

Dr. Wallich's
Correspondence
1826

I have made a grand
discovery of some funts. (P. 1) ^{of} manuscripts of Buddhist
= fo+*£*€4*re*^d' ^ } I am procuring them for the
College Committee. } Jan 5 1 -
My dear Wallich

A happy new year to
you! Long life & a merry-
my dear fellow - & may you
pursue yr path to the ends
of the world - whence, with
so much zeal, you collect
the means of edifying. l*£ "

I have many odd things
in my possession - of which
I am making, at present,
sundry uses. But you shall
hereafter be the channel
of communicating them to
England. My cousin,
the Dean, will be very
much gratified by some
matter w^{ch} may not be.

liberality, & will see my
let me know it. tho his
professional avocations
crowd into every moment
of his time. My thanks
accept in the interim -
& believe that they are
most sincerely tendered.
I hope you will adopt
my advice of solely tracking
the fellows who are to
come up on Orbell's
account. but if not - &
you & he are determined
to send up your Indo-
Franko-Portuguese. I
wish you would first
put this growth upon
performing a commission

for me. I have written to
Tulloch & Co for a couple of
fox-hounds or harriers, let
your man go to Tulloch
& ask if they are to be
had. & if Tulloch say so
let Francis make his
own enquiry at the other
auction-rooms, & in
case he can, any where,
pick up a dog & bitch
of the fox or hare-hound
breds, let him bring them
up with him. hiring a
native, Borrigan to look
after them - and do you
be so good as to hold the
purse till you can send
me the bill, which shall
be discharged by draft on

Palmer as soon as I get it.
You have lots of acquaint-
-ance among the Ship
Captains - many of whom
bring these dogs from England
I wish, in case we fail in
the present instance, you
would kindly keep my ob-
-ject in view - & aid me
in procuring the dogs, when
occasion offers, by giving
the said Captains a hint
that they may find a
purchaser for a brace
of these dogs. I charge
commission, You will say,
to send to a philosopher!
and so it is - but your
good will to your friends
will excuse me - who

have just now, no younger
& fitter friend in Calcutta
to call upon for this
piece of service. Should
yourself or nephew, hear
of such an article to be
had, remember me - &
I dare say you can also
find some good body
going Patna-wards by water
who will permit the dog
to be put aboard his boat -
& delivered to Dugly's care
for me. Who the deuce
told M^{*f} A. Dugly that Lady B.
was coming here? 'Tis all
a fiction - the relation of
which in your letter
surprised Gardiner who had
not before himself heard
of it! And, I fear, 'tis a
matter wh. may no [^] JU:

I was happy to hear through
you that Bagley is hale &
heartly, & mindful of me.

North, Wallich &

Dear Mother

I had a great deal of business
to all the letters contained by the post
I received by Mr. [unclear] which you may
find as to what you wish some of [unclear]

I have a letter of the 21st June

I have a letter of the 21st June
which my mother informed me that they
were much disappointed at not having
the pleasure of seeing Mr. Wallack
as she had been induced by her kind friends
to buy a house in Yorkshire & settle there

They also withdrew them altogether
Mr. George who had become a great favorite
in the family. Mr. Wallack was then
staying at my father's but was also going to
leave them the next week in purpose to take
George up to Yorkshire. From whence I
believe she proposed going over to [unclear]

But I suppose you have had better
letters than mine

You ask me why I write
so seldom. I have written seven letters to you
by my uncle's book & my only reason for
not writing more frequently is from the
ear increasing too much on your time
which I suppose is not [unclear]

He is now in perfect health, is pursuing
his studies with considerable ardor and
in all respects amiable and promising. his mental
powers are of a high order & his habits of ap-
plication are improving & will improve with
maturity of years & intellect, and his affectionate
disposition conciliates the love of all who know
him. in short my dear Sir, I flatter myself he
will be worthy of his Father & will prove a
blessing to his Parents & friends.

I hope you may have letters from your dear
Wife & family in Copenhagen at least as far
as I can give you, our last accounts from there
are nearly a month old, but they were then
in good health & seemed all to be most happy
and comfortable together. We do expect to
have the pleasure ^{^ ^ ^ C %} of seeing Mrs Wallis
here next summer; and may we my dear
Sir flatter ourselves with the hope of seeing
you also. That would indeed be a pleasure
to our hearts.

The affairs of India are at present fearfully
interesting to us. Robert has suffered con-
siderable inconvenience & loss in consequence of
his going to Sumatra to the Dutch & will pro-
bably be obliged to change his connection in business
& his place of residence. The state of the Borneo
seems also to assume an alarming aspect,
not perhaps in a national view, but the unhealth
& the hardships of the climate & the hardships & privations
of a military life are terrible even
to a mother's heart. I must give you a fair flatter myself
that my dear Mr. Keble may not be called upon
as it has lately suffered much from severe
illness. & I hope & trust that he may soon be
found qualified to hold some staff appointment
which might place him in a safer & more agreeable
situation. — Another & still more interesting
thing has presented on my mind when addressing
the beloved friend of my ever laboring soul
but I will say no more for the present unless
upon some tender & topic until I have the

pleasure of hearing from you. —
a note to them from his youngest sister and
Janice this, others of the family have written
to her lately to the address of Markham St. C.

My - ^***' < *!C ^ «sfe^ < r',

I have just recd your
very kind letter & return you
many thanks for it.
Touching that half caste you talk
of sending up, it appears to me
the worse measure the more I
think of it: for ^{you} know what
foolish folks these sort has are,
& you know ^{also} that with such folks
trifles are weight. Now tho' a
half caste may come. yet his coming
will excite more attention than
that of a mere native. *~ej? besides
his vocation when here will draw
him out of the valley on rambles
to the North & East. & in such
rambles, that man will speed best
who is least heeded by folks jack.
So abel's purpose will be most
effectually attained by the sending
of fellows whose appearance will

never give rise to a second thought.
Why or wherefore they came - & who
will therefore be able to go here
there & everywhere in search of
beasts & birds without their so
doing giving occasion to any unwar-
Pine stupitate, in short, is the
way to succeed most fully - &
therefore, while I assure you
that Francois will not be
interrupted if he come, I cannot
but repeat that a well
native is the fittest instrument
for us to work with in the
present design.

My wish to do all I can towards
the fullest success of D^r's plan
induces me to suggest this view
of the matter to you. Not however
that by so doing I mean to
preclude you & D^r from

the exercise of your own judgment
in the case. nor can it escape
any of us that the point in
question is a trifle, whose
decision, my way or thine, will
not affect the general
arrangement ~~of~~ of the scheme.

Thine affly

W. M. W. M.

My best thanks for thy past
& future attempts towards
procuring me the fox boards.

3/1/26

Dear Sir,

As you so kindly
assisted me, a short time
since, in securing some dried
plants, I venture to trouble
you once more, & should
be extremely obliged if you
will have the goodness to
write the names for me, on
those I now send. — Two
of them were gathered at
the Botanic Garden, the
last time we had the pleasure

of writing it, & you then
told me their names Appleton,
but I am ashamed to say,
they have accepted my money.

My Mother desires me to
inform you, that Capt. Gray,
who will willingly take charge
of the plants, has written her
word, that the paper will
leave town the 3^d next.
instead of the 1st, & will
therefore probably pass the
gardens on the former station
day. I am going to wait

myself of the same opportunity
to send home the very
beautiful collection of dried
plants from New York Isles
with which you so kindly
presented me, & mean to
submit them to a lady in
England, who is as good as
myself of the present, &
will be fully aware of their
value & I am sure, take
very care of them.

With my Mother's kind
complts I remain, dear Sir

Yours &c &c
J. Sturtevant.

Said to be made in
taken care of.

St. Helena 10th February 1826

Dear Sir,

I duly received your Letter and dispatch
for favor of the Egerton, also your more recent favors by Captain
Paton for which I return you my best thanks; the Chests were
immediately forwarded to Mr. Cleblay and the Botanic Garden as
directed.

I have been silent a long time from dire
necessity as I feel no pleasure in communicating unpleasant truths;
and the present state of things on my island is far
far different from the present times from those when you visited the Island
and when we saw to be regretted Mr. Phillips was Governor that
regard to the Garden. They and pray of Woodcut to be as active
as possible and send him all the assistance I can, with propriety
for it requires me to be extremely cautious how I act but I should die
in me the displeasure of the Governor, who seems rather averse to
collecting specimens & was he told Woodcut he was not a naturalist
and did not require anything of the kind. Woodcut is not so active
as he might be for being from under my eye, he sends
into the Company of the Writers and his interference appears rather
to offend than to please as he is of course perfectly independent of
me, he always professes the greatest respect to my advice, but is
apparently led away and does not always follow it, his address
particularly to his Applications to Government and to you, for it
was not until yesterday evening was informed in a letter
written to you requesting to be recalled. his general conduct is
very steady and correct, and I do not hesitate to say that he
will prove to you or to any body who is a little strict with him
a most valuable servant better paid than pulling. He informs
me that the Garden Establishment is so much reduced that it is
with difficulty that he can keep it clear, the number of Mounts
and

For the 18th Feb
1876
Dear Mr. [unclear]
month 9th

Appendix A.
P.W. Island Free School
Special Meeting of the Directors
Present

- The Honble W.A. Clabby Esq. President
- The Honble R. Wilson Esq. Vice President
- J. Nevan Esq.
- R. Caunter Esq.
- W. Henderson Esq.
- S.W. W. W. Esq.
- 6£ R. King Esq.

(Here follow the minute inquiries &c. &c. of the Meeting)
After which

The Meeting resolve that it be recorded as their opinion

1. That the Accusations contained in Mr. Bouchie's (the Catholic Priest's) Letter against the School and the Masters are without the slightest foundation in fact.
2. That in the instances of the Heretics the Roman Priests have endeavored clandestinely to draw children into their own Communion and have baptized them unknown to and against the consent of their Friends.
3. That Mr. Bouchie's declaration that he or other Catholic Priests can withdraw children from the Public School without any sanction or assent of the wishes or judgment of the Parents is in itself a fact and betokening within the knowledge of the Meeting are sufficiently indicative of a Disposition to establish in a Protestant Community & under a British Government the tyranny which they have in all ages been known to exercise in Catholic Countries whenever it has been in their power.
4. That the said... intention to depreciate and injure the increasing prosperity of the School is also evident.

5. That the Catholic Priests endeavour to obtain a
control over the education of the children by their influence
over the minds of many of the Wives of those who have
placed their children in the School and of women of a life
respectable character, thereby causing the wives to be in
opposition to the Husbands and Mothers, being Catholics,
to be in opposition to the friends and guardians who are
Protestants.

6. That such circumstances being now manifestly
exhibited to the Directors of the School, they consider it to be
their bounden duty to make known to the Government
the difficulties that threaten to oppose the Welfare of the
important Institution under their charge and to express
a confident Hope that measures may be adopted to prevent
future interference on the part of the Roman Priests with
the public Institution of a Protestant School which is
under the express Patronage of this Government and of the
Honourable Board of Directors.

I have not the honor of knowing you, but have been
told in a few lines the benefit of your knowledge to the
benefit of the botanical garden, particularly Capt. Allen,
I believe at some place to be near the
the Waterloo of some by the place where a number of
kind of the botanical garden, I have been told to take charge
of it for you, which I take the liberty of sending to you, I am
very glad to hear of the plants which are now acceptable to you,
the least possible time, although only I have filled the chest with
as you see the best time possible, which of course is acceptable as I would
not, and I trust in the hope that they may prove to, if you will be
the free to let me know what plants are worth sending to you, I
to my garden can be transmitted there, whenever I can have an opportunity
to do so. I have this matter entrusted to the care of the florist
my being there.

If I am not acting too much I shall feel greatly obliged
to you if you will allow a few plants to be sent back in charge of the
and that the most acceptable will be.

Rich^d Keogh 26 Feb 1842
Rec^d of James J. Keogh

My Dear Sir,
With reference to your communication
with the Collector of Surruckabad
regarding Potatoes, I may properly
mention that Government is
desirous of making a revenue
contribution to the benefit of Directors
of the Company through a substantial
supply of Potatoes. It is under-
stood that the community is
entitled to the abundance
of Potatoes.

Singapore 9th March 1826
Dear Mr. P. P. P.

My dear Madam
Some little time has elapsed
since I was favored with your friendly
attention of the letter which I committed to the
care of Captain Paton. I have to inform you
of the pleasure of meeting him as I
imagine you will have heard since this of his
having remained a Prisoner in consequence to the
Customs of the East for the present he kindly
provided me with very liberal supply of
newspapers for which you have my best
thanks. Should Captain P. be tomorrow on a
subsequent visit to Singapore I shall endeavor
to do all I can to assist him. By this time
you will have seen our friend of Canton
one more in Calcutta in the improved
state of health.

may offer you my best remembrance
when next you meet. Kindly tender
the same to our friend Adam whose
health I trust continues good. He writes
how you & family are here but says little
of our connection with your friends City of
Palace either direct or by the way of business
So that our anxiety is now become more
considerable and has been increased
by the arrival of a Bombay ship this day
communicating an account of their arrival
at Bombay. It comes so short I should
that I imagine there can be little doubt
of its being strange but the common story
that reached Persia here weeks ago
from Rangoon I deem to be ignorant
of any arrangement of this nature being

in Contemplation. It is a happy circumstance
of you - "a Communion de cordis to be wished
for" as with little exception we have been
suffering with a most uncongenial climate
and that the inhabitants of the Inland
towns of the Day have in consequence of

The great amount of
employment to the Army made
it out that we are to be
attached to the Madras
Troops. This springs no

doubt from a wish to give Mr. Tulliver
as many of his old friends as possible - Hope
Mr. Tulliver was much well by your last
account - pray offer my kindest remem-
brance from me to you both - Mr. Davis
wishes in every good wish with me
Dear Madam Yours ever sincerely

C. Davis

St. Albans 10th March 1846

Honoured Sir,

W^m per care
19 April 1846

In continuation of my Letter of the 6th Ultimo
They leave to inform you that there has been ~ > ej
the Directors of the Institution on the 15th Ult. and that the
following is an Extract from the Proceedings. -

Special Meeting of the Directors
Wednesday 15th February 1846
Present

The Honble W. A. Chubbey Esq. Vice President in the Chair
The Honble R. Abbot Esq. Vice President
Gen. Abingdon Esq. Secy.
Cammeter Esq.
The Rev. ...

The Meeting being specially convened, the ...
£££ " ^44 fLtte & ^.
from ... which the
Meeting ... ~zf, —*— into the ... mjm
from ... guardians in attendance.

Mr Woodford, a Catholic, states, that the Boys placed in the
School by him were not removed by him or with his consent
but by their respective Parents who appear to have been
instigated or rather compelled by the Catholic Priests to this
step from motives of fear. Mr Woodford further states, that
a Proclamation had to have been procured from the Pope
has been found in the Catholic Church in Town, containing
threats and Ecclesiastical anathemas against ... *

Parents as referred to stand ^{^#r^} A~ j£ the Catholic
Sch. **U.**

Mr. Sumbro, a Catholic states, that a similar proclamation
has been read in the Catholic Chapel at Palo Verde.
James Daniels, a Catholic, states, that he is desirous to con-
tinue his child at this school, but has ^{been} forbidden to do
so by the Catholic Priests, that the Catholic Priests have
such detained the Child at the Catholic School contrary to
his wish and threatened to confine him if his father attempted
to withdraw him.

Two Boys of the name ^{*-* yf} Light it appears have
also been compelled to attend the Catholic School contrary
to their Mothers wish, the Catholic Priests refusing to give
them up when she demanded them for the purpose of sending
them to this school.

Mr. Sanchez Rozelle, states that he was detained from con-
tinuing his children at the Free School in consequence of
the **A** made to him frequently as well as publicly in the
Catholic Church.

Mr. Thomas Rozelle, states that the **z:**
been to his house and by the ^{refusal} ^{of the} ^{titles} ^{of} ^{San}
refusal of the titles of San
his children from the School.

Ms Elizabeth Peterson
Anna Pridgen
Melrose Longman
Anna Pundsville
Catholic Committee

Mothers of **&2** Catholic Children who have been withdrawn
for cause forward and confirmed the above testimony
\. *

also, that they have no objection whatever **S**'s
or Master.

The Meeting exceeded **^^^f*****^*** because
the foregoing testimony the prejudicial effects and
influence of the Catholic Priests have established
removal of no less than 4/4 of the Pup **^fr~ * The**
School. It appears to the Meeting that an unusual delay
time presents on the part of the Parents of the Children
continue them in this Institution, but that the fears they
entertain of the Catholic Priests and their threats of
Excommunication altogether prevent **4** in fulfilling
their wishes. - These sentiments were personally stated to the
Meeting this day by some of the Parents who voluntarily
came forth to do so. And the Meeting therefore while they
regard the cause, are **^** to give that ample justice
by all to the **£2** schoolmaster and to the care the
attention bestowed on the **7** studies of the Children.

Signed / **W. A. Blubley**
Chairman

I have again to solicit your pardon for the trouble I give
in writing on this subject but having been pleased here by
your goodness I consider it incumbent on me to state
to you my present difficulties. I dare not take up any
more of your time by commenting on the above and it is
more than probable that you will see Messrs. Freeman
and Bunch two of the Directors of the London Wiping
Society, who are making a tour to examine all the Wiping
stations in the woods, and who have this plan for **£2**

By the same Canal Vessels by which this will reach you
I am intimately acquainted with the subject and can assure
Me any further information you may require.

I am happy to say you are all well and may have
some inestimable blessing is continued to you and
prosperous family.

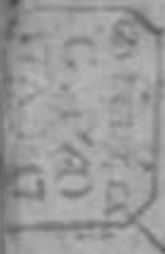

Relying on your kind consideration, I remain,
Ever honored Sir your faithful servant, though
unprofitable Servant - George Porter

My Dear Mother

I am truly obliged
to you for your kindness in sending
me a copy of the melody, which
has my perhaps partial opinion
is wonderfully pathetic & is attended by
a heart fraught with feeling & feeling
in the feet is the source of others feeling

Indeed I think it improves
the often I read it. By the by I
learned from a friend that you were
proposing to erect a monument, by
subscription, to the honored memory
of

If my lamented Father of 20 I
hope you will be so kind as to
allow me some more.

I am delighted to hear that you
have had good accounts from Mrs
Wullock, of herself & the men, but
is not George with his mother.

There is not a bit of news in my
letter, the good advice contained in it
though I hope it may not be thrown away
upon me, would be of no use to
you, Besides your letters are later,
so were I dated the 14th September.

I am quite comfortable here, & loved
by very good Dringland, but I was nearly
dying.

...to send off to Calcutta with
a party conveying treasure to the amount
of three lacks of Rupees to Calcutta.
However the Brigadier is going to send it
with a party of the Orissa Provincial
Battalion. But we are all in a great state
of having to step up to. ...
... upon the determination of ...
... they will strike down
any officer belonging to this Regiment
from the expectations of his three years
term of service or from his intention of
having 5 years. - If the former we must
all go in the 31st Regiment. - However
we must live & hope the best.
I remain my Dear Madam
As ever your truly

W. M. Adams

Francis Louis arrived
at your place on the 23rd of April
and he stays on the 25th. We
will take care of him on his
route through the hills.

But you must presently inform
me what is the amount of
his pay? & how he is to receive
it & through what channel
for a bill's expenses, in regard
on the score of this, you the Duke's
occupation, all to be supplied
I presume prefer F. Louis being
his own account-keeper, &
forwarded of his account to his
master. The requisite cash
can, if I do please, be furnished
by a draft on bills & checked by
occasional inspectors on my
part. I have written to

The outer territories for a
class of Shikari, on S.A.'s part,
to supply Louis with materials
on which to execute his work,
the Shikari's tulub will be 8 rupees
per month. This has been
done, according to arrangements
prearranged with S.A. & now
I hope, under his supervision.

The Residence of the
Messrs. [unclear] is
[unclear] of the [unclear] [unclear] [unclear]
[unclear] that this arrangement is
entirely a new experiment for
the success of which no one can
pledge himself. The case however
proves its expediency & should
its introduction into the other
proportions of the [unclear]
Government, [unclear] [unclear] [unclear]
of S.A., will [unclear] [unclear] [unclear]
from [unclear] [unclear] [unclear] [unclear]

[unclear] [unclear] [unclear] [unclear]

Memoirs

Adverting to the probable shortness of our stay in Pegu & Ava, I beg to bring under the notice of the Commission the expediency of making an application to the Government, for the temporary services of an experienced Botanist, for the purpose of examining into the vegetable products of the interesting countries of which we are at present in occupation, and especially for investigating into the nature, extent and quality of the teak forest, a subject of national interest, the importance of which it is unnecessary to insist upon. Should the Government be able to spare the services of D. Wallich the Superintendent of the Botanical Garden, his talents and experience will ensure the accomplishment of the contemplated service in a degree beyond what could be expected from any other individual, and therefore I have the honour to suggest that his name be suggested to the Right Honourable the Governor General in Council.

Glasgow. March 31. 1815.

My dear & excellent Friend

You have indeed made me very happy by your long kind letter of the 24th Feb^y, which has just been brought to me by Mr. Ogilvie. The gentleman was so good as to come & breakfast with me & tell me many things of you & of our noble London & of Bro^r Mr. Stur. All he says indeed on the subject of our mutual friend fills your letter, your statement respecting him. He was continually for the effects of the climate on his constitution, knowing as I did what he had suffered in China. Surely he would follow your advice in that of a most sincere friend & one who from experience knows so well the nature of the climate he has to do with.

Now I must tell you what surmises I have been making since last year at this time, when I heard from Mr. Colbrooke that Mr. Wallis & some children were on their way to England. At length about 3 months ago I thought I was on the point of hearing all particulars about them for I dined with Capt. Blair of this city who told me that they came to England in his ship. And all that he could tell me further was that he believed they proceeded at once to Scotland for the purpose of leaving you at Aberdeen.

I should hardly credit, for I could hardly
think she would pass by ^{me} ~~me~~ ^{to go North} ~~me~~
without giving Mr. Hooker & me the opportunity
of paying her some attention. At last, I
about 3 weeks ago Mr. Wallich [^] was so
kind as to write to me from Copenhagen about
she does not say whether she has been to
Scotland, nor whether your son is at school
now. This, however, I shall soon know for
now that I have got your letter I have writ-
ten to Mr. Deane not only to ask if your son
is there but also to say that during the
vacations he may be permitted to come &
visit my family at Glasgow. This request
too I have made to Mr. Wallich. You can-
not think how happy I should be in the
opportunity of entertaining the two young
men who has pleased me by his correspondance
his presents of plants & above all by his
affectionate regards, such unalloyed pleasure
You will more certainly come to England
too, when Mr. Wallich will be with you
& you will increase my happiness by coming
to Glasgow. This you promise & I shall
the remind ^{you} of this promise till the time
I shall be in the country.

some when it will be performed.

Mr. Byrd came on from London so soon after
he learned that of your packages he could only
bring with him the bottle full of Lyellia, in
spite of the many state in which was in it
unnecessary to see the plants for the preservation
will be in as fit a state for examination
as when it was first gathered. Your other
packages of treasures have however passed
the Custom House, & are, I expect, on their
way to you. I long most earnestly to see
their contents, for I am sure of an infinity
of things to interest & instruct me.

You ask what has become of the truly
valuable collections you have sent to the
Royal Society. The Directors have at length
come to the resolution to make a division
of the duplicates, between Mr. Greville, Mr.
Smith, Mr. Smith, Mr. Smith, &
myself. I had to make repeated applications
through the most powerful
members of the Society, & my much
indebted to Genl. Rawlinson & Mr. Smith.
I have however often probably from not being

on the spot when the first division was made I lost all my share of the Terns. There have been already two distributions, which distributions are left entirely to Dr. Horsfield & I am sure he will do justice to all of us who are interested. But you will still see that when the division is over so many, there are several species that some of other of us must be deficient in.

I particularly regret the loss of the Terns, because, as you will see by some plates I have already had engraved, they are great favorites with me & I am preparing a work in folio with figures of new or little known species of the family.

I have already written to Linnæus on this subject & told him that if he declines publishing the Nipal Terns & you are so good as to allow me to take them in hand, I shall soon get his answer. Even though he were to describe them he would not give figures, because of the great ex-

peruse of the drawings & Engravings. How
much I reckon upon seeing your Botanical
Flora Nepal. Illustr.! & how glad I am to
find that you can issue plates, as well
as descriptions, from the Calcutta press.
We owe you many thanks too, for these
choice seeds for our Botanic Garden. A
hot bed frame is already prepared for
their reception: & I am reckoning, occasionally,
upon finding some new Myrtles among your
collections in that department.

My system of Plants is still delayed,
which I reckon to be all to the advantage
of the public, since we are almost daily
getting new plants. There has been a
sad blow given to literature, as well as
other trades in this country lately. My
Publishers, White & Carter, have had to our
surprise a small amount. It was lucky I had
not begun printing; & I am not in a

valued with him.

Remember me to Abel, to whom
I shall write soon. He & Mrs. Abel will
be sorry to learn that Mrs. Hooper has
suffered severely both before & after
her going in in October last. She is
now better & I hope the warm
weather will quite restore her. I
can feel for you in your solitude &
sincerely do I hope it will induce
you to hasten your departure from
Calcutta. Let us have ~~some~~ a most
happy meeting in Glasgow. I
did not expect to see you soon. I
would wish you to send me a little
portrait of yourself, if it were but
in profile. It should be placed by
the side of Abel & Brown, a brother &

My dear Mother
I have just
received your letter
of the 10th

Thanks very
much for the
letter. Believe me
I am very
glad, my most
sincerely
affectionately

Quebec

In that you were going to commence
 a new work - If you wish it. I shall
 be most happy to contribute descriptions
 of specimens of such plants as ^{to be} ^{sent} ^{to} ^{me} ^{if} ^{you} ^{give} ^{me} ^a ^{little} ^{time}.
 It takes in general at least one month
 for an answer to a letter to reach you.
 If I knew a little before hand the ^{of} ^{your} ^{name}
 you were likely to be employed on I would
 send you out my specimens & also rough
 descriptions. which I could in a short time knock
 up & send down to you. When you would
 at once ascertain whether the plants were
 new or not. - I. - two *Prunella* I did not
 think distinct enough for species. tho they may
 be as varieties - as all the plants which he
 flowered here of $S^6 / etibani. M^A$ contained
Colletia hirsuta. The *P. dentata*? The ^{is}
 said description to determine it by the specimens.

U~ I v *' is certain of 9i inch £**-& lines the
 4 But I have been in the habit of considering it P.
 but a little after Morrison would
 come this. But without plates to refer to. I wish
 expect such difficulties. I hope you will excuse my
 H. de V.

not search to my end taking sufficient trouble
 to distinguish "Kinds of a feather" or to a end
 to make species which some exceed I
 believe I mentioned before. That I have long
 considered many descriptions, which I
 should of course wish published some time or
 another, as some of the plants must be new.
 Judging by those you found to be new and
 you lived to the place last year. This
 year I have a considerable number to show
 that were not in flower last year. The
 plants succeed admirably well. I almost surround
 them with leaf mould, & the effects are obvious.
 I have been employed daily in describing plants
 that come into flower. Daily want some one
 to make drawings of them. Several practices
 being so busy, - r^, // ^) time or of my time
 being not ^/^1. a^fS-y?). Several Umbellifera
 appear to me quite new, but I have not strength
 to determine on that family. An Anemifolium
 without leaves come into flower a year ago.
 a. bromioides pa. the Atlas. - Delphinium
 I am going to reconnoitre my Catalogue
 with you down the Shute as I describe them
 the first that I am going to send a copy of to my

friend Adam. to give her opinion about them.
It contains no botanical information, but some
medical - as soon as I hear of them the plants
in flower I will send it down. I will beg
your opinion upon it, as I should like to know
y^u ^ y^u as to answer the purposes of the
Medical Society. I must be of opinion of their
great utility. I should feel obliged
that I might be permitted to retain it.

To Medical plants & those useful in the plants
I have for some time I mean to go on paying
the most attention to

agreeable to your wishes. I have the pleasure
to send seed of the *Renella hyspanica* - it was
sent down once before, but I must trust my Botany
to write the names. This I shall be able to do as I
know the Catalogue. The *Renella* *Boissierii*
found no seed last year & this year it has not
flowered. The *Tenorei* is again in flower, if it
forms perfect seed, they shall be sent you, but very few
of the Hill plants form good seed here. It is almost
impossible to get y... of any r / particular plants by sending
into the hills. It is necessary to have some one of the
who know our plants from another, but I mean to make
a few more of them practical Botany. The people are
generally being things on a map & I am obliged to select
but we are improving every day - You should see
has come up l... ^ great plenty. I have not heard from

that I enclose. I trust I shall feel
obliged by you giving him. & it then
is some Gypsum. lately found at
home. from the Lucas & Thara (idea)
I will send a lot of other specimens
as my collection are fast increasing.
You shall hear again in a few days
In the mean time

Believe me

Yours sincerely
J. May Jr

My dear Wallcut

I was extremely sorry to hear
by yours of the 4th that you had again been
sorely; I had a notion of that about the
fever. I am glad it left you so quickly
as to have no bearing on the attack. I should
have replied to you sooner. As I have had
and am under some of it. in attending to a
few ^{&'* <... ^} As'~sft~9. — what can

be to my home but a severe attack of
Colic — the beginning began last night and
has a couple of days after this. I shall
try to leave it longer & longer. but nothing that
he could do had any effect in arresting the complaint
he had been ill 5 or 6 days before he said in hand —
I did not he had been here a week. He had
before he was of the 3rd day — he was — very
before him. I am sure by the Public Spirit.

I send you the first part of my letter. The
remainder shall follow tomorrow. ^{^1i€_}
I hope you have been fully.

Believe me to be
Yours
J. Wallcut

To

Asst. Commr. of M. S.

Superintendent of the
Botanic Gardens

Belgaum

Sir,

I am directed to ~~be~~ for your information
the accompanying copy of a letter dated the instant
from Mr. Evans ~~is~~ final enclosed.

You are requested to report your opinion on
Mr. Evans' suggestion that he be employed to promote
local researches in the region of the Nilgiri Mountains,
and if you should deem the despatch of that gentleman
to which Mr. Evans' attention should be specially directed.
Communicate your views verbally with regard to the
in which such Botanical survey, if determined on, should
be conducted.

To assist your judgment in the execution
the orders now ~~is~~ to you, I am desired to furnish
you with the enclosed copy of the Instructions which were
issued to Captain Herbert on the institution of the Botani-
cal Survey of the Nilgiri Mountains on the 3rd July
1833.

Council Chamber
the 25th April 1826

I am
yours
Signed / G. Lushington
Chief Secy to Govt.

Service

Sir

Now I request the favour of your laying this letter
with its doccs annexed before the Right Honble the
Governor General in Council.

Referring to the different extracts of the orders of
fate (Jw-*Cf& Court of Directors and of Government some of which
are annexed in which they have done me the honor to
approve of the Ptti-S&*€/ 9&* & to which my attention was
directed in the news relation of the M... of
the Himalaya Mountains as also to the Court's late recom-
mendation to Government with... in honored me,
may I hope that the pursuits in which I was engaged
and of which an outline... having
been interrupted

I may either be restored to my situation
of the Saharunpore... the same subject
... garden, or leaving the charge
of

of the Garden to the resident Medical Officer there. Some addi-
tion may be made to the travelling and Bill Establishment
allowance in order that the part of the duty which has ^{been} al-
ways found quite incompatible with residence and the Med-
ical duty of the Station viz £ - (fit 6*x, qu*. < 4#tsS the Natural
History of the Himalayas may be held by me as a sep-
arate appointment. My

to the
I am or I should be much interested in that important and interesting
branch of Natural History, the Geography of the Plants and
Vegetable productions of the Himalaya districts a subject
equally worthy of attention, whether considered with reference
to the foreign vegetable products capable of being introduced
there, to the ^{best} advantage and improvement of the dis-
tricts themselves, and direction of the industry of the popula-
tion to the development of those resources over which their
welter varied soil and climate give them power, or to the
valuable shrubs and ^{4u} trees capable ^{4u} to be furnished from
them to our own Native Island whom I have been pleas-
ed to observe of the Himalayan Plants flourishing
as in their native soil.

Should the time and attention which I have ^{fr*} de-
voted to these subjects appear to merit a continuance of Gov-
ernment's encouragement, I should wish to have informat^{1**}
£. 100

given me, in order that I may collect such information as
may be such as may be as may enable me to enter on
my duties with advantage. Should no more eligible
persons be available for that purpose nothing could more

procure my resignation than being appointed to act for
Hallist during that gentleman's projected absence in the
Eastward.

Copies of Documents referred to

Extract from a Public General letter from the Honble the Court of Directors dated the 28th June 1779

Answer to 2^d Public Letter dated 28th October 1779

Relative to the arrangement
to be adopted for the manage-
ment of the Botanic Garden
at Seharumpore

86

We have perused with great pleasure the very interesting Memoir by Dr. Gouan upon the advantages derivable from the Botanic Garden at Seharumpore, connected with the object of exploring the natural History of the Himalaya Mountains, near the base of which the Garden is said to be situated.

87.

Although it appears that at its first formation in 1779, a very liberal provision was made by the Mahrattas for its maintenance, which was continued till 1801, and then reduced to a more moderate sum, yet there is but too much proof, in the documents now before us of the Garden having gone into a state of rapid decay whilst under the immediate charge of the Native

88

As you entertain a strong impression, from the various local advantages of the Garden, especially in regard to climate and soil, and the rich resources of the neighbouring Countries that with proper management considerable advantages would be derived, not only to science, but in the conduct of the affairs of the Company, we shall not withhold our sanction to any moderate Expence which may be incurred in promoting the objects of so useful and laudable an Institution.

89.

With this view we approve of your having

Dr. Gouan & M^r ...

A

be Superintendent of the Botanic Garden, whom you have represented, from his education and pursuits to be well qualified for the trust, with a salary of 200 Rupees per Month, and an allowance for a writer of 50 Rupees per Month. We also sanction the charges for the subordinate Establishment of Rs 200 per Month.

90. The total Expense therefore to be incurred on account of the Garden is about Rs. 5000 per Annum exclusive of the contingent allowance for travelling charges to D. Govan, of 6 Rs. per day when employed in the Hills, in prosecution of Botanical Researches, of this sum 2350 Rupees per Annum arise from the rent of the three villages formerly appropriated by the Mahrattas for the maintenance of the **\$K**A~4.&J+** considered only as an appendage or Nursery of the Parent Institution at the Presidency, we desire that the Expenses of the Botanic Garden at Seharunpore be confined as nearly as possible within the limits which we have now sanctioned.

Copy
The sum payable for the Expenses is about Rs. 39200 per Annum

Actual Extract

Extract from a Public General Letter from the Honorable the Court of Directors dated 21st March 1823.

269 @ 353) Reports received through the Board of Commissioners in the western Provinces of the state of the Botanic Garden at Seharunpore

86. We have perused with interest the Reports respecting the Botanic Garden at Seharunpore.

87. The suggestions which you made to the Superintendent of the Botanic Garden at the Presidency with the view to promote the interests of the Institution at Seharunpore, appear

to us *J*if# we have very properly we are sorry to observe that
you have been deprived of the services of the Superintendent
D. Govan in consequence of his having been compelled to
proceed to the Cape of Good Hope for the recovery of his health

Bot: h + ** & 24th April
1820

My dear Sir,

The concluding observation
of your favor of Saturday last made me
I confess a little uneasy. I allude to your
not having received the decision of His
Lordship regarding Dr. Abell taking charge
of my appointments during my absence, a
point of the utmost importance to me.

Having the honor of dining
yesterday at the Government House I had
an opportunity, both before and after dinner
to mention the subject to His Lordship,
and I feel most grateful and happy
to inform you that with the docility and
boundless goodness of heart peculiar to that
Nobleman

Nobleman he was pleased at once to comply with my anxious request in favor of an arrangement, which he intimated was perfectly consonant with his own wishes.

This being the case may I be permitted to suggest that upon ascertaining I have not made any mistake respecting it, You will be so kind as to advert to the arrangement in question in your public letter with which you mentioned you would soon honor me.

I intreat you to pardon me for taking the liberty of addressing you on the present occasion and I have the honor to be, with the greatest regard

My dear Sir

Yours much obliged & grateful
G. Swinton Esq. Servant
y. y. y. (Signed) N. Wallis
Please to turn.

P.S. Permit me to observe that my
appointments are those of Superintendent of
the Garden and Superintendent General of
Government Plantations. Secretary to the
Plantation Committee. The two latter are pro-
perly speaking consolidated into one office,
since I draw an aggregate rate of allowance
for **£#£r®r?** is a member of the
Committee, and during my late journey to
the forests, he officiated for me. My pre-
sent deputation, I conceive is to be con-

revised

needed with all my charges.

Signed, N. Wallich

A.

C. Lushington Esq.
Chief Secretary to Government
General Department

Sir, I have the honor to acknowledge the receipt of your letter dated 27th March and in reply thereto I have to state that I went over the ground therein referred to both with D^r Wallish and the Rev^d Mr. Hall and carefully examined the premises; the Bishop's College also, and herewith send you a Plan taken from survey of the latter & enclosing the piece of ground they now wish to acquire.

It appears from the survey that the said Plantation originally contained 30^{sq} ^{ac} of which quantities 6^{sq} ^{ac} 1^{sq} ^{ro} 3^{sq} ^{po} or 3rd part of the whole, was given to the Bishop's College and that the part that they now desire contains 26^{sq} ^{ac} 5^{sq} ^{ro} which, if granted, would be a deduction of 1/3rd from the said Plantation or more than 1/3 of its original extent. It also appears that the piece

for which the College require this ground
are chiefly with a view of building ac-
commodations for the Native Teachers and
others, attached to the College, according as
the institution increases & its funds admit
of it. For Building purposes the part
marked A is the only part at all calcula-
ted for any thing of the sort. The re-
mainder all, except the Road of the Bota-
nic Garden, which is a bend, is very low
and swampy and unless a considerable
expense was incurred, would be unfit for
almost every purpose. With reference
therefore to para 2.^d Para. The only part
that could be alienated for a Garden or
for Building on, is the back part mark-
ed A with the corner **& 3t*** affixed to it
that the Public Road under the name of
Ghaut ***?+** will not be included in it.

3. It however appears **"X**
that it is unnecessary to take this
ground from the **K** Botanic Gardens, for if
the Kullah marked B was dug deep
(being now dry in parts) it would afford
earth to raise the ground **^..** **C**
which would answer excellently for a
Garden & by making its banks more
regular add considerably to the appearance
"
of

of the whole place, and its design for

4. It also appears from the
enclosure, contained in your letter, that
the College,
is decidedly unfavorable for gardening or
for Botanical purposes in its present state,
a remark not applicable to the ground to
the north of these premises belonging
to Barnwell & a Station which is
highly cultivated and probably, not to

side of the small Nutter, which divides
the good from the bad soil. I should
therefore recommend, that Garsdenians should
occupy not this field, as far as it runs
thru the College grounds, and save
the hard stuff which, from its extent, is
amply sufficient for all purposes of an
ornamental and useful nature

5. I take this opportunity of
proposing st simple ^{age} method
of raising the whole of the ground
before ^{am} referred to, so as to avoid it in
line to the level of the other parts of
the garden and with a list probably
better than any other part can boast of
which would render it the most valu-
able part of the garden. This is
simply to ^S convert a thicket, so as to

enclosure

overflow the low land during the time
when the River would deposit a rich and or
habitable soil, and as soon as the water
became quite clear * I might be drawn
" another sluice, and the operation
performed repeatedly, during y Sjf* (during the
season, by which means the ground would gra-
dually raised and improved at the same
time. - It is found by experiment, that the
Gauges water carries 2 cubic **** &+ of rich
soil in each cubic foot of water during
the rains and to very badly answers out with
the bunding system, the efficacy of the
means proposed, will be evident as well as
the fact of itself visible here where there is
a strong current, that the river must de-
posit this earth, and will naturally do so
easiest, where the strength - "f sE < current
is least or near its banks, and that thus
the point between the river & the road or
bank, which is -r^v-X' ' ^ ' river from over-
flowing this every ground is now be-
come higher than the ground behind
the bank. It only remains to suggest
that the Superintendent of the Pictou
Garden should be furnished with a
small pile engine, as the manner in
which the Piles are now drawn and

Superintendent of Botanic Gardens

Dear Sir

So

I am directed by the Right Hon^{ble} the Governor in Council to acquaint you that at the recommendation of the Commissioners in Council for the Government has determined to desire you to make a botanical survey of such parts of the islands of Siqui and Mantaban as may be accessible to you whilst they remain under the British jurisdiction and eventually to make a survey of the Siqui Islands to the East India Company to the Eastward of the Tabaco Islands and on the East of Sinafutan.

You are authorized to enter into an establishment similar to that which attended you on your late voyage as an extra expense not considered by the late Act of Parliament.

You will draw a personal allowance of £1000 per Annum

in advance of their actual allowances for three months' service
money from the 1st of June.

Under the circumstances that by the conveyance of yourself and party from place to place
whether by land or water while employed on deputation

to the Eastward, I am directed to acquaint you that the Paper

of the Governor General Council has been pleased to resolve
that the actual expense which may be incurred on that account

shall be defrayed by Government and that authority will
be given to Mr. Crawford the Civil Commissioner in Awa, to pass

you bills for travelling charges accordingly. In granting this additional
indulgence the Governor General in Council relies on your

observing the strictest economy in your disbursements under this head.

You will furnish to this Department for the information of
Government from time to time detailed reports of your progress of
proceedings in the Botanical Survey in which you are now about
to be employed.

I have the honor to be, Sir, your obedient servant,
G. S. Williams

...
suggested the nature of that comprehen-
sive sphere, to which I ^{would have to direct} your attention
~~will be directed~~. I have not the slightest
hesitation in saying, that the detail of
his duties ^{might be} ^{at property and} ^{^~4&} ^{^e/c}
~~may be~~ ^{entirely} ^{confided to his}
~~own judgment~~ ^{own judgment} ^{and} ^{discretion}. There should
be no paragraph, to doubt the necessity of com-
bining, on an occasion, ^{it} ^{that} ^{^e/c}
the immediate objects of History
with those of Geological and Geographi-
cal enquiries. It would be the Doctor to
effect this combination of duties, it is re-
asonably desirable, that he should, as far as
possible, be furnished with a complete set
of meteorological instruments, ⁴ ^{4 €**} a
suite of chemical ^{apparatus} ^{for}
the purpose of constituting such analyses
as occasions may, be pointed out to him, and
lastly

that he should be provided with
lastly, some of the most indispensable sur-
veying instruments Independent of the

... .. CA

afford him for carrying on a continuous
series of observations, they would be the
means of making that comparison
with which the labor of his predecessors; which

is to be determining and in-
determining, elevations, positions &c. I would
believe by leaving to them
the

a couple of draughtsmen and
an artist, whose assistance would be of
the greatest service to you

that in the present primary objects
of his mission that Office would not be
light of such of the other branches

Natural History, as might occasionally
fall under his observation, and that he
would

would avail himself of every opportunity
of enriching the source of Zoology and

by collecting specimens and preserving specimens

Mineralogy. Similarly, I beg permission
in the event of the reputation being resolved upon,

to recommend that Dr. Gouan ~~may~~ be con-

stituted to supply this institution as

often as circumstances ~~may~~ ^{shall} admit of it

*with seeds, roots, growing plants and
dry specimens, accompanied with such
observations, as he might deem proper to
place at the disposal of the Superintendent.*

It is hardly necessary for me to

point out the great importance of his

directing his particular attention to the

Agriculture of these tracts, which he may

also, in his collections, very possibly in-

clude, respecting the articles and modes

of cultivation, and promoting such among

the former, as ^{may} appear likely to

become objects of useful introduction into

the plains of Hindustan, or of transmigration

to

foreign countries, especially

to Great Britain. There can be no doubt

Jfrw <*t&*i.Q with a variety of ^{valuable} medicinal

plants, which might be either transported

to our full advantage, or in their

native places even, become objects of some

great importance, as affording useful sup-

plies of drugs for the use of the British

Company's Dispensary

I have the honor to be

Sir

Belton, 4th May 1825

importance

importance of this being done on a scale
of efficiency, which may tend to secure the
fullest realization of the anticipated re-
sult. In the hope that I have not
failed in this part of the duty which
has ~~been imposed~~ ^{been imposed on me,} I now proceed to
a consideration of those points to which,
in my humble opinion, attention should
be paid, with reference to the mode of in-
ducting the survey in the most advan-
taged manner.

The field of operations, which
I ~~should~~ ^{may} recommend ~~might~~ be assigned
to Dr. Govan's researches, is the ~~re-~~ ⁺ ~~gion~~
which was fixed for Capt. Herbert's general
survey in your letter of instructions to
that Officer, dated the 3rd July 1823, a
copy of which was communicated to me
in your letter now before me, namely the
whole range of the snowy Mountains, in
the

the more extended acquisition of that term) comprehend with the State to the Eastward and the Turkey to the Westward, now including the principalities of Luleburg, Samsoor and Peshawar. My reasons for ~~advising~~ ~~that that~~ ~~whole~~ ~~was~~ ~~supposed~~ ~~of~~ ~~the~~ ~~Country~~ should be laid down as the same of Dr. Grant's labors, is my having ascertained from the letter just alluded to, that it was originally in the contemplation of the Government to attach a naturalist to the survey in question. In fulfilling that intention now, additional advantages would be derived from Dr. Grant being permitted to have access to such of the valuable observations which have accumulated during the progress of that Survey, as might be of ~~beneficial~~ ~~service~~ ~~in~~ ~~promoting~~ ~~and~~ ~~facilitating~~ his inquiries. As far ~~as~~ ~~concerns~~ ~~the~~

Advantages

are concerned
advantages, they leave to ~~*/<u/**U.f J-XoS J*/~~
could be very desirable if the Doctor ^{was} ever
put in communication with the Superior

instead of the ~~... ..~~ ^{...} but it
not obvious it would be conducive to any
useful purpose, to attach him more closely
to the ~~... ..~~ ^{state of the}
~~... ..~~ ^{<JL**} ~~... ..~~ ^{... ..} not advanced, progress. On

the contrary, I should respectfully suggest
the propriety of Dr. Cowan being author-
ized to prosecute his examination on what
ever ^{specific} tract of ^m ~~... ..~~ he might
think proper to select in the above men-
tioned wide field, for each season of his
excursion, ~~... ..~~ ^{... ..}
to the ~~... ..~~ ^{... ..} among these
sanction to S. A. St^rtion.

of ~~... ..~~ ^{... ..} ~~... ..~~ ^{... ..} the immediate
objects of this ~~... ..~~ ^{... ..} the designation of
a ~~... ..~~ ^m ~~... ..~~ ^{... ..} spontaneously sug-
gested

which have marked its progress since the
commencement of the ¹⁸ century.

In order to enable us to form ^{an} adequate idea of the Flora of any ^{given part,} ~~country~~

or of all such a country as that, to which
I am now addressing, it is necessary, in ad-

dition to the above-mentioned points, to at-
tend to the relations which the Plants bear

to the physical Geography of their respec-
tive stations, ^{to mark} ~~and~~ ^{absolute and relative} ~~then~~ ^{to} ~~compare~~ ^{them with those} ~~with~~

those of other regions, ^{and} ~~considering~~ ^{also} in the nature of their ^{formation}

the similarity of their ele-
vation or latitude. ^{if} ~~As~~ far as regards

insulated portions of these ^{islands} ~~islands~~,
much has already been effected by the col-
lection efforts of those ^{travellers} ~~travellers~~ ^{and} ~~and~~ ^{A#i}

travelling travellers, who have from ^{some} ~~some~~
to time visited the ^J ~~Islands~~ with a view

to the purpose of ^{examining} ~~investigating~~ ^{botanical}

botanical matters, or collaterally with the
view ^{on the investigation of these} to their progress, as well as by those
collecting parties, who have, at occasions
would admit of, been sent ~~to~~ from
Himalaya and the Valley of Nepal, particu-
larly under the auspices of Sir Robert Col-
clough and the Honble G. Gardner, whose
active cooperation
I have, especially that of the latter, I have
so often had occasion to notice in my let-
ters to you, and whose ^{wonderful} ~~valuable~~ accom-
plishments I cannot ever allude to, without feel-
ings of admiration, respect and gratitude.
Permit me, Sir, to
~~introduce~~ ^{introducing} in this
place the ^y names of those mountains and
ridges, who have thus daringly attempt-
ed and successfully surmounted the man-
ifold perils and difficulties, which are un-
surmountable from a distance among ^{such} these water
regions. They are the following: ~~the~~ ^{the} ~~names~~

that very Botanist

It is a pleasure on which I have no objection to over-
the Himalaya I am now called to report
my sentiments. Mya God, Mr. S
Frank, Mr. H. Wall, & some others
Herman: the three brothers A. D. and
G. S. Curran, and lastly that justly es-
timated traveller who has permeated his
life with much research to explore the late Mr
Kearney.

5. The opportunity, which now
presents itself of filling up the existing
chasm in our knowledge of the ^{Himalaya} Flora

of the Himalaya is of a nature which, if
rendered available, ~~would be a source of~~ ^{cannot fail}
being attended with ^{complete success.} ~~the finest results~~

Of the perfect ability of Mr. Curran to per-
form such a duty, of his eminent quali-
fications to execute the undertaking, alike
with credit to himself and benefit to the sci-
entific

scientific Mr. Sel, is, would not 4t -/ light of

presumption in me were I attempt to

offer my feeble testimony, especially in an

unsuccessful attempt to

Royal Society of Edinburgh through one

of their Vice Presidents in the extract from

the Military Annual letter from the Hon

ble the Board of Directors bearing date the

his

To,

to Lushington Esq

Chief Secretary to Government

General Department

Sir,

267 269

I have the honor to acknowledge
 the receipt of your letter dated the 3rd Ult
 with its enclosure, & desiring me to
 submit my opinion on the expediency of
 deputing ^{r t S} ~~Mr~~ ~~Robert~~ ~~Scott~~ on a botanical investi-
 gation of the Himalaya, and on the expedi-
 ency of such a measure, if determined
 upon by the Government, might most ad-
 vantageously be conducted.

I In order to obey your instructions
 in a satisfactory manner I beg leave to
 present the following brief observations, in
 which I shall ^{myself} humbly confine to that
 branch of Natural History, which con-
 stitutes the principal object of the proposed

travels.

undul H 71

3 The history of this vast Empire HA/

attracted a more than usual degree of interest among men of science since the marvellous period when the conquests of the British arms first extended our possessions and influence towards the gigantic ^{<^JB} region

of North of Hindustan, and the adjacent countries from the ^{/^y, ^e .} of Tartary. ^{/w ^ ^' -} ^{certainty}

has been ^{&<} chiefly excited by the ^{knowledge} which these ^{mountains} ^{to be established} ^{A+***} ^{subsequently obtained} of the ^{>Uf -} ^{city}

of that range and its ^t ^{mountains} ^{on} ^{yielding to no other} ^{in the known}

44 ^t ^{old} and in several instances even ex-

ceeding as [;] ^{as a} ^{4m} ^{4L} ^d ^{up} ^{+*e/r} of perpendicular height. the loftest peaks of the ^{the}

It had been indeed the ⁱ ⁴

Historical sites of the Himalayas, and in
a corresponding proportion surface in reality
and i 14*U4S, » • • • those 4f& with other Moun-
tains, however great A**4t and majestic. The de-
tached portions of its floor, which have hitherto
been accumulated, have abundantly con-
firmed this conclusion, they have justified
the most sanguine expectations being &> sta-
tained. The prodigious number
and variety of plants, which that glorious
field must produce, and they have raised
a general interest to those ^{near} acquainted /c+tsA
the vegetable treasures of those hills, hitherto
little known, and yet so intensely interest-
ing require. The attainment, therefore, of so
desirable an object as ^{a correct} ~~the~~ an accurate
knowledge of the History of the Himalayas,
it will be readily acknowledged, must pos-
sess a strong claim on the liberal ^U 1 ^ < ^
encouragement of a Government, which has
never

can be wanting in promoting with its
 powerful support, a system which would be likely
 to hold out the prospect of useful
 demonstration and thereby ~~produce~~ ^{multiply}
 in consequence of the number
 of persons ^{conducing to the advantage} ~~conducing~~ ^{to the happiness}
 of mankind at large.

It is, however, not the same
 investigation of vegetables which reference
 to the absolute number of their species,
 the striking features of their structure,
 the endless variety of their forms, their or-
 dinal properties, their uses and catopical
 determination among other countries, &c.
 are sufficient to
 not these objects alone, which shall satisfy
 the ends ^{of History} ~~of History~~. Though very important
 in their self, and constituting, put up,
 the most obviously useful part of ⁴ ~~the~~

To promise the completion of an early
period

Miss Jackson's lines are written with
much taste and excellent feeling -
yet it appears to me ^{with} -A_a as somewhat
is not a description of poems well
-adapted for an inscription on a
monument. - In fact an
inscription whether in Latin or in any
language, to be powerful and

elegant. "Ux^^
to be brief. - No man takes his time
to express an idea which he never
communicate in verse. - Altho' all that

may be said of the
Jack it would still be regarded by the
world in general but as an specimen of
that practical business so proverbial on
franks and which might be given
characters being judged of from anything
rather than from their monuments.

Ever yours ever faithfully

Culluck 15th May 1770
only 21st

My Dear Wallack

I would have written
you ere now, but that I have been
compulsed to bed ~~for~~ the last twenty
one days with a very severe bilious
attack, with fever, & ague, for which
I have been sudorific till my teeth are
all shaken, the ~~the~~ days I am now out
of danger, & in a fair way to recover,
I am still so weak that I can not sit
up longer than ten minutes at a time.
I had very pleasant accounts from Robert
of the 11th February which I shall give you
more in detail when I am a little
stronger.

Could you take the trouble to purchase
for me a good quantity of the Sugar
of Sedition Powder as it is recommended
to me by the Dr. & I have found his
stock as it would be very expensive
buying it in Europe. ^S You will
perhaps be good ^{enough} * to buy the
ingredients by the weight & send it
to me by South's barge if you will
send me a ^{IC} receipt for the preparation
I will account of the expense. I will either
forward you the amount for London or
you may put it to my ^{account} with
Messrs. Markintock & Co. allow me to
congratulate ^{you} on your approaching promotion
as I hear there are twenty more Burgesses
about ^{to} be added to the ^{4*A} Corporation.
I am this incredible sorry on
account of weakness.

Give my best Complts to Mr. Collier & my
very good friend Brewster & allow to
subscribe myself My Dear Mr. Wallcut
Yours most Sincerely

New York

A. B. A letter in the margin would greatly oblige
Yours Truly A. B.

To
Dr. Wallcut
Colchester

Handwritten text in the middle section, possibly a name or title.

Handwritten text at the bottom right, possibly a date or signature.

My Dear Sir

21

I return Dr. Wallis's letter with many

thanks. From the description given

herein of the peculiar *ti* is of climate

u~p?^| - <'

I feel convinced that the attempt

may be made at Lythet with the

strongest *qu* *^M---^^-B** in anticipation

success. Had a person been *v'»"* describing

the climate of Lythet he *r- . «* would not have

done it with more minute accuracy

than Dr. Wallis *f ^ * . / t . ^4 -* in delineating

that which is propitious to the culture

of the *ti*. I have now resided here

for four years *^ * ' /* *^ * . k-* and enjoy myself

X

We have rain every ^{l<-*~<} throughout
the year; from June to October, violently;
& during the remainder of the year,
occasionally heavy, & never with any
very long periods of intermission.

I do not think Mr Smith made the
attempt & as some of the residents now
at the Station ^{< 4} & his contemporaries
I know not how to ascertain the point.

It is indeed greatly to be regretted that a
more able & respectable successor to Mr Smith
has not been provided. Dr Walsh appears
suitable of the other worthiness of the present
incumbent, & as he is not a private
servant, but receives a handsome
salary from Govt, there would appear
to be no just grounds for retaining
a man in a situation for which he
is not qualified, either by education
^

acquiescence to a respectability.
I have had too many opportunities afforded
me to see my residence here to judge
this usual character, which is of the
>V-*w r ^ description. In that respect purposes
to send the nursery plants to you, as long
as you remain here, a better arrangement
could not perhaps be formed. But I believe
you do not contemplate a long residence
at Lyth & Bohorn as they have been trusted
after your departure. This matter should
not be left to chance. If I might be allowed
to give an opinion, I should say that
the situation, ^{supervising} the
Botanical Garden here might be
with great advantage be filled by the
medical gentleman attached to the
Station. The addition to his salary
would make it an object worth
retaining, so that I should not contemplate

any very frequent change in the
firm's indebtedness, & the Chinese now
often to make enquiries, & to supply
afford available capital for the services
of a man of talent & extensive
experience.

Yours
very truly

Wm. D. Smith

Grand letter perfectly astonished me. if they had
sent me the information I had them. I think
I can without much trouble give the
little known. as I have plenty of **?***—
I have known the doctor for some time
paid a good deal of attention to the
Indian population of this country. I
am afraid I have had too many views
of the fact. as I should see the
be all to publish something in the
Transactions. but the time will soon come
now. as I am working away night & day
but we plants coming into flower which
I had both Drum & Salsolac several
passing - night & day. I am very
glad that my past letter was at least to the
help of your work as it will soon determine
what I am to expect. I have hopes of success
but if I do not gain anything. must get you
to induce the medical **\$~^** to be had -
- ^ - - assisted ^{to the very best} during my absence.
I shall be all to **—*—** my own involvement
I am very glad that the physician's recommendation of
the best will value his friendship & advice.

that to your desire (looking to the objects)
of science I am much obliged to you for the
of the material of my letter respecting the collection
sent of a small party on the mountain side
There is doubt of success. Some time since
went to England for seeds of all kind. Some
of seed of medicinal ones so. I shall be
able to begin soon to send specimens of
the hills for some might discover many
medicinal plants. You trip to Nagpur
is anticipated by you. Should meeting
of the kind would take place as I see
the necessity is great. It is desirable to
be desired from an exact knowledge of the
resources of our neighbors will worthy
investigation. They would be certain
for collections of new plants would be
great. I think the the Indian will in
the the most extensive work is by
beginning. But is it will contain a great
number of Genera - Species. It is the
country. They will all to add many of
the plants of the Hindoos. I am
sending the smaller plants. as I may
have been overlooked by my correspondents

 to Lincoln's Garden indeed the great
 heart of the main will be the whole
 plant. He will hardly be fair to depart
 from to the table separately with the
 at the same time give me an opportunity
 of visiting them. Opposition I do not fear
 Howard's him. he is any of the men
 should have to work hard to do more
 than I know how to well understand to
 do. But as John unfortunately is not
 too many things at once. Howard has well
 to present any thing for publication. By the
 end of the main Howard the Garden will be entirely
 finished. Goodell has been kind enough to
 let me have 40 prisoners. I am now
 making a Copy [^] in [^] which will be of the plates
 £- A > a I - I do not think Howard

But that made whole experience
in way of a back work if you - - -
winter. There is a good deal of the
terraceous limestone called Marble
I have kept Agrostis ^{the} capitata
in some well raised ground. I own a
between plain & thick layer of leaf mould.
upon this I planted a number of Hill
plants. I kept the place well watered.
It may have succeeded to some extent. All
the plants have lived, and in the month
of May the Leaves. 5 species. looked as
good as in their natural state. The
best I have seen from others here
I will so that I thought I
would write to extend the conversation
from extension to the
and the center well where there is
a good deal of shade. Plenty of water.
The hill plants will grow here naturally
I will they have not cool a fortnight -
I have also made a new Pestic wheel
which is something of a new construction -
I thought that one I have seen before is used.
The new machine placed in the center well

77-r^

...a few turns fills the water course which
...to the back works of water all
...the way. By this means, without the
...with a discharge of water

I can water my Hall plants in the course
of five minutes. So that now they
get water every day. I have twice today
filled about half down some oil extracted
from the Mother you saw here last year
which, $\vee \text{£} \wedge$ in you did see the house in
all the bygone - This is a very good
oil being admirably. The pleasure is so agreeable
I do to see them flourish that I am in
hope of rivalling even the pepper and

as they get to the end of my second third
without thinking you of the fresh business of you
which is ending in the continuation of business
state. Hope you will not think so low the profit
of this but rather on particularly value of
as they will be to make out by the profits some
of the orchard. Give me by the way. I have
never received the 4th number without your kind
of present I should never have known of such
highly cultivated in the plant of this country. With a little
application they will be to ascertain the true kind of seed
as they are in abundance. I would conclude, like this
you will give an credit for being truly obliged by the
... you have spent any services. While endeavor I
... you will be interested in my present

to my dear

Dear Mr. [unclear]
I have just received
your kind letter of
the 10th inst. and
am glad to hear
that you are
well. I am
also well at
present. I have
not much news
to write at
present. I am
hopeful that
you will be
able to return
to your home
soon.

Many thanks for
the book. You

may take it
to the [unclear]
of your friend, and
we will give
it being called a
very nice exhibition.
With yours
[unclear]

Puttick 25 May 1825.

Wm V

My Dear William

I was just thinking how the devil I could be so stupid as to bother you about my nonsense, knowing how much your time is always employed. But you must just forgive me & put it down to my not having perfectly recovered my wits at the time I wrote. I am now thank God getting somewhat better every day & as a perfect at a loss what to say for myself for not having written to my good friend Antonio long ago. But you must plead for me, as I hope to behave better in future.

Allow me to wish you a pleasant town - all the success you can desire in the prosecution of the object in view.

In the Botanical way I suppose all that course is perfectly unemployed - My latest letter from home is still that - you was so good as forwarded to me of date the 29th September 1825.

My Brother Robert in his letter desired me to present his best compliments to you, which I forgot to do in my last. - I am happy to hear you have had pleasant accounts from Copenhagen. Tell Caetore that I will write to him for accounts of you while on your town. - not doubting that he will forgive my past conduct. I am

Give my best regards to brother
Mr. Bolder & believe me
ever
My Dear Wallick
Yours most truly
Alfred Suck

*E*Er<i<u ffxm « fdfcr /TM« Rangoon.*

Mr. Vnmf*±mm at tW O the MHI <T M<*ck *< Ik*

Commissioners for Ava and Pegu, proceeded from hence to Martaban in purpose — Districts of Martaban and Ye, ceded to us by the late Treaty, as well as of founding a new Town for the capital of our possessions in this quarter, a matter which became necessary in consequence of the restoration of that of Martaban itself, which is on the western bank of the river to the Burmese. I hand you a short narrative of the proceedings on this occasion, which I hope will be found to convey some useful information to your Commercial Readers.

Our party consisted, besides Mr. Crawford, of Captain Stoddert, the Senior Officer of His Majesty's Navy at Rangoon—Captain Hammond of the Madras Quarter Master General's Department — the Reverend Dr. Judson, of the American Mission in Ava, and Mr. King, Royal Navy. On the 31st of March, M tlf ' d i M ib* ~ biA IMMMLMI tbjt ih

reached ilw a<wth of lh< Mtih— met, distant fr<M tKai of JUiyo* abuii "(lu nOM is n4 UH th*< arvw miles broad. Hit mouth o* (Li. river, and indeed its whole course to the town <r vu*uUo. I* a difficult and dangerous navigation, and until our visit the existence of a safe and convenient harbour had not been suspected. The position of the Cape of Kyai-kami, as laid down in the Chart of Lieut. Abbot, led us

ebwrtd w (fvarur lea* Thru fathn—, within fflft wni» J< tin- (ore, in a clayey bottom. It was low water, neap tide and the surrounding MM <wfca <>a w ^ balt wc< tiawd to view. The first formed a reef of a Milt t*o miles and a half in extent, running out in a N. westerly direction from the cape, and <Mb. along with the cape itself, which sheltered us from the S. W. wind, nearly land-locked us, forming, to all appearance, an excellent harbour. About a mile and a half to leeward of us, in reference to the S. W. monsoon, was the wide mouth of a river hitherto unexplor-

ed After dinner our party landed, and began, with avidity, to explore the little peninsula of which Cape Kyai-kami forms the extremity. For three quarters of a mile from the cape in land, on the N. eastern side, the land was elevated from 10 <<9k feet above high water mark, spring

side, the whole country is of that elevation to the distance of, apparently, three or four miles, where it terminates in a range of hills, between 3 and 400 feet in height. We found the land covered every where with a forest of fine timber, not very thick, and with so little underwood, that we walked into it, without difficulty, < w wil hundred yards. So far the situation promised every advantage for the site of a commercial town and military cantonment.

Early on the morning of the 2d, our party landed again, and explored the little tract of country before us more completely. It is at present uninhabited, but the traces of former

lot'' OTIO* » spacious and beautiful hat-
tour, itito which, at low-water neap tides,

...ant ships can enter, and at high
water, ships af« burthen. The banks of
this river would have formed by far the most
convenient spot for a mercantile town—but
unfortunately, they were every where low and
subject to inundation. We ascended the ri-
ver as far as a large creek which leads to
Wagru, then distant two miles. This place,
once the seat of Government of a dynasty of
Peguan Rmtft. in the ISlh century, is now
nearly without inhabitants, having been de-
serted about nine years ago, in the great mis-
gratioo of Talain, which then took place in-
to the Siamese icniftarf. TW » river which
* c hed N t examined, is called in the Ta-
lain language, the Kalyen. Many small
creeks issue from the main branch. We as-
C«ndrd one of these, on the left bank of the
river, near its mouth, in our boats, as it ap-
pctradto Wad W the neighbourhood of our
ptopoard settlement. It brought us to a
avail tiJla«t, aW iiaUfciftiiii at «bidi
were fishermen, and salt manufacturers. These
poor people expressed no apprehension at our
appearance; but proceeded, without disturb-
ance, in their usual occupations, obligingly an-
swering all our questions. This feeling of
coofit)' nce towards us is, I bcin
[...]
tion, and I trust our conduct iuaj ••
to forfeit it.

Hjr dawtt of day an thr 3d we landed again
a«d niwafcid our... mlin n. Passing to
UK ... the Cap* ««« proceeded also : a
beautiful ... th, shaded I rot. the
—ring tun by th+ lHa>battk 1 our WO,
wered with «««Hwwptil tn««, aanr of

them in fruit and flower; our Indian servants
feasting upon the Jamun, which was found in
great abundance. After a distance of about
a mile and a half, the strand now described is
interrupted by a bold rocky promontory, and
continued again as far as the eye could
reach. This promontory, as well as Cape
Kyi-kami itself afforded us an opportunity of
examining the rock formation which is very
various, consisting of granite—quartz rock—
clay slate—mica slate—indurated clay—breccia
and clay iron ore. The soil, apparently
of good quality, and generally from two to
three feet deep, as might be seen by the sec-
tion of it in the walls, commonly rests on the
clay iron ore, which gives the water, in other
respects pure and tasteless, a slight chalybeate
flavour. The distance bvfeaaaa Vav furthest
promontory and the river kataem •* com-
puted to be about two miles, the whole a table-
land, nearly level, with the exception of a few
hundred yards of Mangrove on the immediate
banks of the Kalyen. The peninsula thus
formed, contains about four square miles, an
ample space of choice ground for a town—
gardens, and military cantonments. The space
in question receives considerable protection
from the S. W. monsoon by the little woody
Island of Zeno, about 100 feet high, not tying
about three quarters of a mile from the shore.

At 11 o'clock in the forenoon we ascended
t!*rm for Martaban. Duri ... rly our
U 4 frl
we had the Uge as
Island of Bidé on our left hand. This is the
most productive place in rice within the whole
province, and afforded a considerable revenue
to the Burmese Government. At sunset we
reached Martaban, about 27 miles from the
mouth of the river. TV* prospect which
opens itself upon the stranger here is probably
one of the most beautiful and imposing which
oriental scenery can present. The waters of
these large rivers—the Salayn, Ib* Atrmn,
and the Gaiu, meet at this spot, and immedi-
ately proceed t" IS» M« br tarn wide channels,
so that, in fact, IW a n m «T ki« djtftiMt

 white temples. *Frvnt time**
 Molameng, on the left bank of the river, the
 first contemplated for the site of a new
 plaOJ
 ttiWB, •bd*Wf*f«t
 situated 25 miles from the sea by an intricate
 IU«WIW»«^ accessible only to craft draw-
 ing 10 feet water at the most, in point of con-
 venience it, of course, bore no comparison
 with the eligible situation which we had al-
 ready examined. Molameng had once been
 the site of a town and capital, under the
 Hindu name of Ramapura, or the City of
 Rama, and the high earthen walls and ditch
 could still be easily traced. When the tide
 served at 11 o'clock we ascended the Salween
 in the Steam Vessel, the first of her descrip-
 tion that had ever entered its waters. When
 twelve miles above Martaban, the river hitherto
 disturbed and muddy, became as clear as
 crystal, and we had still three fathoms depth.
 About this place we passed the Kadachang
 Creek which leads to Bassein through the
 Setang and Pega rivers, and thence again
 through several cross channels to Bassein, a
 direct distance of more than 200 miles. The
 internal navigation of lower Pega appears to
 me to possess natural facilities far beyond any
 other Asiatic country. At half-past two
 o'clock we reached Kagan, distant by com-
 putation 25 miles from Martaban. The
 scenery in this neighbourhood was grand and
 beau-
 ful—the banks of the river high, and
 the country, to all appearance, peculiarly fer-
 tile. Close to
 to be seen a range of mountains, stern, bare,
 and craggy, rising *lo ifar U%k| M' I^KJ I*
 Almost immediately *** 0« ri5ti b«aL «W*
 where the river makes an acute angle, a num-
 ber of detached conical hills rose almost per-
 pendicularly from the plain. All these hills
 are of a gray lime-stone. We visited the
 largest which contains a spacious cave, dedi-
 cated to the worship of Buddha, and which,
 besides having the roof rudely but curiously
 carved, contains several hundred images of
 Buddha, a good number of them of pure
 white marble, equal in beauty to that of Carara

fe» tW ft**!* A «. ArJhJ ito UI
 is a garden belonging lo a neighbouring
 monastery, in no way. Ser. The only
 plant in ^ vhfce struck us as remarkable, was
 a tree about twenty feet high, standing in
 long and pendulous panicles of *rial «*
 blossoms and long and elegant lance-
 shaped leaves. It is of the class and order
Dialypsis Decandria, and too beautiful an
 object to be unobserved, even by the
m hmtmmr, *t I A*
 were found as offerings in the cave before
 the images of Buddha. At four o'clock
 began to descend *di# hinf. MJ ! trim,*
 with *h*-mifacc of tk • rbb-t !*, the cur-
 rent of the river *r- awl aW bi pa*«r «f ito*
 Stream, reached Martaban.
 The cultivation of the fertile tract of coun-
 try which we had passed in the course of the
 day is meagre, and proportioned to the op-
 pressed and scanty population of a country,
 which scarcely contains three inhabitants to a
 square mile. The objects of culture, which
 we observed in small patches, but growing
 with much luxuriance, notwithstanding the
 too obvious unskillfulness of the husbandry
 by which they were reared, were Indigo,
 Cotton, and Tobacco. Besides these, the
 upper part of the country, which is not sub-
 ject to inundation, appears to be peculiarly
 fitted for the growth of the Sugar Cane and
 Coffee plant. Martaban, indeed, is a pro-
 vince of very various agricultural produce, for,
 besides the articles already mentioned, it yields
 Pepper—Cardamoms—Aracca Nut, and Teak
 Wood, not to mention Rice, which seldom ex-
 ceeds in price twenty annas the mound—a
 fat which can scarcely be matched in any
 other part of India.
 On the morning of the 5th, we went through
 the town of Martaban, a long straggling and
 mean place, consisting of miserable huts ac-
 cording to the custom of the
 «Mmin, It »•
 MI hill, »
 at the foot of a conical hill, and it
 said to contain a population of 2000 souls,
 chiefly Talains. The Chinese are very few
 in number, always a sure sign of bad Govern-
 ment in a country understocked with inhabi-
 tants, and calculated by nature for commer-
 cial pursuits. We found the inhabitants pre-
 paring to move across to the British side of
 the Salween. Such is the poverty, and such
 are the unsettled habits produced by oppres-
 sion, that these emigrations are so very un-
 usual undertakings to the Peguans. Yesterday,
 we heard that 1200 families from the district
 of Zogai, with 5000 head of cattle, had arrived

Palind

on the banks of the Saluen, with the intention also of crossing into the British territory to settle. But these are trifling emigrations in comparison with the great one which took place from the same quarter in 1816, into the Siamese territory, and which at the lowest computation amounted to 40,000 souls. The fugitives, on this occasion, conducted the plot with so much concert and secrecy, that from one extremity of the province to another they put themselves in motion towards the Siamese frontier on the same day, and took such advantage of a temporary quarrel between the Officers of the Burman Government among themselves, that the latter were neither in a condition to oppose their flight, nor to pursue them. By direction of the leaders of the emigration, cannon were simultaneously fired throughout the country, the concerted signal for the march. In low-? ascribed the sounds which the tutilary pod*.

At 11 o'clock in the forenoon we embarked for Kyai-kami, accompanied by Mr. Fenwick. Close to Molameng, we terminated a range of

great height, which extends all the way to Zey, a district which commences with the right bank of the Kaiyen river. Molameng at least, it is composed of various parts of this range is found a rich and abundant ore of Antimony, of which specimens were shown to us. The Zingai mountains afford Blende, or the Sulphurate of Zinc, in not less abundance: of this also, specimens were exhibited.

In various parts of this range is found a rich and abundant ore of Antimony, of which specimens were shown to us. The Zingai mountains afford Blende, or the Sulphurate of Zinc, in not less abundance: of this also, specimens were exhibited. Lao, affords ores of Iron, that this province nature scarcely less rich in minerals in vegetable produce. At 5 o'clock we reached the new harbour.

Early on the morning of the 6th, we renewed our examination of the peninsula. The day before, a party of natives had cut a road quite across the highest part of the ground, a labour of no great difficulty. The distance measured by the perambulator was found to be only 1000 yards. After seeing and examining the banks of the Martaban river, to the extent of fifty miles, we found no difficulty now in fixing upon this spot, as by far the most eligible for a commercial town. Accordingly, at 12 o'clock, the ceremony of hoisting the British flag, and fixing the site of the town, in the name of His Majesty, and the East India Company, took place. Major Macquenn, of

the 36th Madras Regiment, and his Staff, who had arrived in the Lady Blackwood transport, joined our party. The Lady Blackwood fired >> Royal Salute, and a party of Sepoys, three volleys of Musquetry. The Reverend Dr. Judson pronounced his benediction on our little undertaking, in a feeling prayer. His auditors will perhaps be thought to have entered more into the feelings of the occasion than your readers will do, when I tell you they were of opinion, that he selected for his readings, with equal taste and judgment, the 6th Chapter of the sublimest and most poetic of the inspired writers. Take the following short selections as examples. "The abundance of the forces of the Gentiles shall come unto thee," "For brass I will bring gold, and for iron I will bring silver, and for wood brass, and for stones iron: I will also make the officers peace, and shall no more hear of their destruction." "The new town and harbour we called Amherst, in

present Governor General. A party of workmen commenced yesterday to clear the ground for the military cantonments, and a road having been opened all round the spot intended for them, we had an opportunity of deciding upon its eligibility. The whole country, indeed, up to the Inlia, and to within a few hundred yards of the Kaiyen, is a dry level table land, rising eastward, than which nothing can be more commodious for the purposes of an European settlement. I ought here to mention, that the peninsula, from east and N. E. interruption over it, is admirably ventilated - that the climate - "d .e r*jntWncW ji m on* of the hottest months in the year - is, consequently, cool and agreeable, while the soil is so dry, that during our whole stay we did not see or feel a single mosquito or other troublesome insect. The testimony 7 of tW Mlr>r<. Ut K further be added, is decidedly in favour of the salubrity of the spot and the neighbourhood. In passing the beach, on the western shore, yesterday and to day, we saw the fresh tracks of Leopards, wild Cats, large Deer and Buffaloes. The latter we were told were the cattle of the village of Kalakoh, distant about four miles; but in the mountains, close at hand, exist wild Buffaloes and Elephants. In the forest, when examining the ground for cantonments, we saw one large

Deer, and several Monkeys, and the woods abound with the common wild Fowl and Peacock.

In walking along the sandy beach this morning, we unexpectedly met two priests, who readily entered into conversation with us, and were very communicative. They had heard of our projected settlement, and took advantage of the circumstance to cheer us in our undertaking, and pay us a compliment at some expense to their veracity. They said that the place was fortunate—that the temple of Kyai-kami was dedicated to the God of Fortune, which the term imported in their language. With more effrontery they added, that they had that morning perused their sacred books, and found it written, that a **i•weii«7inn cv-** would be the neighbouring country.

Captain Hammond having measured the ground with the perambulator, a matter which was easily effected along the smooth sandy beach, drew out a plan of the whole ground, and in the course of the day we were busy in allotting the ground for the various wants and necessities of a New Town. The N. western promontory was reserved for Government,—the high ground, immediately fringing the harbour, was set apart **far** for the European and Chinese, or in other words, the commercial establishment, and the lower grounds, towards the Native **Ton.** A ground plan of the European **TMIQ «U** sketched, composed **Of Un Mrrxt• wtth 400** houses, the great front street consisting of one row of houses, and containing 19 lots each of 60 feet front and 160 feet deep, being especially appropriated for principal mercantile establishments. Immediate

is ground for **•o** esplanade, **>io4 »h**Ji** and on the western shore, are the military cantonments, and to the S. W. **«fUw vholc,** towards the hills, **tkctV M tMpLd (tHM for {jnk m Htd** garden-houses. Ground for a church—a burying ground, **Mk«l fjnUn. and «n tiiiyniwwddituwr** an to or **p*V«d m ik mm** situation. Regulations for **r tfl* coMtrv** of the town were adopted, and in appropriate **ing aM iraiiat laakK tfc» ! era 1 - d **.>** prescriptive rules laid down by **ta» SitfimM** Government for the flourishing settlement. Singapore, were approved for the ****• HttV-** ment.

The Commissioner, on this occasion, addressed a proclamation to the natives of the neighbourhood. The following is a literal translation of this document, which is in **£**.**

lish dress seems somewhat quaint and unpolished, although, I believe, well suited to the character of those to whom it is addressed:—

"The Commissioner of the Governor General of British India to the Talains, Burmans, and other Tr*o» of people. In conformity with the Treaty of Peace between the Governor General and the King of **Ant. ih*1** English Government takes possession **«fta«** places **bri ood tW Mam ftm*, and •! t hr** entrance **ct of Kyai-kami, founde** a New Town.

"The inhabitants of the **Uwnw** and villages, who wish to come shall be free from molestation, extortion and oppression. They shall be free to worship, as usual, temples, monasteries, priests and holy men. There shall be no interruption of free trade; but people shall **go** and come, buy and sell, do and live as they please, conforming **to** the laws. In regard to employing the labouring people,—they shall be employed, on the payment

wages; and whoever compels ***iw Uboor** without reward shall be punished. In regard to slavery,—since all men, common people or chiefs, are, by nature, equal, there shall be, under the English Government, no slaves. Let all debts **.id fMMcnrM** contracted under the Burmese Government, previous to the war, be discharged and fulfilled, according to the written documents. Touching the appointment of Officers and Chiefs, they are appointed to promote the prosperity of the towns and **vitU«««», a*4th0 ««Hirt** inhabitants. **ftftht** If **fv*«ra Mapu** property by violence, or **ta** Government assessments, when the country is settled and prosperous, consultation will be held with the leaders of the people, and what **will be** taken.

Government **M* Win** ever desires to come to the **ant Tow« dr UM V. w., W M U tk* ft.k^** river under the English Government, may come from all parts and live happy, and those who do not wish to remain, may go where they please without hindrance. the morning, at the harbour, Captain Stoddert was employed from three to five o'clock with equal skill and zeal. In examining and sounding the harbour and its approaches. Between the extremity of the reef rocks and the Diana Shoal, there is a narrow but practicable passage into the harbour. Captain Stoddert discovered a more safe, short, and easy one through the reef of rocks, which, wet and heaving are

of the S. W. now given of the harb. and the neighbourhood. That the place is capable, at a very trifling expense, of being fortified in such a manner as to render it quite impregnable. A battery on the promontory completely commands the town, and protects the shipping, which may lie in good anchorage within 50 yards of the shore. An enemy entering the new passage, might be sunk from a martello tower on the high rock of Kyu-kang, a few hundred yards from the promontory. A battery at either side of the entrance of the Kalyen would render the harbour, formed by this river, equally secure.

Upon the commercial advantages of the place, it is scarcely necessary to insist. Ships, as already said, may lie within 50 yards of the shore, and within 75 of the merchant's warehouse. Sheltered by the cape, by the long reef of rocks to the N. W. of the harbour, and by the innumerable sand banks to the south of it, dry at low water, as well as by the great island of Hily and the continent on the east bank of the Martaban river, ships will lie in smooth water, except perhaps for a moment in the westerly monsoon, during high flood, and when the wind shifts to the west or N. west. In such a case, vessels with indif-

ferent tackle, or in a disabled state, may slip with perfect facility into the Kalyen river. A short mile to the lee of the harbour, then accessible to merchant vessels of any burthen. Tb«^Mk«» .lwir the F. as before mentioned, constantly fertile, and communicate by a long navigation with the Burman territories. The Gavi and Atran open a direct intercourse with the Siamese dominions, with Lr, and thence with Yunnan in China. The new harbour itself is situated in the most central part of the Bay of Bengal. Under these circumstances, is there any

prospect in the Fiscal assessments, and a free and convenient market to ensure the prosperity of a country so peculiarly favored by nature. I already anticipate ships on the stocks, cargoes of British and Indian manufactures entering the port. Ships loaded for China, Western India, and Europe. » iA rice, cotton, indigo, pepper, sugar, lac, dye woods, teak, cardamoms, bees, raw-silk of Laos and China, and twenty other commodities effected the all-powerful influence of E. e. ingenuity, and capital.

At half past two o'clock in the afternoon, we entered the new harbour on our return to Rangoon, taking, in going out, the channel discovered by Captain Stoddert, and which, in compliment to the Naval Commander, has been called the Bridgport Passage. It is not above 50 yards broad. We went through it with the commencement of the ebb tide, and had nothing less than five fathoms and a half. On the evening of the 9th, we made the entrance of the Rangoon river, and early on the morning of the 10th reached the town.

Our adventure has excited a good deal of curiosity at Rangoon, and I am told a considerable part of the European and Chinese town has already been hospitable. By the last accounts Captain Speers, sent down by the Commissioner, has laid down designs, so as to make the harbour practicable without a Fort. Constructed, some houses built by the Chinese, and a good flour furnished. The Lady Blackswal arrived this morning. She lay a fortnight in the harbour, which was as still as a mill pond. She found no difficulty in going in or coming out. All this promises well; but the season, the commencement of the rains, is very unfavorable to the undertaking.

Study & Learning as much as in my power
to be employed in Medical Studies
to the subject I am writing - by letter for
you they if you please before the Medical
Board going to see the information is
by your respecting the Medical plant
I have found in the Files. I am however for
all to give before my letter can be finished
I wish it is business every minute
I am obliged to accompany I am the
Secretary to the Establishment. What I have
said is in conformity to the established
Practice generally adopted. But I have
the other established I have seen - I have only
one mentioned. But it is in fact in the
Season to be visited with Rheumatism
& to cause a cold weather they are
relief. so that I believe you have these
Rheumatism - The Rheumatism is taken care of. The
to Gout is joined. The regular practice
will be greatly improved. But in the way

My dear Sir
I have seen the matter as much for
the only to see. As I am able to do the best
conclusion. They that you will believe in
I have seen the best of it. I am obliged
I am your friend

I am in pleasure with the whole of your
I am your friend

P.W. Island 1st June 1826

Honored Sir,

I was surprised } and gratified by the

receipt of your very kind letter of the 8th May enclosing
an Order on Messrs Brown & Co for \$10.38, which
was duly accepted. How inadequate do I feel my pen
to express the warm effusions of a grateful heart; grateful
indeed I am that you should have been so kind as to

write me in such a friendly manner. You know how much we should
value your attention in which I
am sure you will be pleased to see that I have

been so long in your company. I should

you again visit this Island, for which event I
most earnestly pray. It has made us quite happy to

know that you do still sometimes think of us and that
in a way the most advantageous, as is evident from

the very liberal and handsome manner in which you
have been pleased to * /f

if it were known I am sure it
surprised that you have not thought of deducting my

1@%k

pecuniary debts to you, which this can be one to pay, but
it is not too late, and I shall have the pleasure of
settling them ⁱⁿ when you touch here, or should that
not be the case, when you arrive in Bengal, with
the Interest which would have accrued on the amount
had it ^{been} in your Agents hands, as your goodness to
do and more has perhaps been unexampled without
interfering upon your pecuniary affairs.

As you are now in the Peninsular Country
I may not be amiss for me to remark that our Gov:
has ^{long} had intention and had expressed a wish to form
a Botanical Establishment at Murgum or Suroy
where Mr Maingy is now Resident, and that the latter
Gentleman ^{is} also extremely favorable to ^{the} information
may be put ^{up} in as correct a Manner as on the
point of being sent by the Governor to Mr Maingy
for that purpose, but he ^{has} ^{declined} sending
him for reasons unknown to me. You are aware my
opinion ^{is} ^{that} the ^{Gov:} ^{is} ^{not} ^{to} be prevailed upon taking advantage
of

of such desirable opportunities, but however I may be
situated ^{< ; -} kindness will always be most indelibly
engraved on the ^{< ^* -tZji-Kj *f f**f} heart and I trust that
the ^{< > .*} All with who has ^{^ & v €+.jm + ^+w} seen me & my
friends will also hear and answer the ^{/ ... / '* V*} / ... / '* V*
sincere prayers daily offered for your health and happiness.
C My wife and children with myself enjoy excellent health
and unite with me with ^{* T} affectionate regards, in offering to
you ^{- m} in our former, our thanks and humble wishes
for your prospects.

I have still the honor to be,
most respected Sir,
Your humble and grateful servant
George ^{0*-C£^}

Dear my dear Mr. Rogers
p. 4

London June 10th 1826.

My dear Dr. Williams

I was much surprised to receive ^{fr} your letter of the 7th inst. and
to hear of your remarkable lady, arrived in London from
Copenhagen, I did not a moment, put myself and Rob
into a journey and set off to go to see her and have
taken with myself and wife. Dr. Williams is looking
on your friend Mr. W. + she would not be long
in the little girl I had the pleasure of seeing. I should
be to your list of Commissioners of our Society
with in her sitting for her instead of your she
has seen the W. of P. which in the W. of P.
can experience more made after her should be to
they must have been well by some other person. With
Observe of an extract of W. of P. in the W. of P.
with the presents to set it out. Her lady was with
been seen in W. of P. the lady who, since I have

I shall see Mr. W. tomorrow on his return from Brighton
and will make arrangements to bring out his book for
you when I reach 15 July as well as the other two.

I had a most delightful group here & that
I say I should be second only to the very first
I promised her 10 marks I found some work
open all over and see me in the book house. He
has introduced me to Lady Harcourt, Lady Darnley
and Lady Berkeley besides the lady, Miss to the Earl
and Countess of Galloway and has some in the
house as a private work of his. I believe to present to
me with a splendid copy of the book and a handsome

I have your very kind suggestions and
will hope to be full in the last of the book. I shall
July 15th most faithfully and will give you a book
and hand over my despatches at the Garden on
my way up.

Your affectionate Son
George Skelton

to follow with the gun bank which persons are
sent for England again. Hope you will be able to
pick up at least a few for the Rev. Prof. C. Rogers
the of the Memphis Bible. The wife come with me
a colored group and then

My kindest regards. $\cdot > / \wedge + *$ Cantor

I will have some to give an elegant little table from
the Duchess of Arundel's collection for the use of the
Chapel & Church. what I intended in proper time

I am Dear Sir

Yours very faithfully, $\cdot x$

Plant of plants to be planted in the
Medicine. Nursery as soon as practicable after
the ground has been "thoroughly" prepared by digging
and manuring -

Colombia - Let Mother put one of the
Mauritius tubers - one only
one

Asperispermum verrucosum & *cordifolium*
Columbian one plant

Andropogon Schoenanthus

Let the *Cyperus* be preserved
by searching among the grass in the
brier.

Samolus Campdora Let the seedlings be
planted when At sufficient large
pendulous or *Pipal* *affinis*

Hyoscyamus niger Particular care must
be taken to see that the seed is not a little
part of it. The crop will improve
the more the more hard as can
possibly be provided is wanted

Wrestonia fibrifera Prepare as many
possible few may be planted

from around the nursery - but
let the seed be distributed through
the garden for dispensary use of
required.

Proutia Tigham - a seed ^{I *+I X-} to be planted
when the ground has become somewhat
drier than it is at the commencement
of the rains.

Datura Metel and fastuosa chiefly ^{A >} the latter.
A good quantity to be planted out. Its
roots is a ^k efficacious as the other
variety of ^J ^U for extensive cultivation

Panicum granatum - On an ^{4 tt} of the root. but
to be planted. Say a dozen at first. But
prepare on ^{SI-4} for after care.

Little commendation of the roots of both sorts
especially the former. ^m
Let them
be removed from the nursery
when they have bloomed and
sifted seeds (the latter to be sown
with expense ^{^ - u - /} ⁵ (weather
and ^{> A} the proper season. when

the green parts have been used for the
bulbs.

Bursera Linnæi. I am anxious that a good
quantity should be planted. Dr. Carey
recommends the root as one for the
stomach. I have used it myself with
benefit - at least I have, and for a
short time.

Mentha ^{silvestris} Linnæi. The common *Rubine*
Valeriana *Herodotus* - as much as possible
must be secured. It will not grow in the
Soils. will not tolerate the plants yet
acclimatized.

Vitex Negundo = (Shonobee or Nishinda),
if set in the Nursery it will be
planted near it.

Pimenta. There is no need of securing any
in the Nursery, but the many
H have been secured and the
seed preserved by various methods
trying them for the Dispensary. The
leaves being
distilled to form an essence
essence *Muddah*. As many as possible
to be planted

Asclepias gigantea (Efc this and the former
are now *Calochortus*) a few seeds to be
introduced for comparison.

Agave pens (*Papilionum*) A good quantity. It may
again prove valuable, as it did 20
years ago.

Cajuputi - Introduce some - but procure
plenty for the garden, at $\wedge\wedge$ for
supplying if required the Dispensary.

Syring *Peruviana* Let them we lately got
be planted when it can safely be
done.

Orbits (*Piper*) I have written to Porter some
months ago for a supply.

Nutmeg & *cloves* & * \wedge not to be attempted on
the Nursery. Those in the garden
only can be depended upon.

Cinnamon & *Cassia* Ditto Ditto.

Leave if it can be done a quarter for the
cultivation of seeds which I am going to
write for from Europe as soon as I obtain
the opportunity. As it is now im-
possible to expect any sowing the season
of 1827 (end of Sept. or beginning of
Oct.) therefore let the preparation of the
grounds destined to receive them only

to be taken in hand with the general
business.

Camellia* Colocynthis -

Artemisia vulgaris? & indica -

Daphne ... Should be introduced extensively
, Styracis.* / At** familia

Ficus elastica - This needs to be introduced.

Carina

Camellia al... in the garden. Stop exports (<*> |
S./r, 'r, . Jfy the present export in very
particular cases)

Hamatocylon camphoricum - a few plants in the
Medicinal Nursery - Mutter, ft then in
the garden

Garumie C. At*4

Bapsium - all the ... the ...
y ft , </**• s

Alca ... one plant only in the nursery

Bapsia || ... one or two plants alone in the garden

Alca ... only one plant -

Dolichos pruriens - a few plants

Atreyelas the Piper species

Citrus

Convolvulus

Emerson's *Imitation* - a few lines in the
course; but the practice prohibitive also
to all plants along the river side and
near water courses and bushes where
alone they will grow luxuriantly.
Salvia ~~sp.~~ *Salvia* (the whole establishment)

If the nursery to be entered early in the spring
in a few of the species *Salvia* *Salvia* *Salvia*
to be preserved separate

all Day

&

Sept

K

The estimate of taking payment
from the Burman Government in produce
for the fifty Lacks of rupees due ¹⁷⁴ ^y ^f ^{*f} for the
discharge of the present instalment having
been ^{w44*,4} ^f ^{£&} ^{Right}
brought before the Governor General in Council
I have the honour to submit ^{fZ*rs} ^{4f}
the following account concerning

The only produce of the
Burman territory which is of any consequence
applicable to such a purpose is Kachin
timber for of the sticks, lac, such a precious
stones which have been spoken of they
are much too inconsiderable to deserve
notice. The forests which yield Teak for
exportation are those of Lam - Prome -
Sung, but above all of Sarawak which
affords far more than all the rest, but
together the annual produce of this last
is tolerably well ascertained and does not
appear to exceed 11,000 beams or which is
the

the same thing 14,000 pairs of the descrip-
tion of plank called Shinberis. This includes
not only what **tS ev£+*/c*4&** foreign coun-
tries but ^{A3} **i** **est** **A3** **but**
ing at Rangoon ^{1st} produce of the other
forests had not been ascertained but ^{2nd} we
never heard it estimated that it exceeded one
half of this amount. Taking it at this rate
the ***%€<*** produce of the Burman forests
would amount to 14,000 beams, fairly val-
Ut4L^S Rangoon at 16 Rupees per beam or
CuJe pair of beams. At this estimate which
I am con- ed is much too high an an-
nual sum ***^\$<\$/ fl*^/ii</i4~*S fi*J*64<'** could
be available for liquidating a debt 50,000
Rupees or ^{100,000} **is** therefore not accom-
plish in less than twenty **and** **dur-**
ing &L/ long period **is** **not** **Bur-**
man **&** **verminents** would exercise a com-
plete monopoly of all the Teak timber in
the Eastern part of India and most proba-
bly to the detriment of the general interests
of **Comm** ***c**

It has **4'** **is** stated that the
Burman forests are inexhaustible and that
their **+i&*** might be greatly augmented
Th

This I believe to be true, but it is obvious
that such an augmentation would either be
impracticable or unproductive in point of
revenue. The factories whose employment
is of an unwholesome an *el-tfttS'lk. cu^+sfu-* na-
ture are limited in number. They would
increase only gradually by a rise in the
price *rf<AJ!r4*<*'* and such rise would en-
vitably enhance the cost of the timber. The
Burmah Government under the circum-
stances stated would have no motive for
making an increased outlay of capital
to increase the produce of the forests. Sup-
posing, however that the produce were great-
ly increased this might not imply an in-
crease of revenue. The market for it must
at the same *2 time V tft^ «^ on the su < ec*
would inevitably fall - perhaps to one
half or one third of its present amount.
Two or three shiploads of timber & at
present sufficient to constitute *^* the prin-
cipal market, that of Calcutta, and an impor-
tant *to* *produce* *ation* *in*
the price *to* *the* *com +*»^** *ity* *at* *that* *place*
After

After this statement I
have no scruple in offering it as my
opinion that the scheme of taking a pro-
duce from the Burmese * & £Zt
of their debt is entirely delusive
or any other produce has an uncertain
value and is convertible at pleasure
into money, it is certain that it is at
least of equal value to the Burman Gov-
ernment as to ours and that it will be
far more convenient to us to receive a
money payment than one in kind.

I have &c.

Reply (Office + private) soon
Date.

My Dear Sir

I have been some days in receipt
of your public & private letters of the
* * , Vi ' 1826 which should have
received an earlier acknowledgment
had not been confined by my
room from severe indisposition
at the receipt of the same days
subsequently your favors.

My official reply accompanying
will inform you that I have allowed
De Silva one month to arrange &
forward by you the collections of
plants which are now on hand
an arrangement which I trust

you will approve & confirm, for
I have no knowledge of these matters,
no place to keep them in, & not a moment's
space to devote to any other
duty, than ^{that} I have already to perform
in my several offices at this station.

I can understand the feelings
which make you regret the necessity
of discharging Desbwa, but you
had a higher duty to perform, &
you must in reflexion be well
satisfied at having conscientiously
adhered to the direct path of
public duty tho' opposed by your
own private feelings. Desbwa's
conduct since it has come under
my observation, declares him

To be quite unworthy of the interest
you entertained in his welfare.

The tea plantation at Lyttelton
appears to remain in statu quo
neither advancing nor retreating
What Mr Debbin's success may
be able to do with it remains to
be seen, but I much doubt if it will
ever come to anything.

Left Watson's mind regarding
the introduction of the rubber
tree, but from all you say on the
subject, I certainly feel inclined
with you to consider success as
extremely doubtful, tho' from your
account of the peculiar soil &
climate in which it does thrive
I imagine Lyttelton offers the best

chance of any place I am
acquainted with I will have

Believe me My Dear Sir
Yours very truly

F. Tucker

If you could send up some
flower plants of Mr De Kwa's receipt
for the gentlemen of the Station who
are fond of Horticultural
they would be gratefully acknowledged

F. Tucker
27th June 1826

Mar 18 28th 1928

Many thanks for your kindness
 in sending of the books. They
 arrived in fine order. I much
 enjoyed the School Museum
 set them. I was quite astonished
 to find the names selected. Plants
 from U.S. & the Encyclopaedia
 came up by Jack Denny.
 I have told Mr. Walker to
 send you any thing but the
 journals. These May you
 will keep as long as you
 wish to read. as they will be
 quite time enough for me
 in the afternoon &
 I am very much pleased to
 hear from you that Mr.
 Lushington has been kind

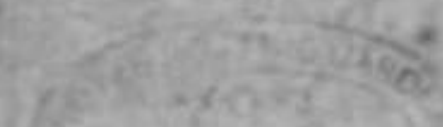

enough to interest himself ⁶²⁶
about one. For the benefit of
indebted to your kind & safe opinion
I to his own good sense of the
as shown in + claims upon **4~**
kidnap. She knows so little of
you that he need be trusting to
show to be right or wrong.
I shall however take some of
particularity of referring him that
I am not insensitively to his
kidnap - should be asking
too much to say you to get
a card from Han. W. Egan
son to Georgetown de Monte.
I have indeed it from England
long ago but it has not yet
made its appearance

Luzerne has charge of. is superior in all respects
of I am in addition to my medical duties, to attend to
my botanical. I to stand the whole exposure that
these things, as well as that of the botanical

of Natural History had an intro. The average
is **is Ay** ⁱⁿ **A>** ^{*/^} **^** for any amount in the
country that \$500 expenses a month. There was worth
about 600. Some about 3000 - of which 1/2 is
I think probably more as I do not know what the
value of the land is as the road for England will
be. But the expenses I do not complain of, and
is in a great measure optional. But I think that
I can save some when I see every page. I
sincerely wish a subject in view except an
order. paying sleeping this the station, some
expecting their visits you after you in this way
to the very hills. when I have been led to suppose
that my duties ought to carry me. But go I
will - if it is on a Assistant Surgeon's Pay
I shall give \$500 expenses on month in the
end. I am not making of books left to the
to be deducted from my annual advances when
I am inducted to make a general visit. The
field is extensive. I have some but few. I think
that the whole will be together in a profitable
even in my retirement. I hope as it is but I
will see it **^7-^** on I think would have
what my English friends are so far. I think there
is a hope who speak that look **~ A** **^** **^**
of me. I am interested by them. I think
I think is enough for their subject. I will write you
again tomorrow. I send a long letter of good papers
to the Hill. I think so. Today I make a letter respecting the
expenses likely to be incurred in the mountains. The article
is not to be taken there. I am not sure, but you will find it
to be **.. AT-^** full tomorrow. I think I shall
go to the hills I. T. though

O.K.

Dear Sir,

Your kind letter of the 5th & 10th ult
together with an official one appointing me Superintendent of
the S. M. Plantation all arrived a few days ago; I take the
first opportunity of replying by the Brig Robert Spence. Right
honourable as taken up by the Government to convey them to
Penang and Canton. I will be unable and perhaps unwilling
to attempt to convey to you my sentiments for this occasion
unlike, because the matter can do justice to my feelings and I will
because I am sure you already know that I am grateful for
your goodness and you have afforded me ample latitude to
express it rather by action and with the blessing of the
High Court of Justice which my friend

With kindest regards I remain your
The best of Masters, knowing that as long as I live I shall
never want a powerful friend. I am fairly satisfied by referring
what a very respectable person I have been and for all the
good things you have bestowed on me and I do not know
how I can ever do you, but my much cannot wait as to be respectful to him
I should like to see of the great probability of going into your
of the matter with what after a few years more have I might
have of the good of the plantation of the Government and
I am sure that the attention of which can be expected for
your situation. The salary I shall have is 100 dollars as before
Master 200 dollars (I hope) and a salary of 10 dollars before
you was by the Inspector Mr. Kelly when I was to be
as now he was suddenly taken with a fever and died on the
15th instant after an illness of only eight days, he had been

your letter and communicated its contents to the Rev. Mr. Kelly
I had in the first instance, not for Mr. Kelly, the able
opinion in which I have had a few friends and the opinion a
Patron and of I had the best idea of not accepting your offer it
was entirely procured by this fatal blow. But my being here
of 150 £. 10. 0. is a heavy although it appears large. I am
of opinion that at a moderate calculation every article of life is
four times as dear as it is in the north and I should suppose that
the proportion will be greater at Dublin when every thing is probably
and cheaper here as a very good consideration to me with an ever
-long family for at the most common rate, I can now only pay
for my salary and often of what, whereas in the north I
could infinitely better I managed to have some of the best
Lippin to induce me to leave here. I may not then need
the offer now before me in that respect a cheerful person but that
I and myself can manage to many necessaries, according to
income as to leave under our proposed Patron that we will
give up all former considerations of them as any in 1817
and content ourselves with the idea that 150 £. 10. 0. is a
provision as every thing that is actually necessary. I perhaps would
not be here were better than we do here. I am in all respects
with the old man in the north and the church of Dublin in
in our favor than I have not what objection to make. I am
of the opinion that I have not for Mr. Kelly than others would
but you will be better advised to be moderate and to
perhaps to show your answer for young of all my other
at full length a separate letter -
I intend to begin my resignation of
I had to do with the other with the full knowledge
in regard to that matter get away from the Board as soon as
possible though I think the same will be done as a matter of

...the more firmly established which
any doubtless and I think from the same opportunities of sending
them gradually away, which is one of the most difficult parts, (except
of ships and other objects) to take them in hand at any length,
as the vessels which go from hence to Antwerp are generally of a
small description and afford but little room. I shall not finally
more, and indeed appear in pursuing the above, but I must
not for moment compare to the advantages to be derived from
supply at this critical time, and although I have mentioned the above
as actually pursuing, it is not my intention to confine myself to
this, which should afford me the opportunity of pursuing further
particular I am drawn from the detail and the greater I shall
take advantage of, when every thing is ready, unless then I see
the Bill in the Government Papers in the usual style "An
Account of the Port of Antwerp at Antwerp" I have proposed
to send the letter of the 10th of the month of the 18th 1807
which I have promised, will enable me to defray the expenses in
your own words satisfaction in the reflection that a liberal gift of the
Garden will certainly be done. 4*—/ You may also depend upon
my repeating and repeating the detail in my paper on collecting for
more to be taken care of, and by an excellent arrangement
afforded in your papers. I am quite in the pleasure of the
idea of being able to add my own to the collection of my own
papers, which is the case. I think I must be in the
that the subject is generally, and I think the more I know of the
quantity of it is the more I know, and I think for the
the tendency to Government, the more being, and I think
I have the being in mind of a paper to write the minutes of
them for the paper, which is the 30th of the month. I shall
now that to be the subject. I shall also send a
paper with the subject of the paper, as he is nearly employed
has a too much, being the best of the day.

I have now to thank you for the very kind
and punctual offer of salary from the date of Richard's
leaving which will be a great help towards defraying the very
heavy expenses of a family voyage to Calcutta.

I was much gratified by Mr. Pitters kind
letter and will take the earliest opportunity of answering it
the Robert Spenser returns to the Post and will offer you
my answer for any commands you may be pleased to have sent
I have only to add that we are grateful that our prayers have
been heard for the health and happiness of yourself and your
family and sincerely hope those blessings may long and long
be continued to you

I am

Honoured Sir

My Dear Friend
We have just heard of your
return to Calcutta & regret most sincerely
the accident which put you to so much
inconvenience & thank God however for
your safety & I fervently hope when
you next embark you may have
more success - If had I the
power of preventing your going to such
an inhospitable climate you should never
reminiscent the undertaking
I thank you with all my heart for
your kind & friendly letter - with
your presents upon departure and for
the proofs of friendship it contains
& have heard much of the civility
of Lady Anker's character & shall feel
much gratified in being made personally
acquainted with her - She seems well
but the whole plan in connection
we shall of course share them as a gratification
in our progress, but we have only the
pleasure in a very limited degree. The Co

handwritten text, possibly a letter or journal entry, discussing various topics and mentioning 'GIL' and 'AJ'.

I have now to thank you my dear sister
Walter for the liberal supply of flowers
seeds which I yesterday had the pleasure
to receive. They had suffered a little from
heat but I fancy some of them have
escaped success in your garden. I can find
out their bright names and regret to say
the Prothonotary Cynobara seed with which
you so kindly supplied me has not come
up: the soil is now two months since it
has been sown. The reason I cannot determine
I have seen plenty of it & which
I have sown into the box. I beg you will
do me the favour to offer my best thanks

to Mr Charles Carter of his last letter
dishes. He all sorts in offering you a
thousand good wishes. I hope you will
give rather the general, as one of fine how
to inform us when you again mean to
leave Calcutta. William is now at
Perhampton where he has sent to take
charge of some presents which have been
sent from England for the Cape - & I fancy
you will stand but little chance of
seeing him again for a length of time
as I hear the 69th will certainly be sent
home this week. I am sure you had
any more letters from your dear
I am happy to find the character of my
pages agrees so well with her & your
beloved children. long may they be
spread to you a blessing to you - I will
not longer intrude on your time as
Dear Susan has with a reputation of
being the best subscriber myself as
I shall ever remain

Yours Most sincerely

M. Marlow

Handwritten text, likely bleed-through from the reverse side of the page. The script is cursive and dense, covering most of the page area.

Handwritten text on the lower half of the page. It appears to be a separate entry or a continuation of the text above, written in the same cursive hand.

Dear Sir

Liverpool. Aug 11/26
Reply 23 Dec 1825

Though I have not the honour

of being known to you, I hope your
to Botanical Science will lead you to secure

the liberty I take in addressing you. As one
of the Committee of the Liverpool Botanic

Garden (of which I am now Vice President,
I have had an opportunity of observing your great

kindness and liberality which suggested to me
that an application to you for some specimens

would be greatly wished if I might see you
at A. ...

28th Nov 1872

Calcutta the 21 August
1826

My Dear Sir

Just after you left Calcutta, I received
a letter from the Superintendent
of the Botanic Garden at Bouchon
mentioning having received a supply
of seeds from you without any letter
but stating that the seeds had
almost entirely failed to germinate.
A letter was at the same time sent to
me from the Dept of the Botanic
Garden at Batavia forwarding to
you a printed Catalogue of Plants
all which papers I forwarded to
you with Hedger's but they did

not catch you.

Dequeter wanted me to buy some
of the books I must have lately
arrived for the North American Society
but so ~~far~~ did not intermeddle
any with me on that subject
though you were of the committee
of the books before your departure.
I pleaded the want of your consent
on the ground of my not receiving
according to the purchase. I may
possibly have been in this manner
being of your committee to purchase
by your order and I must be
by your order and I must be

To which they may apply.

We have not yet taken up
our residence at the garden
nor indeed shall we imagine
permanently, till the cold weather

•*•

we propose to spend Saturday
and Sunday there, a resolution
which has hitherto been frustrated
by the badness of a ground.

You will perceive by the Papers
that your friend Mr Stuart
has written the Description which
is a new but perhaps the first edition
of your interesting work will afford

2/22

you additional reason for discarding
your recent apprehensions of dis-
perception. I hope you sent home
no Indigo. The Market was quite
glutted in consequence of large supplies
from America. Indeed trade
in general was remarkably
depressed.

The Cornbrac Castle near
England on the 13th of April
saw the 2^d of January. I should
mention, that you may not
think from Mrs. Wallcut, that
the stone ruins formed by the
sinks of Carved in to that from
Lindsay and May. I think
I believe in my finding your

for a few days. The day and date this I
find had the hills many enclosed to that and the
Sensit & Deans. The Deans hills were made
at the same time. The hills is getting dry. a
little bit more could be all with dry up. I believe
is improved. I believe have been out of us prepared
to many have had been a very much. I
the hills will be finished. I suppose the work
to do. I have delayed in consequence of not having
long enough pieces of wood for what is called
the handshake. I may need handshake with
public spirit to **£JL** while water have fallen
into the collecting the medicinal plants.
I have prepared a list of the which are
found about I think will be extremely
useful. I have known better about
the handshake - I have wanted up. I have
extremely long in getting my collection ready to
be printed to the handshake together with a
list of the Deans. I would be surprised then
to find that the Deans the whole has up
to be all over. I do not say we have built towards the
end of the is in progress towards the handshake that
I have had a particular note sent to
the hills the hills plants handshake are well
I have named a list of the handshake I have found that
had thought the hills weather the same.

J

My dear Mother, I have been waiting very
patiently for the revision of your manuscript to know
whether it is to remain in its present order but
it does seem to be no longer of any use. I have
made some marks and they will give me the necessary
time to hope that you will be able to get the
manuscript for me. I hope the answer that I have
been giving you is not enough to stop your work
yet. I am young and I am sure that the
time will be at the end of the time to do it
at the expense of your health. I am sure
that you will be able to get it done.
I am sure that you will be able to get it done.
I am sure that you will be able to get it done.

527

My Dear Sir

Your letter of the 23rd ultimo and
the packet reached me safely by the
interprise

I hope you will not be put to
much inconvenience by the loss of
Gorachand. I shall endeavor to
carry through the pension which
you have recommended for his
family, but anticipate some difficulty
as your proposal exceeds the amount
authorized by the Regulations. They
seem to have some difficulty here
in ascertaining the members of his
family & some say he was married
and some say not, but I perceive in

"K

^^

ft ^

your enumeration the wife is not in-
cluded - A bill has been made out
for his wife allowance for August to
last, as you desired.

Captain Johnston has not yet sent
me the two Boxes of Roots you
refer to, but I received the seeds
of the *Hydrocotyle* long before
the day the ship came up, and
delivered them with every injunction
to Mr. Paker.

We have not yet taken up
our permanent residence at the
Botanic Garden, but the last
three weeks we have spent ^{at} ~~at~~
and Sunday ^{at} there. We enjoy ourselves
extremely, and Mr. Huntington
revels in your Botanical Works.

I pick up the names of paper plants,
and hope to pass myself off successfully
as a proficient Curator among the
uninitiated. I was desirous of being
at the garden yesterday, in order to
see the effect of the high tide of the
~~~1f full Moon, which will
probably be the highest of the
season, and I am happy to say
it has not apparently done any
damage. Indeed I think you
may consider the season to be
hampered seasonable with respect
to encroachments of the River. The
people are driving in Poles near the
great Barnian Inlet, though they are
rather late in their operations.
The old Bureau has been

been dangerously ill, and is a skeleton
of his former self, if he has not only
died actually, but anatomical
know you will not send him much
broyer.

On examining with the taste
of your tooth the morning, he
found several of them bound in this hardy
and mostly much more elastic. I
d prepared that the tooth had
d showed be separated from the
tooth, but Mr. Jackson having
stated that you had placed them
according to description, I did so with
like to inquire and have
I do myself with separated by
using Mr. Jackson to check the
use of the Hammer, & Jeyner's
applying materials to those in

to them and suggest. I have seen
they should be protected, I should
suppose either there being, toward
disparatol from them again, etc.

The garden appears to me to be
full ease to plottose. There is
hardly any room between one plant
and another, and the Potter, who
consulted, recommended a little
judicious thinning. The brook
will look much better after this
operation, I present
I sent an
and under
know there, I almost
more and energy, and make
the same. I am on, the
out. The leaves fall so numerous
now, that it seems an intolerable

Acting Superintendent of
the Asiatic
Botanic Garden

Genl. D^{ty} Sir

I am directed to transmit
to you the accompanying copy of a letter
dated the 29th Ultimo, from D^r Wal-
lich reporting the death at Rangoon,
of Gorachand, the Head Draughtsman
of the Botanic Garden.

2 Under the particular cir-
cumstances of Gorachand's case, and
in consideration of the alacrity with
which he accompanied D^r Wallich on
his deputation, the Right Honourable the
Vice President in Council is pleased to
comply with D^r Wallich's recommen-
dation that a pension of 20 Rupees
per

per Messrs. Be grants for the support
of his family.

3. It is understood that Goachand
left a Widow and one Son to
whom the Pension will be paid during
the life time of Widow and until the
Son shall be of an age to provide for
himself.

4. The Pension is to commence
from the 5th Instant, up to which date
the regular and extra allowances of the
deceased are to be paid.

5. The Vice President in Council
has authorized the appointment of
Tishampersad AS S ...
to the Institution in ...
Goachand ...

My Dear Sir

In sending the enclosed paper
to you, I have nothing
long like I wrote to you a few
ago. I have kept Blenheim's
and hope I can find something
in the book to guide me in acting
upon it, I shall leave it for you
to answer.

We have no news here; it was
thought yesterday that the
Asia had been perceived standing
in, but 24 hours having elapsed
since the Report was circulated

its accuracy is very doubtful.

Pray remember me kindly
to Mr. Crawford and
believe me very sincerely yours
Christington

Honoured Sir

Permy 20th Sept 1865
Dear my wife to Roger

17/11/27

In my last I informed you of my intention of
accepting your very kind offer of Dr. Williams' Pink Pills & Symplics
with that view I had actually paid off my little property
by Public Auction & under the necessary arrangements for
going paid immediately but was full the receipt of offer
the you once more asking best I paid for your gift to your
kind, having had several offers to me a very liberal and ad-
vantageous offer of establishing myself in business as an
auctioneer, from my Brother and General Agent in Park
Lane with Mr. J. Parry, a man already well established in
that line and who has not only received considerable property
but as sole owner of two Vessels, he has long & fully conducted
his business but finding it daily increasing with the necessity
of enlarging his concern by admitting a Partner and as for
his funds and arrangements funds were to well adapted, so
when he can place to much pleasure to use his own words as
myself thought he had had several offers from men proposing
Capital. These proposals the friendship of this man here I had
seen on the Island and when he found I was partly going away he
made me the offer on the 20th Instant. I had no friends to help
of a Capital, therefore even thought of bank a thing until the
offer was made, when, I could supply the prospect appeared to me
to be too good to be slighted and at all events worth a trial. We
think in Trade with the exception of shipping as to be certain I
to have one half share of the concern, advancing what part
every day in my power together with a House there, which I
could not sell for 4000: 2700 he takes a cash of 5000, the full
value of the property I may have to nearly 4000: 500 the

The Stock on Trade will probably amount to from 75 to 100,000
and for my self there about what I can advance, I am to pay
a moderate interest for until circumstances may enable me
to pay the whole, as well as for any further sums he pleases
advance for carrying on the business. This is a great pity I could
amount more (part) but you will understand how I can proceed
to touch by good fortune in obtaining a better Price on the
Telling than I believe I have what I managed to turn to ad-
vantage on many little ways; and on the death of one friend who
about 1770 having purchased the House above alluded to at
Auction, about this being giving a part of 55 £ to the month.

On the offer being made I understood the Part. Mr. 4L&
who has been very kind to me at all times, he thought it advantage-
ous and planned that I should retain the Club 1000 £ for
12 months, any more object was to gain the Governor's sanction, which
appeared difficult, but to my surprise the Gov. interests himself
in my favor, says, I have his full sanction to come. I am in
the same line, or rather that he is in the same line
I expect in the employ of Government and I may.

By any other way I should have been described as; ^/L^
I hope the whole of the business is now in the hands of the
Governor and I believe which I hope is right; he made some
difficulties to Mr. [unclear] but upon my coming on him and
explaining things I succeeded. - Who for I shall find in
business is at the disposal of a High Power, it is quite
new to me, but for the sake of my wife's children, for the sake
of my Mother's children, whom I have continued to support, I
I am determined to exert myself to Parton County as a
man people in his manner / - 4t
I might perhaps otherwise ignorant in a way clear & passing
Mr. [unclear] with a truly generous heart, besides the favor of

have found of them from 14 years acquaintance, for you are
 very agreeable I have read & thought showing you letters to him
 which may perhaps have had a good effect, as soon as I am
 pretty well acquainted with the nature of business it is
 to go round to the center, finally with the view of getting
 will - as to form mercantile connections. How much it would
 be worth any of the large houses or mercantile concerns to
 employ us as their agents, they may depend upon the strict
 integrity and accuracy in all our dealings would be determined
 personally I think there are some better heads, than John
 Palmer's, who would not slight us because we are beginners, Mr.
 Bland in Alexandria & Mananilla perhaps find something for us
 to do. Do you think it would be possible to obtain a
 address from ^{some} of the houses of agency in ^{London} & send
 up an application, and if you think there is any probability
 of any success I will ^{at once} make the attempt.

-y

In my writing on the 1st I found him very
 communicative he was persuaded to instruct me how to proceed
 and pointed out ways in which I might make money which I
 thought would be right with them. The very India Rubber Vine
 you write for is one way, he informed me that some had been
 home on trial (last year) and had been found to surpass any
 thing yet discovered in the Manchester manufactures, and that in
 consequence some merchants there had written to him to ^{send}
 to procure large quantities, ^{for} ^{the} ^{purpose} ^{of} ^{selling} ⁱⁿ ^{the} ^{market} ^{at} ^{the} ^{price} ^{of} ¹⁰⁰ ^{per} ^{cent} ^{profit}
 for 300 tons quantity, which can be collected from the Sengles &
 present is a more profitable business, but as I observe the market is very easily
 saturated, growing from articles which I have put in some of the
 I think it may eventually become a staple article, the Govt as if
 that I might also and offer to give me Government Land if I
 could take the cultivation of it, but he would go no further.

-r

also without doubts of my would include myself very cordially
with you when I am as do very high in clearing, taking care of and
collecting it which I am well prepared to do, and if I did, I
would be very much obliged to you to give me the part of
such an undertaking, though to my knowledge there is a hundred
also on the Island who has had a similar request made to him
from Manchester.

I had you a dozen Cheques of Value for the Dutch
Ship Lajos, 50 Cheques of all kinds, beautifully established with an
assurance of the bank on the south on which for my office
- city that may offer all paid for by the Govt. I offer to pay for
the Cheques to induce the Government of every Royal Legation
to take them up, the same offer has been copied to the Marquis
now about to sail, but the Captain has not yet given me an
offer answer, the freight must of course be paid in full and
there will be another Bill for Book that this I am getting
them all off their operations for the Book Garden will I think
convinced you I endeavor to show you find for they are
principally filled with my own hands, the latter being empty and
a credit to the Government, and though I am more endeavoring to
leave myself a family I shall always be most happy to speak
myself in sending anything you may request.

I hope you will be pleased in you about
yourself to arrange any difficulty that may occur with regard
to my note acc. The Royal Paper as to my discharge I
think nothing can be said on that score for independent of my
being retained here in Government employ, my time enjoyed for
as nearly as possible, and should it be actually requisite any further
will rather prefer than present any such a difficulty
circumstances to purchase my discharge. I shall have done

...as every man has, among those in the same
line of business, who may endeavor to annoy me on this head
I should I be successful; but I trust that good Providence
which will guide me so far on the good, would render all
their attempts fruitless.

^£~* S&C-M

My Dear Sir

I write to you two lines to mention
that in consequence principally of
Mrs Livingston's state of health, we
are about to embark in two or
three days on the Junonia for ~~Calcutta~~
We hope not to be absent beyond
two months and during that
time Mr Swinton will have charge
of the garden and will I am sure
act in the same manner as
myself, as far as concerns your
wishes and interests.

Mrs Peter has been somewhat ill

to have occurred. A very extensive
December 1846. You & family
from your most stable help
know that you have not been
warned at the moment of your
temporary change.

I have related to the
Governor that!

Believe me sincerely yours

My dear Walter

You will be well waded with
English and French from me again
the little published to some accompaniment
it may be that I have seen to be long ago
but I have been so overwhelmed with
particulars that I had no time to pay
the slightest attention to any thing else. I
imagine by common consent that with
a kind eye of the National History of
the House in I could not find time to
finish it. My future reports shall however
be confined to the Gardens themselves
I have at present proposed of 90 plates to
Smith's Agents. I regret that I have
been told one of his children the 2^d /£—
has been unfortunately killed since the
conclusion of the Fair. I had when
paid and the next to the Newcastle Fair
but the subscription has proceeded very happily the
place over for a day. They have to be

the top of each mouth of a dog -
I have an immense quantity of
plants I am at present going through the
my collection is finished with the exception
of *Erasmia*, *Paludosa*, *Callipinded*,
Scaptomyza the last not commenced -
but the others require revision. When
his L. D. D. comes I mean to present
him with a copy - accompanied by a
plan of the Garden, ^y ^{r-^/1} ^{7^} [~] ^{y.}
specimens of *Proserpa*, *Lythra* *detentum*
a new sp. *Stenob. of Myrsophora* *var. var.*
found in the *myrsoph.* which agrees perfectly
with the characters of any plant. My collection
is arranged according to *Willd.* but
I have lately been vigorously studying the
natural order *L. Brown* & *Del.* & *Willd.*
They are the true most delightful botanical
authors. There is an elegance, simplicity &
importance in their descriptions which is truly
gratifying. Their descriptions are natural -
"overflowing" *etc.* The *myrsoph.* *var. var.* -
is a useful book - but I think it is somewhat
of a *badly indigestible book*

Some time since I have been writing a kind of paper
I find it very useful when examining
any new plants. I want nothing more but
a couple of descriptions. I must enter-
tain them at my own expense, as I do
not expect that Government will do
anything for so obscure an individual.
I am preparing a paper on the
plants that may be cultivated in this
country. When I have AZ^^
common publishing by descriptions
of new or imperfectly described plants.
The books you have sent me I find in-
valuable. Both Blume's & most especially
the latter. I wish to know the
Angajina and names of local plants. w
knowledge. I shall get a plant which
has puzzled me. It is tetrandrous, with 4
stamens & 1 pistil. I shall be

Sabampani 12. Oct. 1876

My Dear Wallace

You will no doubt wonder after my last not to have heard from me again, the letter I alluded to now accompanies this, it ought to have been sent off long ago, but I have lately been so overwhelmed with patients, that I have had no time to pay the slightest attention to anything else. I am fortunately commencing my letter with a bird's eye view of the Natural History of the Marquesas. I could not find time to finish it. My future reports shall however be confined to the *Gardens* ~~at present~~ ^{at present} upwards of 40 patients. Remittants, Agues, Dysentery, Children suffering from Measles, &c. of his children the 2. from a severe attack of Remittent Fever, he was ill about a fortnight. The weather here has been oppressively sultry since the conclusion of the rains. I intended to have paid another visit to the Marquesas. However but the sailing has prevented my leaving the place now for a day. I hope however to be able to go next month for day or two. I have got an immense number of undescribed plants. I am at present going through them. My Catalogue is finished with description of *Gammarus*, *Arctostaphylos*, *Arctostaphylos*. The last not commenced, but the others require revision. When the S. S. ship arrives I mean to present them with a copy accompanied by a plan of the Gardens. I have got a new species of *Proserpinaca* of Gled. ~~be~~ - undetermined a new sp. I think of *Mimophora* as *leucostachya* - give me *S. L.* a new sp. which agrees completely with the character of my plant. My Catalogue is conveyed according to *Hildemann*; but I have lately been vigorously studying the Natural Orders, in *Brown* & *Delandolle*. They are the most delightful & satisfactory authors. There is an elegance, clearness, and compactness in their descriptions which is truly gratifying. Their descriptions are without "overflowing fullness". The *Syl. Veg.* I find an useful work but I think it is some what of a tedious, undigested collection.

I have been forming for myself a kind of *Compendium Florae Indicae*. I shall place all the Indian species I can find any account of in *Delandolle* 1866. I mean in the *Syl. Veg.* I find it extremely useful when examining any new plants. I want nothing now but a sample of *Dracopis* ~~them~~. I would entertain them at my own expense as I do not expect that God will do anything for or through an individual. I am from

My Dear Waltham

On the eve of leaving very reluctantly to these
snowy Mountains for a trip to sea. Had only time to write a few
lines with the enclosed account of my visit to the hills.
I think worth for the last year when you pay the amount of
Belvoir, pray deduct 10000 balance of ^Λ cash you sent me on my
account if I think worth the arrears. ^{me*} I have been very unwell but have
greatly recovered. Hope ^{I*S*} in the pleasure of seeing you in
Calcutta. Lady K joins me in kind regards Belvoir and ever
Sincerely Yours
R. C. Colquhoun

Dr. Wallis, Calcutta, has been
of the Society of Friends in
the district of Calcutta and
of the Society of Friends in
Calcutta who have felt
it their duty to transmit
to you the last Annual Report of
the Bristol Philosophical Institution
thereby to renew a correspondence with
which you favored me a few years ago
but which owing to Bristol no longer taking
part in the same trade has been inter-
rupted. You probably have received from
Dr. Dick in former annual reports
and in the letter accompanying you of having
been made an honorary member of the
Bristol Phil. Society & observed that
I now fill the office of Curator to the
Bristol Philosophical Institution. We are going

our wants, particularly of our children
is increasing rapidly chiefly through
the overburdening of our friends also our
funds though made virtuous to pre-
vent us from getting into debt are still
very inadequate for all our wants

As Governor to the Institution it is
in my power more than before to be of
Scientific Service, if you wish for any
specimens for *... J C ^ - ^ S ^ - ^ + J +
the kindness to mention it. - If you
wish it I can send you a fine geological
map embracing the whole of our
vicinity embracing the State from the
Tappan mountains upwards to above the
Line. My friend Mr. John Miller
of New York has sent you seeds & plants
which I trust will reach you safely

It should feel much obliged if you could send
me a few, undoubted, dried fruits for illu-
strating lectures on the subjects, or if you
have a friend who could send me some of
the India land & fresh water shells however
small or common they would be highly accept-
able, & I would return an English suite
of which I have very fine ones — I also
need much for India Carolina, & Tortularia
in fact, all the fresh water shells described by
Lamarca & would return the species found
on our Coast. — If you have an acquain-
tance who could send me ^{two or three} heads of different
India Animals ^{Birds, snakes, &c.} in a key to be made into
it I believe here I would send him the names
of English Animals of all of which I have
duplicates — all these specimens
may be directed to me at the Bristol,

Institution of Capt. ... will take them
to Liverpool & reports them with, any thin
do intended for, the Institution found who
I can receive them easily ...

Sir

23 June 1797

Dear Sir

Dear Sir

Dear Sir

I have the pleasure to forward to you for
 favor of Mr. J. Wilson 3^d Officer of the David Scott
 a ~~small~~ ^{box} containing different kinds
 of European and ^{Indi}an Seeds, among which are those
 of the ^{Red} Rose, Malva &c. Your Letter came to
 hand too late for some ^{of} the Cucumbers and Gourds; but
 next Spring, I shall take care to have a quantity gathered
 and which I hope I shall have the pleasure of sending to
 you, by the Rev. Dr. Marshman, who at present resides
 within a few doors of me, and is in good health after his
 return from Denmark, where he had an interview with the
 King, and was most graciously received, and succeeded in
 his Embassy to the utmost of his expectations.

I fully expected I have had the pleasure of sending
 you a box of various sorts of plants, the best in the West
 Indies, which could be had in this part of the Island, by Mr. J. P. White
 of the post: which he was in this part, taking in part of his
 business, and unfortunately the Captain would not agree
 to send the box, as it was so full of seeds, and such to be sent in
 it, and no other place could be so just than to send the seeds
 to you, and that it would be necessary for the Agent in
 the post to send them, for he could not have any of his

hands for any such purpose; and am afraid it will be
difficult to find a more favorable opportunity offers. I shall certainly
avail myself of the same

Mr. Goldwyn late of the Victory. I am informed
of the conduct of the late Mr. Goldwyn; having given up all
his property and means to the service of his country, and
having made the most liberal provisions for his family, to
enable them to live in the same manner as he has done, he
is now in the hands of the State, and is to be sold, to
Mr. Wilson, who promises to be very liberal in his
offer, and will give you a good price for the same.
I have also put another box for you by Mr. Wilson,
a couple of books, which I think will be very useful
to you, and which I think will be very acceptable to you at the last

The Box of Books you put me under a good order
and proved to be in general what you would wish them to be,
excepting my recumbent, which I have very much failed in
Box of Plants you were so kind as to send me, and the history
of the nature of the plants, was thrown away by order
of the Master of the Ship, the first morning after they had left
the land, because the Box contained the seeds of the plants,
and the same had been manifested in the ship's cargo. On the
10th of July I should have written to Mr. Macdonald at about
when had them in my hand, when I am fully persuaded I should
have received them in good time, and I need not say how highly
grateful I am to you, and how much I shall feel obliged to you
for your sending me the same, and how much I shall feel obliged to you
for your sending me the same, and how much I shall feel obliged to you

Contained in it, as You conveniently can: or any thing else that
You consider as New to this Country: also some small or young
Plants of any of the Species of the Amoryllidæ - Crinum or Pancratium
Liliæ or other Bulbous tribes, and packed up in dry Paper: also
any of the Aracis tribes -

As Mr. Wilson, probably, will not have it in his power
to wait on You so early as I could wish You to do, I have written
to Mr. Macdonald to have the enclosed papers & the Custom
House, and forwarded to You with the best opportunity & possible after
the Ship arrives at Calcutta -

When I visited a Garden near the Garden, I was
going in my Garden a species of *Asplenium*
which I could wish to have some hills for I am
at a loss for its Botanical name, but the natives
or native Gardeners call it *Asplenium*. It
was not a Climber but grew as a Bush about 2 ft. high and bore many
small fragrant white flowers which were in full of the height and were
by fresh ones in the morning - Also some small species of Grass
that grows in South Malabar on the road leading from the Choumber
State to the middle of the Fort, I believe the natives call it *Mooleray*
and ^{the} natives ^{use} them, and wreathes them round their heads, the
Piping Trees are very fond of the *Bombyx* -

I am Dear Sir, Yours Much Obligated

Lt. Thomas Burr

Dear Sir

From the pleasure to inform you that yesterday I embarked
with a view of all the things I possess of the kind both in the
the collection of great boxes of London and a few more I had
from the Dublin and a few more of the kind I had from
to take for some time the trouble and trouble but not long I shall
take care to have a quantity of the kind I had from the pleasure of
bringing to you by the next day I shall have the pleasure of
for some time and as it is not yet so far from London, where
I had an interview with Mr. King when he was in the country because
and because it is not yet so far from London, where I had an interview
of his collection.

• 72 •

... I shall certainly avail myself of it

Mr. Golding's late of the Victory in consequence of the recent
death of two of his Trustees, has given up all thoughts of returning to England
he says the only communication he desires you will be kind as to give him
taking care of the same you intend to do for me to do with it who
promised to be careful and that you will be with them in your own mind
and then also find another two by Mr. Wilson for you
contains two for Mr. Dingley I have said in his and shall feel happy
gratified by their joining party of your acceptance as the last

A^r ::

The Receipt for your last January of the 1786 and
is good order and from the same quantity that you would send from
making the receipt for the same from the fact of the receipt
in my opinion it is not a receipt of your receipt to say as they
can be in view of the receipt of the receipt for the receipt of the receipt
same receipt because the receipt is in the receipt of the receipt and found
not to be in view of the receipt of the receipt of the receipt of the receipt
in view of the receipt of the receipt of the receipt of the receipt of the receipt
I have said for them: had I been of I am fully persuaded I should have
received them in your order and I am not sure how they are by your
receipt of the receipt of the receipt of the receipt of the receipt of the receipt

To
 Mr. S. & A. M. D. Superintendent of the Botanic Garden
 at Calcutta
 by the kindness of Mr. Richardson.

I left Sabang with Lieut. [unclear]
at $\frac{1}{2}$ past 4 o'clock in the forenoon
of the 22^d of November - and crossed
the [unclear] opposite the mouth
of the Nyit-Nga or Little River - which
bounds the town of [unclear] to the east
The [unclear] part of this day's journey
was along the right bank of the
Nyt-Nga - the course of which is
remarkably tortuous - more so I think
than that of the River further in
the interior - which takes its name
from this circumstance - We passed
two villages - and saw some fields
of cotton and rice - with several
gardens of pepper and betel.

As halted. The hills were not above
three miles distant. This is the
first of several ranges visible from
here.

We left our ground and retraced
on the morning of the 23^d. The
road soon became very rough
and we passed through a country
covered by the *Scirpus* or
or *see* in *^fijTAiA^&i*^-* in Hindustan
seen such there. There were a few
patches of cultivated ground. The
course of *Pyritage* was at a great
distance *fi* ^-^ii_.* sight at three in
the afternoon we arrived at a
massive range of *Gayats* the best
of which we took possession of.

The Myit-thaga was still above at
hand - and near at hand was a
jungle of bamboo - and a very splendid
monastery, well filled with priests -
These we were told were not touched
by the present King - the of the child
- king of this tribe, had his
wall covered with odd grotesque
paintings - each group or figure
represented some Indian or
some of these paintings represented
Hindus, Mahomedans, of India,
Huns, and Europeans carrying
offerings to a temple of Jettan
We were particularly struck with
the representation of a Mahomedan

6
Horseman, riding over, and over-
setting his followers, the horse
flung and rearing, and the
rider dismounted, and clinging to
his rock.

On this day's journey, we met a
caravan of Shans, returning to their
own country. The principal part of
their merchandise consisted of Gnappe
or purple Fish. Their numerous
cattle consisting of oxen large and
in excellent condition, were grazing
in an extensive plain, not far from
the road side. The pack we were
encountering in the common road
between the Shan country and the

2 Delay and difficulty occasioned by the
1
laziness and apathy of our Bannai
attendants, and guides, prevented us from
finishing our journey, on the 24th until
8 o'clock in the morning. The carts
could not accompany us to the foot
of the Hills, and the porters whom we
got in the morning, were invited upon
being relieved, before they had got on
two miles. This was at the Village of
Hui-pa - close from the bank of the
Yang-tze - which is here very narrow with
steep banks at a ferry which is here
we saw several Hui boats, with a num-
ber of carts waiting to cross. We resumed
our march at 11 o'clock and began

to pass thro' a forest, ^{v n} bamboo some
of which were in flower: I was of course
£ satisfied to find the plant of
the family of Cephaelis on the way
spot where my ^{& £ ^ j %} had discovered
it, not many days before; it is nearly
allied to radicoforsanum, with a
heart shaped, flat fruit, resembling
an ear of wheat; I called it radicoforsanum
hitherto, with the exception of the
paragon of them, we had met few
travellers; but in passing thro' this
forest, we met with ^{La ji} — The
ground soon began to rise with a gentle
activity — and we shortly reached
the foot of the Hills ^{^7} —

"In the two beds detached rocks were
seen here and there composed of compact
limestone. The ascent of the mountain
occupied nearly five hours. The road
was winding but far from steep or
difficult, for the greater part of it of
poor, dry soil. In sections of the
rock was any where to be seen but
we frequently passed over rocks that
forming the road. About half way
up, we passed the village of Tiber
to which there was cultivated
a little rice, and some millet; a
little beyond it I found the species
of oak, which my assistant had
brought to me along with the

10
The Oak although not very frequent
so that here probably, for the first time
there ~~was~~ to be seen growing naturally
side by side - the two greatest glories
of the forests of the Eastern and
Western world - I did not see all
see above 40 Oak trees - and they
were evidently not at home for
their stems were irregular, not
exceeding 10 feet high to the cross -
nor above 10 or 12 inches in diameter.
The trees were in fruit, and under
the old ones were to be seen
Numerous seedlings - at 6 in the
evening we reached the Village
of Thong-Sung, and found shelter

for the night in a tolerably good
wooden house - The weather was
became cold - and we were glad to
get under our blankets at an early

A v

X

The Pills - We were at sea but
small - it is situated on a spacious
table land - considerably below the
highest position of the mountain
the person rather a disagreeable
person addicted to strong passions
and other irregularities - and who
spent in their time apart from with
us - in the land, or as the Germans
call it "the table" of this Pills - and
the least attached to it

>'v

S

belonging to it are some good fields
 of Millet nearly ripe, with fields
 of Sesamum, Tobacco and Amaranth
 In its garden and orchard, there
 are ginger, Papia, figs, Jacks, and
 guava - with some common
 vegetable - among the latter
 there were abundance of Mushrooms
 and a large quantity of pretty
 fragments in Hindustani (Tolichas
 Tabac Jacks) among the trees there
 was one remarkable for such a situation
 The common pear tree and the
 greater number were covered with
 a profusion of flowers or buds
 however there were fruit nearly ripe

The fruit was round, a little
 depressed, tolerably smooth, and of
 a brown colour - although neglected
 and nearly in a wild state - the
 fruit was not without flavour.

Part of the forenoon of the 25th

#ow. J

We spent in arranging and putting
 the rich harvest of plants - which
 I had made the day before - at
 noon we made an excursion into
 the forest where I discovered a second
 species of oak larger than the first
 and a few species of raspberry -
 On the 26th we ascended the highest
 part of the mountain, which I estimate

to be, between three and four hundred
feet, above the level of the table land
on which the village stands. ^x
This excursion I made a fine collection
of air plants, among which were two
additional ones, and a Walnut tree
with ripe fruit smaller than the
common kind of which best, by
the way, we found the potato in the
village said to be brought from
the country of the Shan (no straw-
berries nor fire were found in any
part of the hills and upon the
whole, but few ferns I discovered
but one fern and no Bryozoa, though
found on the hills of (Peawitzi, etc.)

I found neither the *Tranifera*
 nor do the people seem to be aware
 that they exist on the hills of
 found however one *Yucca*, a nearly
 allied to these. Among the plants
 found in this day's excursion, were
 some noble, gigantic *Hedychia*, out
 of flower — of these and other
Sectariania and orchids, I took large
 notes — The ascent to the top of the
 hills was now clearing for cultivation —
 and traces of that of the last season
 were visible — It is interesting to observe
 that the only trees attested to
 are oaks — these are of the great height
 and size — ~~scarcely~~ reaching two feet

...diameters. They certainly do not
exceed in size, those found upon the
lowest hills of Japan. **^ = 5SS ^ W ^ ^ ^ -**
... *** & ± ^** in flower.

At 7 on the morning of the
27th we commenced our march back
to work. At nine o'clock we arrived
at the village of --- about two thirds
of the way down, and after bathing
there for some time we proceeded
our journey reaching the foot of the
hill at two in the afternoon.

J* ^ //Z-+0-^ ... nearly to pass
through the bamboo jungle, after
a march which we estimated at
ten miles. We halted for the night.

at the village of ~~Amthor~~ ~~up~~ ~~in~~
 road at a ~~large~~ ~~in~~ ~~the~~ ~~distance~~ we
 met a number of ~~beasts~~ ~~rather~~ ~~proceeding~~
 to the ~~forest~~ ~~of~~ ~~the~~ ~~low~~ ~~with~~ ~~mer-~~
~~chandise~~ ~~and~~ ~~near~~ ~~the~~ ~~place~~ ~~where~~
 we ~~halted~~ ~~we~~ ~~saw~~ ~~a~~ ~~still~~ ~~greater~~
 number of the same description
 grazing in the fields.

We did not leave the village
 of ~~Amthor~~ ~~until~~ ~~about~~ ~~in~~ ~~the~~ ~~evening~~
 delayed as much in collecting ~~parties~~
 to carry our baggage - in the early
 part of our journey we passed several
 villages and at ~~last~~ ~~we~~ ~~entered~~ ~~the~~ ~~high~~
 road leading to ~~Amthor~~ ~~at~~ ~~the~~
~~first~~ ~~part~~ ~~of~~ ~~the~~ ~~road~~ ~~at~~ ~~that~~ ~~place~~

"having a large lake on our left—
proceeding towards the grassland
we went through the extent of the woods
of Huerfano—at the which we im-
berked in three small boats and
in an hour and a half reached
Sakiaing—

"That portion of the mountains
which we ascended, lies due East from
Sakiaing, which was so distinctly visible
from the top, that we found no
difficulty in taking its bearings—
The distance calculated to the place
where we began to ascend was computed
at about 20 miles—The general direction
of the whole range is nearly North & South

<\$[<£ m

... before sunrise in the
morning stood at the lowest at 54° - The
Thermometer at Salsing stood at the
same time at 69° - This makes a
difference of 15 degrees, which allowing
300 feet of elevation to each degree - will
make the height of ... at the
foot of Salsing 3300 feet - The
Thermometer however was observed at
the Village, which I estimated to be
from three to four hundred feet below
the highest portion of the hill (which
I ascended, so that the greatest elevation
of the Mountain may be estimated
at about 3600 feet above the Plain -
We found the air having no

at night heavy dew fall -
The Thermometer in the morning
at Norwich as I have already mentioned
was at the lowest 58° and at the highest
 60° - I had it in my power to make
but one observation in the afternoon
when it rose to 74° - The maximum of
three observations taken at Rockport in
the morning gave 61° - In the dry woods
these mountains are probably healthy
at least to those who are accustomed
to live on them, who had all the
appearance of good health - The
inhabitants of the plain however
consider them extremely unhealthy
and it is so probable from the great quantity

rJL*^

of forest, that they are so in the
season - at least to those whose con-
stitutions are unaccustomed to them -

I brought with me abundance
of the rock, (wherever it
presented itself - This proved to be every
where compact limestone, either of a
pale or reddish brown colour. The
only mineral was calcareous spar - but
the inhabitants of the village gave
me a few small specimens of iron
pyrites - (which they said was pro-
duced in the neighbourhood -)

/s£*<t 4 *£^*r-X.

The soil was of a reddish brown
colour, tolerably deep, and not hard
or stony - The cultivation consisting

32
of a little rice (and some tobacco and
some ginseng) but chiefly large millet
(Andropogon furcatus) and some
thrive well especially the ^{>*} **.yh**

{sfa't. (J^i
_X*r
The intertidal
are supplied with water from a fine
spring about half a mile from the
village. Several in

*f>
6 .V^r f

s#
water, amongst the hills as well as the
dry beds of torrents which had existed
during the rainy season.

Both ^{Mr^^t>|} the plants of rice
are particularly fortunate in my possession
having obtained in the short space
of four days between three and four
hundred new > seeds - respecting these
it is not necessary to add more. ^{-J-}

24. The population of the Hill appeared to be extremely scanty. We saw but two Villages; the inhabitants spoke the same language; but were dressed in the fashion of the Plains. There is, however, a small place on the Mountain, known to the Indians under the name of ~~the~~ ~~place~~ ~~of~~ ~~the~~ ~~same~~ ~~name~~ but we saw none of them.

Notes
My examination
of the mountains
near New York, etc.
led from my passage
by John Vaniper
22 - 28 March
1826

My dear Doctor

Have much pleasure in informing
you that matters have been satisfactorily arranged
and your services kept, no other engagements
will occur to deprive me of my much valued
services

Has disappointed in not knowing that
the pleasure of seeing you on Sunday as
you promised to see. Hope you attend
your usual services by its health.

Believe me with Respects

Yours

Yours very truly

W. M. W. W. W. W.

G. M. Perkins Esq. W. D. R. D.

Edmund Spenser

Information respecting
my very dear friend Dr. Washington
Wheat

Dr. Washington Wheat
in the Indian Establishment
married Miss Smith, a daughter
of Lieutenant General Boscawen
of the Dutch Engineers, and was
father of Mrs. Philip Boscawen
who was long governess there.

Dr. Wheat was very well known
about Madras, but I believe had no
correspondence with me during
his life, though he was situated
at Negapatam being joining
the little party to his former house
Miss Boscawen's daughter; but
when he left the Coast he would
to have made arrangements for
Dr. Washington's health, I believe
was applied to his house
for the same, but was with respect
to. I have the absence of these
documents, I have found two
copies, 'r rS S, r Sf-

arrangement either in the
Republic or State of the House, which
from its long and complicated
condition with some affairs
fall to Union, although in its pro-
posed State, it may be
to be better between two and
three thousand members, which
seems, if realized, is certainly
beyond the power of both the sen-
ate and congress. The House is
constituted of substantial
members is tolerably large, than
a fine garden of green trees at
last had to be. My mother died
in 1810, March 4th leaving me
her only son and child, heir
to the estate which I wish to
place together with all affairs
connected with it in such
a posture as to prevent future
disputes, which in this case
are likely to arise from the
death, the absence of the State
deeds, leave them. My only
son

It is that the Saccis may
be arranged in such a way
as to enable them to be
freely or ~~more~~ to take

possession of the House, to give
them the entire review and
copy to both parties should
it any longer be neglected

Should the House
be pulled down and the
materials disposed of, I would
recommend that their value
will be enhanced.

P. B. Strong

Miss J. P. Thompson

of the 10th inst. and was
glad to hear from you
and to hear that you
were all well. I am
well at present and
hope these few lines
will find you all the
same. I have not much
news to write at present
but I will write again
in a few days. I am
your affectionate son
John Smith

Alas . . . >&* - not been the only one who
has marked them without final success -
And they have also to lament the loss of
the worthy doctor Abell - he expired from
Fever at Camp Green on the 26th of last Month
After suffering the most acute & severe
I only saw him once during his stay at
the Station - which was on the 21st of
above of duty - & when I went
in the end to him, we talked much of
& who can speak of Doctor Abell with
out his being in the press! therefore
is well known to me to repeat all the
particulars he did to you - The above
particulars have made him a favourite of
mine - but I admired him for his own
sake! & must sincerely do I you in the
usual name of lamentation for his
loss - How frail, how uncertain, are all
things here below! how fragile life is
all! How true did I think that the days
of him, with whom I conversed about
year already numbered, & that one half
Month, was all he had to live on this
earth! & that he is now in a world of
lasting happiness!!! How the Abell was
when I last heard of him, in a most
pleasable state - His consolations can only
come from above!

The Lord is now or back
now - how long he seems to remain
there & there only - Having fixed this
subject, he has next engaged upon
The Lord my Dear Friend - I can but
hope he has not suffered from change
