

Bathwick Place, Bath

4th April 1823

W York

Dear Sir

Pleasing that you was on a journey to Nepal
the last parcel of seeds I forwarded I addressed to Dr. Gairdner, for
whom I have lately heard of them being safely received, as the
packet contained more than 1000 species. I trust some of them
proved acceptable & worthy your notice, I am fearful it will be
never again in my power to make such another collection, my
correspondent being less free in supplying me; it is true not having
received any seeds from you for nearly 3 yrs past, it has been im-
possible to make him much return, & he has intimated to me
as much that he cannot supply me without I do; I merely
mention this to show why I have not forwarded you ^{some seeds} (at least)
at this time, I have the promise, & so I had last spring but
it never was fulfilled, abt 2 yrs since I sent you a box of bulbs,
with some plants sold in a downy ^{box} of a fox; also a plant
of *Morantia gabonensis*, & last spring 2 plants, one of *Mangrove*
americana & another of *Paspifera racemosa*, I should be
glad to hear that you received them safe, & be obliged
by your informing me whether you did or not.

From the title of my former letters you may judge of my fond-
ness for practical botany, & which still remains so far as I am
concerned, & looking to my memorandum, I find these were sent them by the *Princess*
Charlotte of Wales which sailed in July 1821

able to pursue it, but like other commercial men I have experienced
the effects of the times & after losing many thousands, judge it wise
to retire from business altogether in order to secure what remained
I was in consequence led to dispose of my collection of plants (which
was one of the most choice near London) & to remove to this place,
here I have neither greenhouse nor stove, but residing in a more
temperate atmosphere than near the Metropolis, situated on the
side of a hill which tends to keep my garden dry, my views I in-
tend to turn to the attempt of growing exotics from various cli-
mates in the open air, by which means I have no doubt I shall
find many may be cultivated in our gardens which have hitherto
been deemed tender, several of your Nepal plants I have found
hardy, *Medicago spicata* & *St. coccineum*, I had not two
winters before I left Clapton near the front of the houses &
they did well, I have planted them with several other
species in my garden here, but having had a long severe win-
ter I have my fears for them, it is at present too early to de-
cide, as we have still but cold unsettled weather, & they did
not appear above ground at Clapton earlier than May, I have
no doubt that great numbers of the Nepal plants would thrive
in England abroad, therefore if you would ^{send me} ~~send me~~ at your
earliest convenience with a packet of ^{Nepal seeds} them I should esteem it
a favor, the *Rhododendron* from Nepal I succeeded in raising
great numbers of from the seed you sent me, I have some
plants of it more than 3rd high, this is perfectly hardy, our

I plan not in the ground has stood this since winter & is now
about making fresh shoots, I did not succeed with any other sort
than the *R. arborescens*, some of the rest vegetated, should I receive any
European seeds from the continent, I will send part to you thro' Mr
Shaker Bookstore at Salisbury. A friend of mine Mr Barclay who
has been staying in this city the past month informs me he has sent
you 2 colored engravings of *Combretum purpuraceum*, & *Quisqualis indica*
which plants he introduced into England, you most probably have them
in your garden, the former is a great ornament to our Parks, these
drawings he sent out by Lady Amhurst; Mr Barclay is a gentle-
man of large fortune & highly respectable, is known to the
College of Physicians thro' the office of the Praesident from whom he is in
the constant habit of receiving seeds, & amongst them came the
Combretum, Mr B- is very fond of plants, &
if at any time you could favor him with
any thing new or rare it would be very
acceptable to him, if I am ^{he} ^{would} ^{readily} ^{make} ^{them},
in American plants seeds I sh^d expect he would have it in
his power to do something, having friends at New York & other
parts to whom he is now at work for a collection, & which
they are frequently forwarding him, I saw some very fine
specimens at his garden near Dorking abt 2 yrs ago he had
just then rec^d a late gardener of mine who has recently
settled at New York as a Nurseryman, I trust will enable
me to add to ^{your} collection from the same quarter also; the
Hon^{ble} the Pres^{ident} Mr Herbit is quite a Manufacturer of plants, he
is producing every day fresh hybrid *Amaranthus* & *Cornus*, the

is not much liked by the scientific botanist, & will most likely tend to perpetuate the science down future times, still they are interesting to the botanical physiologist, & Mr Herbert seems to enter fully into the subject, & altho' his researches & experiments may lead to no other ^{important} result than to induce others to pursue them I cannot sit them down as soon as at useless & ridiculous - I hope to visit London in abt 2 Months &

April 9th April 1849

My dear Mr. Wick

Yesterday brought me your
letter of the 30th with all the
enclosures, for the perusal of
which I thank you and which
I now return. The objects
are very interesting and there
cannot be a doubt I am your
opinion the expediency of
the plan for procuring
supply of timber hereafter
in the public service. It
seems rather odd, with the

And I think we now prefer
of natural forest, that of
them have become necessary
to form plantations - but
I am sure that such is the
case, and that being admitted
it is evident that no time
should be lost in measuring
them. And I am happy
to see here fore that the theme
is in train. As far as I am
able to form an opinion on
the matter I have every
warrant of success. An

that the object should be attained
in a longer period of time and
also heavier expense than
is calculated on. It still
seems the most ready and
the cheapest way of pursuing
a great & most important
work which we appear at
the point of being subjected
to. Friction from the forest ^{lands}
belonging to this Govt. have
reasons for knowing as persons
now with considerable ^{difficulty}
trouble. What is the loss
whenever of the supply
is found to fail in the forests

within an own population.

They have pulled out *Quercus*
as one of your nurseries,

of which we kept the
figs grown naturally
of nurseries well in

that quarter. I have
piped both sides of plains
there. Every faculty of

Quercus set. I need the
afford. *Impatiens* *lucida*

There is left want of that
wood in those parts. His

.....

unfortunate that the
Spiritus gemmeyance
from the Makbuda distills
is so great. In fact grows
in the neighborhood of that
is in abundance and
is understood of the
best size & best quality.
The best of gemmeyance
is known as well as I do
know if the Makbuda
would admit of the
being floated ^{in the tanks} down
Culach from near its source

but they would not help
to supply I can not find
well. I must give every penny
in the undertaking, ^{which} I
have no doubt of, if just
in the business will but
ensure it.

as must always be
pleasing your
something have the time
sent you some ~~to~~ leaves
flowers of ¹⁵ different things
which I want you at your

pleasure to return to me
with the names of them.
I need not of them from
you - but I have rather
but then N^o 2 for the
then description; for
which you will not doubt
think me very stupid.

A vast number of plants
of a fine green flower they
a great number of such
as would not have been there
have succeeded at

Aya Koto

where I had seal, & where
I intend sending, at such
things & hereafter we can get
them to or here. I have no
doubt that all the fruits
that will not ripen here
will do so in that neighborhood
& I am preparing papers of
all ^{the} kinds, to send

Chunr seehueni has
not yet made her appearance
& I have great fears for
the possibility of success

You interested to hear ^{about}
how well ^{hardly} have
had the ^{to} weather at
"understand" ^{to} ^{as}
"to" ^{part} below with
"unusual" ^{severity} but
I must ^{soon} ^{hear} of ^{them}
of ^{their} ^{future}.

"Many" ^{thank} ^{you} ^{for} ^{the} ^{trouble}
of ^{business}; you ^{have} ^{been} ^{kind}
tell ^{for} ^{me}. I ^{shall} ^{write}
today ^{to} ^{request} ^{them}
forward ^{it} ^{without}
delay ^{immediately} ^{to} ^{you}

recovers it - We are going
on here very well. Hadger
went long ago and with
him came Dr Morris who is
a great addition to our
little party. which amounts
now to five besides our
sick man. Have you
the paper that you know
I had from R. Brown in Dec
we remembered to give
but kindly. I get on much
as usual same with the
good health. I think I

I have any complaint. He
but somehow queerest
occasionally. I have not
yet given up the idea of
making a trip somewhere
for a change next year
if I think that would not
could manage it. But
never a long time to look
forward to. - Was
interested in the new gro-
und to me. Suppose you
must now know in plain
whether I do indeed intend
coming men out. Why not?

All things have been removed
from Singapore and from
London has refused Bennett
which I think have thought
he wd have been desired to
have returned to. Hope
Proctor may get the best of
who will then go to Paris?

I am writing you in a
great hurry and must
close for conclusion.
I like you calling me
a radical. when I detect
.....

the whole race of them -
but you are speaking of suppression
as the values of Paley. And
the Secretude, - about their
petition to Parliament!
You say nothing about
the Mounting being taken
therefore suppression must
continue to pay his
wages as usual. if not,
you have nothing to
say about them. Do so if
you need that may know

how to manage ^{his Malaya} about
Bain - he continues to
proceeds as usual
I am glad to - pray for
my best regards to Mrs
Wallock. If you have any
particular news w. doesn't
fit the way into the newspapers
do you mind line about it
I believe in my dear
yours very sincerely
Edward Kingman

As you may remember perhaps,
the Lefsoo (a Shekum tree as
the natives call it) grows to
perfection near Mullye -
among the Manjac Topes
very generally - where they
attain a great size -
that might properly be considered
a good specimen for one of
your plantations.

Do you know the Sut-saul
I cannot say whether the
timber would answer for

Mr. James Burdett: -
I have been a fine day
every week as I
see him as I
see what a fine
man he is. He is
the same of course
what you want
with your money

red 23 April

My Dear Mother

It gives me great pleasure to see by
the papers a short time ago that you had
returned to London & I sincerely hope that
you found much satisfaction from your
voyage to Europe & that you continue to
enjoy good health. I was in the hills
when you left India but I afterwards
found my Prof. at Cassanovon & it is now
two months since I arrived at this
Station where I trust you shall remain
these years. You must have been delighted
with home after your long absence & no
doubt you find many alterations and im-
provements - it was my joy to observe that
you had been presented with the Society's Gold
Medal & I trust you found Mr. Colburn
& your other scientific friends quite well.
I believe you frequently correspond with
both my brothers. One of them Patrick is
still at Killybegs in the hills & the other
James accompanied last winter to Scotland
& Bohemia & thence to Wexford where he
separated from us intending to return by Clonsilla,
Forest of Conalun - I have had no accounts
from him later than the 10th October so I

Dear Sir
I have been very much interested by some
which indeed he has been very much interested in - You will see
a letter from him dated Baltimore 15th July to me
in which he gives some account of his journey
from Annapolis, published by Pennep in his Journal
of the "Academy Society" for January
1771. It is a very good garden here which is
watered by a branch of the ground water
from the spring at the foot of the hills. The
soil seems very good, & with care capable of producing
any sort of plants so I wish to know if you
would be so kind as to send me a collection
of all the choicest kinds of flowers, vegetables
& plants you can send from the Virginia Garden
has a great taste for gardening & takes much
trouble to get the best of them. I should like to see
of the best of the Virginia Garden any good species of Peaches
& Apples, Pears, Grapes, any good species of Peaches
& Apples, Pears, Grapes, any good species of Peaches
kind of Coffee, Cocoa tree, Sassafras, Wintergreen,
Coke, & other fruit trees in fact whatever is use-
ful, rare or ornamental as we intend to try
what this place is capable of producing & our friends
shall be glad to see it. We would be very much obliged
if you would have the kindness to describe or
produce of the above mentioned seeds such weighing
above you see by Dr. Brock's Essay to see at this
place & whatever expense you may incur shall

constantly exposed

Mr. Mann is very nice flower garden in front of
the house but it contains nothing but Window-stones
which we wish to make it appear more like
a garden - We intend to get down many plants from
the hills & to make it a good garden before
we leave this station -

My Mother wishes to know your opinion whether
a few Dutch slips of fresh trees three or four
inches long with 5 or 6 buds each packed up
in Cabbage or Plantain leaves with thin pieces
of board to prevent their being crushed or injured
& despatched by Drake (not Drake Perry) would
have any chance of reaching this place alive and
if so at what season it would be best to get
them up as we are very anxious to get some

I hope I am not giving you too much
trouble to reply to this a few lines will
do with very friendly regards

Yours Very Sincerely
Alfred

1823

Regulation NO. V OF 1823.

A REGULATION for the prevention of the Slave Trade at Singapore.

There being reason to apprehend that notwithstanding the solemn prohibitions of the Legislature, individuals have been imported into Singapore since the Establishment of the British Authority, either as Slaves or under the denomination of Slave Debtors, in both cases bought and sold for a price; and it being desirable that all persons resorting to or residing under the protection of the British Flag, should be aware of the prohibition and penalties attending such illegal transactions, in order that the humane and just objects of the British Government may not be lost sight of or frustrated either from ignorance or design, the following Regulations which are to have the effect of Law, are this day passed and published for general information and guidance.

S L A V E S.

1st. The Act of Parliament prohibiting the Slave Trade from being carried on within any British Colony or Settlement, or by any British subject, having been passed previously to the Establishment of the British Settlement of Singapore, the provisions of the said Act are considered to be in force in this Settlement, and to apply to all persons who may have obtained a *fixed Residence* at Singapore, since the Establishment of the British Government.

2nd. As the Condition of Slavery under any denomination whatever, cannot be recognized within the Jurisdiction of the British Authority, all Persons who may have been so imported, transferred, or sold as Slaves, or Slave Debtors, since the 26th day of February 1819, are entitled to claim their freedom, on application to the Magistrate as hereafter provided; and it is hereby declared, that no individual can hereafter be imported for Sale, transferred or sold as a Slave or Slave Debtor, or having his or her *fixed Residence* under the protection of the British Authorities at Singapore, can hereafter be considered or treated as a Slave under any denomination, condition, colour or pretence whatever.

3rd. Hereafter, a continued Residence of 12 Months at Singapore, shall be considered to

constitute a *fixed Residence*, and to entitle the party to all the benefits of the British Administration.

4th. In order to prevent inconvenience or misunderstanding in the emancipation of those who may have been imported and sold as Slaves or Slave Debtors anterior to this date, and at the same time to shew every reasonable indulgence to those who may have acted in ignorance of the prohibitory Law, the Magistrates are required to make enquiry into and record the particular circumstances attending the case of each individual who may apply for his or her emancipation, and in the event of the parties being of tender age and unable to conduct or maintain themselves, the Magistrates are empowered to bind them as Apprentices to respectable and responsible Persons, giving a preference to their present Masters if unobjectionable in this respect, for a period not exceeding three Years or until they shall attain the Age of 13 Years. In the event of the parties being adults the Magistrates shall further be empowered to require them to render their personal services for the benefit of those who may have a just claim to the same for a period in no case exceeding 3 Years, should the parties freely consent thereto, which servitude shall be considered as a complete acquittal for the expense of their passage hither, which is the only legal demand that can be admitted—and which shall be in full of all demands on their persons whatever—but in both case, the parties are to be *forthwith* declared free, subject only to the condition of personal servitude on contract as free Persons for a limited period as aforesaid.

5th. There having been few or no Slaves at Singapore at the period of its occupation by the British Authorities, and their Highnesses the Sultan and Toommongong having evinced their desire to aid the benevolent objects of the British Government, these Regulations are considered to apply and to have effect upon all persons who are now or may hereafter have their *fixed Residence* at Singapore, save and except the personal Establishments of their Highnesses who tho' not being in a condition to be bought and sold, are nevertheless registered out of deference to their authority, as not coming under the operation of the Slave Laws.

6th. In order to prevent annoyance or obstruction to the Trade of the Port, it is to be clearly understood, that the present Regulations are not intended to apply to the Domestic Establishments of Native Chiefs or Traders who may occasionally resort to this Port and not fix their residence under the protection of the British Flag, nor to the Crews of Vessels coming from Foreign Ports; further than to prohibit them from transferring or selling persons as Slaves or Slave Debtors in this Settlement, and provided the parties, if Slaves, may not obtain a fixed residence by residing in the settlement for upwards of 12 Months.—In this latter case the Slaves tho' not transferred will have a right under Article, 2nd to claim their freedom, and the Magistrates are required to grant the same on such conditions as may be mutually convenient and fair between the parties.

7b. As the practice of purchasing Slaves from Poets as Slave Debtors under the Mengheering system, and paying a price for them as such, rendering the party a Debtor for the amount, can only be considered as an evasion of the Law and equally calculated with the purchase of Slaves to encourage the traffic in human beings, such transactions are declared to be illegal; and the utmost price which the Noqueah of a Vessel is entitled to demand on the landing of any such person shall in no case exceed the sum of 20 Dollars, which may be considered as an equivalent for the passage Money of the Party and who may be bound to repay the same by his services under the rules now passed for Bond Debtors.

BOND DEBTORS.

8b. Experience having proved that the system of Slave Debtors as practised in the Malay seas, is inconsistent with that freedom of the subject which it is the desire of the British Government to introduce; the same will not be recognized after this date in any case in which both parties may not be Malays, or Native Inhabitants of the Malay Archipelago—but with the view of providing for such cases as may occur in which it may be lawful to give the Creditor a right to the services of his Debtor, the following rules are passed to have effect from this date.

9b. As it frequently happens that free labourers and others are brought from China and elsewhere as Passengers who have not the means of paying for their passage, and under the expectation that individuals resident in Singapore, will advance the amount of it on condition of receiving the services of the parties for a limited period in compensation thereof, such arrangements are not deemed objectionable provided the Parties are landed as free Persons; but in all such cases, the amount to be paid on account of Passage Money or otherwise, is limited to 20 Dollars, and the period of service by an adult in compensation thereof shall in no case exceed 2 Years, and every such engagement shall be entered into with the free consent of the parties in presence of a Magistrate and duly registered.—In cases where the parties may be of tender age, the Magistrates may Apprentice them until they attain the Age of Puberty, but in no cases are the parties to be burthened with a Debt exceeding 20 Dollars; for which amount their services during the period above stated, shall be considered as a full and ample compensation.

10b. In all cases of Mengheering or Slave Debtors which may come before the British Courts, the claim of the Creditor is in no case to be considered to exceed the services of the Debtor for a period of 5 Years, the debt being considered as worked out at the rate of 20 per Cent. or not less than 10 Dollars per annum.

11b. Hereafter, all agreements for personal services beyond 12 Months are required to

be entered into under a Bond to be registered at the Magistrates Office, the Bond or Contract specifying the services to be rendered, the consideration paid for the same, and the penalty in case of failure. 173

12th. Hereafter, no Contract shall be legal which stipulates for a longer period of service than 5 Years, under any circumstances or for any consideration whatever. 174

13th. The Parties in all cases who may so contract to render their services for a valuable consideration, shall lose no natural rights to which they may be entitled as subjects during such servitude, except the value of their services, for which it will be the duty of the Magistrates to see that they receive a due remuneration; all persons, whatever may be their condition, being equal in the eye of the Law. 175

14th. In all cases wherein the Magistrates may think proper on account of the tender Age of parties to bind them Apprentices for a certain period, such period shall in no case exceed 5 Years, and it must be an invariable condition in the Indenture, that the parties shall receive a moral education and be sent to the Public School, under a pecuniary penalty in case of failure by the master. 176

15th. No Creditor possessing a right to the services of any individual, shall be at liberty to transfer the services of the Party to another except with the consent of the debtor, nor can the debtor change his Master at pleasure without proof of ill usage to be given before the Magistrates; and in case of the Death or Bankruptcy of the Creditor, it shall remain with the Magistrates to decide in how far the further services of the debtor can be claimed.—If the Creditor dies solvent, the debtor is to be relieved from further servitude, but if he dies insolvent or becomes Bankrupt, the debtor shall continue to render his services till the end of the contract for the benefit of the Creditors, he in this case having the liberty of choosing his master. 177

The Magistrates are required to cause this Regulation to be duly explained in the Native Languages, and published by Beat of Gong throughout the Settlement, and the Master Attendant will cause the same to be duly made known to the Noquedahs of all Native Vessels resorting to the Port.

This Regulation to be in force and have effect from and after this date, and to be compulsory until disarmed by the Governor. 178

1823 - 1

My dear Walter

It is such an agree-
sance I have had the pleasure
of hearing from you that I begin
to fear you have forgotten some-
thing. Robt Blankworth is
very understanding and I am con-
stantly sending you the fruits of
his industry, all which I hope
reach their destination in good
preservation. I occasionally
try to send to your care despatches
(natural history) for General Hardwicke
one went off the day before yesterday
the skin of a blue pheasant which
I fear will encounter the rains
before it reaches Calcutta
By the way I have
written

written two letters to General
Hendricks, to neither of which
have I had any reply - one
respecting Mr. Duffell, of whom
I pray take him with my regards.
I have hitherto been unable to
get any tidings. My other letter
to the General was in behalf of
an unfortunate young clerk
of mine, a Gunner in the Artillery.
I fear this application may have
been considered a greater liberty
than our slight acquaintance
warranted. If you can ascertain this
without giving further offence I
shall feel very much obliged to
you; for although the young
man in question is a perfect
stranger

stranger to me I cannot help
feeling greatly interested in
his former state.

I hope you will
be able to send me a boat
with plants at the beginning
of the rains - it might return
with treasures from
mountains. Recollect
if you do it must come
up the Rangoon to Barrack
& not to Fatty's - Lady
Colquhoun joins me in best
wishes for Mrs Wallack &
yourself - Ever my dear Wallack
affectionately yours
W Colquhoun

POSTER

Glasgow. May 22^d 1829.

My dear Sir

The bearer to you of the 2^d & 3^d Parts of my Flore Scotia is my friend Mr. Hamilton of this city, a young gentleman of excellent family & who is about to make some stay in Calcutta. He will, I am sure, like to see the extensive garden under your charge & I shall consider any little attention you may be kind enough to show him as a great favour conferred upon myself.

I am, my dear Sir,

with the greatest esteem
your most sincere

& faithful friend

W. J. Hooker.

Dr. Wallich,

and

Botanic Garden

by favor of Calcutta

Hamilton Esq.

22/5/29

Campden, 23rd May 1823.

My dear Wallis.

Some days ago you wonder where I
 have got to, as I left London on the 16th April. I
 have not yet got to my destination, but the truth
 is that travelling death is so broad, that as soon
 as I get into a station, I am glad to remain a
 few days, attacked with sometimes I am obliged to
 wait for the doctor. I remained at the house
 for 10 days. Dr. Gill has the most perfect collection
 of Minerals & Geological specimens
 for history, a good deal of mineral but I don't
 see Mr. Dawson a French Naturalist. I
 happened to be there at the time, also for
 one year for superior to inspect his
 that I did nothing but study Mineralogy.

Dr. Gill
 Dr. Dawson
 Mr. Dawson
 Dr. Gill

I shall this evening for Merck, where
 I shall arrive in four or five days. I shall
 stop a few days to get some furniture
 presents &c. & then proceed to Southampton
 & then change of the boat, when I shall
 expect my arrival. The state in which
 I find the garden establishments &c.
 as I shall be up there before an
 hour can reach from you. I wish you

would oblige by telling your people to
commence sending me seeds. that I may
not be any time in having something
bringing the garden into some kind of order.
I am writing to different parts of the country
requesting my friends to collect seeds of trees,
shrubs, herbs &c. indigenous in their neighbourhood.
I shall by this means be able to collect
from all parts of the upper provinces.
When I arrive at Calcutta. I shall
confer with the people in the neighbourhood
hills, I hope to be able to supply you
with some part of the Herbarium
Flora. When you write, in reply to this, or
to the public report. I shall send you, such
you would particularly in whatever you
wish to be done, as it would be of great
assistance to me, some misapprehension

excuse this hasty scrawl. as I have been
employed all day being my old Cambridge
friends. I have some detail of Fortification
whenever I go to Calcutta. I have had to be made
but I had an audience to what I could
I remain my dear friend
Yours very sincerely
J. F. Mather

My dear Hodlich

25th May 1853

I understand that during your absence at
China George Drummond was appointed acting overseer at
the Botanical Garden. His father and brother are respectable
landmen and have a very good collection both of forest
trees and other plants at Stirling and see me occasionally
in that line. You will much oblige me by promoting
the young mans interest in any thing for which
you think him qualified. If General Kerdwick recommends
me you will also oblige me by recommending the
young man to his notice. When he left this he had no
fault but a thoughtful desire of going abroad to see
the world which induced him to leave a very com-
-fortable situation and station in life to enlist. I
remain with great regard yours very truly

Francis Hamilton

May 26 May 1823

My dear Mother

I am writing you this morning
 I have just received your kind
 letter of the 21st and was
 glad to hear from you and
 to hear that you were all
 well. I am well at present
 and hope these few lines
 will find you all the same.
 I have not much news to
 write at present. I am
 still in the same situation
 and hope to be able to
 write you more fully in
 a few days. I have not
 much news to write at
 present. I am still in the
 same situation and hope
 to be able to write you
 more fully in a few days.
 I have not much news to
 write at present. I am
 still in the same situation
 and hope to be able to
 write you more fully in
 a few days. I have not
 much news to write at
 present. I am still in the
 same situation and hope
 to be able to write you
 more fully in a few days.

April 29th May 1823

My dear Wallace

I have had the pleasure of
receiving your letter of the
29th and thank you much
for the enclosure that you
sent me relating to your
plantation scheme, which
I take much interest in,
and would willingly do all
in my power to forward
the object of it, as you

well known. but I was
afraid he made you have
suffered in which he
of service with he found
quite impracticable and
took being my opinion I
cannot recommend its being
attempted. The Hindu deity
temple at first sight, but
when considered more
closely with discover many
obstacles to its attainment

and had persuaded that
there were no other objections
the subscribers never
voluntarily consent to give
up even for a limited time
the full paper of their
land below the hills
which are to them of very
considerable value, and
more particularly would
they object to a very natural
to passing them at an
equal which with

The object in view of
pursuing certain lines
and regulating the following
part, would also
introduce our authority
in a manner, to the
credit of their professions
below and lead to a
clarity in that way
which it has, always
by the particular formation
of our power - from our

primary
and ~~pedagogical~~ care
to guard against - but
cutting him all out of
the question they could
have no earthly objection
in venting their fire
upon, since they have always
acted as far as the
cutting of timber goes
where they retain all the
other advantages ^{derived}
from their possession. ^{which}
they could scarcely do
- a

if we held them in the
manner you propose
I think if we held the
tract at all it must be
as a territorial possession
which cannot be in
contemplation ^{now} of other uses
I suspect even if it could
be effected, it would
lead to more harm than
good - The partial way
if it is to be done at all

Captain Forward perhaps,
might succeed, as an
individual, in persuading
them, as he says, "in a quiet
manner" to withdraw ^{from} the
tracks of the forest about
Wappon. but I doubt
it much myself. at that
the ^{only} would ~~succeed~~, even
if he succeeded. But
why look particularly at
these forests? we have
large tracts of our own

of the same description
prevalent, both to the
Eastward of the Murray
down to Chikagong Gully
and also below Kumaon
ⁱⁿ the
Stuhmspon where
I believe the paper grows
more abundantly than
in the quarter of the
more conspicuous there
are the forests in order
which to say the least

we could more easily
Effect the temporary
protection of than of the
Republic forests. I suspect
which ^{it} could never have
been in contemplation
, I include within the
Forest regulations proposed
by the Bd. of Forestry in
1874. I am not sure
that there may not be
great difficulty in effecting

on purpose, ^{men} in our own
interests below Humana
which have been long in
the oppression of a discipline
of men who hold under
acknowledged grants
& rights which we may
hesitate to deprive them
off if they will not willingly
surrender them - so much
difficulties exist that
we can scarcely be carried

at that they should be
most quiet here - as
the whole I am afraid
that the plan of farming
these forests with rice
be brought about under
present circumstances,
and I would not say
if I did not fully
think so, & it would be
worse than foolish to
hold out prospects to you

which I never expected
could be ~~successful~~ ^{realized}, the
I can give you no hope however
I should love to see of the
business, or should an
agency ever appear, I
can take advantage of
it for ascertaining what
might lead me towards
forwarding it ^{in this quarter} further
but, I dare say we shall
see how or other, continue

to get supplied very well
with the requisite quantity
of timber, and give
new plantations some
maturity. I am quite
glad to hear J. W. has
permitted their being
immediately commenced
upon, as it is evidently
a most wise measure
I have seen no doubt
if they are properly attended

to go they will be under
your superintendence,
that they will answer
every expectation.

I have little space for saying
much more - indeed from
my work here I can have
scarcely time to say at all.
All your friends here are
well & never forget you
I had a note from Rogers
from N. Orleans of the 9th

of January with a ship
of return from Buonapartes
tomb. He was quite well
expected to sail ^{again} immediately
on his way ~~home~~ ^{homeward}.
We have had a much
drier season here this
year than usual but
not a less pleasant one
The cars however of Guay
are now set in
forward nothing about
yourself or your historical

at present - or whether
I'm an occasion of having
an expedition sent by
Major Genl. G. G. G. G.
than for specimens &
seeds. The time is come
if you wish to pay
to and make good
I should like necessary
directions - Believe me
always your most
Obedt Servant

Robt. Gooden 14th June 1875

My dear Lecturer,

You have kindly challenged me by saying at the close of your late "Lay your free opinions" & should be wanting, in the high and serious of your Lectures to words you did I withhold it.

As the Secretary of the Agri. Society, I am ready to call for the Special Mandate, for the purpose of considering Capt. Cortes propositions, at 10 o'clock if you desire me to do so.

As a member I have not the best inclination to accept, I do not conscientiously record the plan. Our Society ought for a long time to come to be thoroughly agricultural, leaving the other agricultural to others not worthy answer they would. As the Dept of the most splendid, magnificent, & liberal establishment in the world for Bot. & Horticulture, putting aside altogether the members of your Society I feel still stronger disposed to insisting in advising the Govt to send Captain Cortes.

have explained to you on Tuesday
last, what I believe to be the sense
of the notices as well as the other
specimens touching our 1854 for 1855.
The first business day of 1854, I will
try to put my thoughts together on this
and other points connected with
the objects of the Agricultural Society.

What can I say more? say

My dear highly respected friend
in word and I will call the
meeting & lay before you
before it.

Yours very truly

J. Matthews

W. Leicester

P.S. All the members of the Committee
have agreed to be at the meeting of Tuesday
last & to having the pleasure of sitting
with you on Tuesday last
the 14th Dec.

to Mr. Key dated 1829
14th June 1829

To W. Lyeester {

Sir

Understanding it to be considered an
object of considerable importance by the
Agricultural & Horticultural Society of
which you are President that a person
should be sent to the Cape expressly to aid
the object of the Institution by procuring
a supply of the various fruit & other hor-
ticultural productions of that Climate
with a view to their general introduction &
extension in India allow me to offer
Myself as a Candidate for an employment
of such importance & so highly honorable
to the person employed.

My late Residence at the Cape
where I became acquainted with many of the
Dutch Gentlemen particularly the owners of
the Estates of great and little Constantia

The Brewery which an ~~express~~ supposed
to produce the best stout in the Army
My predilection for Antienttural pur-
suits generally lead me to think that
I might be more useful than a person
who sh^d for the first time visit the
Cape.

3 In regard to remuneration My
health benefited so considerably by
my late residence in South Africa
that I scarcely consider it an object
I sh^d feel quite satisfied with the
allowance to which as an Officer
on leave I sh^d be entitled to that
sh^d I think the employment of my
services likely to be beneficial to
the Society it wd be only necessary
to obtain the sanction of Gov^t to my
absence for a year in which time

Mon 29 May, 1823.

Sir

The inclosed I received lately from
M^r. Sturm at Nuernberg, with an urgent request of
forwarding the same to you without loss of time, and as
it was wrapped up and sealed in coarse oil-cloth, I
thought it best, for the purpose of lessning its weight,
by which the postage is regulated, to take the covering
of it off, and to replace it in this, and hope you will
receive it equally as safe. With this opportunity I
beg leave to ask, whether you have received, by the hands
of M^r. Roscoe at Liverpool, the first ~~folio~~ Number of
Sternberg's flora ~~and other papers~~, which the author
remitted to me with a request of conveying it to you,
and knowing M^r. Roscoe to stand in literary correspondence
with you, I considered him as the fittest person, who
would be sure to forward it to you. The author has
since made several inquiries of me, whether I had heard
any thing about its having reached you, but hitherto I
have not been able to satisfy his inquiries. Any thing
which you might have to be forwarded either to M^r.
Sturm or to Count Sternberg, I shall at any time be
ready to take under my care, and if in addition to this,
you should be desirous of receiving from Europe any
botanical seeds, I beg leave to inform you, that I am
in the habit of receiving every year from the different
botanical Establishments on the Continent a supply of
such seeds, as have been collected by them in the course
of the season, for which I remit such, as arrive here from
other parts of the globe; and in that case, I should only
beg, you would point out to me a channel, by which you
are certain of their reaching you safely and quickly.
With the most perfect esteem I have the honor to be

Sir
your very obed^t. humble serv^t

My Dear Wallis,

I write this to acknowledge my
very sincere Thanks for your kind invitation, to tell you
how exceedingly sorry I am to be deprived of the Society of such
Friends, and of the Information that I must have gained; as
I think we never meet the good General without discovering
a number of Indian objects all of which are of such value
to me. The Day you left me my hand burst on the inner side
and today another large opening has occurred on the outside.
To morrow I may expect some comfort, but I am so irritable
at present that I could wither bear the motion of the Calamity
upon my the Heart. With best respects to Mrs Wallis
and General Hardwicke, believe me,

your very faithful and obliged friend.

seed from
Mr Thacker with the
seed he by W. Wood 1823

Dear Sir -

Since writing you ab^o 2 Mos ago I have
rec^d the European seeds which I generally get at this season
of the year, but their quantity is but small & scarce for,
as in consequence of my removal from Clapton my wants
are not so great I am happy to be able to divide the
few with you & trust the present small packet will be
acceptable, if urgent it is not larger - In my last I mentioned
my removal to Bath & that circumstances had led
me to relinquish the cultivation of Stove plants, but that
my small garden would be occupied chiefly in experiment
to order to ascertain what water plants might be culti-
-vated in the open air in England, & that therefore seeds
of Nepal plants would be greatly acceptable, *Ph-*
-dendrum arborescens stands our climate tolerably well
I have seen several plants which have stood unscathed
the past winter when Fahrenheit's thermometer has been
as low as 7^o - I took the liberty also of mentioning

or respects friend of mine. The Rev. Dr. Bowdler Esq^r of Bury St. Edmunds
near Suffolk being an acquaintance of the Governor of the Isle
of St. Thomas, the gentleman has returned many gr^{ts} from
from that place, & would just stop by land from you, & is
very likely to make your return in American style (having
several correspondents in that Country being originally a
native of it, I shall also be happy to see any favour to do
the same, as a late grandson of mine has commenced the
- voyage at New York & who has promised to send me some
shirts & such). I shall be happy to learn that Mr. Mearns
American, Poppleton Zamora & Mr. Maratta Johnson will
be safe in hull I don't not know how should. you will
pardon if you have see my last, this letter I have
written by way of duplicate, see I shall

Wed, 11/11/23

My Dear Friend -

I have received your two
welcome letters - and shall immediately
take measures to fulfill your Commission as
to the coffee seeds to the best of my
means & abilities - I should have
sent some plants by this occasion - but
that it has been so sudden - & the
vessel makes a coasting voyage to
Calcutta & Madras - before she sails
for Calcutta - I have but a moment
to write at present & to assure you
of my constant regard & affection
I am your sincere friend

C. Fuller

E. R. Wallink Esq. & Co.

Port Louis 16th June
1823.

Wpaul 4th June 1883

My dear Burtch

Thank you much for your letter
of the 25th & sorry for the
specimens with the names of
them. I'm happy to find we
have so many good and
accurate things from New
York and other parts that
may be said new to have been
introduced into Wpaul.
Some came up from seed
others are of the number of
plants that you brought

Give a few more such parcels.
I have an also some seeds of
the beautiful flowering shrub
like plant that you call a
Metrosideros. I think and
which you say have failed
with you. I have several
plants, several seeds, I
shall endeavor to get
one step - a layer to take
for you. I have been
keeping the same long
for his paper cup - he says
seeds are ready there yet

of work you. Many that
I could named not do here
sent to Nyakote where I
understand they are of working
would have sent ^{them} grafts ^{you}
of almost every tree there
according to your invitation
I have, you, see, enclosed another
parcel of specimens for
my friend for being named but
but what I know the names
of some of them. but you may
like to recognize them perhaps
and wish continue to send

The writer has due to postpone
his expedition for a while
in the mean time I have sent
my head man here with
to drop a number of plants
at Agakoti and then goes
on I have directed him
besides bringing plants for
me, to collect specimens
such seeds as he might be
able to find for gun - for
which purpose he has taken
Paper - books &c - with him

and on his return shall
have the pleasure of reading
you what he brings in. ^{From}
while, Maunt. sends you daily
supplies of seeds from various
parts round about. - How
very happy to hear that the several
plants you have succeeded
so copiously ⁱⁿ England
and congratulate you on
all the honors and distinctions
that you have received in
consequence of your judicious
exertions on this way. -

Wag, for these reasons I believe
I love you, but still you will
show in the plantation which
very well I am sure.

Thank you again & much for
the presents which have
arrived I hope I have been
pronounced excellent.

The Noyabul for Rowen
is I fear but too true
I checked a little as you
at first, he has brought
his misfortune upon himself
I doubt but still he is

Just as we deserve and
which must be so gratifying
to you as to be share which
you are pleased to exercise
me, God knows it is trifling
Enough - but such practical
work always be a genuine
service. How many times
I see you so little acquainted
I hope regarding your purposes
about farming parts of the
forest below. I am afraid
nothing can be done there

to be pitied and the way in
which he has covered the
scene (if it be true) is horrible.
What a fool Dr. J. J. seems
to have been making of
himself, in the mad, or
what is his object. If people
in fact take any notice
of what he is about (and
what do they say about
it? I have no news for
you, how should I? when
you seem to have none

Even in fact. - We are
sorry we have thus given them
you felt it. and we
cannot have commenced.
Give our remembrance
to our party. who promise
in best regards - we are
all tolerably well. - Hope
you will not be hearing
of D. Humboldt's approach
and if you hear of any
other curious matters
give us a line about

Book notice of Mrs. Mackenzie
J. J. Richards' marriage -

Stoughton
My name
is

1873

It has been some years since I have had the pleasure of seeing you
the digital number for which I have a particular fondness
for the paper which has been the subject of the meeting
of the (London) and since then I have recommended to
anatomical students for their study various features
between the books of which you have written might be
manufactured in case of need. I had about a dozen of
each set of them and was much surprised to find
if the book had not turned over from the press for I had
the impression that all this was done by a Mr. Water which
I had seen. The paper however which I found every thing
to be the best. Your man - at home - has been
very devoted and I have now well
and the paper is to be supplied by the staff meeting
of your good friend and I am in hope we shall not want
what you require particularly if you are good enough to keep
a look out like that of last year. The boxes are producing
great numbers of beautiful plants though the supply
exceeds from the fall of the paper these and from
matters - but I must not anticipate all the way
I ought to ask you whether you can hear of any better remedy
than the for the disease of the milk-crook - "Gyngler"

Dear Mother
I have just received
your kind letter
and was glad to hear
from you. I am well
and hope these few
lines will find you
the same.

as usual.

Yours very lovingly
Edward Howard
16th June

My Dear General 18th June 1873.

I have only this moment had time to look into Mr Piddington's letter, which you sent me for perusal; & I now return it with thanks. As to my making any notes on it, it is too jocular on a subject of great interest & importance to me, as it must be to you, to admit of it; besides ~~he~~ candidly confesses that I am very sceptical both in regard to the correspondence of the two Frenchmen at Sohsaugur; mean in as far as relates to Agricultural Skill. Two hundred Rupees in salary for a belly full of Manilla & I know not what humbug, has no weight with me, & I am not sanguine enough to expect any grand illumination from such equivocal sources. On this I have laboured with my old 8 or 10 N. & 10th hands in this garden & my own experience during fifteen years, in India, may I think safely be opposed to a Century of French or of any

then humbug. No lead therefore of troubling you
with any Comment or an unprofitable
I mean to give you my thoughts on a few
weighty points, and here they are.

As soon as we resolved upon fixing ourselves
at Kempoy, we had made up our minds to
meet with difficulties arising from poverty
of Soil, and absence of all manner of Shade
& Shelter, to which may add, at least
temporary want of a sufficient supply of
water. We knew we had to encounter & com-
bat these obstacles, we shd not complain if we
find them not to be easily removed. We had
in the other hand, the advantage of obtaining
the land at a moderately cheap cost & in
one consolidated parcel. We have ascertained
that the Coffee Plants (Seedlings or Young
Stock) grow well on our Soil, the grand question
therefore is to ascertain what will answer
for Shade, & for Shelter.

It sounds big and stately to hear people
speak of Arenaria Capitans & Populus Tacamahaca
as it wd, undoubtedly if Daisies & Oaks.

were substituted for them, for they may with equal cleverness be supposed masters of England but I lose all patience with a person who can seriously recommend what he calls the Singapore Scum for our purposes. I wd think he is the man who requires prizing; at least his advice is extremely unwise.

Green Crops are useful as auxiliaries, but vain wd be our hopes if we were to rest them on that remedy alone. Substantiated & permanent Shade & Shelter is the grand thing we require: shade chiefly during the hot season & during the latter part of the wet one, shelter during the months of April to July chiefly. On preparing the ground to receive large shrubs or (artificially or naturally) small trees for these purposes we must, in fact, also to rear green or temporary crops. Employing the former alone wd depauperate the already meagre & ungrateful soil; employing the latter alone wd, as I have already been free enough to state

as my decided opinion, prove too partial a
Remedy, to accomplish the protection of the
Plantations: using both will save time, save
expense, & counterbalance in a great degree
the necessary consumption of what is nutritive
in the Soil. But I repeat it, we must have
protection from the direct rays of the Sun
and from the boisterous winds, which attend
the equinoctial changes in ordinary Seasons,
and it is under this impression that I
have sent plants & seeds up to Rangoon
fewer things that suggested itself ^{as likely}
to have a chance of success. Since it would
be ridiculous to suppose, that a place
in which Coffee grows, should be inimical to
all other sorts of trees or shrubs, I cannot
conceive why we should be disheartened because
prosperity, in the Indies we have not been able
to effect any thing but the mere commencing
of our experiments. We are to try what will
I what will not succeed; we proceed on
new ground of which ^{we} know but little, & we
must by no means listen to those wise

also say this & that they cultivate in Java,
at Manilla & at the Mauritius: therefore conclude
it also in Bengal. Roxburgh, my own & the
experience of many other good hands, has taught
me, that all what grows in those climates
will not answer on the continent of India, or
in Bengal, or in certain parts of Bengal, so
stubborn is Nature, & so unacquainted are the
Nizamullah & Soosayur Agriculturists with
some of her Commonest features. Among the
trees that have been tried at large is the Mulberry
70 or 80 Rijpts has been planted with it, and we
have ^{instances} ~~instances~~ of it having been grown there
before. Should this succeed it wd be grand indeed,
for it wd more than pay itself, but we must
have patience with this as with all the other
Subjects of our experimental enquiries. I am aware
of the expences, which this business necessarily
must entail on you, & feel heartily grateful
for them, but they you to consider also
that the sum of them cannot be great
if it is recollect'd that only 5000 Rs (probably
less) has been expended from the Commencement
of the concern which is exactly $\frac{1}{2}$ the amt of
Salary only paid at Soosayur. Do not for
one instant even suppose, that I consider 5000 Rs

a trifle, far from it. I speak only in com-
parison with the charges that might have
been incurred. Suppose that you were to pay
two things about 500 N. I should then say, You
would throw so much money away, but pay
that sum in labourers, diggers, &c. in that
or any thing that might make our shade
ingredients thrive, & I should for me consider the
money well spent.

One single days visit to the grounds in
question, would tend infinitely more than a cart
load of epistles to give us a clear & satisfactory
idea & insight into all the particulars respecting
them, & therefore most earnestly recommend our
making the trip by water, as soon as you
possibly can make it convenient to be absent
for 8 or 10 days, your choice of time being also
mine.

It is, further, but justice to L. Manly
to say, that he has faithfully & economically
performed his duties. His acts are before you
& have been so up to long. Enclosed send them
to you as far as May inclusive; compare them
with others & put me to rights if I am in
the least mistaken in pronouncing them very

thing which wish them to be. Collier will tell
you that I consulted him respecting the additional
500 Niggers which Lewis extremely anxious (as
I am told) to bring in cultivation. He
told me to act in such a manner and
thought of in every way give for satisfaction.
This was in March last, and my hopes were
to get the grounds to have them prepared
against the rains, Lewis naturally anxious
to get Manly to assist me, which however
could not have been effected had not his
brother Chad, an old Indigo man from
Patna, and Shekarpur but otherwise
young enough in age been at hand to be
employed at Ramnampore. Another, &
that a very essential consideration was
that of my being invited to give Lewis a
situation as Plantation Clerk under me
for which he is well qualified. Chad has
been at R. since the beginning of April
his brother remained with him till the
beginning of May in order to initiate him
in all localities. During this time Lewis
filled with promises of the wished for

Grounds near Chinsiroko (at Shantapurah).
As soon as Lewis came down I purchased a
lot for him I sent him up to that
place, all under the faith of promises
of Lewis (one of which being Coler was
kind enough to write to) even fifty 50-
Puzzles were regularly ~~applied~~ obtained &
sold for signed, but here the whole ended in
smoke, the loss of 200 P. which I advanced
for expenses on the occasion. Of course this
arrangement of taking L. down & placing
his elder brother at our Kumpoy R. was
conditional & he being responsible for the
God faithful & unexceptionable conduct
of his brother, as now pledge myself to be
for that of both. But remember that
you & your close have the confirmation
of this plan, say that you disapprove
that Lewis is off to be a ~~rich~~ gain
for Kumpoy. but our hope, however, that
altho' I failed getting the ground at Shantapurah
I agree with me in the property of ~~Shantapurah~~
on some other spot not far from Calcutta

For I cannot but acknowledge that the publication
concerning the Bank great appears to me
is somewhat questionable, to say the least of
the prospects of success which open on that
quarter.

Please a thousand things which I
will to tell me with you, as I shall do.

Consequently be well with you by Mr. 12th Feb
Tomorrow. There are among others, two or
three points of consequence which I must
say to you, but they are such as
are better spoken than written.

1823, June 18th

Wm. G. Lawrence
Coffee Street

London 19 June 1823

Dear Sir,

I conjecture that this letter
will find you settled at Calcutta and
with ^{that} amended health in consequence of
your voyage to Serampore, from whence
I have heard of your Mount in the
Red Raffles.

My object is now ad-
vancing you is to introduce to your
acquaintance and recommend to your
friendship Mr Charles Epton, a near
relation of a particular friend of
mine, in whose welfare I am parti-

D. Wellick.

entirely interested. He has received an appointment in the way of his profession as surgeon in chief of the General Hospital at Calcutta. You will find that he has made the best use of the means this town affords to acquire knowledge in the studies to which his attention has been directed and I am confident you have good reason to be pleased at being known to him.

Believe me Dear Sir

Yours very faithfully & obedtly

Jos. Sabine

18-19-20
1920

My dear Judge

Who have copied to you notes
of the 2^d before this M^y, has I not had a
bilious attack which took me two days to get
through. If this is the condition of my tenure
on life, it is not worth living, & were it
not for wife & children I should soon know
how to settle matters.

Believe me friends, that nothing can
be more unjust nothing more unfounded than
charging me with prejudice against the Cultivators.
Is a man to be taxed with that vice
solely because he differs in opinion, Ah! why
because he ventures to say, he detests all
~~such~~ manner of theory in agriculture
not born out by facts? What in the
world have I to do with the Laurelette
facts in regard to Coffee? I have told
F & repeat it again, that whatever
you deem proper to arrange with our
friends regarding our amalgamation will
entirely have my hearty concurrence.
Consider it as improper that there should
be three distinct interests, in many

Speculations, emanating from one & the
same source, which is the British Ho.
house. Don't tell me of any other
case which under any other circum-
stances might serve as precedents; we
have to do with a new thing altogether,
if it is desirable, it is good that there should
be an undivided & concentrated endeavour
in all to push it on to perfection
& to victory.

Wish that all the concerns
should be amalgamated - that there should be one
speculation only & not three; & therefore
beg you will do all you can to pro-
mote this arrangement. Suppose we
talk the matter over with Lauriston, -
whom you may be concerned.

Had a draft for five hundred?
W. on acct of the Ramm paper
Plant. The expenses on acct of the

fruitless attempt at Chemsua amount
to about \$500. which it cost
I mean to win on the ground while
he collected \$1000 & \$1500 for a
tent. The latter to hold put up for
sale & I have no doubt it will sell
well, & for more than I gave for
it. It is a large & Polished tent, &
worth more than it was purchased
for some months ago at Cullis's
outlay. The best plan will be to
keep it until the Cold Season,
when such articles sell to best
advantage. The whole amount
of expenditure is 215 \$.

Mr. Wallace Egan L.L.
 Esq. in K.

My dear friend,

The Bill is a number
 of years ago, and you know
 it is temporary, though it is
 the business of the world
 and, when you claim a right
 that is what it does not do
 of any organization - I do not
 know what is a Bill of the
 that you do not see me with
 at all, but you are of you with
 several things of the
 which I know, and I think
 we shall be happy to give you a
 share of - I do not know the
 of the Bill, but I think there is

Journal number of $\frac{1}{2}$ the work.

On the Cambridge road near

the main one of 10 miles the

ground then being not stronger

the nitrogen - the amount of gas

found in the air was sufficient to

and phosphorus to form the water

colours also of the iron which

is a good deal of the iron in the

air - the amount of iron in the

water is more than 1/2 of the water

the iron in the water is more than

1/2 of the iron in the water

the iron in the water is more than

1/2 of the iron in the water

the iron in the water is more than

to think you had no iron in the water

of iron very easy indeed to

have if you were to try to make

substance that they would have

with one grain in your hands

which to look you would

not find the iron in the water

the iron in the water is more than

1/2 of the iron in the water

the iron in the water is more than

1/2 of the iron in the water

the iron in the water is more than

1/2 of the iron in the water

the iron in the water is more than

Book - diploma
on Geography
Number of
the Boston
Long Street
School

Miami 3^d July 1863.

My dear Wallace.

I am glad to send you, by box
trough, some parcels of
specimens which I have
got from Japan. I have
certain hopes that there may
be some new ones among
them, as I think there are
among the grasses &
primrose & lily species.
I will continue to send

them to you, tell they are
all off, and have them
put in to a cloth which
they will carry them to
you safe. A bush standing
the success, - they have been
very heavy with us this
season - I made the valley
very unhealthy, the potato
tubers having a bad
appearance, & carried

of a great many of the
inhabitants. - We know
also that a few people
and some of us, at the
least, so much as we
shall be. - No hope we
shall all get thro' it
safely at least. - No
you must have it must
I hope you suffer nothing
but what arises from
more of profusion from heat

I have nothing interesting to
tell you? I am very glad
that the "Butler's" list
list - more particularly
as I have ^{in the hand} looked at it
before to keep guessing
have you done well
for. I believe I ought
to tell you that I got the
Gorseberry & Currant
plants that you sent
to me by some of the Nepaul

people - the fellows were
not aware of their value
auction indeed of what
number of the plants grow
included for me) and being
made things ^{they were} ~~to~~ ^{to} ~~be~~ ^{be} ~~made~~ ^{made}
referred to lot
most of the other numerous
plants I have had from
me, flourish much -
there were no seeds left
at Paris than when the

hope Aunt, were here
but Aunt says continues
to send you whatever he
he can collect. I gave
you the will for to go perin than
for what is to be had there.
Do you mean me to pay up
all her arrears of pay
since it was first stopped
for I think he has only
got received ^{10 pages} of from last
January or thereabouts.

leaving some months still
unpaid - I of course have
no funds to give you. Just
as things supply me with
me for my meal the
quite exhausted.

May be my regards to -

Mr. Walcott & believe

me yours very truly

Edward L. Pierce

Glasgow. July 6th 1812.

My dear Sir

About 2 months back I did myself the pleasure of sending you, by favor of Mr. Hamilton, in the Ship Osprey, of 2 from Glasgow, Parts 2 and 3 of my Exotic Flora. I have now an opportunity of dispatching by a vessel from Liverpool the 4th Part of this work, which you will see contains more than one fine plant for which our Gardens are indebted to your kindness.

It is long, very long, since I have heard from you. Mr. Colebrooke lately told me that you had been absent from Calcutta, on account

of your health, but were immediately
to return to it. I hope sincerely
that your health is fully re-established
& that you will be able to continue
your scientific labours.

I have lately gone through, with
my friend Dr. Schwaegrichen, most
carefully all your papers & given
names to them preparatory to pub-
lishing their figures & descriptions.
I trust I may yet receive many more
from you: — & may I beg you to
bear in mind the procuring for me,
if it be not giving you too much
trouble, dried specimens of Orchids:
gemmae plants of India. I am still

in want of innumerable species; many even
of the most common. There are very many
that I can make drawings from & figures,
even from dried specimens, which we
cannot cultivate. Could you not
send me specimens of the *Nepenthes* &
of the *Pistia stratiotes*? Two plants
I have long & in vain, desired to
procure.

The next part of my *Exotic Flora*
will be out in September & I shall
send you that & likewise the continua-
tion as soon as opportunity may occur.

I am, my dear Sir,

ever most truly

& faithfully yours

W. J. Hooker.

Sr. Wallach

at

Albany 13th July 1823.

My dear Webster

I thank you much for your
two letters of the 28th and
30th of that month both of
which, with the specimens
which you were good enough
to return to me, arrived to
day - being part of four other
arrivals which on the 11th
we frequently receive together.
I shall attend to your notes
about seeds & ships of wood

of the plants as you have
marked & white in the
case on that way, that
we sent to you here after when
they are ready for dispatch
I have ^{been} sending in many
supplies of lots of garden
seeds that I can show
but little is there at
present, but shall secure
a quantity for you of all
the kinds we have, and
dispatch them as soon as

profits and all other good
things that have been collected
what you call an "Omnium
et Rariorum" or one of the
specimens of Heliconia is a
bulb which I had from
you - and have been cherishing
as a very rare flower - that
is, an European one - there
are several plants of it
here - I have unfortunately
lost the number of it and
the name - but I cannot
help thinking that it is

a bulb - a flower, something
superior to the others! that of
Cork, I smell's too, in Cork
it - do you know what it
can be... The Digitalis
I wish look after - keep what
seed I can raise for you, and
will give it out liberally
but then confounded
of which we have an ample
store this year, during
the half the plants, a number
that came up - after which

it does not absolutely destroy
 the plants. It prevents the
 seed forming, which causes
 equally injurious in many
 cases. These rains too I
 am very sorry have this
 season made us all
 unhealthy. The cholera has
 every day in the valley
 has from the 1st of last
 month carried off some
 say not less than 5000 of
 the inhabitants. Perhaps I

an answer he must, for
I speak at present a la
venture. They are referring
however very much and
are much alarmed as
they have need to be aware
of the things that are going
then having been connected
of some acquaintance
the Committee, Chinese & others
was not to add one to the
number - we have had
some casualties among our

people - I suppose
there are none of us to talk
as we should be, but thank
God, we have as yet escaped
the Cholera and that we
might have the good luck
to keep it off and get thro'
the season tolerably well.
I suspect the weather is
uncommon at some times
but I have not heard of the
Cholera having broke out
in any other quarter in a

but way.

Plan for the Strawberries
I return you the 4 little papers
of the seeds you sent to me
to show you the state in which
they arrived here. I saw nothing
useful it was to attempt growing
any thing with them. I think
they seem to have deposited
into the paper (from their
own position) it seems for
the only envelopes are
undisturbed even. I am

The *Mutandros* seeds were
unsure - I send you some more
this year they are much
the same state as the former
ones. - but there is no fear
from losing that plant
and you find the seeds have
been flushed too early this
year do not take believe
part of them here.

I have got the Sweet-pea here
the *Overland* pea (which
is called) the specimen

which you say is "near if not
the very sweet pea" ^{has a seed of} came up
from the Owl seeds which
I got from you Helene. -

The handsome specimen
"Pulsatilla Buxingtonii" ¹⁸⁹⁰
I cannot get to give seeds
tho' it flowers profusely
beautifully. but I have
succeeded in getting it
from your slips of which
I will continue to send you
some at the proper season.
My two finest plants of

which had grown out of the
largest pots I could get for
them. I put under the ground
this year, & have they flourished
exceedingly. but I am not
well as to the effect of the
out of water being what I do
the roots I imagine. I am
not to lose them for they are
truly beautiful plants.
a thousand thanks for
the lovely plants you will
send me. I am with
much love

what are likely to thrive
here. I wish to make a collection
of plants such as you
require to return to you.
A second thought occurs
Malce thinks there may
be some life in the Muehlenberg
seeds, I wish put them in little
pots & try if we can get any
things from them. What
appears decay, may perhaps
after all, be from the fruit
only? and I find that one

perhaps some of the Digitalis
of the other plants; I am
very sorry the Garden is
uncertain this; I wish I could
see what they would be
carefully packed, by the
baggage. - I am sure
I send you specimens of
the Oak from Spain that
which I hope reach you
and now - I do not
send his package of

Exhausted. I have the
new news but I
have a line from you
I pray keep quite well
Make my best regards to
Mr. Woodlist. I
believe me
Edward Weston

I am afraid all the plants of the
Mediterranean are dead, unless the
leaf which I enclose should
prove to be it. pray let me
know of it is. and I send you
my

ath month piece of the 'ped' sheet

The Maloe declares came from

the plant of which I had

the specimen. - The ed may

be. - Have kept some for

for having when the season

comes.

The Governor sends to Mr Porter the accompanying
communication from the Horticultural
Society in London, which is forwarded to
Mr Porter, a portion of the seeds brought out on
the Garden of Peace - The Governor requests the
Packet may be returned to him after Mr P. may
have made himself master of the object,
under the direction of the Society - It is the
earnest desire of His Governor that Mr P. should
as early as practicable prepare Boxes such
as described filled with all such local
Plants as may prove acceptable, as also
seeds & dried specimens to be forwarded
via China on the new trading Ships
which are under way to be going
soon -

Suffolk 15 July 23

Mr Porter

Y^r 19/20

Palumb July 15 1923.

My Dear Friend - I loved the pleasure
of receiving your kind letters of the 25th and
28th of February last by Mr. Andrew Dick - &
Thank you for them - our Madagascar
Botanists are not yet returned from that
island but we expect them daily - I send
you enclosed an extract from their last
letter to me - in which you will observe
your names mentioned - I have directed
enquiries to be made of Mr. Paulson about
the dry plants - we have had a very
accomplished botanist here called Mr. Lieber
who has published upon the natural history &
antiquities of Greece - he is gone to New
Holland - he is a remarkably clever man
but unfortunately has a maniacal hallucination
which he constantly harps on - when not prevented
by the presence of strangers - you will soon
have Lady Amherst with you - she is very
fond of Botany - & will show you a coloured
print of the Madagascar Contributions - the

No. 11

seeds of which I sent home to my old
friend Mr Barclay of Perry Hill - they
flowered with him and he had the
plant beautifully drawn & engraved Lady
Aimhurst has promised to use her influence
with you to send to my friend some of
your vegetable riches - I have generally
given him a portion of what you so
liberally send to me -

I am sorry to tell you that my great
Musa sapientis - which you sent me about
eight years ago died this summer - it
never flowered - but was the most
enormous & extraordinary plant I ever
saw - I fear that I killed it by
too much care - It had been sick
twice before - & I recovered it - by giving
it large quantities of water thrown over
its leaves night & morning - & by adding
much manure of the richest kind to the

roots - but I think that in its last
illness - I overdid the remedy - I
should be very grateful for some seeds of
the Musa Superba - if you can spare me
some -

Since the departure of Governor Taylor
I have come down to Belmopan - & shall
probably reside more here than at Bois
Chery - I find many of the seeds you sent
me in 1819 - now in great beauty here -
I would like to continue to embellish
this place - I prefer seeds to plants - as
they are less liable to injury - & more
easily transported -

our sole cultivation here is sugar -
we have no coffee - so that I have been
obliged to obtain the coffee you require
from my neighbours - but as that is an
affair of business - in which there is
another gentleman interested with you

19723

Please Advise you are the subject in the
separate letter -

For your kind attention in mentioning the

I am also entitled - & hope the unknown

to him are in best respects to your

Family & Children - Believe me ever

Your very affectionate friend

Wm. B. Lewis

Wed 17th Sept

My Dear Sir -

In consequence of your letter of
the 25th Feb^r last handed to me by Mr
Dink - I took no time in consulting the
most experienced coffee planters both French
& English on the best means of conveying to
you coffee seed fit for planting in India
I showed them the modes you pointed out
in that letter - and I select from the
answers - two extracts which will give you
an idea of the sentiments of them all -
I deemed it therefore prudent to conform
to their advice - and I now send you the
seeds prepared agreeably to it - I should
have had much pleasure in preparing these
seeds by my own people & under my own
eye had I possessed any coffee plantations
but as this is not the case I have been
to Mr. Wallis Esq

157
obliged to obtain the seeds from those
persons best able to furnish it - paying
for it on delivery - by drafts on Messrs
Andrews Dick - you have not specified
the quantity you desire - but judging from
the number of acres you intend to plant
I shall send you at present five hundred
pounds of Coffee - which is the quantity
for one hundred acres - and in the
course of a short time shall send
five hundred pounds more - I have
agreed to pay for this coffee prepared and
put in double sacks forty dollars the
hundred pounds - so that four hundred
Dollars will suffice to pay the amount
of the thousand pounds of Coffee - and
to enable Mr Dick to meet the payment
I have drawn upon you in his favour

for eight hundred slices super - enclosed is
an extract of the letter of my friend Dick
relative to this affair - Pray let me know
if the coffee succeeds - & to what extent
you wish to be supplied -

I have directed two cases of coffee
plants to be sent to you from Bois Chery
one of them has been long since prepared
for my good friend Mr. Ballard - to
whom I request you will have the
goodness to give it - I shall direct
that plants shall continue to be sent
to you from thence -

Believe me My Dear Sir

Yours very Affectionately

C. S. Peirce

15th July 1823

Bellevue

I sent one friend Ballard the
best treatise that I know upon
Coffee planting - he would
no doubt - let you see it -

Paris le 23 Juin 1823.

Monsieur Ch^e Siffert,
à Belle-Croix.

Monsieur,

Je vous remercie de la 'Quantité' de café que vous
desirez pour 'Semence', mais la manière dont vous voulez
qu'il soit préparé pour que la 'Germmination' en soit certaine
ne l'est pas la même. — D'abord, parce que quelque bon
que soit le café avant d'arriver au point de 'Séchage'
suffisant, éprouverait toujours, un degré de 'Fermentation'
qui nuirait à la 'germination' & en laissant l'enveloppe
de la 'Graine', qui est très forte & dure lorsqu'elle est
sèche, il ne pourrait germer — ainsi vous manqueriez tout
le but que vous vous proposez.

Quoiqu'il en soit de la 'Semence' que vous désirez
de recevoir dans l'Étranger, il conviendrait de le préparer

Comme s'il aurait été planté à main levée
ainsi la préparation, il est aussi bon à planter au
bout de six mois, qu'au moment de l'éclosion.

— Si vous en avez une montee préparée de cette manière,
par ce moyen, il ne craint pas de fermentation, sèche
promptement & se conserve très long temps — Sans courir
le risque de perdre de l'humidité, comme lorsqu'il est
laissé avec l'enveloppe de la Cendre.

Si vous en desirez Monsieur, je prépare aussi & que
mon prix vous enverrai, veuillez m'en faire savoir —
mon prix préparé comme la montee, est de 45 Piastres,
le Ciel. Celui en Cendre le même de 45 Piastres aussi
par Barrigue & le tout au Comptant.

Je suis l'honneur de vous

Monsieur

Votre très humble & obéissant Secrétaire

(Signé)

L. J. B. B. B.

Traim 24 Juin 1823 -

Monsieur Ch. Siffair

Belle-Orme

Monsieur

ayant appris que vous desiriez avoir un
Casi jr-plantier je vous en offre, dans le cas où vous
n'en auriez obtenu de personne, qui vaut beaucoup
mieux que celui que vous demandez - parcequ'il n'a
pas cette grosse enveloppe de la Perle qui l'empêche
de pousser, en raison de cette peau qui fait parchemin
durci, que celui dont je vous envoie une montre, de
Oscarre bonne Senance pendant 7 ou huit mois.
L'un est 45 à 50 Plus à qu'un de l'autre qu'on
laisse avec cette enveloppe, ne pousse souvent pas avant
deux mois - & quelque fois même ne pousse pas du tout
Le Tris ou Casi Eprouvé à la main, comme

Celui qui jerois offert de 40 Piastres le cent
à celui Seche seulement de 25 Piastres le %
Sous au Comptant Pas de mania Sur Person
parce qu'on éprouve souvent du retard.

Le besoin Koufuir, que m'a proposé me
vous envoie, le Prix est le moins qu'on puisse y faire.
Veuillez me répondre le plutôt possible, parce que la
récolte est avancée.

Je suis
Avec l'honneur etc

Koufuir Votre très-h. T. = =

(Signé) L. Humbel

St Louis 30th June 1823.

My dear Telfair

I have this morning received your note of the 25th and I will be very happy to give you and my Calcutta friends any assistance in the coffee business.

With this view I request you will desire the packages to be delivered into Messrs Saunders & Wicks hands for me and I shall see that they are forwarded.

As to the periods, if you will require all in the course of a short time it would perhaps be as well to draw for the whole estimated expense of Dr Wallick's order at once and then you can pay the people by an order on me as the coffee is delivered perhaps this will be the best plan & if you think so you can send me the set of drafts in sicca rupees on Wallick and I will get them negotiated giving me a letter of advice to send with the bills.

This will probably be better than teasing either Wallick or Mr Sutok H. with a number of orders on them and the amount I should fancy to be of not the least consequence consideration, whether it is drawn now or a month or two hence, and you will only on future occasions have to give a simple order when you have a payment to make.

When you write Wallick you may say that I shall endeavour to secure the packages every comfort on board, and of course there will be no expense attending the shipping but the public

charges at the Eastern House and Detached and
these I will buy and keep a note of that you will
include them when you make up the final
account for all.

If you can in the same manner procure
one 100 lbs to go with the first shipment and a
second 100 lbs to go with the second for my friend
Lorelotta another quarter of all. I told the
girls every mind oblige me as I do not know how
to get about getting them

Yr friend
Arthur W. Dick

London 11th July 1833

My dear Mr. Hall
I took into account always towards you with respect
the further letters, but as I wished to give you
good for ideas as I could of the Garden, I will not
write you up. I wish with respect to the
state is. But the Chantry, Whosever they are, but
admitted to be a great deal too much of his way.
So far as I know, the matter is more important than
before the death. I am not sure of his purpose
the Whosever is the state to be made the purpose
the Whosever. In short, you may say, that the
a matter of course, supported by the consent of which the
Chantry and the purpose. This shall be long to the
see that is, as far as I can see, it is to be so, and
I will be in the state as the whole establishment is
separated together, by some support on another. I
shall to go on with the same, but I will not be
great. I am going to build a house in
the garden if possible, but the Chantry and the whole
of the surrounding ground. I shall be able to find a
new design for the garden.

You may however depend upon having a greater supply from
the garden than you have had. There are sometimes
crops in the garden it is not to send you down hill
plants, but unfortunately, except of the Tris, there is
in general only an appearance of wealth. I thought
appearance of each at Ray's house, Admiral as well
as London, and if you give me a little time, I'll send you
into the other way. John has actually now
played. I received your letter a few days ago, and
was quite delighted at the prospect of the Plant of the Europe
with his assistance. Arthur I don't really know
anything being still out of the garden, but his
being useful will depend upon what upon the side
of the Plantation, if necessary, he may be very easily
disposed to. But if it is a distance, he of course
will be unable to do anything in the Part. You
could you not by John get me a few specimens
for the garden, consider if it be possible. The
letter has not as yet reached to you. He told me
later. There seems some difficulty in getting
a person to examine all the specimens you require
it has struck me, that the work that was along

to Delhi. might have its seeds very well mixed
by that. before. Later to be seen. The small
considering the situation. the only difficulty in
my opinion would be the injury the young plants might
sustain from cattle. However the advantage of water
being so near, would make it very desirable.

The Director in view of the present plan for planting
the plants in a new soil. has sent me
a number of them. I think every person who
wishes to see the trees, ought to be obliged to plant
a young one of the same. The plants would
be kept up in a little or you might write to General
Murray to send a letter for them to be sent to Delhi
who will inform me of his arrival. I might have
one more for the V. may send up. I believe to what
they call the Khuskhus. I think they would be
very desirable. but as this would offend
inform you. I am contented as far as is in my power
to meet your wishes with regard to the planting
- for all work of your kind. I shall be glad to
send you a number of the same. except
in the vegetable garden that I have sent. I
shall be glad to send you a number of the same.

Thurston Bay 19th July
1923;

My dear Walter

I have been of your letter
to acknowledge the gift of several
a lot of plants you have been
so very kind as to patch for me.
The collection is a most pleasant
one and I must gratefully and
sincerely thank you for it. The
holzhaus is delighted with the
Plants part of it & says and to all
her friends & names. I shall be
very anxious to see the plants
safely lodged in the garden
the season is highly favorable
& I hope they will do some
to me in a Thorsens State

I shall as you recommended, write
to Lt General Mackley on the
subject of forwarding the boats
from Allahabad - You shall
have supplies of all the good
Garden seeds we have here.
I am glad to hear you are going
to turn your attention to the
forests - those we have & many are
sadly neglected, at least our sand
forests & perhaps they are not
better looked after elsewhere - Young
& old trees are felled indiscriminately
to answer present demand, without
any consideration for the future.
I have the pleasure of subscribing
your name - Hardwicke's letter - pray
with my kind regards offer
Dear

him my best thanks for the interest he
has so kindly taken in the fate of my
unfortunate business, I am
not grieved and disappointed to
find he had an account. I trust
perhaps he has not had as his
reply before. I have again written
to Col. Mackinac to enquire about
the same.

Yours
Lady I give me in love
and to Mr. Wallcut and

myself. Ever my dear &
affectionate friend
P. B. Johnson

My Dear Mr. [unclear]
I am not enough sufficiently expert to
say much, it is obliged to you for the
pleased collection of seeds that you
will be kind as to send me - they
arrived safe and in excellent order
although they were long time on
the way - I have with the greatest
satisfaction and shall immediately com-
mence sowing them - My garden has
the advantage of being watered by a
branch of the Canal from the fountain
which runs through it and I hope
by the time we have this flower
that it will be the very best one
here

I intend to send you a packet of the
seeds to my brother Patrick at
Kilpatrick (I mean something there
which he has in such abundance
in the hills) and he is to forward
to me a variety of hill seeds as

will be pleased

I do not know the instrument used
of the Boston Garden of Agriculture
and of the well and other plants for
the well and other plants for the
also will take great care of them
for my (I know) and for a great
part of the day and the other
amable women of the garden
I have nothing to say to say
to you and I know of the

Mauritius July 1823

My dear Sir

I forward to you two letters from our mutual friend Velpair and a Bill of Lading for Ten Bags of Coffee containing 500 lbs - respecting which he has written to you - Capt Rogers has promised to take great care of these matters and I hope they will arrive in good condition fit in every respect for your purpose - Velpair has sent me a Bill on you for 800 rupers the estimated expense of the coffee and these I have endorsed over to Messrs Lemaire & Co, who have paid 400 - rupers for the present shipment - the expenses attending which at the Custom House & Wharf will be hereafter sent to you - Our friend being now at his estate on the other side of the Island wrote to me about the dispatching of your Commission - and I feel much pleasure in being of any service in the matter - On all occasions I beg you will command me -

The Care of plants notwithstanding

A Wallich Esq

our long voyage and three weeks waiting in the harbour of
Punomali arrived here in very fair condition - and was
immediately handed over by me to Governor Farguhar
whom I found on the wing for England - for which happy
land he embarked on the 25th of May - I have dis-
tributed among my friends the seeds which you kindly
bestowed on me - many of them are coming up - and
they are still in great request among our Amateur
Gardeners and Botanists - Our new Governor
Sir Henry Cole and Lady Francis have both a taste this
way I am told - so that perhaps something may be done
to improve our productions in fruits and Vegetables -

I shall be happy to hear that your coffee
plantation goes on prosperously - It appears to be
a sort of Mania in Bengal at present, as I find
similar orders to your own have been sent down
by almost every house in Calcutta - Packages for
me or than have I know been ready for some time

back - Our season here has been favourable - and
our planters expect to have an excellent crop of Sugar -

Pray persuade some of your Mercantile friends on
the opposite side of the water to send us a few sheeps to
carry it away - So as we get well quit of it, we shall
not quarrel about to whom it goes to -

I continue to smoke my Sugar almost as regularly
as you take your hookah - The morning excepted - My
health is rather improved by my trip to Calcutta
with which I had every reason to be highly gratified

I shall be happy to hear a few lines from
you telling me how your packages reach you, and
I remain

My dear Sir

Very truly Yours

Andrew Dick

My dear D. Wallick

Enclosed in a parcel to Mr. J. Wallick
of the house of Alexander McShane sent
in expressing for you of my blessed Husband,
of which I request your acceptance, bearing
your esteem & regards for him. - Pray let
me have a line to say you have received
it safe. - Write lately to Mrs. Wallick & hope
my letter will find her & Hannah in good
health & spirits. - I am happy in being able
to say my two dear Children are quite well,
little Fanny was very delicate when we
arrived in England, but is surprizingly
improved already, & looks almost well. -
My Boy is very robust & thriving, & considered
a prodigy for size & beauty. He is just 4 Months
half old, & is taken for 6 Months, & she has

man had a day's illness. — They are both ^{well}
Pets with all their relations, that I almost
wonder Fanny is not spoiled, — but she is a
pattern of obedience & submissiveness, & a very
sensible intelligent creature, she is exceedingly
affectionate, & in short, is so thoroughly amiable
that she is loved by every one. — The Baby is
too young yet to be spoiled, — but he promises
to be as delightful as his Sister, — & tho' they
have different complexions, they are alike.
The Baby is very fair with bright blue eyes,
& Fanny is a Brunette with fine large
Black eyes. — My Father dears upon both his
Grandchildren, & Fanny is quite a companion
to him, she talks English so fluently. —

My worthy Potawic Cousin Sir J. L. Smith
was here for 3 days when I first arrived, &
looking very much older than when I left England
8 years ago. — He returned to Norwich a few
days after he left us. —

My Father has a charming house & grounds
here, & if you can oblige us with a small
parcel of valuable seeds for the Greenhouse
they will be highly acceptable - Mr. J. Abbott
will send some forward the parcel to me -
If Mr. Wallich will be so good as to collect
some of the red seeds of the "Adenantha
Pavonia" (of which Children make
Peachblows) I shall be additionally obliged,
& they could come in the same packet.
Though we are but 25 miles from London
I have not yet seen the Metropolis! & little
curiosity have I for the great improvements
which have taken place since I left England
some 12 or 18 months hence perhaps I may go
to London for a day or two. - When you all
come to England I shall hope to shew you the
sights both here & in London. - With very kind
regards to Mr. Wallich & yourself, & love to Mrs.
Believe me ever sincerely yours
H. Hoising

Apunt 5th August 1823

My dear Mackich

Many thanks for your letter
of the 16th July accompanying
me with your burning zeal
of a boat with a splendid
collection of plants for which
my best acknowledgements
are due to you. I will write
to my Man at Sepwala to
be on the look out for them
to take the best care of them
till the season arrives for

getting them off. - getting
"down the boat man to
look for any plants you may
have for us" but you did
not calculate the time of day
the boat will be at Repulse
in the middle of August. Now
there are no things at Repulse
in gun & nothing, as you
may remember, can be
sent down before Nov.
It will be out of the question
therefore to detain the boat.

but this would typify and
any thing we may have
for you, a that you may
dine particularly about
Chum that is? I was
on a boat in the season.

Next for Thauril King and
told him what you
had written about the
few kinds of seeds he
feels you that if he was
not more active you would
be seriously angry with him

he is much interested
this, but declares that
but few seeds are to be
found at this time of the
year. The quantity
quantity of rain which has
been, and is falling, renders
it very difficult to get
them that are to be had
for the latter part of the
season. Fear is, in fact,
our suns have been very
heavy & constant this year
& we have been affected

with the Cholera Morbus too
for here two months ago
that it was difficult to
get workmen of any
kind, particularly for
Jungle work. However
I told him he must
earn himself - and
sent for every possible
seed which he could
get - she promised to
do so. The season has been
so unfavorable for such
work that it has prevented

the present day your
expedition to Japan than
a rather nobody was
willing to go - I sent some
people of mine at the
beginning of the year, and
Nelson told you - about
then too early for seeds
but they brought back a
fine collection of living
plants - which I put at home

as poppies on the ground,
but the weather has been
so wet and damp -
I see the effects of it on
my paper, that I am
Anxious to say the greater
part of them have decayed
and I fear most of them
will be lost. Even ^{prunella} prunella
pink & other flowers that
used to be kept out at
this season have been
killed with moisture and

7 May 1884
Dear Mr. [unclear]
I have the [unclear] and [unclear]
show two fine plants of
the large Prunus - you
call - [unclear] - [unclear]
which I much regret
it won't seed here, but
I have got some offshoots,
some of which you shall
have. In the [unclear] weather
I have sent you 3 boxes
of garden [unclear] seeds
of the [unclear] of the 18th

22^d and 24th. They were
packed in tin &
wood etc. With Luck
if they could have reached
you safe - let me know
when you write - I don't
think we had from Salem
was of the 17 July set
a week since we have
had a Dak in of any
kind - we are very anxious
for some news therefore
of which we reckon

You must have got a
budget before this and
most probably of using
interesting intelligence
from Europe. When you
will pray mention any
thing that is interesting
henceforward from a senior
of course that Genl. Meade
had hopes of getting out
to India again on the
General Staff. Do you

7. Have any thing of such a
likelihood amongst his
old friends in Wales?

Have not heard from
himself but Webb wrote
Helmington, England. &
it seems that he, ^(Webb) with probably
his friend to return.

Robertson is well & recovering &
he is now kept. Had per-
sisting as usual at this
time of the year & keeps to his
house but there is nothing
serious of the matter.

him. but we all feel this
weather in a certain
degree. - they give us
best regards to you -
you may be well
and believe me ever
yours very sincerely

Edward Gardner

The natives say that some
9 - a 10,000 people have been
killed by the cholera in the Valley
but the number is exaggerated I think
and hope...

My dear Brother X.

I rejoice to see you have got the
additional appointments which I hope
will be equally lucrative to you, as it may
confer the public service of
which you have certainly enjoyed health
since your return & I hope will
enable you to enjoy that invaluable
 blessing. I shall be glad to see you
with the Box of prints that you have
sent me with the money for the purchase
of the prints, with the intention
which I hope will be of service
to you. My dear Brother

Peru Aug 14th August 1823

Dear Sir,

Per opportunity & length
of communicating with you by
the Ship Caroline Captain Pearson which
sails this evening. We have not had
single departure from here to Callao
for a very long time before, though Packets
have been sent by way of Mendoza.
In the first place I have the pleasure
to inform you that Mrs Porter and
family arrived safe here on the 14th ultimo
after a very bad passage owing to the
weather. Captain Kemmer did every thing
in his power to make them comfortable
and I feel grateful to you for securing
a passage for them with so good assurance
they are as well as I can expect them to
be after the fatigue of the voyage. Mrs
P's friends by Mrs Porter were very acceptable
and of them, one up in our nursery and
promise fair, the Pensioner Campbell
gave to the Uncle the Governor, he did

not require the Vegetable seeds having
received by the Indianmen a ample supply
from the Horticultural Society of London
the other seeds, the growth of the Bot. Garden
at Calcutta, were divided into 3 parts the
One for the Govt, One for the Public and
the other for our Public Gardens. The
Honble the Governor having been constituted
a Corresponding Member of the Horticultural
Society, ^{London} he is desirous of contributing as
much as possible to them, and I have
been very busy packing up Plants, but
to get them agreeable to his directions
as you will perceive by the enclosed
notes, three Chests of growing Plants, a parcel
of seeds and some chests of ~~specimens~~ dried
specimens were forwarded in the general
ship to the Society and I have many more
in readiness agreeable to the orders I have
received, I was somewhat at a loss to
know what to do about sending dried
specimens to London as I imagined it
might not be agreeable to your wishes

I therefore take the precaution to send
the same nothing but what has been
procuredly sent to you, reserving all
our new ones for you, I have
forwarded some of our ~~new~~ ~~ones~~ ~~for~~ ~~you~~ ~~and~~ ~~to~~
and the Caroline been many ~~times~~
before, and my Checks being large they could
not find room for them, as it is, I have
sent two Checks of growing Plants one
of Bread fruit the other of Tea, Captain
Pearson has no room for more & I would
have sent you the Mangosteen, Nibbings
Olives, &c, &c, &c, of which I have
Eighteen Checks in readiness, and indeed
I conceive that the smallness of the space
would be very detrimental to the Plants.
We shall have some Ships round from
the Eastward soon when I will ship
them to you, Captain Denham of the
Hutchinson kindly offers to take any
thing I prepare against his return, he
has also taken some Checks of Plants

C. D. W. —

China for no price of freight, which will
 I hope, ensure a good supply from
 these sources. You will observe
 the enclosed Bill of Lading that I have
 engaged with Captain [Name] of five
 Ropes per Chest, to be paid by you
 I do enclose an Order of W. T. Tupper
 for 500 Ropes on Lantenden and W. T. Tupper
 House and made payable to you by Mr.
 Cope of this place that being that sum you
 was pleased to advance for my wife's
 Ropes, and being on this subject they
 leave to revert to my Account with you

I owe you for
 Shipping on board the David [Name] 100
 Ropes Money for myself and two
 Apprentices at 20 Sterling exchange at
 10 Ropes per £ ————— 210
 Mrs Porter's Ropes Money ————— 500
 Advance to Mrs Porter ————— 290
 Making a Total of ————— 1100

I believe I am Creditor as follows
 Contingent Expenses ————— 105. 00
 W. T. Tupper's Order payable to you — 500.
 ————— 605. 00
 Which leaves you Creditor ————— 445. 13 9

Mr. Porter informs me the Dea. did
not settle with the Sinner about the
allowance you were so kind as to let
her have on account of the Apprentices
the Sinner being £¹⁰ 4³ 4 in her debt
agreeable to the enclosed paper on the
Sinner's and Mr. Church's writing. Should
there be Credit the Sinner will carry that
amount to your account with us, giving me
credit for it, which will still leave me
~~debit~~ £¹⁵ 9 5 which can be deducted
from Mr. Porter's Pay as a Soldier's Wife
& Bill for which, I beg leave to enclose
up to the date that Mr. Church took
charge of my situation; as Mr. P. informs
me it had never been drawn during
my absence and the point having been
settled, that that Sinner is allowed by
the Gov. though my own Military Pay
only. I trust you will with your usual
kindness forward my Bill for Payment
to revert again to the allowance of
the Apprentices Mr. P. (who is ~~not~~

best Accountant in the world says that
Mr Church is acquainted with you
is due to her therefore beg leave to
refer to him on that subject. —

Please also to acknowledge the
receipt of your Official letter to
the subject of my staying at Pasadena.

I am extremely sorry to hear from
your letters that you have not been well
of late, but sincerely pray that in
God's hand at present, the doctor and
are quite well, and so full of business
that we can scarcely find time to
even think, getting all our vegetable
seeds from, transplanting them, and
now drying specimens, collecting seeds
and four Plant Chests &c, this week
and the excuse I plead for writing this
letter in such a hasty manner, I sit
now 3 O'clock in the morning and you
have not been in bed yet. —
Supply of plants will be made

welcome, as well as a couple of
Bengal Gardeners, of any of the
experienced men in the garden at
Calcutta would like to come, their
salaries would be 10 Rupees per month
English - present I am employing Chinese
Gardeners in their stead. - I forgot to
mention that a Packet of seeds also
accompanies the Plant Checks on the
Carriage.

I am

Sir,

with respect,

Your ever obedient
and grateful Servant
Geo. Forster

Thos. Wallcut Esq. M.D.
to be sent

The program is desirable
to that degree of Mr.
Porter's efforts his thanks for
the prompt fruits with which
the growing plants and
specimens have been pro-
vided and shipped for
the Botanical and
Society - a gift from the
supply by the Bengal &
China Ships embodied

London 1 August 23

~~My dear Mr. ...~~
I have received and thank
you much for your letter
dated the 15 August
I will be glad that you
should give me for a good
idea. I which however
there is no longer any need
and has almost left the
valley. I believe altogether
of you if they lay to the
Eastward - but not before

What had carried off a number
of people and among them
the Monrovia Church Lot
when you remember going
out. I thought at one time
he would have been saved
but he got a second
attack which carried
him off. We only lost
3 or 4 men among our
people. but we have all
been busy rather than

think this year. No more
of us can be said to be
ill. And so I am pleased
as he generally is at this
season, but has a strong
suspicion of the matter with
him. I imagine, I am sure
of us probably require more
than a little variety of
occupation to keep us from
our present monotonous
life & spoil what a few

after. Our weather is
now being somewhat
more sunny than hitherto
but we have had very
heavy rains this year
which among other things
has destroyed some of
my stock of the paper
then plants that I
saw there when I visited
the fore place. We
secured a fine plant in

a pot under cover
I discovered that the mode
in which the strawberry
seed was sent to the water
prevented, had given the
the appearance which has
first attributed to them,
they have been all done
but have not yet made
their appearance. I think
there has not yet been sufficient
time perhaps. You must know
if they come up which I

have done better they must
do. I have not heard of really
depending to plan for the
earning positions of the
best. If there are any
parts proposed for the purpose
in the D. Scott's quarters.
I have told G. M. that
the scheme might be carried
there. as the perpetuation of the
work would probably be done
in place of it.

but I suspect I would be the same
here. and will be so rapidly
expected as Capt. Seward ^{to}
to expect, from what you
say of it. I have been
much concerned for
a length of time with Capt.
Seward about his timber
concerns. I know of the
difficulties he has met with
experienced in carrying on the
business, ^{state} to have a portion
of the forest in his own
possession as it were, would

Please examine many of
the Dr. Prentiss. I'm
satisfied that the people
will be very reluctant to
part with any portion of
their freed men on the
terms proposed. However
if you could see what
to do that I can. The
best mode perhaps would
be for Capt. Stewart to propose
the thing himself to the local
authorities in the first instance

and if attended with my
receipt, he would then
follow it up by addressing
me on the subject. To get
the transaction confirmed
by the Gov here. A good
offer as to the Cent. would
of course have its weight
in the matter. I have
given appointment as the
a General; on the part
of this department. What

Hope will have all the
success you anticipate and
can desire. How do your
messengers get on?
Capt. Fennel & his party
are aware but need to be
engaged with the forest, &
Fennel, people as a purchaser
of timber, for the furnishing
of which he makes advances
in food and money - which
is a very different thing

firm for making the lands
themselves and it now
wishes - the gov. says (I believe)
that the matter is intended
to be conducted "exactly as
has been done by private
for several years past" &c.
The object must be to
alter the system - and
that he may hold the
lands in fact in fee
at an annual rent
I suppose — By the

way is there much of left
to be had in the front,
immediately below this.
Last is the principal word
Imagine.

Hope your audience with
the lady was every way
satisfactory to you, and of
more importance than the
mere subject of flowers.
I trust you attended the
drawing room last, and

That you with grace and
description of the novel
as of the the novelist
of the day. What changes
have taken place.

How matters now seem.

Amoy 9. Sept. 1823

My dear Wallich

I have again the pleasing task of acknowledging the receipt of your kind Lib of the Calcutta Journal which was duly handed to me by Captain Graislaord of the Leone and of expressing my best thanks to you for the same. your time spent is a great deal too much taken up to permit you to do so much as it is necessary to do down here. I will however take the lib for the date. Our Improvements (private ones I mean for all the public ones have been stopped) continue to go on vigorously and the Campory Church begins to cut quite a dashy appearance with its many Puebla Buildings. They are also engaged in building in that part of the seramp that has been filled up with Clay. but only for the best Waller houses with tiled roofs. These however put on a much more respectable appearance than the buildings which formerly stood there. and the wealth of the Presidents

again committed are more acted up to than was
the fashion a few months ago. They have been
trying Pukka foundations, but these continue to
settle so much, and to the satisfaction of those
who have made the experiment that I think it
to be the most practical illustration of labor in
rain. I have ever met with Lysiphus' stone must
have been a joke to it. I don't know exactly what
Montgomery is doing to the botanical as seldom
visit it the handsome work is completed. Several
new walks have been made and the swampy
parts of the garden well drained. but I don't
think many choice or valuable plants have
been put into it since the period of your de-
parture. The Colonel got a large collection of
seeds from Mr. Sabon the other day. (See to the
Agricultural Society) but they are all rotten
and not likely to have any thing that would
afford amusement to you. Regret to say
our truly amiable friend Mr. Pitt has been
very much indisposed for the last fortnight
and quite confined to her bed for the last
Ten days with a most unconquerable infla

operation in her cure. from which she has suffered
most excruciating pain it had been gradually
advancing for about six weeks. in so trifling
a manner that Montgomerie thought nothing of
it at first - We have just had another visit
from Capt. M^r. Coe. they remained about a week
and this morning took their departure for
San Francisco where he is going on a Cruise
they have threatened us with another visit
about the Commencement of the ensuing
year, I think the good Lady considerably im-
proved in disposition to what she was on
her last visit. which may possibly be owing
to her being in better health. Our friend
Jackson quitted us. near a fortnight
ago in the command of a small Detach-
ment with guns on board altho' he has
gone against a horde of Pirates that have
been committing great devastations among
the neighboring Islands. and many Cruelties.
our trade had become so much interrupted
that it is to say. that perhaps with the
Eastern Islands that it at length became
a matter of absolute necessity to make

Some effort to destroy them. That I may have
been successful. we have heard nothing of hearing
from his departure but as his absence is
limited to 20 days we must see him back
again in a very short time, and must come
with Laurel. There are requests to make of
you and which I trust you will pardon me
for since Mr. Manning Mr. Dr. Manning told
me he would be made out according to
the plan. I went the other day to Clark about the
pointing of the money was to be authorized,
all of which they promised light amount some
on part of my proposal however has not met
the approbation of the Rotary employed on this
occasion which is my offering myself and my
Agents for the same being as trustees. my request
therefore is that you with Conjointly with my
brother in law Brewster act as Trustees on this
occasion. Should you however My dear
Wallis find my proposal interfere with any
of your arrangements. pray say so. I should
be very unhappy at your undertaking on
these terms. pray write and let me know your
sentiments on this subject. If however

also of being in the neighbourhood of two shops of
ground which belong to nobody. As the collector says
that if the place taken into the garden boundaries
shall be all ploughed, as the bullahs have it
presently, it will be to the advantage of some seed
from the side of the garden. To have no trees, it
shall also be better.

In the respect to the situation of the plantation, allow me to
quote your letter, you say, "it would be expedient to fix it
not very far from the Schampona Messing but in proportion
distance from Secunderabad is 100 miles, & Dars Nugga, District
"Dars Nugga". Surely do not know how it is possible to
obtain these distances. Dars Nugga is 50 miles from
Sec. & again I believe about 250. any approximation
from that we could make to the Secunderabad plantation
would remove us very far from the Schampona Messing.
In considering therefore the eligibility of a place for the
site of the plantation, I have attended to its vicinity to
water carriage, & to the convenience facility of supplying
the consumption with timber at the different military
stations, as well as of disposing of wood for fuel, & other
parts. It is long known that being situated between
the Ganges & Jumna, the first practice nature of conquest
itself

is. Which of the two is the best eligible for the site
of a Plantation. I thank the General for the
following reasons - In going down the Ganges, you
meet with no Military Station until you reach
Fulthypur, & then Campstead, the two suggestions being
situated on the Ganges ^{above} below. At these places, could
supply them with the greatest facility. In proceeding
down the Ganges, you have Kurnaul, (only Saikis for the time),
Delhi & its banks, & then Mullana, after which you reach
the hundred Plantations. Muzib will be supplied
either from this or from Meerut, but the carrying
will be more - if in either case. In considering
therefore the expediency of the above mentioned Stations
being supplied with timber, you think the same
is not the case of Gurgaon, Hapur & Hissar. The Ganges
appears to be the most favorable to the Ganges. & Hapur
will appear so to you, particularly as it is another
very favorable one economical to pay it up ^{after} against
the stream. In matters both the Judge & Colletts
what they considered the best situation for a plantation
- the General they considered is near Chilchana,
Chilchana, as combining the greatest nearness to the
top it is eight miles from this place, between the
river & the Ganges, though in its vicinity the

and hope you have
18 Sept 1800

Amstel 3^d October 1823

My dear Mr. Muller - I was
happily to find by your
letter of the 18th that your
studies had been
well advanced as you could
wish, but that by the time
that an improvement in
your weather we have removed
all tendency towards
doubt, we will make no
mistake, he will be a great
in due time. - Yours truly
Muller

The changes which have taken
place at the Govt House,
desire to have that ground
frank with the new occupants,
I hope all your affairs
will continue to go on
smoothly in that quarter.

The boat-load of fine plants
you kind & good to me ~~are~~
reported to have arrived at
^{some time back} Legh,
with the loss only of
a few of the things. He passed

Extremely that there was
nothing for you at Lyndee
which could have been sent
to you on the return boat
it was well left to hope ^{for} to find
any thing down for you at
that season and from the
quantity of rain which
has fallen the gear on
mountain roads have been
more impassable than usual
I was compelled therefore
as there could be no advantage

in detaining the boat at
Kowloon for two months, &
did not by any means
dismiss it on its return
with the males, unless the
latter should have received
any particular orders from
you to wait for some apprehension
after the rains: did I do
right? for the rest, such
orders as may be collected
for you, shall be dispatched to

yourna boat hereafter
the last packet of seeds for
sent to me were getting
overtrayed by the rest. I hope
perhaps had better be done
with these sent from the
I do you receive safely
the garden seeds? The
starting seeds for you are
I am sorry to say haven't
made their appearance
I suppose it is a little late

and to report it.
I have reported to the release
of various positions of the
events below. I have prepared
a margin opinion upon it
to get, with few remarks
concerning to some letters
I have written to Captain
Ford regarding the
details of the plans by which
he expects to effect the object

then replied, "I have not
sit down", but I have
found from him ^{and} indirectly
I believe I tried to think
that there are more obstacles
in the way than he contemplated
in his letter to the Committee.
I have told him that if I
write him at all - it would
be an ^{or} private transaction
entirely between him and the
local authority. He

himself ^{2213 23 24 25} ~~proposed~~ ^{2213 23 24 25}
I have recommended ^{2213 23 24 25} ~~of~~
near ~~but~~ this ~~to~~ ^{2213 23 24 25} ~~me~~
say no notice of ^{2213 23 24 25} ~~it~~ ^{2213 23 24 25} ~~was~~
taken here - but I am
very much ~~in~~ ^{2213 23 24 25} ~~the~~ ^{2213 23 24 25} ~~of~~
to do so - and I am pretty
certain that no ^{2213 23 24 25} ~~direct~~ ^{2213 23 24 25} ~~to~~ ^{2213 23 24 25} ~~the~~ ^{2213 23 24 25} ~~Director~~
application ^{2213 23 24 25} ~~that~~ ^{2213 23 24 25} ~~will~~
be successful and indeed
is not the intention of

But I apprehend that any
such step must be taken
which would not be
altogether proper except
on the whole I imagine
Captain Bernard has been
too sanguine in his Commu-
nications wth the
author of the paper and that
his plans will not be
successful but what I have
said is but a conjecture

a better judgment as to
the practicability of the plan.
I am not aware that the
same objections or impediments
exist to the Eastward but
it is probable that the
result of the reference to
our Lord will be more
favorable than might
initially be expected
this. I am much obliged

begin for the Lithographic
business. They seem to be
the art must be ^{announced}
very good indeed, for all
kind of purposes. The
"Rhine was Plant" ^{announced}
one must - where is it?

We are all now tolerably
well here, tho' Hadger, ^{is}
concerned with him at
this season. His continues
to complain - but there is
nothing particular the
matter with him I fancy.

Let me know how you
have been getting on. May
the my good wishes be
our walking stick & helmet
My dear Mr. Jones
very sincerely
Edward M. Jones
Why have you sent me
pictures to the post. It is not
expected that you should
send such things & perhaps
I have things - two or three

Sir,

Yours very Obedient Servant

J. Adam

Calcutta 10th
October 1823

Edw. Davis & Phys. Society

S^r,
R. S. Watson Esq.
Secretary to the Government

S^r,

Having experienced much
inconvenience in the Botanical
Garden for the want of some
protection from the weather, I take
the liberty of requesting you to lay
before the Hon^{ble} the Governor in
Council the necessity of erecting a
small Building in the centre
of the Garden. First, for the pro-
tection of the Plant Chests I
prepare for exportation, as well as
for any valuable exotics I may
receive. It is almost unnecessary to
observe that there are many useful
and

and Ornamental Plants which
by the aid of such shelter, might
not only be kept alive, but become
gradually inured to the climate,
when from the want of it, a sudden
and unavoidable exposure may
be productive of the most deleterious
effects. I have unfortunately experienced
the truth of what I now state during
the late heavy rains, as some tender
and valuable Plants raised from
seed have been almost entirely de-
stroyed, for different events have
been the effects could I have sheltered
them until they had attained a
sufficient degree of hardiness to
withstand the fatalities of the cli-
-mate. Secondly, For the better
preservation of seeds which I may
receive from other countries and of
such seeds, dried Specimens of Plants
as I procure from the West.

Considerable

Considerable collections of the
latter have been sent to Dr.
Wallich the Superintendent of
the Botanical Garden at Calcutta
and the high estimation in which
they are held by that Gentleman,
will I trust, warrant my using
every exertion to render them still
more valuable. - I may further add
that the want of shelter is ^{also} personally
experienced.

I beg leave to inform
you that it was my wish to have
avoided putting the Government to
any extra expense on this occasion,
and under that idea I have commenced
a Building for the purpose above
mentioned, the expenses of which it
was my intention to have defrayed
gradually from my contingent
allowance, finding however more
demands for contingencies than I
had

anticipated and that the erection of
the Building in that way will
return the experiments of the Gardens.
I feel the necessity of making this
appeal to the Government, from the
calculations I have made I find
that the Sum of 300 Spanish Dollars
is required for the purposes, and it will
render complete an Establishment
which will I hope in time make
grateful returns for the liberality
with which it has been founded
and supported.

I am,

Sir,

Your most Obedient

and humble servant

George Porter

Livermore, Oct. 10th 1823

My dear Sir

I have the pleasure to forward you a drawing & description of the *Oshae Persiana* Plant that produces the Gum ammoniac it was procured by Capt. Mack (of the 5th W. Regt.) while on sick Certificate in Persia & understanding it was a desideratum in Botany he has requested me to send it you in his Name. It is to be regretted that Captain Mack did not know enough of Botany to give a particular description of the Plant, Flower, & Seed - but he brought away a Root to which a piece of the Stem & some dry leaves are attached which I have forwarded in a box to your address which Capt. Patrick of the Shipboard Nerbudda has been so kind as to take charge of. I have by this time left Bombay. You will observe the account of the Plant is dated in July 22nd tho' I sent it a short time ago.

I shall never forget the kindness & attention I received from you prior to your going to Nepal in 1820 when I was on my way to China from whence I sent you

on two Boxes of the *Lamelia Japonica* for the ~~honour~~
of Hastings, but I never heard if they arrived safe
I sent them by Capt Soupsaut in the Cambridge. I
believe

Since my return from China I have been
mostly stationed in the Persian Gulf from which
I returned in March last when the troops were with
me - quite broken down in health & the stock
I gained in China quite dissipated - I have now
in some measure recovered & find it necessary to
visit Europe and it is my intention to proceed there
by land if I can be of the Party of Mr. Ferguson who
I hear (with two other gentlemen) is going by the Red
Sea & expected every day in Bombay. As their
party is not so fixed as to numbers, as not to allow
of any more

Allow me to introduce to you (as a Correspondent) Mr. Alex. Duncan of this Establishment who
is a tolerable Botanist & who much wishes to improve
himself in a knowledge of Indian Botany. I have
particularly requested him to send you an account
of a tree called the Kokum by the Natives in this Country
which is certainly as far as I can judge a species of
Mangostan - I was not here early enough to see

The Flower as the they were in full bearing but
the Fruit resembles it in every thing but size - It has
the thick crimson skin & fleshy pulp & also the
flavour but extremely sour, it is a mango-stone
what a sad world to a fine apple it only -
grows between the latitudes of 15. & 18. on dry rocky
Hills but I should think with cultivation they
might be much improved & rendered almost as good
as those to the eastward. They grow quite wild &
thinly scattered over the jungles in this Neighbour-
hood & to the south?

This is a very healthy cool station indeed
so much so that a convalescent Hospital has been
built here for the Europeans of Regt. on this
establishment I believe with success as they
arrive in Nov. & return in May to the
As they are expected soon. I imagine it has
proved of benefit -

When you have leisure I shall be most
happy to hear from you if you will direct it
to the care of Dr Duncan at this Station or will
forward it to me should I have left it. With my
best regards to Mrs Wallick and wishing you

every happiness I remain

My dear Sir
Yours most obedtly
O Kennet

A. Kalkick Esq^r

Sept 13th October 1823

My dear Mr. W. W. W.

I have received your letter of
the 29th Sept. on the subject
of the Kookras & Korak
see but I have refrained
from ordering them to be
made up in the manner
you suggested, as I am about
sending to Patna for sale
some public property ^{which} ~~is~~ ^{is} ~~the~~ ^{the} ~~same~~ ^{same}
which I have handed over
Kookras & Korak the

not more than their value
to avoid unreasoned
for authorizing them
to be purchased at auction.
I shall not send them
down to the end of
of November so that
with the plenty of time
for you to write to me
on the subject, and

Although I did not see
the Kodjue & her who you
took down with you - from
the manner you describe
them, I think Lady
ambert would prefer
them which circumstances
you taking.

There has been some great
shipwrecks on the coast between
Gya & Calcutta then -
from the unusual fall

Manit being in preparation
to go on an expedition
to Jaffa than in the
case you deemed he
might be sent -
and I hope he will

make a good collection
for you. He sends you
best respects

London October 15 1823

Sir

By word of our Friend, Messrs. Coltham & Co. of
London, we send you the enclosed Letter from the Surgeons
of London, requesting you to supply Mr. Coltham with
a Collection of Skins - This Gentleman desires us to say
that only Birds and Beasts, not Plants, are wanted, and to
say to you that if the Box is addressed to our care we shall
have much pleasure in forwarding it to London -

Yours

Sir

Your most obedient Servant

Dr. Halluck
Superintendent of
The Botanic Garden
at Calcutta
By Providence

Hamouthe (England)

Oct. 16. 1823.

My dear & excellent friend

I am now in a vessel with my Catherine & my
Mr. Sanson bound for Hamouthe & I shall pro-
ceed to-morrow to London, where I hope to have the
opportunity of sending to Calcutta, & cannot
refrain from doing myself the pleasure of writing
to you a few lines, were it only to enquire after
your health. I am, indeed, from Mr. Proby
& from Dr. Carey that your constitution is con-
siderably improved; but it is so very long now
that I have been deprived of the gratification
of hearing from you, that I still fear you
are incapable of exerting yourself as you were
wont to do.

Dr. Carey in particular informs me, that after
having undertaken a voyage on account of your
health, you are returned to Calcutta, with a
prodigious rich collection of dried specimens
of plants. That these, together with what you
have obtained in Nipaul & elsewhere, have
been added to the Catalogue of the Plants of

India, that, on the publication of a new
edition of a Flora Indica, about to be under-
taken, the number of species will be
increased by one half as many again. I
rejoice greatly at this intelligence & hope
sincerely that you will be ^{able} to go on vigorously
with this important work. I trust
too I may be so fortunate as to possess a
copy as soon as it appears; for it is a
book which will be of the highest importance
to me in the publication of my System
of Plants, of which I have this day sent
some MS. to the Printer as a specimen
for the printing.

My Work, the Diocle Flora, with figures of
India & some plants is in progress & many of
your valuable species are already introduced.
I did myself the pleasure to send you Part
III in the month of May by my young
friend Mr. Hamilton who went to Cal-
cutta direct from Glasgow; & in July last.

I forwarded, by a vessel from Liverpool, Post
No. 1. But what appeared since I left Glas-
gow, about one week since, & as soon as I re-
turn to Glasgow, which will be in about a
fortnight, I shall seek an opportunity of
forwarding it to you.

Could you inform me of the cost of the "Asiatic
Researches" at Calcutta? or could you tell me if
the Botanical Memoirs there published come
to be had separately? I have the 11 vol which
were republished in England & now they
are given up this republication.

Has there ever been a Catalogue printed
of the Flora of the Botanic Garden
of Calcutta?

I am expecting almost daily to hear of my
excellent friend Dr. Abel who is gone out in the
quality of Physician to Lord Amherst. From
yourself it will be still greater pleasure for
me to hear, as I have not had a single line
from you since your return from Nepal.

With every good wish, my dear Sir,
believe me to be most sincerely
& faithfully yours

W. J. Hooker

My dear Mother

This was written two days ago - I
detained it to give you a long letter - but an affair
which came down from Deyrol - a Capt. Todd has
been my de in my house & I did last night
for my concern that she had a concern
touch of it. Therefore enclose all imperfect
in my father's letter - I went up to the room
to her room. I lost the opportunity of copying
about the Don's Treatise, & collected several
good plants - found among others the Hippuris
vulgaris in great abundance; you shall have
in the letter soon. The seed just begin to
come in from the hills, you shall have
some very early & discoloured ones.

Believe me

Yr. Obediently

J. M. Wright

17th - Have written on the 14th - I will write the
in a day - but as the weather is so

Wed 20 Nov 1893

My dear Willibrod

In my letter of the 17th of last month I promised to write you again soon, and inform you after my visit to Willibrod, what I thought of it as a site for the above plantation. I had to the present time I have been unable to get out of the other end of a day, as there has been a steady snow people all the day long. I have not been able to get out of the house in a long time, and with the prisoners in hospital I have not been able to do much of the business being the conclusion of the winter is the most unhealthy season. I hope in future to have some snow but all to get out to Willibrod in the course of the week. As the situation is really unusual I am in hopes of getting him to go out at the same time, in which case I shall be able to get some more information. I mentioned in my former letter ^{that} the Judge had told me through Willibrod that he had set a few plantations before you expressed any thought it preferable to other sites. I will recapitulate that in my further letters. In the mean time you will get other information than has all to obtain for being - though I have not quite as difficult. The information shall

My dear Mother

rather appropriate for the use of Government
any other that exists in the British dominions
concurrent measures must be adopted to
prevent the setting down the numerous quantities
of tobacco which at present takes place. Indeed
the former & latter are awarded with sets
of tobacco for the Town of - which the
trading house of - a banking house is found
to - - - - -
public supply, & give the Wharfedale opinion at
the same time in a public letter, as well as
that of the Judge who has charge of the Town,
indeed the Town is particularly objectionable as found here
which is a - - - - -
to be - - - - -
suggested in substance - - - - -
they - - - - -
are at present the great source of trouble in
the upper provinces. Other means offered
leading to the peaceful maintenance of - - - - -

Since he had been known, he has been
at Lullypore & I suppose will reach there
in the course of a month. Genl. Mackay
very kindly had sent him of the Ganges.
I directed him to visit at Ghuramukhtian
until sent back to him - this is just 100 miles
back. My object in the journey was 12.

She has been very busy - I suppose the Genl
intends to send her to the hills as well as
go to get any thing from the hills, but very
shortly I believe will be able to send you a
good supply. She has been in the neighbourhood
of the hills, but I do not know. She goes
with Dr. Thomson from Dehradun to the base
of the Himalayas. She also was in
the hills, but she is in the Dabhoi.
The ship is here to be built to be
useful. She said she was of all the
hills that she had seen in the hills.

The Botanic Garden. My whole object was
to go by the first opportunity, together with
Henry the gardener, and a list of the plants
it contains. The house is a number of terraces
many of them have water resting of as they
all come into flower, some are Italian
and. Puller & Kildens spirit of the garden
see; I buy for the time when Schell got
Garten & the Enay also die and the design.
but the F. L. - India is the same year
I think of the same. I have been saying the
I will send you some notes about some of the
plants indigenous here. we have a few trees
of the Kydia calycina in the garden. There seem
- great similarity between the Botany of the
Bardonia hills, that of the first voyage of the Howard
could you oblige me by getting some heights of the India
specimens for the use of this garden, we have only from
Polydorus. if you could get it from the
to Polydorus, as well as the ship. Polydorus

which is missing. you will surely see
a very great objection, & I should be much
happy to defend any expense that may
be incurred. I am going to try and
send a paper for the Philhellene
Society, the subject is the same, although
y. I take of the different woods in use in
the different branches of Indian
to be ascertained chemically by their different
powers of conducting heat, & by the quantity of
charcoal each species leaves as a residue
when burned in a closed vessel. I mechanically
according to the different weights, different
kinds of wood, & the same in size, & of the same
shape. do you think it will be worth while
pursuing the subject. My kind regards
to Mrs. W. & little Hannah & I
I should be }
as! Oct. 1823 }

Entered

Pennang 20th October 1819

Dear Sir,

I have just experienced a sudden transition from joy to grief, as I fully expected to have forwarded to you on the Ship Hydary Captain Humble a noble supply of Plants, specimens &c. I have however the mortification to find my hopes dashed, as Huddart has just come up from the Ghaut to inform me that Capt. H. cannot take them on board. Ten Chests of Plants (of which the enclosed is a list) together with specimens of Plants & seeds are now on the Ghaut where I had sent them to be shipped, Capt. H. having promised me, in consequence of a note to him from the Governor, to convey them to you and had actually given me an order to send them on board, as you will perceive by enclosure N^o 2 & 3. Captain Humble is full of Europeans and among them are Capt. Wm. Dungenfield and Miss Bannerman, the Captains excuse for not taking them, is, that the Europeans have brought such an immense quantity of baggage on board that he has not room to put them any where, and is actually obliged to stow his Water Casks on Deck, which I feel convinced is the case as I myself observed the Ghaut to be full of baggage - During the Europeans on the Hydary is also a Mr Pearce I believe ^{his} a Missionary at Serampore, he requests

me to prepare to check for him which I have
done as I have reason to believe it is intended
for Dr. Carey, but I must fear he will not
be able to obtain or pay for it. The Gentleman
has kindly offered to procure one or supply of
State Council for the School, of which we are
much in want and to send it to you to be
forwarded by the first opportunity, the Do. will
Bill accompanying it you will probably have
the kindness to defray it, and Mr. Chamberlain will
repay the amount to you. I enclose Mr. Pearce's
note (A. B.). -

I regret very much having missed
this opportunity of sending things to you and
that account enclose these papers to you but
you should think my zeal for the Garden
abated, but I beg leave to assure you that
not a ship leaves this harbor ^{from} that I do
not make application to and I could give
you abundant proofs of it were it not for
making this Packet to leave. I have now on
lip than 25 Checks on hand, full, and I trust
I shall be more successful with Captain Pearl
of the Indiana whose ship is daily expected
from Singapore. Captain P. himself is here
waiting to join her, he having suffered from ill
health.

By order of the Governor I have signed

in the General Regd and by the Indianmen 7 Chests
of Plants, 2 Chests of Specimens and 2 Boxes of
Seeds for the Horticultural Society of London.
I understand to avoid sending any Specimens
but you will observe by the Governor's note (2805)
that I can't not do it without giving offence. This
will not however materially affect your supplies
as Kuddal has been mentioned in the Government
Bill these last two months and we have
procured a fine supply which shall reach you by
the Indiana if possible.

The Garden here gets on as well as
can be expected though the soil is constantly
poor and requires considerable quantities of manure
we have succeeded in getting Peas and a few
esculent Vegetables which were not on the
Island before, but our Garden still remains
unfurnished or rather unfilled as we have not
received a single exotic from any Port, except
one Pot from China which the Cap. M. Bunting
made a present to the Garden. I have orders
not to fill it with things which are already on
the Island and the Governor often observes that
we are continually sending things out, and never
get any in return, he observes however, that the
plan of the Garden is handsome and as a flower
Garden it is very pretty which is the general
Observation, but the Gentlemen do not fail to
hint

when by paying for them it would be any
smaller. I'm happy to say we are all quiet
well & in our better days & having long
found our little ones & family in the
house.

St Paul St. October 1893

My dear Patrick

Thank you very much for the
seeds which you announced
to me in your letter of the
15th inst. having been sent by
Monsieur [unclear] from some place
made on other [unclear] [unclear]
[unclear] on the globe [unclear]
[unclear] in the [unclear] [unclear]
[unclear] [unclear] and [unclear]
[unclear] [unclear] [unclear]
[unclear] [unclear] [unclear]

was long time to look back
upon. but I am happy that
any accounts have been
received from him at all
for such a length of time
since anybody received what
heard of or from him. that
I begin to be afraid that
some mishap had befallen
him. the unlucky mistake
I suspect in the regions he
is trying to penetrate into
the seeds are to be seen today

and shall be paid every
attention to. and if they
should fortunately
yield a "twist" for the work
appreciate you of the circumstances
and name what seed I want
and ask when you can be
I shall be pleased for
case of their coming up
regarding the cultivation
of the plant

And now let me congratulate
you very sincerely and truly

on the addition that you
Mr. Wallich have lately
had to your family, but
that the and the young
managers were strong
spring of the & my best
wishes.

I intended your message to
James who will be leaving
us next month, but it is
uncertain whether he will
return to Calcutta or not.

at Ormaizon until he is
ported. he is a very good
pleasant tempered fellow
and I am very please him
but as I must be fit to look
his duty again, he is to
help you it. Captain
Marsuek who commands
the Escort here, and I
very old friend of mine
will however be in Calcutta
and will I am to pay

from front at the President
and with the other to be
found out in and the
changes and improvements
that have taken place
since you saw the Albany
Draft - a very tolerable
work, tho' he does not
leave his horse much
and drafts the way of
his - He never has put
you free of a very short

attack of bilious fever
and is looking as though a
member as one of your
neighbours. - but on the
whole he has got rid of
what was hanging about
him for some time back
I wish I saw you he says
that again, much the
better for the description
he has lately undergone
I am tolerably well and

amusing myself ~~as usual~~
I shall enjoy the new
improved one appearance
here very much. I think
you begin to get up the
first batch of plants to grow
I wish you in flower garden
I wish to make very pretty
How I wish you. I think
you have very nice bulbs
not many things of that
kind to spare. I shall be

Wish I could get to you
that you will be slow on
my part I am collecting some
plants to send you in the
cold weather - and do
I want to see how far
away this week & more
in his expedition to Japan
than I hope will bring
back a load of things
worth sending to you -
If you can learn where

moments really with other
he will be where he is
he may be over, but
you would like me know
when you write - you
do not give me a word
news what are the
new people & busy people
Magnate & others
about in Calcutta?
Hardwick I suppose will
be leaving India at the
close of the present year

from my happy thoughts
I must all recited in
a much capital order
I never had been making
a small collection and
also ^{one} of mineralogical
specimens - and I have
made a pretty cascade
out of my larger tank!
and I think all the views
I give a little - little
that I am able to give

from this corner of the world
wanted to become of the
in fact - his receipt
suppose must be at hand
Believing my dear
friends ever
Yours truly
Edward Everett

but now they are out on the 23. I think I shall
go to the bank. I have had the money for
both which he has ordered out for. I shall see
you by the day. Do you know of the General
which speaks with any of the books, or that any
more than that would be useful to me in the
Botanical paper. I have known of the
Spring of the University, which is written here for
Gentle, I am sure to be right by the way. I have not yet
seen any description of the new
type family, of which I am informed by yesterday.
I hope the young things will be as fine as
as his father is described to be, and as interesting
as Hannah's. I am sure in my
heart that the young will be very beautiful. I
hope you will get the letter from the
young, the old, the new, with the old, and
the young from the old to that effect. The old
is certainly very good, as well as the new, but
of the new. It is written upon a piece
of paper.

is then seen looking over the opposite slope, and
the hill stands out. I have been a few miles from
but being here so much longer. The hill is a dome.

When in contact in the 4th diameter of *Convolvulus* *lobatus*,
the shape of the lobes the shape of the lobes the shape of the lobes.
Convolvulus fulvus is said to be a European plant, it is also
seen in the part of the country. The *Convolvulus*
pedunculatus is also seen in the same part. The plants
all the said *lob. stem*, hence there is a *fungation*.

The *Convolvulus* *arvensis* is more frequently found in Europe
than in the specimens both of the English plant, & the European
one. There does not seem any difference between them.

3. The *Convolvulus* *arvensis* is described between *Hydris* *coly-*
lina *opatum*, to consist in the former having much
the external edge of the lobes, longer than the lobes,
while in the former the external edge is smaller than
the lobes & the 5 or 6 lobes. We have a tree of *Hydris*
in the garden and in full flower, the external edge
is decidedly much longer than the lobes, which is
perfectly white. The segments of the lobes vary in number
from between 4, 5, 6. The specimen of *Hydris* which I have
you describe you determined was *H. fulvus*, but was

about flowers, they were in the 3. I hope with the
from your pen. I. R. also says, that he does not know
any one that the tree is full to. The botanist had
told it proba, and he was of it in the following manner.
The bark is stripped off the branches, beat into small pieces
and well boiled & the beaver (stems), and afterwards
added to the sugar in the preparation of sugar, which
is said to clarify very completely. a species of gelatin
is used for the same purpose, but the proba being smaller
more plentiful in this district, is more frequently employed.
Kottler is described by Willdow as being a triphyllous
calyx. we have a number of families in the general
name in flower. They are supposed to be the same
but not being the Clap Disease is still the same as usual
but the calyx is decidedly triphyllous, with the largest number
I believe previous to be a Carpopogon or Stigmone.
How you printed off any more of the other books.
but you would certainly stand on up the sheet of your
book. I really fear that, to get hold of as much money
as I can. With kind regards to the rest of the family
from me all well. I am
Dear Madam like the
J. T. Hooper.

My dear Mallich.

I am ashamed to say
I have been of your kind letters
to acknowledge - the first touching
Robt Blankworth & Pepon on the salaries
which have been paid by the
Commissioner ever since they arrived
in the Province, as you will perceive
by the accompanying copy of Journals
authored from Govt for doing so
it has however been retouched
by the Board auditors the same
having been included in your
monthly abstracts so that the
simple mode would be for
you to discontinue drawing
their salaries while they remain
up here, and they will be regularly

Dr. Boston 1823 -

Liverpool Botanic Gardens

Nov. 5. 1823

Dear Sir,

As President of the Committee of this Institution
I am regulated to return you their best and kindest thanks
for the continued instances of your kindness and attention towards
our Institution, and more particularly for the last recent proof
of your friendly feelings in its behalf, in sending us for the purpose
the little so valuable a collection of Plants, Roots and Seeds,
and which be highly gratifying to you to learn that seeing
the very explicit and particular directions you were so kind
as to give Capt. McKean and the mate Mr Collicombe for the
transport of them on the voyage, together with their unwearied
attention to your orders, these Eastern treasures arrived in
our Store in a state of the highest preservation; and we can
have no doubt that under the diligent and skilful management
of our most worthy & zealous Curator Mr Shepherd, they will
continue to flourish and do honor to the Munificence of the
Donor - We may now begin to boast of possessing not only many
rare & valuable specimens from the East, but some indeed, which
are unmatched in this quarter of the Globe, and now flourish
every Department of our Garden. We must be of your bounty
Altho' we dare not hope that it can ever be in our power
to make up to the Honourable Company's Botanic Garden
to the same extent that you have given us, we would

hopes that you be assured, that so far as we are able, it will
be a source of pride & gratification to us to render you our
harvest through humble services. We were delighted to find
you had recommended our Mr. Shephard to select you a quantity
of the best quality Fruit Trees, for the Calcutta Agricultural
& Horticultural Society; for you could not have selected this
companion to a more competent person, and he cannot but
think the several varieties, which he carefully & scrupulously examined,
may with some degree of exactness, be the best of the Horticultural
Society in this Country, & much greater degree of accuracy
& accuracy in the selection of the best quality of
Fruit Trees, has prevailed, than could formerly be the
case, which was much to be desired, considering the rapidly
increasing varieties of every species of cultivated Fruits, owing
to the great interest & attention paid to, and the immense
improvements made in, this Branch of Horticulture.

We beg that on any future occasion, you will not scruple
either thro' Mr. Shephard or ourselves, to command his or our
services for similar commissions - and in the trees which
were sent to the same hands, as those to which you conveyed
your last present, be have few fears for the result in the
present instance - Having already enjoyed the advantages
of an intercourse with the Society, we would wish to establish
and extend a correspondence which may prove mutually
beneficial to both our Institutions, and it will always afford us
immense delight, to learn that you are extending your
compass over the vast unexplored regions of the Indian

My dear Sir,

The Societies meeting being fixed on Wednesday the 12th we can not meet till Wednesday following the 19th. Will you blank check and if you will have the goodness to return them with your signature marking the date in one of the blanks. I shall do the needful for the meeting. With regard to the proposed notice, if it is merely to relieve me from the trouble of writing the Notice &c. I think it is an unnecessary expense at present the Society fund being poor and limited. I would cheerfully continue my services if acceptable to the Society for longer. I am sorry to hear our worthy Concord is going to sleep but hope their absence from the County will be short.

Mr. Nichol has received your letter and also one from Mr. Livingston about the Patented Books, which we shall be ready to deliver to you on any day of the week. When you send for these I will be obliged to you to send me a memorandum of the volumes that you have got already.

Excuse me to send down to the Post Office
business, but I must also hardly as I shall
the morning; he tells me that you are
going to visit your Aunt Chapman. I shall
write you at the same time. I shall be
I shall do my best to give you
write as soon as I shall be given
Mary. I hope the interesting

Botanic Garden

Johns River
1873

To
To Washington Esq

Secretary to Government

on the General Department

Among the objects of husbandry which it is desirable to introduce in Bengal, there is none that appears to me to be deserving of greater attention, none that has been more inaccountably neglected, than the cultivation of coffee. From the trials that have been instituted at the Garden, & others made in various parts of these provinces, and after the most mature consideration of the subject, I am warranted in drawing very favorable conclusions as to the benefits that would attend the establishment of large plantations of that shrub. More decisive experience however is still wanting, for it is not in a Botanic Garden, nor is it on any limited scale, that satisfactory conclusions are with safety to be drawn as to the probable success of an Agricultural engagement, involving on the one hand a question of great commercial interest, and

likely

likely, on the other, to become a matter of very large expense. It is now several years ago, that my particular attention was first directed to the subject of the present letter, and I have repeatedly endeavoured though without success, to induce others to engage in the experimental cultivation in question; I felt therefore encouraged to submit the following circumstances to the consideration of Government. by a favorable concurrence of events a gentleman, of the very first respectability among the enlightened body of the Calcutta merchants, has offered to institute the above mentioned trial on a scale, at once calculated to afford satisfactory evidence as to the expediency of engaging extensively in Coffee plantations in Bengal, and also promising eventually to yield a considerable profit, he has further invited me to join him in the undertaking under the following liberal conditions namely: that I should assist him with my advice and suggestions, and take the general management of the concern on myself, and that in return, he would bear exclusively the whole of the expenses, while I was to share one half of whatever advantages might result in the end.

However

expressed in substance it is left with you to
submit to the Trustees and is intended for pulling to
the best advantage of husbandry, which promises before long
an increase of great national interest, not less perhaps
than our staple cultivation of Cotton and Indigo, and a
rich harvest, I cannot doubt, but that his Lordship in Council
will do it in a far more liberal light the experiment may fail,
and there would be some understanding that is exempt from
a proportionable share of risk, least of all if directed to
towards a small or unimportant part, but whatever the
result, it will be a source of satisfaction to the
and as such may claim some share of the public atten-
tion. With reference to the preceding statement, I have to
state, that his Excellency in Council will grant his
assent for my undertaking with the property on the above
mentioned scheme, pledging myself solemnly to adhere
most punctually to the limitations which I have taken
the liberty to suggest, and in witness whereof I have
Bologna Garden
Signed N. Wallis, M. D.
4th February 1785

However flattering this offer is to me, and sensible as I am,
that it could only be made by the partiality of disinter-
ested friendships, still I have felt it my duty not to listen
to the proposal until I should have obtained the sanction
of his Excellency the Most Noble, the Governor General in
Council, for my so doing. I have adverted to the liberality
with which the plan is to be executed; I need therefore only
add the assurance, that the part, which I may be permitted
to take in it, shall on no possible account, or in any, even
the slightest degree, interfere with my duties as a servant
of the Honble Company, or with those of my situation at
this garden, business will be devoted to the closest
giving of my advice, and the most general supervision of
the management, the site will be at such a distance
from hence, as to preclude the possibility even of its coming
in collision or interfering with this institution or its es-
tablishment, and it is intended gradually to extend the
cultivation to a thousand beegahs, finally ample provi-
sions will be made for every branch of it, including a
liberally paid superintendent, as well as a native
experienced

To

N. Wallace Esq. M.P.

Supt. of the Bot. Garden

Sir

I am directed by his Excellency the most noble the Governor General in Council to acknowledge the receipt of your letter of yesterday's date.

His Lordship on Council is sensible of the important advantages which would result from the successful introduction into Bengal of the Cultivation of Coffee and he commends to you in opinion that an experiment on a large scale conducted on liberal principles and superintended in the manner proposed is alone calculated to furnish satisfactory conclusions as to the practicability of introducing the general Cultivation of Coffee with advantage to the Agricultural & Commercial interests of this Country.

His Lordship in Council entirely approves your conduct in having refrained from entering into the Speculation adverted to in your letter without previously obtaining the sanction of Government. He could not for obvious reasons of

approve of the Superintendent entering generally in Commercial
speculations, but he is satisfied, from the explanation and
assurances contained in your letter, that the proposed arrange-
ment will not interfere with the due execution of your duties
as Superintendent of the garden, or expose the interests of that
Establishment to the hazard of any injury.

Under this impression and considering that your
Botanical Science must greatly conduce to the success of an
Experiment, which may be eventually productive of great
Public advantages, His Lordship in Council is pleased to author-
ize you to enter upon the Speculation described in your
letter, and to give such general Superintendance on the progress
of the Experiment, as may not interfere with the discharge of
your regular and Public duties.

Council Chamber

the 1st February 1788

I am Very Dear Sir

Yours &c. W. B. Bayley

Chief Secy to the Gov^r

John Mackenzie Esq

Secretary to Government in the

Botanical Department

1854

With reference to a correspondence between myself and the Secretary to Government in the General Department which took place on the 8th and 9th February last, relative to my being permitted to engage in a Coffee plantation with another gentleman, I have the honor to solicit, that his Excellency, the Most Noble, the Governor General, in Council will be pleased to sanction my holding, jointly with Mr. G. Gordon, of the House of Mackintosh & Co. of Calcutta, the gentleman alluded to, on a lease of twenty years, one thousand Bighas of Ground being the quantity specified in my application to Government.

The land in question belongs to Rajah Bahadur Roy, Zemindar of Ramshurpura, near Buarpara in the Zillah of Hooghly, with whom the preliminary arrangements for the Rent have been completed. The whole extent of it is to be brought into Coffee cultivation as soon as possible, Mr. Gordon providing all the requisite funds, for the same, taking at his own sole risk, conformably to the plan which constitutes the basis of the experiment

in question.

at

Botanic Garden, Calcutta
15th May 1825
Superintendent
G. Gardner
Calcutta

Gentlemen
Having been directed by the Board of Revenue
to make some enquiry regarding the 1000 Bighas of lands
situated in Ramrupur near Khurpur which you are
desirous of purchasing for 20 years I have deputed
my Canoe to the spot and request that some one
of your staff may meet him there to point out the lands
and to be present during the enquiry should you wish it.

Yours faithfully
R. S. Sargent
Ct.

Calculated to answer every purpose of decisive proof for or against
the introduction of that shrub, and staple cultivation, was
sanctioned.

3^d The undertaking was accordingly commenced
upon without the least delay, and an extent of 500 Square
Rupys was occupied in Jilalah, roughly adjoining a village
called Rannoufoufou, near Kopy, and about 20 miles west
of Kato. In order to render the results as accurate as
possible, and liberate from motives of economy, this moiety
of the amount of land originally sanctioned to be cultiva-
ted, was selected at a place supposed to be far from favor-
able for the growth of that shrub, the soil being sandy and
poor, never before subjected to any species of Culture, and the
situation, to high and scorching winds notwithstanding
their natural deficiencies, the Nursery there has not only
during the 18 months of our possessing it, been stocked with
upwards of one lakh of healthy seedlings, but 1000 old plants
have already been planted out, and the thriving appearance
of both plantation and nursery, after the disastrous incon-
ditions and season of the past season, unparallelled at this
Nursery

has proved in regard to both, is almost sufficient, even at this early stage, to establish beyond controversy, that the cultivation of Coffee deserves to become, and undoubtedly will soon be in effect of the most extensive adoption ever made of the said ~~the~~ a further condensation & economy of the light in which this matter is viewed by the principal Commercial Gentlemen of Calcutta I need only state, that no sooner had I made my Application to Government, above referred to, and Commenced carrying into effect the proposed plan, than most, if not all the Agency Houses have entered upon undertakings of a similar nature with that described above, to an extent far beyond the standards of simple experiments, and with a degree of success, which opens the fairest prospects of an ample harvest.

5th It would be presumptuous in me to point out to the Right Honble the Governor General on Council the degree of importance which obviously must attach itself to any object of exportation introduced at a time like the present, not less marked by the matchless low state of Trade, than by the excess of accumulated Capital, laying

laying wholly unemployed, and perhaps only to be
found by being recalled to England as a million.
in weight the great weight which prevails of any article of
trade or which to invade, except with any prospect for
that of the most serious and inevitable loss. Such is the
present aspect of things, and such it will be, until some
mode for gain to come, a remedy effectually put by
somebody, like the excellent one now, and now
out of it. I have thus arrived at the main object of the
present address, which is to take the liberty of addressing to
the care as at present stands in regard to the affairs of the
Bank of England. I should like to see, almost beyond
any former period, the blessing of a permanent Peace
being diffused throughout this vast Empire, and the Treas-
ury being in consequence replenished with the greatest
superfluity of Cash, it will, I humbly hope, not be
considered as interfering in any or entirely unworthy
of the notice of the Government if I presume to offer
some suggestions, not unconnected with the duties or
objects of my appointment, leading to an improvement

in the purchase of the land by affording a scope, in which
to invest a small part of that vast Capital, with the almost
perfect certainty of a fruitful return in less than five years
under the impression, I venture with the greatest diffi-
dence, to repeat my former conviction, that the greatest be-
nefit to the Commercial interests of the West India Company
may be expected from the Government sanctioning the
establishment of one or two Plantations at their expense,
of a sufficient extent to render the undertaking worthy
of being engaged in, and at the same time admitting of
being enlarged at a future period, according to the success
of the first, ~~and in the event of a second, or more, which~~
~~of the same kind, by no means differing, and~~
which have materially influenced me, and respecting, not
any longer to delay addressing you on this subject, I beg
leave to mention in the first instance, that the garden of
this garden at Tillyghmore offers facilities as a nursery for
the raising plants which may be expected substantially
to contribute towards recovering the expense attending in the
undertaking, the shrubs, which were introduced by the
Marchioness

Marchioness of Hastings, through admiral's, there being abun-
dance of excellent grounds to spare and a sufficiency of hands avail-
able for sowing seedling plants on the right side I take
the liberty to shew that a most fortunate opportunity
afforded for obtaining part of an excellent investment
of fresh Coffee seeds just received from the Isle of France,
in the most beautiful state of preservation, Mr Gordon in
Council with whom I could procure the seeds for our
Plantation having with generous disinterestedness rather
overlooked the disposal of Government the advantages of a
seasonable supply. It is not a little gratifying to reflect
on this occasion, that although the narrow policy of the
Secret administration has of late strictly prohibited the
exportation of Coffee seed from Barbados, in a state fit for
germination yet quantities to any extent and of the very
best superior quality may still be procured with great ease
from their philanthropic suppliers at the plantation and
that thus the true spirit and aims of the African Com-
pany have been already in effectually frustrated, as was that
of the Dutch Authorities in the Mauritius adopted.

many years ago with a determined intention to refer to the history
of individual of which it is at this very moment I find the trees
perfectly loaded with fruit at the little company's Botanical
Garden at Calcutta.

With reference to the preceding remark I seriously
try to recommend that His Lordship in Council will be pleased
to take the subject of them into favourable consideration that
expenses must be incurred on this occasion considerably less
than that they will be most amply counterbalanced by the
speedy and great profit which will be derived from the due
and efficient adoption of the scheme. The consumption of
Coffee is only excused as an article of luxury by that of Sugar,
as an object of profitable speculation it stands I believe
unrivalled at present, and it will continue so until it
becomes a cheap and superfluous Drug, which cannot be
the case for many years to come, these expenses will in all
probability not much exceed those of the other plantations
at present forming, with the exception of the salary of the
Overser who would be required to possess superior quali-
fications, and who would accordingly expect to be suitably

rewarded

understand that this is a secondary consideration. In the course
of the Government concerning my idea the details of the
plan as well as the site will become the subject of a future
representation, with regard to the latter my views are
chiefly directed towards Bangalore and Lucknow, both of
which I have found by various inspections to be favorable
for that species of cultivation, which I ought to notice is
here. The objects have entirely confined to Bangalore.

I have the
Belance Garden
Signed, R. Wallace, M.P.
27th October 1835

Extract from a letter from the Secretary to Government
in the General Department under the Privy Seal
Paragraph 11

With regard to your Propositions respecting
Plantations of Coffee, the Governor General in Council have

it proper, that the Board of Trade be consulted on that point
you will be pleased therefore to furnish me with the details
of the plan, in order that a clear view may be exhibited
of its probable expense and estimated advantages for com-
munication to the Board, Pending the reference which will
in consequence be made to the Board of Trade, His Lordship
in Council will defer a decision on your suggestion for claiming
the additional hundred Buggahs at Tillyghur to which
Government according to the agreement with Comlaicawuth
appears entitled, with the view of that portion of land being
allotted for an experimental Coffee Plantation, His Lordship

Thank you very much

1823
Botanic Garden Liverpool 14 Nov 23

My Dear Sir

Your Most Kind and welcome Letter of the
18 March I duly rec^d by favour of our Mutual
Good Friend Capt. Mc Keon, with Three Many Orders
To enumerate here in Most Exact order, and
altho the have only been Potted out Two Months
yeaster, & yet some of the Medicinuous are 3 feet
high in the highest Health; indeed our best
Plants I think would not disgrace an Oriental
Garden; The H. Elatum he had flowered with us
for the first time in July upwards of 12 feet high
The Spike of flower was 1/2 feet long & has flowered
in succession since & is now in its fine flower
at this time, also H. Plausum several fine
spikes of flower 8 or 9 feet high which has been
flowering every day for more than a Month
and perfume the whole house when the spers

indeed all the different species of *Thalictrum* have
flourished in succession with us this summer and
seems so thick at home that the species have
succeeded with us I have got up a fine stock of young
ones from seed which is a fair proof the
treatment being natural, and altho he see still
deficient of several species which you paper the doubt
you believe he have the finest Collection of *Thalictrum*
Plants in Europe; No doubt but Mr. Ravenel
have informed you that he is about to publish
a work upon that large & beautiful Tribe of
Plants which are so little known, and thro
throug you goodness so many have made their
appearance on this side the globe and I can assure
you sir that I am sincerely wish that Mr R
may be speed to finish what he has already
begun otherwise I should fear the business will
have to done by any person while I live;

I am very happy that you recd our different Boxes
that I had the pleasure to forward during your absence
~~and that we add any thing to your splendid~~
Collection and am as truly sorry that I have not
wenty of your acceptance at this time but My
Most sincere Thanks for so many New Treasures,
The last summer has been so dry but it had so
as to prevent almost any seeds perfecting, however
I hope & Trust we may have a good harvest the
next when we shall do our best in sending every
thing that may worth your acceptance

! Can assure you tis it gives the great Pleasure
to see the Horticultur is become a desiderate in
every body's garden but want any thing in My power
to assist in promoting its welfare and I am
rejoice that you have Made choice of Me for that
purpose as I shall at all times feel great Pleasure
in promoting such a Laudable & honorable
Establishment and am convinced that the Gentlemen
of our Committee are as agreeable as My self to send

To render every assistance in our power
and which I hope will convince you of the truth
of my assertion when you receive ~~the~~
The letter wrote by our President Mr Walker
a Most worthy Gentleman & a good Friend of
mine. The Presidents letter & also Mr Harvies
letter will also accompany this, The list of
The Fruit Case & The Act. &c.

all of which I hope you will find useful;
I can assure you Sir that I feel good in
being able to do any thing for you on this
side of the world; but about 1000 years
are required to restore to good health
May the disposal of all things be to your
you in the same; at present I am very
little for my self that having been very well
for some time, yet I hope I shall be some
a little longer to render you some further service
is the sincere wish of your most obliged & faithful
John Walker

To Sir
in looking over your Catalogue I
there found a great Number of fine Things and
ventured to copy out a few Choice Things, any
of which would be very acceptable either in
Plants or Seeds at your own Conveyance
in particular of fine Plant Letty 'Rufa' by Linley
in his Plantaria, and also in the Botanical
Magazine under the Name of Astragalus Wallrothii
I believe it was supposed to have been a Pentstemon or Dombeya
No doubt but you will know the Plant well & it is
one which I am very anxious to procure; I post
myself with you such a long Scroll that I shall fatigue
your with look them over but hope you will
Excuse, and remain

Yours

Yours very sincerely

John Sheppard

I don't know how many letters
you have to acknowledge
(I have none for me) let me
see - the 20th - 25th - 28th & 30th of
Octob^r and must now be
somewhat brief in noticing them
as I really am pressed for time
just now - but do not think
that I have neglected any of
your behests contained in them
all your matters are in train
and I hope will be completed
to your satisfaction - Adm^r
Shaw's papers returned

from before than laden with
seeds which he will continue
to send you daily and I have also
a quantity for you. I have also
the plants you desired to have
the bark of the carupha melting
oil. and all the other things, what
will be added to what ^{my} other
people have prepared and all
be sent down when ready to
be packed to be sent off to
you in a boat.

I shall take care to have
the Rocky Road & Musk
head made. purchased
in your name by the Post

and you should wish to make
any alteration in your
Commission, there will be
no objection for you to write
to me on the subject. I would
also send a letter for me
to Mr Charles D. Ogley for
between ourselves, I am
contemplating playing the
Tweant for a short time
of running down to Boston
for a little change of air
and scene of which calculation
however - as this is the
case "you need not say any

Wainwright - Don Dease
Wright has come back from
Rehoboth also unwell with
the amputation he had, although
it was, that he he thought
able to come out and I have
not seen him. He has sent to
McBumman to request me
if possible to procure him a
supply of the medicines which
he had administered this
year kindred when last
in California - I think he
thinks he derived much
benefit from, perhaps you
could ask Mitchell

do what may be proper in
this matter - & if you can
procure him any relief
in the shape of remedies
pray send them up by the first
post or more if you can find
them in the country -
I return you - with many thanks
the Committee's address to get
in your behalf - you have
my sincere wishes for the success
of your small matter, and
what I am very sanguine you
will meet with.
I am very dear Sir

tion was thanks to them.
I have since got his large
letter of instructions and
"remonstrances" which you
sent in your letter of the
8th. - we will do all that
we can. - The request
which you sent in your letter
of the 30th. I destroyed after
reading - as you desired. It
was not a contemptible thing
I say worthy of any notice I think
at all, and from Dr. Taylor
that any notice should
have been taken of it. which

was the only thing which
could have prevented any
consequence - but I must
conclude and am hurried
to tell me. Always
your very sincerely
Edmund Spenser

Mallick Eggs

Calcutta

1 pound }
Rice Eggs }

agreed to take them at the same rate
as Captain Morgan's. Eight Dollars
per Chest and do all I can. I cannot
obtain freights at a cheaper rate
London the Bills of Lading of both
Ships and please myself these two
Chests will be no unacceptable present
for the Garden. I have also found Capt.
Pearl of the Indivina to take them and
having given him two Chests of pepper
Plants to send to Singapore in lieu of
the freights. So that you will have
nothing to pay for them. The Indivina
is not in yet, but is daily looked
for. The Specimens in bottles I will
send on the bill for a month with
four more with a view of getting the
same rate and acceptable thing. I have
got more, but cannot get freights for
them at present. As the Chests are large
and the Indivina is difficult to handle
I prefer to send the same by sea.

The Ship has just come in from
Calcutta and I have not had the pleasure
of hearing from you for some time, which
wishes are perfect justice either unwell
perhaps opposed to what may appear
negligence on my part, but I do assure you
I have no stock ventured to buy of your
respects and that of your friends I am quite
in a happy manner, as the Captains will
not receive the things on board until
the last moment, and the things to be
of value of the things signed on my part
closed before the Port Officer, which
which time we had better trust to
the Bank however, which
the which has struck me, as likely to
Bengals, and the other
Pepper, the simple manner in which it
grows here opposed to the better
together with what I have heard of
a few plants already in Bengal, seem
to warrant the conclusion that it
might eventually be introduced and
become a staple article of trade from

Calcutta, equal to that of the Indigo
Cotton, and I hope I may do better -
- The Pepper requires very little care here
it grows fine naturally and is exposed to
dew on a rough soil, the rougher the
better, and it bears frost abundantly. I
merely suggest this to your Superior Judge
- I think it appears likely
- I have only to
to send you any quantity of
require -

Your william doubtless has
Garden seeds from Capt. Baring
kindness and others who have your
kind to Orizaba so I have only to
inform you that every one all quite well
indeed never better. Mrs. C. and myself

Botanic Garden Liverpool 1800.

My Dear Sir

I much fear you will think Me an intruder
to address you upon a subject of this kind being so
very distant from all our former Correspondence; yet
I trust you will excuse the liberty, as I am encouraged
by your former kindness, and venture to inform you
that I have a second Hobby Horse besides that of
My plants, which is the first object of My Care,
and as The second, which affords Me some
amusement at intervals; an amusement which I
have been pursuing slowly for more than 40 years,
but unfortunately for Me it is one of those amusements
which can not be followed with out a considerable
expence, which generally place those objects out of the
reach of persons like Myself in so humble a sphere
of life; yet Time and perseverance assisted with
a little judgment, I have scraped together a tolerable
Collection, in Number something better than 4200

Coins of which 3300 are British and three (doney
Abroad) about 400 Greek & Roman and the remainder
are Foreign Coins of several Countries & Kingdoms, but
have never been able to procure but very few of the
East India Coins where I am inform'd there are a great
Variety of very Curious Coins in Circulation;

Near Sir May I be permitted to beg the favour of
your assistance at your leisure to collect a few
of such as you may think Curious & fit for a
Cabinet; and say that you may have ^{any} ^{of} ^{them} ^{by} ^{the} ^{way}
The residence of our Friend Capt^y Mr Keen in India
may give them into his care & let me know the
sort; and I will commit by him both the greatest Pleasure
in hope you will excuse the Encroaching so much
upon your valuable Time & Pains

My Dear Sir

Barnsbury Park
8. Dec. 1893

Dear Mr. Wallich

Many thanks to Dr.

Wallich & to you for yr. attention in
sending the benches for the garden, &
lending Miss Amhurst the Books, which
she will take great care of, & return
by a bye - pray thank Dr. Wallich
for sending Williams homey to me.
He has been a very usefull & agreeable
companion in my walks all over
the garden, & the more, as our gardener
is ill again - & I wish to ascertain
the names of many plants etc - I hope yr.
little man is improving - he met both yr.
children yesterday (or today) & I thought he had
not the least appearance of an invalid, quite
the contrary

As soon as I can I will
be back & heartily -

See me either
off soon for Calcutta, to remain until
Saturday noon? I remain dear Sir,
With truly yours
J. D.

With affectionate regards to the family
I remain dear Sir -

3-December

I had the pleasure of receiving a small
packet of seeds by the Express the favor of
Lieut. Chester, though I have not been honored
with a letter for some time back -

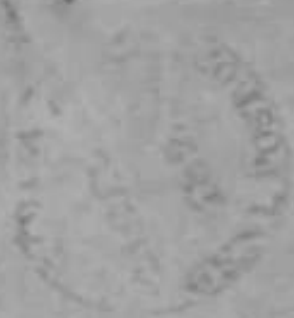

May I take the liberty of requesting
you to have the kindness to solicit a
certificate of good conduct for our friend
my ever respected Commandant General
Wardwick previous to his leaving Portugal
as such a document may be of service to
me at some future time, and it will
be very grateful to my feelings to know
I have not failed in my aim of getting
up to that recommendation by the General
before he departs when I first went to
the Botanical Gardens under your kind
patronage, a pair of shoes which were
sent me from my Mother-in-law

I am, Sir, with great respect,
Your ever Obedient,
and grateful Servant,
S. Wallis Esq. M.D. Surgeon Port Antonio.

Perry 8th December 1823.

Dear Sir,

Your kind and welcome Letter dated
27th October came to hand via the Post and
the value of it was enhanced by my never
having been so long without hearing from
you before. It gives me much pleasure to
hear that you have received every thing on
both sides. I sincerely hope we may be equally
satisfied with the large despatches I have
forwarded on the Edinborough, Ores and Lardine
believe me I am feelingly alive to the interests
of your valuable Institution and require
but little stimulus to exert myself on its
behalf. I only regret that with all my exertions
I cannot fall so extensively short of the indefatigable
patterns of industry and usefulness which you set
me an example. I have several ambitious to imitate
them and will assure that my labours are
directed to a multiplicity of objects of which
the least is not the least. I am happy
to try it sometimes increasing their being now
nearly one hundred Boys to teach without
any assistance. Our Garden begins to bear
a very pretty appearance and I have only to
remain

regret the want of foreign supplies to render it
more perfect: The Governor pays great attention to
it and I feel it necessary to inform you that
whenever I see him the first question he gene-
rally asks is whether I have succeeded any Plants
from you, to which I am compelled to answer
in the negative: To day I had a long conver-
-sation with him on this subject, he reminded
that Lieut. Chester (who lived at the Governor's
during his stay here) had brought Checks of Plants
on board the *Cliza* for Mr. Crawford of Singapore
forwarded by you, but not one for us. he appeared
surprised at it and said that he had entertained
hopes that the Checks which the Government nec-
-essarily the expense of making and sending to you
would be filled from the Garden at Canton
and sent back to us. I felt convinced that were
you to send us a supply of growing Plants for
the Garden, the Gov. would feel much pleasure
in enabling me to send some extensive supplies
to you. You are so well aware of what would
be acceptable to us that it is needless for me
to mention them, with the exception of a
few small Plants which the Governor desired
me particularly to mention.

I return my most grateful thanks

for your kindness in forwarding my copy
of the Bill, and am perfectly satisfied with
the result of your enquiries respecting the
Apprentices allowance and the justice of
the debt you mention. I have endeavoured to
draw a Bill for the amount but have
not as yet been successful; - perhaps I can
liquidate this debt on another way. In
your letter which I received by Mr. P. you
mention that I am to draw on Mr. Church
for the allowance of J. Huddell, which I have
not yet done, it must therefore have accu-
mulated to some amount, Mr. Church has
also a small sum of four in his hands
arising from the sale of some Dry. Cloth
(which Mr. P. purchased with the intention
of bringing down here, but was obliged to
leave them behind), as well as a quantity
of Dr. Huddell to Mr. P. left of the same
with a request to Mr. C. that
he would sell them. This together with Mr.
P's Bill (if proper) will I hope now liquidate
the debt. I have written to Mr. Church
requesting him to pay into your hands
what money he may have of four, should this
debt

from the W. J. J.

27 - 1823

My dear Wallace

I have sent off for
you by this days work a
parcel of such of our garden
seeds as I have best

The sad remainder
of the valuable collection
of plants you were so kind
as send me arrived here in
safety but out of all your
abundance only about 50 plants
survived, the rest and amongst
them all those I prized the
most were dead dead & gone
when

season he will only be able
to pick up some seeds -

The Grief seed sown a few
days ago, but I guess to
day, completely destroyed by
the rain, quite useless, this
is a great disappointment to
me I felt very anxious about
it & had great hope of success -
have you any more, or do you
expect any, such a good seed
is a treasure here could we
succeed - Hope you had
not given up all thoughts of
coming this way, we should
be much delighted to see
you

when they reached Barwell,
but this was no fault of the
Gardiner who came in charge
for my friend Colonel Gardiner
who received charge at Barwell,
assured me that the man was
careful & anxious about
his charge as it was possible
for a man to be - I hope
those we have sent down
to you may have better
luck. Blankworth sent you
a list of them a few days ago
He is just about to start on a
new expedition, but at this
season

Yours with our
united most kind regards
to you both -

Your Believers

Most Affectionately yours

My dear Doctor

Delaware
[May 11 1893]

Many many thanks for the 93
 beautiful Nymphalid Plants, all of
 which, being two, are in high
 perfection & have been transplanted
 from the Lyman's into the garden,
 they are from great numbers
 when I received a quantity.
 Hope you have good news from
 Cooperstown & that I will write
 of profits with the acceptable to
 Society. - My friend has written with
 me in looking for ^{it & yours} the Merry (stories
 & many of them - to furthering
 Whistle

My dear Doctor

The great haste having
done to do I please you many
thanks - I shall see you soon and the
sooner if you will best be so good
as to come here (Calcutta) in the family
by next Thursday at six o'clock ~~precisely~~
precisely. The tide will suit your re-
turn admirably yours sincerely

John

Thursday the 26th of December

1823

Lieut. Fr. Walker
~~John~~ Macnaghten
dated 15th Dec: 1829

Doctor Wallich

in answer

J. Macnaghten

Dear Sir,

I have to return you many thanks in my Mother's name, as well as my own, for the details you have sent us of ^{the} various liberal & valuable collections of plants & seeds, which you are so good as to send to Lord Powis, Mr. Beaumont, & Mr. Barclay, & must congratulate you on the means you have arranged for their conveyance, from which every attention will no doubt be paid, to their preservation.

My Mother desires me to express
both what pleasure & interest
she will pursue the papers you
have sent to her, & how sensible
she is of the kind attention with
which both M^{rs} Wallich & yourself
have offered every alleviation to
the tediousness of her confinement,
& the gratification with which
she has received some of the
produce of your delightful garden.

She is, I am happy to say
improving, though slowly, &
her general health has not

suffered from being kept so close
a prisoner. - Permit me to
repeat my thanks for the Book
which Mr. Wallick was so good
as to present to me yesterday,
which will be highly serviceable
to a beginner like myself -
With best Compl^{ts} to Mr. Wallick

I remain, dear Sir

Yours &c &c
S. G. Hubert

Govt. House
17th Dec. 1823

Miss Amherst
dated 17th Decr 1823

Care

In the matter of autographs, I shall be most
thankful for your assistance, but I should wish you
first to see my collection & judge of its value than
pass on desiring of your help. Great as it is, it has
principally been formed by the contributions of my
friends; for that account it is particularly dear to
me; nor in these any portion of it which I equally
value, as the letters which have been addressed to me
by persons of eminence & distinction, on which letters, how
ever they themselves have been honoured & loved. In
another point of view also I feel a gratification in the
possession of such letters; for, pleased with me, I feel
there is every probability of their obtaining a certain
degree of immortality; as the extent of my collection
gives it the best chance of being preserved after my
death - some national repository.

It did not occur to me to ask you before, if
you had portraits of Lord or Lady to Doncaster, friends
often were engaged of them before they left ^{England} home;
& I have a duplicate copy of each, which I could
not bestow more to my satisfaction, than by sending
them to you.

My daughter, I am most happy to tell you, (I believe
we too the hope for your friend's anxiety on the subject
appear to be settled, every symptom indeed ^{continues} ~~continues~~,
but their sickness abates, & I look forward with
something like a certain hope, to seeing you home
shortly after 3rd; wishing you by the way, I need
not say that I look anxiously to the gratification

My dear friend

I cannot tell you what pleasure
your letter gave me, nor do I know how I can thank
you for it as I ought to do. — You are most kind to
take me a portion of your collection, but I am altogether
unworthy of such a favor & with a distinction —
I did not mean to send, nor am I able to assist
in the material indulgence of age had been superadded
in my ^{case} ~~case~~ the necessity of attending to a large business
in part to a large family, & the duties of a magistrate
an extensive district. You will hold me pardoned
therefore if I have been obliged to send you
neither my botany I never do so spontaneously,
I like the Apothecary in Shakespeare, "my poverty
but my will, consents" — our comfort I feel, that I
am not like the Boy in the margin, but inclined
to express that of what I cannot send myself. So,
my worthy Sir, receive your collection for this she
is now desiring of them: receive me only, if you
please, & for your staff & dog's bark & dog's
relatives; for every thing familiar I send you
I had that that the first collection in the world, &
I had also the vanity to think that I understood the
letter than any other statement. —

12 23

Walden

After your subscription
yesterday I got it May
came to me & in some
at length came to the
following terms -
He desires to know since
he gives the book at Shrewsbury
& he agrees to change the
20 years term into a
perpetual one on condition
you taking the 100 Bays
if had any, would please

Walden

My Dear Patrick,

I can only answer
you in reply to your
letter that as far as
regards my ^{position}
in any way ^{to aid}
your views you may
feel as you see; although
you have ^{impartially}
stated my ^{credibility} &
pleasing ^{the} ^{circumstances}
you mention. I will take
an opportunity, if convenient,
to say with ^{the} ^{best}
this evening about the con-
tents of your letter and
send you ^{the} ^{right} ^{the} ^{result}
of our ^{deliberations}

of the letter - The Board -
to 32 1/2 1/4 from March 1829
70 1/4 12 1/4 12 50
97 - 8 1/2 from the date that
the same former time is
finished - In all 489
Bergak -

Only commission -
these terms to be made
I see if I have committed
any blunders in receiving
the terms - You will say
Baltimore 9th Dec 1829
24th Dec 1829

I shall write to President
in short regarding the
to day - 9th -

I am anxious to
unite the students yet
to send you a card
and let me know
how far you have
of the various subjects
of investigation
than to the good
fortune to find the
1st volume of the
of the same name
and you.

Cher

26th Jan
1823.

I have this instant received
a fair copy of my letter with
Cousin, Campbell & Carey's signature
to which I have appended my own.
I have been willing to bring
every thing forth as soon
with the Committee on the
part of its health, and therefore
signed sign. N. —

My Aunt has seen my
copy and says you need
not send your name nor color
or ground name there.

Yours truly

My Dear Walter

Thanks for your letters but
you have not sent me any letter
from Boston to your address. I hope
any arrangement you think best
with him. I think Louis has said
three or four months in advance but
his best time and other things... but
I will endeavor to remember this...
I heard from Campbell yesterday, he
has written to Hunter concerning
some your being sent to moving
the house in our new building.
I think with your wishes
and it so I'd not say that
I should be glad to have them
any way in my power. -

This is glorious news for the whole
and sundry men for the same
quarters. —

H. K. C.

My little kind letter with it
Lately I - I have time
have - I shall see they
know - I know that
I should be glad a few
days with the folks when
Bob Dickens is in town. I
propose doing this day
or two - when my letter
will go to the Channel
fast & I have advised
not having upon you -
whether you want to the
least - I whether you go
to the drawing room. I am
sure you attend with
me tonight? I am
Lately I have been very
ill - I wish my letter
thine regards I am
most affectionately yours
Thos. Digby. M.L.

My dear Dr. H. H. H.

Thousands of years have
begun because of I think
you would be encouraged by
my not of mine having
gone ahead - you are
bound to be liberal - state
causes. I did tell you when
I was in London, that the same
by ourselves when we were
men of our own time.
I felt that the opportunity
you have had of looking
at you was nearly twenty
I expected the time to
allow me to be what I mean
has been successful since
you left I am hoping it
as I expect, I am

or, if it would be more convenient
for you to come on Tuesday Evening
I shall certainly be at home. There
are several things I should like
to mention to you upon. but I
must beg that you will put yourself
to no inconvenience as I shall
have the pleasure of seeing you
at the Botanic Gardens.

Believe me Dear Mr Wallis
Yours very truly
Sincerely Oblige
Sunday. ———
M. B. ———

A. M. Hick Esq. M.D.

My dear Dr. Parrish.

Pray, pray understand
my motives, and do not allow
me to excite our uneasy feeling
where I would do every thing
within my power to assist and
alleviate. why doubt not my
excellent Friends? — you are perfectly
sensible that the Levants in this
country feel bound to serve no other
Master than their own. so that it is
unreasonable to expect yours to be
an exception. but it was not this
which alone prompted me. I knew, as
I wrote you word, you would be more
imposed on, than, were you present,
would the plea that the Ladies require
such & such things. I thought it better

to avoid to prevent & to disappoint them
by ordering what we required, but
do not I entreat you to think back for
half an instant we could attribute
any thing to you but the kindest
and most generous of motives,
actuated by feelings of the most
liberal and disinterested nature,
and should I not be distressed beyond
measure could I ~~not~~ intentionally
occasion you an uneasy sensation.

Let me then beg of you not this
time to discharge your Chairman
if you will allow me to see there
is no very palpable imposition in
the Accounts carried into you, and
suffer your Chairman to go on
as heretofore. I shall feel that you
have forgiven me for the interference

I have taken. I am extremely hurt
that your man should have chosen
such an hour to have made his complaint
you say nothing of your own health
I have a thousand fears that this
agitation may have made you
worse. do inform me. I am very glad
you did not attend either the Lecture or drawing
room. Mr. Dickens has just come
over to tell us on his return from Mid-
dleton. My sister is to pass tomorrow
& Monday with our friend Mr. Lindsay
poor Jane has been quite occupied
in looking over the various articles just
received of her poor husband. She coughs
very much. but rather whole is not
worse. Excuse this hasty scrawl. my
sister and Mr. Dickens join me in kind
Regards believe me dear as I all wish
Your very sincere & obliged
friend
M. B. H.

My dear Father -

Lord Arthur told me
on Friday that you were
about to appear before the
on a more extended plan than
was originally intended he
thinks nothing possible but
I think that you were to
have been transferred to the
the city of New York
nevertheless a large
in particular -
and you will find a

any day as Mr. Kebley, then a
man of great calmness! He is now
confined and there is danger
some will soon be under the
Ch.

My dear sister, I am
glad to hear of your
recovery. I am sure
that God will bless
you in all your
labors. I am sure
that you will be
able to do all that
God will give you
power to do. I am
sure that you will
be able to do all
that God will give
you power to do.

Very
truly
yours
A. A. A.
I am
sure
that
you
will
be
able
to
do
all
that
God
will
give
you
power
to
do.

My Dear Walter

I returned Lord's memorandum
letter to you immediately
after having communicated
the subject to Lord Amberst
& gave them to you at Berack
Love. - At least there may
revolution says not. We have
2 grand summaries to send
you then immediately if you
think fit. I feel confident you
will discover them on looking
about you - be

Take off at home on
Friday and take a short
trip to my garden. - He always
left at 2 and got some
news. A new channel
was for the
Wednesday

My dear father

I wanted to say you a
pleasing visit this afternoon. I
am very glad to have with
to other young at your side.
I am you a great before. I wish
you all your boy his mind
for me at the graduation
to last year. I wish
probably being that much
with me. I am yours

Yours sincerely
E. Aheh

Travelling & Home.

Charles
C. Calder

My dear Mr. Calder

Thank you very much for the volume of your
interesting work which I have
just received. I have read it
with interest and pleasure and
I am very glad to hear
of your success in your
work.

Yours truly
Charles C. Calder

I am very glad to hear
of your success in your
work. I have read it
with interest and pleasure
and I am very glad to hear
of your success in your
work. I have read it
