Singapore 4 January 1851

Dear Mr. Wallcut

I have had the satisfaction to receive from my friend, Mr. H. H. H. about a fortnight ago, together with your valuable supply of news papers & a book as well as for your other & former by various contributions & must remain your most obliged & grateful servant to him. Mrs. H. H. H. had not sailed but believe that she was to be the first ship dispatched in January so that by this time we may indulge hope that Mr. H. H. H. and your dear children are about to proceed to old England. You grant him a speedy and safe passage. I trust your affairs since long and safe & happy accounts from them previous to their sailing. Mr. Palmer arrived from Paris here day ago his arrival has interested you & I hope a little. We have cards for

Hawalbagh 13 Jan'y
1825

My dear Wallah

I am just going to write to you
about Robert Plunkroth (who seems to think
he has exhausted this province) when your
very kind and welcome letter arrived &
from you I was greatly rejoiced at the prospect
of seeing you at Hawalbagh
although from your plans I fear your
visit must be but a flying one. Pray let me
know in good time when I may expect
your arrival at the bottom of the hills,
that I may take proper measures for
bringing you comfortably through them
I should like to know moreover whether you
would like to make then regular marches
from Behmawore to Hawalbagh or make
one side of it which latter can easily be done
by carrying ponies at the different stages.

I should very much have
very ungrateful had I felt displeas'd at
your not writing to me, particularly as I
have enjoyed the salutary effects of your

friendly

...
...
I have had much to me in various
ways and I have still to thank you
for your valuable & valued gifts
of the 2nd lot of the "Flora Sicca" as
also for the plants of Apples for my dear
countryfolk, which I did over to me by Mr
Watson of the Posa Garden. These
interesting plants are now on their way
to St. John's & I am everlastingly for their
safe arrival - My good friend Lady
Weyl has the despatch of them
I have done all the needful
regarding Robt Blackworth, and he will
start from this on the 17th and make
the best of his way to Lucknow. I enclose
a memo of the amount paid him - he has
received his salary from the Comptroller
of the Revenue up to the 1st of January and I have
advanced him 2 months pay besides

100 Cannon
H. A. P. S.

My dear Sir

All this favour^{r<*}, stand concerned[^] at our
 now Mrs Walsch with her precious charges has embarked
 for Bayland. This expectation is farther confirmed in us
 by a letter just received from your sister. Many are the
 anticipations of pleasure founded thereon, and great will
 the disappointment if they fail. Your sister will be in
 London to meet Mr W. by the end of it, and perhaps I am
 much mistaken, to will your home. **K* - £r***
 Margaret, & so will Miss Colledge. The in[^] strange land
 she will soon find herself surrounded with friends; and
 soon I mean to leave George a / ** *t<f+_*tj* >** of me, and ap
 •fc* * Miss Walsch's zealous cooperation, I have no fears
 of persuading upon Mr Walsch to visit Scotland. Her sister
 & Lady have almost given a promise to the same purpose
 & I shall not be **stef+**** if we make a formidable cavalcade
 on our return — **S**

Your son **O,** says most perfect health, & is full of
 vigour & spirit. He is not quite so studious as you
 I might wish, seldom rising higher than 5. or 6. in his
 class.

Chafed; yet he is active, trying every thing, & altho' ...
so systematized as others, equals any of them perhaps in
general improvement. - We have just parted with a
very superior teacher who has devoted the greater part of his
time for the last year to Anderson & George. - Nor could
we expect to retain him longer than our employ corresponded
with his own subsequent views, but have endeavored to supply
his place the best we can -

Yesterday we received the first letter from my brother Alexander
since he left England, dated Monday 7th Sept. - By this time
you have seen him, perhaps you parted with him, and most
anxious shall we be to hear that he has left a favourable im-
pression of his character on your mind. - Robert's letters every

The distance & distance are like a great void, few have
it even - I shall never be able to forgive the late Marquis of
Blandford for the discovery he made of the Indian Archipelago,
nor even his discovery in 1771, for extended confinement that
idea. Tell me what you think of the Pea inhabited of a
mighty Continent, truly even Islands in the East, with, naturally
nature of the British Isles, or of Zealand, might know to
locate their value more justly -

I send this by Mr. Henry Johnston, the second Son of
Mr. William Johnston of Hester, a family of the first respectability
Mrs. Maria Lady Johnston with her family have only

My dear Sir
I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the matter of the late Hon. John Jay's estate. I have the pleasure to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Your obedient servant,
J. Jay

● * ^

Dear Sir

Received your most gratifying
 letter of the 13th Inst. I am truly glad to find
 in it, that you have had such **A** satisfying
 accounts from Mrs. Wallick & family there, I am
 no less pleased that I am able to give as good
 accounts of poor George from my mother's letter
 for the receipt of which I am indebted to you
 kindly attention it is dated the 28th July 1822
 It is a letter of the 26th June ^{f-A**} which I have not yet
 received. sent under cover to **#*** My Mother
 said in this letter, your father, ^{IMs^} and I are
 with all of the family at home except that
 account to supper bed and breakfast. **J&y**
 a George are still in Yorkshire & have enjoyed their
 a excursion very ^{**< /} however it has now been long
 enough, the fever ^{to disappear} **+ZL** in the ^{??&L}
 when the end ^{is now} **tif+Sf** ^{beginning of next week,}
 which he suffered more than from the first attack
 I do not write to ^{you or} Mrs. Wallick on this occasion
 since George is perfectly not come home, but I
 will write to Mrs. Wallick next month, & in
 the mean time you can tell them that
 George is perfectly well, & that we have
 taken every possible precaution to prevent
 his taking the fever, & that we guard
 a few days ago ^{tf><-C-*} their friends in Surinam
 who are all well. - **ff**

Suppose you are not at all ill pleased to
 start your tour to the upper part
 which I hope will quite renovate you after
 your sedentary & studious life. - ^ ^ r:.. ^ S ^:
 Garden the weather now so truly delightful
 here & I like the station very well we are
 just now | none drill - wh ' & J * J f + j like
 the time pass much more pleasantly as
 we ' had to rise out at gun fire & make
 the musket sentinels & o'clock turn out again
 at ten to sword exercise at that interval
 then again with muskets from 4 to 8 o'clock
 w / ffr - A . / * > ** ! & * devilish tiresome - we are to do
 duty with our respective companies & -
 I have been in good health since I saw you
 give my best respects to Mr. Calder, when you
 write & also to my friend Charley -

I am Dear Sir
 Singapore 19th July 1825. Yours Truly

My Dear Wallich

On board the Louisa I have deposited
a Skippel each of two kinds of the best
Potatoes cultivated here from English
seed by an amateur (see kind)
The larger kind he calls the Champion
the smaller the apple Potatoe - also
a Skippel of Cape wheat for
Craigie takes in his cabin. The
wheat I take to be the finest in the
world - & the Potatoes far superior
to the common kinds here. I say
for these

agricultural Society

I also send for yourself a
& stuff with Fur cones &
seed of Acorns w^{ch} I trust will reach

you in good health & I shall hope
to see a rising forest of Oaks on my
return. I am on the point of going to
St Helena with my children who
are proceeding to England on board
a Leviathan of a Chinaman - the
Berwickshire. I hope to find the
St Helena packet there in w^{ch} case
I shall be back in a month.

Your Bengal wheat is held here in
utter contempt. They consider it only
fit to make bread for their slaves.
It certainly is contemptible stuff. I
sent a sample of it. What can have
been done to it? Our grapes & other
fruits are just coming in - the Muscadet
is delicious. Have an acre or two of
them & other sorts like so many
cervant bushes laden with fruit.

It is very greatly to be lamented that
there is no such thing as a Bot. Garden
here - I am convinced that these hundreds
of plants totally unknown to that bene-
volent year's residence at the Cape would
suffice to make a man acquainted
with its virtues - The very same spot
gives you every fortnight a
succession of different flowers - You
must catch each in its day or it
is **S** over - I hope the Oak may take
kindly to India - The shade is so
delightful - I have not had a line
from you about any thing - You may
say one to the Wars - We are a good
deal annoyed here about the
Parrachipore business of 1794 we
know little beyond hasty accounts
written on the 2^d - I have sent

Raja Nur Sing a splendid collection
of Bulbs at his desire I have one little
apartment preparing for myself on
my return - With best regards to
all which remain Yours very
Sincerely

Cape

March 20th Feb 1825

My dear ...

I had the pleasure to receive
 by Mrs Wallack your esteemed letter & the com-
 mendation of the Steam India. Mrs Wallack
 letters will have informed you long before this
 on such you of the very happy circumstances
 of the chief cause of your success on her account
 some time before she reached home. The sub-
 sequent communications would acquaint
 you that herself & children enjoyed a fair
 share of good health all the time that they
 remained in our changeable climate. I should
 much pleasure in adding that when they left
 they were all as well as you could wish
 upon all the observations which I could
 see they had the prospect of a very happy
 life. All this was very fully

r:
 s-f^ * t
 S

2
performed by the conversations that took place
between Miss Maria Sophia Gordon & Mr. Grant
among all the best natural understandings
appeared to exist.

I was a great deal out that time and
the first thing on duty at London when Mrs. Walker
arrived. However there was no help for her - for
altho' I had not a moment in making her
acquainted to do the needful for Mrs. Walker -
comfortable establishment - the former being
so completely at home in Miss Gordon's
the former thought that she might be
a subject to change. The latter however had
a very delicate & other circumstances made
it impossible for her to show Mrs. Walker the
attention which she would otherwise have
been happy to show her. In one word and
more all found that Mrs. Walker remained
so that as time on Miss G.

Mr Wallcut was not well pleased to see so many
cases of Plants going away from Lhona but says
the Gardens under your care - **S J ^ ^ ^ + + ^ ' < 4 ' ^**
leave her that that was in some degree owing to
a want of orders from you. I fully expect our
usual friend Mr Reeves will return to Lhona
in Sept or September next. otherwise I am
only by best services.

Accept my warmest thanks for the
copies of the Flora Indica by which I have
been both amused & instructed - I remain

My dear Sir

Yours very sincerely
John Livingstone

James Brown

Starkney 25 Feb^r 1895

only 20 May 1895
for Good Hope

Dear Sir,

We have had the pleasure of receiving your kind letter of 10 June last as also the Palm Seeds for which we beg to return you our best thanks. The *Livertonia* and *Cycas sphaerica* appear to be new to us - of the other kinds we have a pretty good stock. The *Caragana* arvensis is now in bloom with us nearly 30 feet high - and we have the *Saguenus Rumphii* almost as large but not flowered yet - Our good friend Shepherd sent us abundance of *C. Talien* last year which have grown admirably.

We beg you will have the goodness in your next to mention any thing which you might wish for in our way or return

for your liberality, as it will give
us the greatest pleasure to gratify
you in any thing in our power.

Should you be able to spare us
at any time any thing new and
beautiful we shall be most thankful
Palms we are ever anxious to
add to our collection having now
above 100 species - also Gynandri
plants of which you have vast
numbers that we know nothing
about here - and doubtless you
have many new & fine plants
from the North of India some of
which endow our Climate well
we remain in haste

Dear Sir

Your most obliged servants
C. Loddiges & Sons

/&*&-'&

If you recollect a conversation
 little more than a year ago at your
 breakfast table, about the probability
 of my one day sending you a sea bag
 a steam Packet, you will smile
 should your prediction be actually
 realized in the receipt of these, which
 I dispatched from this Island
 with the full hope of their going
 & I am by the newly launched steam
 packets - they will thus have
 every chance of success for de-
 livery, and you will perhaps
 kindly repay me in kind, by the
 return of the paper - only let me
 premise that whenever you send

> 17*^&

These seeds, you should write separately
by the same vessel, I suggest with the
opportunity of taking measures for
getting them speedily down into Norfolk,
where we are fixed in point of
permanent residence, and have
a promising garden, in a most
beautiful situation - at present
there is an ⁹ ~~estate~~ ^{estate} ~~having been~~ ^{occupied}
some years, but we have
an active & intelligent gardener
under whose I am watching
the mode & progress of English
gardening - we are surrounded
by Galanthus nivalis, Bellebros
Opuntias, & other plants all
very interesting. The hour

I cannot get to feel all the affection
for them I do for my other favorites
the more splendid productions of
the tropics - the plants I took to
home, and deposited at
conduta Sodre's. I have now all
well, except the grafted mangoes
which I landed in good order -
but which, from having been, I
think, transplanted too soon, die,
I very greatly regret, for they
were considered very valuable, being the
only grafted plant of the kind
that had been received at the
establishment (ungrafted ones
they have often received) -
I have therefore a petition to

-AZ^!UA&?

make it the only one of the kind
for me - so of more profit, of the kind
I am, and that the same structure
by you - I cannot think that I can
succeed in the box - and will repeat
William Shakespeare, of the A.C.T.
Washington, the Duke's best friend
I like change of letters. When
I do return you feel in the
celebration of the same kind
I second the good thing in the eyes
of the people - I am sure that
I am sure, when you see the
man, I do not see the man
I do not know you, and
actually at a banquet in Philadelphia

M. r ^

perhaps have seen the book
I have at the same time I feel
by your this country -
I am sure you will see, and so
I think it is that they do not
kindly remember, beyond what the
is also given with a guide.
I am sure that they do not
I greatly recommend, and
I do not see it, and so
I do not see it.
I believe you
I do not see it.
I do not see it.
I do not see it.

16th April

J. R. Walker,

received on

Bois Chery Moka Mauritius

15. March 1825

I must always consider you notwithstanding the
 interruption of our correspondence which
 I have always valued most highly. I have
 had the misfortune to lose it - the cause
 has been unaccountable & unknown
 to me. I attributed its suspension for
 a long time to your repeated attacks of
 ill health - in search of that
 blessing at Penang & elsewhere - I was
 perhaps wrong in such a
 supposition - but I must not trespass longer on
 your time by conjectures -
 The enclosed letter was written
 by an introduction to you of
 your beloved friend of great promise who
 died a victim to his
 The Professor says you were
 one of his pupils & in proof of being so
 the letter will be returned to you
 by the post - a young gentleman who
 has been very favorably known to me

the lecture you wrote about the
beginning of the month. I will endeavor
to give you as soon as I can - or if
you will let me know when you
want the drawing I will meet you
there. But I have a few things
to do for me during the winter
of April. Could you not come
to extend your tour into the States
from Providence. It would be a delightful
trip. The visit is historical treasure
of the site of the National Forest
I wish to go about so long ago - the
night go along the foot of the second range
from Providence to Dover - also from
part of this range, descend to the
knitting rock. I cannot say of facilities
ascend to Providence but the journey is

beautiful, the mountains covered with
vegetation, the tops studded with
flowers, & the valleys narrowing
into the rolling of crystal streams -
from Dept of you could ^{come through the} ~~then~~ Khalee
Pass. This what is called the first
Range of Hills, as you might
enter you town to Khalee. When
you would hear of the Jatomance
at Gung - ~~Lucerna~~ J. P. L.
Hopper mine, & the other
to descend toward the sources of the rugged
rocks from Khalee you could
come this. The Family Pass due to
Schanap. The whole trip would
not occupy the month. you would
be delighted & I should feel obliged -
as it is the only opportunity I should

for my making my appearance
If you think of writing to let me know
the probable time of your departure, I
should not think of going after that.

If I do not see you let me know
- time to give me notice of your
approach. I really am now
anxious that I can expect to
go - while here I am daily annoyed
with being obliged to visit my patients
so that I really **y^ J 6/ A~/ "pZ** wish
to prosecute a regular course of
study. I will however hold
myself to it if on more to
attend properly to such incompatible
duties as Botany Studies. I being
now an invalid patient. Besides
the men, women & children, I have
two hospitals, I the garden - a
reclaimed jungle. I will defer all
business until we meet, this I have
met today. I hope you will think
something to show. I yesterday received a

Supply of plants from Hills 1210 is ^{7/20} number
The dried flowers have been expanding
with warm water. Found among them
1 of *Sarcocolla*
2 sp. of *Diola* 1 of *Besseyia* 1 of *Desfontainia*
1 of *Handleya* 2 of the *6th* *Cliff* *?*
1 of *Handleya* 1 of the *Handleya*. Some not yet
examined. but ~~one~~ apparently a *Polemonium*. The
other probably belonging to the *Diola*. - esp. of
Besseyia - with several of the 17th & 19th.
Cliffs which have not yet examined
as they are some way over *Salsman*
Gents at *Madison*. *From* *his* *date*
I *trust* you must get all the *informa-*
tion you can about what the *Garden* was
like has been done. In the *Blanc*
way certainly not so much as might
have been in two years. if my attention
had been undivided, on the *Garden* really in
the *state* of our *land* anticipated. It must
be *disappointing*. Believe me
Yours most sincerely
J. F. Rouse

tEJ: V*

Mr. Janinich presents his most
respectful compliments to Mr. Wallick, and
begs to acknowledge the receipt of her note
of yesterday's date, forwarding one from
Dr. Wallick, which he will take the earliest
opportunity of laying before the Agricultural
Society. Mr. J. requests to be allowed
to avail himself of this opportunity to
; ^ ^fc* ^ £*^ '***
and in which, he feels convinced, every
Member of the Society will participate

in learning that the Doctor has been
kind enough to accept our invitation, and
that we may now pride ourselves on the
honor of having the name of so eminent
a Botanist enrolled among our honorary
Members. —

Teutonic Hall
8th April 1825.

Lomish
r April 1825

In my Dearest
Mother's Ark
Amos

Pirang 10th April 1825.

Honoured Sir,

Your kind Letter of the 19th November I had the honor to receive on the 26th December last, and began to express the most heartfelt gratitude for the extraordinary kindness and condescension you have at all times been pleased to show towards me and my family; I find myself totally unable to convey to you in adequate terms my feelings on the receipt of this Letter; you appear to make it your study how to serve ones who are nothing but a creature of your own raising and dependant on your widely extended bounty. I with sorrow confess myself utterly unable and without the most distant prospect of ever being able to repay you the least of your kindnesses; The only return our present situation admits of, is to offer our unceasing prayers for your health, happiness and prosperity, and that the blessings and comforts you have been the means of bestowing upon us, may be abundantly rewarded into the bosom of your respected family. You are pleased to express your thanks for our attention to Mr. Wallis when here, would it were in ~~my power~~ ^{my power} to show how poor that attention compared to the solicitude you have shown for us for upwards of five years.

The cause you were pleased to inform me you had taken respecting the Botanic Garden here calls forth the most lively gratitude; I have been ever since anxious waiting the result, but have heard nothing further either direct or indirect; though we have had repeated arrivals from Calcutta and nearly five Months have elapsed since the date of your last letter. This causes me considerable uneasiness but my last
letter

letter informing you of my resignation of the Botanical
Garden has given offence. I have already informed you that
my resignation was a measure of absolute necessity, both as it
regarded my health and from the accumulated obstacles I had
to encounter. You were ever indulgent to me, believe me
Hon: Sir, could I any how have surmounted the difficulties
I had to surmount without resigning, I
have done it, but I really could not. Had I held no other
situation but Superintendent of the Garden, the case would have
been different. A large and increasing School of 112 Boys
without any assistance, is, of itself, a difficult undertaking,
when united with that of Chaplain's Clerk gives sufficient
employment to an individual possessed of no extraordinary
abilities. You are well aware that to do justice to a Botani-
cal Garden with no other assistance than that of the natives
of this country and those natives principally Convicts,
requires the most persevering and undivided attention, which,
had my peculiar situation allowed me to pay, you would
never have heard of my resignation. Supported by the con-
tinuance of Government and encouraged by the best of Masters,
I endeavoured to brave every difficulty for two years, and every
is the Herple's might. I have pressed undauntingly to do
justice to all. I have already informed you of the change
which took place on the arrival of our new Governor, of the
jealous eye with which some of the Directors of the School
viewed my labours and of the impossibility of pleasing every
one. You will immediately perceive that without extreme
injustice to my family I could not give up any other situation
than the Garden, as my salary arising from it alone could
not possibly support us. These considerations together with the
bad state of my health arising (as the Medical Gentlemen have
informed

informed me, from the multiplicity of my labours, induced me
to act as I have done. Pray do me the justice to acquit me of
any intentional error. I am in a situation under your
ken and observe if I am slow to exert myself in your
service - allow me by my future services to convince you
I have only acted from unavoidable necessity. I must
confess I have derived benefit from my resignation as my
residence on the Hill completely restored me and I then enjoy
excellent health ever since, I cannot help attributing this in
some measure to the placid manner in which my business
is now performed when compared with the hurry and bustle I
was obliged to be in when Supt. of the Garden.

I observe in the Calcutta Directory that you
are now "on Reputation" and that Charles Abel Esq. M.D. is
Acting Supt. of the Botanical Garden at Calcutta, this, in some
measure, accounts for not my hearing from you, though it
does not do away my curiosity to know I have not yet forgot
your ever valued favor.

I am at a loss to know how to act whether you
intend that I shall remain here, or return to Calcutta. If it
forwards, I never can do justice
found it from experience, I have no objection to take the Garden
again suited with some other situation which will allow
me more leisure to attend to the Garden. My sole aim is to
make myself useful in whatever situation I may be placed
and should you will it so, that I am to return to Calcutta,
go up the Country, or elsewhere, there can be no difficulty of
my giving up the School, at least no difficulty that I could
not be surrounded without giving offence I can get an inex-
- 9 * -
orable person to take my place if required. I am well
and assure that your prior claim to any poor services of mine

is sufficient to procure my enlargement from the School
not, strictly speaking, an employment
in the Noble Company's Service. The Company have a
claim upon my Services for nearly four years more, as I was
originally enlisted for 12 years, upwards of 8 of which are
expired. I mention this to shew you my exact situation, for
though I am an Artilleryman, not qualified to go to
war, except in name. I have never felt my Soldiership a
burthen to me, or I should long ere this have made an
application for my discharge; an application I am certain
to think would not have been ineffectual when I see
how easily the two Churches and many others obtained
theirs.

I have already informed you that my wish
was to be employed under you; you know what my Salary
has been here first 200 £.s latterly 150 £.s, in this very
expensive place not near equal to so many Places in
Bengal; I write from sad experience for I find it
hard living on 150 £.s per month, every thing is so very
high particularly since operations commenced at Rangpoor
all the Shipping which used to bring our Supplies being
taken up for that Service.

Muddan has still charge of the Garden on
a Salary of 30 £.s per month, since my resignation I
have not interfered with it, except in answering questions
which have been put to me concerning it, from an idea
that the Directors of the School or the Gov^{ty} may think
me officious. Muddan's Apprenticeship expires next month.
I have been a copy of that part of your letter relating to
the Orchids &c. &c. with which you desired to be
supplied and as they have been ready for some time I

Imagine she could * ^ 5 and them to Calcutta by the
j.'jE+*~S1**ftrjE- opportunity. I had commenced procuring them myself
when on the Hill until the Governors Military Secretary
(Lieut. Pearce) expressed his dissatisfaction to Huddell at
his allowing his men to be with me when I had resigned
the Garden.

My wife and children are quite well and
the former joins with me in offering you the most fervent
thanks for your generosity and kindness to Mrs. Church
*** ^_*** ^e^ cleared us from a weight of anxiety on her account.
How widely does your goodness extend! Not only ourselves
and children taste the effects of your benevolence, but an
Aged Mother and three Sisters in England
participate its influence. Pray do not think
me such a monster of ingratitude as
Calmly to think of these things and be guilty of neglect
or wilful error towards my best Benefactor.

I am,
Your most grateful, obedient
and devoted Servant
George Carter

Post Office Saharanpur
14th May 1825 -

My dear Bullard

I have mislaid the receipt I got
from the Post Office for your two letters: but
as I have written another, that it
will be here by another time, if not I will
send it tomorrow. I was glad to hear that

Henry had found the ~~part~~ ^{part} of ~~his~~ ^{his}
small. I hope you had been

at your father's all the while
Pelle which you were going to

investigate better advised, but concluded
you had succeeded by **y^y^y^y^y^y**

in bringing sympathetic speed
from top of head to end of Guts & letter
to end of Guts in time of need.
I feel much obliged by your kind

attention of the Guts. it is better a
long sitting posture, to have ones labours
approved by any one. but "is" is standard
standard" is truly justifying. I assumed

could not spare labour to make the Guts
so useful as I am in a scientific point
of view. some attempts you will know
remain in my hands. I enclose a letter

about the Bullheads & concerns about. The
letter you saw the other day, I am well and

of the necessity of it. I can therefore say what
you think proper of. it is nearly filled up
by the plants last brought down. if Government
should require an Indian Surgeon you must
to make out one. The Ballads also are

A—s < required. and as there are four
volumes. I am having always in view in writing
in manuscript. we cannot go on long
without the number being completed.

The official letter on my name open
for while remain at Delhi. when
I will enter fully into the subject of
give you all the information I can.
About the ^{Garden} subject. There is some

trouble to say getting better. her
fever is nearly gone well. She
however not been quite the thing since
you. but like a wise man have
taken medicine in time and now in
a fair way. Mr. Gurdale went with the
children towards the Hill yesterday. There is
expectation tomorrow as well as a better

df^<—*—^^- A?A--<i— . I would send you tomorrow
a good day - letter if - to you
has with the letter you is best. best to yourself

re - your kind
drop announced in

I have to offer my thanks for three packets
of seeds from Calcutta for which my brother
tells me I am indebted to you.

He has also informed me that seeds from
this country will be acceptable, and I send
you such as I thought to have immediately
at hand. I shall be happy to make
myself useful in this ^{^*a^r} if you will
have the goodness to print out the ^{|*^{*}S^{*}^?^{*}'^T-}
with descriptions of plants you are anxious
to obtain. I shall send in the return
the stems of our best cherries, Nectarines,

J. Hallack M. D.

London

peaches, Apples and some ^{other} ~~fruits~~ ^{of your orchard} ~~of~~
the name of your trees &c, and take the
chance of their proving acceptable -

I should be obliged if you could send me some
seeds of flowering shrubs of the East and of
the Northern parts of Asia which might
possibly bear the winter cold of this climate.

I am anxious to obtain the roots of the
Gloxinia superba or of any showy flowering
bulbs or tuberous roots which will bear so
long a winter, ^{*VS?*s^} if you can assist me in
this way I shall feel obliged -

Stay you to believe me
My dear Sir, very faithfully & respectfully

My dear Walter
I promised to visit you yesterday but
as usual am beyond my time. Enclosed send you
the letter of a man, whom as I have told you
before you will find an excellent fellow - I
have also written to him by rail, so that I hope
you will have no occasion to make a journey for
want of good. In looking over some of your
specimens I find 336? marked Duchenne's.
I have another numbered 336 is a Geranium.
I hope you a little trouble, if you like, I will
refer to my letters the names as at present
excuse the specimens you kindly give me.
It may save you some trouble, if I send you a
small bottle with warm water & ascertain the depth double
I will let you know, but it is of course to your
convenience. I have just recommenced with the 1st
Clap. but go on at the same time with my catalogue
which is now finished carried on to the end of the 17th Clap.
you shall have as much of it as may be ready by the
time you reach Calcutta, when you can do with it
what you like. In recommencing with the 1st Clap. I mean
to study more particularly the natural characters, & describe

My Dear Sir

I have to acknowledge the Receipt of kind Letters
and dispatches of the 10th Nov^r: last; and am at a loss how to express
the pleasure it gave me upon hearing of the Success which had
attended our labours on this side the water in packing of the
Great Tree, to hear of their arrival in such excellent condition,
and I assure you Sir it will always give me great pleasure
in making My self useful to Mankind as long as I am
spread in this world; and beg leave to return the Gentlemen
and you self My most grateful Thanks for the honor done
Me ~~by~~ the three Silver Medals and shall at all times
endeavour to ~~use~~ use it in any thing that the May Command
but even without that honor I should have selected and have
done the Medals with double pleasure & Confidence
having Succeeded so well in our last attempt; and shall
attend to your instructions in every respect, and doubt
not but our next cargo will be crown'd also with ^{the same} success

I am happy to hear that Capt^o Mc Keen is sharing
in the Honors by the Society he is an excellent Man
and appears to foster the views of his friends with pleasure
Should he sail at the proper season The Trees will be
shipped with him in preference to any others

I have now to offer you My best Thanks for 2 valuable
Chests of Plants & also 2 Boxes of Seeds favored by our Mutual
Kind friend Capt^m McKean which arrived in excellent condition
of the plants too were alive and appear to be doing well
the Seed were very fine & in excellent order; I wish it
were in My power to make a suitable return but at present
I have nothing worthy of sending

Yesterday I had the pleasure of taking
Captain Chapman of the Columbia N^o 3 of our
excellent friend Mr. Rascal work. Capt^m C. has offered to take
it under care & trust it will reach its destination in
good order and I think when you see it you will be
pleased; I am most happy to hear th^t you enjoy
good health & I pray that it, my continu-
is the sincerest wish of

Tehran - May 20 - 1875.

My dear Sir,

I had the pleasure of addressing you on the 9th when I made up a small box of seeds. The two boxes I now send will accompany the former one. They contain bulbs and tuberous roots, and I take my chance of their reaching you in a vegetating state. ^{yi *£<<e £t,} additional supply of any of the bulbs I ^{&C&C**} send ^{*&*&<&> ^ *} acceptable, in a communication your wishes they shall be forwarded.

all ^{*%£& ££^0&} found are the wild productions, ^{^ ^&&£<&ttZ} they, some ^{9^Z>Ji} improved by cultivation ^{-Ssec jte} my garden, ^{• S&eL} I have obtained them from high situations, but the more warm climate of the Capital seems to agree with them.

J. M. ...

227
Mr. [unclear]
They flower with us in the month of April
and the beginning of May. I find they succeed
better on ridges or borders where moisture reaches
them, than in beds which are irrigated.

I again request that you will obligingly
send me the roots of the *Gloriosa superba*,
and any flowering bulbs either natives
of India, of the Cape or of Europe which
you can spare

Believe me,
My dear Sir,

Very faithfully yours,

Henry Willock

Box of boxes sent to the care of Messrs

My Dear Wallace

Although I should know
where to find you in your wanderings, I write
these few lines, not because I have any
thing interesting to communicate but rather
from my desire that a correspondence
which has always afforded me much
satisfaction should not be discontinued. I
hope to hear from you that you have
had an agreeable and interesting trip
although I have not quite forgiven you
for paying to see our pleasant Province
without paying us a visit, we must not let
you off so easily next time. I send you
some specimens which were sent
to me by Tarrill who has been dephlegmated
with the snow. I am sure you would have
sympathized with me had you been here
on the 16th of this month, never did I witness
such a hail storm, the stones that fell
were all bigger than walnuts & I am
sure

I have some of them could not be less than a common on heads eggs immediately after the storm I went into the garden, but oh what a sad scene of devastation. The ... with leaves branches and fruit not a Peach or a plum left on any of the trees and of plumes I never saw a finer promise, the Grapes too which we have never before been able to produce here, were this season ... and promised a luxuriant crop not a single bunch however was left on the vines all the vegetables completely ...

Bristol 29th May 1825

recd. fr. Mr. Goldwyn's request
of the vulgar with an enclosure
of the 29th May 1825

I have the pleasure to acknowledge the
receipt of a parcel containing Garden Seeds: you were so
obliging as to send to my friend Mr. McDonald last
August; for which please to accept my best thanks — In
return, I beg to send you a small quantity of Seeds of
Perennial plants: trusting, you will find them to be in
conformity to the remark you made, in your note to Mr.
McDonald "that quality, and not quantity, was
desirable, in whatever Seeds might be sent you" —
I have therefore endeavoured to obtain, what are of the best
quality, and trust, they will prove to be so — Not
knowing, what kinds of

€*#&&w*/^\$&w0t^&e&\$^^

I have at a venture, sent a few different kinds on the
present occasion; but shall be glad, to be favoured with
a list of such, as you may require; and beg to say,
I shall use my best endeavours, to obtain them of the
best quality

I beg leave to transmit the accompanying
list, of <s£* <sXa*/~sb^sA. - and shall esteem it a
favour; by your selecting from it, whatever you may
be pleased to send me — and shall further be obliged

by your sending me a few offsets of the Crinum and
Panicratiums: instead of Seeds of these tribes (those offsets
to be put up in a parcel by themselves) Mr. Goldwyn
Surgeon of the Trading Ship Victory: will most readily
bring to England: whatever You may be pleased to send
to Mr. McDonald, for me —

I beg your acceptance of a couple of
Berkley Cheeses (which Mr. McDonald will oblige
me, by sending over to You) from their being put up
separately in Tin Cases, I trust they will be found, to
be in a high state of preservation — (They will
require to be kept in a cool place, for 3 or 4 days, previous
to the Tin Case being opened) —

I am Sir

Your Obedt Serv^t

J. A. Stanbury

R. Wallich Esq^r M.D.

Kidnapore 7th June 1825

My Dear Sir

I had the pleasure of receiving a letter from home on 5th inst. of date the 4th of November wh^{ch} is a most interesting one of those which I received on the 10th May of which I gave you all the news in my last. There is nothing new in this one which is from my father. he says "Let Mr & Mrs Wallis know that George enjoys excellent health - is an universal favourite, he is fond of play, & his memory is not retentive, but these defects are compensated for, by a quickness of parts, & his incessant activity."

Andrew & he begin to sport admirably with their companions, altho' perfectly contrary to each other. We hear frequently from Miss Wallis & Mrs Collins they are well.

He begs to be most kindly remembered to you & Mrs Wallis, to whom I hope he has already had it in his power to return some attention for the many

Admiral G. S. Scarborough

London 1788

My dear Sir
{ I received your letter of the 27th inst. & was glad to hear that you were still in the country

for the long promised letter. I had to be a
your satisfaction as far as I could at least I
had mentioned every thing that I thought would
be useful without mentioning the letter too long
and might perhaps have been said by the messenger
that the Garden was in the same manner as before
besides the great heat & drought, there was much
frost. There was not one single dried specimen
from the appearance of a flower that I had of
the little plants which I had sent you in the
last year as you see. I only send you the plants for
the little plants which I had sent you in the
last year by your own garden but the plants
I had sent you of the same kind by your own
garden. As I find that you will be in the
country. The state of the Garden you have
seen, as well as my Herb garden & I think
I myself would say that you think just &
proper in the subject. For the same reason
you have already stated. I am, Sir,
The first duty is to be of the same kind as the letter
to the writing of the present word find
to be an excellent opportunity for my writing

in my former efforts. I should however rather expect
your kind assistance before. I am sure that
the present occasion will not be accepted for one
likely to be successful. I am sure, a who would
make his use of some extended opportunities
particularly as you would be well advised, that
my own having a paper for Boston & the town
is one of its branches. is 4sZ ^ ^ to allow
to his efforts, a learned man in different ways
to become better informed. I am of the opinion
that with our it is better if we attempt to do the
Garden would not, for would rather, indeed have got
a small, while there have been many things
by medical doctors. I am very therefore depend
that if the you succeed in such. I shall feel
equally grateful to Mr. d. but if you do offend
a relief or separation. I will pledge myself
that every means shall be striven to make
the opportunity <£ ^y ^ 0 ^ 1 ^ X

entitled to be as Mr. Allen advised to show him
 his the best way, my charge would be
 some part of the due of the Government
 do not at deduction would make for a difference
 you must not therefore mention it as part
 of my allowance, as I would subject me
 to the to a disadvantage, but as my
 appointment is for 500 rufes a month nearly
 without the 100. I do not think they can
 do less than give me 500 rufes a month.

I might expect it in the following way
 by a list of my expenses -

by a list of my expenses -	400
by a list of my expenses -	200
by a list of my expenses -	180
by a list of my expenses -	780
by a list of my expenses -	50
by a list of my expenses -	830

I am sorry that the King is doing every thing
 of the Government as indicated, if they should
 do before they will do nothing - and as I have
 the project that - you should be seen
 the state of the country. I would expect
 the more the more of the things to be done
 in the way of the actual expenses - but as it is
 before a month. This would be the same for
 the 15 - 20 extra months. The only thing I could

2
Miss Chas. M. S. K.

June 22nd 1825

This letter - my dear Friend - is mainly
to say that I have delivered to Cap^t. Worthington
of the name a box containing two living
roots of the Columbo - which I trust will
flourish with you - I have one in my
garden now in flower - & have several
more roots among which - it is probable
that the different sexes may exist - the
one that has flowered with me is the male
plant - & very like the picture which
you sent down - but the leaves much
larger - I shall continue [^] ₋ [^] 3f forward
roots to you by every good occasion
till I am assured that the plant may
be considered as certainly living with
you - Cap^t. Owen is the officer to
whom we are indebted for this valuable

gift - he has sent all his vegetable
treasures to me - & I shall very gladly
divide them with you - there are several
new Genera - & a very great number
of new Species - many of them doing
very well in my gardens -

If you can spare a moment to say
that you are well - & pursuing with
ardour the delightful science whose
bounds you have so much enlarged - I
shall be much gratified - Pray offer
my respects to your lady altho' unknown.
I believe me ever most truly &c

affectionately yours
J. Fair

Mr Bojer the German botanist is with
me - & we are busy in an extensive

Wells, Garden 4th July 1865.

My dear Wallcut

Your several letters remain unanswered.

I know not why, unless it be that they were generally
sent to my mother, as however each requires to be
replied in some subject or other. I will take them
privately. That of the 10th June I am afraid is
mine informing you of my having written to one of
Dr. Don's staff is first in order. I have not yet
had a reply or any notice taken of my letter.
I sent Mr. Anderson, who writes me that he delivered
it to Dr. Don. I am sure when the General sends the
Herts shall be delivered.

With respect to the Agave
Wallcutian I am really sorry that you have
already described it, as it will deprive me
of the pleasure of naming it after you. That which
I have found in the same, is probably the same
with my plant, as this is certainly one found
in New Hill, I have but introduced into the B. G.
from the neighbourhood of James Potatoes
Garden. I am quite at a loss how to name it.

with respect to plants brought down from the hills
Many of them are new, many must have
been seen, named, & described by you. but
as it is utterly impossible for me to ^{discover} ~~ascertain~~
what is absolutely new, for what has already
been noted ^{*****} $\leq \text{Er} \leq \text{E} - \wedge$ on. I must go on as I have
before, in naming & describing whatever I cannot
find described in books. When you send me
Delandalli Prodomus. I shall then I shall
to send most of $\wedge \wedge 7 \wedge : * \text{SL} + \wedge \text{---} (?)$ your
impressions. whatever has been previously dis-
covered. In course shall not get the merit of
I if my descriptions are known to have
of being quoted. it must be with that of the
original discoverer. My name added as a
synonym. But unless I do this. Plants will
come in ^{^27 " * £ / j} out of flower without being
left the slightest $** \rightarrow f / \wedge$ characters.
As you go on with the other indices you will have
with opportunities of settling the claims of others
Among hundreds of years, you will have to

... of your health ...
happy to find that the discovery of the ...
is ... is interesting. ...
... you ... of ...
... the ... process ...
... as well as some other things
... in my mind's eye. I shall feel much
pleased by your mention of the subject to the
Medical Society if you think it worth while.
It is hardly worth writing a paper about.

ZsLL^ of as I have at least a dozen subjects
about which I might have written. I
have been looking over my

ZSZZZ^L^ ^4c-^r

... which appears of an interesting
nature. I have appended the habitate, the therm
... in medicine by the natives, a short
note respecting the nature of their medical
visions, the diseases in which they are used
& the doses given by the natives. With any
other notes respecting what appears interesting.
This for instance of the ...
I have added the English, ... names

She added the Persian, which I do not find
mentioned in any of the Books, except - Persian
one and Protein India which I have lately
found. after this she mentioned that it is
cultivated in the Hills, whence it is brought down
to the Plains for sale - describing the mode in
which the Hill people prepare the sorb (dried
ginger) she concluded the whole with a short notice
of the medical virtues, with the diseases in which the
virtues given administered it both externally & internally
This I have done with three plants I know, one
from in the Garden, but have not yet got beyond
the first leaf - To get **jfc- sZr^^:** will take
up an immense deal of time, but I think
it might be presented to the Medical Society
as the leaves are finished; or I should do
to publish in their next volume, in their
notices, second? like. I fully intended to include
any information obtained respecting medical
plants. such for instance as the Green.
Will you present the papers to the Society
of any plants that you have already discovered
which I may have considered new, you can claim
as your own in a note - let me have a reply to this

4
your account of the Topic would certainly make
me take the first opportunity of visiting it if I had not
already determined upon so doing. It must be one
of the wonders of the world.

I am very much pleased that
you officers of the High Commission of the public letter
and High Commission will be inclined to do the same
and afford some relief to a distressed & anxious
I shall really go into the heart of San Francisco
another year for visiting the hills. we have
had people saying they have a dozen or there
being to the poor since you left. I believe what
duty it is, we cannot take - that towards
them. if I cannot get away in any other way.
I shall apply for a month's leave of absence for
go to visit my wife. I am to be satisfied with the double
venture of medical duties, of course the accumulation
of reports to the requisition of knowledge respecting
the most interesting hills in the world. I have
I have been publishing in the Physical Geography
of the History of the Alps. I will
send you ^{official} copies of the letter you want, but you
have copies in your journal of them. I would

human power. The absolute necessity of sending them
is with my letter. Because I do not think the
Medical duties alone too much for one man, but
quite enough to occupy any one man's time, such
as much as was formerly considered sufficient to
occupy two men. ~~When~~ ^{When} the Botanic Garden
was not thought of. But when you take into considera-
tion that beside Medical duty more than enough
for one man, I must the Garden to look after, plants
to describe, the Hills to visit. The thing really appears
impossible. That an enlightened Government should
expect any to be well done. The first relief is
Political Economy, demonstrate the advantages of the
^{division of} labour. So far as I am anxious to give up the
practice of my profession that I really consider
myself ^{as} making a great sacrifice in giving
up of its practice for me so that a period
for as long as I can the profession, then it
is my purpose to earn a livelihood if not an wide
pardon in any of the world. but as I cannot
do both. I must give up one, that my time &
attention may be fully occupied with the other.
The letter however shall be sent. that the Government
may not have the vestige of an excuse for declining to assist

along with the copy of the letter. I will send you, the
reports of the Hospital. There shall meet your arrival in
Colchester. The average number of 24 in the left in
the Hospital, as the 1/2 of many months is 50. I have
admitted during long months. Is that I have always
had an average during the month 86 patients under
my care, independent of the women & children. I have
present I have the two letters

kS

^J^~ iS*-< * ^ - ^ 4-^p/L I of the smaller informed &
suffering. Mr. Lewis ill for being in family.
Dr. Green '^~&*»£sJ^S. as well as Mr. Hollows.

I have visited I have Mr. Douce of the 4th. Cavalry
with me, as well as McDonnell with a small
attack of distemper. This has frightened him
so much that he is determined to go home.
So I suppose you will soon see him in Colchester.

/T s?

Your letter for Lewis I received last night. It
expresses to your description several things to
I hope for. I am glad to hear that Government
has sanctioned all my requests. The Conservatory
is now half finished. Many plants have come into
flower, one I think a new Genus is obtained
this however now by & by. The rains have

f

hardly commenced here yet. We had our usual
show on the 25th. Since then it has become very
hot again. I have been obliged to recommence
watering the Garden - My best wishes to you
and happy to hear of the good health of
your sister & family. Write please then kind regards as
also to Mrs. Wallcut. Mine too.

Believe me

My dear Wallcut

Yr. very sincere

C. O. BLUME, Docteur en médecine,
Commissaire pour le service de santé
civil dans les possessions de S. M.
le Roi des Pays-Bas aux Indes Orientales,
Directeur du jardin des plantes à
Buitenzorg, (Ile de Java),
chargé de recherches botaniques, etc.

M. le Docteur Wallich,
Superintendant du jardin
Botanique à Plautta.

Ayant fait depuis plusieurs années ma principale, je pourrais
dire ma plus chère étude des productions végétales de ces pays,
et particulièrement de l'Ile de Java, dont j'ai parcouru une
grande partie, j'ai eu la satisfaction de voir mes recherches cou-
ronnées d'un succès assez heureux.

Cependant les peines et les fatigues qui accompagnent de telles
recherches dans ces contrées éloignées et peu connues, ont nécessairement
eu nuire à ma santé, et m'ont exposé plus d'une fois au

dan-

danger de succomber sous l'influence pernicieuse du climat,
sans que j'eusse auparavant pu rendre compte de mes travaux.

Cette considération m'a déterminé à la publication d'un esquisse
préliminaire de mes observations botaniques, dont j'ai l'honneur
de vous présenter la *Jeune Illustration*.

Les connaisseurs trouveront sans doute que mon travail n'est
pas exempt de défauts; toutefois, privé, comme je le suis, des
lumières que répandent sur la science botanique les ouvrages qui
de jour en jour se publient en Europe, — seul abandonné à moi-
même pour mes travaux, j'ose présenter à quelque indulgence de la
part des critiques.

Au reste, tous les éclaircissemens qu'en voudra bien me donner
sur les matières que je traite serent reçus avec reconnaissance. En ré-
compense je m'empresserai de fournir aux amateurs tous les détails
qui ils pourraient me demander sur les divers objets de l'histoire
naturelle de ces pays.

BUSSEKROON, le 4 Janvier, 1777.

Dear Sir

I have the pleasure to inform you that I received last April a box of seeds through the politeness of Dr Coates which you had the goodness to send to me & for which I consider myself much obligated.

I am glad to be able through the medium of Reuben Davis the corresponding Secretary of The Academy of Natural Sciences of Philadelphia to send you a number of seeds of herbaceous plants from my Garden at The University of Pennsylvania; the names of which you will find on the back of each package

I am extremely sorry that but few of the seeds which you sent have as vegetated with me. — I sent some time ago a box of Plants & seeds by Dr Green a Surgeon in a vessel bound

to Calcutta of which I received no answer whether
you had received them or whether they had however
or not — I believe at that time you were
travelling in Agra —

I should be happy to receive from you
at any time any communication or drafts or bills
which you could send — & at the same time to get
to possess any thing in my possession or power —

I am Dear Sir

Your obedient Servant

William Dick

St Anne's Garden at the

University of Bombay

by W. Blackie.

For Mr. Blackie
Director of the Botanic Garden
at Calcutta

My dear Walsworth

I was under the mistake
of my old memory. Even and agree when I saw
your letter of the 19th I thought you had been
some what of thought upon for your country
I am still an invalid and can only
write you a few lines. You have mis-
understood me about the Flora Sabina which
which I had the pleasure of receiving and thinking
you far about a year ago. What I was apprehensive
about being understood on the road and the
1st fascicle of your Flora Republicana which
I had you kindly wrote to me just before you
started from Cambridge with other respects
to about to be republished by Mr. Humphrey &
I forgot to do so. I am now thanking you for some
out of kindness, accept now of my most grateful
acknowledgement for your kind intention
of sending me a portion of the expected second
number of your Flora Republicana, this will be
a great treasure to me. The plants you
were so kind as make over to me at Boston
are now flourishing at Ottawa. I hope so
to see them very soon safe in my own
Garden. I was glad of continuing of them
on so long a journey in the hot weather.

While he was happy to find the
pleasure of going. About 15 hours with
journey to the backland. How
happy he could get back seeing
the house at this season. You must
never then short or confused with
Lady & join me in kind regards.

Believe me ever most sincerely
Yours

Wm. C. C. C. C. C.

12th July 1835

My dear Mr. B. B. B.
I am greatly obliged
at your promise in my recent correspondence
of plants which under the good care
of Robert Plunkworth will have a fair chance
of reaching our hills in good preservation
in regard to selection. I think I cannot be
better than to give over your list to
your judgment. However as being things so
valuable that puts me in mind of my
own dear Country I must mention I will
begin with my English flowering shrubs. This will
be a most favourable opportunity of getting up
the plants now at Patna & with your permission
I shall write to Lady Chyly to make them over
to Robert if you will be so kind as desire him
to report his arrival at Patna to Lady Dr. B. B.
whom I desire favor me with a list of
such plants as you wish to have sent down
by the returning boat that I may endeavor
to have them ready for despatch and that
they may be ready at Buxley you had
better direct Plunkworth to report progress
to me. As my Mother in law Lady
Colvin may likely have some package
of Books to send up for me, I shall
soon

social myself of you - friendly heart
and desire know to ;*... take any such
you to you, to come by this opportunity
I am still an invalid but am getting
well & hope soon to be quite stout
again. I see the ^{re}... & sometimes
desires to have some of the seed
of the "Penny" f "I" but I **Jt,**
must have bailed all he sent us, you
I have not heard of its having vegetated
any where, I found it in various
parts of the ^{^^+*} ... at different
seasons but n ll without success
but ^{<r-} that your sent one. Trade
got ^{oi^} ^{<%} supply direct of ^{»-~*-} ...
When ^{*i-} we we to be ^{Ml <v <} our long look
for Steamship. I hope very soon
& that it will bring your account
and happy tidings from home.
I hope this may reach you at
Petra, although I fancy you will
go at a great rate down the river
at this season, should I be so
fortunate as catch you ^{^ ^} ...
place

Please bring my kind regards
to your mother & my wife join me
in every good wish for you
and yours - Love believe me

My dear Sir,

From the letters received at
different times, ^{lately} from Mr. Manly
I should suppose that the Plantation
is getting on very well; but I have
no particular date to refer to, as
I always send Mr. M's letters immediately
in their envelope; 7T jfc"0i8. Mr. Manly
has planted out a great number of
young plants this season; and which
6 says look very well. The only
unfavorable account he has sent
me was some time ago, that the
berries of the fruiting plants had
turned somewhat yellow; this

also was the case with the plants
here in our garden, but which I
think was occasioned by their being
so very full of fruit.

I am almost afraid that
I have not done exactly what
Dr Wallis wished me, respecting
the correspondence with Mr. Manly,
and that it has caused Mr. Gordon
unnecessary trouble - I hope most
sincerely that my surmise is wrong.
However, I have always answered
Mr. W's letters when he required
any-thing; or wished for my
advice.

I explain any-thing further,

I shall be very happy to
see you in Calcutta

Yours very sincerely

J. P. M.

John

James Mackintosh

George Matthews

Saturday August 17 1875

My dear Dr. Hooker -

During my journey through the Pyrenees, I have been very successful in my search for some of the plants which you have been desirous of. I have secured a small packet of them.

This plant flourishes in the **£** hills between **^3 ^co^c ^** Medakha **a^iU <y%v-*^** - A on the **is** from Thury to Stefan. The plants were in **r** vegetation, when I passed by those **</fa>l,iLs,** places in June last, which presented the **0 ^t^T^X^L^** probability of success. This production is perennial and from the varied heights of the plants from the first seedlings to

to the largest size it requires, I should sup^{ξ*^}
4VS or six years for their full and mature growth.
On the commencement the plant begins to
sprout from the roots. Its first appearance
is that of an equal cluster of leaves^{w^sc} the
middle of which springs a vigorous stem
^ 7^4* edged into joints of about *J A- feet long
&*LA after a growth of four or five feet, it
throws out various branches which flower
and produce seed. Neither the stem or branches
have any $\langle u^{\wedge}, \wedge / _ \rangle$ Its complete height is
4^L at seven feet; circumference three $\wedge _ \wedge$
inches, the $i^{\wedge}v$ is fibrous; the
which when it is divided by a
yZ from it is a thick milky liquor. On the
approach of winter, the plant withers to
the

wether to the ground. Some of them have
two stems. The gum forces its way
through the skin of the stem; collects at the
joints and then mostly falls to the ground.
It drops also from the leaves and smaller
branches. Many of the leaves bear small
drops of the gum on their surface. At
Midekhar the gum is chiefly collected.
The plant grows in the enclosures of that
village more vigorously, and in greater quantities
than in any other tract, - and the peasants
in August or September go out in parties
to gather the gum, which lies on the
ground, or is still attached to the plant.
It undergoes no preparation, and is exported
in its natural state. The plain of
Midekhar is open, and

• e-dafiC

The climate is very cold in winter, and very hot in summer - The soil, stony, and calcareous mixed with an acid of iron. During the summer the plain is parched up, and the moisture of all vegetable matter as the heat concludes is completely exhausted -

The people of Fydekhart say - that the quantity of Gum produced depends chiefly upon the winter and spring falls of snow and rain. After dry seasons but a very small portion is collected -

Wish, that I had been either a draftsman or Botanist, to have described to you this curious plant, in proper technical terms, or to have given you a sketch of it. I should then have saved you the trouble of perusing this clumsy description of it.

It is some time since I visited King's
Camp, and my father's tent was pitched
I was happy to spend myself at
along a journey. Having taken
to recently, I highly appreciate the climate
of Peru. We are here in the enjoyment
of perfect health, entirely free from that
latitude of mind and body which deprives
the inhabitants.

I hope your last trip
passed

My visits to the Botanical garden
and the pleasant hours, I passed there
from your kindness and hospitality
I shall long remember -
Offer my best regards to
our

our friend Mr. Calder - and with best
wishes,

Believe me to be -

D. L.

Yours most sincerely

George Willock -

My brother begs you
and to his regards -

17
- 825

Enclosed, are seeds of wild flowers and
shrubs collected at Sattamuck - It is pro-
-bable that they may not prove worthy
your care and attention.

The leaf of the bushy plant is sketched
by my friend's pen, and may give you
some idea of it - The leaf-stems present
itself-attached to the stem, near the root.

Leaf of *Amorpha canescens* Plant. Circular on Birch
Geo. Willbark. Lib. of 17th Aug. 1925

Dr Wallis

Glasgow Botanic Garden
Sept. 1st 1825

Dear Sir

As our Friend Capt. MacGill of
the *Osprey* (who carries me) will be returning
at a favourable season of the year for
tropical plants arriving in this country &
As we have heard that ^{rf&^<--} have lately
been in the Interior & Napae Mountains, &
I request a small part of the treasures
you may have to spare for our Institution
which from its Provincial situation stands
much in need of such kind benefactors
of the Parasitical Orchideous plants as
have arrived safe from India are so very
interesting that a few others of any that are
plenty with you would be very desirable
but indeed any thing in the way of plants
or seeds which you may be pleased to
spare us will be accepted & therefore
I shall not presume to enumerate

Dr Hooker is at present out of Town but
is well & has finished his labours in the
Cleft room for the season. Your kind remem-
-brance of us will much oblige Sir
Your M^o. Oct. 20th 1825

W^h
I have then this for my own benefit, the 2^d of
the receipt of your letter, in the evening of
the 1st of May when my sister met with what we
call a slight cold, which probably originated in her having
been led by going on with her letter. In the
evening the doctor advised me to give her
4000 grains then returned, while near the water
to come down from the doctor's house, with
a flag out of the window however - the
cold, but my sister must think her head
and must be cured, as well as the chest, for
the chest of the shoulder fractured. In
suppose some attempt to be made to be brought
to the point, perhaps to walk to the summit of
the great peak of difficulty. This however
is very considerably advised - but the pain is
not so severe as it was. The chest is
not still now, but the breathing was
difficult the cold has no perfect
check. Every thing is however now doing
well, she feels pretty comfortable, except
the however the bandage I applied to
the chest is not so tight as it was
as well as one now in place of the
has not been able to maintain the same, as the
time not improved, but there is nothing particularly
dang...

but you must not conclude that any observation
is rapidly made. My position is that light

Asplenium *laevigatum* (L.) Presl. *Ph. Indica*. 11. p. 487. You
 find this fern in abundance in the various parts of the
 mountains and valleys, which appears to
 be *laevigatum* you find in the mountains. *
 It is *laevigatum*. *laevigatum* *laevigatum* *laevigatum*
 is a distinct species. As I think that the same
 plant has a flower, indeed it has in the
 mountains of the mountains. As I think that
 it is a distinct species from *laevigatum*. I have indicated
 the name of *laevigatum* in the name of *laevigatum*.
 It is a very distinct fern from *laevigatum*.
 It will perhaps be as well to give you a detailed
 description of the plant. That you may
 if you think proper. The plant was in the garden
 here introduced from the mountains and which has
 been plentiful about a half like the
 ferns you find in the mountains. They
 are 2 or 3 feet in height with several stems arising from
 the same root. These stems are about the thickness of
 little fingers, round, eight furrowed, jointed
 swelling considerably above each joint. The edges
 of some parts of the stem are rounded like those of the
 upper parts slightly being expanded at the joints. The

Spills now into the heavy brown water
Vol. II. p. 458 to 464. Biscayan and Biscayan

The opposite one is simpler. It is more or less the
leaf consisting of the pair of narrow leaflets which
is long, all are parallel. Some other, consisting of
chiefly broadly lanceolate, some narrower, parallel, terminating
in the direction of the margin, having the distance of space
and with short rough hairs on the lower and upper
as the upper surface, the principal ***^~~">—ft**
then at the same angle as they themselves form with
the midrib. ~~Other~~ ~~the~~ ~~margin~~ ~~parallel~~, being
occasionally into three pairs off by the root near

It would perhaps be more correct to call the leaflets
oblong-ovate, as the bases of most are chiefly cordate.
The parallel parallel have their upper surface shagreened
simple, the under shagreened like the others, both pubescent
with the hair scarcely obvious on the edges of the
leaf. The inflexure is a lyrate incisely
principal branch the first division parallel opposite
It is terminal together with a leaf, from the upper
base of petiole of which it seems to arise.

The Quercus are ovate, obovate, oblong or cordate
lanceolate with their margins wavy down the leaf parallel
as in L. crispus. have the ultimate petioles and margin
same way as the previous ones.

The leaf is oblong, 5 toothed, shagreened, short

My dear Saheb

Many thanks for your

kind note received a few days ago.

Your communication is highly gratifying

to me, and I really feel very grateful

for your kind exertions to furnish me

with such valuable stores from your

delightful Garden. Under the good care

of Blankworth this despatch I have no doubt

will be more successful than the last.

The greater part of ^{it} reached me in

a dead or dying state, a few of the plants

are still flourishing, and amongst them

one which I greatly prize, a beautiful

English Apple. I have grafted some ^{into buds}

on our wild hill stock. But I have no

time to day to say more, - Indeed I write

chiefly to give cover to the enclosed which

may be so kind as never to be given

to

To Blankenship or sent after him if he has
left you - Lady bigness me in kind regards
Ever Believe me most affectionately

Abigail Johnson

My dear Mallick

I was this morning
blessed with yours of the 14th Oct.
& its enclosed wh^{ch} you may
believe I was longing for. It is
I think older than yours from
Miss Mallick being of the 30th
April. 257 from my Mother
She says "I am at present living
Almost the life of a hermit
The Gr^{and} & Margaret embarked
for London on the 5th Inst.
& Mary, George, & Andrew have
been my only companions since
& very interesting companions I
must acknowledge. They are
most affectionate. They are
All

all pursuing their various
branches of study with great
zeal & I trust with satisfactory
improvement—

They had just received
mine of the 12th November from
Barrackpore enclosed in yours
to which I hope you received
an answer, otherwise you must
have one in some of these ships
just arrived. My Mother gives
little of the home news, but refers
me to Margarets letters wh^{ch} must
be convincing. I am glad to hear
that Miss Wallick is perfectly
well, & hope Mrs Wallick
will go to Aberdeen & *-<&&rj£
she may be induced then to
take up her abode there wh^{ch}
would be a great comfort to my
Mother.

& I think pleasant to all parties
do tip me a stave now & then
when you have leisure, I feel
quite solitary here when I have
no letters. please to give my
best respects to Cantor & Mr
Calden. I believe me ever

My dear Wallick
Yours most truly

King's College 22 Sept 1842

It is with the greatest pleasure that
I have advantage of your kind
letter of the 14th inst. in which
you have been so kind as to
write me a few lines
concerning the matter which
I have afterwards explained
at length to you in
the enclosed. I heartily congratulate
the family for your kind reception of our dear
child. your friendly care of him is subservient to your
truly paternal interest. I am glad to hear that he is
well & happy. My desire is that he should be
able to give his own account of all that has
happened to him since he left home.

The kind remembrance of our business to expect
visit from your dear wife & children. I was prepared
to receive them into the bosom of our family with
the utmost joy & pleasure so beloved & cherished
quarters and as I wish to see our daughter Mary to be
in London in the course of the season. they planned it so as
to visit the friends of our families & expect several

with the view of contributing to their comfort in the
 land of strangers & of facilitating their progress
 The ship did not arrive so soon as was expected &
 as Dr. Joske's presence was required here in his official
 capacity, certain day his departure became neces-
 sary, but he left enough to pay £*** < * out & accompany
 you home. — you of course know the rest long ago.
 we were disappointed in not having an opportunity
 of returning to your dear family the kindness you
 have shown to ours. I hope I doubt not that they
 found kind friends in England & enjoyed A4*^A
 and I trust they are by this time safely arrived at
 the A^ad of your Father's & lodged in your Paternal
 home where I am sure, if warm & genuine kindness
 can confer happiness, they must enjoy every comfort.
 your father's severe winter suffered much occasioned
 trouble in consequence of getting very plain, I doubtless
 all well & kindly men, but with less love at your
 side * < 9f**^, x : ^i carried in carrying me
 executing your plan of helping the kind hearts of
 your Parents with the society of your family during
 the winter i^ti — give dear yours, I must close, as I have

with his mother & family in good cheer & contentment on
East they in deep glee & spirit to his home & the
health of his second Parents for my dear Sir, he is
the child of our love allmost as our own offspring
and you may depend on it that every thing is done
for his benefit & improvement with equal zeal
as for the most human fine talents but his lively and
impetuous make study rather irksome to him beyond just
the regular lessons & perhaps it is better at his early
period of life to allow a good deal of freedom to the
development of the mental & corporeal powers
in the active mode to which nature points in the
necessity of cases. may your judges are of that
opinion & for my own part I am their disciple
long since George has a fine ear & taste for music
& we shall attend to your instructions & make him
learn to perform in some musical instrument soon.

I shall hint to you although it is not yet determined
that we have some thoughts of sending Andrew and
George away for six or perhaps twelve months under
the tuition of a very eminent scholar who is at the
same time a particular friend of this family & with
whom Andrew spent the summer that George was in York shire.

...manifest improvement, this volume is not yet
and depends upon circumstances which we cannot say
but I think it right to let you have every
circumstance relating to your dear boy; you have
been to us with undiminished confidence & we feel the
charge a sacred one. — I enclose two sweet little
your dear George's unaided & unprompted effort in
fact. I am sure you will also receive with pleasure
a few stanzas inscribed to the memory of your
departed friend & written by his sister Mary Ann the
wed anniversary of the day that bereaved his
family of their dearest hope. May I beg that you
will have the goodness to send a copy to Mrs. W.
the accompanying letter. I wish to express
his best regards to you in which all of the family
unite with. My dear Sir your very affec^t friend
of H. J. P. P.

J. W. Walsh
Port Land, Calcutta

My Dear Publick

I received yours
of the 24th Inst, & immediately
sent the letter in question
to the post office, here, but they
also charged it double, so I sent
back for it immediately, & went
down to my friend the City
office, to look for the Dutch regula-
tions. — I find there that
letters are not charged by the
sheet but by the weight, all
above one Sicca Ropic weight

being charged double, I weigh
the said letter & find that it weighs
more than one piece Paper weight.

I therefore think it is needless to
JZC**^-'ifc. - at the it is only one large
sheet. - The last letter you sent

me was from my father of the
3rd May from London, & « « c isZ***-'-'

they had no accounts of the
Sir James Scott, he was remain

ing in London in hopes of
meeting Mr. Wallich on his arrival

& assisting her in forming her
plan of future operation, & perhaps

says he, of having the pleasure of
conducting her to Aberdeen. Miss

Wallich was well, my father
says he has seen Sir Stamford

Raffles & Sir Wilson all well

Present my best Compliments
to my good friend Carter,
who has not tipped me a
stone for a long time &
believe me ever
Yours Truly

Alfred Jackson

1855

Catmandoo
Sept - 28th

My dear L W Chick,

What is become of the
Cassid whom you sent hitherward
some months ago with Cigars?
He has not made ^{*f} his appearance!
Not that ^{J>} I mean by this question
to invite you to another present,
(for I have lots of Cigars by me
/ ^{t € ** Ut} just) but simply to let you
know the fact.

And now let me state a little
matter to you ~~in~~ in confi-
dence. You are, I guess, tolerably
familiar with a certain Dr. Abel.
Does your familiarity with him go
the length of enabling you to get
at a "small piece of his mind"
without a formal application to
it? If so, you will oblige me,
by endeavouring, in such way as
you think best, to discover what
the said Dr. Abel means by not
following out that plan for
obtaining beasts &c from these

Hills, which he zealously adopted
at my recommendation in the
early part of this year?

The time is now come for prepa-
-ration, & for sending up his
folks - but not a line does he
write - nor has written during
the past 4 months, altho' he
had previously been commu-
-nicative enough.

His silence is the more odd be-
-cause in the interim I have
sent him sundry skins, & also,
two long letters - one containing
such scraps of information as
I could pick up here about
the animals peculiar to these
parts - & another, describing
the Chiros, which was brought
to us alive & died ~~some~~ after.

Does he find these letters full
of nonsense - & is afraid to tell
me so lest he hurt my vanity?
Good man! he need have no such
scruples: for zoology is no

part of my ambition. & I am
utterly unacquainted with the subject.
& I sent him my lectures
merely to satisfy his apparent
longing. & to show that I was
willing to be aiding & assistant
to him. but at the same time
attached not a moment's concern
to them, & desired him to consign
them unhesitatingly to Cloacina
if, as was **< &-£ 7*t3^ At. over**
good for nothing.

Should therefore his reserve ori-
ginate in such a delicacy as
is here supposed, it is ludicrously
superfluous. & I should be
happy to hear that my letters
afforded him food for laughter at
my mistakes.

Again, Dr Abel has I believe
exchanged letters with Gardner,
& in his letter to J. may have
mentioned the **/L**y^^4 />CO**
encouraged of sending up
men here to **JEL^EE *?/ £-^** re animals.
Now I, knowing J's hesitations
upon the whole of this subject,
whether in small cases or great,

never said a word to him of the
plan I proposed for ^{^*} ^jnu.4: : ^y
Gardner may therefore have
been startled with ^o If /L^E., y^t^Z^A
of the plan, & have gently insi-
-mated difficulties. Difficulties
which Dr A. may think he ought
to have heard of from me, in the
original instance. This too is
only a guess of mine - but if it
be true - & you can indirectly
hear as much from Dr Abel!
you might, in a light & careless
way, & as coming from yourself!
tell him, that this too is a mere
bugbear. All natives may
come up here; & they were na-
-tives whom I supposed Dr A.
mean **Z &** send - or if he had,
when matters began to ripen,
stated a wish to send up an Euro-
-pean, & stated that wish to me,
I should, of course, have consulted
Gardner - but meantime the
plan, imperfect as it was, then,
contemplated sending only natives -
nor is there any reason why

such should not yet come in the
capacity, as it were, of servants of
mine - supposing Dr A - still
inclined to the ~~in~~ ^{fi-^t-^C-^z-tf-* ^} ~~subject~~
Here then are two conjectures of
mine touching the cause of Dr Abel's
silence - rather abruptly taken
up, after his frequent epistles
during the early part of ~~last~~ this
year. If you are on easy terms
with Dr A - you can perhaps,
without mentioning this letter,
~~draw~~ draw out of him - the simple
fact - what his past silence
means? & what his future in-
tentions be?

Like Knough, however, his silence
has merely proceeded from business,
or ~~positive~~ amusements of another
sort - & so means nothing - in which
case, you should not let him
have an inkling of this letter, on any
accounts - but still you might
say, as from yourself, that (in
regard to his future intention to
prosecute the plan of sending folks
up here) you had heard he meant
to send up a native or two to cure,
& kill, beasts; & that if he was
still bent on that plan, the

time was now come. I don't how
ever propose to indulge the gentle
man in his caprices. if he be
subject to such. I would not have

Reply 24th Nov
1829!

Sir!

Some time since I perused in my mind with pleasure the
— » v
way, in which you strive to enrich the field of botanical Science
both by valuable publications and by communication

of getting a more correct knowledge of the east India flora, I
take the liberty of tell you, how much I should feel gratified if you
would in a similar way assist me in this purpose. But a few
years ago I returned from a visit to the

f*****

exploring a last part of the country from
Rio de Janeiro to the River Amazonas, and at present I am occu-
pied in publishing the fruits of my researches, of which one
is in large folio treating on the Palms of Brazil with 103 plates
an other containing different new genera of pon 100 plates
& the & it volume of the narrative (which
was translated in english) made their appearance. I should

consider it as a favour, if You would accept of a copy of these different
publications in exchange of a collection of east-India plants, especially
of such which are not yet cultivated in our gardens; of ^{several} Palms of every
description and of the new genera found by You in the hitherto
explored mountains of India, Nepal, Ceylon, Malabar. The
Palms I make a chief object of view, being about to publish in the
last number of my Genera et Species Palmarum Brasiliensium
a general view of the whole tribe, the characteristics of all the
genera, their distribution over this globe, the remains of Palms for-
merly existing in different countries, of their anatomy and physi-
ology. That communication You would kindly make to me in
this respect if possible, which I have the honour to send
to You. I endeavoured to propose, yet the different character-
istics of as they result from the present state of our knowledge
of this interesting family. Parasitical Phanerogams are besides
great interest to me, as I am just compiling a general history
of this plants. Finally I beg, You would kindly please to trans-
mit to the garden, of which I am the Superintendent together
with the old venerable Schrank, seeds of every description, against
which I shall feel happy in forwarding to You either seeds
or your own botanical publications, as You will please to direct
me. Any object You will be pleased to direct under
my address by commissioners; letters: care of the Baron

Cette, Bavarian Ambassador London; or Count de Bray, Bavarian
Ambassador Paris; or Count Ferripon, Bavarian Ambassador
Bonnelle. I flatter myself with a kind and speedy answer and sub-
scribe myself ^{with} the high regard and esteem, which your me-
rits in the Amabilia Scientia inspire me with

Sir, Yours

Munich 2 October 1825.

Dr. de Martius

4th May 1826

very obedient and humble servant

Dr. de Martius, Member of

the royal Munich Academy; Dir
of the botanic garden. - Munich

My dear Sir,

There are so many things in
your hands and in your Garden, by which
men may be benefited, that I do not think there
is hardly any body in Basculle and its vicinity
who by any estate or taste for Natural History, that
I have not asked your assistance, and been complaisant
to their requests. I have hitherto had no
occasion to trouble you for anything in
the Garden, but will ^{<pr~*>} include myself
in the list with your permission. I have
some houses in Chausinghe, one of which is
occupied by Mr. Dalrymple, and he has applied
to me for some plants, a list of ^{& > jd'£sf it mA}
the liberty to enclose; if you can without
any inconvenience supply the whole or
any part of them, I shall feel myself
much obliged. And in your signifying
that ^{Mr. Dalrymple} will attend at the
Garden any day most convenient to your
people to give them.
I have the pleasure to send you

My **A** dear Wallich

I received a letter this
morning, from my sister, mentioning the
arrival of Mrs Wallich, who she says is
in perfect health, & spirits. She says that
the young catwiper for George, is a uncommon-
ly fine child; Mrs W- has been most warmly
received by her friends in London. Indeed
so much so (says my sister) that they seem
inclined entirely to engross her & prevent her
visit to Aberdeen wh I regret as we had
looked forward, with pleasure
to the view of returning the kindness

of hospitality, Dr. M. to his family
but if she is happy & comfortable
that is every thing I have seen more
top of Miss Wallis than I could have
wished, owing the assistance of our abode
she spent a week with us in our lodgings.
George & all at home were perfectly well.
You'll have seen perhaps that we are under
obligations to march to the frontiers to
Cuttack which is a damnable expense so that
obliged to write to Mr. & Mrs. G. & Co.
to see if they will advance some
money for which I am thinking I must ensure
my life. from which I have kept as long as
possible, however my fate seems to have determined

#'&*

& if they wont lend me it, I may look out
for a halter, We are under the necessity of
buying a ^{'&*&'€*-&_W^', J£f £**./*&£.} Wagon, & no beginners
being ordered here our old ones will be some
time on our hands, by the by may I ask
you to enquire of Calder if he can sell Captain
Whitell's horse, as he was put up for sale here
& no one bid for him, I should like to have
it if it was to be sold for 100 or a 150 as it
would be the cheapest, I could get for the march.
I have got my Lieutenantcy & Compaeny by his steps
so that I may hope clear my debts in year
or so. - Hope you have seen Mr Clark who will
give accounts of Mr Wallis. - a few lines
will oblige you, I am truly

My dear Sir,

r

*S>

I have received your very
pleasant letter with the Stated of the
and am quite sensible of the distinction
and attention you had the good
to bestow upon me, for this ^{particular}
Yours and the past ones. I have
expressed on diff. occasions, accept
my best thanks. As you are
going to send donations to your
benevolent Society at Copenhagen
I could send you some mod. books
as presents from our friend
Dr. Wilson, and I think I might
procure a copy of Calwells
Annual Reg'n and the Pan.
of the Med. Socy of Calwells
if it is not late to procure them
in your parcel.
I should like to know

whether you have sent any copy
of the Political Research and
up to what he to Copenhagen
in which case I can send you
a copy of the 15th 40th just published
on the part of your society.
I will then refer to you
me with a pleasant assurance
that I may send you
the books before I go up to
my country residence on one
of the Duffa Coasts.

My dear Wallich

Here I am just
arrived from Europe and I fear there
is but a little hope of being able
to get again employed on my favorite
pursuits in Botanical Geography
especially during the present
dearth of medical men - I am
your very anxious

to avoid being sent anywhere
whether Mr. Govan who has never been to
India cannot accompany me in
mean time to do duty at Barrackpore
from which I hope perhaps to be able
to pay you a visit at the junction
By the by is there not something
well worth seeing in the botanical
way at Serampore opposite us

Great expectations are entertained
from you in Europe, and much
anxiety to receive more of your

works on the Himalayan plants.

I have a few papers some of which
have been published chiefly on
the geography of the plants of the
Himalayas have been readily

received - I am sorry to hear that

Mr. ... has been complac

and I hope your accounts

from that are favorable

Believe me

Yours truly

My dear Sir

I am indeed exceedingly sorry that I have thus long delayed replying to your letter, the kindness of which & of your whole conduct towards me will never be forgotten. I most affectionately shall never forget, "I have memorized every drum spiritus hoc regit artus." You would not have failed to be ^J^J & ~——— I /... in and at once, had I not been, as I said in my letter, in a state of the most anxious suspense; always flattering myself that the morrow would enable me to send better news, & always finding that the sun rose & that our set & my child's case remained unaltered. When I returned from Glasgow I found her considerably better than I had expected, but since then she has been somewhat worse. She is in a state of extreme debility from repeated blisters & bleedings; she suffers dreadfully from continued headaches which are even worse after sleep; she has a constant cough, which is not great, in her chest. On the other hand, her cough is much diminished, her pulses are not above 120 to 130, & her blood, without symptoms of inflammation, is

^AcL&zas ^Em^*S ^J

cannot be affected by consumption; but in truth,
as I had to beget me but to find ... I do not know ... I am
the first claim in view, I have given myself all
to hope, tho' I almost doubt it is against reason

**vii

I would not have indulged in these details
with a man to whom I am so much & so long
and I am sure of the worth & goodness of my
excellent of your heart. - My late visit to Glasgow
abounds in agreeable recollections; but, among
all, there is not one more which I dwell with
pleasure, as from the having made your
acquaintance. It is late in life for me to know
such fine & life; but I do most earnestly desire
to obtain yours & to keep it so long as I live;
I in this I do. I entreat you not only to put
with your correspondence, but to come to my
see as much as you can during your occasional
indispend; & if you will bring me to walk with
you in Town I shall be but the more glad.

I have not forgotten that I am the possessor
of a few of your own's clothing; but I had
rtst^*.^j~^*t.^T
of late them. But by the time you
come, I flatter myself, I shall be able to show
you an engraving of a small. Much health has
indeed struck the sewing-needle from Mrs. Town's
hand; & I fear she will never touch it again; but
I have proposed to Mother to form, by the help of
the Mr. Nee, a series of portraits of A. Stewart; &

to accept of them, I had ^{not} had that my acceptance,
Mumth, not long ago, and perhaps, as I have
learned them to stand. She is now in London,
staying with another married sister, near Bathurst,
on 24 Duke Street in Westminster; she has given
me found, which I bring, & have I written to
her, she will be delighted to see you; and
and perhaps you will find a worthy substitute
in the same -

Again regards, I think you find
your sympathy & if you kind words, they give
the opinion of the highest respect to you &
I am
as usual
Yours very faithfully
James Turner

Barnstable 29th Oct

My Dear Nathaniel

I am sure you will excuse my not
having written you since I heard of
the death of our poor friend Tippet, after
your last account of him I was by no
means sanguine of his recovery, ^{and}
almost expected the fatal termination
of the disease, yet I had hope, & was much
shocked on the receipt of ^{the} ~~the~~ ^{your}
me and out of the melancholy occurrence
blinded hours, appear to have shown him
every kindness, & attention, for which
I feel most, ^{a melancholy} stupid, and it
consolation to think that he had such kind
friends with him during his last ^{moments}
his loss will be long felt by many, but by
nobody in particular, who had known him

intimately for 23 years nearly, & was probably
better able to appreciate his worth, than any other
person. Poor Kennedy's death happened only
the day before I heard of the demise of our
country's friend Tappan, & both events, when
so *** only together, cast a particular gloom
over them other grounds here, as well as myself.
Kennedy I had only known for a few years
but I had a sincere regard for him, he
appeared under a rough exterior as warm
a heart as sun heat. His suffering
for the last 3 months were beyond any
thing I ever witnessed, and he bore them
with a degree of firmness which I have
hardly ever seen equalled & which was particularly
remarked by J. Kim who with Thomson
attended him to the last. It appears that
the Drs had an assurance on poor K's
life which was a temptation not to
be resisted, & he was not permitted to go.

I respectable, which they may be at home
if the boy is brought up to respectable trade
& the girl settled decently as being married
to a farmer &c. - I rejoice to hear that
you have had such good accounts of
Mr. Walker & the children & I trust you
will before the lapse of many months
hear of their safe arrival at home.
The snow ^{~&} have been unusually heavy
at this station, root & kumprah & our
gardens have suffered severely, I saw
the Apple trees at Passah the other day
some of them are dead & all look sickly
but if they will only bear till July I shall
have plenty of such sort by grafts &
buds - it is worthy of remark that the Apple
trees, I heard, first sent up to poor Appon
by Mr. Pray have hardly increased
in size although they have been here 3 years
but the grafts grow them are now large
trees & much more luxuriant than the Passah ones
which appears nearly worn out.

31 Oct 1824

before your further receipt to than for
 for your kind letter which reached me
 as I miss meeting the foregoing sheet
 accept my best thanks for it, but it would
 to enter into the subject of the first
 part of it which is a ~~rather~~ ^{rather} ~~over~~ ^{over}
 both of us - I think your report on
 the little new garden without the thing
 appears to have been a ~~hand~~ ^{hand} ~~being~~ ^{being}
 originally & to have really ~~been~~ ^{been}
 no advantage over the old garden
 under such. I see no reason your
 report may have for alteration or
 correction as it appears to be
 a fair view of both sides of ^{^L} ~~the~~ ^{C&^&>} ~~the~~ ^{the}
 at the same time I think it strange that
 you should have relinquished the garden
 at once without even having the necessity
 to ascertain the produce of cotton & coffee
 upon the first year surely they ought to
 have had ~~ed~~ ^{ed} ~~the~~ ^{the} whole speculation
 respecting cotton & coffee of which we have heard

Unrespectable, which they may be at least
so much lately is visionary which I
hardly believe - I am afraid to keep your
papers longer and as I am going to the
Madison fair tomorrow I could not look

A. Wallack Esq
Botanical Gardens

Ms. Thoms
29th July 1874

31/10/24

at them again till my return & that would be
too long to detain them - With respects to your
Lippitt books you can make them over
to Anselie I have got the first Vol of Purches
affairs as well as of the Hort. Soc. Trans. which
shall send to be sold in America no one
will purchase them.

London, Oct. 30, 1825.

My dear Mr. Charles, I had the

pleasure of receiving your kind letter, nearly
two years since the date of your last letter, a
letter however so full of kindness & affection that
I would wish but have received it for the world.

That very circumstance, however, the warmth
of feeling with which you have always written
makes me the more regret the long intervals
at which you write. I sometimes fear
you are again in bad state of health: but
I am again glad from some quarters or others
of your indigestible labours & your periods
of rest which set my mind at rest
upon that score. Then again I heard when
I was in England last Spring both from Mr.
Colebrook & Dr. Wilkin at the India House,
that you were on your way to England, may
that Mrs. Wullich was actually daily ex-
pected & that she would proceed to Scot-
land with some of your children. This
however has proved incorrect. Indeed, I
could hardly bring myself to think that
you would have such dear connections
come into this part of the world without me:

being ~~in~~ ⁱⁿ the circumstance & claiming
from those attentions which you & we
are belonging to you, have such a right
& title to. I am grateful to you
for the Lt. vol. of your Flora Indica, &
am continually making use of it. What a
new world does the Flora Indica open to
us. Really it seems as if no part of the
globe was like it for the quantity of its
productions. I do now get some of your
valuable treasures from the India House;
but still they form a very small portion
of your Flora, & as to the Ferns I have
some in for no share of them, for want
of being in London at the time the divi:
sion was made of the duplicates. This
is one of the chief advantages I experience in
residing so far from the Metropolis: but then
on the other hand I seem all & whom is
connected with the Botany of Scotland &
there is such intercourse ^{of} ^{Chybe} with
all parts of the world, that wherever I have
correspondents it is easy to get the plants
of the countries sent to me & my Herbarium

has been lately increasing to such an extent
that it is '30 on this for a few years
it will be scarce to none in the things

Does the blind volume of the
the paper? I have too from Madras that
you are now engaged in a work with plants
on the plants of Nepal. I thought I had
the appearance of such a book with
delight, & done too by one who has seen
much of Nepal & being, it must be stamped
with additional value.

I am as usual always employed botanically
I find myself more deeply engaged in this
delightful science than ever. I am daily
collecting materials for my System of Plants
the first volume of which my Publishers
have liberally allowed to be delayed till the
ensuing spring. This will be very much to
the advantage of the work, for I mean the
mean while I get more plants to describe from
I mean books to learn from. I am getting
a set of plates too engraved on a folio size for
a work on Ferns, they being a most favorite
family with me & so intimately connected
with my favorite Hesperis. You will
I hope be pleased with what I now send
you of my Quaker Blue. Had by narrow

Miss G. May would
not believe in long hand
writing. I will try
to write in long hand
if I can. I have
written by my
pencil a number
of letters to
you & to the
Misses.

promised to you at Jan 15.
will then find no change of your
beginning of the year I was upon
visiting the Continent. He
will living a well as was his former
months have nearly come to a conclusion
of their botanical labours, but they will
now publish an arrangement of their species
geographically. Young Deffen is travelling in the
step of his father. In England has the
highest reputation of any one in Paris. And
quite a Helian is perhaps the best Pro-
tivist there.

Germany is doing much in botany. At
Munich as you the most splendid works on
the botany of Brazil are carried one far
travelling on the Palm. Proen (who is
dead) & Schimper's species of Conium is come
to an end with the Class Pentandria. Sprengel
is publishing however a Synopsis, but
without any names or references to any fi-
gures, so that really in the more extensive
sense the book is almost useless. Brown
works are all republished by my friend Dr.
Nicolson Deunbach.

Brown himself is again working

f^f- <^r- +f -- <^v^

Protested. Lambert has completed the 2^d vol
of his Poem. Don's Poem - c-yi- > - H. Nepal. you must
have seen & I am anxious to know what you
thought of it. I has been in very
indifferent health. Dr. Buchanan, Hamilton
is well except when an attack of the
gout. I could see you to his beautiful
valley in the Highlands.

I have had much sickness in my family,
Mrs. H. having been confined to her bed for
3 months previous to her over-achievement. And
soon after the birth of her child, which
was exactly a month ago, she is
in a very poor weak state, quite
unable to leave her bed.

Pray write to me as long, & believe
me to be, my dear friend, with the
highest esteem & regard, your

most faithful

affectionate

J. S. Hooker.

My dear Sir

I have the pleasure to send you
a Volume from Dr Wilson and another from
the Trustees Society, which
I have the good hope to get word to the
University in their respective names. I
wish you would in presenting these
books give a hint to the Secretary, or
the person you are going to send them
to acknowledge the presents, which
are or may be made by Caswell's
Authors. As I find some blame
you for non-acknowledgements
of what was given you before,
they think you respect the donations
of the Rector of the University, and
put all the Credits in affairs
own pocket.

I also send you the

Quarterly receipt for your Legation
Circular. In the accompanying
your vote to allow ourselves the
pass of the Society's papers from
the Reg. Society's meetings. As we
have had no meeting for a
long time I wrote to Dr Carey
on the subject, but have not
yet received any answer.
Perhaps he has referred it to
you, and if you will have
the goodness to give a day
I shall prepare the necessary
notice.

I hope you are coming
to the Society's meeting tomorrow
evening.

Yrs. respectfully
Rambold

Mr. T. G. Gardner
Calcutta

•fe

To,

G. Proctor Esq.
Secretary Medical Board

My Dear Sir,

Finding myself for the first time really stronger this morning from my late attack of the Epidemic I feel it to be my bounden duty ~~and~~ ~~not~~ ~~to~~ ~~submit~~ ~~to~~ ~~submit~~ ~~myself~~ ~~to~~ ~~the~~ ~~Medical~~ ~~Board,~~ as yet to perform any duty which they may deem proper in these times of great distress to entrust business

May I therefore request that you will do me the honor to communicate ^{the contents} of this letter to the Board; to solicit their orders respecting it, and kindly to communicate them to me.

I beg leave to observe that although this is the very season for active business at the Garden and ~~at~~ although

although I have not less than 50 La-
borders ill, besides a number of cases
both among the Europeans and Natives
attached to this.

^~^^dL*^^eS

if I am permitted to do any
extra duty in this vicinity at Calcutta
or its environs I shall be able to
conduct the affairs of the garden without
any detriment to the Public. At any
rate in a case of emergency like the
present there ought to be no choice be-

tween what is a public necessity and
what is only a matter of expediency.

v^_^f

finally your
pardon for the unofficial style of this
letter. My reasons for adopting it is
this, that the Board may do me the
justice at once to believe that my
motives are pure and good, and not

^*£*~*^Z *^g<L

the most distant idea
of intruding myself on their notice. I
repeat, I feel myself impelled by re-

T*5& sprf

what is due to the service and
#4 should you however think that
my

^Z&*~_

my reference ought to be official, kindly
do me the favor to intimate it in a line,
and I shall directly conform to your
suggestion. With many apologies for
the liberty I have taken.

Bot. Garden
28th July 1824 }

I have the honor
to sign
W. J. Wallich M.D.

I do not have the most remote
doubt that the Government will readily
concur in my making this reference
and in my at once entering on any
service which your Board may require
of me.

The responsibility if any exists
at all, in this respect, I am perfectly
ready and willing to take on myself.

To

N. Wallich Esq.

Supt. of the Botanic Garden

My dear Sir,

The Medical Board have
devised me to acknowledge the receipt
of your communication of the 28th Inst.
in terms strongly expressive of their

commendation and thanks for the bene-
volence & zeal in the Public Service
which has prompted you to make an
offer of your professional services on
occasion of the ~~Board~~ ^{of} ~~prevalence~~
of sickness affecting in common and
the same time unfortunately so many
of the Medical men at the Presidency.

Should circumstances eventu-
ally call for it as very probably will
be the case, the Board will most gladly
avail themselves of your aid at the
same time that with a just consideration
for the very praiseworthy manner
in which you have placed your services
at their disposal and a sincere regard
for the more perfect recovery of your
own health they feel it but due to you
not to impose upon you any duties
where the occasion does not more
immediately require it.

I remain &c.

Signed J. Proctor

His Duty

J

I intended to have fulfilled
the Board's instructions by writing this
to you yesterday, but unluckily it came
to my own turn to be attacked with
fever from which I had fancy will
escape. Mine however promises to be
very slight.

Yours &c. S. P.

Extract of a letter from D. Wallich to
D. Adam Secretary to the Medical
Board dated 8. October 1825.

Para. II. There is I firmly believe
no Country upon Earth, which affords
such inexhaustible treasures of natural
production as India does; nor is there
perhaps any service, that can boast
of more favorable opportunity
pursuing researches in all branches
of Natural History, than the Honorable
Company's Medical Establishment.
Stationed frequently at places, which
abound in the most novel and interest-
ing plants (I confine myself here
entirely

entirely to Botany) the Medical Gen-
tlemen have it in their power, and have
frequently with the most beneficial
results exerted their endeavours, to add
new and most useful contributions to
the flora of India. There is not one
among my Brethren of the profession, who
has not made Botany a part of his
Academical studies; many ^{&fe^*L*t*S}
Sir, who have made very considerable
progress in that science before leaving
England. But to them all I presume
it must happen, as it did to me on my
first arrival, that the striking difference
of the forms in the vegetable Kingdom
of this country, contrasted to those, which
habit had made familiar to us at
home, serves rather to discourage and
perplex us, than to attract our endeav-
ours, or cheer our hopes of becoming
intimately acquainted with them. The
noble institution, in which I have the
honor of being placed affords greater
facilities for the removal of ^{ft-^*?^ s%'e*~£^i&}
that

that thus obtrude themselves, than any
other in India. Had the Newcomer
might successfully continue his previous
botanical studies, and thus become
in a short time fully competent to render
the most beneficial services to Botany
in general, but particularly to the cause
of medical botany. What a relief a few
occasional hours relaxation in such
a pursuit must afford to an enlightened
mind, during a life devoted to the ar-
duous and severe duties of our pro-
fession, it is unnecessary for me to
dwell upon. That every assistance would
be most readily offered and given to
the student, which the library at this
garden or my own humble and limited
means are capable of yielding, is not
less certain, than it is, that I should
esteem it the greatest honor which
could be conferred on me if my poor
services should prove in the least
degree worthy the acceptance of the Medi-
cal branch of the service, or meriting
the

approval and recommendation of the
Board; for your consideration I beg
leave in conclusion, to submit the
advantages which might result,
from the pupils attached to the school
for nature sectors, being directed to
attend occasionally at this garden.

Very
truly
yours
Wm. L. H. H. H. H.
1833

Wm. L. H. H. H.
1833

f

My dear Wallis.

In my last dispatched a few days
since, I promised to write soon, and was to be
up by you to read my promise the day
I am not much to say. Therefore I feel
in some with begging that you will either send
a parcel to be mailed headed to your friend
the Secretary of the ²⁶⁰³ Ethnological Society. It is
for the papers, I am to pay to you. but you
can transfer it to the who you like. I am
I am the pleasure to send you some boxes of
pepper fruit quality. I first dispatch, more shall
follow. but I am to ship to you the chilies
picked out from among a great number. The
best you have kindly sent. are all now taken in
my good order. but this unfortunately is a very
unfortunate season for sowing them, as the
cold has set in. St. Murell whom I mentioned
in my former letter as having sent a very fine
collection of plants, is at present with me, receiving
from our garden, which followed a good jungle forest

which L caught in his travels in the hills. This
was however becoming rapidly & proceeds soon to
form the army. he has brought down a new
species of Barley. seed very large & specific.

Proposed coll | ll J/, - \$r*s^7t£zr— on £Z^c*-*+.

Shun has all day employed sending Messrs. Mutton
& Lenoir to discover if any thing similar
has before been described. but without success.

I was on Monmouth has probably met with it
but Shun not seen it mentioned **D *^^***

Messrs. brought it from the most distant part
of his route. somewhere near Chemin Fontoy

will send you in &~—j*^— £> of seed either by this
week, or Sunday soon. as wish to examine
it. Shun only a small quantity. some Shun show.

Shun are making some experiments to discover
whether the something cultivated in the South
of Europe for fodder for cattle, and not be em-
ployed for the same purposes in this country.

One of the plants €*' t_* is Lichoniam. Ditypus. which
you would send me some of the seed. It is I
think indigenous here. but as Shun some

double aspect, $c\ell L * \ell'$ -, whether $\wedge/L- t^{\wedge}\ell e, t$. *Silybum* or
perhaps only *C. Indivica* in a wild state. I should like
to have some seed. I am quite delighted at your
proposal of making this useful as a medicinal
garden - to meet your wishes about the Board?
I have had - Biggata some with *Physicium*
reign. The dried plant may be sent to the
Agra Depot, if it so pleases the persons
that be. I should think that with the ad-
dition of a small garden or two in dif-
ferent parts of the hills, but on the same
road, we might cultivate an immense
number of drugs. I have some time since
sent you to get some such as *Rhubarb*
as *Pleurocy* found me. When you get my
catalogue you will be surprised to find
how many medicinal plants are within a
power. I hope this may answer. I will dis-
patch me to Calcutta to take charge
of the Bot. Gard of Plants for this Garden.
I wish that had been aware of your intention of
being so liberal. I should have mentioned some

of the school will have the good sense to take care
of the money of the above writer. I shall feel obliged.

Tell him that as I have kept of a specimen
of the same. I have only the copy of a money. Therefore
paying him by some other means would

be most convenient. I will however enclose
some all demands. And the books as soon as
possible to the books. I believe him to be

the up to dispatch **A;** the first books. I believe
to the full value. As you can find enough

you would find up the scientific journals
I think toward the point of being
my table Johnson's Quarterly Journal of

Medicine. ^{t £} **J\$-^~_rZL\ /*/L£^^^i.** I found
Horton Malin has the charge of the Colonial

Department. I have been busy employing
making a list of plants which I think I can
collect here in the field **&.a** *

Should have it in a day or two. My mother & the
children have left me for a week as he is having
going to Bhampton - they may return. They desire

their kindest regards to Mrs W. I have
also of Berlin but your own is greatly
(The type is still to be seen) I think

ingreant
organo da.

Botanic Garden Liverpool

Mr Charles 2^d May
1826

My Dear Sir

I have to acknowledge the receipt of
Two boxes of seeds from Adrian Capt^m Swainson for
which I beg leave to return you my most grateful
Thanks - and also in behalf of the proprietors of
The Botanic Garden here, and have also the pleasure
to say that your good friend Capt^m McKeen has
kindly offered to take charge of a box of seeds for
you in hopes that the May track you in
safety & prove acceptable; as Capt^m McKeen
has fixed for sailing upon the 12th of this month
and in all probability if he has a good Voyage
will arrive in India in the hot dry season, therefore
thought it would be better to send the ~~seeds~~ ^{seeds} out about
Jan^y. or Feb^y as the would in all probability arrive
at a much better season, when we should

hope for better success, as our attentions shall
be wanting here in selecting & packing that
you may rely upon; I have just given
2 more numbers of Mr. Russer's work in ^{to} Capt. McKim
care for you where you will see some more
of your splendid plants depicted, which I think
you will be pleased with, and in course if
anything new in that way have made its
appearance with you & can be spared the world
I shall be glad to send you a copy, but I
am sorry to see you are not on this side the water,
and only have to say that I sincerely hope that
your enjoying good health is the sincere wish of
My Dear your most obed & obliged Serv

John Shepherd

G^

My dear brother

I should be sorry to siting with
 the opportunity of sending the person
 into the hills but I will speak to
 Lady Ankerst about it & let you
 know. I forwarded your paper
 to Cambridge. I was really a good deal
 disturbed at what it contained as Cambridge
 had been so strongly expressed
 to allow any expressions which appeared
 objectionable and could readily have done
 on any communication from you or
 Mr. Cary. You will find by Cambridge
 note above that he is all most pleased on
 your attack upon him and for my part I

yj^ ^ ~ * _ ^ ' ^ - z

1X;

found an excellent the absence of
the following the minutes as well
as the contents of any one of
the same. The same is
found in the same as you
are asking of the same as you
know. I have a book of
what I have found in a part of
the same.

Yours for

Wm. A. R.

Portman Gardens

18th Feb. 1845.

Send me some seed of *Lebanon* but find
they are killed. Can you see with any part of the *Lebanon*

as long as two eggs. *Schizanthus*
lanceolatus. *Palms* *Cypripedium* *minimissis* *lanceolatus*
more *montezumae* even. *Uvij* *Kachera* *lanceolatus*.

Send me some more in a
few days. Enclosed find some of
your lists with many thanks. The
threshold filled in a few days. I

have taken copies which refer to
in the *ovoid*. When you have
sent some a great many of *Hyacinth*

I have also a great many *lanceolatus*. Had
spread out on the floor. but find
some difficulty in starting on

the *Genus* of *lanceolatus*. Should know
between *lanceolatus* there are but a *lanceolatus*
taken *lanceolatus* in my *lanceolatus*.

My *lanceolatus* *lanceolatus* is planted to the
land on the 11th *lanceolatus*. I am in *lanceolatus*
as the *lanceolatus* is not *lanceolatus*. It is not
rather a *lanceolatus*. The *lanceolatus* is *lanceolatus*
40 of which are *lanceolatus*. It is by *lanceolatus* is

him from the East Indies generally -
without specifying from which particular
part. Can you tell me whether
from Bencoolen indeed. I suppose from
particular person I need have sent
them. Sent by Sonnerat.

The list I have discovered being long
but one is follows.

Pl. II. p. 404. l. 24	for various fresh. and various fresh
p. 24. l. 12	for Katjura read Katjura
p. 501. l. 12	Calys 5. caved. - Calys 5. laca
p. 506. l. 6.	becomes - become
367. l. 10	Gowan Gowan

1. Your specimen No 62 which you put down merely
as one of the Cucurbita is I think a species of
Jala Jala's Genus Monicordia at least a ^{plant}
~~resembling your specimen~~
The distinct torax collected
for the oil afforded by its seed, agrees with
all the generic characters of Monicordia. I
have consequently in my catalogue placed
it in that Genus.

2. Your specimen No 250 marked Scyzonura
is not to belong to that Genus
different Genus. I mean in Linnæus's
many species mentioned as being sent

Since my books have been looking thin the
Thomson Dispensary, London - list of the
plants which I think might be successfully
collected up here. In the proposed hill
garden. When shown from you, a revision
you promised public letter on the subject -
I will give you the details, distinguishing
the plants which are indigenous - those
which might be collected here, and then
for which a Garden in the Miller would
be the most appropriate site, leaving
out all such medicinal plants as are
beyond my hopes. I think with the
College Garden others, as well as the
proposed one in the Miller, be brought
down with the greater part of medicinal
plants. The saffron was brought from
Lachow to Sobolhos (rather I like) than
it is brought by - Sobolhos
of large crops to the mountain at Dagest

Botanic Garden
Calcutta

London Rev. 4 Nov 1825.
My dear Wabick.

Just got your of the 10th and
of the papers I am sorry to see
that your anticipation of
your Mr. Pennington's fate, has
been fulfilled - a letter
which I have from DePless
mentions that accounts had
been recd. here of Moore's
death - of fever - at some
village between Balk and
Gabal - and if this should
be unfortunately true, you
unfortunately have some intelligence

gitarin lake. He wanted
to see his object well seen
open of the Dalh people, which
was a thousand feet, and
added to his cap, his papers and
the information he had been
collected, but the whole was
away. It appears a representation
on the subject had been made
to the Raja, and his property
might perhaps be recovered
in consequence.

Arbun is of with various
things for you among which
are 140 leaves plants of
Rhododendron and other trees

through which you seem
to have - I wish I hope will
reach you in due time and in
good condition -

20th The statements of the
wages paid here to Nott.

Blank work & amounting
which you require - I enclosed
I prepared yesterday as there
was some difficulty in referring
to old accounts - but I will
send you such as we have been
able to make out. and I hope
they will serve you for
I trust to my wife Ram Manoo

of correctness and as far as
the papers he has kept go. I
do not say the details are very
accurate. but, from January
to Nov. 1821. there are ^{regular} no accounts
it seems here of the mens wages &c
because you settled all those
matters yourself - if you
remember - when you were
here and the accounts showed
us with you. - You used to give
me a draft every month for
that period when you balanced
your accounts of disbursements
on all matters with Hamilton
and I can give you the amount

of them, from my agent's accounts,
but of course I do not know
the details of these items. viz:

VZZ/. \$10 from you on the 1st of Oct.

Aug. - 1438. 1-9.

5 Feb. 1033 - 11-9

7 March 960 - 15-8

5 April 1357: 12-11

1 May 1306 - 6-2

4 June 1020 - 5-2

4 July 1238 - 11

3 Aug. 713. 3-2

5 Sept. 1168. 1-3

3 Oct. 781. 10-8

4 Nov. 2,077. 8-8

5 Nov. 1402. 2-3

only of these items have been included
you must of course have paid

The wages regularly of the two
 men. and the letters of
 Ram Jinnoo's accounts (for
 1820 and from Nov. 1821 to June
 1822) which I had given will
 show what they received here
 prior, and subsequently to
 that time ^{in question} and thus show
 you will be able to arrive
 at what you are desirous
 to ascertain, with the assistance
 of an attentive ^{man} memorandum
 of wages paid to you people
 during your stay here, which
 shall be enclosed.

ask him for them into
remains another year? or
the disease? and why don't
you get some news from
the Burman country &
send it to me. People seem
to have lost sight of the
war there for the present.
I wish we could be kept
up all together. Have you
sent of my Harriet's
memoirs? I wish to go
to Italy but I have nothing

Must be paid for. The paper
contains the seeds of a
bill of the letter and
hangs back.

James Secor
Wm. Secor
Edward Secor
19. 1823

My Dear Wallich

as I have not had the
honour of a single line from you
during my absence from India I do
not know whether the treasures I
have from time to time committed
to your care arrived safely or not I
can only hope that they **r*, -, >n**
have succeeded. I left the Cape as

you may guess with a great cargo of plants
(some two dozen boxes of seeds) & the many
are gone. I have still a large number **v < . * < -** of
strangers to introduce **s * < - c * r j » s 4 -** to you. I must
beg you to receive them in the
first instance & to have them taken
care of - You will be welcome.

you know to a share whenever
we can examine them, & determine
what is best to be done with them.

Mr Wallcut & family left Philadelphia
shortly after I left in April

but I have continued
to stay with the
many measures & matters under
your charge. How goes on the
of the 5000 plantations. I shall hope
to see you some time this
week.

I remain

Yours ever Sincerely

Wm Lloyd Garrison

To Dr. Ch. Wallis
Garden Reach

Dear Sir,

Having just heard from a friend
that you intended to, & with the
ground at Ranjivanpore near Koorpy
after the great expense you must have
been put to in order to get it into a
state of Cultivation fit for Coffee - **ST.**
very you have found it not to answer
I therefore would be happy to enable
you at least to save the outlay you have
incurred by taking the charge and
superintendance of the ground - on
myself and turning it into a Mulberry
Plantation for the Rearing of Silk
worms and subsequent manufacture of
Filature Silk - As this is just the

25th Nov 1844
I have been thinking of planting the Mulberry trees
which could be procured near Guiltan
for a rupee the thousand - or ships paper
for a Pice - 300 or 400 pages of ready
could be planted in a few days and
there would be no want of Toota paper
or Mulberry roots in that neighbourhood.
You will therefore oblige me by an early
answer as to your wishes on the subject
and what share remuneration I should
expect for my management - I enclose
is a rough sketch of the outlays & profits
on 1000 Pice of Toota or Mulberry from an
average of fifty statements & more by me
taken on the spot 3 or 4 years ago for
Messrs Palmer & Co who however mistook
my statements & believed without seeing
it a proposal - I hope it may meet
better fate with you Sir -
I am
Dear Sir
Yours faithfully
James M. Dalrymple

Recd. from W. G. Woodson
15th Dec 1826

My dear Sir,

I had the pleasure of sending you
some seeds in the month of August or
September, I have since made
collection with a large assortment of fine
seed in birds, which if you
to calculate may be an
acquisition.

I shall be obliged if you can
send me some large tubs or any flowering
with seeds of flowering shrubs
of the Northern
kind.

W. G. Woodson M.D.

Strong flower seeds would also be acceptable,
and I am particularly desirous of obtaining
some roots of the *gloriosa superba* -

My brother left this a few days since
for Bahia to meet Col. Macdonald, or his
doubt should be charged with his remembrances.
I hope you will have the kindness to acknowledge
the receipt of the seeds & roots sent to you
on former occasions -

Bahia on,

My dear Sir,

Very faithfully yours

Henry Willock -

Dr Wallace

Sir

I have taken the liberty of
addressing a Box of Plants for the Rev. Dr. Carey
to ^{#~sv%os' O&i^} & it will be most obliging
that you forward it to that Gentleman ^{f&L^k.}

As a Catalogue of our plants has lately
been printed I also beg leave to send you a
few Copies by which you will see ^{rc^v f//pv r-}
see yet are in E. India plants & it would
very much oblige us indeed to be kept in
mind by you for a share of any plants or seeds
you may find convenient to spare - if there
were any thing of the kind you would wish
to have from this country please lay your
Commands upon us & we shall have ^{p**".*}
pleasure in attending to the same - ^{f took}

^{K/} the liberty of writing you shortly by ^{<y^v <7t&<S)}
Capt. Mac Gill - & at any time he would most
readily take charge of any ^{t ^, %orz^ sufr^}
^{fat' <£#} kind as spare
other vessel they might
of Messrs Brown, Duff

forward them without the least delay here

Dr. Hooker intends to write you by
this same opportunity - besides the Box
for Dr. Carey there is a small paper parcel
also containing some of our Catalogues

R. J. am

In your Bro. Post Box
Stewart Murray

P.S. As our opportunities are pretty good
of getting plants & seeds from the W. Indies
and seeds of any kind to you in that
way -

June 9 - 1850

Calcutta

Dec 17-

My dear Wallich

I have yours of the 3rd since then have had a letter from to whom I have replied at length. I am ready & willing to aid him to the utmost - but as the success of his plan will mainly depend on his cooperation at Calcutta & as on the other hand, delay **Asi^C^US^:** unless my willing help, I think it very advisable that, with the prospect of going to sea before him, he should put off the measure till after his voyage. It is till next Nov^r - what use of spending money to no purpose - & what purpose can be served this year? The folks if they set off at once, will yet not be here & at work in such time as to allow any considerable despatches to reach Calcutta from this or Dr A - is off to sea - & in his absence, all the collections will be spoiled. This is worthy consideration - & my advice is clearly for pausing till Nov^r next. However I am now prompt & willing to act if it be the determination. The black

challenge
 %a ^r^ \$<^ fc^C <y#- / &&< extravagant
 in the sort of servants on hire s - or all we

can collect will not be worthy the cost. Why pay 30 rup. for a man to cure skins when a Bengalee competent to the task can be had for 8 or 10? The draftsman is a nice affair - for unless he draw well - he might as well not draw at all. The people must bring up a good fowling piece & lots of manition for it. & you must instruct them in the way up.

You seem afraid that Guadner should know you have had a hand in our scheme. Why so? But your confidence has been & will be, sacredly kept. I do nothing of this sort without Guadner's knowledge & therefore no sooner did D= A - propose to send a half-caste, but I stated this, D= A's, wish to Guadner - who, at once, assented.

When in a former letter I stated that Guadner I had not mentioned the plan to Guadner while it was in embryo - & while it affected natives only. I merely did so to prevent unnecessary hesitations. & because so long as natives only were to come up I was myself competent to invite them - but beyond my tether I never go - & least of all, secretly. So that the moment D= A - spoke of a Portuguese, I asked G's sanction & got it.

Never mind Mr Pereira & the sugar
- box. The newspaper Post masters
are too careless to be able if willing
to refer back so long - so that
an appeal wd be useless, if
made - we will therefore not
make it at all.

I'm sure you sent me the
box - sure you love me
well enough to send me
a dozen - & that's all I
need to know - I only told
you that the box had not
come because you directly
asked me.

Dr. Abel says he means to call
the choir by my name. This is
a pretty compliment - & pleases
me - not so much because
of the fame of the thing but because
it shows in Dr. A. a liberal
& gentlemanlike spirit.

Ever thine most truly
W. W. Johnson

I am not even expected to get any further
of the the appearance of the work, nor will
I think that there will be anything so
good. It will have to be in the back of
the C_2 a large part in the present
shape however at this point may be
quite good in the eye of the
critic, but I think in that
light, nearly the same as
the rest of the work has been
done it looks much less
than the rest of the work. I have
not seen the same help as I have
at other points to think the
is not correct - but you know
the help or see how I have and
I do not put into the C_2 I may try to get
it better from it, the speaker speak in the
the rest of the country is not so much but
I would like to try. It would also be interesting
to see the progress from the present in the
not the progress from the present in some other

about the middle of last month I by some
means, my (name) those who was at
