My dear Sir

28<sup>th</sup> Aug 22

I have great pleasure in acquainting you of having dispatched on the 4<sup>th</sup> & 5<sup>th</sup> Instant two parcels on Linnæi by Danish Sailing you address lately received from Mr. Malm-croft from Sweden **iLffi-** route. Last I had also the pleasure of forwarding one or two ~~parcels~~ from Berlin to you which reached me at the same time. I shall be happy to learn in time that you have received them and as I have frequent intercourse through means of the Danes in their services as Partakers with Sweden if you have occasion to write Mr. M. I shall be happy to forward you any letters you may interest to me for that purpose **^E^ &** I am **jr. -&\*-** Dear Sir  
 Since my last **St\*\*-\*** next want to mention I have little **^t^-\*a^^p^** and three days I have been parceling up a variety of seeds for you which shall be transmitted to you by the letter Danish. I have gathered a good **the last season & hope**

though I can add nothing new to the large col-  
-lection which you must have made during  
your long residence in Nepal they may  
prove acceptable

Although I have not yet heard of <sup>Z^SZ\*-^\*</sup>  
arrival at the Gardens I shall direct a parcel  
to you there till you command time to parcel  
me <sup>€^t ^t \*/\*</sup> a few lines. Being very considerably

agent of the Hoagly Establishment  
I frequent supplier of fresh Europe  
the vegetable seeds I shall take the  
liberty in return of forwarding in the  
usual way by saying a variety of the seeds  
I propose sending you for him under cover

to you <sup>a^ihfr\* \*ir</sup> reach you I shall feel  
very much <sup>#</sup> obliged by taking the trouble  
of having them delivered in safety to him.

I mention this in consequence of Mr B.  
acquainting me some time back that on your  
return he had to obtain your permission  
to the above effect & as I am of opinion that to  
promote all public establishments of this  
nature seeds should be sent on service I see little

my daily sounds came to you  
in concert with me on the spot.

Wm. A. B.

My dear Sir

Yours very faithfully  
Pat. Gerard

My dear Wallich

I have only time for a few

lines by the present occasion which you will

read. I write chiefly to mention that in a

letter from home of the 12<sup>th</sup> March last, my

mother mentions they have determined on taking

your boy as an inmate in their own family.

She says " We have determined to take charge

" of B<sup>r</sup> Wallich's boy, and you may assure his

" worthy father that we shall love & cherish

" the dear child as our own. We received lately

" a letter from his grandfather, who seems

" also most anxious that we should take

" the child, and says that either himself or

" one of his sons will come with him when

" they must part with "le cher enfant, le petit

" ange"; we are trying to revivify our French

" that we may be able to speak to them, for it

" seems they do not speak or write  $\text{£}\text{£}^{\wedge}\text{g}^{\wedge}\text{C}^{\wedge}\text{L}_f$

You have probably heard on the subject direct from my father long ago then, but if not, the above will seem more be satisfactory to you. — This family has been somewhat thinned lately, first by my sister's marriage, and secondly by the departure of my brother Robert, who has come out to India. They have been unfortunate in respect to him; he was to have had a writership and educated with that view, but the death of the friend who was to have given the appointment frustrated the plan, and after several unsuccessful efforts to provide for him, they at last determined on

sending him out to me to do the best I  
can for him. He arrived here about  
six weeks ago in the Porneo, which was the  
first intimation I had of the change of  
plan for him. I must now exert myself  
to do something for him, and have turned  
my views to Singapore as the best opening  
at present for commerce. Wottonford will  
afford whatever aid is in his power, and I  
have written to Callen, to see what credit they  
will give me on their houses to enable him  
to undertake commercial speculation. I at  
first intended to have kept him here with me,  
until Kowal came to Singapore, but afterwards  
thought it would be too late, and therefore  
determined on letting him go then at once. He  
left me on the 1<sup>st</sup> Inst for Batavia. —

This has been a year of misfortunes  
to me. Two of Mr. Wottonford's children

have died within the last fortnight; a scene  
& heavy affliction to them. Of four  
children, one only survives, and  
they have determined on sending them  
on home by the first opportunity.

It is a terrible sweep in one short year. It  
has been a most unhealthy season all  
together, but I hope the catalogue of  
Calamities is now closed. I shall be  
glad to hear from you by the next  
arrivals, which will probably leave  
Calcutta after your return & I

My best regards to Mr. Wallah. I believe  
I never say to Wallah  
Yours very truly

Dr. Wallcut

WMU K\* \

Dear Sir,  
I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the purchase of a copy of the "History of the State of New York" by Dr. Wallcut. I have the pleasure to inform you that a copy of the same has been forwarded to you by express of the 15th inst. and will reach you in due season. I have the honor to be, Sir, your obedient servant,  
J. M. Smith

I am much pleased by  
the success of your party  
to keep my friends -  
especially my friends -  
very much in mind  
I feel that you will be  
successful in your  
endeavors to keep  
the streets in  
order and the  
people in good  
order. I am  
very much  
pleased to hear  
of your success  
and I hope you  
will continue to  
be successful in  
all your  
endeavors.

Hit

My Dear Mr

of £ ~ me to introduce

you a very particular & worthy friend of  
mine, Mr. Austin Senior of the Duchy of  
Athole, who is directing his study to Botany  
and the pleasure of being acquainted with  
Doctor Wallis will I am sure be highly  
gratifying to him. I trust also Doctor Wallis  
will be pleased with an acquaintance with  
Mr. Austin & which from a long knowledge  
of him, am authorized in doing.

I have forwarded some Wilsonow for  
his study according to the best of my power  
but nothing can  
promote his wishes so effectually as an  
acquaintance with a Gentleman so  
preeminently distinguished in the Botanical  
world as Doctor Wallis to whom I shall  
feel particularly indebted for any attention  
he may have in his power to show my  
Friend.

Mr Justice begs her remembrance  
may be offered to a Gentleman she very  
often is reminded of when applying to  
the Bottle of Cayenne but you so kindly  
sent her by me when last had  
the pleasure of seeing you. We both  
offer our best wishes yourself. Mrs M  
& family are well.

Believe me

My Dear Sir

Yrs most truly

J. P. Mitchell

P.S. If at any time you send any  
specimens or any thing to England, I  
shall be most happy to do the needful  
in packing them & forwarding them as  
directed if you address them to our care

I got for my collection

Extract of a letter from J. Lloyd Esq  
Boston, N. America, to W. A. Loring  
Dated 2<sup>d</sup> June 1821 and 21<sup>st</sup> June 1821

"I wish I had of a copy for you for me the  
"West Indies I will have it taken care of and  
"trans. shipped to you - at present all the information  
"I have respecting it, from your letter - I know  
"of your former journals you mention...? ^ ^  
"and, the design of Dr Wallis to write one on some  
"subject connected with his historical researches  
"If he executed his intention, his letter has not reached  
"me and if it had, I could not individually have given  
"him the information on the object of his probable  
"inquiries, having not a doubt for your knowledge  
"of Botany. - The 3 last volumes, and the concluding part  
"of the series of the publication on Medical Botany  
"of which Christophers forwarded the earlier numbers  
"I send herewith, if the Science is not interesting to you  
"I have the goodness to present them to Dr Wallis with  
"my compliments, & also inform him, that all  
"probably would not satisfactorily reply to his Botanical  
"communications. I would with pleasure send them  
"I hope them over to the Author of the Works in question  
"who I am sure would with us desire to be  
"to be gratified by a correspondence with him on  
"his favourite science -"

10

C. Sutherland Esq<sup>r</sup>

Secretary of Government in the  
General Department

Sir,

I request that you will do me the honor to inform His Excellency the Most Noble the Governor General in Council, that I returned on the 9<sup>th</sup> Instant from the botanical expedition on which I have been employed, and that I have resumed charge of the Honble Company's Botanic Garden. A severe fever & which I had contracted on my way down to the Plains, and which confined me to the house of Dr. Glas at Bogalpa from the 29<sup>th</sup> November to the 20<sup>th</sup> Ultimo will explain the delay in my return.

The

The whole of my Establishment however arrived here about the 13<sup>th</sup> of October, which was the period limited by Government, and it affords me great pleasure to report, that their attention to their respective duties and general Conduct during the whole period in which they were employed on this Service was such, as to deserve my entire approbation.

2 It would be extremely difficult if not impossible for me in my present weak State, to lay a detailed account of my journey before His Lordship in Council; I hope therefore to be permitted to substitute the following Statement of my botanical harvest only, reserving for a future opportunity such other points, as may appear wanting to complete my report. Before proceeding I beg leave to say, and I do it with feelings of unbounded gratitude towards the Supreme Government that whole I acknowledge that but little

A. S. P.

Credit appertains to me for having reaped  
abundantly on a field, so richly prepared  
for the purpose by their Munificence, I  
rejoice that their very Consideration will  
authorize me to speak with freedom on  
the extent of my Collections and to venture  
to pronounce them as being at once worthy  
of the Government and of being presented  
by them to the Museum of the Bombees  
the Court <sup>j</sup> <sub>y</sub> Directors. The following then  
are the botanical Collections made by me  
chiefly in Nypaul, during my expectation  
and forwarded to <sup>M</sup> institution from  
time to time.

1<sup>st</sup> Dispatch consisting of 144 large baskets  
(commonly called Dhokas in Nypaul)  
filled with parasitical plants and  
Roots.

Received at the Garden the 18<sup>th</sup> February.

- 2<sup>d</sup> Dispatch 40 ditto ditto received the 15<sup>th</sup> March  
3<sup>d</sup> Dispatch 32 ditto ditto received the 29<sup>th</sup> March  
4<sup>th</sup> Dispatch 21 ditto ditto received the 11<sup>th</sup> April  
5<sup>th</sup> Dispatch 22 ditto ditto received the 14<sup>th</sup> April  
6<sup>th</sup> Dispatch 20 ditto ditto 10 large chests

of Specimens plants and Woods, Large  
trunk of Specimens of Plants, chiefly  
collected during my <sup>^fc- <><</sup> stay at Rymahl  
and Mongher. Received the 2<sup>d</sup> May.

7<sup>th</sup> Dispatch 22 baskets of Orchidaceous plants  
and roots <sup>l'~£ f & \*\*\*+\*, <jfy ^m^f Ssi/^u4\*\*6r £\*></sup>  
the 10<sup>th</sup> May.

8<sup>th</sup> Dispatch, 7 Chests of Specimens of Woods, a variety  
of seeds and <sup>y"\* & 'y£\*\*\* <tU\*£szz%!></sup>  
the 11<sup>th</sup> June.

9<sup>th</sup> Dispatch, 11 Chests of Specimens of Wood  
12 Boxes of Orchidaceous plants, 10 baskets of  
herbs and of roots, received the 30<sup>th</sup> June

10<sup>th</sup> Dispatch being the collection I brought  
down myself from Nepal viz

- a. 200 baskets of growing plants, natives  
of various parts of that Country.  
They are at this moment in the  
finest possible condition.
- b. 11 extremely large Chests of specimens  
of plants among which an extensive  
apartment of Himalayan Plants.
- c. 11 Chests of Specimens of Wood.
- d. 10 Chests containing upwards of One  
<sup>-s^<\*< tf^ufcP ^a\*</sup>  
hundred glass Squares with flowers  
and fruits preserved in Spirits.

To this belongs besides the  
psHwt/ « « a » great variety of Packages which  
will be found specified in the accompanying  
list of dispatches.

Finally, I have transmitted various  
various variety of roots, 4tfi, :i&» & \*6  
cuttings &c by each individual day's work  
(Littell and Murphy) as well as by my own  
private conveyance. The 1<sup>st</sup> %tfu^&  
of Nepal had the goodness to establish on my  
account from the 1<sup>st</sup> May after which no bill  
carrier can be persuaded to carry things down  
to the plains, to the end of July, when the  
heavy rains put a final stop to the forwarding  
of any large packages through the hills.

3. It affords me the most lively  
satisfaction to state that all these dispatches  
have safely arrived here, not a single article  
even the most trifling having t£\*\*+\*. \*£?/-  
Every one at all acquainted with the dangers  
and difficulties attending the conveyance of  
articles of any description much more so of an  
extent and nature such as those which Cha-  
racterised mine, will be able to form an  
idea of the obstacles which it has been my  
good fortune to surmount. The collections have  
been a :d\*£J&~f their respective places in  
the

the garden, and are in readiness for being examined  
and reported upon. Should Government deem ~~it~~  
it fit to nominate a Committee for that  
purpose.

Thus far I have only been alluding  
to that portion of the result of the expedition  
in question, a failure in which ~~indeed~~  
indeed have stamped my labours with disgrace  
since every thing had been so liberally and amply  
provided that could possibly tend to insure  
success. How far I have succeeded in those other  
parts, which more properly belong to my individual  
remarks it is not for me to judge, Still I venture  
to hope, that the indulgence of His Excellency in  
Council by which I have in so many instances  
benefitted, will also be extended to me on this  
occasion, and that I shall be thought  
deserving of some credit for having at least,  
endeavour'd well. In order to enable His  
Excellency to form an Opinion on this head I  
beg leave to transmit to you a bundle containing  
the following Materials, observing at the same time  
that a variety of detached descriptions, Miscellaneous  
enquiries and other papers which could not easily  
be arranged at present, but which when collected  
will form a considerable Aggregate are not sent,  
as being not essentially necessary for the object in view.

A. Twelve Volumes containing my descriptions  
of Nepal plants arranged according to  
the Natural Method besides one with  
those of doubtful affinity which on  
that account are inserted according  
to the Linnaean System.

B. Eight large folio fascicles containing 764  
drawings or a somewhat greater number  
of plants viz<sup>t</sup>

1 Fascicle containing	43 Drawings
2 <sup>d</sup> _____	40.
3 <sup>d</sup> _____	40.
4 <sup>th</sup> _____	44
5 <sup>th</sup> _____	40.
6 <sup>th</sup> _____	44
7 <sup>th</sup> _____	44
8 <sup>th</sup> _____	51.

Total 764

C. A descriptive Catalogue to the preceding  
drawings with one Index.

D. A descriptive Catalogue of 300 Sorts  
of Nepal Wood with an Index. I may  
leave to you, that the Collection  
referred to here, forms a very valuable  
part of the whole, each Specimen being  
of a very large size proportioned to the  
Magnitude

Magnitude of the Species of Tree  
or Shrub from which it was  
taken, and that all the  
Number exist in duplicate,  
triplicate, and even Multiplicate  
according to the established  
utility of the Word, & the pro-  
bability of its future Application  
to useful purposes, so that, besides  
being able to form an ample  
apartment for the Museum to  
the Baden House, I have it  
also in my power to submit  
Specimens of each sort to the  
trial of the Carpenter Ship  
builder &c.

E? A Catalogue with Index of the  
Collection of Spirits and flowers  
preserved in Spirits, referred  
to above (Part E) as also to  
all my other Remaining Collections.

These

language the obligations under which  
this institution as well as myself have  
been placed to you for transmission to the Honble  
the Court of Directors.

5 I beg leave to avail myself  
of this opportunity for doing justice to the  
important aid which I have derived  
throughout my stay in Nepal from the  
Resident, the Honble Edward Gardner  
Not only did that gentleman receive  
me and my travelling party with the  
utmost hospitality at the Residency, but  
it is to his unceasing exertions and  
valuable advice, and to his powerful

6 Court of Katmandoo  
that whatever success may have attended  
labours is in measure to be attributed. It would indeed be  
impossible for me to convey in adequate

£?

language

These Drawings and  
 Manuscripts shall with all practicable  
 dispatch be copied and presented  
 His Majesty's Commission of Public Affairs  
 during the last four years and  
 upwards, it is a subject I have  
 repeatedly had the honor on  
 former occasions to advert to  
 in my Public letters to you,  
 and is well known to His  
 Excellency the Governor General  
 It has also been diversely ap-  
 preciated in several literary  
 publications at Home. Nor  
 ought I to omit mentioning  
 that the said Drawings and  
 Manuscripts are now in the  
 possession of the  
 British Museum

gentleman to promote my researches in  
whatever manner he could do so consist-  
ently with certain objects he had in  
view, & otherwise to assist me  
by sending out people for the express  
purpose of collecting subjects of natural  
history, & by procuring these subjects  
that my researches were not hindered by  
prejudices which <sup>^^ o t \* . «^^2^</sup> existed on  
the part of the Government of Katchin  
most especially of the several orders to them do  
and unthoughtful an undertaking as  
that on which I was to be engaged in  
this Country notwithstanding that their  
permission for my visit had been  
previously obtained. With this aim  
I therefore immediately applied to the  
Resident for his advice & during the  
whole of my residence in the country  
I adhered implicitly to that plan of  
conduct which his well-known experience  
& judgment laid down for my guidance  
thus by a frank & unreserved disclosure  
of my proceedings soliciting rather  
than avoiding every enquiry into them  
I have had the happiness entirely to  
accomplish my wishes & I have on many  
occasions even derived benefit from  
the immediate cooperation of the  
Durbar. It is with peculiar satisfaction  
however that I request permission on  
the occasion of rendering a small  
tribute of gratitude to the Prime Minister  
Beecham who commonly called the General  
for the distinguished assistance & many  
acts of civilities which he has shown  
to me from the first day almost of  
my stay in Shigal to the very last. It  
was the constant endeavour of that  
gentleman

4

maintaining that  $V^{\wedge}$  ...  $**\sim f2^{\wedge}+vf^*-Z^*$  ...

(to be delivered by the 30<sup>th</sup> inst  
Wednesday week)

Calcutta Jan 24<sup>th</sup> 1822

My Dear Wallace

I ought to have written to you long ago on the subject of the enclosed but I was always in hopes that I should have met with you by some fortunate chance to explain the matter more fully — as I see no chance of doing so as I understand you seldom come to Calcutta I take to say you — Col. Cameron told me that the intervention of the Protestant <sup>missionary</sup> at Toluampore would be required to meet <sup>the</sup> <sup>requirements</sup> of the <sup>missionary</sup> <sup>at</sup> <sup>Toluampore</sup> allow me to interest you for the gentleman who writes the enclosed — I saw a great deal of him here & I have not met with a <sup>more</sup> <sup>intelligent</sup> <sup>man</sup> who appeared more <sup>intelligent</sup> <sup>than</sup> <sup>any</sup> <sup>other</sup> <sup>man</sup> <sup>whom</sup> <sup>I</sup> <sup>have</sup> <sup>seen</sup> <sup>in</sup> <sup>India</sup> <sup>to</sup> <sup>have</sup> <sup>had</sup> <sup>a</sup> <sup>better</sup> <sup>education</sup> <sup>or</sup> <sup>more</sup> <sup>intelligence</sup> <sup>in</sup> <sup>any</sup> <sup>way</sup> <sup>than</sup> <sup>he</sup> <sup>is</sup> — He tells a plain story of his requirements for the office and Mr. Finlayson also I saw him lately gave the most promising account of his zeal & industry on this point of the <sup>missionary</sup> <sup>at</sup> <sup>Toluampore</sup> —

24/22

It is therefore the Establishment to maintain  
it appears to me that he would do ample  
justice to the approbation and I sincerely  
hope you may be of the same opinion -

Yrs faithfully  
William Peipell

Dr Adam is very desirous of having some  
of the Medals recommended by Rayfair  
for trial at the Genl. Hospital we find some  
difficulty in getting supplies of the  
various Species could you oblige me  
by furnishing some W.R

W Peipell

1822

Extract

G. R. R. R.

Canopus  
22 January 1822

Some time since received a letter from Wood in which he  
 asked me by desire of William Russell whether I should like to go to  
 Patna to take charge of the Civil station & Botanical Garden  
 in that district. As I have long studied Botany from having secured my  
 apprenticeship to a lecturer on Botany I have pursued it as a amusement  
 ever since you may suppose therefore that I was quite delighted at the prospect  
 of studying it so large a tract from the vicinity of the station to the hills  
 Accordingly wrote to Mr Wood & Russell expressing how pleased I should  
 be to accept the situation as there was more than I was prepared since then  
 (now six weeks ago) I have not heard either from Russell or Wood I am  
 not aware whether I am likely to succeed or not but as from the d.  
 I fear that greater difficulties have occurred than were at first anticipated  
 I have therefore been thinking whether you would not perhaps be able to  
 assist Mr Wallich. Mr Wallich I perceive by today's paper has returned to Calcutta  
 on my first arrival. I believe you may perhaps remember took <sup>1</sup> <sup>2</sup> <sup>3</sup> <sup>4</sup> <sup>5</sup> <sup>6</sup> <sup>7</sup> <sup>8</sup> <sup>9</sup> <sup>10</sup> <sup>11</sup> <sup>12</sup> those of a Botanist but as soon as partial to Botany & indeed natural  
history in general there is no situation <sup>of the kind</sup> as my whole leisure  
is not to be commensurate <sup>if I wish</sup> would have <sup>truly</sup> for my making myself  
as useful as possible from fondness of the subject above inducing me  
to apply for it now that it has been proposed to me -

My dear Wallace

I hear you will not be off in two or three  
days yet and send you the above extract of a letter  
from from Mr. Lamy of St. Royle which explains it well.  
He came out to India two years ago and was particularly  
recommended to you by Mr. Lamy. If you can do anything  
for him in the way he proposes I am confident  
you will get an excellent collector of plants at  
Beharunpore and benefit the botanical science in  
general.

A pleasant trip!

Yours sincerely

W. Wallis

W. Grant 24<sup>th</sup> January 1822

My dear Mother

I had the pleasure of receiving  
yours yesterday, which I have been  
anxiously looking for for some  
time past & the account of your  
safe arrival at the glacier & in  
your letter of the 9<sup>th</sup> which Mrs  
Wentworth was so good as to forward  
and despatch on the 12<sup>th</sup> for  
which I must offer her my best  
thanks and acknowledgements &  
those you wish from her, and  
believe me. I am very glad indeed  
you have got home. Under any  
circumstances it is a most  
comfortable thing - but in your

Situation it was doubly desirable  
and with cordue mine to give  
complete security. I think than  
anything else. I'm well satisfied  
on the whole with your account  
of yourself - I'm cannot expect  
to be well all at once and as  
Lady Hastings says, an amendment  
to the Spectator must be slow &  
you can only regain your strength  
by degrees - but confidently trust  
you will make daily progress &  
get quite well again as soon as  
possible - I'm and Mrs. Walsley  
have certainly every reason to be  
really gratified by the very pointed  
and kind attentions of Lady Hastings.

I have read the letters you sent to  
me with great pleasure and  
admiration for the character and  
extreme kindness of the writers  
I am sure into your feelings on  
the occasion. and I do not feel  
little proud <sup>myself</sup> at the notice that  
you mention they were good enough  
to take of me. - Hope you did not  
forget to open my hearts & body  
bursters for the box of seeds the  
Lundy sent to me some time back  
if it escaped your prying members  
when you have an opportunity  
in the work that we are proud  
with justice  
I am your ever  
affectionate

that Nepal produce I have  
little to say in the way of business  
Old Shant Singh labours on his  
vacation as usual - & rather his  
labours have become lighter than  
they were - for he has no specimens  
for you these days, but he has been  
very industrious in the collecting of  
deeds as the numerous packages  
of the ink, which I am always  
buying for him, will witness.

Next you however the  
the barge - a box of - Birds  
all died. - They were not properly  
they made a fine show as to colour  
and if they have only an  
tolerable order they might perhaps

have been with the King of  
General Baidowick to whom  
they pay with make my best respects  
regards and what continues  
and you for him any thing that  
may please and think worth it.

1  
I hope you have seen Col  
Minner - he will be sure to  
be my letter that he would call  
upon you - would be most happy  
to procure the Cross for you on  
his return to Russia. What  
I hope you wish in due time receive  
them - and make your own better  
wherever you are. I like a very  
darker - you know me great  
way and we are going on just as  
usual. I have your one page of remembrance

back. Mr Kennedy's living room  
me and occupying your old  
apartment. but I am very  
tired he has been unwell ever  
since his arrival. <sup>his complaint is a kind of fever</sup> I had  
ended in a fever and agree that  
the continues to plague him - he  
fancies he contracted the morder  
coming up. Do you attribute your  
attack to our jungles and I have  
do you think it was owing to  
the cause? The rest of the  
I may say quite well. Some of us  
were sitting up till 2 o'clock this  
morning, after playing at Billiards  
(the table is new in my middle room)  
at 12. Had you a blue house too

been pulled down and is very  
ready up again. I have taken  
lodgings with Rogers till his new  
apartments are ready for him  
and Everett's house has also  
been pulled down. Not before long  
repaired and is getting built again  
on a rather enlarged plan with  
a flat roof. The architect  
have made a paper one across  
recommended in the Journal the  
other day to be both fire & water  
proof. I am sure myself as  
usual on the garden which  
I know I am always improving  
that is altering. I have two fine  
broad walks new and made other

amendments. He falls in  
of photos. more than usual  
the same Rapp and Madson  
more than anything else. We  
then wanted to put a gold  
copper to the top of Kasachet, of  
you remember such a place,  
which consequently is beginning  
to look very moist. We all took  
up the other day with the  
General - at his gulch in route  
to Matgoon - to see a very  
curious excavation the people  
had made here out of a black  
clay soil - with a descent to the  
bottom of a kind of geometrical  
hair-case - only it had steps but

"men weaned surface. The  
thing was made beautifully  
regular over <sup>and</sup> well worth seeing  
and understand it - not last day  
& some <sup>of</sup> our <sup>own</sup> the year past  
has fallen in. The clay excavated  
is used in the place of manure for  
the fields. I hope you may  
be able to see it - and now  
I think I have told you all that  
there is to tell - how many fine  
places have you built?"

"My friend A. Ogden once is really  
going to be married and with probably  
some become so before this teacher  
is. I suppose he is thinking of  
nothing else. In Kansas all the

to send me a horse that he has lately  
purchased for me - while he  
keeps tantalizing me by telling me  
what a pleasant delightful  
animal it is - and in the mean  
time all the fine weather for  
Edry is passing away

I conclude send Hastings with and  
think of going at any rate before the  
close of the year - but there must be  
many other changes about to take  
place - when you get your mail  
you must be as good as a gazette  
I must send all the news even  
a little-tattle and you must not  
expect any returns but thanks  
for you know there is nothing at

to let him know and because  
nothing to write about. - Don't  
ask the things you supposed to say  
of my smangther, he is dead. I  
am just going to Dupaluk from some  
young tree of nice oranges both  
for the sheep who get in love  
with the wild goat that you took  
down & I am going to send him a  
male & female & the latter I believe  
likely to increase the family. -  
What did General Hardwike say  
to you insects - write all  
admiration - all the birds &  
beasts I suppose will die next  
month or the month after. I am  
I am glad they got down so soon

been seen - have you seen the  
DD fishes that Dr. Hastings mentions  
in the letter to Prof. Karwowski having  
come from the Eastward? What  
are they like. Well really have  
nothing nice to tell you I don't  
know how I have managed to  
scribble so much. but you must  
make my best regards to  
apart to Mr. Wallick for the  
month the work was very good  
except the best work of  
your very sincerely

Edward H. Underhill

I return the letters from Dr. Hastings  
without keeping them a day. Hope you  
will get them safe

All these  
Coffee matters

My dear Walter

You make me blush  
after loading me with such  
treasures asking me of some  
the convenience to ask for  
more! - But where are the  
instructions for the treatment  
of Mordax in T? I have found  
in Salrymph Roxburgh  
notice of the revision T. but -

My Dear Charles

We must keep  
Raj, & Lockman, to his agreement  
but are you sure that he is bound  
for more than the dispatching of the  
Rance Surace Tank? That seems  
to have been done thoroughly at  
last. I am glad to hear from  
Cantor that the young lady is  
better to day. Is the receipt you  
sent to be cashed & kept here?  
In that case you should make

at "Ray. N. W." - or something  
of the sort - as a guide. I return  
it accordingly. You may suppose  
the letter written from the Parole as  
I am dead from the excessive  
heat - but still sincerely,  
Yours

J. Gordon

My dear General,

25th January  
1882.

April 28. Sunday 1892.

My dear brother

I have just got your letter of the 17<sup>th</sup>  
and am most happy to find you  
are mending & getting on apace. but  
\* \* \* \* \* it will be so long a  
time. I do not think I can receive  
you should let me to your friends  
about a sea voyage. The fewer  
you would rather avoid such  
an undertaking after having just  
completed your late address on  
I trust however you will be soon  
well on your legs again - and  
travelling then all - - Old Man  
has just been most indignant  
in the said way & you should see  
a parcel every day - but will  
if possible - continue this practice

and I have given him <sup>5</sup> directions  
about the safe seeds of the Palms  
or "Jugger". which he promises  
to send in quantity and as  
soon as possible - Thank you  
much for the seeds you have  
sent me which I will be kept  
to use in the beginning of my  
spring as you advise - Hope  
you had Moste Male - which  
I will spare them send a few more  
your nice bulbs & Purple <sup>costs</sup>  
these we planted when you were  
here are doing famously - a  
Hyalanth <sup>(I think it is)</sup> is in flower beautifully  
and others also. I had brought  
some of the costs in my work which  
they are flower in the glass over the

Jimmy piece - the "Arctopus  
chaatus" (which I think you said  
you did anything with you) is  
a full leaf very healthy apparently  
and I think you be surprised if  
I were to blow you - what all  
these things I am persuaded  
I will do much here - I have  
advised you diploma or  
degree - very much - it must  
be very flattering & gratifying  
to you & congratulate you  
in your honors - I have  
perhaps to Mr Kennedy who  
says it is all well - he says you  
think you is not yet quite that  
several expect to be some

hurry to that he wish all I fear  
I have seen must if I pause  
before the time will come when  
he must return to the rest of  
us are all very well. I often  
think of you & I am sure I always  
love & think best regards  
we have had a storm today  
& seen a awful was inclined  
now. he was something of the  
kind. as one has been  
particular since p: I hope  
I had come to the world  
ful hard work. I am very thin  
I feel well but he is so  
soon to lose him. I am with  
all the to him. I say in paper

catching her before he sails  
I have sent it to Hadjan that  
I may forward it to her - if  
it is gone. But H. is going to be  
named - & suppose thinks of nothing  
but if you see him don't tell him you got

My little - as I am  
anxious to see  
them get it - for

Just he tells me goes home  
in the same ship with her - I suppose  
he means the Crucifixion - for  
but for the date so Adieu  
I am my dear to all  
our love  
Edward Hudson

Dear My Dear Dear Sir  
I fully intend to pass a  
day, or part of one with you before  
I say goodbye to India for this  
time: if I can manage to do so to  
embark two days before the des-  
patch by the Princess Charlotte  
is closed, I can then have the  
additional delight of anchoring  
off your Ghant, & giving Mrs. K  
a share of my enjoyment - If that  
is impracticable I shall go alone.

Meanwhile let me beg of  
you

you **X** let me have a good store  
of seeds just **•/A** "7\*f<A—' — \*~m ^V , ^"  
you can give me some of the speci-  
mens of ferns, snappers &c. respecting  
which I trouble you, some months  
ago, you will greatly oblige me in  
favor.

Any seeds for P. Helms, which  
you may choose to send will be  
carefully delivered there.

We expect to leave this about  
the 16<sup>th</sup> of February.

I heard from your nephew  
;—Q this that you have paid  
pound

I truly hope you will, and that when  
I see you, I may witness a perfect rest  
in your heart, and all other happiness  
is sincerely wished you,  
By yours always I must be

shall be forthcoming to my debit (should be credit) in a few  
days

Patience Garden,  
30 January 1822

2&

Mr Gordon

I have found the scheme which I made  
out some years ago relative to our meditated plantation  
& on the following lines I have partly incorporated  
them with your statements partly or mostly pursuing  
them for what Mr J. Stewart who has been here for some  
days & has left me this morning thinks that the safest  
way for me would be to address Govt. stating candidly  
the support & assistance which the kindred of  
my friends would give me & thereby requesting  
their permission to engage in the undertaking -  
They would at once authorize me to do so from  
public motives which would enable me better to  
pursue the object. Thus every scruple that would  
possibly arise in my mind would be at once  
removed. Therefore more I apply for this permission  
it would be in the most short & general manner  
possible merely stating that I had the means &  
was desirous to make a trial - But to more  
important matters.

\* AA

Gordon's Calculators a little modified  
supposing 6 feet to be a proper distance between the  
plants each B would contain 44/4 say 44/4 & 1000 B 440000  
The lowest rate of produce would be 1 sh  
per Bush making a return in the whole plantation  
of 440000 sh - The least possible value of a man of  
Collier's estimate at which rate 100000 sh will amount  
to 176000

175000

Three years rent of 1000 Bats @ 5000

Salary on the first at 10% 5000  
Hedging at 4% per 100000 is for a  
circumference of 480,000 feet 4000  
15000

Annual Expense of Cultivation  
or labours of the Ground, plant.  
ing Labours etc 4000

Supt. Salary 3000  
The amount for three years for  
Cultivators 9000

total expenditure during the } 36000  
first three years }  
Clear Profit 140,000

Wm. D. G.

I now proceed to offer you some hints for your  
better judgment

1. The distance of 6 feet is, I suspect too short,  
prob. 8 ft. would not be too many. Extraordinary  
at be procure & it must be so  
without removing the risk of breaking the plants  
& this shade is to be had by intermixing the  
Coffea regularly with plantain, Pinacete or  
other similarly fit plants. Abundance of  
thick evergreen is necessary, foliage, quick growth,  
ready propagation & confined nourishment.  
these are the points to be kept in view

<\*\$£%.\*--

Wm. D. G.

with our selection of shading plants, ^, ^, ^ you must  
remember that Plantains are not the only  
ones, bananas the most desirable ones, some  
kind that I have not included their produce  
in the above estimation.

2<sup>d</sup> The Price for each Month is I think, a very  
low rate. I know of a Gentleman who p  
urchased in one Month, in 1817, from one Bay  
of the West Indies 1000 Bunches of the St. Joseph  
for Calcutta a quantity that yielded him  
5000 Rs!! Such a product would make five  
Lacs in 1000 Bunches, May be it would be a  
very handsome return.

3<sup>d</sup> I am not quite clear that 3 Years would  
be a sufficient time to expect a productive  
harvest - even at the shortest it would be  
perhaps the average period. One thousand  
500 Bunches of Ground would require an enor-  
mous number of Plants, only a comparatively  
small number can be dug, but the year  
from the Garden, or such dependance  
must be on the raising in a nursery attached  
to the Plantation itself from which  
I have to supply. But in feeding re<sup>f</sup> and  
2 years before it is transplanted to the ground  
I believe that 2 perhaps 3 years will prob-  
ably be requisite to make the Shrub grow large  
& flourishing - It must be recollecte<sup>d</sup> on  
the other hand that the annual expense  
would only be considerably the first 2 or 3  
Years

your experiments very little would I  
be required to keep up the plantation, which  
from the longevity of the C. Shrub would  
last among many years. Another consideration  
is the chance of heavy storms at all seasons,  
the greatest danger however to be apprehended  
from that source would exist in the being  
the flourishing of the plants. Calculating on  
all these points - (and there is that under  
taking which is exempt from Risks &  
Dangers) - a C. Plantation may be expected  
to yield from the 2<sup>d</sup> even more than of  
Shrub annually after the 4<sup>th</sup> or 5<sup>th</sup> year of its  
age -

4<sup>th</sup> Edging & enclosing This stands upon the  
the most important part of the undertak-  
ing as it forms also the most expensive  
item, it is that which makes the difference  
between your & my Hippocamp. It is the want  
of enclosure that has rendered innumerable  
otherwise plausible experiments & schemes  
of a singular nature, fruitless - & it is that  
which renders Indian Husbandry so infinitely  
inferior to that of Europe. I am almost  
opinion that 4000 R. under that head is too  
small a sum, at any rate the first outlay  
is all that needs being noticed. The subse-  
quent repairs come in for the least of  
cultivation -

5<sup>th</sup> I have not as yet been able to ascertain if a  
good

good quantity of ground can be had at this im-  
mediate vicinity. There is a man who talks of  
300 on the opposite side of desirable good land, at  
abt 2 M. S. B. York. A few days however will  
decide on this point. After all I think it  
would be much better were we to get the ground  
about Abingdon in that or exact where it  
would not seem to be deeper & better. Should  
be near enough to admit of any way meeting  
it often & it should not be confided to any  
man as deep as to do it well, or not  
perfectly trustworthy & perhaps might be  
implicitly away in structure. For obvious  
reasons (chiefly on acct. of the requisite ditch  
& hedge) an undivided lump of ground would  
be better than detached parcels, but in the  
event of the former not being procurable  
the latter should be ready to send after. I would  
therefore however I seem to get the whole  
ground in one lump.

And thus my dear Gordon I have  
given you all what I had to add to your  
very concise estimates, or to say it. That the  
Operation has a very great probability on  
its side cannot be denied. That it must  
succeed more or less to the Profit, is almost  
certain beyond a doubt. As to whether or  
not it will even be successful, but that  
charitably may injure even that the Crop  
A

if one Season but the plantation is not Subject  
like Cloves & Nutmegs to entire destruction,  
it will stand all these dangers & I do  
valent the succeeding Season may amply  
repay the Exp. May God then prosper their  
undertaking abundantly, may it become  
the rival of some other plantations  
abroad. There was a time when Cotton  
& Indigo were quite the reverse of Staples  
in this part of the world - May God reward  
you for putting me in the way of getting  
out of my Debt - a Debt that the warm  
hearted barons of my dear friends have  
rendered burdensome to me only because they  
have made it so unaccountable of light to me.  
It is unnecessary to say that all I can  
do shall be done - You know me too well  
to doubt of that - And I am advised, do  
let us have a conference <sup>any</sup> of these mornings,  
pray do on this interesting Subject. If you  
are as when will you be at Calcutta on  
the opposite Side. I'll come & breakfast  
or dine with you there.

Yours truly

Richard A. Wallis

I have perused your Sv to ...

Specify Tracts, if the Plantation is near  
the river, above all if it is well stated  
none will be required.

S

Do not answer this, I beg of you.

31<sup>st</sup> Jan<sup>y</sup> 1822.

My Dear Doctor

I cannot venture to express the grief I feel at your letter of yesterday, nor how much it intruded on me all the morning.

But for most important business in Calcutta, by appointment, and of a public nature, I should have gone down to you today to satisfy myself that you are not suffering any much, and only go, as a measure of just precaution, to the Sand heads.

Yours most devotedly, Julian

God

never pass into other hands, unless  
as you have directed portions of it,  
nor will I fail, I trust, during  
your absence.

Don't think, I repeat your  
inability to see an **«\*** **v\*#d!r:** led  
kindly intended. O believe me I  
would know all our drawings  
into **js^L\*** ruin, if I could thereby  
**V** add to our happiness & comfort  
**^**  
**^\*| \*A~J \*->^^-\*^y'** this **\*Ci^** wife.

**y£^** may meet somewhere  
on the River, and I hope in due  
time that I <sup>may</sup> witness your improvement,  
and **\*\*%&£&\J^ - V.^,,w-** good spirits, will  
induced

aided by my cheering to me. But  
but we should not, I must say  
that I shall ever remember the few, too  
few, happy days I have passed at the  
Garden with you, amongst the most  
agreeable of my life.

Be patient, and obedient to your  
medical advisers, and abstain from  
all employment, or application, that  
can exhaust you; you are far too valu-  
able a man to triffl with yourself.

You belong to the world, and I hope  
will enrich its scientific stores in  
your favourite line, as much as we  
you have at any time anticipated.

My best Compliments wait upon  
Mr. Welch - God bless you & protect  
you; this is one of the sincerest wishes  
of your most obliged & most faithfully  
Yours  
M. S. P.

Genl. Michals

1802  
Mr. Stuart  
100 E. 4th

My dear Sir,

I will remember  
to suggest an improvement  
to the editor of the paper  
you refer to. I would not  
omit the mention of  
your benighted friends,  
as a benighted society, which  
however it will be  
full by thousands, is not  
the best society, is not  
a ground upon which  
any thing can be built or  
a further improvement. It  
is a blot upon which I would  
prefer to see improvement  
that the paper would be

to be a per a spot at a  
distance from the Gender  
1. To ensure the suspension  
that the establishments  
of the Institution are  
to be in any way em-  
ployed in the Speculation  
After you explain it  
to me; but it will  
be as well to state it  
publicly. If you will  
send your letter with  
the enclosed I will  
write the President to  
the Board by a per at  
that you may not act  
upon my sole opinion -

Yrs Truly  
J. M. W. H.  
1<sup>st</sup> Feb 18

Central 4<sup>th</sup> Feb 1862

My dear Wallace

As it appears from what you  
conceive that it will be impossible to diminish  
Carpenter's position at once on a great scale we  
must be as frugal as we can in matters  
of expense more particularly where success  
is at all uncertain. So long as our plan  
is limited to £2000 per year the best  
policy we can think of offering a Superintendent  
will be a very considerable but not  
to the whole expense of the work. I would  
therefore propose to you that Mr. Chubb should  
be informed that his remuneration must be  
some degree reduced in the event of his being

As soon as a good soil shall be found  
upon the farm proceed to the extent of  
being able to send out a garden. From the  
time these labors commence he shall have a  
salary of £150 per annum which shall be increased

man who understands the farming interest of the country would probably form a more valuable member of the establishment.

As to the circumstances between ourselves I hope the following will meet your wishes.

All the expenses of the concern will be borne by me without any aid to you until the success or failure of the scheme be manifest. If you find it worth doing, which God forbid, we must abandon it.

My loss will be a small amount of your time. Should the result be favourable in the country you will have had a share in the profits & a decision to which you will be fully entitled for taking the whole case & supplying all the skill that will be required in the management.

There is still a contingency to be provided against in the chapter of accidents - and that is that one or other of us may die before the experiment is so far completed as to pay

It was expected of you a great deal - Should  
that be now let all that - only be ignorant  
to you & so is to find some one who will  
remember my entreaty of time up to the  
- your with you - Should you find in  
expecting such an accomplishment - my  
interest must be sold to the best of your  
- service - your being as judge &

A y ... <? .

/ Cy^fC — Vy--4^ <A

have the misfortune to be disappointed - you  
and your account of it shall - I shall  
mean to the best advantage we can of  
your Estate shall be advised with the  
help of any people that may be necessary  
on it - I should not wish to be obliged to  
carry on the speculation with a person independent  
- permit to me -

If these terms appear to you  
equitable you writing a line to that  
effect will be the satisfaction of binding me  
pity will of punishment of a measure of  
any - I shall be glad to hear of your  
- I shall be glad to hear of your

My dear Wallich

Nothing but unceasing applica-  
tion we have prevented my  
replying to yr former letter before  
& I have carried it ever since in  
my pocket for that purpose. Many  
thanks to you for the Book - I  
will send the Books & les plantes  
by a carriage to morrow by a carriage.  
On their reaching the boat you  
had better perhaps send the  
Boat to convey them over to  
prevent accidents - The Writer  
shall also go to morrow

I wish you much improvement  
by your trip & regret that I

occupied as I am & having those  
friends in the house, about to  
depart for England two days hence  
I cannot say so in person  
Would you oblige me by a piece of  
Letters for Mrs Bosanquet to take  
to England

Yours very sincerely

W. L. G. Weston

Dear Sir,

Dear Sir,

Many thanks for the  
papers. I suppose in the  
good account of your  
letter. I am interested  
well. It's much benefited  
by the work and further  
though I long to be on  
board. You can I imagine  
easily give me the order of  
reference in the order of  
reference in the order of  
reference at all personal  
to the Union - I have  
understood that Mr. Jones  
papers had been sent  
over. but will require  
you to be done perfectly  
right in sending the

unbound books to Hampton.

I trust you will get  
every thing you have  
from the same books.

Yrs Obedt

Wm. W. W.

51 E. Broadway

N.Y.

found myself joined some  
you are right. I am  
not more than I should be  
or frank as to make a  
comparison with you at all.

If you could not become a  
couple of months with out  
so little could I without  
for a number of the most  
serious than - so here is a  
final report - you are far  
I think - I with industry  
efficiency that has been my  
hopefully to be met in the  
mid - I hope I should be able  
not with out - show - at least  
will with in my reasonable  
But I am sure you  
6th Dec 1892

My dear Willid

I should have explained  
to you that I borrowed  
150 for a distance in the first  
instance from the King's  
journal not for my private  
travelling days - of the money  
I got for the museum as a  
reward for which you are the  
number to give - I have not  
brought the certificate for  
it but by enclosed are all the  
papers which I have to you  
much of I have no objection

The number of things I see  
 is also the number of  
 things I see in my  
 mind. I see things in my  
 mind that I never see in  
 the world. I see things in  
 my mind that I never see  
 in the world. I see things  
 in my mind that I never  
 see in the world. I see  
 things in my mind that I  
 never see in the world. I  
 see things in my mind that  
 I never see in the world.

There is a great  
 difference between the  
 things I see in my mind  
 and the things I see in  
 the world. I see things  
 in my mind that I never  
 see in the world. I see  
 things in my mind that I  
 never see in the world. I  
 see things in my mind that  
 I never see in the world.

My dear Walter

A lame hand has  
prevented my writing  
to you till now. I've  
now wrote with difficulty.

My fleet leaves this  
on the 12<sup>th</sup> follows on  
the 14<sup>th</sup> of this arrangement  
I have informed Robt Blakewell.

All your wishes as  
far as in me lies shall  
be most faithfully  
attended

attended to - God grant  
you may return to your  
Garden full of health  
to hear thus from  
yourself will afford me  
the highest satisfaction  
& if your worth prays  
it drop to the care of  
her that I only attend -  
Offer my very best respects  
to Mrs Wallack & with  
every best & kindest  
wishes Believe me  
very

my dear Walter  
ever most sincerely yours

A. B. Nichols

Ainant 22<sup>d</sup> February 1892

My dear Wm. L. G.

Wm. L. G. understanding it announced your  
intention of going to sea. I was  
very glad to receive your letter of  
the 8<sup>th</sup> and to see written in spirit  
and shows that your voyage is more  
a precautionary measure than  
anything else. I think it is a very  
wise one, and with I sincerely hope  
to establish you completely.  
Thank you for all the copies of  
the papers you sent to me  
the relating to your Republic  
travel etc. I have kept as you  
desired me. I am grateful for  
everything you have ever done for me

Satisfactory (with the exception  
of your health, which in the  
end I hope will not have suffered  
materially). I expected you would  
have been allowed to retain the  
table presents you took from the  
The party about which I have a  
valuable acquaintance was  
much as her presence pleased  
you that will induce you  
probably - (tho' you cannot ride  
just to Sanku as you say to -  
take a ride now and then in  
but I doubt if you  
will.

Mr. - /p^t<\_ Decline that paper  
has left us for a time but  
the reason of his going. He has

cracked by his hand  
some time since you wish see  
him no doubt in Calcutta  
Badger has sprained himself  
little which has kept him  
at home for some time. but  
it did not hinder his going  
to his job yesterday & part the  
day at Pokarna under the  
tree in the wood there very  
pleasant and cool it was  
a little damp (H) a little  
two or three days ago - he went  
out a day after our  
departure at the water fall  
and deepened the little  
pass in at the foot of it, into  
which I intend to put some

John-fish next time I will  
it, but I am getting very idle  
and don't know when that  
will be - Kennedy has quite  
recovered, I am glad to say, he  
accompanied us in the two  
excursions & talks of going to  
the top of the pon - but he has  
not much time left for these  
matters as he must leave us  
Friday on his return to Rotorua  
about the 10th of next month  
I have not heard since of any of  
Devere's leaving Coleridge and  
don't know when we may  
expect him, but it is common

\*&£6~\*&il\*t  
much later. I have not yet  
sent you plenty of  
the Palm seeds and a box  
of work of the Bangon  
kindry and all kinds of  
seeds with the dent as usual  
to do it. You have sent me  
an immense quantity of  
for which I am much obliged  
to you. I have not yet begun to  
use them as we have the  
road from a morning  
to the end of the  
month shall commence  
at the cost you help with  
me in my Capitally &

when you have any to spare  
from that perfect feather  
balls particularly. I have a  
fine one now just going to blow  
on my chimney piece. with fire beneath.  
Return me with many thanks  
the letter you sent me to read  
that Mrs. Hussey must have  
tailed, <sup>but</sup> **^t, ^<- fcg^&^t\*** <sup>here?</sup> <sup>called</sup>  
which I wrote to her, under cover  
to Hodges, to my good bye. he  
wrote me just left to his friend  
I for me shall regret her departure  
very much however I hope we shall  
meet again here or at home  
since I shall be a grand

little chance of complete recovery  
from his disease from what the  
Medicine says. If this reaches  
you in time you have an opportunity  
to see him a note to Kennedy  
& send him to New York  
at once - as he has a great  
idea that his barrier gate  
will succeed as his much  
good - "Chandy Chakor"  
Understand it very well - as far as  
ad expected to have had his  
the when you may remember  
there is going down immediately  
in hopes of seeing him. The fact  
has got to suffer every day!

Multra, Feb<sup>r</sup> 26<sup>th</sup> / 32.

My dear Sir

I heard the other Day that you had arrived at Calcutta, no doubt fully satisfied with your Nepal Mission. My last to you was dated, "Mhow May 26<sup>th</sup>" and directed to Calcutta; - ever since have I been expecting to hear from you. I arrived here with the Bat<sup>l</sup> to which I belong, on the 7<sup>th</sup> Inst<sup>l</sup> and the Day after had the Pleasure of again meeting with my Brother Bruce, on his Way to Mhow from Meerut, where he had been spending a Month or two with his Sisters and Mr. Sullop: On the 1<sup>st</sup> Proximo I also am going there, and for the same Purpose. I made some Remarks in my last to you, on the bad Prospects of this Branch of the Service, and am now more fully convinced of it; you will see by the Directory that I am of just the same standing in my Corps as when posted to it last Year. I have it had it seriously in Contemplation lately, of resigning this Service; or at any Rate of endeavouring to proceed home on a Years Leave of Absence, to try my Fortune there; if I could get posted to any of the irregular Battalions, viz. the Chumpran Light Infantry - Gurkha P. I. &c or be employed as an Assistant or Sub-Assistant to any one, or for any Cap. &c. I should be glad to quit the Service.

f^C / ^Az\*\*\*^/^^^rl\*^^

but it is a very dull unpleasant Line to <sup>one</sup> ~~me~~ who has  
ought to look to but Regimental Promotion. Mr. Sullob  
has proposed my settling with a Barrister at Calcutta, with  
whom he is well acquainted, and which he says, is a very  
promising Line. Do, my dear Sir, write me a short Let-  
ter, as soon as possible on Receipt of this, as it will then  
reach me when I am with Mr. S. at Meerut, thinking  
and deliberating on the Plan I ought to pursue; - if you  
can hold out to me the slightest Prospect concerning what  
I have above mentioned, it will in a great Measure form  
my Determination; - if not, your Advice will confer ad-  
ditional Obligations to those both ~~myself~~ <sup>already</sup> ~~our~~ Family  
and myself, <sup>and</sup> ~~and~~ you. There is but one Idea concerning me  
as 5<sup>th</sup> Lieut. which is - "choose some other Line before it is too  
late, excepting you have Hopes betwixt <sup>your</sup> those of remaining  
with a Regiment." Therefore excuse my being thus impatient.  
I will now drop this Subject, altho' it is one which weighs heavy  
on my Mind, and proceed to enquire after Mr. Wallish, hoping  
sincerely that she, as well as yourself, enjoy the same good  
Health, as when I had the Happiness of being with you.  
I forget the Name of your little Girl, <sup>then</sup>, you used to  
call her; however I hope she is as well and fat as ever, as well  
as your other little Macfarquhar. You must have found the  
- Paul, a glorious Country, particularly for Botany, and me.

...acious and valuable are I dare say the Results of your Labours  
there. Dr. Hare I see has come out again; he is not likely  
to trouble you <sup>any more</sup> again. I have not heard for a very  
long time from the Matherians; the two eldest Girls, you must  
have heard, are married; & their Husbands are I cannot  
imagine. As I am anxious to send this off by to Dr's Daughters  
I will remain, Dear Dr.

Yours very sincerely  
James Roxburgh.

P.S. Pay direct to me at Mattra, for should I be at  
y / i-w-&f %€ A\*\*\*\*\* edentely forwarded.

\* M. Roxburgh's notes was a sister of Mrs  
Matherian's (perhaps I know well in fact  
in head Master of the Free School there)

Pa

My dear Sir I saw the Mr. Anderson on  
 Tuesday who gave me notice of  
 my return Home - and I have regretted  
 exceedingly that I have unavoidably put  
 off my visit to the Gardens - for I long to  
 have as full proof of your having benefited  
 by the Change - Our Practice closes with the  
 present Week - and I am determined to become  
 a more idle Soldier - and escape as much drudgery  
 of Military Duty as may be possible without  
 neglecting essentials. - I am at present rather  
 in doubt whether my visit next Week must  
 be to the pore or to the Bot. Garden - inclination  
 points both - and I may be able to answer  
 this point decidedly after Saturday. - In the  
 mean time write me a short No. of you  
 are well - and that Mrs. Wallcut and Hannah  
 are as you could wish them to be.  
 I return you  
 Yrs  
 I hope we will long be

to continue it on so liberal a scale - there  
must be a deficiency of Subscribers to so  
Expensive a Work.

I have never performed  
my promise to send the Marquess of  
Londonderry a small parcel of Nepal  
Seeds. I expect Capt. Weldon of the Madras  
to dine with me at Dum Dum on Sunday  
and it would be a fine opportunity to get  
a small parcel of a few ounces conveyed.  
I am anxious to establish an Interest in  
Quarter - which before your Son George is  
18 - may be turned to his Advantage. The  
request for Seeds - came to me through Capt.  
Kennedy - now Stationed at Sebatson - who  
is Related to the Marquis of Londonderry -  
and I want that you and Capt. Kennedy  
should establish a Correspondence - for  
he may send you Seeds you have not got  
and me Birds & Insects. I have not seen  
the latter after your Harveas is Mr.

Believe me - I have visitors just  
today in - and can only say  
kind regards to Mrs. Mellich  
and thank you  
Ever sincerely yours

Thos. Mellich

Distri\* alion  
de  
Graines.

Monsieur le Directeur

Vous trouverez ci-joint une parcelle de Dros - esp\*<sup>1</sup> - 2  
Semences de notre dernière récolte. Elles appartiennent à des  
Végétaux qui me semblent manquer à votre collection et qui méritent d'y  
être introduits, tant pour son complément que pour leur rareté ou  
leur usage. Je désire que ces <sup>•Jk</sup> semences vous parviennent en bon  
état et qu'il vous <sup>A\*r</sup> utile et agréable.

Pour éviter les doubles emplois j'aurais <sup>,,,^</sup> hâte de  
recevoir de vous, Monsieur, une liste <sup>de</sup> vos  
P\* <sup>\*\*\*\*</sup> végétaux à la fin de 1822, en m'envoyant <sup>\*\*f</sup> votre catalogue  
1% <sup>'?\*</sup> <sup>\*\*y?\*</sup> <sup>l'envoi</sup>.

Je <sup>/mm\*</sup> me une liste de mes desiderata : Je vous prouver  
sans peine quelques unes des graines qu'elle contient. J'aurai  
beaucoup de plaisir à la tenir de <sup>vrr</sup> <sup>..</sup> <sup>v>k</sup> <sup>..</sup> témoignage  
de reconnaissance.

M<sup>te</sup> Ce sera avec plaisir que je vous prie  
de m. la copie de votre liste  
de la Société pendant la traversée à Monsieur le Sur-Intendant,  
à vous avec quelques copies à envoyer au  
Museum et l'on s'en chargera volontiers

Mes très affectueux amitiés

*J. B. de Lamarck*

15 March 1822

and am my  
self from the  
English shore  
of that year.

Lundi le 15 Mars 1772.

A Monsieur le Directeur du Jardin Botanique  
à Calcutta.

Monsieur

Je prends la liberté de m'adresser à vous, Monsieur, pour vous adresser l'explication que vous m'avez envoyée de la Botanique, vous m'avez bien voulu me secourir dans mon projet de m'entretenir en relation avec vous, et de m'acquiescer à votre famille la connaissance de la culture des plantes exotiques les plus estimées. Je profite d'une occasion favorable, pour solliciter de votre complaisance, l'envoi à mon adresse, ou à celle de Monsieur Sagniere & Co de Bordeaux, des Semences des plantes indiquées sur la nomenclature ci jointe; vous m'obligerez infiniment de soigner cette affaire au mieux; quoique je sache que vous êtes suffisamment instruit de la manière dont se fait une pareille expédition, vous me permettez de vous dire, que les graines doivent être mises dans du sable très sec: que la qualité du sable doit être fraîche & forte, ainsi que bien conservée; que les plantes dont il est parlé à la suite de la liste, doivent également se trouver dans du sable très sec: qu'on doit en avoir une grande quantité & que la cause dans laquelle il vous

plaira m' »/tmA^t -\*£. f&&?~^ ~,-  
soit en ferblanc, afin que le bois ne puisse pas être rongé  
par les rats, ce qui détruirait toute la collection, comme  
cela est arrivé dernièrement.

Si ma correspondance peut par contre vous  
être agréable, comme je l'espère, je vous fais l'offre  
d'honneur, de vous expédier sans la moindre rétribution,  
c'est-à-dire, sans aucune fraie de votre part, toutes  
les graines des plantes de notre pays & de tout le  
nord: je me prépare déjà à les recueillir & à cet  
effet, il vous plaira de m'envoyer une note des  
plantes qui vous manquent, ou qui sont rares  
dans vos contrées.

/& es préférer\*!> !?-c\*!< Stru, Monneur,  
de m'envoyer le catalogue de toutes les plantes communes  
dans votre immense jardin: dans ce cas, je pourrais  
vous celle f \*f\* < y \*77 manquant & je vous promets qu'assité  
la réception de cette pièce, je vous adresserai, comme  
je viens de le dire, les semences des plantes inconnues  
chez vous.

C'est avec infiniment de plaisir que  
je ^j^^ voudrai de pouvoir vous être utile & dans la  
persuasion que par un désir réciproque, vous prendrez  
à cœur de satisfaire à la demande de celui qui  
à l'honneur de vous saluer avec une considération  
distinguée

J. Gonthyne  
à Gand - Pays-Bas.  
C. par la voie de Londres, ou  
M. Pagniere d. P. de Bordeaux

W<sup>th</sup> ...

It is this 15<sup>th</sup> March 1822.

To the Director of the Botanical Garden at Calcutta.

Sir

I am so free as to apply to you, in order to obtain from your kindness, that you would be favourable to my purpose, leaving to open with you a correspondence mutually useful & agreeable, and that might render famous <sup>r\* r // \*/r</sup> Country, the cultivation of <sup>cjr</sup> one plant.

I make use of a good opportunity to <sup>Vi \* / j;</sup> a <sup>fr, vive</sup> I regret not to have been executable till now: it consists to obtain from you, <sup>South m\*-r\*</sup>, <sup>#fr <JTJ\*\* t</sup> either to me or to <sup>Per trn /</sup> <sup>Love & C<sup>o</sup></sup> at Bourcaup, the seeds of all the plants, whose names you will find on a list joined to this present <sup>tf-</sup>; I recommend to you to take the greatest attention by the sending, <sup>Y~ f''</sup>, because I consider it as a very precious collection, and notwithstanding I know enough you are sufficiently acquainted with the precautions required in such a case, I beg leave to remark that the seeds are to be put in dry sand; that their quality should be new, good and well preserved; and that the onion of the plants mention'd at the end of the list, will <sup>A</sup> <sup>^</sup> be well preserved, when laid also in dry dry sand: I desire then on your great and <sup>fftr jf-j.fr</sup> quality: <sup>??\*\*</sup> I wish to have the <sup>is</sup> in which the seeds and onions will be sent; doubled in iron, in order the collection could not be incamaginated <sup>with</sup> <sup>of</sup>, so as happened recent <sup>^</sup> . . .

If my correspondence can be useful due right to you, Gentleman, it will be with the utmost desire that I will send to you, without the least expense

your account all the seeds of the plants, not only of  
your country, but also of the northern parts, and in  
order to be enabled to do it with convenience, I am al-  
ways ready to buy with the required disposition and means to it.

When, so as I hope, my proposition is agreed, then  
you will favor me with a list designating those plants  
of which you like to obtain the seeds, for which you  
are in your country.

It would be more preferable, I think, that you would  
send me a catalogue of all the plants cultivated and  
known in your immense & precious garden: then, and as  
soon as I receive it, with the greatest pleasure, you  
may depend on my sending to you all the seeds  
of those plants unknown to you, at the above said  
conditions, I mean at my own expenses.

In the expectation that my desire shall be  
agreed, and wishing as much to be useful to you, as  
to obtain a proof of your kindness, I have the  
honour to remain with the highest consideration

Your most V<sup>l</sup> Serv<sup>t</sup>

and under  
Dupl. of the letter

Nipmuc 20<sup>th</sup> March 1822

My dear W. Wick  
I was very glad to learn from  
Mr Allen from on board the  
Pell Schooner of the 1<sup>st</sup> that  
the cruise had been beneficial  
to you and that you had a very  
prosperous return with  
restored health. I hope you are  
back before this or there 2 or 3  
nocturnal gales will be blowing  
you about off the land. Lead  
at no pleasant rate - much  
times I think it is better to be  
ashore - you were in luck  
in meeting so many of your friends

at sea. I should have liked  
much to have taken a favourable  
share of the hand of God's mercies  
and succors. but I hope the former  
got a letter from me before he  
sailed. I was not aware before  
I got your letter of the calamities  
which had befallen Adam  
& not very desirous to hear them  
for there lives not a worthier  
man or one whose welfare  
I should more  
rejoice in. but I was all  
you know I should be meet  
with these trials now and  
then. I must learn to bear with

them. I have set an enquiry  
afoot about the Crystals  
which were brought to you for  
sale when here. I have not yet  
found them - but I can say  
that the Crystal, <sup>one</sup> at least,  
and they purchase the  
older that work purchase  
(I believe I can furnish as  
cheap as magnets & that I have  
real pleasure in forwarding  
to you the same - advising you  
the little matter here which  
I may wish  
I have my answers to send  
on all the heads he has called

"I have made a list of  
the captured the towing of  
the boats etc. & hope the list  
of them - for I could hardly trust  
my people. I am very glad  
to hear of your two men <sup>who</sup>  
you work Marescot. & that  
Huntworth and the other were  
have been swept under  
Olyntown's wing - I suppose  
he would be getting a nursery  
of his own soon.

"Rodger & Robinson are my  
only companions now and  
they are both well - I was  
left as on the 7<sup>th</sup> I think of this.

month - and I've not  
yet arrived - indeed I believe  
to be only just now setting off  
from Calcutta - Rogers,

you know before - with his  
my towards you. I have  
for Helene as Patna  
I have been gone, <sup>from us</sup> <sup>" \* \*</sup>  
L6 /LC~ <sup><ZJS--</sup>

There is nothing else to tell  
you about just now, except  
that we are beginning to  
see green <sup>Z-^~2</sup>

breed <sup>J!^\*~^£-</sup> and  
delightful - and the old  
y <sup>-<\$££.</sup>

y,

you forgot to take down  
 me for your tank at the funder,  
 I'm sure. Let Hadger, if you  
 could see him, that he have  
 to arrived all last, that  
 he sent up for me, but rather  
 thin sort of condition and  
 as he wiped a Nalband and  
 some people sent to breakfast  
 up, he has arrived home in  
 one of his hand legs but I  
 hope he will get over it.  
 How does Hadger get in -  
 now, tell me of your happy  
 week's marriage

^ ^W\*-' , 4^

I have not heard much from  
her. Think Mrs Walker  
was very prudent to leave you  
I return to the Duke - May  
& C£{ 10 in my best respects  
to your hardware to  
I have no news, - if you never  
send me any - Believe  
me yours very sincerely

Edward Pearce

The kind friend of Mr. Pearce  
I am sorry to say has not  
come up and I almost despair  
of their doing so now - However  
I hope by their being away the

Monday March 21<sup>st</sup> 1793.

My dear Sir

Your welcome letter came  
 to hand last night; as it is nearly on your yet to break  
 fast time, I cannot do better than answer in haste, while  
 I'm suspicious no sooner, altho' I do not intend sleep, altho' I  
 will till my Original subscription I was going, in the  
 first Place, that you should not mistake the person of  
 addressing me as "Dear James", since the Feeling of the  
 Attachment which you confer yourself to confer upon your  
 Father's Son, would alone render that unnecessary, as  
 friends of the Intimacy, which has personally existed be-  
 tween us; you must excuse my talking like an Old Man.  
 You ask me what in the Name of the Attachment could it in-  
 duce you to think of quitting the Red Coat &c &c - all these  
 after being six Years an Ensign, the Pleasure of being an Ensign  
 more, after being six Years an Ensign, the Pleasure of being  
 eighteen Years a Captain, the Pleasure of being a Colonel, the  
 Army now is, the Certainty a Captain, and if you find  
 it correct, you will perhaps change your Mind. It is true  
 that I am giving up a Certainty; but what do I subject  
 myself to for that Certainty, & shackled by Rules & Regulations,

i

\*jf\* <((\*) > ' - > ^

L^fJ

The present Affair in Calcutta is more serious than I am: I cannot change much for the worse. The being Subject to another's Will, and liable to be sent knows where, = \*^~ < \*f^, ^Azc \*^g-^eL^&z.

\_v£\*\*£.

I have been in Calcutta for 300 Rupees for Months, I am of having given my Reasons for wishing to resign, I have spent those for wishing to become an Attorney's apprentice, was Mr. Dulla's particular recommendation, who offered to have settled with a Gentleman (an Attorney's Clerk) who after a very few days, has left Calcutta, and a gain, I should be settled, and my Society of my kind Friends, amongst the friends of whom I should hold to be good. I. who! \*tttT. V\* ^^r^ -\*£\*^V ^ ^ A

VI

4+\*\*^

7ky^

\*tttT. V\* ^^r^ -\*£\*^V ^ ^ A

I am to do something for one, whereas now, even to the distance of, I or they are hardly ever thought of. I have no doubt that the British are very much at Calcutta, but the Attorneys (the one I am thinking of) I understand are limited by Government. I am fully aware that my succession in the Case, depends entirely on my own Caprice; and that there

gives pretty extensive Connections; but this, I flatter myself  
to show as well as they. Do not let me, my dear Sir,  
of my running headlong into Uncertainty; Mr. Fuller has  
written to Mr. Templeton, the Gentleman I alluded to a-  
bove, to ask his Opinion; if he gives a favorable one, you  
will admit surely that there is no harm in applying for  
six Months Leave of Absence to proceed to Calcutta, when  
I can personally consult my Friends, and make a final  
Determination. What do you think of my going home  
and setting up for a Surgeon; if I should not be able to  
get an Assistant Surgeon Ship for this Country, I might  
have others at home; it is as scientific Independent

I am now about to start for Muttra again and  
hardly say how happy I have been here.

Muttra, April 2<sup>d</sup> I arrived here on the 31<sup>st</sup> and now  
I heard from Col. Sumley  
and he does not seem at all sorry to leave  
the Service, indeed every one has  
least Chance of succeeding in any other Line  
I think that I am very anxious to make my Fortune sooner  
than any one else. Most of the young Men who now enter  
the Army, have time to think what they are about, until  
after a Year or two's Service; and I know that numbers  
even after two or three times that Length of Service, do not  
hesitate a Moment to embrace any other Profession  
if they had means to set themselves a going.

Amongst the best that Mr. Wallcut and your little ones  
all quite well. I hope you have recovered from your  
illness. I hope you found the garden in good order  
and the Disposition in Nepal, will add greatly  
to them. It is a theory, seems to want of books, and  
nothing, I have mastered progress every late, but nevertheless

and I have a number of books  
sent by Mr. Wallcut  
I hope you will find them useful  
I am very glad to hear of your  
progress and hope you will  
continue to improve  
I am your friend  
James Rosburg

SEN

wish for nothing more than to do so. <sup>April</sup> ~~March~~ 14<sup>th</sup> I have  
been long enough about this now — The kindness & frankness  
of your letter, which I intend keeping, has given me great  
Pleasure — I beg offer my kind Remembrance to Mr. Wallcut,  
not forgetting little Hannah, and believe me to be, Dear D,  
Yours very sincerely James Rosburg.

25 March 1822

Botanic Garden Liverpool

Dear Sir

It is now a long time since I had the  
 pleasure of hearing from you, but Trust by  
 this you may be returned in safety with a rich  
 harvest the Fruits of your Labor in that  
 unknown Country, indeed I have no doubt but  
 that it has been abundant, Our Friend Mr  
 Ockelton whom is commencing out to Calcutta  
 to join the Honour Messrs Wills & Co, has offered  
 to take charge of a small Packet of seed for  
 you that some of them may be acceptable

~~of~~ our  
 ox of seeds forwarded in Nov<sup>r</sup> last which  
 were all fresh selected and hope they will succeed  
 well with you, have you any thing new  
 in Scitamina the are a beautiful tribe of

of Plants and we are very anxious to increase  
our Collection should it be in your power to help us  
and either with Plants or seeds, we find all  
seeds sent in the Capsule or any kind of  
fruit the seeds to remain in the fruit, those  
that come in that way vegetate the best;  
in hopes of hearing from you at your leisure

mon cher monsieur

n'ayant pas dans ma bibliothèque la zoologie de Shaw  
ou Pennant que j'aurais besoin de consulter, vous  
m'obligeriez infiniment, si vous vouliez bien me faire  
copier par un de vos écrivains un petit article de 200 Uo^.  
20 lignes inséré dans l'un de ces deux ouvrages.  
Il s'agit de la description d'un oiseau de Pallar  
qui semble être celui que vous avez rapporté du  
Népal. J'ai lu chez le g<sup>al</sup>. Hardwicke; mais  
j'ai oublié le nom et la description rapportée  
par Pennant ou Shaw. vous m'en rendriez un  
double service, en voulant bien m'envoyer cette petite  
copie le plutôt possible.

Croyez, mon cher monsieur, V<sup>o</sup> assurance  
de ma parfaite considération

Chhatta 5<sup>th</sup> April 1902

My dear Mr. h. c. I

I this morning only come to a final settlement with Rajib Lakshmi Roy - of Mr. ... may please ... to be ... to have a ... in 20 years - For many ... but it is right the application to ... should be ... with ... name ... of ... I think ... of ... of ... the letter you have got from Government ... of your ... of Government you

being not time in writing it out the  
following are the particulars  
Quantity of Land 500 Bheegans  
Annual Rent one Rupee & a half per Bheega  
Term of Lease - One year - renewable for 20 years  
Situation

Village Ramachowpoo  
Taluk - of the same name  
District - Chundabona

Let to - K. G. G. G.

Leasor - Rammachowpoo Ray  
Partor - Rajabachowpoo Ray

Purpose upon which cultivation of coffee -

500 Bheegans is rather too little  
but the land is ~~good~~ <sup>good</sup> which we get  
presently will enable us to pay handsome  
for good ground on which to extend the  
cultivation when we shall require it.

It is possible for some particularly  
consideration of what you will see in the  
in the subject of improving the plant in the  
accompanying book - when you will see  
might have generally share in necessary for  
of the best parts of the world.

It is not for the stormy weather  
I should go down to you this morning  
but my regard for N. P. induces me to  
part of the Museum of water specimens for  
the present. I hope tomorrow the weather  
will be fair - in which case I shall certainly  
goe with you at breakfast on Sunday  
morning -

I have <sup><S, VI. I. ^</sup> told you that  
you must direct Shanty's to be paid.  
The 2000 seedlings of *Stomoxys* are  
kindness of which in so short a time  
but sometimes when there are not  
planting by and only my 50 *Stomoxys*  
of all these. July

Yours truly  
G. G. D. D.

Nipmut 11<sup>th</sup> April 1892.

My dear Wallich

I give you a thousand thanks  
for the fine bulbs and roots  
that you were good enough to  
send me and which reached  
me with your letter of the 29<sup>th</sup>  
yesterday - many of the roots  
were in a state of vegetation  
and I have great hopes all  
will live and thrive, I have  
put the whole in pots - with the  
exception of three or four that  
I have placed on slabs over  
my Chimney-piece where I

Platan myself the seeds <sup>flowers</sup>  
and you shall know about  
them when they do. - Most  
of the Copenhagen seeds, of  
which you sent me such a  
ample supply, have come up  
and I think very few, if any,  
will fail. - Harvesting  
has commenced upon the  
of the beds <sup>and</sup> <sup>plants</sup> <sup>of</sup> <sup>the</sup> <sup>beds</sup> <sup>and</sup> <sup>plants</sup>  
between 10 and 12  
have already been sent <sup>in</sup> <sup>to</sup> <sup>the</sup> <sup>beds</sup>  
of the <sup>and</sup> <sup>plants</sup> <sup>of</sup> <sup>the</sup> <sup>beds</sup> <sup>and</sup> <sup>plants</sup>  
number <sup>of</sup> <sup>the</sup> <sup>beds</sup> <sup>and</sup> <sup>plants</sup> <sup>of</sup> <sup>the</sup> <sup>beds</sup> <sup>and</sup> <sup>plants</sup>  
Bromo Chum shall have

£}

J2

&&--^4\*—#

Now to forward the able  
to you a boat - What is  
a "Fazetta" (one of the most good  
sent me) like? for Corstat  
all know it.

We have had a most extraordinary  
season of it this year. <sup>of late</sup>  
we have been troubled almost  
every day with storms of one  
kind or another & some of them  
very severe ones. I was on the  
day before yesterday that  
now lay thick on Chandepri  
and Lower right is not yet  
melted away and has stayed

to light a fire to be comfortable  
Have run all the windows  
that, using winter clothing,  
with the carpet down. Hope  
you have come in for some share  
of this kind of weather,  
and that you have still a  
tolerable temperature about  
you. Have not heard any  
thing of the disease report  
that you mentioned in your  
letter of the 25<sup>th</sup>. Let me know  
when you write if you know  
anything further about it.

8m had sent Hastings in  
remain for the present in India  
and Mr. Laury (I think was)  
made a good success -  
I had a disappointment that  
with water must have been  
by when I got to B. was  
about visiting your friends  
I hope however they have gone  
home and seen all your  
curiosities. How have they  
kept - insects etc. - ?

You will not see Raper in  
Calcutta so soon as you seem  
to expect. He has only been

at Hazare Bush for from  
a few days and it is probable  
that he may remain  
there the best part of a  
month - Do you know what  
of the matter with Ives  
he writes to me that he is  
obtained an allowance  
and Robinson has for  
them that he is unwell  
but without saying of what  
complaint or how long he  
likes to keep him away. I  
might have heard perhaps

from some of the medical  
folks what ails him -  
I am very sorry that Bennett  
after we had had <sup>many</sup> consultations  
of his having left Calcutta  
but he can't be helped now,  
we are all well thank you,  
Miss Hodgson Robinson &  
I must now continue so.

Clyde, then, post Patrick  
about the 22<sup>d</sup> of last month  
with his young wife. but  
he did not write to me

Is Lady Hastings certainly  
home? what we fancied

422

a Curant when you were here  
has turned out, I was sorry to  
hear a strawless. There was  
a good deal <sup>some boxes of Curant</sup> more seed that  
I had sent to me, but he has  
without any success. Could  
you not get some living plants, as  
such as of Chernis &c, out from  
America? I think it possible.  
We are much improved in appearance  
in our grounds & you have your  
opinion and in our buildings too.  
I really hope to look very much  
pleas'd for my best regards to  
Mr. Ballou. I believe me always  
yours very sincerely  
Edw. M. Smith

... you specimens of ...  
... before. We can find

Dear lady,

M. W. W.

Dr. W. W.

Sept 11, 1892.

My Dear Sir,  
I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the Table Book of the Society of Friends, which I have the pleasure to inform you is now in the hands of the printer, and will be ready in a few days.

As the printer is now at work on the book, I could not bring myself to let slip the opportunity of sending you a few lines, the only way in which I could do so, without in any way intruding upon your valuable time.

Much of my communication to you must necessarily be kept in the strictest confidence, and I am therefore unable to say more than that I have the pleasure to inform you that your letter has been received, and that I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the Table Book of the Society of Friends, which I have the pleasure to inform you is now in the hands of the printer, and will be ready in a few days.

The date of my letter, My excellent friend, is the 10th inst. and I have the pleasure to inform you that your letter has been received, and that I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the Table Book of the Society of Friends, which I have the pleasure to inform you is now in the hands of the printer, and will be ready in a few days.

Yours truly,  
JfC; Y,  
\*v ^if~ . . . . i

h\*\*

for the long lapse of fine weather we formerly  
experienced. Last two nights and a day it blew  
hard but <sup>\*</sup> <sup>^</sup> we made it out safely and anchored  
safely in Table Bay. Since we came in we have  
had one of the severest nights I ever knew at  
sea. Several Beppell drifted from <sup>^</sup> "ft" morning  
the *Yucca* was nearly on board of us, and  
one Beppell, the *Portulaca*, had been driven  
out <sup>£</sup> sea. We made it out easily, and the  
<sup>/+\*+«.</sup> for <sup>a</sup> a steady blowing from the land, pro-  
duced, in all probability, great and irreparable  
melancholy damage.

The weather is exceedingly cold. So cold, that  
I can scarcely hold the pen to write to you. I  
am much afraid, that from the severity of the  
atmosphere my plants are suffering in spite  
of all I can <sup>•^f — f^T!</sup> do. They have been drooping  
for the last few days, and one or two seem  
to have shed their leaves, and apparently withered  
under the chilling influence of the wind. My  
friends on board console me with the hope (and  
they are Potatoes) that it is <sup>•SH</sup> only perhaps the

periodical shedding of the leaves, and that in  
the next fine warm weather they will resume  
their beautiful appearance. I sincerely trust  
that maybe the case, for the idea of losing any  
of them distresses me, and then again, I should  
be afraid to look you in the face, on my return  
to India.

me

But good ships has suffered much from  
bad luck, we have lost several. <sup>J^O-VJ^</sup>  
The crews have also been sadly affected. <sup>^f-j^^</sup>  
God will <sup>^A^O^A^r</sup> to recover them. <sup>y</sup> <sup>^</sup> <sup>v</sup> <sup>j£\*\*iz£t</sup> <sup>jS&j</sup>  
Invalid Soldiers I have <sup>fr^^tfe\*--</sup> <sup>^JM</sup>  
having <sup>^</sup> found <sup>^</sup>

I often, very often, my excellent friend,  
think of you, your excellent talents, your  
hospitable home, and scientific pursuits - I  
fondly anticipate the time when I shall be  
able to join you and listen to your instructive  
conversation. May the God of our Fathers long  
spare you to your family, and to bless the world  
with your attainments.

May I venture to send my most affectionate  
regards and esteem <sup>Z</sup> that excellent Man General  
Handcock to whom you was kind enough to  
introduce me, I hope on my return to India, to  
spend many happy hours in his <sup>^L</sup> valuable society.

If you think he would not be displeas'd Pray  
remember me very warmly to his dear mother  
I must beg of you to remember me very  
warmly to Mrs. Wallis. Hope she her little daughter, and  
yourself are now in the highest health, and  
the hope is that your health has done all  
the good you wish in establishing your health  
and pray to do in establishing your health

Newport 10<sup>th</sup> Nov. 4 1822

My dear Wallcut

I have received safe Mr. Bunker's  
two volumes on Maps which  
you were good enough to send to  
me and they will make  
an important addition to my collection  
to Mr. Bunker when you write  
him for the handsome present  
which I am so indebted to you for.

I hope all is right with you  
it is some time since I have had  
a warrant of it under your  
order but I am glad to see  
it employed and I have  
refused all drafts of your self

of  
of what amount. Five hundred  
and odd baskets of roots have  
been dispatched from  
Leopold and I trust will reach  
you in good order in spite of all  
our late stormy weather which  
must have been rather bad on  
the river I think. - and I  
shall be glad to send you  
some of the seeds of the season  
which he thinks worth collecting.  
This is more a letter to enquire  
after you for I have literally  
nothing to tell you regarding  
ourselves or our part of the  
world but you would care

a strong to learn a soul. ~~And~~  
we are all well however,  
that is to say from Robert &  
to which this our party is  
advised. Have not heard from  
Rogers lately but I fancy he  
must be approaching the  
Capital and you will probably  
see him before long.  
Dove is very satisfied very  
grateful for all the attention  
he experienced in / alcutin  
I find the great benefit he  
derived from Nelson's kind  
attention. He has brought, as  
you may imagine a cargo of  
curiosities for the Court with

which my and our friend the  
General me at present occupies  
Duce Bafut is going to  
China in about a month  
thinks to come back again  
via Canton! and to give  
us a full account of his  
travels on his return, and  
to use his best endeavours  
to procure himself a  
unicorn! and any other  
strange things he may meet  
with - perhaps he may pick  
up a Mermaid! or find  
on his way home and to fulfil  
his researches I should have

The picture that the Journal  
gave us the other day, which  
he marveled much as well  
of night - The Bulbs are  
coming in very much & I long  
for the flowers which I make  
little doll they  
will produce  
how do they thrive  
at the garden?

If you have no news to  
give me since I have <sup>any</sup> you  
must however have received  
some intelligence from Europe  
both here & there - which  
I am looking out for. With respect  
to the <sup>of</sup> Mr. Wallis's belief  
I am sure not necessarily  
I would find out

Board of  
Education

London

London

My dear Sir

I have been pained with your  
excellent letter of the 21st March last.  
The parcels at Leeds forwarded by me  
for Capt Kemond & Mr. Anson  
were despatched by Jamb. Bingley  
came to you. All these intended for you  
went by better post. I have got a very  
few more ready but indispensible &  
worry about for change of air  
wishes me really to the above cabin  
I returned here the day before  
yesterday & I avail myself of a few  
leisure moments to offer a very brief  
reply hoping that you will excuse  
my not addressing you sooner.

Being in the habit of supplying  
several friends with various seeds that  
is a small portion of what I gather  
I am obliged to prevent a purchase when  
I am obliged then out to forward them

All those have you are to be considered  
numbered "Do U."

I am most happy to hear that  
the trip to the land has at last  
reestablished your health, also that  
some of the Lord's Phans that you  
are now blaspheming, I hope may  
with, make them believe that the  
element is:

May excuse your  
sincerely & believe me to remain  
always Yours very faithfully

My dear Sir

My late visit to Sister  
stay at La Grange has presented  
me her parting the last  
part of the sheepy year  
can but to Mr. Kennedy, the  
company of the shade  
them and to her daughter  
at La Grange has ~~and~~ to the  
to do so to them to your  
address under cover to her  
daughter in Kentucky, the  
them several letters feel  
very much obliged by your  
kindness. The same week to  
from I intended to have written  
to thank you in my last but  
it excused me

Yours very truly

Wm Lloyd Garrison

Feb 22 1847

My Dear Friend

I have just received your kind  
letter of the 17th inst. & am  
glad to hear that you are  
well & happy.

I have just received your kind  
letter of the 17th inst. & am  
glad to hear that you are  
well & happy.

Yours very truly  
Wm Lloyd Garrison

My Dear Friend

Wm Lloyd Garrison

They were that I found in my way but as I have been  
almost entirely in Cambridge, I have seen little in the  
gardens but what was mentioned or useful; I have  
described in Botanical books on my way to  
since my arrival -X-f-A\* sif^T-t-, Vegetation from the cliffs  
decomposition character of the soil has presented me with  
quite a new field for investigation. I have been able to ascertain the  
Genus of others from the minutiae of the plants, a perhaps from their not being  
described I have been unable to enter out either of the  
forms or at least of those whose Genus I have above been able  
to ascertain. I take the liberty of enclosing two specimens.  
One an *Exacum*. The other an *Evolvulus*. This first I found  
in a shady situation on the bank of a small rill. I had  
supposed it to be a *Solanum*, was not an one to ascertain its  
species, as there from their number have frequently defied  
all my efforts, but on closer investigation find it to  
agree with the generic character of *Exacum*. I endeavor  
to make out its species, but I do not find it coincides with  
any of the definitions under *Exacum* in *Persea*  
*Synopsis*. This it appears to me to be - *Exacum* s. *E. p.*  
from the 7<sup>th</sup> species, but then its leaves are not 3-nerved as  
referring to the Florida Indian, &c. The new species appears to  
me to be long-plant, this it agrees in many points to

The general description of the 6<sup>th</sup> species *E. bulbosum*. It is found

The name of *Eustachia* *Stenactis* enclosed in an envelope

^ 1 found placed by Persoon in the order Jussiaea, & by DeCandolle  
in his Catalogue of the Plants growing in the Botanic Garden  
in the order Tiliaceae. It is also placed in the \* \* 1% - £ &  
by the Author of the Article Botany in Brewster's Edinburgh  
Encyclopaedia. The purpose to follow will be

after examining the pistil under a microscope there ap-  
pears very distinctly only two styles which divide a little  
at the origin into three irregularly changing ^i\* £\* - - ^ » Jf\*  
giving the appearance upon a superficial examination  
of full-grown styles - the corolla does not seem 5-lobed

from being plicate. gives that appearance, it is certainly  
geminate. Apparently monomerous. The capsule  
agrees with the description of *Sanicula*. better than with  
that of Persoon. It seems to me to be the *E. hirsutella*. but as

useful as the *Campanula* consensus in indicating changes of the  
form having to be intended upon your valuable terms. I  
must now apologise, particularly as the subject is so  
trifling. I probably appeared of consequence to me only  
from my ignorance but as this is my first attempt

I trust you will excuse it in perfection. If from  
my local situation I can be in any way useful in pro-  
curing specimens or seeds for the Botanic Garden

need not add how happy I should be in attending to  
your wishes, as I may truly say that "labor ipse voluptas"  
I am very truly

Kipauk 17<sup>th</sup> June 1888.

My dear Wabick

Thank you much for your letter  
of the 6<sup>th</sup>. I am, as you know,  
always happy to hear from  
you, but I am too well aware  
how busily & usefully your  
time is employed to complain  
of your not writing or to be at  
all to attribute it,  
and as I hope you have quite  
done with Mr. Hark. I never  
think of that as a cause  
of your silence. I am  
sorry that you have not  
having any excuse for an

very little as usual, and have  
plenty of leaves, which make  
but an ill use of space.

Of the bulbs you sent me, the  
brown drops are the only ones that  
have quite failed. All the rest  
have put out their leaves,  
and one of the double-hyacinths  
is in bloom over my chimney  
piece and I make little  
doubt have in pots - including  
the tulips - with flowers a good  
time - at least on - that has.  
Very few of the Copenhagen  
seeds have failed. - Rogers  
friends in Liverpool have sent

T. J.

sent out the tickets, some  
found other ones - some  
like to see them. Some say  
perhaps they should and give  
written orders by letting the  
remain at your judge until  
an opportunity occurs for  
leading them up about 10.00  
I will write to Rogers. How  
happy to hear that he is getting  
rid of his troublesome affliction.  
I hope before long to see  
you write again.  
Don't let my Commission  
blague for you as usual.  
They are foolish matters that

""^^^ MjftA

It would rightly be they of their  
were never occurred and  
any rate I am sure to be least  
knew. I am glad you have  
but there is a hundred of them  
person you mentioned whom  
with hope, and pick them up  
as they fall in his way.

My paper work like you that  
our rains have commenced here  
for those get hold of a sheet of  
pencil, like blotting-paper  
It has been unusually warm  
I think for a short time and  
in them: up to 82° but it  
was only for a while and is told

comfortable enough and though  
the my coat and be capiti  
don't think I  
like Miller's powder's pretty  
I'm not a good book. but  
I make but a bad use  
of it. and it is out of my plan  
now to collect more books that  
I don't positively want. I'm  
little doubt I would be caught  
at by many to whom you have  
given notice of it - and who will  
turn it to their account than  
I should. - Reginald Murray  
tells me that he dispatched  
a few weeks ago - a  
boat with 10 baskets of fresh sea.

у^с^л^4

for you, subject & that for <sup>the</sup> paper  
you must have received. He  
has received some more from the  
which he says he has "kept in  
the shadow of the Godown"  
but he send them to you now  
when? show me your will  
you require. - There are few  
pieces of paper about a mass  
of the material for making the  
Kural paper - made up into  
large square cakes which  
he says are intended for Mr  
Kyad. but I cannot send  
them at this season. No work  
if he wishes it, after the rains  
he enclosed Mr. M. M. M.

has requested me to forward for  
you - and he begs you will pay to  
Mr. James Purcandor who has  
25 W. which will be deducted  
this month from his wages here.  
I send at the end of this month  
to send you his account & enclose  
left us. If you will pay the amount  
into MacKenzie's Office for me  
I will settle it here. In future  
you shall have it every 6 months  
which will be more convenient  
I think than annually  
- I wish it to be sweet-pea  
flouring in quantity this year  
but very probably it does not  
in also. and every thing you hope

has flourished well. These little  
things to talk to you about from the  
education is our part we are much  
detried & you would be the  
if you have no news to give  
you cannot expect any from the  
quarter. In what we have nothing  
new. We are with you in the  
British Colonies with all these  
approaching changes! I suppose  
I work here a great deal to take  
with my best regards to Mrs  
Wolcott & to your husband  
& for information I am I suppose  
is very painful & regards I wish to  
be acknowledged. I believe  
we are in London. I am  
Yours truly Edward Mather

Newcastle 19<sup>th</sup> June 1822

My Dear Wallis

I have only time for a few words by the present occasion which is not a pleasant one. I am just recovering from a severe attack of fever, for which I have undergone a salivation which has left me very weak. I returned from Mass. some time ago, with some additional plants, which must wait another occasion to be discussed, and I plan a further expedition to the Westward when I am sufficiently recovered.

We have been bothered lately with the freaks of a madman, who has managed to give some trouble, and whom it has

length been necessary for Mr Stamford to get  
rid of by sending up to Bengal under  
arrest. You may perhaps recollect  
Capt Watson who accompanied us to  
Bengal the last time; after receiving  
every possible favor & benefit from  
Mr Stamford, he has had the ex-  
traordinary impatience to turn round  
and pursue a course of the most un-  
principled opposition to him, urged  
by no visible motive, but the most  
unordinate vanity that ever possessed  
a human head. This whole conduct  
altogether has been perfectly inexplicable  
except on the ground of insanity. But  
it is needless to trouble you with any

detail of it; he will probably try to  
^ksfrsfa a story for himself in Calcutta  
&\*^ I do what mischief £U can s &\*^t-&£.

he is not his ^ T, e \* ^ . much weight.

**f** Cy - £\* for any nonsense from  
that quarter you will know to what  
it attributes it & the degree of credit  
it will deserve, & can mention if there  
is any thing said worth notice.

We are in daily expectation of  
arrivals from England & Bengal both  
both seem very delatory.

I shall not say more till I have a  
better opportunity

Yours truly

William Jackson

18.

18.

Madam,

A severe fit of illness, which obliged me to hurry  
up to town for the purpose of benefiting by prompt  
medical assistance has hitherto prevented my having  
the honor of carrying into effect my promise of Dy. &  
submitting to your Ladyship's consideration the scheme  
of establishment for the Tetraghur institution which  
appeared to me as best suited to the objects in  
view. I am thank God recovering apace and I must  
therefore not any longer delay having the satisfaction  
of addressing your Ladyship the following lines.

I comprehend his Excellency's and your  
Ladyship's views correctly the Tetraghur Establishment is  
to comprise exclusively the objects of Agriculture &  
its most extended sense. Together with the most useful  
(economical) branches of Horticulture, in other words  
it is to effect in practice what our Agricultural  
Society is destined to inculcate in theory. The views  
of the latter are therefore in the utmost degree  
practicable to be carried into effect by the efforts of  
the former. Whatever consequently I may as the  
Secretary, to that Society be instituted to try as experi-  
ment it will be my duty as the Superintendent of  
the Agricultural Institution at Tetraghur to see proper  
attempts and to prepare regular reports upon.  
Under this aspect which I am almost certain is the  
best one it is not possible that the Supreme  
Government could more effectually promote the views  
of the Agricultural Society of Calcutta which they  
have

so warmly approved of and so magnificently aided, then by appropriating the ground in question to this national aim and by providing in a suitable manner for their maintenance, and I beg your Ladyship's permission to add that with these intentions the institution cannot fail deserving and carrying the approbation of the Authorities in England. Here it must be said generally but more especially that not in botanical cultivation of the Botanic Garden, is so very bad, so utterly unfit for agricultural experiments in short for any thing but for the immediate objects of its institution, I should be the very first to have recommended and offered part of it for the above mentioned purposes. But circumstances as I am I can only regret my inability in those respects, and at the same time I accept not only as in duty bound most gladly and readily the charge of Trelaghan, but I do it with the heart-felt joy and gratitude proportionate I trust to that most condescending and most flattering kindness with which that large was consigned to me.

The following Scheme then I take the liberty of proposing as the one best calculated in my humble opinion, for the cultivation and care of the grounds, it is the one which if it has your Ladyship and his Lordship's approbation I intend in due time to submit officially whenever I may receive formal intimation what has not yet been the case of the transfer at Trelaghan. The old establishment being entirely inadequate I have purposely left it out of view.

#### Proposed Establishment

Head Overseer .....	60.
4 Apprentices @ 35/ .....	140.
2 Writers & Scribes .....	20.
Coal & Sundry .....	6
D. Mate .....	5
2 Native Cultivators @ 5/ .....	11.
40 Coolies @ 3/ .....	120.
4 Chowdharis @ 5/ .....	20.
Carried over .....	387.

speaking with it that especially dropping the  
for the painting the boy's last letter from  
the Queen by the way - I don't think they will  
show him or after 22 his day in  
the the the for I remember know  
know all are can find it

we for of the

part of the school

15/1/1871

	Brought over	387
2 Rows @ 5/		10
2 Grammies @ 5/		10
1 Carpenter		8
2 Bricklayers		5
Contingencies		50
	Monthly Average	<u>50</u>
		<u>£ 471.-</u>

On the preceding Estimate I request your  
 Ladyship's permission to make a few observations.  
 My experience in regard to the Apprentices  
 attached to the Botanic Garden authorises me to speak  
 in the most favorable manner of that measure which  
 relates to them. The time is not far distant (and  
 indeed it is only ~~the~~ <sup>the</sup> ~~maturity~~ <sup>maturity</sup> age, which retains it)  
 when they are to be employed usefully instead of  
 General Servants, Writers and Overseers in the Garden or  
 otherwise be placed in charge of plantations and  
 similar situations. Care shall be taken that the  
 Boys at Testagles may give equal satisfaction  
 with those attached to ~~the~~ <sup>the</sup> ~~other~~ <sup>other</sup> ~~part~~ <sup>part</sup>. Their allowances I have  
 put on a similar footing with the latter

Secondly, forty Coolies are but sufficient for  
 the cultivation of the quantity of Ground which  
 I calculate on obtaining. You I am not quite in  
 possession of the point. With the view of opening in  
 the various Cultivations a couple of native reformed  
 Husbandmen from Hindustan are added in the  
 List. A couple of Grammies are necessary on ac-  
 count of the many opportunities that will occur  
 for their services, as are also a couple of Bricklayers  
 and a Carpenter. Finally, the Contingencies of equip-  
 ments, Tools, purchases of Seeds both here and out  
 home &c. with I believe not be found to have been  
 calculated at too high a rate of price they will  
 fluctuate and I have only put 50 R. as the maximum.  
 The necessary number of Bullocks & Harts I hope  
 will as hitherto be supplied from the Public

ri ^ cz? t ^ ~ ~ ^ ^ ~ ^ t ~ ~ ~ apologies

copy to Lewis

Nipant 27 July 1822.

My dear Wabick

I have done your present freight  
account up to the end of last  
month; I am afraid you will  
think it rather heavy, at least  
it strikes me so being more so  
than usual. but then there are  
some unusual charges for the  
Bokeas who have taken all  
our baskets of roots &c. to fixate  
at this end of the way & so on.  
A great many baskets will  
remain at the place of the an-  
nals &c. that you last wrote  
for and as we cannot now

send any more, with direct  
Beyruth Khan to forward all  
that remains with him to go  
on a boat. and I am saying  
with each given good idea.

If you will pay the amount of  
the advances to Marat King,  
into Mackintosh's hands for  
me. With details it here.

It has been raining for three  
days and three nights without  
intermission. The "water is  
consequently out" so that we  
have not had a day for three  
several days. I know nothing

what he would do about  
suppose however the people  
as much as usual and that  
I'm sure you are well with  
business as ever. I am  
sorry to say that the Dulips will  
not be in - not at all - they have  
having put out their leaves -  
perhaps there is not the proper  
season for them? and it might  
be better to take them out of the  
lot's - sheep them - hang up or  
in soap, till next spring - what  
do you think? it is a bit of a plan  
I believe than leave the earth  
in the Earth. - the 1790-1800

j&S

tk

with the only one which has got  
blown of the last batch you  
sent me, but some Amaranthus  
which I got from you flower  
beautifully. - Purporting  
the contents to be true, as I have  
not heard of Everett's approach  
indeed if he is worse he should  
give up all idea, I think of coming  
up on the rains - tho' still <sup>capful</sup>  
he will make his appearance  
one of these days. - Rogers  
told me he had been partaking  
of your hospitality at the  
Museum - since he returns

Robinson, who has just been here,  
[we dine now at 2 o'clock, in the  
quiet way, in your old sitting room]  
wishes to know if you want any  
more brushes: but as he  
remembers you bought once,  
about this time, or your pony  
smeared on the road? as he  
says they are coming into season?  
Khamt Singh has got some <sup>a</sup> fine fellows  
in the shape of some insects. but  
the same as you have had over  
some again before. I don't imagine  
you will think them worth  
sending to you. a large beetle  
I then went the other day in

Spirits - but I fancy you will  
not care for any that are not  
New. I say however, and  
with endeavor to meet  
your wishes in this department,  
if you should really want any  
more of the old kind. I have  
not seen any novel ones at home  
of course preserve them for you.

Marat-py. sends seeds (which I  
believe you particularly require) as  
they can be got. At present there  
is not much. but I wish you  
increasing of course. let me  
know when it is over - I am  
Dear yours &c -

Spencer

E. J. Spencer

Botanic Garden >^

Genl. Dept. Sir,

I am directed to transmit to you for your information and guidance, the enclosed copy of a minute accorded by the Most Noble the Governor General, proposing the transfer of the Premises at Tillyghoe to the Botanic Garden, as a dependency of that Institution which measure has been resolved on by Government.

2. You will be pleased to offer any suggestions which may occur to you on the occasion, and recommend for the sanction of Government, such an establishment for the Tillyghoe Premises as may appear to you to be requisite for the due execution of the objects which the Governor General in Council has in view.

I am

Sir,

Yours Obedient Servant,  
/ Signed / C. Peshington

embarrassment becomes still more  
obvious

5. The general expediency  
of the measure is unquestionable  
not only on account of the decision  
of the Supreme Government, adverted  
to in the letter under reply, but  
also on account of the greater faci-  
lities which it offers for the opera-  
tions of commerce and the improve-  
ment which it secures effect  
in the appearance of the Settlements  
with the greater certainty of  
preserving <sup>its</sup> salubrity even  
under the prospect of a consi-  
derably denser population; for  
the comparative ease with which  
the small branch of the river  
in question might be made to  
draw the adjacent ground: a  
measure which we beg ~~to~~ most  
particularly to recommend.  
Finally we take the liberty to

Dear Sir

We have the honor of  
acknowledging the receipt of your  
letter under date the 17<sup>th</sup> inst. nomi-  
nating us to be a Committee  
for the purpose of ~~to~~ <sup>to</sup> ~~considering~~  
consideration concerning  
and reporting upon a plan  
therein proposed for the construc-  
tion of a range of warehouses  
for the accommodation of the  
European Merchant on the  
opposite or Southern bank  
of the Singapore river.

In conducting our  
enquiries relative to a subject  
so materially connected with  
the commercial interest of  
this most enterprising factory,  
we have deemed it ~~our duty~~  
~~our duty~~ <sup>our duty</sup> to consult every  
source of authentic information  
that appeared in any shape  
to bear upon the main question  
or to lead to a just and rational  
conclusion, in the various

copy  
Reply of Lammont  
to Hon Stanford Ruffels  
of the 17<sup>th</sup> of October 1822  
dated 23<sup>rd</sup> Decr, 1822

Fort William, 18th Decr 1800.

Governor General.

At the time when Major <sup>the</sup> ~~&&-\*se&i&'~~  
was employed in constructing the Boats intended  
for the Experiment instituted in the <sup>/tffeexj^\*</sup> <sup>^jf/fo</sup>  
that Officer engaged the premises called Fitzgibbon  
for his operations, but the whole of the ground  
not being acquired for the purposes of his <sup>&</sup>  
immediate duty, a part of it was annexed  
to Barrackpore Park as a Garden, and one of  
the houses on the land was let occasionally  
to Individuals to diminish the expenses <sup>&</sup>  
attendant on the Boat under taking considerable  
pains have been bestowed on the portion of  
ground allotted as a Garden and a great number  
of curious Plants from all quarters of the Globe,  
have been introduced into it for the trial of  
naturalizing them to this Climate. The Plants

tear

chus

thus tried have all been selected with a view  
to their probable utility, with the hope, should  
they thrive in this Country, of disseminating  
them among the natives. Food, Manufacture  
and Medicine are the objects which have  
decided the choice. - The Original purposes  
for which these premises were rented having  
ceased, it has become necessary to determine  
whether the Lease, which stipulates that  
the Government may retain the premises at  
their present rent viz. 400 R. P. Mensem  
for as long a period as it may please, shall  
be relinquished, or whether it be preferable  
to continue to hold it for public purposes.

I should be unwilling that  
the Garden, from which the neighbourhood has  
already derived considerable benefit by the  
distribution of Plants and seeds should be  
abandoned, and as the two Houses which  
stand on the land are so contiguous to,

Parrackpou

Barrackpore Park, it appears obviously desirable  
to preserve the soil at Feligheim  
disposal of Government. The soil at Feligheim  
of a quality that of the Botanic  
Garden consequently calculated near  
Ecotia which might fall in a less fruitful  
spot. I would think that the  
portion which has  
hitherto been appropriated a garden be  
with the larger of the two houses, smaller  
being too ruinous to be repaired / transferred  
from the 1<sup>st</sup> Instant to the Care of B. Wallich  
the Superintendent of the Botanic Garden, and  
that he be directed to send  
to that Establishment. The Stock of Plants at  
may be thus preserved and a suitable piece of  
ground secured for those productions which  
particular Institution.

The extent of the ground will  
enable Dr. Wallick to allot a portion of it for the  
benefit of the Agricultural Society, to which  
he kindly officiates as Secretary.

Dr. Wallick should be called  
upon to state what establishment will in his  
judgment be most <sup>useful</sup> for the premises at  
Tully, in view of its being so  
formally sanctioned by Government.

The Memorandum of Agree-  
ment of the premises may be  
deposited in the Treasury.

Signed J. Hastings

(A true copy)

Witness my hand to the Lord

'on I  
.la JMJ

Kingston Esq.  
Attens Chief Secretary to Government  
in the General Department

(r) with extreme regret that I  
beg leave to address You on this occasion soliciting  
his Excellency the Most Noble the Governor General  
in Council will please to grant me leave of absence  
for six months, to proceed to China for the recovery  
of my health. The state of the latter has ever since  
the severe fit of jungle fever, which I suffered, in  
November last, on my way down from Nepal, -  
been very precarious, and during the latter two months  
I have been completely exhausted, in consequence  
of repeated, and at present almost daily attacks of  
fever, which have rendered a voyage to sea in-  
dispensibly necessary, as will be seen from the  
medical certificates of Dr. Nicolson and MacWhister  
which I have the honor to enclose.

jurflAsCsks r

2. Adverting to the most distinguished  
consideration, which his Lordship in Council has  
always been pleased to bestow on the affairs of the  
establishments under my superintendance I venture  
humbly to solicit, that Mr. W. Leguister, the  
chief judge of the Sudder Dewanny and Vizamut  
Adawlut, may be permitted to officiate in that  
charge during my absence, that gentleman having  
most politely offered his valuable services to me  
on this occasion.

3. In order that, if life be spared, I  
may benefit the botanic garden \*\*\*-! rf\*v,ijOu<\*wb  
-der by my voyage I request permission to  
take two of the apprentices attached to it, Julius  
Pigot and George Kuddart, with me for the  
purpose of assisting me in collecting such objects  
I meet with, especially such plants, as  
it may be desirable to introduce into Bengal.  
and lastly I beg to appeal to his Excellency in  
P. cil

Council in behalf of George Peter, the least  
aware of this garden, whose state of health  
as will be seen from the accompanying certi-  
ficate of Dr. Howell Winter, is such, as to make  
it necessary to see very necessary to save his  
life. An opportunity now offers itself for his  
accompanying me part of the voyage in  
the Wattle Company's ship de la Seine dead,  
and it is gratifying to me to add, that such  
has been his conduct in the discharge of his  
duties, as to render his services very valuable  
at the garden and to deserve my best testi-  
mony in his behalf. Another person duly in-  
formed has been obtained who will do his duties  
during his absence, should the diploma be  
be pleased to grant him permission to go  
to Germany and return from thence by the  
first opportunity. Of course there will be no  
possible extra expenses on account of the  
absence and expenses above mentioned. —

Shewes Secy

o sa	sa	phā	ḥa	ḥa	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā
o sa	sa	phā	ḥa	ḥa	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā	ḥā

% The first eight are vowels ttotfo, stiro, and of these, three viz. e? a & i G if, are short tfc3£3', nissaif, and the remaining five long ?&'•, digftaM.

But a e and ® o are short wbcfl preceding a compound con- tonnnt, as c\*«5, ettha, few; ©s^^, ojijilio, a ^ ; ® »\*fl3!J' \*eyyo, eminent/ 9t3i-od, soltlu, axetf-

The remaining letters are consdiant

The first twcmv five consonants are distributed into five cfasses O<9EBv?., vaggio, fiz? «»0\*«xsrt. ka-vaggio, induing \*R©«)ca©; ©£>5>3tf>?, ca-vagi, including © ef a-vaggio, a t i d ©©•caw\* fn.vii^\_btfj 3 S) ©f i; «£)»"•««' t pa-vdgggo, C5 0 © «3 '\$>-

- p English palatal t. 3 palatal d. lj the aspirate- £ Slavoniau I.

3- The alphabet is also divided into two grand species of letter?, which may be termed *surds* and *sonants*. *Surds* ep£»5, t3«, oghosaM, are such letlirs as in the first effort to form them admit of no vova) sound, vuL Hie two first letters of each of;: five classes of consonant?, with thesibilant, \*nffl, ©tf, O £). <n &, tiS, C3. The **remaining** letters are denominated *sonants*

භොසං, ghoṣaṃ, වි. ග භ ච, ජ භො ඤ, ච ජි ඤ, ද ච භ, ච භ ච, ස ජ ල ච භ ල, ආ ආ ඤ.

The character - i\* distinguished by the name \*භිඤ්ඤා, **NiggaV)itaH,** and in thealpba»et usually takes th\*?1o express it.

ආ (a) කව්ඤ්ඤා, ka-vaggo, and භ (b) are termed කඤ්ඤා, **kanphajo,** or *guttural*.

ආ (i) චච්ඤ්ඤා, ca-vaggo, and ජ (y) are termed චාච්ඤ්ඤා, **tattijo,** or *palatal*.

ආ (u) and පච්ඤ්ඤා, pa-vaggo, are termed චච්ඤ්ඤා, **opphajo,** or *labial*.\*

චච්ඤ්ඤා, pavaggo, ජ and ල (r and l) මුච්ඤ්ඤා, muṭṭhajo, **lingual** or *cttebraL*

කව්ඤ්ඤා, ta-vaggoj ල and ජ (l<sup>atu\*</sup> i) දතාඤ්ඤා, **dantajo,** or *dental*.

C (e) is termed කඤ්ඤාච්ඤ්ඤා, **kanphatāṭṭajo,** as proceeding from the throat and **palate**.

S) (o) h termed කඤ්ඤාච්ඤ්ඤා, **kaM{)ho[i{iliajo,** as proceeding from the throat **and** lips.

ආ (v) is termed දාච්ඤ්ඤා, **dautoliphajo,** as proceeding from the teeth and lips.

4. After learning the alphabet und proceeding-to **join** the letters so as to be able (o ryid, I he learner will perceive, (hat though tach vowel sound his Us respective character lo express it, yet in composition these characters are never written, except as *initials* ,• for, when they (tcur as *medial*\* or *finals*, the> a>sun>e a different shape from that gi\*\*b in the alphabet, and are ex\* pressed by certainsjmbols, which the following scheme will **explain**.

PALI GRAMMAR.

As initials

අ ආ ඉ ඊ උ උ ඓ ඔ

As medial s and finals

ආ ඊ ඉ ඊ උ උ ඓ ඔ

As mediate and finals in composition with a consonant

අඔ ආඔ ඉඔ ඊඔ උඔ උඔ ඓඔ ඔඔ  
*aba </> ibi ibi ubu uhk ebe abo*

In this manner the vowels may be combined with any other consonants.

N. R. I. When the vowels  $\text{£}$  and  $\text{£7}$  come in composition with \*n, cc, <Z5%, ta, o\ they are expressed by these two symbol\* t, i,) but with every other consonant they take the form annexed to ©. 2. The symbol of the C5 U placed before, !>ut pronounced after the consonant. The symbol of the © is placed partly before and partly behind the consonant, but is pronounced after it.

£. The vowel <y (a) h\*« no symbolta express it, but is inherent in every open consonant, and therefore must be sounded with it; unless its placebo supplied bf another rowel: hence two «pen consonants meeting together'Hake a perfect sound, without the insertion of any von el mark ; as O and «o are both open consonants, untl in reading ihey mnst be pronounced *pmui* not *pna*. When the inherent vowel is to be thropt, the mute congonant itiu\*t Dæ joined to another coiisoiv-uit, Ex. t^ffo6', a *haml*, is pronounced *ijatlho* not *Jiatatho*. €)3O"», a *dooi*, dvāraM not *davarau*.

C- Th.? • ni<r-a itaiT, is always silent; in sound it corresponds with the French final n in *mon*, the Portuguese *m \n Jim*, and is the only silent consonant ever to be met with at the end cf *Pali* word\*, as ©-, *maw*, *me*. *Oti* account of its i in perfect •onnd it id generally arranged amonnr the vowfld by the native Grammarians.

PALI GñAMMAIt.

7. In reading *Pdli* the learner **will** often meet with certain compounds and contractions of consonants which it may be well to point out. The **following** are the principal.

v, la the symbol for <a joined to another consonant, and is united in the following way \*m?, **kya**, and takes the sound of ,V In 3/ffrrl t<sup>a</sup>d is **always** pronounced with the consonant to which it is united, as SWM% v&kjaM, a word or sentence.

^ Is the junction of rf with a preceding consonant, as JKJ, tra, cc. gra, €D, bra, as in q » t atra, here.

Is a substitute for rf placed oti the top of the consonant, and must be prououtuul\_Ji\*£M!A\_it, at in UM cjlUUew ar-Jca which must be written <f \*5; but **this** is a combination seldom occurring in *Pali*,

CO. Is a compound of © and <> and often occurs in writing »8 මහමලා, mnggalo, happy, excellent, etc.

Is the union of & and © and is in common use, දැඩො, danbo, a stick,

is frequently written fur the double and called, *Pdli cayanu*, as (?©)»£fr, amacco, king's minister.

© Is a compound of \$ and Q as CfSaSb, **paeiddbo**, public.

^ Is the union of \*n and q, but seldom occurs in *Pah*.

©. Is a compound of c and &, as in ©jtf., dwaraM, a door.

® Is compounded of ® and ®, as in g© ~ © ^ -, Lumbini-vanam, the name of a grove ^fcere *Buddho* w;is burn.

From these remark, the nature of the other compound tenants may be easily understood, as

ච්ඡ, ච්ච, ච, ඡ, ජ, ජ්, ජ්ච, ජ්ච, ජ්ච, ජ්ච, ජ්ච, ජ්ච.  
 cch jjh ñc ñch Bj ppā ṣṣh tth tv nth pph bb

OX PRONUNCIATION.

8. After having learned the characters in the Pffi alptmbet, nothing scarcely ... be more easy to read and he must be informed, ha« the P4/." cbarajr. feve

invariably the **urns** sound in composition which is given to them in the alphabet, and do not, as in English and other European languages, change their sound with their situation.

#### OF THE VOWELS.

9 The **rowel Bounds** are those expressed in the alphabet, in European character., according to (the Italian, Spanish, and Portuguese pronunciation; adopted by Sir William Jones and most other learned Orientalists.

». Whether written or understood sounds like *a* in *caplite* E?. *cfse^ss^* \afino, *another*, *zn^*, *tattlm*, *there*.

q? Is sounded as the former, *ov)y \ U* held twice as long, as *a* in *fattier*. As a *medial* or *final* its symbol *ia* % an instance of **which** may be seen in the word «J3\*(3^ *kalo*, *time*.

f Sounds like the *i* in *lus* or *him*; after a consonant as a *medial* *OT jintl*, its symbol is " *a*; in *QK%* *pita*, *father*; ®S. *wani*, a *jewel*, where it is mounted on the head of the *e*» and «*o*.

^ j3 t[ie corresponding long vowel and sounds like *ee* in *eel*, *iU* symbol *a3* a *mediator final* is " as in ®<fD, *devl*, a *goddess*, *queen*.

r f 1 The first of the *e* letters sounds like *oo* in *good*. The latter, 88 *do ia'toW\**. Their symbols *as mediate* or *fiyah* are and *oro^a^p* *hies hee" arelltl* *y sheivri* in the scheme for *tnn\%* the vowels with the consonant^ Ex. ««\_Qtf, *kucelii*, *womb*; 500)^, *duto*, a *messenger*; &&&&% *putfo*, a *son*; &Vf9 *rupaM*, a *figure*.

O Sounds like *e* in *wherr*, or *en* in *fce>cr*, its symbol is 3 at 3s«, *evam*, *thus*; ©;\*a^ *devo*, G#d

© **Takes** the sound of *o* in *stone* or *Ot* in *groan*, its symbol is s>o *ns-esSs»tsO*, *nuriso*, a *man*.

This language has no diphthongs.

#### OF THE CONSONANTS.

7\*Af /?rsf C/OJJ, or *gutturals*.

10. » Has the precise sound of *PUr k* in *haknder* as in 3000 ©f *karonii*, *I make* or *do*.

Ⓜ Is the same aspirated and uttered with greater force, a3 **if connected with** the letter tfl, and has a sound something; like ourkh in *bach-half*; it occurs in SjcD\*, unikliau, *the face or mouth*.

eft Has the same sound as our liajrd g in *garden*, as <f>cs"iO>, gantuM, (*o go*,

co Is the same letter aspirated, and takes the same sound as *gk* in *ghost*, as.KJcr\*, **gharaM**, *house*\*

Ⓜ This letter *vat* it stands in the alphabet has a sound somewhat resembling that of *tig* in **king**. But **it seldom stands alone**; it is most commonly coupoiinrteci with other consonants as in W<sup>15</sup>) s>f539, saggaljo, *collection, compilation*.

*The second class, or palatals.*

11. © Sounds like *ch* in *chaff* it the Italian *c* in *Cicero*, an ©«\*£., **clitaM**, **mind**; e©^», pacitUM, *to cook*; t3©», pacati, *he cooks*.

t\* Is the same letter as pirated and sound-; like *ch* in *charm*; the *ch h* in *waick'home* will give a tolerable idea of the sound of the letter. Ex. tissKV, **chajtav**, o« *umbrella*.

Ⓜ The sound of this **letter** is expressed byj iojar, as #9s>, **jiritex**, /^.

^S1 Is the former letter aspirated but is seldom used alone, Ex. &dffi\*, **majjhaM**, *middle*

^ The Italian and French g« in *.signore\ seigneur'*, the Spanish fi in *senor*, the Portuguese *nh* in *sen/tor*, or as **our y** in *yam*^ if pronounced **with** the mouth open and **forcing** the sound through the nose, Ex. <f5\$;\*», nanaM, *knowledge*.

*The third class^ or lingual?.*

12. It is necessary to remark here, that in learning to pronounce the Indian alphabets and to read the languages, foreigners often make mistakes by not being sufficiently careful to distinguish this from the following class of letters. The letters of this class, being *li^uals*, are pronounced by turning the tip of the tongue far back against the palate, which produces a hollow

pound as proceeding from the head; ant] as though attempting to give force to the *t* in *tankard*. They are here represented by the *Anglo-Saxon* and *Icelandic* letters £ and S **according** to the system of Irindo-Roman Orthography proposed by Professor **Ita^k** in *A heller on the Antiquity of the Zend, addressed to the Library Society of Bombay*; and another *On the 3/ode of expressing the Indian, especially the Sanscrit and Singhalese sounds in European Characters, addressed to the Literary and Agricultural Society of Colombo-*

8 As already stated, resembles the sound of our *t* in *tankard* or *ftrni-honse^ es\* f/©©c\$, vn]b£md\ft is jftf^ TivriTfy. ~*

3 Is (he former letter a-piraicd as •&)\*<\*>, {>h&naff, a place.

fi) Being a **lingual** its sound way lie tolerably well expressed by our *d* in *dance*, pronounced as directed at the **beginning, with the tip** of the tongue thrown back upon the palate, as ८©, pn?rou,y'//.'w.

e9 Is the **former** letter aspirated- Ex. ©€)tS©>, vaššhitam, *prolonged, distracted.*

j& Sounds like our *n* when preceded by *k* as in *knock*. Ex. «: <^x. gaNj i, he took.

#### *The fourth class, or dentals.*

**13 So distinguished** from the foregoing class, by always keeping the end of the tongue close)) pressed against the teeth, the tip a little turned downward\*.

\*o Is the common dental i, as <f>C\*» telaw, *oil*.

& Is the same letter **aspirated**, as tt.cSo, kathi, *history*.

\$ Is the dental //, a\*t^«i», udaJcaM, *water*.

£) Is the same **letter** aspirated, is ©Q, madlm, *honey*.

«o Is pronounced as the English *n*. Ex. «wq, nadi, *river*.

#### *The fifth class, or labials.*

14. O« Takes the sound of *otirja*, as ८©३, paiho, *road*.

o. Is the same letter **aspirated**, tn O^\*, phalam, *fruit*.

Q. Is sounded as *b* in *balance*. Ex. ©C533, *balava*, *strong*.

ॠ. Is the former letter aspirated, as »to:rf\*«n-, *bhojanaM*, *food*.

©. Sounds as our *m*, as ®«3Xfl.\ *majrgo*, *awy*.

The remaining letters which are termed <yf>«cfa3, *a-va«g«*, *miscellaneous*, on account of their not being ranged in the classes are eijually easy to pronounce.

o5. Is our *j* as •oao, yo, rt^o.

o\*. Is our *r*, as cr\*n^?^\*, *ratakaivi*, *a precious stone*.

<. Is *l*, as <5<to7, *lata*, *a creeper*.

5). Is our *v*, as 5)5), *vanica*, *a grade of f...*

t3. The only sibilant in the *Pali* language, is pronounced like our *s*, as t3o, sa, \*^« ; ^t3\*eo? ( ?-to, w«Ve.

∞. Takes the sound of *h* pronounced with force, a\* ef&. a>inM, /, <fto9c3( bdti, *he a*. It is here represented by V) in order to distinguish it from the mere sign of aspiration ft, Which H used inseparably (ogetlu-r wild tJie km a?pirute mutes.

C- There, is little difference in the sound of this letter from tie (\*, only that the Native ptonoTince it With a liule ruore force, and the hitter is considered a *dental* and the former a *lingual*, an instance of it\* sound is in «Sff»GS, *kitiMSH*, //w^ *played*. It is supposed fo \e like the Slavunian t.

15, The -Kiggal, itaM, Imsbeen already described. Hs ?ound is ex|; ressec I by the small cap-tat H, and the ^ by w, according to the above mentioned s>«eni of i<sup>roless</sup> or Rask. Neitlier of them ever occur at the ^ginnini; of words\*; but the peculiar reason for this repi esent aUon i-, that the former in Pali

**K** in Sanscrit, &c. approaches nearer to *m*, and i^ changed to before a vowel, and tie latter is scarcely di?tinjjus\* hable from the common *n*.

16. Although no Pali w»rd terminate? in a pitent consonant; yet in dividing such words as contain a compound one; the first part may be so terminated, which is done by placing the sign \* on the top of the silent letter. Ex. ^c^CW, *as-eo*, *a horse*, for 9@C533, *asso*.

Dear

Mr. Smith

Wednesday evening

My dear Sir,

I am sorry I was not down  
yesterday to drop you a line. Mr  
Wad is very anxious for Dr Cheese  
to call upon her or after as his  
professional duties will possibly  
allow him. He has great confidence  
in him, & especially as he has so  
kindly called & knows how well  
the ladies also to see you, & receive  
some general directions. He is anxious  
too to see you or Dr Cheese as soon  
as possible, as her pills to keep  
up the lubrication are all expended.  
I hope we shall see you or your  
very soon. However, my dear Dr - your  
kindness & great attention  
to my dear wife be forgotten by me.  
I have great hopes that she will  
soon be in the former health.  
I am, My dear Dr, Wad,  
Wad

Dr Wallis

H. Hand

W. W. W. W.  
14 Leach

Sept. 14.

My Dear Doctor,

Respectfully I have been  
asked, I am afraid of absolutely  
familiarity that it shall be  
One in the number. Do. Do.  
Do all that men in Do. Do.  
in city, & I will and you a  
proof, & when it comes  
a form we shall be Do. Do.  
to take what we can. I think  
you are in the dark. I think  
we shall do I shall a week,  
but that perhaps, if you are to  
see the same. Then you will  
be surprised at the long and long  
of September - in Do. Do.  
is a revolution. I am certain  
later, but I am afraid to take  
with you. Kind as I am Do. Do.  
I have and I am Do. Do.

Dr. Wallis

Dr. Wallis

W. Ward

Dr. Wallis

My Dear Sir

I had the pleasure of receiving your letter of the 11th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very truly, your obedient servant

W. Ward

Secretary to the Board of Agriculture and Fisheries

Whitehall, London, S.W.

18th July 1881

Enclosed are the papers referred to in your letter of the 11th inst.

I am, Sir, very truly, your obedient servant

W. Ward  
18th July 1881  
Secretary to the Board of Agriculture and Fisheries  
Whitehall, London, S.W.

My dear Sir

Many thanks for your kind & valuable

present in the person of which I am obliged to you

much pleasure. I am sincerely & sincerely to you

that I hesitate of your health requires a heavy

weight & I am sure that I must be some

what I hope you are hoping that it may be some

while I especially expect in returning you to

health & to your situation in the St. James

which through myself I do not know

that you had with a wish. ~~But I do not~~ I do

not to the point as I do not know to your self

names have been employed in colleges on labor

myself than independent directing the labor

of these schools myself to be the author of nothing

but a certain Grammar & I had an order given

now which I have never to finish these your

with me as the house it shall be written

through your means to obtain a place for them

in the library of the University of Copenhagen

and with them two books which may possibly

have respected your researches because few copies  
I believe were printed of either the one or a collee-  
tion of poems has been secured one of the most  
dependent & valuable of the Arabian poets on whose  
like other the flowers of Logarance: in a treatise  
on Rhetoric attributed by quotations from the  
Persian Poets. I have no copy of the unknown  
the first kind of fact I suppose you have already  
received it from the College. It is a valuable  
to other books on the Arabian poets they already  
possess but of your small furnished in good volume  
from the same date a list of your acquisitions has  
probably made of me very anxious now to make  
some additions to them.

Believe me with great regard

~~to be~~ My Dear Sir

William Wallace

Very many thanks  
for your kind letter, and it was really  
kind of you to think so soon of me  
after so severe an illness. It gives me  
to think you have suffered so much, but  
I trust you are all over and that you  
have returned to the enjoyment of your usual  
retreat and a  
point poor Blankworth has been of little use  
since his arrival here, having been confined  
by sickness almost ever since he came up  
He is now well and preparing for a start to  
the North. here he can do nothing. you have  
had I believe almost every thing that these parts  
produce & indeed there is little society - certainly  
hardly any thing you have not found in  
Spain, although there be many plants in  
Spain, not known here - towards the base  
of the Sierra has is the only interesting part  
& that I fear is beyond Blankworth's reach, indeed  
to tell you the truth, I do think a very intelligent  
Native would be much more efficient for  
such employment - so great and manifold are  
the

... long. he is no youth I fancy, and even were  
he to marry, he might do us no harm. When  
you write to him pray offer him my kind  
respects. I hope <sup>^^-p^</sup> dear friend you have  
not forgotten the despatch of plants for the  
Shewal Bagh Garden, which we talked & wrote  
about when I was in Calcutta. The Garden <sup>^^</sup>  
is flourishing, but I am most anxious to  
introduce into <sup>it</sup> as many interesting varieties  
as possible. I have been trying to help the  
Gardener bushes through the <sup>1<sup>st</sup></sup> rainy season (which  
has always been fatal to the newly imported plants)  
5 <sup>^y^-zf</sup> them in the house, but I fear the  
precaution will not avail. <sup>•^ jst-^-ft^\*~ ^e^£</sup> they  
throw & throw out new leaves, but are  
now I grieve to say looking down <sup>\*\*</sup> sickly  
& I fear about to <sup>die</sup> could I only get them  
over <sup>s-y</sup> rainy season I am sure they  
would thrive. I hope you are serious  
when you <sup>say</sup> your purpose paying us  
a visit at Shewal Bagh, to tell you <sup>you</sup> would  
be welcome. I would be to tell you nothing  
for I gain <sup>by</sup> your <sup>how</sup> <sup>to</sup> <sup>you</sup> <sup>of</sup>  
delighting I should be to have you here -  
and

and if you bring your better half with you, you  
will be doubly welcome. Lady Colquhoun  
begs me with her kind Compts to Mrs Wallcut  
to assure her she will be most happy to  
have her as long as it - God bless you  
my dear Wallcut - & with best Compts  
to Mr W. Ever Adams and

Most affectionately  
A Colquhoun

2  
822

Mrs W. Colquhoun  
Received of Mr W. Adams  
the sum of £100  
the 10th of Oct  
1822

Monday 21 August 1899.

My dear brother

I have communicated to Harriet  
Hughes what Rogers has told  
me about your displeasure at  
her charges which has frightened  
the old fellow, who has got the  
writing to make him out a letter  
of explanation, which he has begged  
me to forward for him. - I will do  
the copy the charges, with the  
exception of some which you  
immediately withdrew - out of  
human wages - are chiefly concerned  
in tending down Dr. Peck's work

great quantities of coats & hats  
in the Quers - which this, at your  
desire, particularly agreed for  
to do. regarding the provision of  
which he received several letters <sup>also</sup>  
from the Jorden. and that there  
was no other mode of sending  
them at that time. So he hopes  
you will not think him to blame.

All these coats &c. have been  
despatched from - by water and  
tho' you have not already received  
them do not think the Jorden  
deserving. I hope to see you

Departure for Sumatra must  
concerned indeed to hear (I believe  
I have only one from Rogers) that  
you have had a return of your  
disease so as to render it necessary  
for you to go to sea. and that  
you will sail before long for  
China. - I am glad, since you  
have had a relapse, that you  
have decided upon this trip as  
your experience & sea-sickness (and  
perhaps is requisite but) will  
let you completely upon your legs  
again. I am, & trust you are,

Just wish you were having  
heard from you lately - Had  
rather a little complaint  
of late but Robinson & I are  
just about. But we are now  
a little longer may concern  
Lancaster might let you  
I'm writing you in a hurry about  
the business of D. King's  
the <sup><^t^?</sup> is in great taking  
\* ~ S may make  
I must wait and see how  
you are improving - I  
hope you will - I  
sincerely Edward  
\* I had always been

Worcester

Worcester

I am extremely  
 sorry to hear from the  
 Honorable Edward  
 Gardner that you have  
 been very angry upon  
 me on account of the  
 charges 464 Rufus which  
 appeared to your Honor  
 has been too much incurred  
 by me. I beg leave to  
 give a short explanation  
 that a most part of them  
 has been distributed in  
 forwarding a quantity of  
 Books to Seyoum. apart  
 expended in giving them  
 to Cooks according to

F. B. [Signature]  
 Secy. [Signature]

your order and a part  
of my salary charged.  
I assure you Honoured  
Sir that your servant is  
never so ungrateful as  
to incur Expenses extra-  
vagantly in any thing  
but to incur very properly.  
In last month there was  
only Expense 5 Rupees  
and in future will be  
the like manner.

I remain with  
profound Respects

Honoured Sir  
Your most obedient &  
very humble faithful servant

Phanot Singh

C. Luskington Esq.

Acting Chief Secretary  
to Government

\* ff » • N. \\* Vta-?V V. \

Sir,

v-^as .- d.

In the absence of Dr. Walllich

I have the honor to acknowledge the receipt of  
your letter with its inclosure of the 18<sup>th</sup> Ultimo.

I am happy to be able to say that

several communications with Dr. Walllich

with regards to the future arrangements at Sittigh

your in consequence of its expected transfer as

an Appendage to the Botanic Gardens & in aid,

in some degree of the pursuits of the agricultural

Society - I am enabled to add the sentiments of

that gentleman to any that might have occurred

to myself - On this duplicate character therefore

I venture very strongly to recommend the inclosed

Establishment for Consideration

At the same time however that

the Establishment as suggested with all the mis-

terprises of detail the Governor, <sup>sent in Council</sup> will be fully

aware that the operations at Sittighur cannot

\* with the regularity of a \*»\*\*\*\*«\*\*\*\*> nor require

the same impetus at every moment & that with

a limited outlay - the occasional pursuit of an

important

important objects can <sup>only</sup> be attained - If  
a small sacrifice in matters of inferior value  
I am referring, in these remarks principally  
to the special necessity of obtaining  
of seeds of Fruit & other trees from Europe - The  
short passage of Ships <sup>Atw' Jw\* ^\* ^\*</sup> & Greenock -  
would secure with a very little attention the  
arrival of supplies of grafted trees of all  
descriptions & little, <sup>JUULb Jtt Sb- & £b</sup> occur in  
obtaining the same assistance thro the medi-  
um of Ships sailing from the Southern ports  
of Spain or France I beg to be understood that  
I lay great stress on obtaining engrafted  
plants We are apt to it is very natural in  
any difficulty to grasp even at a straw, but  
the Horticulturist whose hopes are buoyed up  
at the prospect of a few seedlings & those not  
even selected from among thousands of in-  
ferior promises will find his <sup>\*4t^</sup> stems  
soon <sup>away</sup> his money gone & his hopes blasted  
in the possession of a few Wild Fruits - more  
such than the apple & Cherry in their Wild  
state in England -  
With reference then to these  
observations I would suggest that the Establish-  
ment which may  
<sup>>.y</sup> <sup>-Jyi / - .</sup> <sup>f</sup> <sup>W\* nge</sup>

changes under the same should not be con- sidered inevitable & that when expediency may occasionally suggest a larger expenditure in some matters particularly in procuring foreign supplies - We may be allowed to economise in others.

I would explain that such an arrangement cannot interfere at all with the correctness of accounts under the precaution of discharging disbursements <sup>having</sup> the money - abstracts drawn for the actual men employed with a specification of what a saving has been made in particular purposes at the foot of the account that it will be drawn here- after as has provisionally been expended in or out such as intended.

They have to mention a fact which is that lapse of time may have escaped notices that establishments of the kind I have mentioned but which more numerous did formerly exist at every Civil Station in the interior - By the arrangement of Lord B. in 1793 the expense at each Civil Station was limited to 50 Rs per month - amounting however in the aggregate to no small sum & this was abolished not because it

... it was found useless but because there was  
no necessity for an additional Writer or  
a separate Establishment which in the end  
absorbed the allowance for the Garden.  
... Wallis is gone ... v^QrT Wallis expressed to me  
his earnest desire to see the proposed  
arrangement regarding the apprentices his  
experience warranting him to speak in the  
most favorable manner of that measure.  
... will of course be placed under the care  
... Head overseer in the same manner  
as those stationed at the Botanic Garden.  
... It is also intended to obtain  
the services of a few men from the West  
Indies who are eminent in the cultivation of the  
many valuable articles of produce which are  
obtained in the vicinity of Patna & other places.  
With regard to the number  
of apprentices required perhaps be suffi-  
cient to show that it is limited  
by all due considerations it\*ifcLs that with  
reference to the extent of ground - they will  
be of one to ten compared with the people  
I am obliged to keep for my small  
Garden in Charingcross a comparison  
which would overstep its object unless  
it

It were also wished that extended cultivation  
for agricultural purposes for orchards, for  
experiments on a larger scale, & in many cases  
particularly less attention & labor - than must  
be given in small confined plots & culture  
at all times to be neat & ornamental -

I have the honor to be,

Sir,

Yours most obedient servant  
J. G. Cooper

Spent the August 1842

My dear Mother

I was very glad indeed to hear from  
you & to get your letter of the 27 July  
notwithstanding I did give me such  
accounts of your ill health. That  
heard of your escape from Rogers  
and that you had come up to  
Mrs. Mason really a very unfortunate  
attack, but need it is so - I rejoice  
to hear that you have conformed to  
the suggestions of your medical  
advisors and have set off at once  
on a sea voyage, as I am persuaded  
it is the best step you could <sup>have</sup> taken  
and made very little doubt  
the hope of your recovery, that

it with you only let you to rights!  
and that you with return quite  
heart and well again and fit  
to encounter once more all the  
labours and fatigues of your  
service. - I am going to an  
interesting quarter too; which I  
say with a few you must please  
and many thanks in your own  
particular pursuit; and look  
to hear from you - that you are  
quite gratified with your trip.  
And you are sure and a  
pleasant prosperous voyage!

I am a great flatterer!  
and really feel much flattered

at purchasing them at my  
convenience with having no  
copy of the tract made if you have  
given place to this: and more  
particular at your kind expression  
regarding the original, feeling  
me to have a great value upon  
your Edition. It is pleasant  
having deposed as your docu-  
ment at the judge, and more  
so at being your own choice. But  
Gortals' blunders in such matters  
is unequal. I am sorry to see  
that there is every prospect of our  
losing him soon - and if all accounts  
are true about his being possessed

out. You have perhaps seen the last  
of him as he will probably have  
left India before your return.

Roger's too is gone home & I suppose  
I shall see him - but he will come back  
and you will nevertheless see him  
again in two or three years. I think  
altogether his flight in the revolution  
leaves some to be done. I think I should  
have done the same in his place.

- About old Mount Singh  
I am much obliged to him - as I told  
you before - your displeasure at  
his charges - at which he was  
very disconsolate. And I have  
now told him that you have directed  
his way to be stopped - at least the

with me at least - and was  
telling me a long story in consequence,  
but I told him he had better explain  
to you as he had to say for his own  
behalf - so he has dictated another  
letter for your dictation, for it  
seems of the Thacker's writing, which  
as he has begged me to send to you,  
I enclose it. He was always  
paid up his wages to the month -  
so daily about he required for  
Bookman, copies & other contingencies,  
which there was nothing to deduct  
from him of the amount he had  
charged; & anything that could  
be stopped but his wages for  
the time I got your letter - the wages

him an Agent. Has, I don't  
know. - Whichever would say  
with your mouth, be sure you  
Comical Man. He still continues  
sending down seeds. If you are not  
disposed to overlook his long papers,  
do you wish him to continue to  
do so, and to continue here, or  
to be sent down when the weather  
look permit? At we know about  
this, or don't know exactly what  
to do about it. And the old Chap  
whenever the remains gets  
nothing - - - - - Our rains have been  
unusually heavy this year  
I have seen no **2** ad of them. Hearty  
with them now, or how dangerous

tried of them - Hooper has not  
been well - there is nothing serious  
the matter with him - but he has  
confined himself to the house  
for a long while, & still keeps  
bed - His hope he will be  
out again soon. Robinson and  
Lak consequently generally  
tête-à-tête as usual - we may  
think - ?\*\* up the idea of  
reopening the &\*  
writing at Dinapour for the  
favorable weather for mounting  
the bills - What send this  
as per secure to Mrs. & children's  
care who will know best how

to forward it to you. I don't  
know about Penang and  
Singapore etc. - still we shall  
for think of China - you have no  
chance of meeting Deuce August  
there - as the work we have done  
reached Rekin even before  
you are returning - Rogers says  
that Handwiche does not go home  
this year - when will he go? is  
the question - both just before  
I have no news - but am always  
by dear love

Yours affectionately  
Edward Mather

Wm. D. Linn

I have been in a very painful  
sorry to hear that you  
ordered to stop my wages  
but how could I then  
maintain myself here without  
it. I have no body here to  
borrow money nor share  
cash about me to support  
myself except that wages  
which to say we are same  
wages. The change  
which had been sent to you  
was very properly incurred  
and there was no any defence  
but if it appears to you  
improper I am without means  
your

March 12<sup>th</sup> N. York. 1872

Glasgow, Aug 24<sup>th</sup> 1826

My dear & valued friend

In my return from the Highlands of Scotland, late last evening after a long & arduous botanical tour, I had the great happiness of finding a letter in your well known handwriting enclosed in one from Mr. Poston, who has kindly taken charge of two packages from you for me, & which I now expect daily to receive.

I feared that you had been ill, & now your return accedes my fears. May you long before this time be restored to perfect health & able to resume your useful & important labours. In your last (I since my last letter to you through the foreign office) had the pleasure to receive your valuable parcel of Mofos through Mr. Brown, (then Pilot Capt. Armstrong), in which are some charming species & especially one new *Oryzomys*, the first I ever saw.

As Mr. Poston who is now in London, may be able to dispatch to you a small part, by means

of some of his friends in the E. I. Company's service,  
I have enclosed, with this, a copy of my Flora Sericea  
& the 1<sup>st</sup> Part of my Flora Exotica for you. This  
letter I hope will give you pleasure. The contents  
I shall send as it appears, by the earliest  
opportunity, & I hope it will be found to contain  
many of your valuable discoveries among the  
phanogamous plants of Ind. ← Through  
my friend Dr. Wilkins of the India House, the  
E. I. Company have most readily granted me  
permission to figure & describe from their drawings  
the plants from China, Roxburgh's Coromandel  
plants (not to be contained by the E. I. Company),  
Dr. Keyser's from Madras, & one mutual friend  
Dr. Hamilton's, with which latter gentleman  
I have twice been staying this summer at  
his seat at Leary. I hope I shall be able  
to do justice to them. You will thus be able  
to judge how very valuable will any specimens  
of E. Indian phanogamous plants be to me:  
as I should like much to compare their  
drawings with authentic specimens in my own

collection. Dr. Hamilton, as I believe I have  
mentioned to you, has been suffering with a  
disorder, from which I am happy to tell you he is  
now recovering. He is as fond of Botany as ever &  
is now preparing for publication a Commentary  
on Dioscorides. His Work on the fishes of the Ganges  
is very beautiful.

Dr. Gauchman is well & has a glorious Professor-  
ship at Edinburgh. Dr. Taylor I am expecting  
in a short time from Ireland, to make a long  
stay with me, that we may work together at a  
new edition of our *Musculogica Britannica*, which  
has been long out of print. I shall not fail  
to communicate to both these friends your  
kind remembrances.

Your next letter I hope will be satisfactory  
respecting the state of your own health.

Believe me to be, my dear Sir,

your most faithful & obliged  
friend & servant

W. J. Hooker.

Many, many thanks for the vol. of *Fl. Indica*

 the herbarium that might  
 suit. Should the plan be  
 carried into effect may

J. W. Water  
 The Noble  
 W. E. Killip

C. Lushington Esq.  
Acting Chief Secretary to Government  
General Department.

Sir,

A few days previous to my leaving Calcutta I was favored with the receipt of your letter of the 18<sup>th</sup> ult. together with its enclosure of a copy of the minutes, recorded by his Excellency the most Noble the Governor General in Council on that date, relative to the transfer of the premises and grounds at Tactaghur, near Barrackpore to my charge, as a dependency of the Hon<sup>ble</sup>. Company's botanic garden.

2.  
The circumstance of my being very ill at the time prevented my <sup>exploring</sup> <sup>helpful</sup> <sup>being so far</sup> from the spot just now, <sup>Z ^</sup> concluding my entering for the present, into that detail of the interesting subject under consideration, which is authorized by your letter, any further, than by having the honor of submitting the following scheme of an establishment, which I think necessary for the due attainment of those highly important objects, which his Lordship in Council appears to have had in view in the resolutions that have been passed. - As soon as possible after my return to my duty at the botanic garden, I shall do myself the pleasure of reporting to you in what manner, I may judge, that the Tactaghur estate can be rendered most subservient to agricultural purposes, but in the mean time, as I doubt not but Mr. Leicester, who kindly officiates for me during my absence, has formed a plan for the immediate, at least temporary cultivation of the grounds, they leave to propose that the following

vW I&JP.

following establishment be attached to them, from  
 the formation of it I have had the advan-  
 tage of consulting that eminent horticulturalist Mr  
 Lamb, persuaded, will always be ready and ready  
 to assist with his valuable advice an institution  
 so eminently calculated to carry into effect practi-  
 cally the various suggestions and improvements  
 which may be proposed by the Calcutta Agricultural  
 Society, of which he is the worthy president. These  
 two interesting institutions will then, as it  
 were go hand in hand, in promoting one of  
 the grandest objects of an enlightened and bene-  
 ficent Government, the increase of happiness  
 of its subjects, which must  
 result from an improved state of their agri-  
 culture and husbandry, and which, I most  
 ardently hope, ~~may~~ <sup>and will</sup> abundantly <sup>repay</sup> justify the  
 monthly expenses, which the cultivation of the  
 Teetagarh grounds will be attended with.

3, Proposed establishment:

1 European overseer	Rs 60
4 Apprentices, to be selected from the Orphan institution, and to be placed on the same footing and for the same purposes as those which have been so successfully attached to the botanic garden,	140
1 lineer & water	20
2 native cultivators, at 8/	16
40 coolies, at 3/	120
1 wooly waddai	6
1 dilla mate	5
4 chowkedahos at 5/	20
2 peons, at 5/	10
2 grammies at 5/	10
1 carpenter	8
1 bricklayer	6

Per month Rs 421.

4<sup>th</sup>  
Not being in possession of a survey  
of the lands in question I have been guided, in the  
preceding schedule, by a calculation, founded on  
my knowledge of the estate, in consequence of  
having had the honor of being consulted on  
various occasions respecting it, that the extent  
does not fall much short of 90 biggas. As  
certain contingencies will be incurred for the  
purchase and repairs of implements, for the  
procuring of seed and grains from abroad  
&c. My leave to suggest, that these should  
be deducted in such a manner, that the whole  
monthly expenditure for the management  
of the institution, under the two heads of  
establishment and contingencies, may  
not exceed 500 Rupees. —

Prince of Wales }

Prince of Wales's Island  
20th September 1822

Honoured Sir,

For the first time since your departure I take up my pen to inform you of getting on with our Botanical Mission.

On the morning after you sailed I waited on Captain Burchard and showed him my instructions, he kindly told me that when the Honourable the

Governor had fixed on the ground and number of acres to be allotted me, he would let me know. I waited in expectation of hearing further on the

subject until the following Monday, when, according to my instructions I waited on the Govr, who told me he would assist me with pleasure in any way he could; he had given directions to Captain

Burchard respecting the land and referred me to him for further information on that head. I mentioned to him that the Postmaster had told me that in order to send Packets of seeds to Bengal free, it was necessary they should be franked, upon which he most kindly desired me to send any Packets I might wish to forward to him and he would

take them. On leaving the Govr. I waited on Capt. Burchard who told me he was going to write to me respecting the land that day; he had

of ground which were left to my choice, one near opposite the house appropriated to the use of

Naval

\*WV\* \*A>>. ^

All water in it part of it is at present **h #L ^** And  
Plantation, the roots of which trees spreading in every  
direction I feared would be **^L ^\*~\*a£< ^J** l. The other  
piece of ground near the Convent Lines is dry and  
clear, **d ^\* \*\*£ ~ ^£3£3** on two sides by the River running  
from the Hills, which will always supply us with  
good water and save the trouble of cutting a ditch  
on those sides, which is an object which every time  
is so limited; the soil appears rather sandy but I  
obscure it is the case with most of the land thereabouts,  
and the trees, plantations, &c, planted on the **5 ^ . ^**  
side of the River grow luxuriantly: This latter spot  
certainly appeared to me by far the most eligible  
and it is also at the foot of the hills from whence things  
can be more easily introduced and the river being  
close to these Lines can live in them. The first  
mentioned piece would be the most desirable were  
I to study my own convenience as it is not more  
than 300 yds from **^ - e ^ > . < ^ ^ . . w .** than the other  
is upwards of 3 Miles, which renders it rather incon-  
venient for me to attend to it properly, considering  
my other associations and the not being able to obtain  
a Poney although I had offered as high as 50 Dollars  
for **^ ^ ^ . ^ .** the whole I considered it my duty to  
make choice of the piece near the Convent Lines. I  
was rather at a loss as to what quantity I ought  
to fix upon, a very small piece would have answered  
for a Nursery to prepare seedlings for Bengal, but  
as Plants are also to be introduced from thence into  
it, together with the likelihood of an Horticultural  
Society being formed who might wish to try experimen-  
ments

18th Aug 1830

on the Island whom he would appoint to take  
care of it after our departure. In reply I said that  
though my time might be too limited to carry your  
plans fully into effect of procuring every thing on  
the Island for the Garden at Calcutta, you would in  
all probability leave one of the Garden Apprentices  
here to finish what I have begun, I showed him  
my instructions mentioning that I expected full  
ones every day from you at Simsbury. I also request-  
ed that Robert Edes should fill them :- ^ when he kindly  
told me he would have them filled himself, and  
said that he would agree - - ^ <^v ^ promise he would  
gr - ^ that effect. To save time the Gen... x"-X:..  
offered me permission to collect and plant things  
in his own Garden until the other piece is ready  
which offer I with pleasure accepted as it will  
enable me to procure things much quicker than  
otherwise could. He also requested me to send him  
a small quantity of the seed of any climbers or  
Creeper I might collect, as he observed some of  
them are very beautiful, and he will give me part  
of the seedlings raised from it, for transmission  
to Bengal. My people are not so active as I could  
wish but I can expect nothing better from Beng  
Gardens. I fear I have intended to scribble on your  
time, therefore will conclude. With fervent  
wishes for your complete recovery

My Dear Sir - Allow me to introduce to  
your acquaintance our Deputy Auditor General  
who proceeds on a visit to Calcutta - he is  
a particular friend of mine - and this  
I am sensible will obtain from you a  
favorable reception for him - I trust  
your health is quite re-established - after  
your labours in the regions you have  
explored - I send you enclosed a  
few seeds from Madagascar - which I  
have received from Mr Hilseburg one  
of the German botanists sent by the Gov<sup>ty</sup>  
into the interior of that island - those  
that are planted here have come up -  
they are of a species of orange which  
grows as large as a mans head - and  
Dr. Wallis - -

the natives of Madagascar eat the  
white pulpy part between the rind  
and the seed envelope - & not the  
juicy part as in other oranges -

I dare say our friend Ballard  
has told you of our happiness here  
in the increase of our family - I  
have a little son whom I am  
ambitious of presenting to you - as  
well as his mother - if you come  
down here - we shall be glad  
to have such an occasion of  
receiving your family - & becoming  
acquainted with them - Believe  
me ever your very affectionate  
friend

Wm. W. W.

Prince of Wales's Island  
22<sup>nd</sup> October 1899

Honoured Sir,

Your welcome letter dated the 3<sup>rd</sup> Instant came to hand the day before yesterday. With much pleasure - C-&T3 that you are again in possession of perfect health, and that Julius is also well and behaved himself so as to gain your entire approbation.

The two packages of Paper you have been pleased to forward will prove particularly welcome as the last stock I had in is nearly exhausted and I suppose the Prince Regent will be here in a day or two.

I have unfortunately been mistaken as to the manner in which I ought to have directed my letters to you, instead of directing them to Singapore I have forwarded them to China by the Cheong of which I recommended to the care of Mr. Rivers with whom I thought you would probably reside - a letter from Madras to your address I have forwarded in a similar manner.

I wish it were in my power to give you a favorable account of the Amoy you have been pleased to place under my care, but alas it is not, I have met with so many obstacles in my endeavours to - r T A \* / A L - t \* \* V \* A \* A \* - to a forward state that I fear you will not find it such as you could wish on your return. It was not until a fortnight after your departure that I could get either  
either

either land or sea, of the former, two places  
were <sup>my choice</sup> chosen, one near the Navy Captains  
house and not more than a  $\frac{1}{4}$  of a mile from the  
School House, the other by the Council Lines near  
the Governors house, the former would have been  
by far the most preferable had I studied my own  
convenience but it lays very low, and is liable to  
be washed by the Salt water at very high tides, which  
in my opinion renders it unfit for the desired pur-  
pose, accordingly I made choice of the latter though  
at the distance of 3 Miles, as I considered it eligible  
in every respect being bounded on two sides by the  
River running from the hills which will always  
afford us an excellent supply of water. The quantity  
of the ground was also left to my choice and I  
have enclosed a piece containing rather better than  
3 Acres, by digging a ditch 5 feet wide and 4 feet  
deep on the sides not bounded by the River, and  
have just finished planting the Bamboos <sup>around</sup> ~~round~~  
around it. I have also constructed a bridge to it,  
cleared away most of the Jungle, and have now  
nearly finished making a Path up the center of it.  
on each side of which, it is my intention to  
plant a row of the beautiful *Juniperus* as soon  
as I can get the ground in proper order by hoeing  
or Digging: I was at first allowed 9 Men in  
heavy Irons to cultivate it, of these men more or  
less are sick every day, and at times I have only  
had 4 out of the nine at work, the others being sick,  
there

hours of working is from daylight until 2 O'clock  
when they leave off for the remainder of the day.  
Sunday is a holiday and they have two other  
holidays monthly to go and get their pay and  
Provisions, and as I am told these are the standing  
reputations I cannot imagine them Independent of  
this they are so lazy and their manner of working is  
especially slow, that I can justly say they are less  
trusty soldiers than the Bengal Coolies, for they have  
no sense of shame. I can only attend them a short  
time every day in the morning, as it is a great distance  
and I cannot be back by 9 O'clock to be in time  
for the Court which takes up more of my time  
than I first expected. I have also been summoned  
to sit on the Petty Jury during the Quarter Sessions,  
which takes up more of my time, and the Parish  
Checks duty in the borough which though but trifling  
employs me occasionally. Under these circumstances  
I leave you to judge whether it is in my power to  
get on so well as I could wish. Bullock is prin-  
cipally employed in collecting specimens, birds &c  
which I also take care of at home, he has been out  
the while, stopping with the Signal Serjeant there,  
this last week for that purpose, and what he collects  
he sends down to me every Evening to be dried, as  
I have left the 5 Men without Irons, allowed by  
Gov. to assist him in  
to hope I shall succeed better with the latter  
than <sup>with</sup> the former as I have them more under my  
own eye, we have got a considerable collection  
of

-?gr7&\*-. -te—^s?\*

Young Antelope, kindly furnished from the Gov. Garden.

Observing that some time <sup>was</sup> <sup>lost</sup> <sup>in</sup> <sup>the</sup> <sup>past</sup> <sup>times</sup> <sup>and</sup> <sup>it</sup> <sup>is</sup> <sup>now</sup> <sup>found</sup> <sup>that</sup> <sup>the</sup> <sup>ground</sup> <sup>can</sup> <sup>be</sup> <sup>put</sup> <sup>in</sup> <sup>order</sup>, I thought I had better be doing what I could in the best time, so I have had a dozen <sup>Flies</sup> <sup>sent</sup> <sup>to</sup> <sup>the</sup> <sup>ships</sup> <sup>and</sup> <sup>the</sup> <sup>hills</sup> <sup>and</sup> <sup>elsewhere</sup>, and dispatched <sup>them</sup> <sup>to</sup> <sup>the</sup> <sup>Garden</sup> <sup>two</sup> <sup>are</sup> <sup>ready</sup> <sup>and</sup> <sup>will</sup> <sup>proceed</sup> <sup>on</sup> <sup>the</sup> <sup>ships</sup> <sup>India</sup> <sup>for</sup> <sup>Bengal</sup> <sup>on</sup> <sup>Sunday</sup> <sup>next</sup>. <sup>four</sup> <sup>others</sup>, which I left in the Shed at the foot of the large Hills for Mudduk and the people to fill, will be brought in, in Carts tomorrow, but I must keep them a few days to see that they are properly established. We have got many things already that you have mentioned, and nothing shall be forgotten. The <sup>Agnes</sup> <sup>pleasant</sup> <sup>Skins</sup> shall be forthcoming as you are if I can possibly procure them. Mudduk and myself are quite well, and

I remain

Sir,

with respect,

Your most obedient & faithful Servant

To  
N. Mallik Esq. M.D.  
Secretary

George Porter

The Honble

Sir J. S. Raffles Kt

Gov. Gen. of Sumatra

Yr. G. G.

Honble Sir

I request your indulgent attention  
while I take the liberty of submitting for your  
consideration some ideas, which have occurred  
to me relative to the expediency of establishing a  
Botanic and export garden on the Island

It would perhaps be impossible  
to picture to the mind a situation better calculated  
in every respect to accomplish the end of such an  
institution than that, which Singapore repre-  
sents in reality. Placed under circumstances  
the most favorable for indigenous as well as foreign  
vegetation and forming part of the richest archi-  
pelago in the world its soil yielding to none in  
fertility, its climate not exceeded by any in uni-  
formity, mildness and salubrity, it abounds in an  
endless variety of plants equally interesting to the  
botanist, the agriculturist and the gardener, with  
unrivalled facilities and opportunities of disseminating  
these Treasures and exchanging them for others -  
To form a just estimate of the prodigious extent of  
the

The history of this astonishing mine of natural curiosities would require the labours, at least of some years, exclusively devoted to its investigation: an undertaking, which the infancy of the settlement, together with various other concurrent circumstances have naturally prevented from being hitherto accomplished. Fortunately the researches of barely a few weeks, instituted by my only predecessor in this interesting job and amply verified by my own personal observations are more than adequate to exemplify what has been advanced above, both as to the wonderful resources of the Island and the ease with which they might be still further augmented.

How may I hope to be forgiven while I indulge a few moments in rendering a public tribute of respect to the memory of a departed friend, to whose lot it would have fallen and who would have been by far the best able to address you on the present occasion, had he not thus early sunk a victim to the most ardent pursuit of Knowledge. During Mr. Jack's short and unobtrusive, but highly useful and meritorious career, his comprehensive mind extended to every branch almost of moral and physical science with a degree of success, of which none can judge than yourself. Worthy Sir, who was pleased to honor him with your distinguished

friendship and confidence, and which the world has ample opportunities of appreciating from the numerous valuable contributions to the common stock of information both printed and in manuscript. To his family and friends the certainty of such a man is indeed incomparable; nor can it be repaid to the public but by an equally fortunate combination of first rate talents, with the utmost suavity of temper and urbanity of manners. -

I return with pleasure from the graceful disposition to the magnificent and novel promotion which adorn this delightful Island. Scarcely a dozen of these are known to the world beyond what have been published by my departed friend in the Malayan Miscellany, and the Linnæan transactions, perhaps not one of them has ever found its way into any botanic garden in Europe. In this view alone the proposed establishment, <sup>and</sup> deserves every attention which could be bestowed on it by a liberal Government, independent of the numerous other advantages which it would possess in common with all similar institutions and which it would be perfectly unnecessary to take up your valuable time in enumerating here. It will be presently seen, however, that there are considerations of an agricultural and commercial nature of such importance to this most flourishing settlement

ment as to render an experimental garden an  
object of no common interest to its prosperity. I  
allude to a vast number of trees, constituting the  
bulk of their primeval forest, which fully show  
the trial of an extensive cultivation. Among them  
there are many, which yield timber fit for  
ships and house building and for all purposes  
of carpentry and joinery; if the Teak is not  
among their number, others will be found, as  
closely resembling it in its principal features,  
as to be little inferior to that celebrated wood.  
Indeed I have no hesitation in asserting, that  
the spontaneous <sup>productions</sup> of the Island would afford  
abundance of every material for the construc-  
tion of ships of every description and size,  
and that the Teak, Sipo, Mahogany, Bam-  
boo, and a great variety of others, might with  
the fairest prospects of success be introduced  
and cultivated here. The experiments which  
have already been made by the Resident,  
Lieut. Col. Farquhar, to whose untiring per-  
severance and most cordial cooperation I am  
indebted for whatever success has hitherto  
attended my enquiries on the Island,  
abundantly prove that the Clove and Nut-  
meg thrive here uncommonly well, nor  
is this to be wondered at, since the wild  
species of the latter species are so numerous. The  
I have

have been able to discover no less than five distinct  
ones in the immediate vicinity of the Cantonments  
alone. In fact there are neither mountains, ravines, pro-  
cess animals, or any other impediments in the  
way of cultivating these valuable trees; on the  
contrary the frequent hills which lie scattered  
over the whole of the Island, none of them, pro-  
bably, exceeding 150 feet in perpendicular height,  
present the most advantageous situation for their  
growth. How well the Pepper, Gambier, even the  
sugar cane succeed is obvious from the number  
of their flourishing plantations, and that the best  
cotton in the world, the Permambuco sort, thrives  
luxuriantly may be seen from the individuals  
that have been raised from seeds imported by  
yourself a few years ago at the very commencement  
of the Colony. The Coffee shrubs promise to succeed  
as well here as it does in Java; even Tea grows  
freely and seems to bear nothins in luxuriance  
of flower and fruit by the change from its native  
climate. Similar observations apply to a vast num-  
ber of Malayan and exotic fruits and vegetables,  
cereal grains and other objects of husbandry and ho-  
ticulture, which offer themselves as well deserving  
of a judicious and efficient trial. In short, where-  
ever the eyes are turned we behold a most  
encharming scene of Nature beautiful almost  
without a parallel and holding out unimpeded  
rewards

reward and success to every one, who may choose to draw on her riches

With reference to these facts and  
deeply impressed with the conviction, that the cause  
of science and the arts will always continue to derive  
the utmost support and encouragement from your  
enlightened Government they have to recommend  
that a suitable piece of ground may be appro-  
priated in the neighbourhood of the European  
town for the purposes of a botanic garden and  
for the experimental cultivation of the indige-  
-nous plants of Singapore and the adjacent Isles  
as well as of such others of foreign growth as it  
might be ~~any~~ desirable to submit to a skilful  
trial, previous to encouraging their general  
introduction. The expenses of such a garden  
would, I imagine, be moderate, that they would  
in the event be infinitely compensated by the bene-  
-ficial results, which the public at large would  
derive from its influence, I am certain. They  
would be limited to the support of an efficient  
establishment and to a few monthly contri-  
-butions, and might be defrayed by a number of  
specie trees expressly cultivated for that purpose.  
I trust that the Supreme Government  
would willingly authorize any supplying some  
botanical apprentices and a couple of experienced  
gardeners from the Honble Company's botanic  
garden.

Given at Sabotta on Sunday 1 Nov 1892

Proposing a bottle and  
experiment garden at  
Puzosara

Edinburgh 8<sup>th</sup> Nov. 1822

Dear Sir

Your most kind letter of the 4<sup>th</sup> February, was  
brought to me by Mr. Paxton on his arrival in L. 1800,  
in which I afterwards received the package of  
which you were so good as to place under his  
charge for me. Believe me my Dear Sir I have the  
highest satisfaction in your correspondence, &  
in most thankful for its frequent repetition,  
and I am much obliged to you for the  
information which your letter would have given  
me should it contain of your serious  
illness, & it gives me the kindest anxiety  
to hear from Mr. Paxton, that your recovery was  
now complete & he has parted with you  
assured that you have recovered your  
& more letters than I would the continuance  
of ill health, — but I hope for better  
news next letter

I should

stant Mr. M'Kee, I am sure I can promise /'fe/  
my justice will be done to living plants, for I am  
truly warranted in saying that he is one of the  
& successful cultivators in Britain. - Will  
allow me to suggest that growing plants are  
more likely to succeed with us if pretty large &  
rooted ones are selected, even tho' it should be  
my to lead them down before planting them  
to box, - small & very young plants are extremely apt  
to wither - I mention this circumstance to Mr.  
to today in a box which we got home from the  
to India a few weeks ago. The greater part of the smaller  
by plants were withering out of the s "t^j£ > <dc/&fr&^fez&e strong  
as the la i^A^ you're all alive... - May I say of  
also when you send plants in that way to sell &r  
with all kinds of seeds, as Palm seeds &c, &c...  
will begin to germinate on t^fez f  
a better chance of succeeding than plants w^h  
M^\_ ^ tXrt. / ^ 7 J^tjCc a/ slender seedlings, at any rate  
t. ^is C ejuyrff in shall be always careful  
in hopes of something springing from  
it.

it -- If you can't give me any idea of the kind of  
seeds you would like from this, or if you would furnish  
me with a list, you may rely on my very best exertions  
to testify to you my thankfulness for your liberality in  
your. Mr Maxton has very obligingly offered to take  
for you now. They are chiefly from America & the coast  
of Europe. The Package would have been more extensive  
if I had known a day sooner that he was to sail for  
London tomorrow. -- He will tell you that we  
are with our new garden. I confidently hope that  
will answer my most sanguine expectations.

My Mother, whom you are so good as to remember,  
is now on the Jamaica station, having been ordered as  
Cape where ~~the~~ papers of paying you another visit.  
You will be ~~sent~~ from my friend Mr. Griville, ~~with~~ ~~a~~ ~~parcel~~  
with a Parcel to Lie Charles D'Ayly ~~in~~ ~~his~~ ~~request~~.  
Remember me very kindly to Mrs. Probert, ~~who~~  
never ceased to talk of her constant attention ~~to~~ ~~me~~ ~~after~~  
loss of the Carron in particular. --

Believe me my Dear Sir, with every anxious wish  
your health & happiness

your most truly yours

W. Wallick Bot. Gard.

My dear Sir,

My pleasure in returning with respect thanks  
for the volume of Phil. Transact's (1870 pt. 2) containing

AM\*^/^ . | q\*£^ o ^^

some 100 express the pleasure of presenting  
you with the copies and few more which were  
taken down on Sunday last, when Mr. Montgomery  
myself opened the <sup>male</sup> animal under your directions.  
Have been so free as to extract these <sup>Sc</sup> <sup>\*\*<\*</sup> <sup>her,</sup>  
by excluding all unnecessary repetitions of what  
your interesting account of the animal in the  
mensural volume contains, and admitting of such  
points only, as have a <sup>direct</sup> reference to the individual  
in question. My also to call your recollection  
that we were all of us obliged to be as quick as  
possible in preparing the parts for despatch to  
Mr. E. Home in consequence of the calendar beat  
in afternoon (the Duzong being <sup>7</sup>  
preceeding night); hence the limited number and  
superficial nature of the following remarks.

£u+\* yu+^~^J

The representation of the animal (tab 35)  
is very correct & faithful, except as far as regards  
the chin which forms not the least prominent feature  
of the Duzong. It is large, <sup>having a width only and protruding closely</sup> <sup>conical</sup> about 3 inches long,  
its apex blunt and broad. Circumscription of the

Truncated proboscis

snout ovate - rounded, having the narrowest part down  
wards; a slight furrow divides the disc perpendicularly.  
Colour of the skin bluish, leaden; resembling, as  
far as I can recollect that of the gongylos per  
poiss; a number of short <sup>^s^zSt\*</sup> ~~are~~ irregularly  
and remotely scattered over the upper part of  
the body; underneath they are much fewer; and on  
the whole they appeared more copious than in  
any preceding specimen that had come under  
Your observation. - On each side of the upper  
jaw, within the lip were observed a row of 10 or 12 small  
round apertures of unequal size, leading apparently  
to corresponding salivary ducts, and yielding ~~me~~  
<sup>successive fluid mixed with blood.</sup> prepared a ~~campid fluid~~. - The penis concealed and  
considerably retracted within a longitudinal fissure  
in the abdominal skin, about 3 inches long, 7 inches  
behind the umbilical vertebra and 12 inches from the anus.  
The umbilicus consists of a very <sup>clyt4</sup> furrow or fold  
about an inch long corresponding directly with a round  
hole in the abdominal coverings of a size to admit  
of the end of the small finger. - Extremity of the body  
<sup>^4, vfy M^t^t^t^t^t</sup> with the tail slightly & obtusely acuminated  
above for the space of about a foot. - Contents of  
the great cavities very vascular and large; the  
lungs peculiarly beautiful, of a pale pink colour  
very smooth and even; when inflated each measured

2 feet 6 in. **.U** length by 2 feet in circumference, repre-  
 senting a longitudinal segment of a cylinder, flat-  
 ting towards the posterior extremity, inner side longi-  
 tudinally concave, outer one strongly convex; upper  
 thick and gibbous lower rather thin; -  
 transverse section would pretty nearly resemble  
 this figure 

Dimensions

Ground length	7
Length, from the middle of the tail to the under lip, along the curvature of the body	6 - 10
Circumference about a foot behind the insertion of the fins	4 - 10½
Dorsal fin	3 - 6
Do. base of the tail	1 - 4½
<del>Length of the dorsal fin</del>	<del>2 - 8</del>
Width of tail	2 - 4
Length of fins	1 -
Distance of the eye from the corner of the mouth	1 - <b>yt</b>
Do. from <b>A EU</b>	1 - 4½

x I forgot to mention about the fins; they are broad,  
 margins very scabrous towards the extremity

and a little less in consequence, probably, of the  
being employed to support & support the  
arrived & postures somewhat added.

Finally I must leave out to  
the delicious taste of the ~~supper~~  
which we all agreed <sup>to be</sup> ~~very~~ <sup>very</sup> ~~delicious~~  
too, and produced ~~very~~ ~~and~~ ~~after~~ ~~the~~  
also agreed <sup>at 7 o'clock</sup> plans, one to be most  
excellent. That the Royal Society  
will have a fine copy of your ~~work~~  
to the King's book you prepared for them;  
and that your invincible ~~year~~ <sup>will</sup>  
enable me to lay in a good ~~store~~  
Messrs. Durrant for the ~~expenses~~

Nathaniel Wallich Esq.

Jr. Jr.

Superintendent of the  
Botanic Garden

Sir,

I have to acknowledge the receipt  
of your letter of the 12<sup>th</sup> Inst. submitting for my con-  
sideration the advantages of establishing a Botanic  
and experimental Garden at this settlement

situated as Singapore is, on the very  
west of the Malayan Archipelago and midway  
between India-China and New Holland it is  
hardly possible to conceive a position more advan-  
tably calculated for such an establishment as  
your active zeal in the cause of science has  
prompted you to suggest. - The advantages are  
obvious and I rejoice that I am enabled to  
avail myself of your superior genius and expe-  
rience in laying down a Plan for its commence-  
ment. -

This Plan must necessarily be limited  
by the means afforded for the support of such  
an Establishment and in the present circum-  
stances of the Settlement I do not feel myself  
justified in holding out to you a larger sum  
than 60 Dollars a month but I will cheerfully

contribute the sum of One Thousand Dollars as a  
donation in the first instance for the purpose of  
enclosing and laying out the grounds in such  
manner as you may think proper. A Grant  
of the Ground shall be made out in the name  
of Nathaniel Washburn and his successors in the  
superintendance of the Company's Botanic Estab-  
-lishments under the Bengal Presidency and in  
submitting the same for the confirmation of  
the Most Governor General in Council I shall  
have great satisfaction in conveying to that  
Authority the <sup>&-&ty ^t&ir-as&i ^</sup> opinion which I entertain  
of your Botanic Gardens in the Eastern Provinces  
- of Calcutta and of the advantage your results which  
may be con- d^& 5 stituted by the formation of so  
rational and useful an Establishment un-  
-der such favorable auspices.

With this understanding you  
will be pleased to select the most advantageous  
site which offers for the purpose keeping in  
view the advantage of the Establishment being  
as near the Town and the intended residence  
of the Chief Authority as circumstances admit  
and the propriety of defining the Boundaries  
with exactness The spot already occupied as a  
Government Garden offers considerable adv- >fci\*  
-antages and with reference to the whole of the  
Hill

Will having been reserved for the accommodation  
of the Ship Authority except in as far as it  
may hereafter be required for defence I am induced  
to suggest for your consideration the facility with  
which the proposed Establishment may be  
formed in that direction by extending the  
present Garden so as to include as much ground  
as may be required under this arrangement  
the Garden might include the Eastern side  
of the Hill and extend as far as the Fresh  
Water stream or the Road leading to Bunkit  
dale; Northward it might include any extent  
of ground required and towards the sea the  
front might be formed by a handsome railing  
at the distance of 20 or 30 feet from the Conti-  
nental Road which runs from the Water  
Course to the small Bridge - Within this space  
the Establishment would have the advantage  
of Hill and Dale of level and swampy ground  
as well as of a copious perennial stream of Water.

In defining the Boundaries and  
laying out the ground on this or any other  
more advantageous spot that you may fix  
upon you will be assisted by the Assistant En-  
-gineer who has been directed to attend to your  
requests whenever called upon.

Allow me to express my obligations

to you for the <sup>/44/M</sup> and feeling tribute which you  
have <sup>^</sup>aid to the revered Memor. <sup>yx^r</sup> lamented  
friend Mr Jack; no person is more competent than  
yourself to appreciate the value of his labours and  
it is no small consolation to reflect that while  
they are followed up by a mind so ardent and  
so congenial with his own the importance of  
his researches and the excellence of his Charac-  
ter can never be forgotten. -

I have the honor to be  
Sir,  
Your most Obedient Serv<sup>t</sup>  
(Signed) T. S. Raffles

Nov 21 1822  
Dear Mr. Raffles

Ready to letter from  
L. J. Raffles  
2 Nov 1822  
Raffles & Co. Singapore

The Honble

Sir Thomas S. Raffles, Knight  
Lieut. Governor of Sumatra.

per per per

Humble Sir,

I beg leave to acknowledge the receipt  
of your letter of the 15<sup>th</sup> instant replying to the application  
I had the honor of addressing you on the 2<sup>d</sup> of this month.

In conformity with your instructions  
I have carefully examined the grounds suggested by you  
as the most eligible site for the proposed botanic and ex-  
perimental garden and I have to state, that the result  
has been in the highest degree satisfactory; they appear to  
be in every respect calculated to answer the ends in view.  
In order to enable you to form a clear idea of the  
situation and extent of the ground which I take the  
liberty to solicit may be added to the government  
garden, I beg to submit to your approbation the ac-  
companying sketch made at very short notice by  
Lieut. P. Jackson, Assistant Engineer, to whose ready  
and valuable aid I stand greatly indebted on this  
occasion.

You will be pleased to observe that  
the government garden forms the point from whence  
we have proceeded and that, together with the pro-  
posed addition, it forms an oblong tract, occupying  
a proportion of  $\frac{1}{10}$  of the area of the government  
at Singapore hill and the adjacent low grounds,  
extending in a N. W. direction, where it is termi-  
nated by Bukit Selat. From thence in a <sup>S.E.</sup> di-  
rection it is bounded by the Selat road, the  
cantonnement road forms its S. E. boundary and  
the

the sand leading rain 5 ^~p^^Jui> e&vS^  
the government garden defence  
extending, and defining, the garden it will be under  
to comprise an area of about 48 acres (or 144 Ben-  
-gal bighas) of land, enjoying all the advantages  
specified in your letter, of soil and aspect, eleva-  
tion and depression, dryness and wetness, a constant  
supply d ttf+Jw fH\*~s or small rivulet running  
nearly through its middle, besides those of easy  
access, and such as must necessarily result from  
its situation immediately under the eye of the  
chief authority.

<^A>^#Mfc^\*TMy\*~5fi JLz\*^ A\*ct\*\*  
•A\*i<<tA\*4-> only to the garden, in as far as it is  
suggested that this should be surrounded by an  
appropriate ~~affirmative~~ enclosure, but I request that I  
may by no means be understood as intending  
to exclude from the objects of the garden the other  
parts of the government hill, which you have been  
pleased to recommend as available. On the  
contrary, I beg to propose, that they should be  
laid out as a park by the superintendent and  
ornamented with a variety of trees and shrubs, in-  
digenous and foreign, that they should form part  
of his charge and thus be rendered essentially  
contributive to the general objects of the Singapore  
botanic and zoological gardens.

The immediate departure of the  
John Adams, on which I proceed to Bengal, un-  
fortunately precludes my entering at present  
into any detail of the internal arrangement  
of the garden, I shall however > A\*\*LU^~\$&^M.AA\*JX7

oppo.

opportunity of submitting my views in this res-  
pect for your consideration

I have the pleasure <sup>A\*</sup> to report, that Mr. Ap-  
dinger on Montgomerie at this station, to whom I ap-  
plied according to your permission, will be ex-  
tremely happy to undertake the temporary  
charge of the garden. I have accordingly had  
the honor of consulting with him on the most  
material points to be immediately attended  
to, and we have agreed on the necessity of de-  
voting the whole of the monthly sum of 60  
Dollars, which has been allowed for the cultiva-  
tion of the garden, to the support of a permanent  
establishment of ten labourers and one overseer;  
and we propose reserving your splendid donation  
for such purposes, as well as one incrementally  
benefit the institution, and perpetuate the  
name of its munificent founder and first patron.

In conclusion I respectfully re-  
quest to be permitted to tender you my warmest  
and most grateful thanks for the flattering man-  
ner in which you have been pleased to accept  
of and notice my humble endeavours, a distinction  
which I value more than I can possibly ex-  
press and which I shall always exert myself  
to the utmost to merit.

I have the honor to be  
Honorable Sir

Your most obedient humble  
servant

\$

Handwritten text, likely a letter or document, written in cursive script. The text is dense and covers most of the page. It appears to be a personal communication, possibly a letter, given the informal tone and the use of phrases like "Dear Mother" and "My dear Mother". The handwriting is somewhat slanted and compact, characteristic of 18th or 19th-century cursive. There are some ink blots and variations in line thickness, suggesting it was written with a quill or a similar instrument. The text is written on a single sheet of paper, which shows some signs of age and wear, such as slight discoloration and a few small stains. The overall appearance is that of a historical document, possibly a family letter or a letter to a friend.

Singapore 8<sup>th</sup> Dec 1822

My dear friend

There are so many vessels sailing for Calcutta that I must say a few words altho' I had resolved to remain silent till next month - God grant that this may find you happy and comfortable with your family and in the enjoyment of your second Paradise - I long much to hear of your Voyage up & what you made of the Deuyong; I have had an adult female since with milk in the breasts but unfortunately the infant perished - The Skeleton of another is now preparing for the Wundt's Museum, so that you may announce it as going home  
D Wallich from

from hence in the Verities -

Since you left us also, I have been compelled to some rather sharp correspondence with the King Malachi of which & other things he will I doubt not complain abroad - but I am happy to say that personally we remain as you left us and that Spencer's symptoms which induce me to believe that he now takes a different view of my measures to what he did at first - have I trust completely upset the system of favoritism & partiality, and established the principle of fair & open competition in its room - but of this more in my next -

Lady Rupples continues to improve  
The I am still annoyed with my  
headaches think I am upon the  
whole better than when you left  
us - I made out the bits of a  
small pamphlet on the will  
where you threw the stones - can't  
recall - and in three weeks the  
hope to thank of you there in  
our coming prayers -  
Believe my dear friend  
my kindest regards to Mrs Walker  
Whence we always

Yours truly  
Jas

H B Walker

Jan 13 1893

1892

M. F. Griffin

My dear friend  
I ought long since to have  
returned the enclosed - The names  
in your own hand writing I reserve  
in my writing desk for future  
reference when I may have the  
opportunity of impressing others with  
your exalted merits and claims  
to distinction - Long may you  
live to enjoy them and all such  
higher honors as may be in store  
for you, and may they at an  
early date be followed up by  
something more substantial -  
Gratifying as these must be to  
you  
D. Wallick

You, Your Wife and Children as well as your own health and happiness must depend upon your being able within a reasonable period to revisit your Native Land and take your appropriate place among the Scavans of Europe - as far as my small influence extends, rely on its being exerted with the zeal and fidelity of a sincere friend.

Little things they say suit little men, nevertheless there is something in these kinds of distinctions & notices that must always be pleasing to every one - they are at least flattering & where is the man who is quite proof

proof against a fair proportion of  
flattery - to prove to you that I am  
not any more than yourself &  
that I have on occasions taken in  
a much larger dose than you  
I now send you the addresses to  
which we alluded the other day -  
I had not seen the Book since  
we were married till the other  
day when Lady A. was unpacking -  
I am half inclined to believe she  
fell in love with me before she  
saw me from <sup>her</sup> usual of  
Kew, as I know not <sup>her</sup> what  
she could have induced, to  
follow the fortunes of such a  
shattered concern as myself  
Yours most truly  
H. P. P. S.

John  
H. H. H.  
H. H. H.

Wm. H. W. W. W.

My dear Sir,

I return the letter  
for any additions you  
wish to make - don't  
copy any part over again  
as I shall only make  
use of the copies. I ought  
to have acknowledged  
it before this but have  
been much taken up with  
the new accounts and  
letters from Worcester  
Sophia tells me I  
may expect to see you  
at Wrentham - I advise  
for the present  
Yours W. W. W.

To Mr. Poffin

~~Mr. Poffin~~  
O. Wallach

My dear Wallach  
Enclosed for your  
perusal the draft of  
my special letter to  
Bengal on the subject  
of the Garden - I refer to  
another letter from you  
to complete the Enclosure;  
it is necessarily stiff  
and cold but enthusiastic  
will not always succeed  
with such grave  
authorities - some  
caution is therefore  
necessary.  
Shall we not see  
you to Bradford - I  
deem tomorrow!  
Dear yours  
Wallach

My dear Wallick

My best thanks for  
the trouble you have  
taken - Not for all  
the birds in the  
world would I interfere  
between you and your  
intentions of respect  
to Lady Hartings - By  
all manner of means  
take them up to her  
as they are - a  
Drawing shall be  
completed before you  
go - I may also take  
the

The Bookkeeper - as the great

The following Boys having been selected  
as the most diligent in application and worthy  
of the approbation of the Directors from their  
General good conduct. Rewards were sent to  
be distributed to them.

Resolved that the Bill for the Money  
Rewards be passed according to Act No 27 1795  
and that eight Silver Pieces be given  
in the name of the Director  
(See Extract)

# P. W. Island Free School.

At a Meeting held by the Directors on  
Thursday 19<sup>th</sup> December 1836.

Present

The Honble the Governor

The Honble W. H. Clibbey Esq

M. S. Craunoff Esq

G. Alexander Esq

J. D. Brown Esq

R. Carpenter Esq

Captain Burney

The Meeting proceeded to the examination of  
the children in the School and the following state-  
ment will show the Clases in Reading Writing  
Arithmetic &c as they appeared before the Directors.

It appears that since last year the Clases of  
Arithmetic has been extended to the number of  
eight and that the proficiency of the Boys in  
this Branch has been rapidly progressive.

The Directors were happy to observe a great  
attention to his duty on the part of the School-  
-master Mr Porter and the care and diligence  
evinced by him in the Instruction of the  
Protestant Boys in three Clases of Catechism  
deserves to be noticed as highly praiseworthy.

April 23: December 1892

My dear Wabich.

I had great pleasure in receiving  
your letter from Singapore, which  
I received the 8th October and I called  
on you yesterday, and tried to say  
to you that I regret very much  
at the great effect the voyage has  
had upon your health, and the  
pleasure you have derived from  
your rambles among the islands  
& Malay coast. It is a sad  
and very natural, as a  
charming part of the world  
I am aware, and I have for  
long had a desire to visit  
it - and if I must be necessary

for me to break up my constitution  
by a trip to sea. I shall be greatly  
tempted to follow your advice &  
visit Penang - Malacca - Singapore  
& from thence as your description of  
the three former and all the  
charming climate & scenery you  
have enjoyed at those places. I  
tried to encourage me to work to  
become acquainted with them.  
I never cease to regret having  
been induced to go there. The  
addresses you have here by mail  
begin **<^>&£<^\*&^\*^** would be sufficient  
but the new stock of health  
which you will benefit from with  
you is the grand business and

which I sincerely hope will be  
sufficient to keep you very  
sure for a long time to come  
dear Mr. G. to enjoy your garden  
in a more. I feel quite  
sure that "The Tree" at Kenning  
(of which I have seen a print from  
R.M. Smith's paintings) is not  
to be compared with one from  
Sheepscroft or some of the  
best we have explored further  
I found much larger ones than  
you ever saw I think. The account  
of which you added a sketch in  
your letter is exceedingly like  
the Dundwa Kynhat indeed.  
Do you find any of the heads that  
grow in clusters as you remember

My do here. The Monkey Cup  
a kitchen plants? That you mention  
must be very wonderful kind  
of production. But what indeed  
in your 'vegetable Kingdom' is  
it to - what the sense can  
the cups on each leaf be meant  
for. I shall with great pleasure  
receive specimens of these  
these curious things from you and  
put you in mind of it one of  
these days when you get back  
from what you say if you  
intended movement. I conclude  
to be almost impossible  
by the time this gets down and  
I shall under that idea direct

\$£,%

'<\*&&

then to the Botanic Garden. When  
I first cast my eye on the letter  
although I had a mind, but  
for Buckingham. In his office  
as you will now doubtless hear,  
has it not been that you are  
"the infirm"? That you are  
quite right, in the probability of  
botanical objects arranged,  
to give up the natural history  
department; even here, where you  
had more facilities perhaps  
in what way than where you have  
been. I wondered often how you  
managed to dedicate so much  
time to them. Don't tell the fact  
however that I was so as to  
work so hard to be of any use.

opinion - You don't seem to  
have taken Benckea into your  
plans. but perhaps you may  
have seen it returning, if you  
get as far as Jada. though  
now it's back <sup>C P4E\*-^</sup> when again  
do you propose returning by the  
train? be very careful. As  
you may properly say to no man  
build on what may happen  
tomorrow? We have one state  
of mind that change and in  
your return you will see how  
many have taken place even  
in your short absence - Here  
two matters are much altered  
Rajen is gone home. Had you  
idea of it?

in fact, acting Dept. Revenue  
Secty. I have seen a few  
of the letters lately - for  
the Bureau ~~has~~ replied about  
a month ago - it was only to get  
a violent fit of sleep, fever  
and, I suppose, is now lying  
confined to his bed - I thought  
at one with him a little while  
ago - but I begin to hope he will  
be through it - In other  
respects we are going on as usual.  
The new little establishment  
improves daily - our entrance  
on the best terms with our friends  
at the about the Valley, in many  
of your old haunts, saying much

at present. I think it ought to  
bring you to the same <sup>^? < ^</sup> ~~no~~ <sup>use of</sup>  
the General. By releasing you  
I prepare to him the first opportunity.

On the 14th I had long & very  
melancholy & depicted a long  
displeasure. I have not given  
him any paper, since I wanted  
to me to stop them. He was  
frequently a show that he is told  
I will be much wait  
patiently till you take his  
case into consideration; he  
has regularly continued to collect  
seeds which I have forwarded  
on him, but his monthly expenses

never expect a few super. If  
we could take him into a  
room. Think it would be an  
act of charity. **t - A - ^ ^ - ^ ^ ,**  
I'm impressed upon you a little.  
I read his tube indeed with do  
as you know - he is on the mass  
Think - as you do know a man  
as you are likely to meet with -  
you shall be remain here a go  
**2 ^** - what shall be done with  
" " ? - I don't think you have  
not much and you ~~are~~ <sup>are</sup> staying  
In my part I am quite satisfied  
with what I have read & heard  
I don't it above so with what

to print it, not Carlton at least  
I have not got Crawford's Indian  
archipelago - but I would  
as I am sure it would be an  
interesting work. I have  
a regular supply of books now  
from Mr Richardson. which  
in my hermitage here, is a great  
luxury, as I can never without  
a choice of new books. It  
will be quite sufficient to  
tell you anything in the  
news, or to select the matter  
changes in as you wish no  
doubt of  
none are fact or such things

^ r k ^  
z ^ ^ - ^ ^ ^ #\*  
^ r k ^

than I am. You will be sorry  
to find that Hodgson expects  
to lose her appointment - at least  
she writes to me - & she is so  
dumb struck with the many  
changes that will have occurred.  
I am afraid you will have  
scarcely been able to see her  
Hastings before her departure  
which is fast approaching. I  
am very sorry we are to lose  
him - and so wish you to see  
him. Of the plants that we  
found, that you brought up for  
me - such a collection you remembering  
all of them - almost have increased  
delightfully & increased.

I can supply me friends and am  
just about ready to run a  
large quantity to the D. G. G.  
The Sweet smelling Dittoria - with  
the noble large flowers - has been  
<sup>one of the only</sup> and I send a few of them as  
I think you desired to have some  
if we succeeded in getting any.  
The tulips, regret to say have  
failed - so have the new D. G. G.  
I have the bulbs - but  
the trees have grown back and  
are now in a wood now to what  
we were when you left us  
with you see what a scrawl  
we write to you - but how

to me today. Make no need  
of you to Mr. Wallace and  
let me hear of you and of your  
welfare which we always  
asked me much gratification.  
Believe me yours

My dear Wallace

Very sincerely

Edward Sumner

Robertson dearest to be  
kindly remembered we often  
think of you. His  
grace and grace we place  
at heart

No 22

1842

Horticultural Society Regent Street  
London Dec. 30. 1822.

Dear Sir,

recd 5<sup>th</sup> July 23

It was particularly gratifying to me (after so long an interval) to receive your agreeable letter of the 10<sup>th</sup> of February last.

For your kindness in sending the Plants by the Fairlie, we are most grateful, but I have to report that nearly all had perished on the voyage, though they appeared to have been most carefully packed: indeed you have the best of the survivors of the collection which if the whole had arrived there would have added to the splendour of our Garden. I particularly regret the loss of the Pines the Poinsettia and the Thunbergia, but hope still we shall receive these and others from you. The Box of Seeds came in good order and the contents of it were packed there as usual with our East India importations, so that I hope hereafter to be able to give you a good account of their produce.

You will receive here with our official acknowledgments for both Plants and Seeds, as well as for the collection of Seeds which we received from you in 1821 and which I did not then write to thank you for because we were informed of your absence in Nepal.

I have been looking anxiously for the letter which you intimated was yours of the 10<sup>th</sup> of February.

D. Wallich.

judgment. We especially desire Tropical fruits,  
splendid tropical trees and shrubs and creepers, all the  
orchidaceous tube and air plants, Moss and Linnæus  
fungi - Knap, roots of your new splendid bulbous  
plants, Ferns, Palms and new or curious rootulent  
Vegetables. It is desirable that each box sent should  
be confined as much as possible to one class of living  
plants, they come better than when various kinds  
are mixed together. The mode of Package I must  
at present leave to your judgment, the plan you  
have adopted of sending seeds packed in brown paper  
is the best we have hitherto seen used. The Tropical  
Plants are valuable to us because with little care  
they become acclimated here, but of seeds from  
France or indeed from your Garden we should prefer  
a collection of fine or curious things, rather than  
great variety, the quantity of leaf showing things  
which have been raised here from Knap seeds has  
rather brought that country's produce into Liverpool  
here. The Catalogue raisonné of the Plants you  
sent into the two boxes by the *Franklin* is in a very  
good place and if not requiring too much time it  
will be sensible to adopt a similar plan with all  
future packages.

In a visit our Gardener, who went out on the  
*General* last year, paid to the Garden at *Botanica*  
on your absence. He was received with the greatest kindness  
and attention by both Mr. *Lingwood* and your Gardener  
Mr. *Potter*. I write to them both by this conveyance, to  
the latter the Council has sent a present of a *Guan*  
(suggested as being likely to be very acceptable to him by

Boyle) as an acknowledgment of our sense of his  
obligations. The will I hope be disposed to assist us  
under your directions. I have desired him to communicate  
to you the particulars of my application to him.

We are forming a Museum to be annexed to  
our Library of models of fossils, Specimens of fossils  
in Spirits, Specimens of Coprolites and Seeds as well as  
of Drawings, we have also begun to collect Specimens  
of the Vegetable Productions of particular Mountains or of  
particular Gardens in all of these except the first you  
can send us much. Fossils may be put into Spirits  
and sent us in Jew or small cases. Coprolites & Seeds  
for the Museum pack carefully into boxes and if you  
will allow Mr. Porter to make dried Specimens of  
Seeds from your Garden or can spare us any duplicate  
of the collections made in your botanical Journeys  
you will oblige us much. In a former letter I  
proposed to you to obtain for us Specimens of the  
Drawings of some nation which to be sent here for  
approval with a statement of the probable charge for  
each Drawing. We have now had a person in regular  
employ in China drawing for us and have in consequence  
a splendid collection of representations of the plants & fruit  
of that country and are desirous of something of the same  
kind from Calcutta.

Mr. Perkins intended for us should be addressed  
to the care of David Mackenzie Esq: at the Custom House  
London and a letter of advice to me should come by  
the same Ship. all things belonging to the Society are  
passed free of Duty, plants, Seeds and Bolls under

a general order, but funds in specie, Books or  
Drawings require a special application to the Treasury,  
these latter articles should not therefore be mixed with  
those which pass without such application.

I shall hope to hear from you in early in  
the summer on London will by that time be in a  
state to afford supplies of things which will be useful  
to you. I wish you therefore to point out particularly  
what you wish us to send you and we will make up  
some Packages for you in the autumn. From my  
correspondence with Mr. Trenchard & Dr. Carey I have a  
general knowledge of the desiderata in the gardens of  
the East, but shall be more satisfied at your pointing  
out particular objects. I propose however if I have  
a good opportunity in the next Spring, to attempt to  
send you some things which may prove acceptable, we  
are at present burnt up in a severe frost and cannot  
guess how long it will last. The autumn however  
will be the fittest time for sending out plants to  
you. You do not in your last letter acknowledge the  
receipt of me from one of the 25<sup>th</sup> of August 1768, with  
which I sent you a Packet of Seeds from the Stevannate  
I hope they arrived safe they were sent through the India  
House also that letter I proposed in answer to return Seeds  
of miscellaneous plants of all descriptions which I  
now venture to repeat.

I Believe me

Dear Sir

with much esteem

your very faithful Obedt. Servant

Jos. Sabine

Secretary.

199 I have not been able to send this letter  
by the *Faithful*, but one to Mr. Potter has  
gone by that ship. This will therefore follow  
with as much expedition as possible.

Saturday Oct 6

My dear Sir

Ryan is certainly a Royal fellow  
and his zeal does credit to your  
patronage. The Squirrels are splendid  
to me here - for the like I have  
not before seen.

Entre nous ascertain from  
Ryan how and to what extent he  
can be best served, and as  
far my means go he shall  
not be disappointed - his small  
views will not greatly burden  
the State, and we will hope,  
tho' not in Denmark, that it  
is yet sound enough to bear  
it weight -

D. Wallich

For

For the Opinions I thank him  
and thank you - and for your  
rather than your recommendation  
Be assured he shall be  
served - Nevertheless for  
the sake of science look up  
his opinions

Dr. W. H. H. H.

My dear Sir, accept my best  
thanks for the kind interest  
you express for me. It is a fact,  
that I am sorry to say I  
had suffered all night &  
this morning quite over-  
powered with a severe  
cold, which has deranged  
his whole system. He is  
this in bed, hoping that  
soon with a quiet walk  
in the park the fever  
he

the feet in his hands,  
face & limbs - I have  
little doubt, that a day's  
perfect rest will be  
very beneficial -

Allow me once more  
to thank you for your  
kind inquiries &

Believe me ever very truly

Yours affectionately

J. Waffle

Dr. Hall  
London

My dear Sir, I have been  
honoured & surprised to  
hear you had undertaken  
your private notes of the day  
I return that I am  
of the most anxious  
specimens & retaining  
one with money. Pray  
write - I shall  
write

By Gen. Wallis

I fell the drive  
 very pleasant at going off,  
 & I nearly knew that I am  
 the better for it still, but  
 as I went into Calcutta  
 I felt tired before I got back  
 & that was the reason I  
 did. I can let to you yes-  
 terday I called upon Mr. Linn  
 & mentioned it to him.  
 I am sure he gave me little  
 encouragement at first  
 but in that sort of paper  
 I am sure I am sure he  
 will do in this, or any other  
 matter, what I like - for  
 me. He said the more  
 every thing is put upon  
 upon the Commission  
 the better it is to be put

My dear Wallich,  
Many thanks  
I sent the enclosed. Let me  
know a day or two before  
it. - I have passed  
an hour in reading  
of bible - I am joined, abso-  
lutely & exhausted to-day,  
I to go to bed. It will  
mean of the pleasure  
my year. Calder's  
arranges to see you  
in the evening &  
will me to write to  
- I also intend visit  
much to see you  
kindest regards to  
all. W.  
G. E. ...

My Dear Walker

Do not disappoint us but  
be sure to come this evening. I have  
some very weighty matters to tell you  
and you will probably be much of your  
can come a little early. Since the last  
attack, I have turned my thoughts on  
home.

I enclose a letter from Dangerfield -  
The appointment is as good as I could  
possibly expect - but I shall say no more  
as I make sure of seeing you.

Tell Rayle to come over here as  
soon as he can. I wish he would  
come now, as I want to talk to him  
affectionately  
H. Furleyson

when I most shal-  
ly join. So my dear  
do come if you can. I  
will I am sure let you  
an hour or two with  
am happy to learn from you  
that you are all well. My  
kindest regards to Mrs. W. &  
blessings upon your dear little

now or you, my dear Walter,  
I shall not be satisfied till I  
see you, more perhaps more  
nearly.

Jan 18th. Has you have got  
the Plantations out of your  
hands. It must indeed be a  
great loss if you should be.  
Calden met - Dangerous last  
night, who told him that  
Herbert is to have the thing  
of appointments, & (hear!) that  
I may have a Protestant  
mission the same quarter  
if I am able to undertake it  
in three months. What  
thinkest? I wish to talk  
with you. I would very  
much like that they would put  
me under your wing, if they

will  
I ~~am~~ <sup>am</sup> sorry to hear  
about it. They will indeed  
give me very good & able  
advantages. But so much the  
we meet.

Do I like to go over &  
take a course with you  
the next before the Com.  
with the next, that I may  
be my best to put things  
into order for you. I will  
give you notice.

I am, my dear Walter,  
ever yours affectly  
G. Finlayson  
31st  
I have got better  
the last two days.

Walter's

a cheap present out  
that would be to me,  
I have taken even  
measures to getting  
business through the  
necessary steps in the  
proper office, & no  
less than two friends  
are finally arranging  
that matter for me  
to-day. It is the object  
of the Committee  
that is alone wanted,  
& I meet with it  
you & with you.  
After what I have  
said it would be an

My Dear William,  
I have intended  
to write to you for some  
days back, but the best  
business, exertion & action  
unbusiness which are  
afforded by this nature are  
tails upon a sick man  
are no trophies to me.  
I have been looking  
out for a man to take  
charge of my things at  
the tent, but as yet I have  
not found one. I expect  
to find one - & in the mean  
time I hope the Cholera  
will be at a distance.  
My health is exceeding  
bad - & I shall

J H\* eK

write me to be off with -  
out the best oblong. I  
myself feel the necessity  
of following his advice  
it will be to me a very  
great advantage  
of the proceedings after  
your Committee  
are met. I will be  
Council this week.

You cannot think of  
how much importance  
it will be to me to let  
a speedy decision from  
your - & what measures  
it will cost me to be  
satisfied to go without

knowing the reason  
my friends suppose to  
be off in sight or arrive  
days at least, I will  
in consequence of  
proceeding on my part  
in consequence of  
health has become  
impossible that I  
not speedily get the  
decision of your in  
my case I shall be  
convinced to accept  
of my it have ex-  
pected - & I need not  
tell you what

That I have the less  
corrections in ask-  
ing you to do this  
for me.

Could you not send  
some ferns with  
champs for the Lin-  
nean Transactions.

I must have all  
my things packed &  
ready in eight or ten  
days at furthest.

My kindest regards  
to Mrs W. & my best wishes  
for the happiness of both  
them & of your success  
most sincerely yours  
G. F. Fenouillet

1  
superfluous to  
to entreat of you to  
expedite the matter.

I hope to be able to  
set away in the Harvest  
or David Scott, though  
those ships have al-  
ready gone down the  
river.

I know I shall be  
furnished with the best  
Botanical treasures  
from you - if you could  
also spare specimens  
of your plants from  
the Eastward, they would

as you know, but of the  
particular occasions to

me in examining my  
own. Justice will

know many of the same  
in my plants. I should

wish as a particular  
favor if you will direct  
me to go over them

I trust should the  
General manner of

as many as he is  
sure of, including

my stems, which  
I expect to say are but

very few. I do not

The Colon - Golden  
other protection, as

well as some ways

work remnants for  
seed. I hope you

will have the kind  
means to put up

some pieces in  
this way - & some

thing that will be  
most themselves of the

great varieties of the  
Columbian Golden.

Years where to the  
way is so uncommon

Mr. Furlong

dearest Mable  
I would that for you to see that  
I say said see but note of yours

Mr. Wallace

My Dear Mrs Wallace

Many thanks for  
your kind inquiries respecting  
my my health. It is indeed  
very poor, but I shall be  
over with you to-morrow  
at all events.

It will be a disappointment  
to Mr. Calder not to see  
Wallace to-night.

I am very anxious that the  
decision of the Committee  
should be soon laid before  
you.

Affectionate regards  
to Wallace. I trust we shall  
see the happy news in your  
next coming year  
Yours  
Furlong

Dr. Fuldagen

N. Wallich, Esq., M. D.,

My Dear Wallich, I have made  
a few remarks to Col.  
Cuthbertson on Danse  
and told him  
I was in the  
day. I was  
told not see  
as we  
was  
what  
bags  
I have been  
since my return - vomit-  
ing pine bile, which makes  
me any thing but com-  
fortable. This is  
I shall take medicine - I am  
Therefore in doubt whether

Mi \*

Ji

shall be able to see you  
to-morrow. I wish to thank  
you. With my thanks  
from I wish except  
that in articles for my  
taking low wages.

I cannot keep these a-  
day longer. Will you there-  
fore make one by having  
the Chocoran as soon  
as possible. Not a word  
of news. My kind regards  
goes to your mother, it  
seems to matter she is  
even stronger than  
before. I am  
yours
