My dear friend
I have just received your kind letter of the 25th and am glad to hear that you are well and happy. I have not time to answer you more fully than I have done in my last letter, but I will say a few words to let you know that I have not forgotten you. I have a favour of the testimony as usual

 the names are concerned, I have not of late
 had time to see if they are ever
 mentioned. You show that one source is
 to be named of some Nichol plan.
 You are Luther, Kemp & Smith.
 I am in London. I do not have much
 of it now. And it is a plate that I wish
 to show to some of my

My dear Sir I have delayed writing you
so long that I might be able to acknowledge
the safety of the 2nd packet of letters you gave
my Brother to be forwarded to me, but they
have never yet come into my possession - nor
am I paid any dues to them. Although I have
been making enquiry at all hands. I have
written to my Brother repeatedly on the subject
but my letters must either have miscarried
or be left to rot as I have had no reply.
I suspect they have gone by the Bentinck
Yarrough some mistake of the agents, and that
they may reach their destinations independently
of me, and with this hope pray have the
 goodness to give my Brother the respective
addresses that I may know where to enquire
on my arrival in India. After a
fortnight's detention from unfavourable

would the day of departure has at length
come fraught with all the honours of an adieu
to home and almost every kindly bosom that
ij^^a ^ *^ h-e^* w-<u-V sympathy with mine
own - and doubly fraughtful to one mark
out by Biblical denunciation as I am.
I had thought that a couple of weeks of
contrary wind would have been a complete
sanation: for any over-squeamed feeling of
nostalgia, but I feel the emotions of the
moment strand the heart in a gloom of
melancholy destitution. and now my dear
sir that I am to bid you adieu, how
shall I express what I feel towards you
for the many acts of kindness which I have
experienced at your hands, and for the
condescending intimacy with which I have
been honoured ~~to~~ by one so highly distinguished
when I reflect on all - and anatomise
my own claims for such attention horresco
referens, and I almost sicken at the comparison.
I am afraid to trust myself further on the

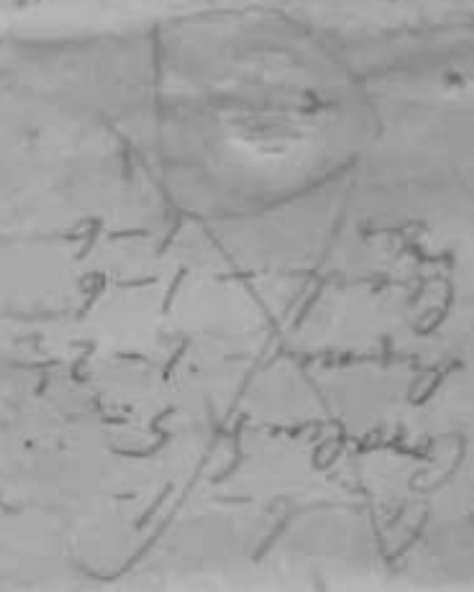

subject least my expressions should appear
extravagant. I shall only assure you that if
there is one person after my relatives to whom
my heart yearns with every emotion of
gratitude affection & esteem that person is
Dr. Wallich. There is a consolation to me in
the prospect that we are likely to meet
again in India: and I shall be selfish
enough I am afraid to wish that day sooner
than your own inclinations would fix. I called
on Mr. Anson the day I parted with you, &
can scarcely express how kindly & felt his
and some parting instructions he gave. My
regards to him. Dr. Graham. Mr. Lindsay
when you see him & Mr. Stokes. Remembers
me with best wishes to Mrs. Wallich, & to
my young friends your dear children.
This is a horrid scrawl but it is written
amidst all the hurry and confusion
of departure. Farewell then my dear
and believe me to be with profound esteem
yours most affectionately
H. Falconer.

Sir,

works.

venerable

I have the honor to enclose two
letters of thanks addressed to the
Honble Court of Directors by the
Professor A. L. Jussieu of Paris
and Professor C. Kunth of Berlin
I also beg to enclose some
copies of the Journal de Commerce
of the 6th Inst sent to me by
Baron Delaport containing an
abstract of his report to the French
Institute on the distribution of the
duplicates in the Museum of the
Honble Company, also some re-
late copies of a paper of Professor
DeCandolle of Geneva on the state
of botany in the East Indies and
the encouragements by which it has
benefited, forming part of the Bi-
bliothèque Universelle for December
1819, they were sent to me from the
author by his son, who has just
arrived in London, in purpose to
work with me in South Street.
I take this opportunity of
informing you that the Poron
from Bengal has brought from
the

The Honble Company Botanic
Garden at Calcutta some highly
interesting collections partly of
specimens of plants and partly
of sections of the roots and stems
by means and fine illustrations
of vegetable physiology and of
geological. Mr Brown of the
British Museum, having politely
offered me accommodations for the pre-
liminary reception and preparation
of the last mentioned series which
is exceedingly bulky, in his house in
August
I am now to receive one chest
containing the articles from the
Baggage Warehouse. They leave
and you enclosed the bill of
lading.

The Society for the Encourage-
ment of Arts, Sciences and Commerce
dated having in the handsomest
manner offered their valuable assis-
tance in the examination of the
numerous specimens of woods, which
were partly forwarded by me at
various periods to the India House,
and partly brought home by me.
They leave most respectfully to
His Majesty's permission to assist myself
of this favorable and indeed unique

opportunity of submitting the specimens to the list of practical and experienced men, whereby the Honble Court will be put in possession of a very important consideration, namely a complete report on the properties of several hundred sorts of useful woods of their Indian possessions. The whole of this collection is at the India House and the specimens are of such dimensions as to admit of their being thoroughly examined by the professional men among the members of the above excellent Society. In the worst of my request being granted, the basis of all the arrangements hitherto made, will be punctually acted upon the present occasion; and not only shall be most complete and perfect series of the wood-specimens be removed for the Honble Company's Museum, but I shall take especial care to have them prepared in a proper and elegant manner for that purpose. I would humbly suggest that the Society in question might be presented with the next best series, and

that, wherever the means admit
of it, the British Museum and
the Linnæan Society might
also benefit on this occasion.

My most dear Friend Wallace
I have 3 letters to thank you for
& thank you for the 2^d from the
bottom of my heart. Your second
letter was most especially welcome in
giving me so much & such acceptable
information of Brown's feelings towards
me. His letter indeed, bore some very
confirmatory of what you said. I quite
agree with you in all you say respecting
that truly great & wonderful man.

I am glad you have experienced similar
feelings: it is what I have done when
ever I have been at sea. I shall be de-
lighted with the Adamsia & the Crocus
you, & will figure them in as early a number
as is possible of the Brit. Magazine, &
for your sake do the best I can with
them. I have always time & business for
such things. The June No. is in London &
those for July & August are prepared, but
not yet sent. So that I can get one or both

2 year plants, according to size. (whether
Spiraea or Spiraea) these two latter are heaving
and of less value. To plan to
send me more descriptions of the Carex
begin as soon as may be convenient to
you & I shall insert in the next issue. I am
glad that specimens are coming from
New York, along with the drawings: for the
New drawings are not so good as New
plants; & I dare not trust to them
without specimens in comparison with
some such figures as that of *Edmonia*
for instance, which though perhaps a
little smaller, as compared with the *P. Dist. (New York)*
is nevertheless a very fine figure.
How delighted I was yesterday to
receive from Liverpool a noble specimen
of *Juncus acutus* in full flower, & made
a 2^d drawing of it at once for the *Herb.*
organ. It was happy to have a char-
acter of the fruit: a nice information
farther than what *Br.burgh* has given
in the *Pacific Researches*? How delighted
I am in daily expectation of the arrival

of your & other parcels from Leimman.
The departure from London has already
been announced to me. I write to our
young friend De Candolle yesterday: - 5
months today. I shall be disappointed
if I do not see both these excellent
guinea Scotland, when they have
spent all the necessary time with
your own slow Herbarium. There,
I believe, they will be very
useful to us which our country can afford
to give: not the East India
Company. ~CL~*—r sr**—

I believe in travelling among your
Compositae. I am truly glad you
have well provided for the pub-
lication of your German plants. Your
work was quite well when last I heard
from Edinburgh: & had referred for a
short time his visit to England.
I have mentioned, whom you see
daily, for his kind letter. He has an
arduous task at the Herbarium. But
I am no more better calculated to
consulted at present than he is.
Koback goes on quite to my satisfaction.

a pleasant man in that he
 could not wish to have in my cabinet

Mon cher Monsieur,

Mais depuis huit mois à Paris dans un état de santé peu satisfaisant et qui s'est peu amélioré, j'ai eu sans cesse plus de nombreuses occupations et d'embarras que vous avez eu sans doute, comme moi, dans le premier tiers de votre séjour. Celles sont les causes qui m'ont empêché de me réposer au séjour, j'ai pu me procurer à peu près, car la bienveillance, avec laquelle vous me traitâtes dans l'Inde fut tout amicale, et m'inspira pour vous une sincère affection. Je profite donc de mon premier moment de loisir pour répondre mes vœux d'appréciation et de donner le plaisir de vous entretenir quelques moments.

J'ai appris avec une vive satisfaction le bon succès que vous avez eu à Pondichéry, et le manière honorable dont vous avez été traité par le Comte de Biscarra. Je suis également charmé de la publication que vous avez entreprise et qui doit nous faire connaître les espèces les plus remarquables de votre étendue collectée. Je suis sincèrement que votre santé se soit entièrement rétablie, et je souhaite également, de rien ne vous empêchant de retourner dans l'Inde, de vous savoir heureux et continuer de vivre à l'abri des fièvres et de tous les inconvénients du climat de l'Inde. Je suis cependant d'empêcher de regretter quelques fois

Vous vous rappelez sans doute que j'ai quitté le Bengale
pour aller au Pérou. Malgré le peu de temps que j'ai passé
dans ce pays, j'y fis de belles collections zoologiques et
botaniques **f*** que j'ai rapportées à Pondichéry plus de 200 espèces de
plantes vivantes. Ces collections, unies à celles que j'avais
2^i faites en Perse et dans l'Inde, et à celles que je fis
ensuite à Paris, aux Herbes de France, de Mouch **<W. ^S €X4" f**
de bonne expérience, forment une
laquelle nos

À mon retour le gouvernement crut devoir inviter les
savants de l'Institut à examiner l'importance des
matériaux en tous genres que j'ai rapportés; par suite de
cette invitation, des commissions furent nommées dans le sein
de l'Académie des sciences, des Inscriptions et belles lettres,
et même dans celui de la société Asiatique pour examiner
mes travaux en histoire naturelle, en archéologie et
numismatique. — Les rapports qui furent faits par M. de
Combe, Abel Bréant et S. Arnaud, organisés de ces commissions
et que vous trouverez dans la brochure ci-jointe, étaient très
honorables pour moi et favorables au projet de publication
de mes voyages, qui va enfin se réaliser, grâce aux
encouragements du gouvernement.

Ma publication sera composée d'une partie
historique d'environ 6 vol. in 8° et d'une partie scientifique
de 2 volumes du même format, en fin de 2 atlas imp. de
200 planches. Je ne publierai pour la partie botanique
que les espèces absolument nouvelles. Ce travail, qui ne

la description de celles du nord, de l'Inde, et de
l'Empire. Si vous avez de si belles choses l' I & m* est
plus intéressante par leur nouveauté que tout ce qui
appartient à la péninsule ou aux Indes anglaises.

Je dirai plus, j'ai compté sur ^{*»W} votre assistance et
votre saine obligeance pour secourir la demande que
j'adresse au président de la Société des Directeurs, et j'ai obtenu
un réquisitoire de toutes les espèces qu'il sera possible de
donner des herbiers du Docteur Wright, de Buchanan et de
Vaubert, qui, à ce point, doivent renfermer une grande
partie des plantes qui poussent en ce moment de la péninsule.
J'espère recevoir de vous sous cette occasion une nouvelle preuve
de votre bienveillance qui m'a inspiré tant de reconnaissance
et qui doublera, si il est possible, les efforts que j'ai faits
qui vous en auez inspirés.

specimens of the immense Collection

of plants lately brought from India.

Dr Waker, by whom chiefly these collections were formed, has since his arrival in England been assiduously employed in proceeding with their distribution and in the publication of an excellent Botanical work, two parts of which have already appeared.

As I have had ample opportunity of becoming acquainted with the nature and difficulties of these undertakings, I may perhaps be allowed to state, that Dr Waker's personal superintendance ^{appears} ~~is~~ to me essential, not only to the correct distribution of the specimens

but also in conducting the publication
of his work. And as I remember the
satisfactory completion of both these
signs of real public importance
to the science of History I trust I
shall be pardoned by your Lordship
for having thus intruded my opinion
on the subject of Dr Wallis's application.

I have the honor to be,
with sincere respect,

My very dear Wallace,

Fisher's fish is here. I would give
Wallace a second from Harton's would,
but few of them, have been sufficient to
prove that excellent quality was a
second collection in your family. I
arrived in Glasgow. I took this dinner
the Professor's laboratory & sent him
me to look London where he was
turned yesterday in time to dine with
Dr. Thomson who is well & capable of
judging of his chemical experiments. I
could not go to look London with him
myself on account of my lectures.
I was home at a late hour
last night. Found your long & kind
resting letter. And was there in a letter
of yours that was not interesting to me?
I had come by last evening's packet & was
the hundred marks of May 15th & came in
due course on the 17th. Yours date is 14th
I only mention these trifling matters to you

to know that Graham, to whom I refer
referred it, by first post, would not
possibly have it in time to write to
Lord Ashley a letter which would
reach him on Thursday. I could
dine with the party & discuss
plans, & had not gone to bed the
whole night I would have done so.
Had I not been dining at Dr. Han-
son's, Graham could have done so too,
for our London-book letters are de-
livered at 6, & there is a Mail to Coli-
nough at 10 every evening. I
was here round 10 o'clock for that, & I
could only go at 11 this morning, at the
very earliest. Graham's answer cannot
possibly be in London before Friday. I
sent my letter to Lord Ashley at 10 this
morning, & never since I set about
anything with more heart & good
will than said letter. If my
answer would influence the Court of
Directors you would never return to India

again. But be assured I was very
guarded in my expressions. That L v.
believe I said nothing, but what you
would wish me to say on so important
a subject. The Council for a moment
being myself to believe but that you
are able & powerful representation of
the absolute necessity of continuing in
efforts, backed as it is by your name &
your friends, will effect all you wish
I will that the scientific world expects
of you.

I have just received from Professor the
copy of your Memorial to the Council
the Director. His only objection is
the drawing and I wish to give you
some letters where they come from have
the drawing, & without specimens of the
Adamsia & Archepia. They are right. The
drawings are not good. I have seen my
best with the Archepia & I will make
a better figure of Adamsia; but neither
will be what they should have been, have
I send fresh specimens to copy from,
shewy your Memorial in a very different

notes to what they are & make up. I will
make an early selection for June as you &
Pickens & Smith. I shall make up
some also for Schuyler. But you must
not say please send the letter in plain
envelope & if you have them please you
are done & ready.

My dear Wallace - I have been unwilling
to write to you for some days past - but
visitors, my publications, my lectures,
& many my excursions which have con-
tinued with the students have kept
me incessantly occupied. I wished es-
pecially to tell you that notwithstanding
being all this your request should be
readily complied with, regarding
a set of Campbell's illustrations of
the principal divisions & subdivisions
of the Granite. Some work for whom
they are. It is enough that I will
like as he for them. They shall be
taken in hand this morning week,
only as soon as, & shall soon be forwarded to
you. I should have told you of the re-
ceipt of a letter from the India Co. But
though all I desired & was undertaken, it is
now I have found one, acknowledging
the receipt of the Book & saying that
it was subscribed in the library. This

is quite satisfactory to me. I desire
most that the public should know
how much the College owe you & believe
for a service. They must do yet more.
They must submit your leave of ab-
sence; & they will, I cannot doubt.

From Lord Ashley, I ^{did not} expect
to see an acknowledgment of the arrival
of my letter. Yet that man did honor
me with a most kind & most unexpec-
ted letter, assuring me with what great
pleasure he undertook himself to pro-
mote your views & wishes; & declar-
ing of you in such terms as satis-
fied me how much he had already heard
your cause, & how sincerely he desired
that all your plans should, to their
fullest extent, be carried into effect.

Thank you, for
them of most interesting subjects. I
have got all in a state for inspection,
save the Brown. For that I must
have specimens. Of all the other British

Concerning Mrs

With enclosures
of letters from Mrs

and from the Board
Council General dated
27th May 1830

To the Chairman of the Honorable
East India Company
London.

Sir,

Having during four years,
explored India as the King's Naturalist,
and having under the protection
of the Honorable Company's Government
made considerable collections in
natural History, I am preparing
for immediate publication an
account of my Journals.

The determination came to
by the Honorable Court of Directors
to distribute to scientific Bodies
throughout Europe, and to individuals
engaged in Botanical publications,
the immense mass of materials
collected in the Vegetable Kingdom
by the Company's Naturalist has
encouraged me to solicit a part
in these generous distributions.

For the interest of the work
I am preparing, I am desirous of
obtaining, if it be possible, from
the munificence of the Hon^{ble} Court
of Directors, that Dr. Wallich may
be authorized to give to me specimens
of all plants of which there may
be duplicates in the Herbariums
of Dr. Wright, of Hamilton Buchanan
of Roxburgh, of Patrick Russell
of Heyne, Klein, Kerig, and
Retter, which probably will comprise
all the species which are wanting
in my collection for the peninsula
on this side the Ganges. These
plants, in enabling me to complete
my work on the Botany of that
part of India, would give it more
general utility, which would be
equally profitable to the English
Botanists whose publications are
at present directed towards the

Dear Sir,

Mr. Belanger, Director of the
Botanic Garden at Ponsicherry, now
in France, and who is about
publishing) there in parts an account
of his travels in the East Indies
containing Topographical, Botanical
and other details, has been informed
that the Honble. East India Com^{rs}
having added to the Botanical
collections made in India by
Dr. Wallich, those of other Botanists
who have explored that vast
country, has been lately by views
worthy of the gratitude of the
friends of science induced to
offer to share this immense
herbarium with all Museums
and to admit likewise to a
share such Botanists as are at
present engaged in the publication
of scientific works. The Botanical
part of Mr. Belangers work

is intended, especially for the
illustration of the Flora of the
South of India; and as he naturally
wishes to render it as complete
as possible, he would consider
himself most happy if the Honble
Company should be pleased to
include him in the proposed
distribution of specimens.

This Excellency the French
Minister of Marine who takes
much Interest in the publication
of Mr. Belanger's work, has desired
me to aid, a request made for the
benefit of science, and he hopes
that this consideration will
prevent its appearing improper.
It is likewise in this point of
view, Sir, that I take the liberty
of addressing this letter to you
hoping the object of Mr. Belanger
will

will be its best recommendation
with you, and that if it be
possible, the Honble Company
will allow him to participate
in the distribution of specimens
of which he trusts he will be able
to make so good a use.

Mr. Belanger is personally
known to Dr. Wallick, and he
glatters himself, that if reference
be made to that Gentleman, his
testimony will tend to justify
the step he has presumed to take.

I have the honor to be
with high consideration,

Sir,

Dear Sir,
I beg to report as follows
Belanger's application

that from the French Consul
such copies accompanied your

On reference to the list of des.
the Hieroglyphics

M- *?&*** As&*cjt~f At+£-J&t£ ^ V M i i ^ 4&*&n*~>*

It seems not surprising that at
the present time, and perhaps in
Richard, each of these is in the fullest
measure accessible to and available by Mons.
Belanger, for every purpose, which that gentle-
man can contemplate. If the basis, which has
been laid down, of providing only the principal
words, and those of the leading botanists

in Europe and America were to be extended
so as to embrace all other botanical designations,
the means, however slender, to which
applications would be constantly made, which
it would be impossible to supply with.

4***d&*\$*

independent of the ~~other~~ general distributions,
which of themselves are ~~very~~ numerous, there are
special ones to those eminent botanists, who
have undertaken the elaboration of particular
tribes or families of plants, and who are conse-
quently to be provided with the best series of
duplicates in each of these. I shall be obliged
indeed, were I not constantly to keep in view all
these arrangements, which have been indulged
by the sanction of the Court, which have
aroused such universal satisfaction among the
botanists of Europe, and which will within a
few years be productive of a Flora of India - such
as no other means could ~~ever~~ ^{possibly} obtain, and such as
will be worthy of the unparalleled materials pro-
vided by the munificence of an English East India
Company.

Now Pelagier's request of bene-
fitting by the ~~same~~ ^{taxes, raised through} ~~same~~ half a century, -
of such men as Ruess, Puffat, Rosburgh, Rottler,
Hamilton, Klein, Heyn and Wight, in viola-
tion of the claims of the first botanists of
this country and the continent, I humbly submit
could be inadmissible, even if the means allow-
ed, which they do not, of its being complied
with.

In conclusion I beg to repeat
what I stated in a preceding report, that I have
deemed it my duty to reserve the means of
obeying any specific command of supply, with
which

I have the honor to
 acknowledge the receipt
 of your letter of the
 17th inst. in relation
 to the above matter.
 I have given it my
 attention and will
 endeavor to give you
 a satisfactory answer

Dear Mr. Hall

Altho' I thank you for your

kind interference in my behalf, and the
prompt collection towards you have
brought the affair of the specimens of natural
history purchased by Mr. Corbett, to a point
that I am well satisfied with, and must have
been so had you not remained about half the
amount as the others would have been
usually done, and I thank you ever sincerely.

I have this day drawn upon you for the
amount (60^l) at ten days after sight & when
you will be so obliging to pay to Mr. A. De Gueschy
or order after the bill that has been presented
has time. — I was puzzled to know how
to request you to forward the bills, when a
friend came up to ask me if I would oblige

been with a single billiard table & a
one percent premium.

Thus along I received letter from
Mr. Kibbe yesterday she mentioned having
seen you in public & inquiring had we
other than public conversation with you.
Amongst the many gay balls & so on
you have seen at home were you of
the group Smith's 500 in Kentucky that?

Mr. Kibbe writes me of the arrival of
Mr. Pearson & Miss Lane from Europe
and of the severe epileptic attack of the
former since his return. You did not
send me any news from India. These
must be surely every day expected. I have
had no letters since March. I am very
impatient.

I conclude you have
seen Mr. Kibbe's work. She writes that it came

at last week that it has been favorably
received already in two periodicals and that
thru my in one week sold 1000 copies, making
the edition. I am glad & hear of £• success.
I have ordered a copy when it comes to the
eye of the ^{public} journal - long octavo. -

Should Mrs Wallich not have left
for Yorkshire, pray make my kind regards
acceptable she will have been ^{very} ^{pleas}
serving to have her children were ill
the measles. I should be very happy had my
boy recovered from them. He grows very tall
& very thin. - Excuse anticipated letter
I have nothing to communicate, nor at
this moment any thing to occupy my thoughts
particularly but the purchase I am about
making of a pretty Pony for my gig. So
my dear Dr Wallich with my best thanks
and every sincere wish for your health
prosperity & happiness believe me

Je suis très flatté que vous ayez bien voulu m'accorder

ne pas négliger de les ranger et de les étiqueter
comme on l'a fait souvent autrefois.

pour ma part je desirerois bien qu'il y ait une

à réunir des objets de cette nature, mais mes demandes
ont été vainement suivies de résultats; cependant j'en
ai reçu quelques uns des antilles et si vous
pouviez disposer de quelques petits morceaux me faire
vous me rendriez un vrai service, car les morceaux
du musée sont visibles, mais il ne me sera
peut-être pas possible de les distinguer comme je
le desirerois.

je pense qu'en m'adressant les échantillons relatifs aux
familles des Rhamnéés, udey, Labatrinées, vous voudriez
bien me faire savoir si on a adopté un plan
général pour le mode de description et surtout pour
l'étendue, ou si chacun en libere de rédiger cette

je serois bien aise d'avoir quelques renseignements à

Voilà que vous pouvez juger de ce que j'ai fait et de ce que j'ai voulu faire
pendant les vingt dernières années de ma vie. Je suis
très indigne, Monsieur, des éloges que vous me faites. En 1824 j'ai publié une Histoire des Capteurs d'Allemagne et de France
en 1826 un ouvrage sur l'infirmité et le traitement des fleurs/serpents
dans les Maladies vénériennes de la France et dans le Languedoc de
et enfin en 1828 un ouvrage sur les organes du péricrâne. J'ai
aussi écrit un ouvrage plus étendu sur le même sujet, mais qui n'a
été imprimé qu'en 1830 à l'université de Paris en Suisse, en 1831
dans le Nord, l'arrangement des collections botaniques de l'université.
Des ouvrages nombreux ont été publiés depuis le temps.

En fait ces ouvrages, que vous pouvez en avoir besoin à ma
peine, je les ai écrits de bon cœur avec de la bienveillance pour
un jeune botaniste qui aimait, par ses écrits, élever la science
et qui l'avait pour elle même.

Il est très pénible de renouveler avec connaissance que Monsieur

ouvrage sur des végétaux Robert Ponce.
Les ouvrages de Ponce et de Candolle ont été publiés par lui, ce

Friend Sir,

Alexander 15th Dear
reply 14 July 1830

I have received your very kind letter dated 17th Dec last and am most truly happy to learn that you, Mr Wallis and family are well.

I wrote to you about the reductions that have taken place in the garden here. Since then Sir C Metcalfe has written to Government to know if the Ryot and Kamaon Establishments are to be retained or relinquished - it appears that the Finance Committee

put them in mind of it - the result of

££=

communication have not yet been received

/&*+^t.—,

see Co ^**^/ i^^^v Whitworth will both be

diminished, as the cutting and clipping system
appears to be extremely prevalent.

I am sorry to say we have yet none
of the *Amburcia* in the garden. Informed
you long ago that I had repeatedly written
to Sir Chas. Metcalfe about obtaining them,
I have since your last again brought it to
his mind & as I understood some time ago

[^] A* Mayley that some of the plants
were expected very shortly, took the opportunity
of mentioning my knowledge of the circumstance
in my note; and the reply I received was "I
still expect some plants of the *Amburcia*
from Mr. Mainy." —

I have not yet had the pleasure of
seeing the first number of your work. Dr.
Carey wrote to say he should be very happy
to show it me, but the continuance of the

very severe attack upon my limbs entirely
prevents the possibility of my writing upon
being, as I am still unable to walk, indeed
can scarcely stand. I, however getting better
and hope before the close of many weeks
to be able to see him. He now entirely resides
at Serampore, as the College at Calcutta is
gone away with.

I must not omit mentioning that about
the latter end of May we had one of the most
destructive hurricanes that has been experienced
here for many years it lasted without the
slightest intermission for three days and nights.
I never saw so much of the destruction in our
area - not a single path but was completely
blocked up - in the Tank Plantation near 400
trees were, I may say, displaced for they
were nearly all blown up by the roots - the

Large ^{(?}***.ΛrJε_*/</sup> ^{tipulana} in the 1st Nursery was
 torn up completely, some of the roots standing
 in the soil thirty feet high. It foot
 little or no damage to our Conservatory
 houses. The tree ^Λ & bungalow on the top of my house
 stood quite firm altho' the young trees ^Λ ^Λ
 it were damaged and torn very much, indeed two of them
 were blown down. The whole of the veranda attached to the
 front of Mr C. Metcalfe's house was blown down - the veranda
 of Mr Brown's house at Kidderpore was also destroyed with
 great part of the front (fortunately no one was residing in
 it) - in short the damage ^{rt>~*~*} is unknown, thanks
 to the no news distributing papers of Calcutta!

Herewith I enclose a letter from Watson's father, also
 the list you desired to be filled up, some of the numbers
 I think must have been displaced, so many of the plants
 corresponding would be known to you.

I am sensible you will observe a great space of
 time between my communications, ^{&*~*~} ^{s/***^} ^{*~j£} ^{pled}
 the dreadful state of my health for so great a length of

Sir,

I have the honor to
acknowledge the receipt of
your Letter of the 24th instant
and its enclosures, relative
to a large consignment of
growing plants from the
Honble Company's botanic
garden at Calcutta for His
Grace the Duke of Northam-
berland, respecting which
I beg leave to submit the
following observations.

The consignment in
question was requested by
me, as it might have been
by any private individual
from a desire of contributing
to the most magnificent con-
servatory in the world, that
at Lyon near Bientford were
ordered

Things would
You d more effectually to strengthen
the mutual exchange of plants
and seeds between both these
establishments, which has
already existed for some time.
I accordingly made an ar-
rangement with Captain
Wells of the Ship Orient, for
taking home twelve chests
of living ^{+**4/} plants, on condition
of his receiving in return
£100 for his trouble. I had
an opportunity of communi-
cating this subject to the
late Chairman of the Horticultural
Company as an instance of
the means and utility of the
Calcutta garden, and he was
pleased to honor me by the
expression of his approbation
on the occasion.

With regard to the
wish I expressed to Sir Charles
Metcalfe, that the charges of
making the 12 chests might
be

be borne by the garden since
influenced, not by any doubt
as to the ordinary course adopt-
ed on such occasions, but by
the circumstance of the num-
ber of chests being unusually
large. In case application
had been made, **f^** couple
of Chests only, even although
it had been repeated in favor
of a dozen of different desti-
nations, I could not possibly
have entertained a **2** of
asking for an inscription
ch you have
now.

Ay

it having **ay** rule during
the 40 years, in which the
garden has been in existence
to prepare all such collections
of **(S~** to **ay** from artists,
founded on this broad basis,
that no charges of that nature
have ever been made for the
many apartments, which the
garden has been in **txit**

of receiving annually from
abroad. At the same time
I beg permission to observe
that, had I been in the least
an 'vest*. *f *4t* £«sfe si
of the
garden, which rendered it
necessary that a special ap-
plication to the Government
should be made on the subject
from the gentleman in charge.
I should without hesitation
have provided for every con-
tingency of this nature, per-
fectly convinced that the
Duke of Northumberland
would **V** most willingly have
01 e/r *Ky*-J them. In point of
fact I did authorize **Q**
what **te** { *£ < % * / } expenses,
which might be incurred **£** r*c/
preparing the sheets.
The assignment
in question arrived a fort-
night ago in a state of pre-
servation, utterly without
parallel, and in that respect,
as

as well as in the value and
beauty of the selection, ^{/, , , . 'Jji«} only
conceive that nothing can be
more creditable to the Honble
Company's Botanic garden
at Calcutta. In corroboration
of this assertion ^{/a^/\$B' &+} I

ing extract from a note ad-
dressed to me by the Lord
Lieutenant of Ireland.

arrangements and which
have been so ably seconded
in preparing and packing
the plants at the Botanical
Gardens at Calcutta, and sub-

which Captain White must
have bestowed on them du-

In conclusion I hope
to be permitted to say, that
no presumption on my part

Mr Waller has recently received
an extension ^{**#\>£1~?} of his original lease for
one year, a circumstance of which you
are not perhaps aware, and he has
been permitted to continue to receive
during this additional year his forfeiture
pay of 1200 £.

I write to you that I have
still my doubts as to the propriety
of this last concession. I am quite sure
that a King's Government would not
have granted the indulgence and I
the Earl Carnarvon think

think that in our present financial difficulties we should be at least as Economical as a Kings Jew.

Mr. C. M. Phelps, who is fully employed as a member of Council can transact the business of superintendent of the Botanical Garden. I really think we might save not only all Dr. Wallich does not receive of his Salary, but all he does, and abolish the situation.

What Dr. Wallich has received in England and will receive under the instructions recently issued is not less than

not correct.

than 3600 £, and all this is really
discussed by an unharmed
Government, which is obliged to economize
matters of essential importance.

It would give me sincere satisfaction to learn that your health was entirely restored.

Believe me,

My dear Lord,

with every wish for your complete recovery

A short time ago * I

called on my friend Mr. Haworth of Chelsea, and conversing, inter alia, on the subject of the magnificent Herbarium of the Hon:

E. D. Compton, which, under your surveillance, will no doubt promote in a very effectual manner the science of Botany; he has pleased to observe that

he had received from the above quarter a collection of dried specimens with a

list - he informed me that this was only the first lot.

Doubtful how far my own application may have succeeded, I am

desirous of expressing to you my very sincere wishes that you should

consider myself to you for any specimens of Plants

particularly of the Medicinal Class;
as it is in contemplation to publish

My Dear Wallis

I have read your letter with
much interest & with much pain. I took
the liberty, as I was sure of your sanction,
to show it to Hooker, who is with
me. We have often discussed its
contents, & parted with entirely
the same sentiments & the same feelings
regarding the subject on which
you write. I am sure you
will be of the same opinion
that

that there is no exertion of any kind
which we would not make that
afforded the smallest hope, & no
exertion which we would not do
light in making where the most
distant hope & no danger appeared.
We both entertain fears that by making
too great an effort upon the Court,
they might be awake to a farther
enquiry which might even endanger
the existence of the noble establish-
ment over which you so worthily
preside, but we only know not ^{this}

tho' for your ^{Cfr[^]} satisfaction, I will
certainly do every thing which you may
still wish us to do. I cannot help
fearing that as B. C. has taken so
decided a part against you, he might
be disposed for mine in opposition
to his wishes, such interest could
be made as w? at a side to in-

your consideration, whether it would

and do you also remember the portrait
of ~~an~~ ^a younger one with an expression of sweet
kindness and good nature? You must,
Wall, I have just seen the originals and
can bear witness to the success of the Painter
in producing two excellent likenesses.
I wondered as you are a linguist you were
not likely to have heard of my being or enquiring
to the northern Kingdoms of Europe, and well
surprised to hear of one from your own
city of Copenhagen. Arrived here last night
and thinking that it would give your
eyes pleasure to participate to see a person
who knows so much & could talk so much

about your father's house this morning
your father was not, but I saw your mother
and sister. They were pleased to enquire much
after you. Your mother, though apparently
in good health, did not seem in strong spirits
and dwelt upon the longing she had to embrace
you once more. I pleaded in ~~cessation~~ of
occupation as an excuse, but her reply was:
"it is 23 years since he went away", and
your sister added force to her own language
by momentarily departing from her usual
manner of speaking English, and requiring
or her own part and pointing to her
brother; "Oh but it is such a high age".
I suppose I was half overcome, and promised
your mother that I would write you to pay her
a brief visit. He is a sad disappointed
her not to have seen you before, since you
have been so near, this deferred hope has made
her heart sick, and may affect her health. You
must hasten then to gladden her with your presence

This is now a dull season for business, and you
probably can get away more easily. You can ^{reach} ~~get to~~
Kamhowing by steam in 4 days, and from Keshik

is to ^{be} ~~be~~ a grand meeting of Seniors on the 18th of
Sept. (I think) ^{at Kamhowing} & you can require no more
exact routine than that which I have
already proposed upon you. Your father & sister
proposing to visit us tomorrow, I shall not
close this letter till I have seen them,
and I will only add now one observation
which you must not think over too officious
or urging upon you and that is, how
miserable you would be (and would
deserve to be) should your mother's frail
existence be terminated before you have
seized the opportunity which Providence
^{seems to put} ~~bestows~~ ⁱⁿ your power of gladdening its

Very respectfully,
Wm. M. W. W.

Monsieur,

J'ai reçu, comme une marque bien flatteuse de l'approbation dont Vous paraissez honorer mes travaux botaniques, la précieuse collection des plantes qui, cueillies par Vos infatigables soins pendant votre séjour aux Indes orientales, & recueillies par la très-honorable East India Company à être distribuées parmi un certain nombre de botanistes d'Europe.

Cependant, quelque grande que soit la reconnaissance avec laquelle je vois mon nom inscrit dans la liste de ceux que Vous avez jugé dignes de cette distinction, je n'oserais pourtant point porter mon égoïsme au delà des bornes que me traceent mes relations avec le corps savant, auquel appartenant, d'après ma vocation, tous mes devoirs comme tous mes travaux, et qui, en m'appelant à pourvoir à ses intérêts botaniques, m'a imposé tacitement l'obligation d'accomplir

cette charge honorable aux dépens même de mes intérêts per-
sonnels. Or, m'étant ⁹ décidé, à ma nomination, à viser
uniquement à l'augmentation et à la perfection des collec-
tions de l'Académie Impériale des sciences, comment
aurais-je osé m'approprier un trésor qui, appartenant à
la science, trouve sans doute plus dignement sa place dans
le musée d'une grande Académie que dans l'armoire isolée
d'un individu? Je me flatte donc d'oser croire, Monsieur,
que Vous ne me jugerez point ingrat, si je me suis permis
d'interpréter l'intention très-libérale avec laquelle Vous
avez bien voulu disposer l'illustre ^{pt**4tjL&rr4jt elcf} Indes
orientales à me faire participer de cet inappréciable cadeau,
plutôt en faveur de notre Institut national, où tous les
amateurs de la science auront, comme moi-même, l'avantage
d'en pouvoir profiter. Et, comme, d'^{A^>} [^]ela, c'est l'aca-
démie elle-même qui se reconnaît débitrice du Directeur de
l'illustre Compagnie, c'est aussi elle-même qui ne tardera pas
de lui témoigner sa plus vive reconnaissance; tandis qu'a-

près le sacrifice, AUJL J'ai eu devoir faire de ce que Vous
m'avez destiné avec tant de bienveillance, il ne me reste à
moi, que d'adresser ces lignes de mes remerciemens personnels
à Vous, Monsieur, où, en réclamant mes droits comme simple
fonctionnaire de l'Académie, j'ose en même tems prendre
la liberté de Vous recommander ses intérêts pour la conti-
nuation de la même libéralité envers elle, avec laquelle
Vous avez bien voulu l'honorer par ce bel ouvrage, dont la
suite de la liste, envoyée sous mon adresse, vient de lui être
remise par M^r Fischer, Directeur

* * " * * " ' ,

Veuillez, Monsieur, agréer, avec ces expressions de ma plus
vive reconnaissance, celles de la plus haute estime, avec
laquelle j'aimerais à être,
Monsieur, Votre

St. Pétersbourg, ce 21. Août,

Wm. Gordon 7th July 1841 /SM

Honoured Sir,

In my last letter dated 24th July I mentioned that Mr C. Nuttall had written to Government to know if the Establishments subordinate to this Garden, at Sythe and Hamman, were to be retained or relinquished. I am now happy to say that an answer has been received intimating that it is the pleasure of the Governor General in Council they should be retained until further order.

Dr Carey has been kind enough to send down the first number of *Agave* figures of new plants, *Mossy* and *Hutchinson* were highly delighted, for my own *IC* * I never saw anything of the kind so extremely splendid, indeed it is what I thought scarcely possible to have been accomplished.

Mr Velpain of Port Louis wrote to Mr C. Nuttall for such of the plants figured in your work as were procurable, and I prepared a Chart of such as we had of them with a box of seeds, and they were dispatched on the ship Atlas under care of the Surgeon Mr H. Keane.

£4

At work there was a robbery committed in the garden, three plants of *Strobilium* being taken away in the night between Wednesday and Thursday. I related the circumstances to Mr. Packer representing the ^{suspicion} hazard there was of making the two Chokidars examples of, to prevent the recurrence of these depredations, and stating my fears that it might only be the commencement of a system which many years ago you had put a stop to. I regret that Sir C. merely directed me to dismiss the delinquents, but to pay them their wages.

It has been a ^{s&l^s} ^{,*>} time since I have had it in my power to send seeds to the newly established Bot. Garden at Poona, ^{wr} & having desired me not to send any by letter Desk, the packages being considered too cumbersome, and no Party going to Bombay from Calcutta. There however now ready, by Mr C's permission two boxes of seeds and they will be dispatched in a day or two on the Brig Princess.

I forgot to mention in my last that there had been some slight repairs done to your House - mending and casing the doors and sashes, and sand scrubbing in parts the outside walls. There has been almost ^{s >} some family residing in it, the names of some are - Mr. H. Sanders, of the Board, Col. Bryant, Col. V. ...

Dr. Lytton, the Governor General (for 2 or 3 days), Honble. Mr. Bayly and
Mr. Pitt #4* own, Mr. Packer, the Mr. Princeps, Col. Corcoran,
Capt. Tudor Mr. Meinchin the latter family is now
in possession.

I am most happy to inform you that I
am recovering, I may say rapidly, in the
manner I had been desiring for the preceding two
months, for Mr. y almost say the c S. jz6- l ing the latter period
was daily carried from my bed to a Chair or Couch.
I am now however by the mercy of God Almighty re-
covered by the perseverance of the most worthy *£ Jfpf^rr*
y being able to walk about my house with the assist-
ance of a stick.

With respect to the general state of the
I am happy to state that the y, /? £* * * + < * * , • ' V - . ? • during
the season, is clean and in good order. We have
had very high tides and the river some days ago broke
in at the same place it did Nov 12 years ago, at the west
corner of the y, du, but done us no damage. My brother
with Mother, Butler, Gumbo, Colman &c. (at the Green House
omitted in) have always begged to be remembered to you in
the sJtt* *vL respectful manner.

I am getting so n, ^ - X jT^x-t * x, A t- **• that I can
write often as you desire that is all here monthly.

I sincerely hope that you and Mr. Wellin and family
are continuing to enjoy good health, and beg to subscribe
myself
Yours faithful and respectful servant

Dr. Taylor presents his compliments
to Mr. Wallch. & cannot help expressing that
he feels bound at present that a part of
Dr. Wallch's work is put into the hands
of another Printer.

Considering that he was induced
to take a copy of this expensive work as
a sort of condition; - that he has given
time & attention to the work beyond
what is the province a Printer (and
what degree of utility must leave
Dr. Wallch (say) - and that he has

not but feel obliged to the only plain

some additional employment for his
men would be most acceptable to
him. - An is it very satisfactory
to him, under such circumstances, to

deal in printing character
He takes the liberty of saying
that he can hardly suppose
he has been seen rightly informed;
as the conditions of his taking a job
of the work implied that he was to
perform the work.

My dear Friend Wallech.

I have longed to hear from you
again & of the ultimate result of
your applications & those of your
friends to the India House. Surely
your leave of absence will be pro-
longed. If not what will become
of your collections & of your publi-
cations? I do earnestly hope that
your own wishes & those of your
numerous friends will in this in-
stance be gratified. I have
not deemed to hear from you
for I have not written to you since
my return from the Highlands. -
Now could I do so, till that it in my
power to send you, at the same time, the
long promised *Cryptogamic* plants.
You will wonder when you see the
small parcel, which goes by this

day's work, why I should have been
so long in finishing them up. But in
these days my leisure is ^{very} ^{scarcely} ^{at} ^{all} ^{available} ^{for} ^{any} ^{purpose}. As soon as they
were over I went to the Highlands
for my recreation: & a ^{good} ^{time}
I have been home, & with all my
accumulated employments: ^{over}
over by a month's absence, I have
had daily visitors & have not been
able to call on ^{any} ^{one} ^{of} ^{my} ^{own}. Had
you only wished named specimens,
I could have sent you two times the
number without any difficulty,
for I could have looked them up
at any leisure moments. But to
select those & those only belonging
to certain divisions, has taken me
more time than I had calculated,
— yet in the naming of them I
have been the assistance both of
Mr. Hooker & Mr. Klotzsch. Let
the journals be opened consequently

The pleasure we all have in
your kind and warm letters &
assurances that our little
efforts are for the benefit
of you & that our little
contributions are for the
benefit of the poor & the
suffering is a great comfort
& a great encouragement
to us. We are sure that
your kind and warm letters
& assurances that our little
efforts are for the benefit
of you & that our little
contributions are for the
benefit of the poor & the

My dear friend

I have much to consult you about
before publishing any of the High Islands.
and several of them are improved & some quite
ready to go to press with the descriptions. I
think we I believe I told you a portion
of my MS. Miscellany to them under the
name of Supplement. I give all the plates
coloured, on a 4^{to} size. By this plan they
will form a distinct portion of the work
& I shall at least have the satisfaction
of being able to shake off some copies to
give away to my friends, which will
enhance the value of the work. I speaking
of the article "Illustrations of the
Coast of the River, principally of the
southern parts of the Peninsula by Dr.
Wright, &c. &c." I give him the entire
credit of the work, for he enabled me
to get the sound drawings, descriptions made on
the spot, & only add synonyms, & such notes as
my Library & above all your instructions
donations & Contributions will enable me to do.
I send the whole of the drawings with such
of his own drawings, that of which no figures
yet been given. This I am particularly glad of

before any figures of new species be sent. I hope the
authenticity of his collections, even with you, will
be distributed with your names attached to
them, which I am sure you little will
shall be but too happy to accept. You will
I am sure on this account, let me have any
authentic that come to hand from some
collections.

I assure you the drawings &
specimens are quite beautiful & all done under
Wright's immediate direction. I am a little
anxious about the sale; for the cost to
me is very great; but I am in hopes that
the collections of the known plants may
increase the sale of the Miscellany & perhaps
I will recommend it to a bookseller, who
will take it off my hands. If not I shall
have the satisfaction of thinking that I
have contributed my mite towards further
the cause of Botany & of having Botany
too.

& 7s

Among my specimens sent to me in a
certain group, which appears to me unclassified,
I have only one specimen: but under the name
I have been moved of the justification &
I will beg you to tell me whether you have it,
or what you call it. This is the external
specimen of a flower. No figure is drawn,

Weylton sometimes quotes Peter's St. Paul. - I
was very sorry to Weylton some time ago. It is

note to Mr. Weylton if they have it? I
am as good as to request Mr. Deane

Since my last of the 2nd ultimo there has been nothing particular transpired respecting the garden.

I have received directions to prepare the usual number of Plant Chests for the Hon. Council of Directors, and which we are now making of the description desired in your letter i.e. small. I fear they are not likely to reach England in such good condition as those formerly sent because I understand none of the Company's own ships will come to Bengal the ensuing season, however this is only a surmise of mine.

I have not yet heard what the determination of the Council is respecting the retention of the Farm and Oak Plantation, but from nothing having transpired since I wrote you on the subject, I suppose both plans will be retained.

Mentioned in a letter dated 4th March that

I expected a fine supply of air plants, from
W^m Gomes, and my intention to pack and
send them as desired in your letter of 24th
June 1829. but ^{f^-t^L*} much ^{fl<} ^{s?Zf<}
than on receipt of the collection the whole
fell far short of what I expected ^{t^fz**>} the
Parasites, such as arrived alive, were not worth
their carriage. I hope you will ^{€L~>/ *s£./ ^*i!tt/£}
me as wishing to attach the whole blame to
Gomes, but ^{rf-M^/£^} the failure as far as could
possibly be seen, was occasioned by the unusual
length of time the boat was on its passage
a whole month.

I believe [?] you mentioned that all the
allowances of James Watson were paid ^{^>} to
MacKintosh & Co up to the 25th Oct^r 1829
^{A,} which I hold their receipts.

The two boxes of seeds for the Bot. Garden
at Poona (mentioned in my last) have been
dispatched P^r Pringle.

tingent bill: also that the widow of the late

I received your note of 6th March last,
with its enclosure, through Mess^{rs} Colvin & Co.
on the 18th ultimo. I have two Chests of plants,
a box of bulbs and a box of seeds ready for
Mr. Poyanguel - altho' I have received no re-
ply from Sir C. Metcalfe respecting the dispatch yet.

In answer, with respect to your above
note, by to correct a mistake of Mr. Cantors
sending the plants for the Duke of Northumberland
which were all dispatched 1st the Orient. By
my letter and list of 17th Nov. 29. you will
perceive the dispatch 1st Persian consisted
entirely of dried specimens, of Palms &c. The
Orient afterwards took a box containing dried
specimens of the *Sivistonia mauritiana* and
a small ditto of *Merma* seeds which will be
seen in my **^C*^** **/jji^+A** 1820. Mr. Cantors

My Friend

I have been in your debt for a long time - but I trust you will never hold me out as grateful if I do not acknowledge your communications immediately. I have to thank you for the last noble collection of specimens (including some additional forms) & for the 3^d fasc. of your truly splendid work.

I need not say how much I regret, along with every other botanist your approaching departure - which I understand is fixed to take place in April. Before that event I must shake you by the hand, & as I fear you will

not come to Edinburgh, I
must go to London. Tell me
however, whether you ever come
to see Barker - Graham - myself
for if not, I am in other
earnest I will see you in
London.

I fear your absence will be

is as far as the S. J. P. L., 40 copies
was concerned. We trust however
at any rate to be able to con-
sult on second series of auto-
original work - in which justice
shall be done to your Indian
treasures.

I think I mentioned in a former
letter that some sheets of your
catalogues are wanting to complete
my set. Would you be kind

My dear Sir

After leaving your L^{tr}
to the India House, where
remained the accompanying list which
has made to understand has reference
to the two chests I computed at the
Baggage Warehouse (received by
the Lady Regent) although it was
evidently intended that they ^{should have} ~~received~~

Found but few plants
alive, but among them there is not
one, which is not interesting and
valuable

Under these circumstances think,
that the suggestion contained
in your note is very judicious,
and I pledge myself that the
in question **/L<^6 fa** are
highly valuable & acceptable
to any private gentleman's garden.
The above-mentioned Palms might
be distributed among several.

collected through Mr. Duff amount for the year
this year letter Mr. Duff's improvement over the
application he made to you, pray act as your own
judgement may direct. I should conceive that
if he can pay in November he certainly can in
October. I have little doubt but that Mr. Cobbe
Duff shares the specimens and that the purchase
was made between them.

I have you any recent news from Calcutta? I wish
to hear how you have been since I received your
last letter. I was very much surprised you
as I had every one else the kind of improvement
of previous state taking place. How extraordinary
I have heard from the account of the
I have not mentioned. She wishes the interest
of her bill to be transported however the
you are still but I know not that I do. I should
be very glad to hear that she is improved and that
she is about to be going to her condition. The amount
of interest was about 1000 and she has been
for some period sent them together and

have not seen the friends message in the newspaper
and have had no letter confirming it. you must
excuse my telling you who it is. ^{^ . . . J}

My dear Friend William.

I am always, & always deeply, in your debt. Never apologize. Excuse me for sending you a long letter. There is no more correspondence which I value so highly as yours: & of the dozen letters that sometimes come to me at once I always open & read yours first. For in yours I find what is mistaken by the wisest of our friends & of affection. & often in addition much interesting & most valuable information. This quality, these plates are rarely, I may say never, to such a degree, united in any correspondence with which I am favored. Your excellent account of the Med. claims was on the very evening of its arrival selected and published & sent to the printer in London. Thus again I am doubly indebted to you for your three Libelles of your names. Do not entertain that in mention of the Libels & especially in the columns of them, every

to England, for sending to you my father's
 lithographs have been published, but one ^{of his} serious looking

 the pleasure of talking with you. I included it, in Gignac's
 Monography of Lascadulas for our mutual friend Breunhan.
 The Spanish Determination of the Compositae is perfectly amusing
 you were very properly in copying his portrait. I presume that
 it will be for you about as for better than for the year names
 with a wonderful simplicity, but in such a manner that one out
 of a hundred has substituted. My father is now entirely devoted to his
 Compositae, and for many years your beautiful Veronica is but
 that a tremendous work. I must leave it to you in regard
 to the intention in reading it. I never began
 with any business plan, but in the late of my father's
 acquisitions that I could not avoid spending Libanotis

 at Lyons, in the course of our friend Beattie, who was
 on account of his health. He has written to Madame
de Weyler, the author of a monography of Scrophulariaceae, because
 to show my father's herbarium and herbarium curiosities. This
publication is a natural and useful opportunity of getting
 out a note that might perhaps have been arranged some
time ago. In the time that we received his note concerning
the note to your great benefit of 350 specimens from London about
1820 collected by Gardner in his first round then with his father
was sent from Chili and several other countries which
we had the intention of writing the note concerning the
note, the note's name is the note the name for you

W. Garden Calcutta 2^d Nov- 1830.

Friend Sir,

Since my last of the 8th ultimo
we have received a communication
& *+*t-J< stating the pleasure of Government to
obtain the Experimental Farm and the
Tank Plantation - part of the letter runs -
"The Governor General in Council is pleased
in modification of the Resolution passed in
the Territorial Department on the 22^d . ^ ^
1829 to allow for the present the limits of
A. Botanical Garden to remain as before,
and to direct that the Tank Plantation an-
nexed thereto shall continue attached & tft*^
Public Garden unless required for any pur-
pose of general utility, or unless a valuable
consideration shall be offered for the same,"
On the 5th of last month I heard

from Capt Major Watson informing me that
he had received a letter from his son James,
dated the 28th March last, saying that he
(James) had not received a letter from him
(his father) since one dated the 26th March
1829 and requesting that no more letters
might be sent, as £[£] intended to return
ft/'':; as soon as possible. Mr Watson
seems to be under some apprehension that
James is about leaving you clandestinely.
Hope this however is not the case. indeed
A* - C* should not have troubled you with
this circumstance, but that possibly Mr Watson
might imagine I neglected forwarding his
letters to James enclosed in mine to your
address, but this I have done always.

I am sorry to say that we have
not yet received any plants of the Amherstia.

We are getting on as usual in the garden
and it looks clean, but we have had a great
number of people with Cholera morbus
and fever are very prevalent, numbers of
the inhabitants of Calcutta have dropped off
and in general very sudden - Mrs. Murray died
Monday week after a few days illness.

I am glad to be able to say
that I am getting better, but still
continue weak in my ankles and
feet. I trust the approaching fine weather
will enable me, in some degree to inform you
of my further progress.

Hope this may meet you and Mrs.
& family in the enjoyment of health.

I am honored to

Mein sehr o - Pft. lieber Freund!

Die vorerwähnte sende ich Ihnen einen ganzen Brief voll Zahlen, wobei ich hoffe und erwünsche, dass er nicht einem ungewöhnlichen Dilemma in die Hände falle, der über die Druckschwierigkeit toll werden könnte. Auch erhalten Sie aber nicht einmal alle Nummern, sondern nur eintheilweise die Nummern der Pflanzen, welche Sie mir selbst zugesandt haben, weil diese zunächst wenn Sie mich fern bedenken wollen, am meisten zu berathen sind. Ich fahre nun fort, die Familien, die ich bearbeitet werde, durchzugehen und die Nummern zu notiren; mit der Solanaceen bin ich bereits fertig. Sobald die übrigen Familien ebenfalls versehen sind, erhalten Sie alle diese Nummern zusammen. Zudem ist mich nach Ihren plantae rariores erkundigt, um meine Synopsis der Familien einem früheren Diopill anzupassen, finde ich, dass die hiesige Universitäts Bibliothek diese Kopie noch nicht hat, und da ich selbst das Werk für meine Karte, so wie für die Akademie der Naturforscher zu theuer finde, so muss ich mir wohl selbst ein Schema nach meiner Art machen, es sey denn, dass Sie, verehrter Freund, mir ein Blatt eines solchen Textes als Muster senden wollten, was mir sehr lieb wäre. Mit diesem erhalten Sie einen Brief für unsern verehrten ^{Herrn} Robert Brown. Ich sende Ihnen auch Sie theils weil ich dessen genauere Adresse nicht weiß, theils und vorzüglich weil ich ihm in Deutschland

the event which I had not done when I last wrote
to you. I do not know Col. Brown - what do you
think Col. Bennett feels on the occasion? I am almost
sure he was disappointed. I hear of his great
desires of going up his house at Sheen. what
can I say of my other friends - Mr. Heber's

it somewhat premature. Do you know the Countess?
I was vexed at the rough manner she was

what excites its value is, that all expenses
have been cleared by order of the friends who
sent it. — but I am writing very dull

of my efforts had not necessarily caused the introduction of
my desire to see the same in your hands, and to see
the success of the generous and enlightened directors of the East India

A thousand thanks my dear & kind
friends for your truly welcome letter.
Greeting us your letters always come to
me, they are few times more so when
they tell of such good news as you
have given us. I wish Mr. Hooker's
my Father's & my most warmest con-
gratulations on Mr. Wallich's safety &
well-doing & on the addition of a daughter
to your family. May she & the child
continue to do well & give you no
such cause for alarm & uneasiness as
you experienced last year.

Mr. Hooker was the first to see in
the newspapers the resignation of
Lord Ellenborough. "Hark the good
news" said she, to Wallich & all his
numerous friends: & truly we have
shook of it again & again as a matter
of great rejoicing. In regard to Lord Ashley
be he in want of his Office, a man of his

high character & integrity & almost
every influence. In your case, he
should not wonder if what he has
to say upon it will be more listened
to than even. He is a glorious man, &
wonder it only for his kindred & attention
to you & to your interests I should
pray for blessings on his head.

profundity of his knowledge & the
uprightness of his character. But I

I am extremely sorry to hear that Dr. Ashley goes too, & must sincerely hope he may not decide hastily in thinking he will get things arranged to your mind. I wrote you long ago that in Booth's opinion & mine you should try to soften Dr. Bell (a man as that gentleman is now thank God out of the question, but ^{^dt^<} to write me) & ask him to let me say a word to stop our course to give any chance of being ^{^r^} 7 to you. — I have within these few days received poor ^{UUSA^+AsAA^f} collection. — The Ministry you know thanked the cause of Directors for their long ago, but the Patrons (the Town Council of Edin?) have not yet. — Perhaps I might get a clause of

I have one more in

For Geo. Patten Esq.

I am extremely sorry to trouble you, and to bring to
 your notice the following Circumstances of my grievances, but
 feeling that your ^{^4-^-*-*JW^E} excuse me if I deserve of your
 displeasure -

Yesterday at 1 O'clock Mr. St. Patten (Columboe
 to day) with a fit intoxication of Liquor, had sent for me, after my
 arrival at his house, he asked me why I have paid to this Cloth
 merchant 10 Rupees instead of 11 which he was desired me to pay,
 I did in answer, that I had no money to send for the prescribed
 pay -

pay more than 10 upon this, Mr. Potter, told me that she will of
 course make one pay, and then Mr. de Potter, who with full anger as a
 Drunkard began to chide me so loudly, showed the sign of beating me,
 and I, on seeing, that he is about to take that into effect, began to take
 flight from that place, where I was obliged to stand and come on the
 road, thereby he Mr. de Potter, gave a loud order to his Concomat Butler
 -see, saying, "Catch, Catch, that fellow" (Mr. de Potter) "I shall severely
 punish and hang him upon the tree," which I gave a speedy run and
 kept my breath when I came to your house, which was nearly at
 2 o'clock, when the people were to their masters, Mr. de Potter, again
 sent down one of the Garden Party to call on me, upon which for the
 fear of my respect I begged leave, that he will inform to Mr. de Potter,
 that I am gone out from your house, who according my desire, acqui-
 -sited to Mr. de Potter, saying "that I am here is not there," and also upon
 his telling that he does not know Mr. de Potter, is returned from Cal upon
 or not, which was questioned by Mr. de Potter, thereby he got 3 or 4
 bottles, which was so severely as the Magistrate punish to them, as
 however, the Mr. and Mrs. de Potter, upon examination of your house,
 whether I am there or not, again Mr. de Potter, accompanied mostly
 and his Concomat Man-journey took his enquiry on the said house, (where
 I was indeed residing there, by the de de havelle White) but on seeing his Mr.
 de Potter's arrival with a large nation, I went out to speed a man
 to save of both of my life absconded myself, and Honor to St. Nicholas, or the
 Capt. House, and with the hope that he may not Mr. de Potter, be able to
 enter there - upon enquiry to several places, but went up with anger
 to my office, where I can't keep my money Public books and several
 bill & vouchers, and which was locked as usual back up on the
 Iron heap, and made it open, and on entering to the office I found
 the Iron Chest which was all account and money and some other
 accounts, bills, vouchers and several sundry other papers & some
 were was on the same condition throwing whole night, but I the

Dear Sir

a second time I have to fulfill the same, though very different task

from your letter of the 13th inst. I have been thinking of writing you
I have from Mr. Bland's letter, he said in his note when he left
Bath on his return from London, that I have, through and means of
of being engaged among the botanical specimens, to make
& the duplicates of the East India Company's herbarium, and that he
as they were, and that the first I wish to report further information
from you, of which Mr. Bland said he had himself seen part of the
already proposed in your letter, notwithstanding this the
of the second case, really surprised me, and the more so, as I
you had proceeded to it. My satisfaction was, indeed, a double one,
it was not only founded on the possession of the fine specimens, but
on the fact that you were the possessor of your herbarium.

any last time letters (written in March, 1836) which, however,
know, could be attributed to your work of —, the idea that I had
perhaps troubled your indulgence with my many questions, and in
with my anxiety, — this self-accusing idea had begun to rise and
took my imagination so much that I felt myself truly obliged
it as a mark of your kindness of the work. Let me then of
this double account, give you double thanks, and assure you once
more that I shall never forget how much I am indebted to you.
I don't see whether it could not have perhaps been added, saying
thanks to the Hon. East India Company a second time in a separate letter to
the Company, as I did very gladly on the former occasion, and which

Letter accompanied my last answer to yourself, dated March 21st, so that it
 must have reached you long since, and will have been communicated to the Com-
 pany through your kind mediation ~ ** ~ jL+E J& goodness to prepare if
 a revised letter to the chairman should be expected, of which you will, perhaps
 have the goodness to inform me; I shall certainly act accordingly with
 joy, and with equal pleasure as formerly, though I cannot but repeat
 again, only in other terms, what was the content of my first letter
 I observed with pleasure that the determination of your immense mass of re-
 Indian plants, consisting chiefly of new species, and even to announce new good

 successful zeal of Mr. Benthams appears to have already put in order the
 rather extensive family of Labiate of which the Flora of the East Indies pre-
 sents several peculiar forms.

I am very happy to perceive now
 that you have a great deal of work left. The Compositae, among which I found several
 very distinguished species and genera, seems to not yet examined, nor
 A-mcd, at least not published in the lithographic catalogue, whereas
 I presume that their determination entrusted to some Botanist (I suppose
 to Mr. Sebold) who has not yet been able to observe a business of such
 extent and difficulty. Besides this, in 7 other families, as it seems
 from judging by the catalogue, which contained, if I have overlooked
 no name of Ranunculaceae, Cruciferae, Euphorbiaceae, Chenopodiaceae, Legum-
 inosae, and even of the monocotyledonous families, etc. etc. Am I too
 presuming, if I conclude therefore, that on arranging the remaining fa-
 milies '7** will continue to favour me with duplicates &***+. Will you

me. I am truly as ⁷ my immediate avidity, - but respecting plan
my mind seems to be in a sort of state like dropsy. - the more the water
rises, the more the patient grows thirsty, - the more you excite me, the
more I shall wish to possess. What is there to be done? In this state the publica-
tion here is often the only admissible, and as I have ever felt instant relief
at every dose of your excellent remedy, I can wish nothing more anxiously
but that you would give it me as often as you can. - I am very sorry to hear
by Mr. Johnson DeFandolle that the E. I. Company is pressing you ahead for return
to Calcutta as soon as next spring, and that you find great difficulty for remaining
yet in London; this would be a great loss for the whole botanical Europe, as you
could scarcely be able in so short a time to attend the determination
of and distribution of your remaining plants. I therefore heartily wish you
may succeed to bring your painful patients to a resolution more reasonable,
or at least more suitable to your own wishes & more profitable to your
cal friends who are happy to acknowledge in you their great benefactor & a
promoter of Botany.

Your *Physicae* have been several times under my hands for examination
and there are several among them which I had never seen before and which were
not enough those you have sent Mr. Prof. in Mr. Hill's advance but very slowly,
as I can only from time to time consecrate some hours or days to these studies.
The ^{-J^i} from the herb. Hamilt. shall be returned to you in the course of the
winter, or soon as I no longer want them, and at all events before your departure
for Calcutta. ^{-#p} ^{^,&*} Profer, is now engaged with the arrangement
his very considerable collection which, I think, is about to be enriched by your
specimens. He publishes this very moment a very interesting paper on the structure
of the flower of the Balsaminaceae, with very sagacious remarks on that order.

My dear friend & collector
"I desire one of the sincerest pleasures to
courtly with your wishes, as you as my
feels for will enable me, in writing to
Lord Ashley. Your letter was received
last night & I have lost no time in an-
swering off my indisposition. If I have repre-
sented the case strongly I can truly say
that I have said not one word more
than the truth. It is however, as you
say, a pity that Lord Ashley's sug-
gestion of having a joint letter was
not carried into execution. If all men
in the world were should be the last
to take offence at not having his letter
acknowledged. Why, on that ground I
should now be at peace with him.
Sincerely without any jealous feelings
being excited, the honor Lord Ashley
did me in acknowledging my former
letter may be accounted for from the
circumstances of the great distance at

which I derive from him, which
Brown was on the very spot. He
that as it may the latter was so kind
an one & spoke with such warmth
of feeling & with such sincerity of your
& of your interests - that I shall be
sure it as long as I live.

I ought to tell you that besides refer-
encing your concern some additional
matter, I sent Lord Ashley an extract
from a little notice more actually in
the press relative to you, which occasion-
ed him the introduction of matter to your
of Wright's plants. This I thought
to do in the more interest to the occasion,
because it was not written with the
view to copying our request for a loan
of album; but at a time when I supposed
the period of your return was nearly
nearly fixed.

How beautifully & lucidly concisely
he has drawn out "Wright's" character:
"He cannot take a fee in a Physician -"

like way." Had you written volumes of
that good man's life you could not
have given a more perfect character.
Such a man will ever be ^{admired} & esteemed
by all who know him. I wrote to him
two days ago to beg him to send me word
how his family were: - & I am truly
glad to learn from you that they are
well: for I had a 1000 fears about
that darling of his daughter, Sarah.
I would also tell me you would kindly
write the account of the Aberdeen
don which I received from Mr.
Pennycook at Mr. Mackenzie's hall. It will
come into one of two Mr.'s which will
go to London in 2 or 3 days. Please to
send me the description to the
D^y post, addressed to "Mr. Couchman,
Printer, 10 Throgmorton street." It
in a week's time it will do. John
has not sent me the Aptostrophes
& Indiscreet. I wish he had, for his
things are always good. They may come
yet.

yet - So let our entreats of you tell
me the result of the meeting of the
Board of British as soon as you have
our united interest & best regards to
Mr. Wallish & all your children.

Your most truly affectionate friend

My Lord

The great zeal with which your lordship has
patronized D Wallich, induces me to hope you will pardon the
liberty I am now taking. D Wallich's labors in the investigation
of the plants of India are of the first interest to European naturalists,
& both on the continent & in England, a wish had been often
expressed, that he himself by a prolonged residence in London, be enabled
to complete them. As I am in the charge of our extensive Herbarium
belonging to the university & have already received by
the liberality of the East India Company a portion of the most collec-
tion of plants in their possession, my attention has been here frequently
called to the subject in question. The arrangement of a collection of so
much novelty & magnitude must necessarily require with great skill
in discrimination a large sacrifice of time & unremitting industry, if
possible it ought to be completed by one, and the more so as it
is probably would be difficult to find a substitute for D Wallich
equally able and equally willing & zealous in devoting all
his time & thought to this important undertaking, great
delay might be the consequence and probably a
for uniformity in the systematic distribution & in the
correctness of details. D Wallich's pursuits are of the first order
and his claims from both knowledge as a Botanist in
India, and as a traveller & collector in various parts,
place him above all competitors. For recent times
the Character of the E. I. Co. is much commonly
distinguished by its publications & Collections & liberal
encouragement of the ... of the Natural history of the most
interesting portions of the Globe & it would be a subject of great

Dear Sir
I have written Lord Ashley & used
terms as strong as the earnestness of my feelings
can call to my assistance. My fingers are
tired & my pen worn out, so that copy

It will be most inconvenient for me
to go to London this evening, but I
certainly will if you are ordered out. I should
not like to go to London without carrying with
me the specimens which Bentham so obligingly
took me from his herbarium for comparison
with some of your specimens. Will you then
have good time to oblige me by sending the
mutilated tubes & tubes which I believe are put
up with them. — It is indeed a sad pity
that such little flaws should exist in so much
excellence

excellence as our friend Brown possesses. I do not
know whether Lord Ashley answered my former letter
I have not thought it worth a letter to ask. I am
far more interested to know the $a2^7u4_t\epsilon^{\wedge}$ will

intent to obtain the end which all ^{the} ^{parties} ^{concerned} in
all your personal friends is anxiously wish-
ing. Perhaps a call of the amount of 1000 £.

send it to your house, instead of your shop.
man did not inform me till I hope it was with
you. I suppose the ship receipt that you may lay
the violent hands on the matter if he should not be
delivered it. — I hope my letter to Lord A. is in your
hands. I have been so disappointed by every service I
got your letter on Saturday night that I have not been
able to write sooner. I am now writing at half
past 12 of Monday night. — Let down today at
twenty minutes to three o'clock to write notes for

a clinical lecture which I delivered at your school.
What would you most suppose it was!!!
at five o'clock I delivered a botanical lecture
from notes from notes which I had not looked
at for 12 months! — I reached home at half
past 8, & dined 12 hours after with no in-
tervening stop gap but some had hardly wrote
at the Hospital! — I have not been able to
tell the Principal since I got your letter, but I
mean to send it to him immediately, &
shall see as soon after as I can. — No!
must not send it in consequence of your
observations re j f ^ more, but I shall see
him tomorrow. — *V>

My Dear Sir

I have addressed a few lines to Lord Ashley -
I could have no hesitation on the subject - & I have
said in all sincerity, that you ought to be enabled
to complete your Magnesian Opus by a prolonged
residence in London - your affairs are too great
to be postponed - & the plan should be
readily pursued without delay or alteration - Much
evil might result from a change - & a competent
person, who would devote himself, might not be
easily found - The L.S. Company is very honourable
in the eyes of Naturalists - & I hope it will keep in
the only course which ought to be followed on the
present occasion, for its own credit, & the extension
of knowledge - I trust you can have no difficulty

My dear Sir,

Understanding that an application for an extension of Dr. Wallich's leave of absence is to be made, & having learnt that Lord Ashley who while in office warmly interested himself in forwarding this object, has expressed his readiness still to second the intended application, & has suggested that he be furnished with statements from Dr. Wallich's Botanical Friends. I take the liberty of begging you to hand over to his Lordship the present along with your own Letter on the subject. I have great pleasure in availing myself of the opportunity again afforded me of stating that our excellent Friend has been most assiduously employed in proceeding with the distribution of the immense Collections which the Court of Directors have with unexampled liberality destined for the Botanical Public.

I have to state also that in my opinion this distribu-
-tion, from the nature & conditions of the collections, can
only be satisfactorily proceeded with under the super-
-intendance of Dr. Wallich himself. And I beg to
the expression of my $\Sigma^{\wedge} < r$ - dante confidence, that the
sums now about to be applied for ~~any~~ necessary for
the completion of a work so important to Botanists
not of this place only but throughout Europe, will be
granted by the Court of Directors in the same liberal
spirit in which they ordered it to be undertaken.

I am, my dear Sir,

Honoured Sir

Since my last of the 3rd instanc^e I have had the pleasure of seeing Mr Cantor, who kindly read part of a letter from you stating that the Plants for His Grace The Duke of Northumberland had reached their destination in very good condition. I am very happy in the result and sincerely hope it has been gratifying to you.

As desired in your note received through Mess^{rs} Colvin & Co. two dfe % of Plants, a box of roots and a box of seeds addressed to - Mess^{rs} Eng^l were dispatched by the Ship Portland on the 15th instanc^e. Mess^{rs} C. & Co. having shipped the dispatch, I sent the bill to them.

We have also dispatched 1st the Hon^{ble} C. C. Ships. Malcolm, Recovery, Roxburgh Castle and

on the 2nd instant. The ships have not yet left,
but I hear they will in 2 day or two.

Mr. B. has our good enough to permit
to forward the small Box, which I mentioned in
my last, of seeds produced from Br. f? **sX * plants
to you, by the first opportunity.

The collection of dried specimens of plants
for the Museum at Chatham, requested by Dr
M. Andrew, has been dispatched.

Brooke and me are occupied in preparing
the dried specimens of plants from Cydonia as
well as those collected in the garden. I hope to
be able to send them by some of the remaining
chartered ships - there will be I think three ships.

William Jones has written to Mr. B. Mitchell
