
but as I said before - let  
nothing hurry you, so as to  
prevent you in any way. as  
you are completely your own  
master now as to time  
& made Mr. & Mrs. Vincent  
will make all smooth  
as to the road-way &c.  
I should have no difficulty  
Paper, as you say, at Buckham  
is a very excellent man -  
I should not but have  
liked him. I must now bid

In addition - full is. I am  
time - Pray make my best  
regards to Mrs. W. & C. -  
Who I do not say will be  
somewhat glad to get home  
again after all your wandering  
I believe are yours  
My dear brother

Yours most sincerely

Edward Mendenhall

Keppel's November 1890

My Dear Sir

I have the pleasure to acquaint you that the packet parcel by letter I wish will accompany this; I believe very few of these have been before sent you & I shall be happy to hear they may reach you in safety. I may further add that there are two or three bound papers some lying at that time which my absence for some time will prevent my despatching. I was obliged to leave that place a few days ago on business & I fear that many circumstances may prevent my return till about the end of the month being now so far on my way to Rampeau on duty but on my return I shall again commence dispatching all the remaining seeds & any others which may be gathered during my absence.

Excuse haste

Believe me to remain  
My dear Sir

always Yours Faithfully

King's College Aberdeen  
8<sup>th</sup> Nov<sup>r</sup> 1820

Dear Sir,

I had the honor and pleasure to receive yours of 27<sup>th</sup> Jan<sup>y</sup>, with a letter enclosed from my Son. I regret that circumstances which it is unnecessary now to detail, prevented me from returning an early answer. Yet I hope that my silence has not occasioned you anxiety or inconvenience, since without a moment's delay I authorized Mr. Lock to communicate to you through the medium of our Son W<sup>m</sup>, our entire willingness to comply with your wishes to the utmost in our power. This accordingly he did.

Your kindness & attention to our dear W<sup>m</sup>, you may believe, have made a deep impression on our minds. I know nothing that would afford us greater pleasure than to be enabled to repay to your Son, the important services we have rendered to him. — Our inclinations & wishes prompted to the adoption of your Son into the family as ~~our~~ own, and it is with difficulty I have hitherto restrained myself from telling you so. But there were difficulties in the way, & I wished them to be removed, before finally committing myself. In fact I have been solicited on the same head from different quarters, & a few years, have put a negative on every proposal of the kind, under the pretence that our numerous family required all the attention we could possibly give to them.

This objection is now in a great measure removed, and what chiefly puzzled me was, a similar request from a neighbouring Highland Chief, extremely clamorous in favor of his only Son, w<sup>ch</sup> pleased me in the following dilemma. If I rejected his proposal, I could not with propriety accede to another of a similar one; & if I acceded to his offer, I feared

€-t^A Otr7--n  
ment would interfere with our favourite plan of receiving your George into the family to be educated & brought up with our youngest Son & Child (Andrew). It is now agreed upon between Col. Macdonell & myself, that his Son (the young George) & my fourth Son Alex<sup>r</sup> shall pursue their studies under this roof, until the end of Session 1821 $\frac{1}{2}$ . When both will be removed to a distance. I therefore now think myself at liberty to say, that at the expiry of 18 months, your dear Child, unless some unfore-  
seen objection prevent, will be received into this family as one of our own, & shall experience all the attention, affection & kindness, which such an obligation implies.

If from untoward circumstances this may not be, I shall still feel the same charge, & place him as I would my own. Or what is more probable, should it happen, that I have to remove occasionally with my family from the place, I will either take your Son along with me on such summer excursions, or place him under the care of another, my youngest Son bearing his company, since should my determination, that they shall be bred up as brothers, have equal advantages.

It may perhaps be unnecessary to mention to you the fact, that from the age of 18 or 20, when it is proper to remove a young youth to a more extended theatre, this place affords advantages in the way of education perhaps unequalled. I may add for Mrs. Wallcut's satisfaction, that I believe there is not in the world a healthier spot. We live as it were in the Country, in the midst of a select society, of persons retired from public life, chiefly with a view to the education of their children in the immediate vicinity of a large town. Qualified teachers in every department may be had on moderate terms, and the Physicians are always within call, as they in this family (thank God) for the last 25 years they have had no employment.

I have commenced a correspondence with your Father & when I hear from him will write to you again, we are waiting for a return from you.

I beg you will present the best respects of all this family to Mr. Cole Paton, & pray tell him how glad I shall be to receive a few lines from his hand.

Mrs. Jack desires to give in best Complts to Mrs. Wallcut, with whom she hopes one day to open a correspondence, which considering the Subject, will not fail to prove interesting to both - I am most respectfully

Dear Sir your obed<sup>t</sup>. & devoted  
Nephew & Son

Nathaniel Wallcut M.D.  
Calcutta

William Jack.

to get them made the  
attempt to overcome the  
obstacles, grounding the fact  
here upon the subject. But I  
am extremely averse  
to the thing, and as I cannot  
make it a demand on my  
official capacity, and do  
not like to pay the business,  
I am under the necessity of  
saying that I see no probability  
of their consenting with a good  
case to Mr. Franklands wish,  
and we must all therefore  
bear put up with the  
disappointment. Roger with

make him understand that  
that this is not for want  
of any inclination or endeavor  
on my part, but that in <sup>the</sup> truth  
circumstances are at present  
too much against it.

The Literary Digests you were  
read enough to read and have  
remained quite safe. I wish keep  
them, and be Mr. Raffle's  
papers until I have the pleasure  
of seeing you here.

ia£\* & ^r\*

think - ought. (if he meant you  
to judge fairly of the case I  
have added the letters of  
the two french gentlemen

Manuscript a parcel of books  
for you that have arrived  
here - and as I conclude you  
must have seen them  
up before you, I shall keep  
^fijj&^s\*— till you arrive.

I do not <sup>know</sup> where this may  
find you - but have headed  
it Marguerite's pore. where I  
hope every thing will be  
ready and comfortable  
for Mr Wallick. I wish  
they you will make me  
very best regards. - this I  
dare say one of the pleasantest  
and healthiest

also - and the arguments on either  
side - at present this <sup>is</sup> <sup>quite an</sup> expostive  
account. - That is a change  
they about Mr. Brock's feat,  
in Calcutta. I don't rightly  
understand how he could  
have managed to have  
persuaded the two ladies!  
It is a curious business altogether.  
I hope you have succeeded in  
the NW Colquhoun and made  
acquaintance with him. We  
have heard nothing of his or  
Mr. Hodgson's movements  
of late - but this probably  
4C they have reached Patna

Station in India - Do you  
really think of going to see  
aguard Delhi: as Mr  
Bulhurst hints in his letter  
to you; they are certainly  
worth the journey, if it be  
only to say that you have  
been here. and if you are  
fond of antiquities and  
all ruins you will find  
much to attract your  
attention. or for botany  
I suspect it would not prove  
any rich field. but there  
is at both places & round

about them much worth  
seeing - it would be a good  
trip to go first to Agra thence  
to Delhi - across to Rohilkhanda  
& across fine Provinces  
up to Kumaon. Also the  
Mountains from Almora  
to Hurdwar. on some future  
excursion - and should  
like much to be of the  
party. - we have fine  
clear weather here and  
the snow mountains visible  
after the mist  
disperses about 10 o'clock

**3u^itf^P-'X**

3  
I wish to make little doubt  
have a very fine view of the  
coming up both from  
Chandigarh and Chandigarh  
I wish to manage to reach there  
after 12 o'clock and  
the view while driving  
for the sight is certainly a  
very beautiful one - I hope to  
hear soon that you are on your  
way, the country has lost its green  
hue & has already put on  
its brown winter suit -

Yours My dear Walter  
Very sincerely

Edward M. Butler

Sept 18<sup>th</sup> Nov. 1870

My dear Valerik

I have to thank you much  
for your two letters of the  
9<sup>th</sup> & 11<sup>th</sup> - and first with  
regard to the envelope in the  
last from Peppet to you -

Would by no means advise  
his bookbinders accompanying  
you for the purpose he has  
specified, as in the first  
place I know that they  
could not succeed in their  
object, and as a matter  
of your part to act the future

of which would be a  
certainly be resisted and  
probably only lead to very  
disagreeable results, <sup>and</sup>  
if any thing of that sort were  
to occur while attending  
upon you - I would have  
any effect but that of  
forwarding your views and  
interests in writing us -  
I have written to Tappet on  
this subject & recommended  
his recalling the men - and  
of you - should not hear from  
them before you reach Sepolia

It would be most admirable  
that you should leave them  
here, instead of bringing them  
on with you - at least coming  
on even properly lead to a  
good whatever I may have  
any contrary effect -

The second batch of Literary  
Digests, arrived such late  
and I am exceedingly  
glad to see you have them  
because of their personal  
they are very entertaining  
pleasant reading.

I am quite glad that you  
have met hi Mr. Devereux

... I know you  
are about to become acquainted  
with my friend of mine  
some that I have a great  
esteem for a sister with the  
our pain therefore that  
I must ~~do~~ encourage dutifully  
his plan of ~~encouraging~~  
see me on his return from  
Calcutta - a few words I had  
you about Mr. Franklands  
proposition - you will understand  
why this cannot be and I  
must give up all idea  
of the pleasure I should have

'£ZjL-&~c-4-^~t&~'~i^(L

«\*\_ oZt\*\*»

have in description here - when  
I cannot expect it for him -  
indeed it is a proof of time  
that I cannot succeed for  
them - it is decided by fate  
Ganey that this is to be  
a letter of disappointment  
but in this I am - Car Chapman!  
My plans for going have  
been the mountains of  
Alvora - North as  
perfectly impracticable,  
and so I said in a former  
letter I have not the smallest  
hope of any success in that

very much to be carried with  
you should be very <sup>grateful</sup> <sup>to</sup> <sup>me</sup>  
to make the attempt with  
the knowledge that I have  
of the articles to it. I think  
I shall myself give you with  
fully understood after  
you have been a short time  
with us. I am very much  
nursed of late in with Mr  
Hodges as you will find  
I am sure find he would  
not to have left that place  
if on the 8<sup>th</sup>. I am sure  
he has traveled a great

The way he can hardly have  
reached Patna - I am  
per o which Fleming purchases  
A-A^ an such capital  
bargains, with he of great  
use to you here - bring them  
up by all means; as the  
surest way of sending you  
What send this to L. Robinson  
Care - I would not like  
to miss you - particularly  
with reference to Pippit's  
tipstaffs who please  
to send you. - Mr. Mubush  
I hope you be comfortable

at Mygusapur - when  
you will be glad to hear  
from my best regards and  
believe me my dear Mother  
I am very sincerely  
Edward Sidney

E. Sidney  
18<sup>th</sup> Nov 1872  
121<sup>st</sup> Mygusapur  
24<sup>th</sup> Nov

Tripunct the 22? Nov 1890.

My dear Madrick

I was somewhat surprised,  
I must confess, at learning  
the event which prevented  
the in person letter of the  
15<sup>th</sup> from Moncha as I was  
not aware that it was  
expected. Myself with aught  
my sincere congratulations  
however, not only on the  
address to your family - but  
that under all circumstances  
everything has happened so  
favorably and hope that  
Mr. Madrick & the young ones

advanced - or rather not  
knowing exactly where you  
were to be found. I sent a  
letter, wrote to you on the  
18<sup>th</sup> to direct Roberson's care  
at Malby. He was probably  
forwarded to you - but <sup>have</sup>  
if not, I suggested in it, that  
you had better leave Jefferys  
backwards behind, as  
rapid and perpetual <sup>be</sup> <sup>is</sup> <sup>is</sup>  
then accompany you  
in the grand Tippet seat  
then, & I have accordingly  
written to him to be kept with  
you. unless you think

continue to do as well as  
I could wish and that  
I may find you at  
Muzuburpon more  
comfortably & securely  
accommodated than you  
could possibly have been  
in India. - Under present  
circumstances I do not  
expect to see you here much  
before Christmas. as many  
things may occur, I am  
aware, & I shall be glad  
to see you before long than  
I am prepared. - Thinking you  
might have been more

112  
I give them for your own  
use & convenience merely  
I wish not to give them a  
paid, at a rate of  
pulverize & powder

Pray for my congratulations  
about reports to Mr. [unclear]  
and believe me always

Francis Pickens  
The [unclear] [unclear]  
[unclear] [unclear] [unclear]  
[unclear] [unclear] [unclear]

Yours very sincerely  
Edward Sumner

Have heard nothing of the  
badger - so perhaps he will help  
you - but his movements are  
not of course a part of your's.

Came up at a different time  
as you desire however I will  
be about by to go down  
to meet you - leaving Newark  
to go on collecting here - your  
harvest I fancy will be from  
the month of March to Sept.  
The three first months of  
which are to me, and the  
pleasantest in Nipaul &

I have to thank you for your  
letters of the 17<sup>th</sup> & 23<sup>rd</sup>, and  
for a letter from the Rev.  
Colquhoun that was enclosed  
to the former. I heard from  
Culcutta of Lord Hastings' trip

to the neighbourhood of Rayh<sup>m</sup> <sup>which</sup>  
Z r^e?€- & £ the same time I  
understand that Mr. Stuart  
was ad going to Europe but  
never to **d\$T<r-f&L-^C\***

I am very happy you & Mrs  
Beulich were contented and  
pleased with Mr. & Mrs. Poor  
and that you were able to  
give such good accounts of  
her and your young one. I  
suppose we shall see you here  
about the 15<sup>th</sup> or 20<sup>th</sup>. Your  
idea of going hence thro' the  
Mountains to Keason Hill  
Hem - as I before mentioned, be  
given up. See no prospect of

whichever should not  
take heed to make the  
request - You would however  
if you think of going there when  
you leave this - rather gain  
time than lose it by going down  
the Tennessee - that is from  
Sequoyia to Grubbs for this  
is the route - going thus  
the Mountains show to be  
perfectly out of the question  
and you must be content  
herefore to forego that plan  
Believe me My dear Mother  
Yours affectionately  
Edward Snowden

P.S.

I have just got your letter of  
the 20th which I cannot put you  
happening in for. as well as  
some of the large parcel of  
the letters of justice  
I wish you say about  
- **tid** to police men, as they  
had acted contrary to the law  
behind - More we  
you respect. Acknowledgements  
for all the news you have  
sent to me some articles  
of which I had not heard  
of before. For example  
I know nothing about the

arrangements that are  
talked of <sup>inducement</sup> but Mr. Swanton  
understand was to succeed  
Mr. Metcalf as Collector  
left - and indeed  
Change of the Office.  
Mr. Pinckney of the Revenue  
one, a short time hence  
will show us how it is to be  
the work is wanting and there  
only time to say adieu

Wm. M. Swanton  
Collector

Wm. M. Swanton

The Health  
I have been  
My dear Sir

I received your letter yesterday from Singapore - being on my way  
by sea on my arrival, I called on Mr. Pitt-Rivers, & Mr. Pitt-Rivers, the two  
right quarters in order to see what **£#£** in relation to the proposed plan  
taken in the vicinity of the monument I thought it  
highly to do so in order to see what **£#£** to the Marquis of Hastings  
which conveyed in your favor of the 10<sup>th</sup> Volume which I had the honor  
to receive while I was at Malacca.

The ground adjacent to the monument is rather  
low & abundant grass can without the least inconvenience be found  
for the purpose of being laid out with an appropriate plantation, &  
I sincerely wish to see the monument surrounded with  
but the idea of a ~~plantation~~ <sup>of trees</sup> looks at first  
but ~~rather~~ & ~~undoubtedly~~ requires the ~~requisite~~ <sup>of trees</sup> consent of a grove  
There is a consideration, however, which is somewhat unfavorable  
to the full accomplishment of the object in contemplation, it is  
the following: The trees which I observed in my walk near the  
monument, and near of Singapore, struck me as more than usually slow  
in their growth & in general of far inferior dimensions, compared  
to those of the other provinces I have visited, indeed I am  
led to see by my visit to Malacca that Malacca & Sumatra produce  
they do at Malacca & Malacca, because the trees planted along the road  
are of a more temperate climate, which can be improved had been raised with some  
additional

atf

can, such as <sup>^</sup>beam, masonry, & masonry, & some within the  
 structure. The cause of this defect, in doubt, resides in the pres-  
 ence of a <sup>^</sup>horizontal subsoil, preventing the roots from penetrating  
 to any great depth, & at any rate, considering that people may show  
 & others, I have thought it my duty to mention this circumstance,  
 merely in order to explain my motive for suggesting that a propor-  
 tionally greater extent of ground & number of trees & shrubs might  
 be employed, than would, under the usual mode, perhaps, be con-  
 sidered, but by no possible means intended. The objection  
 as to the cost of the carrying into effect is highly desirable in  
 a project. After repeated conversations of the grounds & I have form-  
 ed the following general plan for the plantation, which I hope  
 you will do me the favor to submit for the consideration of the  
 Board, & should you be desirous of any degree that in a formal  
 manner is ~~in my power~~ to that effect will be all that is requir-  
 ed. I should be very desirous to see a plan of the follow-  
 ing outline is offered with the expense & more perhaps be done  
 and not wholly as yet.

The Government has a large piece  
 of Government ground, at the foot of <sup>^</sup>the hill, & a small piece  
 towards the river which seems here, & some other places. The space  
 which is enclosed ought probably to be left pretty open & free  
 to that which is necessary, & when the water rises to its full  
 height, has a field of view of the building. There is a beautiful  
 gravel walk leading from the steps of the battery, down to

A number of Cornets ought to be employed in preparing &  
m. mm &\* the grounds between the town & each fort where  
an eight rownsonne planting that they might avoid  
in passing the ground with a hedge of prickly pears, a pro-  
tection the more necessary at Gungahore in consequence of  
the frequency of thoy, colder usurping, from the Nobles of the  
State, I might " ^ be surprised to see as well without standing  
the proximity of the river. At Allah, with whom I repeatedly  
conferred & examined both the ground & the prospects, dur-  
ing the three days I spent for that purpose at the  
Mithra, has authorized some to offer his services on that  
occasion, though Government should not be able to adopt the measure  
in fact or in fact only of such convenience that reasonable  
officers will punctually carry out effect any instructions  
with which he or I, or his ^ ^ ^ way be honored without  
that view.

The object of this letter I find that I have con-  
tinued to enter into the secret of the Rd. fort on one occasion.  
The ground for ^ ^ ^ A- that withstanding my previous protest  
standing that I had perfectly convinced that yourself as well  
as Lord Hastings would see construction of it, now it is found  
that he intended to confer on my opinion, which is being  
fully that the base of the battery into the ground is  
too high (i' ^ ^ the latter too broad. The desert far too high  
with above all things the inputs or life part out of all fur-  
further

The day before

I have arrived here yesterday & I was made happy by the receipt of  
 your favor of the 17<sup>th</sup> of the 11<sup>th</sup> of June for which please to accept of my  
 warmest thanks. I rejoice from the bottom of my heart at the  
 glorious prospect of the Revue on the river side - God grant it  
 may fully answer all expectations and that the House  
 may be saved! - I know well that you would not desire  
 proof of my going to Lockport because I went there  
 with the explicit intention of attempting to persuade the  
 Hon<sup>ble</sup> of State or his Minister to encourage a treaty of  
 History and Geography & not without hopes of success  
 in these endeavours! I believe I never thought in one  
 of my preceding letters that I had been anything well  
 attended in nothing, gladly would I have avoided  
 saying anything further on this subject but in self  
 justification I put it in your hands upon me to expect  
 distinctly & clearly that relating to my paper & wishes with  
 which I set out on a trip of 300 Miles <sup>f^</sup> to Lockport &  
 back again. to be performed & as a <sup>\*-%, ^^</sup> ~~was~~ <sup>was</sup> ~~not~~ <sup>not</sup> ~~performed~~ <sup>performed</sup>  
 and left them 10 days. I think see nothing but that you  
 by your favorable Movement to guide and fully to settle  
 me, could you believe it possible that Lockport should be  
 the only place where I should not have met with the  
 most ready and anticipatory compliance in the way I men-  
 tioned and certainly very moderate requests on regard to  
 any of my paper without the slightest comment they be

in your time with the following few facts and indeed it would  
be entirely & absolutely impossible for me even to venture a guess at  
the cause of any thing but of the disappointment & distress from others  
& they tell you that if I had not considered myself accountable  
to you for every step or step I should during my absence & had not  
you but been considered it anything for me to give you some ac-  
count of my business I should have but then written altogether my  
own communications otherwise.

The very arrival at Constantinople and  
with half an hour of <sup>^C\*</sup> Sarah is taken to the Convention and  
passing my hope that this would <sup>\*\*\*/i^ ^ ^ - \* - ^</sup> inform the Capital  
of Paris of my unexpected ability to do so. having found in coming  
to Alibon that I had a few days remaining for my purpose & by  
any

the Assembly there in the best possible manner  
in promoting the objects that in view connected with the Protest  
in Geneva. that these considerations might blot out my apology  
in case that there should have been any irregularity in my not  
having acted <sup>s 4</sup> in view of the President, I received a polite note

in reply which I beg to inclose & which fully corroborated the very  
<sup>rx<sup>1</sup>^.</sup> favourable intelligence by Mr. Perceval in a letter to General  
Lundy whose first I was, while at Luchon that he would be rather  
gladly & that my very attention in <sup>JZ-^ jE-\*\*- . <0%e+.</sup> General had  
written to him upon the subject as the bank brought him the news of my  
intention to visit the city after my arrival we concluded at the  
Principality & I had an excellent opportunity of mentioning the  
subject

20

of Houlston to the ... he ... that last little ...  
 that was wanted about the Court. The General took opportunity of  
 suggesting that I might be permitted to see the Court and Managers  
 & the President must politely assure them that I proposed no  
 out which no doubt would be ... of the King's ...  
 offered a ... to send it ... I was ...  
 ... to them ... ... even during ...  
 ... as also my request for ... so did the ... & his Lady.  
 ... again ... without having seen  
 any thing I went away from ... in ...  
 ... the ... disappointment ...  
 ... as intended, & to this moment ...  
 ... to decide upon that point.

I forgot to mention above that it  
 might perhaps be ... with good effect if a  
 few ... like chambers were placed near the ...  
 ...

Botanical Garden

4<sup>th</sup> December 1920

My dear Sir,

I have at last again got down to the wheel of my car. My first work however from the bustle & worry of the wheel at this winter is at a height from the winter of 1919. All last week I was detained in the consequence of last night's being there preparatory to his departure. All this with the preparations necessary for my own voyage to be made in a very bad correspondent lately. Last night I had to take to penance your letter

^ : \*rj pg? y£  
I am sorry to hear of your annoyance from the neglect of the Post Office, a department which regularly requires to form. I was still more annoyed by

learn your disappointment at Lusk saw the  
cause of which I am like yourself  
wholly unable to conjecture. I was happy  
to hear of Mr. Walker's \*^v^ ^ ^ ^  
that was indeed a severe trial. I trust  
that she will be comfortably situated  
during your absence. I beg'd Mrs. Wood  
to interest her Sister Mrs. Lane in favor  
of Mr. Walker: tho' I am sure Mr. and  
Mrs. Lane would have rejoiced in  
indulgence of that kind. but would of  
their own accord be happy to show her  
every attention & civility in their power.  
I sent your Letter to Geo. H. Hardwick.  
I was much gratified by the perusal of  
them. Mr. J. Luffler was so good as to  
send me the Dutch little book. I presented  
therefore the copy you were so good as  
to send me to Geo. H. Hardwick of which  
I hope you will approve. Had he sent  
you any information about the  
Singular gyronter plant. Mr. J. tells me  
that it proves to be parasitical growing  
upon a species of cypripedium. also to be  
dichotomous & that they have discovered the  
male. Mr. J. calls it *Dicella Gyronteria*.  
which Luffler my son Henry of Boston  
the first appearance to me to be uncomfortable.  
I almost wish Mr. J. was here as Mr.  
Gover has announced his intention of

young women. We should have a Botanical  
in that direction. The character of  
Business is perhaps better adapted to  
the Dutch health. Capt. Jackson of the  
Keays 17<sup>th</sup> has applied for leave to  
go to a tour into the Sikkim Nepes  
country & should it be approved to send  
a person from the Garden & perhaps  
to him to collect plants. I may give  
the name of person upon this point and  
as to who could be sent if you approve  
the proposition. I think however Capt  
Li being allowed to go very doubtful  
my Brother's collection of Bulbs and  
seeds to me received in beautiful order  
the collection includes some American  
seeds & some English fruit trees. I have  
growing plants. The collection was made  
by a very skilful collector a Dr  
Hastings. but the poor man died suddenly  
before my Brother got them out of his  
hands. I shall have a copy of the  
list sent you. I had an excellent  
account of my Brother by the George 4<sup>th</sup>.  
I have done the seedful which the  
company has by the Hercules. I spoke  
to Lord Hastings about the Ballantrae  
- project and it is entirely approved.  
I already begin to think of making  
over charge to him. for Capt. Jackson tells

of leaving town by the 10<sup>th</sup> before the 5<sup>th</sup> January  
They offer by the same train to the  
Gardener whose garden I was very much  
pleased to be very interesting. I wish that  
I had a Skilful European Gardener  
to be kept the command of the  
production of Europe. I see by dear  
Mavis faithfully

W. H. M. M.

It just occurs to me that I never  
asked the additional expenses you  
were at about the Books for the hospital  
plants. Perhaps you had better send  
a letter to Mr. Bell for it.

I did not see Capt. Gyles  
in the paper saying from the  
other do not find that the  
has reached the Garden.

My dear Uncle

Had this morning the  
pleasure of receiving your  
letter of the 31 from Mully  
by which I perceive that  
you had, for a day or two <sup>postponed</sup>  
your journey towards us.

I hope however, that when  
you did arrive at Kyrwa,  
that you found all ready  
for you as to business etc.

**a ' ^ . 9 - M - \* < - ^** this week found  
**! - yt -** all ready at the edge  
of **' < ? U -** forest **• £ •** where an  
| both

be met by Phamut Day and  
Blunkworth who are both  
gone down as you decided  
some way, but end? I do  
it and I y. The former will  
be able to show you all the  
met with when he first  
came up tho the reason  
I fear is not the most favorable  
one for that tract of country  
- I'm with protestable in your  
way up, full on with D  
Cunder Schur who is going  
over to resume his office  
of Consul in Calcutta. &

If you should come in contact  
I shall be obliged if you will  
receive him well and show  
him some little attention.  
Helene indeed he is already  
an acquaintance of yours  
as I think you must have  
seen him at the garden

before much that you  
of Mrs. Wallcut and your  
children so well and I  
sincerely hope they will  
continue so. Your party  
from her - must I have  
have been painful, particularly

at the present time - but  
I trust they are somewhat  
relieved. & they will be  
very grateful for your  
kindness - when you  
write they will make  
my best regards to Mrs. Stanton  
& I hope we will take  
very good care of you!  
I am sorry to hear of the  
death of Mrs. Knapp of the  
I think you said you had  
written when at Niagara Falls.  
I do not know what

<?

this sad event.

Ask please and send  
down the two doilies for  
as we call them here dandies,  
to meet you at the window  
they are mere humbugs  
but you will find them  
useful & it was very  
negligent of me not to think  
of them before. I trust they  
will be in time.

You can of course come along  
or slow as you please &  
call when you like. I'm  
sure - (when you  
remember me) with best  
wishes

My dear Mother

Have this moment  
called of the 5<sup>th</sup> and have no  
time in writing to say that you  
had nearly made a great  
mistake in acknowledging  
the letters for your baggage  
at all times they are very  
scarce & at present, when  
the merchants employ all they  
can get, having they are not  
to be had - we never think  
of using them. except in very  
great numbers on particular  
occasions - & by the way

was very right in recommending  
Smt. Buzar <sup>the cause</sup> for engage  
at Legowlu on the Khatmando  
and if possible would advise  
submit them for grant also  
as I think it very doubtful  
whether you will be able to  
raise any at Belloundah.  
You dandris will go off  
tomorrow pass to be at  
Belloundah by the 13<sup>th</sup> and  
then receive the bullabram  
who will accompany them  
to see the baskets for  
you at Belloundah if he  
possibly

can - or if possible, I wish  
continue SC \*LJL and then down  
from hence with him - you  
do not say how many you  
will require for your team  
but ft^SJ suppose a dozen  
or more with /CC-,^\*\_/fcffS^^^CT^^  
for your and Robinsons -

Edward Snowden

Received of  
Edward Snowden  
the sum of  
£ 5 0 0  
on the 10th  
of June 1850

My dear Sir

I have been somewhat long in answering your Question respecting the plantation of trees in squares, but it is not easy to exhaust a subject of this kind & I am desirous of making my answer as complete & satisfactory as possible.

I shall begin by considering plantations in the form of squares & to render the subject more intelligible shall employ a proper figure plantations

See figures I. II. III. IV.

By inspecting these you will in the first place see that it is impossible to make them exact squares they will always be a little oblique viz you add an eight left hand Row more to AB, viz, cd, of the figure will become a little larger than a square. In the next place you will see that the proportion of the number of right & left hand Rows viz, -A I, ab, cd, of K. to the number of trees in AB varies & continually becomes greater as the number of trees increase.

To avoid ambiguity I shall, in these the following figures, call the line AB the Base & the line AC the side then you will see that if the number of trees on the base were not divided 7 then it is equal to the number of Rows. Thus if the number of trees on the Base be 3 the number of Rows is 3. If it be 6 the number of Rows is 6. But if it consist 7 and be left than 14 then the number of Rows is one greater. Thus if the number of trees on the base be 9 the number of Rows is 10 if it be 12 the number of Rows is 13. If the number of trees on the Base were 14 then the number of Rows is greater by two and so on. The first Rule being therefore, is having given the number of trees on the base to determine how many Rows there will be on a plantation whose form is a square as nearly as possible for this there is the following Rule. Divide the number of trees on the Base with 3 and multiply the remainder by 100. Divide the product by 170. Subtract the factors and add 1 to the Integer of the Quotient then the sum of the Quotient and Base is

For example. There are 9 trees in the Base at equal distances required the number of Rows in a plantation, as nearly as possible, of a square form. The double of 9 is 18, subtract 2 there remains 16 multiply by 100 the product is 1600. Divide by 173 the quotient is  $9\frac{2}{3}$  neglect the fraction  $\frac{2}{3}$  and add 4 to the Integer of the Quotient 9 and it is 13 which you see by the figure, is the number of Rows

Again there are 12 trees in the Base at equal distances required the number of Rows on the same conditions. The double of 12 is 24 subtract 2 there remains 22 multiplied by 100 and divide by 173 the result is  $12\frac{7}{173}$  neglect the fraction and add 4 to 12. There is 16 is the number of Rows as by the figure.

Again there are 100 trees in the Base required as before. Double 100 with 2 subtracted, is 198. This multiplied by 100 and divided by 173 is  $114\frac{2}{173}$  neglect the fraction, add 4 to 114 and there is 118 is the number of Rows.

This method answers provided the number of trees be not more than 10000. But if it amount to 1000, 10000, 100000 &c. then to avoid any mistake it will be necessary instead of multiplying by 100 and dividing by 173, to multiply by 10000 and divide by 173000. The rest of the calculation is the same.

Having determined the number of Rows the next question is to find the number of Trees in the whole plantation. For this the Rules are as follows. The number of rows is written down in bold.

I. If it be even multiply it by the number of trees in the Base and subtract from the product half the number of Rows. The remainder is the number of trees in the whole plantation.

II. If it be odd multiply it by the number of trees in the Base and subtract from the product half the number of Rows less 1. The remainder is the number of trees in the whole plantation.

For example let the number of trees in the Base be 4 and the number of Rows 10. Then since 10 is an even number multiply by 4 it becomes 40. Subtract the half of 10 which is 5 there remains 35 and that is the number of trees in the plantation as by the figure.

Again let the number of trees in the Base be 12 and consequently the number of Rows 16. Then since 16 is an even number multiply by 12 it becomes 192. Then 16 less 1 is 15 and the half of that is 8 from 192 subtract 8 there remains 184 and that is the number of trees in the plantation as by the figure.

B

Suppose a beehive well located  
20 trees placed on it

How many will it have of bees  
in your opinion? And is  
to say in a manner that the  
trees are equally good?

What will be the difference  
of 10000 bees to 10 placed  
in each way?

HAM

Myra & I hope  
will meet you tomorrow at  
Sheephead, the weather  
continues very cloudy, but  
I am sorry for my account  
it is worse too for the season  
but still hope it may clear  
up before you get to Chardispi.

Thank you for your letter of  
the 11<sup>th</sup>. Return me Lumber,  
letter to you which you were  
good enough to let me read  
I must be very grateful  
to you and hope you may  
be in pasting with your  
library as you wish. I am

of course as I mentioned before  
help yourself as you please  
to the fish & eatables as they  
keep you. and I am happy they  
should have fallen in your  
way at this time. I send  
the best wishes & regards  
to you before I get your letter  
I hope you will have received  
them & wish you a  
daily happy until you are  
you should not require beyond  
Chums assistance further than  
the town but may be able to  
back as he is engaged in forwarding  
upon me some supplies for  
which we are sunk in

want of a Purson the best  
secret with best quality  
to Robinson

your very humble

Edmund Robinson

London  
15 Dec 1820  
1940

way.  
lead and give P. signatures,  
I suppose from the thought road.  
An I had a message yesterday  
to say that they heard & wished  
been making some very collections  
%  
St. that you should not  
go too far in the jungles as  
bows & other instruments were  
6 in them for the destruction  
of tigers & t-s t ^ a St &\*-<\*. Cls  
you might possibly get s^ ju O  
them - they requested to know  
«\*-& £\*\*£& &/\* - ^ # O  
v ^\* 2\*\*\*  
^ y^  
4u y /r.  
appear to us. However  
they are of importance to

discussions but I wish to talk  
me the matter and the change  
Character of our friendship  
more when we meet. it is my  
vain to let them that you are  
not looking for a gathering flower  
if they cannot overcome their  
objection to having their country  
examined, as they conceive it.

As you expect to be here on  
the 21st I will send the Waltham  
out to Therakole to murrow  
Quincy. I shall hope to see  
you the next day. When I shall  
must take a long rest after  
my late labours. I give  
my love to Robert regarding

and something a other has  
evidently attracted their attention  
and caused their palms  
feelings. - I am glad however  
/V L. are so near & I think  
one had better not delay  
coming on - and in order  
clearly their ill-humour. I would  
recommend, you <sup>to always</sup> be  
as quiet as possible about your  
right sleep. to make a  
little noise as maybe of your  
parents but I think them  
of their little one  
their heads <sup>as</sup> dislike  
pursuits. they will sometimes  
rather manage to interrupt  
them: a lead us into unpleasant

is something - particularly when  
they are pleasant ones - but  
I must playe you a long  
time I shall have the pleasure  
of welcoming you soon  
you have read this - with  
my regards therefore to  
believe me with much  
sincerely  
Edward Gardner

This is a charming day for  
you - tho' it threatened to be  
rather thick in the morning  
I hope tomorrow will be clear!

but I must with no great honor  
to the contents, & as you will  
be well as do you have left  
each the things to be put in  
order by yourself when you  
arrive - The Country must  
look very brown & ugly - you  
after the verdure of Bengal,  
however do not suppose  
that this is always its  
hue. In March we shall  
be quite green & gay again  
as you will see  
I congratulate you on getting  
clear from Europe on the  
top of Cheisa-pauce! which

burst down the Phosphate  
Bin and must very soon  
such an accident should  
have happened. You have  
seen the place - I hope the  
bin contained nothing of  
very great consequence. For  
fear whatever it was, it  
must have been utterly  
destroyed in such a fall.  
The remainder of your things  
however seem to have  
come up in pretty good order  
except that the bears have  
managed to break one of  
your Earthen pots of tobacco.

Some make plants which I  
have seen do not give flowers  
in March & April - but  
among these mountains the  
climate differs every five  
miles - Many of the <sup>young</sup> plants  
have suffered from the frost  
I indeed know from  
experience that most of them  
will not live here, however  
true of this when we meet  
I can not hear from the  
Natives that the New-England  
firs were lost in the boat  
that was unfortunately  
sunk. I can not find out  
what package of yours has

very bleak place. I am quite  
glad you got a good view of  
the Kinnorah from Ches-  
-panee. and if you were in  
Sunnale for it - you would  
have a better one I think  
from Chandrigeri. The the  
evening is the best time &  
I hope you will go up the  
mountain. (which is a nice  
great bag from your side)  
to say after you arrived on  
the ground if you can easily  
return to Deciner. I am  
quite surprised at the plants  
being in flower. It can not be  
seasonable. February is generally  
the month for it about Chespanee.

My dear Wullich Newport

3  
This goes with the Elephant  
4  
John will be ready for you  
5  
at 11 o'clock tomorrow morning  
6  
and I hope will bring you safe  
7  
to the evening - I think  
8  
you would have been induced  
9  
to halt a day at Chilling  
10  
but I am sure you have  
11  
succeeded as well as you can  
12  
such manage - and you will  
13  
I am sure have to look about  
14  
you as it is - if it happened  
15  
I am sure you will have found  
16  
yourselves at some stage of your  
17  
journey - which is a high &

The paper you took from his  
thus and about which I  
have said he has written to  
me, told you it is a matter  
of consequence and that  
which is happy that it was  
present to you -

May the pleasure to return  
in the letter you were good  
enough to let me read from  
to the same and as I shall  
see you so soon I will put  
off all other matters till

then. I am most happy you  
are well passing accounts  
from Mrs. Smith & I hope

Respected Friend

Dr. Walback

I take the liberty of introducing  
to the acquaintance my friend Doctor Green  
this being who proposes embarking in the Ship  
Benjamin Rush Capt. Gordon for Calcutta.  
Any attention that you will show him in granting  
free access to your Botanic Garden will be gratefully  
acknowledged - Dr. Green is so kind as to take  
under his special care a box of such of our native  
plants as we could collect at this season at a  
very short notice, hoping some of them will be  
so fortunate under his protecting care as to arrive  
in safety and vegetate in your climate is the most  
sincere wish of  
Your friend

Rubens Haines

Mr. Wallack Esq

Superintendent of the

General and Botanic Garden

Doctor Green's Suburbs

Dr. Weyers  
Dec 26  
1831

Respected Sir,  
I have the pleasure of receiving your letter of the 10th inst. in relation to the plants which you have the honor to mention. I have the pleasure of assuring you that I have the honor to have the plants which you have the honor to mention. I have the pleasure of assuring you that I have the honor to have the plants which you have the honor to mention.

Probably we may send some that you desire to possess, but when we shall receive your catalogue we shall be able to avoid this error.

Should opportunity present we should be glad to receive any of your ~~more~~ rare mountainous plants most likely to succeed in this climate. We should be particularly pleased to be able to procure your *Rhododendrum coccineum*, *Azalea* *indica*, *Dillenia speciosa* & *Barringtonia speciosa*.

Doctor Green has kindly offered to take charge of the best plants in your garden & we will send them to you in your order.  
I remain very respectfully,  
Your obedient servant,  
Richard Harrison

P.S. Several herbaceous plants are buried in the  
box, the names of which we could not add to the cata-  
logue as they are not vegetating P.S.

P.P.S. if it be convenient send us the, *Guichenot carabae*  
or any of them

*Sullonia indicia*

*Eugenia alba*

*Sarcos cinnamomum*

*Myrtus peruviana*

*Sarcocolla inermis*

*Piper Nigro*

*medium*

F. Green  
Comptroller  
27 Dec 1820  
Dec 27 1820

My dear Sir

Having since my late  
message, Parcell's & others by whom  
I had a paper containing a  
list of names of persons, some  
of whom, I suppose, are together  
to attend, enclosing Parcell's  
writing to the Honorable  
Mr. Gales, as the above letter  
to the Honorable Secretary they  
may not be so much known  
in respect to the Honorable  
Secretary's name, I enclose  
Parcell's name, which you, as  
not a man, will very likely  
have seen, with the name of the  
other individuals to you at  
the Gales name, & I enclose.

i 14 n

i vs N 'S :

Remembering to say that I wish  
to see how many of the people  
mentioned in the sketch  
mentioned, I have still great  
considerable quantities of the  
same I wish to have written  
the sketches of the same in the  
return. I wish to have the  
of a volume the 15th of October  
in that case I will have  
then as long as the in the  
pages as the 9th of October  
in the sketch; I wish to see

and expedition dispatch home the articles which he may obtain  
for us.

We also hope for a further advantage from  
this communication with your Garden; we flatter ourselves, as  
our objects will be more distinctly known by this mission, that  
we shall in future receive from you, whenever favourable oppor-  
tunities occur, such articles as our Gardener will be able to  
point out as particularly desirable to us.

I almost fear, from what I have lately heard  
from my friend Mr. Colebrooke, that you may be absent  
from Calcutta on the arrival of the General Hyd. I have,  
in that case, directed Mr. Potts to request the Gentleman who  
may have the charge of the Garden in your absence, to open  
this Letter; and shall trust to his goodness to act for us in  
your stead.

I have the honour to be,

Sir,

Your very obedient Servant,

Joseph Sabine  
Secretary.

London

10, Abchurch Lane

10, Abchurch Lane, London,

y

28 December, 1820.

Sir,

In attending to the objects of our institution, it has occurred to the Council of this Society, that we should materially forward them by sending a confidential gentleman to Calcutta and China to collect such matters as would be serviceable to us, and a favourable opportunity having occurred of a passage - the bearer, Mr. John Potts, in the General Hyd. he is instructed, at his arrival at Calcutta, to apply to you for aid and assistance in the objects of his mission. He will show you his instructions, which will make it unnecessary for us to enter into a detail of particular matters which he is directed to attend to.

Well knowing your liberal and kind disposition, we main- tain your assistance in this affair, and more especially in pointing out how he can with the greatest certainty

Dr. Nathaniel Halliwell
