

Wallich's Correspondence
1833-1846

Received the 23rd June
as yet no specimens of the
plants of the 23rd June 1870
Recd 18th June

Dear Sir,
I have the pleasure
to acknowledge the receipt
of your letter of the 9th Inst, and
now write as it might perhaps
be of some interest to you to know
that your plant-collector
arrived here some time ago -
I have sent him under charge
of some boys into the hills
on the Eastern side of the Kani-
nigra Valley with directions
to proceed as far as the Kani-
nigra territory extends on that side.
Our Assistant Smith said he
was on his trip in such a direction
as appears best suited for his
researches - You may rely
on

"2~C- ^saiU- / ~C* - <

my offering him every assistance
within my power but I fear my
deficiency in Scientific Botanical
Knowledge will render all I can
do but of little value. I am
myself much attached to Gardening
and have collected most of the
fruits and flowers natives
of Sumatra in my Garden,
your plant collector says he
recognizes them all as old ac-
quaintances at Bussa, Pongel
and in Bengal - I have also
introduced all our English
Kitchen Garden vegetables
which appear to me to thrive as
well if not better than I have
ever seen them do in any other
part of India.

I dare not fail to
reply to Mr Gooden's communi-
cation but fear my want
of Scientific Knowledge will

render all I can say correct and
satisfactory - believe me

Yours faithfully
J. P. Webb

A plant grows wild along
the face of the hills which enclose
the Municipality Hall on its
Western side to which I have
been several times and I have
give the same name as they
do the Tea plant - probably
it is the "Camellia" - I will
make your plant with
you a good specimen -

My dear Sir,

I have the pleasure to send
you a few specimens of Assam
Rice collected in our immediate
neighbourhood which I thought
you would like to see & compare
with the kinds of Bengal - perhaps
you will be so good as to sow
them that you may be able to
increase the quantity of produce
then grow below. It is now rather
late here for your sowing, but
next year if you encourage
me I shall give a larger collection
at an earlier period - I have
already written you for samples
of Bengal rice that the people
here may be able to judge of the
qualities of the produce of that
country and if any of the kinds you
send seem to them very preferable
to those of their present growths - I shall
endeavour to supply their wants
more largely with seed of the

with some 2 Bunde names in 2 letters - No
1st and the 2d Course parts

1881
Suits they prefer -

Extract Letter from Dr Wallcut
Superintendent of the Company
Kolanget Garden, Calcutta,
Date 25th November 1828 -

The Packet and seals
contain perfectly fresh & good
kinds of the most desirable
and superior Tea the Choysay
or Winstons (Tea) called by
Dr. Rossignol Puriss Seaborn.
The Tea is fully equal to the
Best of Lebanon in Malabar
and it exceeds it in the
quantity of the leaves which
is shabby dear. The
leaves were sent down from
you - Mountains
of Kumaon, and so healthy &
perfect are they that they which
I loved soon after this arrival
in this month commenced
sprouting up in the
leaf just into

I cannot pretend to
judge of the quality and purity
of any tea but I have
sent the
Committee to the ground
I*** immediately . . . / . . .
their destination -

measures to supply us with a little
greater variety of their fine fruit than we
can now boast of - I shall be very
pleas'd with the Young plant - I shall
at least from Missusibad - what
"mosses" is the indigenous vegetable.
I shall think much of this at the time. The
very favorable for cotton - the whole
of the day has a substitution of the best
day and its superstation is made of cotton
at least from the very day of the
cotton at least in - It was the respect
of with the best variety of soil & aspect
for which I have seen some parts of the
country should not be found to grow
at all cotton as the finest in the world,
or rather the cotton which is esteemed for
its quality - for the same reason is
already introduced in the ^{part} of the
the ^{same} machinery that I
was to some extent substituted for
the fingers - when mechanics make
machines suitable to our cotton
we no longer are compelled to grow
cottons to suit their miserable machines
we shall again have all the cotton hats
of the world - and if it is a fact, as I believe
that in all good qualities our cotton is superior
to American - except in length of staple - the
presence of the seed in the seed - I do
not know the perfectness of the
that we are not to be taken in by the
which - the best directions to our

?-<>C

^g

article how such a superior mechanism
could have been made. — How the
people of 1754 got hold of the
drawings of the coarse mechanism that
was then in use.

Proceedings of the Society of Artists — where
the secret was first discovered to be made in
France.

Many thanks for the trip
through Currie — when we got to
first made to Calcutta to have a
through your great machinery a feature
here that shall be worth seeing.

The scheme was very profitable here
to however a great drawback for it takes
a part of the surplus of the
deficiency of water can be remedied by
artificial means — but the quantity of water

of the river can be increased until the
valley be better than of — but
but I expect the back line of the
has shown the full of the both sides
to under the dissolved ways of the

to work largely — to his friends in the
not was tried — but nothing is to be
repaired of. —
I am yours
J. W. P. King

Have just received yours of the 14th
the best of the plants for Currie — he
shall look for the Currie for the

London 19 July
1834

and if you shall continue
ways to satisfy you.

I have got 10 specimens of
Picea prostrata from India
which will go by next day.
I hope you will hear of your
attempting some classifi-
cation of the varieties of Picea
in a botanical & Japanese
way - Johnson & Roxburgh
gives only two species - Sure
there must be more but attention
of names plays the devil
with the botanists - I should
have thought that the use being
owned or not owned would
alone have been a suff. distinction
to make a specific difference
but Roxburgh I do not understand.

And then the volume of the
books, are they all put under
by varied illustrations! -- the
names of persons that is an
illustration on the label
of these specimens with the
your special notice.

My dearest and your
new collector has been about
a week up the mountains
a voice of Barreny. and
fancy he has proceeded on
to the hot water holes. Had
him to go as far as the river
can be navigable. Report
from a messenger to day
tomorrow he said he would
not be back without the plants.

I want a separate parcel
of good seeds, vegetable Indigo
- some for Bishenath - and if
you let each be 6 Ru worth
- you will be pleased to give me
credit for July & August's pay
to the Collector - give me a few
of your garden seeds please
putting in each parcel. —

Enclose a note from
one of the gents - L. Briggs
from whom I must get some
tea plants - I regret much to
have lost my Coffee seed -
The gent^l at Ludiga for whom
I want some seed is C. A. Bruce Esq
who has written me 3 or 4 times
to get him some S. Sea Sugar

Some days after that I
will be with you
and about that

My dear

London June

30th July 1834

My dear Sir Paid 20 and

I have had the

pleasure of Mr. Rogers's letter

and am sorry to perceive

that a letter I wrote you some

time ago has apparently never

reached you - it was written

on entering the department from

Manchester of your former

collector - Immediately

after his return from Kuba

he was attacked with fever

and Ague and (is the case

generally with the Natives) became

so advanced and anxious to

return to England that I had

great difficulty in persuading

to someone else his attack
left him -

I have enquired for
a Native American, and
he tells me that he knows the
Papuan planter and that
it is ^{at} ^{the} ^{present} ^{time} ^{or} ^{perhaps} ^a ^{little} ^{later} -
I have sent him to look after
it and on his return shall
let you know his success,
and you may see when he
may bring - I shall ^{keep a} ~~also~~ ^{book}
out and send you some of the
seed when produced. I shall
also send you a few bags of
the seeds ^{of the blue die} ^{but} ^{of} ^{course} ^{that} ^{they}
are as large and complete as
possible. With respect to
the Low plant the American
tell

merit Hoporns and Seeds in
Sept and October. - you may
rely on my keeping in mind
your wishes regarding it and
sending you the names of plants,
flower, and seed as I can
procure them -

Pray do not hesitate
to command my Services
in any way that they may be
useful, it will afford me
pleasure to be of Service so far
as my limited Botanical knowledge
will admit - Should you
be of opinion that Annamora
is likely to afford a sufficient
number for the trouble and
expense of employing a plant
collector here for a short time,
you may depend on my giving

Hills North of Sagar

Sept 18th 1834

My Dear Wallace

Many thanks for your letter of the 2nd. I received it yesterday. In my march on the banks of your Compuce. I have formed a plan. I also received a few days after I had moved into the interior of the hills on my first start. When I wrote my special letter, I had not received yours, and the only guide which I had to the objects of the Committee in London was the copy of the Gov. order in an abstract of your Committee. I also specifying the country between the Ganges and Juma as ground for me to act on. Hence the stream in which my recent day writes. Your first letter was a great example to all my hopes - I was entering upon a tour in Khasia - as I imagined that by then I got through the business of your Committee I should have ample means of examining the Khasia and natural history of a large portion of the hill provinces. Your last letter gives me more help. I started on the 15th of last month, and proceeded towards the Ganges. I then made a circuit and examined almost all the Valley in the three anted ridges between the Ganges and Juma. I am now proceeding north to the central ridges - to examine the valley of Khasia and the intermediate country between that and Mungpore. I shall then return and survey the ground between the Juma and Lora. By the middle of ~~October~~

D^r Wallace 18th of October

I shall certainly be able to see as many localities
as you may wish. I have already seen some which
I deem highly favourable but I shall defer a report
on them till I have seen more of the
of the localities comprises about 30 or
cultivated land with an easy slope yielding such well
crops. with means of irrigation to the utmost extent
Its height about 5000 ft. above the level of the sea. The
only difficulty I imagine will be in making the settlement
about the ground with the proprietors a great portion of
the country between the Ganges and Jimna belongs to
the Gero-walla or Seeraj Raja - we only possess the outer
ridge - and track across the Ganges stretching up from
about Sirrupur to the Drow range. on the western
side of the Jimna, the largest portion of the country belongs
to the Seeraj Raja. From correspondence which I have
had on the subject with the Political Agent in the
Shaw, I imagine he would not forcibly take any ground
from a village - not conscious however authorities as
to is - and he could not give me any idea of the
times upon which a bargain could be made with
the Zemindars - provided they were welcomed to part
with their ground. If the arrangements are to be made
in this understanding it will be ruinous to the
Experiments. The Hill people will never part with the
ground which we want; they would give their mountain
or pasture ground but not an inch of land under
cultivation except at a centuple rate of valuation
and they would use every effort to ruin the Experiments
What increases the difficulty is that the greater portion
of the desirable ground is under native Rajas

//////

207

207

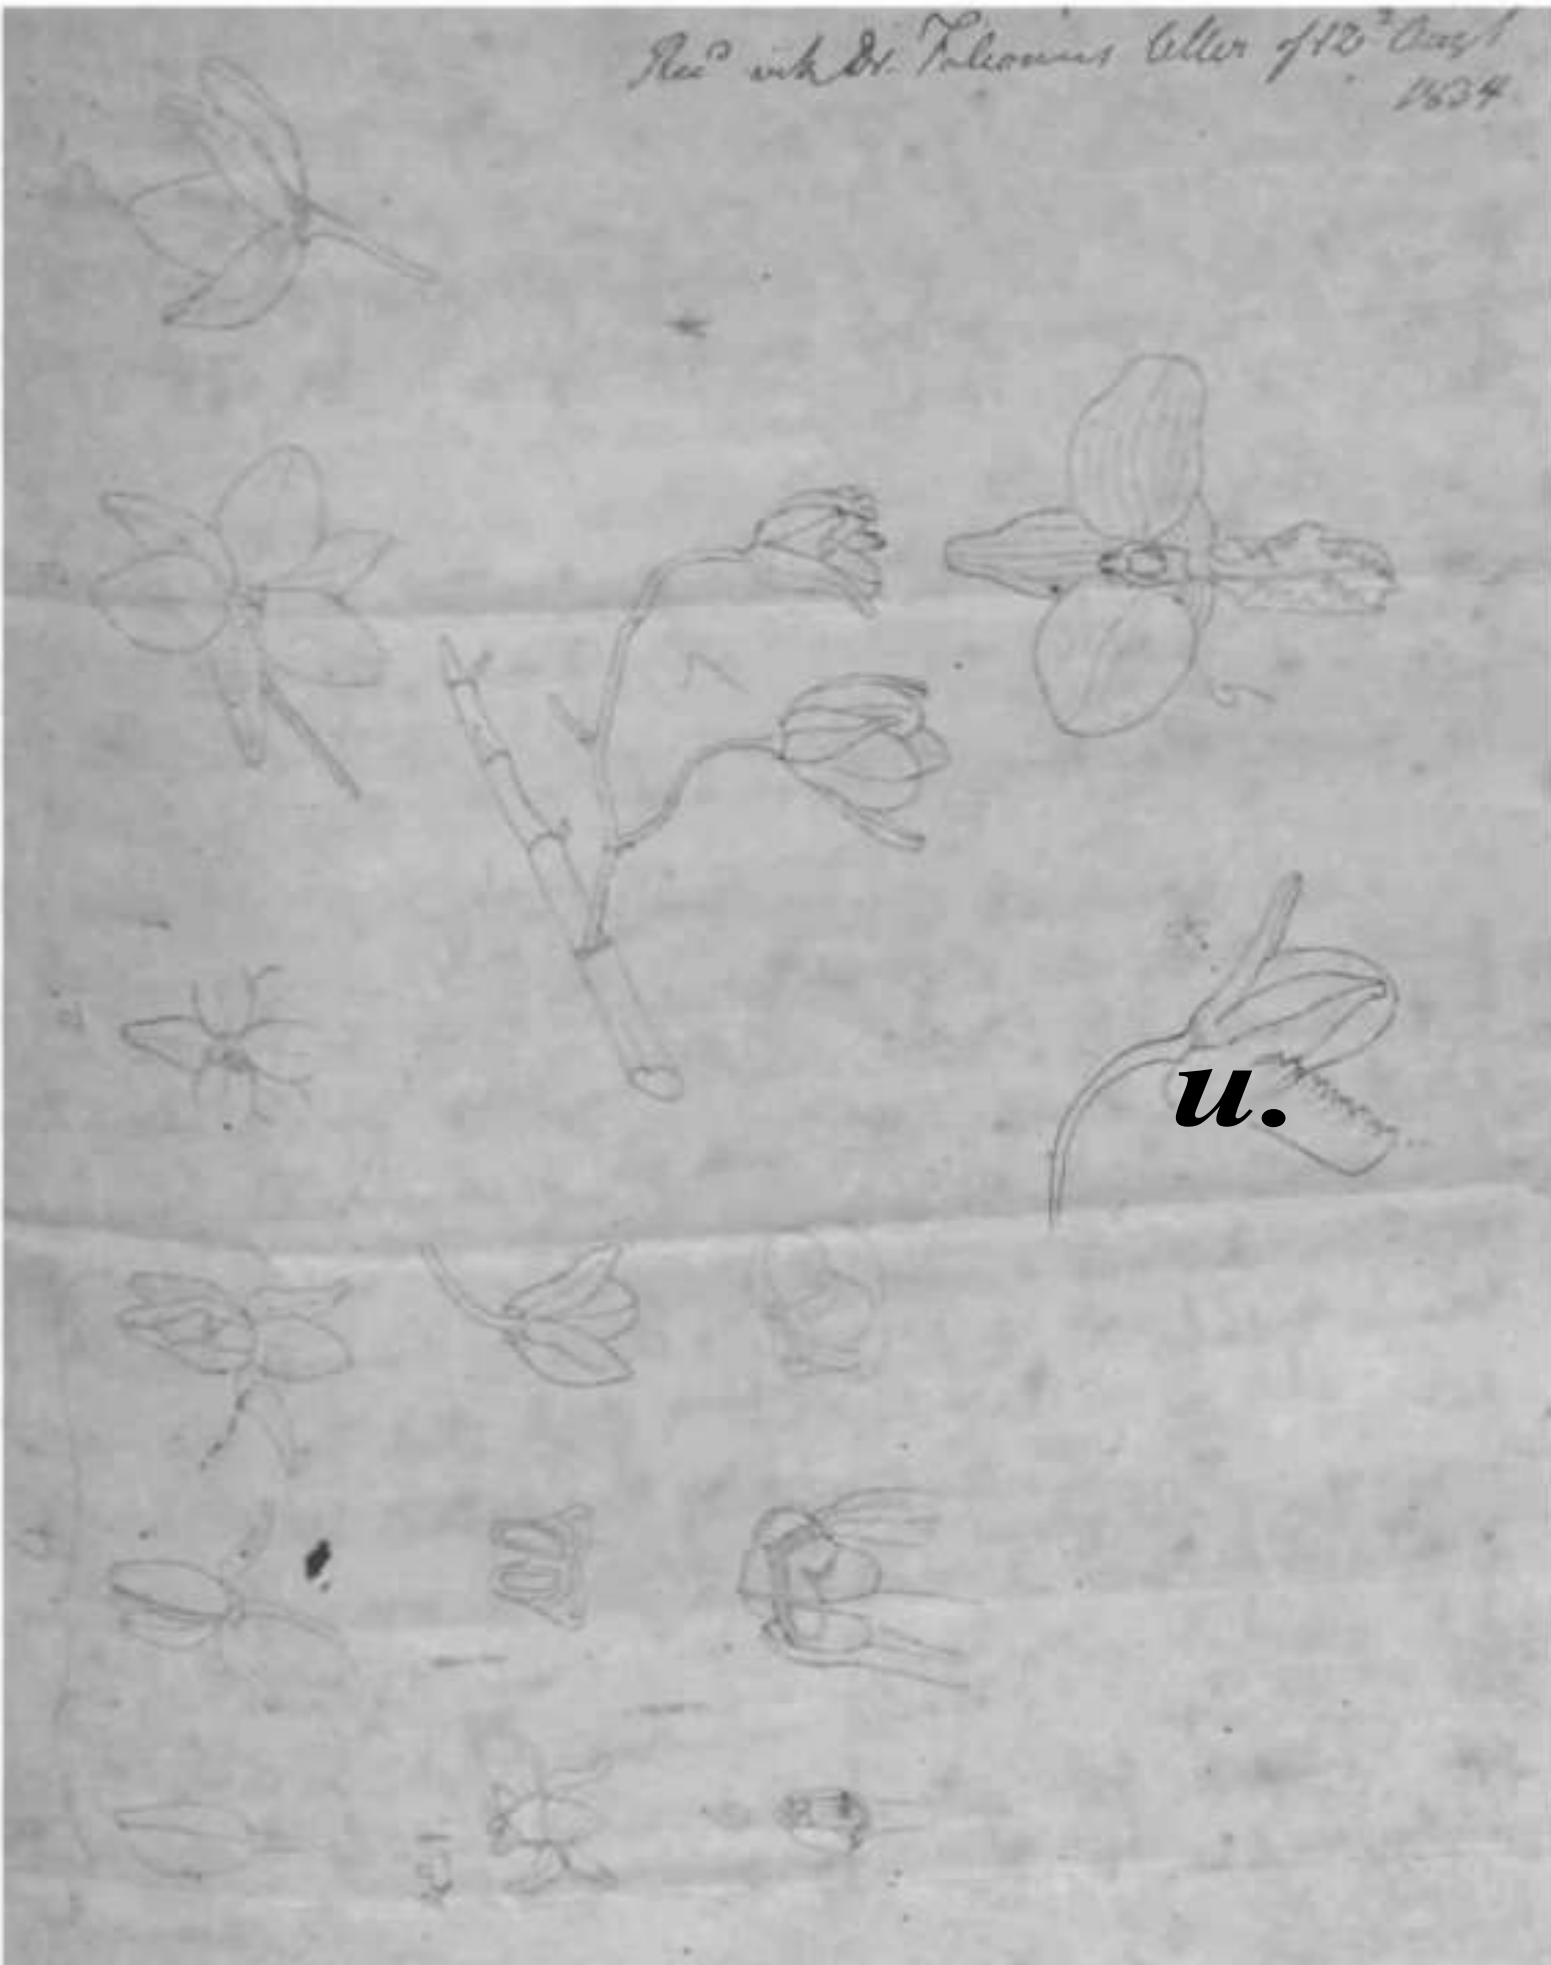

and not directly under our authority - our being only
a kind of superintendence in judicial & criminal
administration to protect the zemindars against tyranny
on the part of the Rajas. The only information I could get
from Col. Gunning was that when the ground was selected
he would "1" make the best bargain he could. J VM-JI
You would meet these difficulties in advance before the
arrivals of the plants in the country. The order
of the Govt will be required to take possession 7 £!
land as may be desirable at a fair valuation. It will
be absolutely necessary to leave it to the choice of the
zemindars whether they will part with their land or not.
If you could get the Govt to order the political agents
here to make arrangements for taking possession of the
ground required, whether the zemindars were inclined to
part with it or not - giving them an exchange of land
at an equitable valuation in being - it would be a
great point. Another point which I would like your
Committee to consider is the way in which the plants
are to be planted - and the extent of each the quantity
of good ground about a village nearly equal to 20 or 30
acres; where a larger extent of level ground occurs it
is partitioned into many 20 & 40 more villages. The rest of
the property consists of a tract of 50000 acres for
pasture of large herds of buffaloes and cows and
ground under Paspalum, Eleusine, Amaranthus - and other
Cereal grains. If only a portion of this cultivated ground
were taken, we should have everlasting difficulties to
contend with. The Hill people would look upon the
ground to be taken as a robbery - they would throw obstructions
in every way - and do all the mischief they could

28

with the hope that by blasting the Experiments, the
ground occupied would again revert to them. The
working Establishment would be cut off from supplies.
- You know there ^{<u>} no basis in the bills every man
keeping his own ground - and if hill people were required
for the work of the plantation, they would not engage
if forced - their only object would be to do mischief. It is
all vain to talk of reasoning with them on the advantage
that would accrue to the country by the success of the Experi-
ment. It is only actual and accomplished success that would
speak home to them. I would recommend the entire
occupation of small tracts for the Experiments. We
should then have the project entirely to ourselves and not
one to interfere with us. The plantations might be conducted
like a West India sugar estate, part of the ground laid
out with the tea plants - and the rest put under cultivation
to supply the wants of the Establishment, all the produce
could be carried to defray the expenditures of the Establish-
ment. My own conviction would be the most economical
plant - and the only one that would give a fair chance
to the Experiments. Much might be done in cultivating
at the same time, other useful products. The plantation
and even a ground might be laid out with *Myrica* (or
near to Ebenbeck's *Sporobolus*) *Cinnamomum* *balabon*
which yields the *teij* or *Capira* bark and the *teij* path.
As you first clear the Estate and number
of the tea plantation to my description but as I am
quite ignorant of the intentions of your Committee on
the above points, I should not know how to act. Are
any Chinese colonists to be introduced to conduct
the Experiments? This should be a main point
to ensure success.

Rec^d with Dr. Falconer's letter of 12th Aug 1834

The state people will never do, to trust the plantations
to the working Establishment must be got from the
Plains at the first instance. The only fear I have
about the success of the experiments is that the Govt
will not put them on a sufficiently liberal scale at
the outset. It appears to have been a mistaken economy
of this sort that made the attempts in Brazil abortive
in the first instance. I consider the entire occupation of
a village as a fine quarry & also a good establishment
as indispensable for people from the plains. I wish you
would inform me of the intentions of your Committee
on these points, to enable me to make the necessary
arrangements in the selection of ground. By a letter from
you, I am informed that when he was last in the
West Indies, there was a very fine sample of tea given him
by the Portuguese Governor, partly of
the best in the Empire of Russia.

4 fef0faA* -

4^4tfh^^«AJsi*fc f^4^

European overseers
point of allowed.
I have a word about myself. If it suited
the objects of your Committee, after visiting the localities
between the head of the Juma and Ganges, I might
proceed as originally intended by your Committee to
examine the tract between the Gora and Ganges,
without interfering with Mr. Brails operations. I could
give your Committee information about the capabilities
for tea culture in that portion of the hill provinces
as compared with the country between the Juma
and Ganges; and in which it would be most

Dr. Brails

eligible to make the attempts on a large scale.
Information of this sort ought to be of use to your
Company with reference to future operations.
I shall be on the ground to make ready, at a short
warning for the reception of the plants destined for the
Hills when I see you. I am sure you say you
first letter about the best place in which the
plants were sown in the country, I am of opinion
that the plants in the ground
a plantation on the southern
side of the hills, below the level of winter snow - and
then because the healthiest of them, in the following
Autumn of April to their ultimate destinations.
I hope in your next letter you will kindly favour
me with some hints, about special Botanical objects
on the hills. Any thing I can do for you in the way
of seeds or plants, shall be done. I am collecting seeds
of every thing, from ferns, grasses & Cyperaceae upwards.
I shall send you them all. Are there any plants
you would particularly specify which I could send by
the return conveyance which brings the sea plants.
I could collect them in a depot at Newburgh if
you got most of the hills or slides. I should not know
without your telling me - what to send.

1
it
I see you are a little sceptical about my
Fragrans plants, but the structure is undoubted - and in
my opinion. The first specimens I got were last year,
but they were so few in number, that I could
not satisfy myself about all the points of structure I
wanted to examine, and I deferred to another year, making

the matter known, till I should have fresh plants to examine.
You notice the controversy going on between Brongniart on the one
side, and Lindley and von Martens on the other - about the
normal situation of the abortive anthers. Brongniart insisting
from the structure of your apocarpia, ^{and three calyces}
Hormones, and monstrous stamens, that the ~~external~~
anther is opposite the anterior of the outer or calycine lacinae,
the two supplementary ones are opposite the two inner lateral
or corolline lacinae; the perfect and the abortive anthers
being in different whorls - two of the outer sexes being supported
and one of the inner; while Lindley and Martens uphold
that the three anthers are in the same whorl, and opposite
the outer or calycine lacinae. I thought my plants admirably
adapted for settling this point. My external examination
satisfied that in my plants, the supplementary anthers were
opposite the calycine lacinae and bore out Lindley's idea. But
trusting my conclusions when opposed by such an observer as
Lindley, I tried transverse sections of the column so as to trace
the structure of the filaments down to their origin and thereby fix
their relative situation, but after destroying a number of
specimens I had the mortification of being unsatisfied from the
wanting either from a bad microscope or a want of knack
at microscopic observation or perhaps both. The existence of
three stigmas has I believe never been suspected in the
Orchidaceae; but I have a strong suspicion, that in my plants
at least, there are three, with as many concrete styles.
There are certainly three alternate stigmatic facets, inclined
at angles to each other - and I expected to detect three stigmatic
papillae leading to the ovary - but I could not satisfy myself
on this point either, and as it would not be creditable
to give empty or valueless information on so interesting
a structure, I determined to lay by till another year
before

Jte « J! • fc, • ^

when fresh plants would enable me to work out all
the details I wanted. But I have been this winter, a
scurvial I sent to the hills, for the express purpose of
waiting till the plants came in flower, allowed them to
settle into fruit - and some plants I had in the garden
at Dublin - but did not come into flower. When in
you visited for one specimen in fruit - but on going to the
ground myself I found them all out of flower, I must now
defer to another year. I shall not be astonished to find
them *Dequinata* - and a scalled specimen. I send you an
attempt by James Cope at showing the position of the parts
- unfortunately I have no time for drawing myself. It was
made last year from preparations I saw in spirits, and
as it was done by Cope without having understood what
he had to do, you may believe the drawing although much
to be honest. Here are two species, one with the usual
structure of *Dendrobium*; the other lateral sepals
with the prolonged column and base of the labellum, so as to
be lateral a spur; in the other the labellum undulating
in form from the inner lateral lacinae: so as to form
a double, somewhat whorled perianth; the lacinae of each
which being equal and regular: but the outer ones depend
from the inner. The plant resembles the other so perfectly
in every other point of structure, that I am satisfied it
would be an outrage of all natural affinities to create
consider them as species of the same genus: the only defect
in the labellum of the one is in a shape of
it - in the other regular: they are both
Dendrobium. I am afraid I have tired your
patience a little further by an another structure which
I have met with in the *Ochidia*, and which I imagine
J. Wallis

fitV^VOL^t.

.U^jLJt-
V J . . .

V** f s * K. < ^ t. . ^ * A w 1 t r g

It is not being noticed as you
we can enclosed I thought some
been in spirit, and may reach
you in tolerable order. It is a plant with a monophyllous
perianth cylindrical perianth, the Calycine and corolline
lacinae being in one whole and coherent into a tube except
at their apex where the margins of the sepals ciliate on
two of the petals: the labellum is more distinct. This beyond
of a more remarkable structure than the above, and
law
Broun

"-.L.^-L*n*Ju.«4» *#-i.)'(r~

It
closely connecting link between Musaceae and Orchidaceae. It
belongs to Lindley's division of Gasterodieae, the stigma being
basal as in Gasterodieae; but the pollen sacs not exactly
compartments. It is more powdery than wasy. I have called the
plant "Gasterodieae" which name it may go by, unless
you have seen and named it before. It has particularly
interested me, as an Indian representative of the section
"Gasterodieae" which was required to complete our flora; we
now having genera in all the sections. The plant is large
up to 5 ft high: the bulbs are tuberous - and remarkable
in structure being cavernous and cellular, not solid
like all the others I have seen. I send you fresh ~~plants~~
I hope they may thrive. I found it in my present
the first two places above 7000 ft in height. No leaves.
The plants fraxiniform with greatly the habit of an
orchid. If you consider it new I shall send you a
full description, and defer the other plants, till I have
completed my examination. I have met with several
specimens of one of the Scitamineae, Rafflesia Rorcoa alpina
Dr. Wallich

unusual; the normal either being converted into
a petaloid leaf, exactly resembling the natural, abortive state,
and beautifully illustrating the received opinion of the structure
of the flower in the family.

I have extended the letter beyond all reasonable
bounds, and I have not time to expect that you should
read it through after my first line in correspondence. I am
very sorry at the serious account you give of Miss
Waller's late illness. I can easily conceive what your state
of mind was - from what I have experienced myself - a year standing in
intermittent and tedious fever, a year standing in
troublesome and painful last illness, and last night, I was in
in a state of miserable despondence, and has only been
kept alive by the skill of the doctor. For months upon end I have
been without an comfortable night's rest knowing what the
morning would bring forth. I hope Miss Waller's was out of all
risk of recurrence of fever. I had made up of my regards to
since Stewart. I had an attack of fever on my first trip
and for some days near Africa that my work in the hills
was to be arrested, but I held out on my march and got
back. I caught it in the low valley running into the shore
Do not let this reach my brother Esau - as he was in great
alarm about my being out in the rains - and last year
I had few attacks of that fever from being out in the storm
- fogs in the rains. I am now tolerably strong again.
It has been exceptant since I started first. I have
been for some time in the hills. You have seen what
a Mountain range is in the hills. I am now upon a
mountain called Acheron which is only 700 ft high.

my tents outside and in one map of mountain ranges
and I have had to change my tent ropes ~~for~~ on account
of ~~disturbance~~ twice within six months.

I have written Shackleton to lend me 6 pieces
of the Company's map of the Hills. As I want them on the
work of your Committee, perhaps you would kindly frank
them by Saks.

I hope you will give me any hints, as your
Company will supply - about general or special objects
for ~~the~~ in the Hills. It will be a most special
privilege as I may never have it in my power to be out
again. With my best regards to Mrs. Wallich & husband,
high as I am correspondent, believe me I am most
grateful of the kindness I am indebted to you for, and
remain

Yours sincerely
H. Galester

Dykes - Doctor In my last of the 14th ultimo, I mentioned
 that the Indians might possibly return to be hunted from this
 & that we had seen Lt. Col. Anderson to send a box of plants, boxes
 via by her. - Shortly after a ship arrived from England, by Lt. Col.
 Captain Webster which intelligence both of his wife & one of
 his two children. I heard that his first impulse after the
 when he received his presence hereafter, and having nearly gone
 up at the reputation of the Indians appearing to England. -
 I then made a pedestrian excursion into the interior, with some
 of my baggage, and returned some few days since after a weeks
 absence, when I was surprised to see in the papers a notification
 that Mr. [Name] for India by the Indians, is to be opened this day. -
 I sought the Captain who told me he intended to proceed to
 Bombay, and thence probably to Rangoon, and that Lt. Col. he not
 yet had freight them for England, he believed he is prepared to Col-
 -lect - the permission to take charge of anything I might have
 forgoing, and Lt. Col. to not ~~promise~~ himself up to the latter, that he
 to forward them from the Islands by some other vessel. -
 As any thing like a direct opportunity from this is to be considered
 & improbable - though more than one instance of it determined
 to send myself of the present time, though I might have some
 business as to the care & attention of Lt. Col. Webster was
 better upon last matters. - I have been here myself to show
 a time that has later the knowledge in other respects that require
 properly to be left to you to do, I am so far out of the way and
 means of accomplishment with the plants offered to Lt. Col. [Name]
 have been able to have prepared any thing in the last time you
 have obliged them to have recourse to the Division of the garden
 gardens, and less than ^{^ ^ ^ - * ^ ^ ^ ^} the obliging
 and clarity **ZJT~#*~*i**r*?~??** he has
 under his assistance - he has a number of men under him
 of whom his liberations of paper facilities for obtaining what he might
 become what any private individual could command. - He
 has a blank book made, not quite so neat certainly as your
 carpenter's make, but I shall derive success in the purpose of it
 from up them at Hackington for plants. - He also had brought in
 from the same place, three Ferns, *Cyrtium Billardiera*, the
 Baron Bugeot calls them, with I expected a tree to send you &
 one of them he has had secured in a partial frame, or skeleton
 - he says that they have been sent to England in this way in perfect
 preservation & that two of them he has the passage of the
 otherwise there - He also would be glad to be made for but that
 has put home he tells me, in the last **/JLJUL.** I hope, but he says
 it is very difficult to find them here, that means that though others
 they will begin to flourish, that if they succeed, they may be useful
 to themselves

taken up when the flowers die - seeds also he has mixed with the
Earth, - and has given me besides a box of 78 different varieties. -
It was no doubtful whether it w^d be prepared in time that I have
been obliged to delay writing till the last moment, as Mr. David
was quite indulgent for a hurried communication. - You will
be glad that yesterday put on board the box of plants & three jars that
- in excellent & robust health, having covered the leaves from their roots
- as I before said, is in a shell like case. - The other two are said of seed
- further was not found to make the breathing for them, but the latter
- has promised at my request to let them be between sheets, undisturbed,
- subject to no pressure. - You will please to have also spoken to the
- chief mate) so that I should not think it better with each you in your
- preservation. - I do not know if you can persuade them to send in
- your letters, but I hope you will think it best to have some good
- attention as possible, and take the seed. - I enclose Mr. D's account
- of the plants & seeds. - As to the latter I intend to put the box on board
- with this letter. - He says "you are from 2000 to 3000 feet above the
- level of the sea" - as he only gives the height above the sea of each
- of the varieties, I can say nothing particular of these, but of the few
- which he gives the most information of the designations, I know
- that several grow at very low elevations, in the vicinity of his place
- I pointed out to him that he had omitted to send any seeds of *Chaetochloa*
- & *Chenopodium* in his former box & they have not been sent in this
- but he has either forgotten it, or does not know what species
- there is not in his list. - any of the seeds (I think) that they bring
- have endeavored to supply this omission, as relates to the *Chaetochloa*
- having put some of its seeds, into another box. - I have been very
- the same opportunity - They are perhaps those of *B. dentata* or *B. spicata*
- of *Chaetochloa* but you will be satisfied to know that, - it is very rare and
- in the South about here, & the only species, any plant I ever saw has yet
- permitted me to describe - It does not have reach a large size, being
- seldom more than arborescent - though you appear in your names & the
- speak of it as a large tree - you will be imply the same of *Chaetochloa*
- rather authorities speak of it as being a small shrub or tree. - I have
- I have seen the tree which is by its fruit & how the only species which I
- fancy I have described here, is a small shrub with a pinnately
- leaf, as unlike the only *Chaetochloa* I know, is light to dark, but
- in every respect to the description & drawing given by *Chaetochloa* - I send you
- a few more seeds in my last letter, but I have not in this respect
- These are not in my doubt to be able to meet with any more. - I have
- say I often pass ignorantly by many species of these two
- genera, & I must have been able to justify the justice of the repetition of
- wishes - I have in this little hope of my dark days being enlighten'd
- for the great part of the day is spent in knowing about the language
- at present at least, I have not thought - Thus I have little opportunity
- laboring to acquire more information from books - and I know for one
- I can doubt it - Mr. Davidson is certainly no botanist who is not
- than a ordinary gentleman - he may be for aught I know as I have
- ignorant of the science in practice, but perhaps very little of the

6^* 4t xe^:

would be in a man of education. He appears however a worthy
well bred man & certainly has been most kind & obliging. I would
I had not misapprehended in his power to further of wishes - I wish
I were of the P. mention anything, within the range of the Indian trade,
that he wd. like to pull off, as I feel sure that if an opportunity offered
you ^{to him} ~~of proposing~~, you wd. be glad for his
contributions. - He said he wd. not ~~concern himself~~ ^{but that he wd.} be obliged for
anything you might think proper to lend him, save or curious, &
with you might think he c^d. successfully wear. - The Remedy
is a fact mentioned in the first part of the ~~circumstances~~ ^{circumstances}
I place some 50 and odd Miles distant, & considerably elevated above
the. - In going thither, we followed for a considerable distance the
banks of the River & returned by another route. - ~~It was~~ much
pleas'd with the trip, and the Country, - The scenery along the River
is in many places beautiful, and here the hills wd. rise and be sides
clearly of wood, no Country that I have seen c^d. surpass it in
attention. - It had snow capped Mountains constantly in view,
Some after noon had before a heavy snow storm, with complete
conceal'd the ground in an hour - do you not deny me? - The Snow
however never seems to have been in the plains, - These Mountains
almost as soon as it ceases to fall. - By way of a short time, we were
lost our way & after wandering about, feeling bright, & driving into
dells, for the greater part of the day found but little about John Miller
from the place we had left in the morning, - again we were led to
among the best bred tracks, and had before us the last of whose
early he pointed me of the way of my feet, or we can find the right path.
- When we left this we had the intention of going so far but the
impetus was given, we went on as long as we could but had to
leave the horses to be sent any means of carrying on for some time
though I intended to sit a few days into town but mine had of one of the
hills at which we got up. - These birds I had put in a bottle & I have
you added a hole of them on the back of one of your David some lists -
I'd wish of them before can before & they were not in place, I cannot tell
whether they are better useful or not - send you some of
the birds I pick up - you can try what you think proper to throw away
the rest - mine may be truly called a blind trail - I sincerely trust to
gratify you with the possession of all that is rare or curious here -
but this is one I know not ~~total~~ ^{total} so curious - I would therefore send all
indiscriminately, hoping that with a quantity of fresh perhaps something
really interesting may reach you. - This bird too, is enclosed in
another & the specimen of the ~~specimens~~ ^{specimens} of petrified wood
& the rest as unpropitious unless to me. - The former are fragments
of the petrified tree found on the estate of Mr. Barker of this Island - The
stone is of the quality suspected during my late travels - The
stone is in a vertical position, situated on the edge of a hill some
at that point in almost perpendicular to each other - it is of a
stone belonging to the early bed of a heavy fossil with joints that
I have seen thousands of these. - It was first discovered by
some of the Indians that they had seen the same in the hills
above the surface - The proprietors of the estate subsequently caused the
surrounding land to be cleared down, with the expectation of

&-n

Si-

I have much pleasure
in forwarding you the enclosed small
specimens of indigenous seeds, collected at
Mauguare, and the neighbouring
mountains, by a my intelligent
man.

Yours
prior servant,
Bryott.

Captain Mauguare,
Mauguare Street.

... S.

It is I think made an alteration in the packing department - from
- becoming in Mr. Davidson's Box of Seeds, I placed it up with the
papers containing the few varieties that I myself cultivated in the garden
I put it in a large Box with canvas besides, the petioles & stems
I have made it tightly crumpling in a few pieces of paper
my land lady calls the back of a New Zealand Kite, with, though the thing
about her of it for not particularly clean, I thought it might be better
you had leaves with it as you do to keep every thing in its place. The
old lady has had several pieces of considerable length & breadth, &
says she of her last year brought the whole piece ^{see page} that they
were remnants of his ^{see page} - proper - the red board of with the sides
of Mr. Davidson's ^{see page} is that of the the out.

s & ^ - t ^ J.

These three boxes contain the Indian, for you - a Box of plants - a Box
containing that of Mr. Davidson's and the petioles & stems, and three
from stems - The last is a stem I have just put on hands - and I hope
these will both reach you safely in your garden - The Captain, who
has in his distance behaved very like a civilized being - he has refused
to take any thing in the way of freight for these things, with which you
are sensible of some weight, although he might inquire, and he has re-
solved to make every thing of them - I begin to be very tired of his town -
but the weather is yet scarcely settled enough to make it of travelling,
with pleasure I am in a - it prevents the temperature is hot
we have cold parts morning, and in the middle of the day I have
a general warmth, - this is beginning my to blossom, & those of England
begin to bud - this I can come to improve in health, under such a
favorable state of things, my late prediction soon as I think a
tolerable proof, for she daily steps away, & by the sea, I think
I often have a desultory pain in the side, but it never lasts long,
I can feel nothing. I think however I shall come of this day, I
will come out, I think however, to satisfy myself that all is
right - in the course of another month or two I shall be
the Island to be in a - I have a letter from the magistrate of the
district, who wrote very kindly some in my arrival, & expressing
a wish to see me - I promised also to go up to the Court, in that part of the
the sentence of a few papers, in the Court, in that part of the
Island, to secure any thing that may appear interesting - he is a great
for Mr. Bence, I think should have been in one of my former
letters - I cannot exactly say when I may read him an opportunity
of sending you any thing - One of my plans, a great part of my thoughts
of leaving the job here, on about a month or two, & it is not
improbable that he may be obliged to proceed via Calcutta, of which
I shall take advantage to the extent of my power this winter season.

9fy

My Dear Wallis

Is there any objection to giving Copies of these papers. Mr. Palmer has my letter, as Secretary, intimating at the time, all these steps.

Very truly

Signed C. K. Robison

15. July 1834

C. K. Robison Esq^r

My Dear Sir,

We are instructed by Mr. Elliot Macraughton the Liegeut^{nt} of the Colate and affects of John Palmer Esq^r to request that you will be kind enough to furnish him with Copies of Mr. Palmer's offer to let the Allipore Garden in perpetuity to the Society of
which

which you are Secretary of the reference
of that offer to Government and the
permission of Government to take the
Garden on the terms proposed.

Yours very truly
Richard Hoag & Sanders

15. July 1834.

Botanic Garden 15 July
1834 at 5 1/2 P.M.

My Dear Robinson

e&

I am so profoundly ignorant
in matters of law that I dare not venture
to give you an opinion on the subject
of your note this moment received. I should
say however, if you have any doubt
as to the propriety or otherwise of furnishing
the Copies, it would be proper to take
legal advice on the note from Messrs
Hoag & Sanders which forbids no good.

Yours truly

tf^Cf-jflst&jJ

Coleridge

Calcutta 16. July 1836.

To

D^r Nath Wallick

V. P. Agr. & Hort. Society

Sir

I have received information from Messrs. Hogg & Saunders, attorneys at Law that they have been instructed by the Assignee to the Estate of Mr. John Palmer to take steps against the Agricultural and Horticultural Society to enforce the continuance of the lease by the Society, of Mr. Palmer's garden at Allipore, and I foresee so disagreeable work to myself, as secretary, during this dispute, that I beg to tender my resignation of the Office of Secretary from this date.

When Sir Edward Ryan was elected President in 1829 in place of Mr. Seycester, it was done on the broad principle that a yearly change, at all events election, of the Office bearers of the Society was essential to its prosperity, but the principle

has

has been no sooner adopted than again
abandoned, and both Sir Edward Poynton
myself have remained office bearers ever
since. - To myself the principle has always
appeared a good one, and accordingly here
for four years past tendered my resigna-
-tion, but the Society not finding any
member willing to undertake the duties
I have been induced to continue Secretary.

I beg you will take the neces-
-sary steps for filling my place before
the next meeting of the Society. -

I am &c

Yours
Wm. C. Robison

16. July 1834

To

C. H. Robison Esq.

Secy. Agri. & Hort. Society

Sir

I have this moment been
honoured with your letter of today's date
tendering your resignation as Secretary to
the Agri. & Hort. Society of Calcutta. -
You are aware, of course, that
all

all I can do is to lay your letter before the
next meeting of the Society, which I request
you will have the goodness to convene at
the usual period.

Botanic Garden

16. July 1836 - 20th M.

Yours truly

Richard A. Wallich

My Dear Wallich

My object in so sudden a resignation
was to enable ~~some~~ ~~person~~ ~~to~~ ~~carry~~ ~~on~~ ~~the~~ ~~correspondence~~ ~~about~~
the garden, either with Palmer's apigeon,
or Government and which I cannot be
expected to do in the way most consistent to
late resolutions of the Society. If the meeting
be delayed till the usual period, I do not
see how this can be efficiently done. -

You will observe that the
Society is required to resolve immediately
on the ground they are to take up with
Mr. Palmer's apigeon, and from a note from
Mr. Secretary Macassar to Sir St. Colquhoun,
Government seems ~~to~~ ~~be~~ ~~in~~ ~~the~~ ~~process~~ ~~of~~ ~~forming~~ ~~a~~ ~~scruple~~
if

if they were to allow us 1000 for seeds, while
they are at the same time liable for the rent.
Why cannot you call an early meeting, on the
ground of my resignation, and other business.
I can prepare all the circulars for your signa-
ture, and afterwards distribute them. I shall
also attend the meeting and afford every
information in my power.

I intended to have accompanied
my official letter with a private note, some-
thing to this purpose, but the private part
was left behind, by mistake.

Yours
Wm. C. Robinson

D. Wallis

Bot-Gardens

Wm. C. Robinson

Wm. C. Robinson

17. July 1836.

My Dear Robinson

I was favored this afternoon
with your note of today and can do nothing
further than refer you to my reply to your
note of yesterday. At the same time I ought
to observe that I see no objection to your
examining

summoning an Extraordinary meeting of the Society
in the usual form as their Secretary. sickness in
my family has prevented me from sooner ac-
knowledging your note, which reached me
at four. My Nephew will take this to town
with him to night.

Yours &c
Philip N. Wallcut

My Dear Sir

I think I have taken the proper
course with regard to my resignation, in the
particular circumstances under which it has
taken place, and I beg to apprise you that
it is not my intention to summon any future
meeting of the Society.

I have found myself obliged
to intimate my resignation to Messrs. Huggt &
Lander attorneys for Mr. Palmer's assignees;
and I could not after that act as Secretary.
Yours &c
Philip N. Wallcut

P.S. I was very sorry to hear of your daughter's

t>E<sfj<-»4L4, ci»*^ 4?, he is an e^*^f&~+~r*~t.^Z'

f

of mine, and I sincerely hope she will
soon be well again. my youngest boy, the
last in sick list here is now recovering
again. C. H. R.

To
C. H. Robson Esq.

Dear Sir

As it appears necessary that
an Extraordinary meeting of the Agricul-
tural Society should be speedily convened
we request you will have the goodness to send
the subjoined advertisement to the daily
papers usually ****.y\$-<5y>&sf^ ^ y ^ V " * <_ 4 ^ " *
by the Society. We likewise request you
will be so kind as to order the Writer to
make out similar notifications for e ^ d
-tion among the Town members and send
them for our signature.

held in the Town Hall on Wednesday the
30th of this month, at 5 o'clock in the
afternoon, at which the attendance of
members is earnestly requested.

Calcutta }
23rd July 1834 }

Signed Bha Kant Deb
J. / N. Wallis
Vice Presidents

My Dear Wallis

Mr. Jurie kept all the papers
of the Society very carefully, and his good
memory enabled us to have production of
any document so soon as it was wanted.
Sir C. Ryan took a great dislike to the
Act, and he left us in October last.
He was succeeded by a smart native
Halloobur Law, to whom Mr. Jurie carefully
handed over, and explained all the
records and papers. - Within a few weeks

Sir E. Ryan took Hullother Law for his
private amanuensis and Hullother handed
over the ^{d>/?Je*. 4~.} present man, ^~<&\,
no hand in selecting - since he came there
never been able to get any thing done
that I did not execute with my own hands,
and therefore the records have fallen a little
into arrear; that is from the beginning of
this discussion about the Garden - that
we heard of it, the discussion and I could not
fly myself to more labour than was suffici-
ently to transact the ^{r M-ff *~/? /tu>^i} business of the
Society.

I think it probable that we
mistook each other yesterday, you meaning
by 'the papers of the Society', perfectly different
things from what were in my mind; - I allud
simply to my own drafts of our late proceedings
and a few late letters to the address of the
Secretary, which were not quite fit to be put
into the hands of so incompetent a Clerk as
we now have and transcribed into the Books -
all

All the papers of the Society are either
in the Admiralty, or with the Committee on
papers, or with the two other Committees
named by J & Ryan a year ago, and
who have never yet reported to the Society.

The magistrates are now in
the criminal business, such as Mr. P. and
and as both Mr. B. and Mr. C. are absent from office, I have more to do
than have strength for in this weather, and
I made a great exertion in attending the
meeting yesterday.

Will you kindly explain
wherein you think I erred in my last
letter to Government when communicating
your statement to the last meeting on 10. 18. 1794
I have not yet understood your objections
to it, and would
not be expected to convey your wishes to
Government. I thought at the meeting
that your statement might contain the very
sentiments you wished to express, and I thought
the best way was to send an extract of our proceedings to the

J²..

Government.

Very truly
Yours
H. K. Polison

35th July 1834

My Dear Wallis

Since I wrote you this morn-
-ing I have had a conversation with Mr.
Turce, and from his explanation about a
number of the papers, the best way as it
appears to me, will be for yourself to see
me, Mr. Turce, & Mr. Clapham in a
Room in the Court Hall any day soon,
after 1/2 of afternoon when you will
be where every kind of document is
kept. - Mean time, I shall have the proceedings
brought up in the book as fast as I can.

We ought again to have some
person like Mr. Turce for an Clerk,
the fatigue to the Secy will be very great.

Sincerely
Yours
H. K. Polison

Wm. Wallcut

1. Hastings Place

My Dear Wallcut

I understand from Mr. Sew that you
had been, from the time of the late storm, in a very
bad state of health, and unable for work of any
kind; I therefore delayed the proposed meeting — till
I should hear you were again going abroad —
I shall now arrange for a meeting upon premises
but I cannot see why, after you publicly volunteered
to act as Secy you should put an obstacle in
the way of the performance of the duties. What share to bring
up in our proceedings has nothing to do with the
current business of the Society, especially the pay-
ment of salaries and distribution of seeds, and if you
still refuse, you must give whatever reasons you
choose, but I beg that my name may not be
included.

Very truly

Wm. Wallcut

W. A. Wilson

My Dear Wallis

I have found the Proceedings of the Garden Committee which I wrote for yesterday, and am sorry to have troubled you.

Mr. Haysden is now employed in committing to paper the report of the Committee which met at his house (and of which

D. Wallis
yours
W. A. Wilson

which we two are also Members) and which he
submitted to the Society on 4th June: and so soon
as I receive it from him, I shall complete our
Proceedings and send you every scrap in my
hands.

Very truly

Yours
Wm. Pitt Rivers

20th Augt / 34.

My Dear Wallis

The writer is now copying into the
Book the last days proceedings which were in
array, and I shall be able to send you the
Book and all letters and papers tomorrow. -
after that I shall meet you at the Town Hall
any day you like to name for the purpose
of giving you every further information in
my power.

One important matter I may men-
tion now. - ^{See} ~~two~~ years ago, I gave to Wallis
£1200 to be remitted to America for
Cotton and Tobacco seed, none has come,

D. Wallis
y. y. y.

nor have I am able to get any satisfactory
account of the Matter from these Gentlemen
altho' I have applied frequently - The Matter
should be noticed at our first Meeting - I
intended to have done so at an early period
and may do so still, if you approve of my
doing it, & ask you -

Very truly

2. Sept. 1836

7 AM

My Dear Robison

This instant your note reached
me on my arriving in town.

Kindly give me a days previous
notice of the time you fix for our Meeting at
the town Hall, and I shall be happy to
attend and to receive charge.

I put this morning up to the Dees
(I mean the Clerk to the Agricultural

C. K. Robison Esq.

J. J. J.

Society

Society) to tell him to come down to me tomorrow with Circulars for a Meeting of the Society next week.

When we meet at the Town Hall we will talk over the Matter of the Advances for Tobacco Seeds to which you allude.

I find by the bye that you wish me to fix an early day. Shall we say the day following that on which the States delivers the proceeding books. Will it do that on that day suit you?

kindly excuse haste.

Yours very sincerely
R. Wallick

My Dear Wallick

I have now the pleasure of sending to the Town Hall all the papers and Letters of the Agricultural and Horticultural Society in my possession with the Proceeding and Silver Books all brought up to the last day that charge.

R. Wallick
Secy Ag^l & Hort^l Society

The

The completion of these has occurred
at a time when Jean Co. visited the Co. and
requested attention upon them, and I am sorry
I could not send them sooner.

Very truly

Respectfully
G. H. Robinson

My dear Mr. Realy

I return the correspondence
 I think you have been shabbily
 treated: but pray reverse the
 medal for your own ease, & look
 at the harder case of others. of
 all the married subalterns of
 the army on half batta!
 The Company has 800,000 £ of
 deficiency, & you will have a
 chorus of complaint before it
 is made up by clippings.
 For the rest, accept of my affec-
 tionate sympathy wh^{ch} always attends
 your weal & woe.
 Touching Hardwicke, what's the
 difficulty? You do but notice
 the progress of zoological science
 in Bengal, which will go on
 for ages, notwithstanding the
 large discoveries of the General!
 If you want of fellow gambler, I'm
 your man, for at this moment I
 am most enraged with the Gov^t
 tho' not on the score of finances!
 I have your wheat & pray of you
 to send me much more. Also, the
 Bokhara Melons - both well disposed
 of. Wheat most desirable. By the
 way, I'll send you with the live
 birds some Rhotah Boak for the
 Cape, where the farmers hold it above
 all other Cerealia.

God bless you W. M. Gordon

Lieut Col. Daniell

Commanding His Majesty's 49th Reg^t

Foot

Fort William

Sir,

It is with deep regret I feel myself compelled to report to you the conduct of several Officers of your Regiment - a conduct so grossly indecent that many years ago have been at the head of this Institution no thing comparable to it has ever occurred in my time; nor I believe during the whole period of its existence.

Yesterday (Sunday) on my walking in the garden in company with four other gentlemen to join some ladies who were coming from my house, we heard a loud howling noise ^{quite} near us, and looking in the direction of the sound we saw a person running like a madman in a state of the most perfect nakedness from a bridge to a distance, along a small canal, making a hideous noise all the

the while. This sight prevented us
close to the walk on which we were
proceeding, being one of the most
public and exposed in the whole garden,
it was only in part in the afternoon
and consequently broad day light.
On going to the bridge I found three
other persons there on the banks of the
canal in their shirts or bathing in
the water; there was besides an officer
of the Honourable Company's 25 Regiment
R. Infantry, who was dressed and
sitting on the railing of the bridge.

As there were ladies in
the garden, it was the more
necessary to put an immediate end
to the disquieting scene. I therefore
went up to the party desiring
of themselves and quit the
garden forthwith. This one of them
said they would do provided I would
go away, and on my hesitating a moment
I was told by them that would

th \leftarrow \leftarrow ? \leftarrow *. \leftarrow * \leftarrow f, \leftarrow t \leftarrow j, \leftarrow e \leftarrow T \leftarrow ^ \leftarrow ^ \leftarrow ^ \leftarrow ^ \leftarrow T \leftarrow ^ \leftarrow f-- \leftarrow the \leftarrow %t2* \leftarrow ^
se, * \leftarrow &&f \leftarrow rz \leftarrow S
j?
r \leftarrow 5t \leftarrow ^
44s \leftarrow

I departed they should not leave
their places. Upon this I left them,
after having assured them that I
should report their conduct to the
Commanding Officer of His Majesty's
49th Regiment; which declaration
they were pleased to defy as a threat.

Although I know the
names of most of the bathing party,
three being Officers of the above Regi-
ment and the fourth of the Honble
Cochran's 25th Regiment, yet I forbear
to mention them on the present occasion,
but it is a duty I owe not only to myself
and to this garden, as well as to the
numerous visitors who frequent it,
but also to You as the Commander
of the 49th Regiment, to bring to your
notice the outrageous abuse
I have

7.

of it in future.

I

I have the honor to be

To

A. Wallich Esq. M.P.

Dear Sir,

In acknowledging the receipt
of your communications of the 5th and
6th Instant, I have to regret that any
circumstance has taken place with
Officers of St. M. 4th Regt. so much cal-
culated to cause annoyance to you or
indeed to any person, and having ap-
-plaud the Officers I am happy to say
that two immediately came forward
in the handsomest manner acknowledged
and apologized for the improper conduct
of which they had been guilty, and subse-
-quently wrote to me to the same effect
and I feel full confidence that no cir-
-cumstance of the kind will again take place
but should I unfortunately be disappoint-
-ed, I beg you will do me the favour of a
communication as to both myself and the
Officers of the Regt. have always been
particularly anxious to stand well with
all

all persons in the neighbourhood of
your quarters. -

The two Officers above mentioned
declare that there were no other Officers
of the Regiment with them immediately
at the time this circumstance took
place, others however were in the ground

I have &c

formed) which is said to supply all China - I was a prisoner to the

as being made thus— First the leaves are collected
from the trees and put into large boilers, as soon as
the water boils, it is drawn off and thrown away
the leaves are taken out and put into a large tub
the ground which has been previously
prepered for its reception by the sides and bottom
being all nice and smooth, and thickly lined with
some peculiar kind of leaves. The tea leaves after
being put into this tub are covered over well with
a foot thick, or to this earth is thrown, so
to admit the least air, in great
care is taken that none of the earth gets to the tea
leaves— This kept in this state for
months— or so long as the maker thinks it has
under gone a proper fermentation— The tub is
then opened, and all Merchants and traders
come and purchase out of the tub itself— They
bring earthen vessels or Bampas, and its Cam
in them, the mouths of which are well secured to
exclude the air. it is then put on mules and
cows and sold all over the Country

To,
J. H. Patton Esq
Judge & Magistrate
Suburbs of Calcutta

Sir,

On Thursday morning the
16th it was reported to me that a young
Nutmeg tree had been cut down on the pre-
ceding night in the fourth Nursery at the
N. Western angle of this garden. I imme-
diately sent to the Darogah of the Southern
Shamshah in order that this wanton act
might be investigated on the spot. He ac-
cordingly sent the Moonshee attended with
some of the other Shamshah people, and the
result of the investigation in the afternoon
of that day was that Subut Singh the
J4+J7)»& of the Chowkars of this esta-
blishment, and Ramporee Subwarree
a Night Chowkar were taken into custody
by the Moonshee on suspicion of each
or both having destroyed the tree in question
yet Ram Puss Bahar, the Night Chowkar
of

of the said Nursery *~W Xrf*r..^Y& . There appears strong evidence that the young tree was cut down at one blow with a sword, and not with a knife; and considering the fact that Ram Pux Pahree is reported to have resisted certain corrections practiced on him and others by the Semadahi contrary to my repeated cautions, and that the man has been kept on the establishment notwithstanding the Semadahi's repeated endeavors to get him discharged, without affording any adequate cause, there is indeed a presumption of guilt against the said Semadahi, which you will find corroborated by some other circumstances when the cause comes before you on Thursday next at Howrah, when and where I was told by the Mowahid that it probably will be tried.

My reason for addressing you on the present occasion is to entreat you to grant protection to this institution without which, owing to the nature of the property ~y^5z**& 2 it consists, it must constantly be in danger of the most ^*E&--**^vi*^/

(ZZ}

and irreparable depredations from any
villain who may desire to gratify a feeling
of revenge, either against the establishment
itself or any obnoxious person in it whom
he may wish to bring into trouble. And
Night, may one hour would suffice to execute
^ACC an assault of brutal revenge as could
not be remedied in very many years. In
the present instance a Nutmeg tree was
singled out; the next attack may be made
on some still more valuable tree, though
it would be difficult to mention a plant
more interesting or more difficult of being

^-/• tr 1^ (P A^e^ije--

In consultation with Mr. Barlow,
then Magistrate of the Suburbs, Saugman,
in 1833 the number of Night Chowkees
to 8, giving each the liberal allowance of
5 Rs. per month and appointing a Jemad
over them at 8 Rupees.

My impression is that should the
Jemad be found guilty, the garden would
be in danger of suffering as life measures
were taken to prevent his coming near it,

a similar fear exists in regard to the Chev.
kedahrs; nor do I see any cor^{re} ** *f<?SAi*i"/'.-r.-A
less effectual as your kindly ordering a
Sannada, and a set of Chowkedar to be
supplied from your Catechery by which
means they would, although paid from this
establishment, be under your immediate
control.

C-X^jt,^/ ^rt
I sincerely hope you will per-
don me for making the above request
and that you will attribute it to the extreme
pain which the occurrence three nights
ago has caused and the alarm for the
safety of the garden which has naturally
arisen in consequence of it.

I have &c.

H. C. Botanic Gard. (Signed) A. Wallich M. D.

containing the order of the Hon. Secy
of the Treasury & the Hon. Secy of the
Treasury. The Hon. Secy of the Treasury
has the honor to acknowledge the receipt
of your communication, and to inform
you that the same has been forwarded
to the proper authorities for their
consideration.

Very respectfully,
Your obedient servant,
J. M. McKim

J. M. McKim
217 Broadway

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]

Visitors are expected to attend to the following rules which have been approved of by Governor.

Not to use the branches or flowers.

Not to disturb the plants in the Garden.

Not to offer money or presents of any description, as every one is forbidden to receive remuneration for any part of immediate service.

No person will be permitted to shoot, ride, or bathe within the garden, or to bring either horse, dog, or gun into it.

Parties who wish to take refreshment within the grounds must make a written application to the Superintendent or Head Gardener, when a place will be permitted near the principal entrance but at no other place can such indulgence be granted.

During the cold season from 10 A.M. to 5 P.M. **S ft.** and during the hot weather from 5 A.M. to 7 P.M. **s&s**

The people in the garden have orders to be kind and well supply parties wishing for flowers with such as can be spared.

Honble Company
Botanic Garden
7th October 1833

Signed J. W. Grant
Off. Superintendent

This Lodging appeared very much pleased
with a report of the Amherstia. I think
it will flower very well for so small
a plant one of the women has 20 puffs.

It I send you one for a present full of it
some days ago. A fine lot of Amherstia
is all going on pretty well. I am the richest
I find I am getting into debt again but
we have a great quantity of wood left
about sufficient I have to pay and all
in all straight again if not there is
the work to show and if no other one
can be found I will pay it myself.
Mr. Fyde suggested that the wood be sold
by Auction but that I don't approve
of myself it would make so much
noise. however I will consult Mr. Fyde
or leave it entirely till your return.
Lord Anubland wishes to send a fine plant
to the worthy Baron at the Cape from which
he has brought about 100 species of Libros
is going on making collection. he is so much
that he has raised a new orchid. stopping his
hands with joy of our respect. Mr. Fyde

To, The Right Honorable
Lord Auckland
Governor General of India &c.

My Lord,

I now have the pleasure to lay
before Your Lordship a report of the plants
and seeds, received at the Botanic Garden
on the 8th of this month and agreeable to your
Lordship's polite request, to suggest a few
observations on the manner in which they
may be most advantageously disposed of.

Mr. Anderson. The plants sent by Mr. Anderson are
for the most part in good condition one only
is dead. Edwardia chilensis.

Horticultural. Of 16 ornamental plants sent by the
Society Horticultural Society of London 4 only are
alive together with 4 vines and 4 figs, all
the rest of the fruit trees are either dead or
sickly.

Royal Gardens. Of 58 plants from His Majesty's Gardens
at Kew 10 are dead, together with all the fruit
trees. J&t*ts4r~i*s m^%. 0-jC**
OL+€*vA-*s*~'^ a&cr &<s *
in the hold of the ship.

Appendix

Map ^{rs/Ucc.} of 47 choice plants furnished by
 Messrs. Loddiges 18 only are dead all the rest in
 good order, the 9 species of Forest trees in a
 very sickly state, these were packed in moss,
 and placed in the cold. The Dahlias apparently
 in good condition.

Cape. All the plants brought from the Cape of Good
 Hope may be considered in good order. Notwith-
 standing the many failures ^{^**e*^*^*[&]4,*} above
 we have still about 200 living plants embracing
 200 species which are not in the Botanic Garden,
 and allow me, My Lord, to suggest that they be
 sent of in the following manner.

Oct~4/lJL

Barrackpore. The bulbs and seeds of ornamental
 plants to be sent to Barrackpore. The Dahlias
 400 are first to be broken in the Botanic Garden,
 then planted in pots, and when strong and well
 rooted to be sent to Barrackpore, the ground
 being made ready to receive them as they
 require a rich soil, to enable them to flourish
 freely. Also the following living plants

<i>Walteria</i> <i>rosea</i>	<i>Cratogeomys</i> <i>regia</i>
<i>Loodyptidice</i> <i>cliv</i>	<i>Alpinia</i> <i>senensis</i>
<i>Epipendium</i> <i>ellipticum</i>	<i>Camellia</i> <i>indica</i>
<i>Pistacia</i> <i>officinalis</i>	<i>Maranta</i> <i>zebrina</i>
<i>Fraxinus</i> <i>corus</i>	<i>Mercuria</i> <i>patk</i>
<i>Casuarina</i> <i>australis</i>	<i>Amelanchier</i> <i>sarcocolla</i>

<i>Elms Symplocos</i>	<i>Heliotropium Saghis</i>
<i>Mastic cochinchinensis</i>	<i>Pinia</i> <i>Quale</i>
<i>Pistacia lentiscus</i>	<i>Salvia splendens</i>
<i>4 Vanilla aromatica</i>	<i>Acacia luphantha</i>
<i>2 Auricularia excolata</i>	<i>Nyctaginia Comptansana</i>
<i>Juniperus Sabina</i>	<i>Scorodiscia speciosa</i>
<i>Sabra sapota</i>	<i>Crataegus triangularis</i>
<i>Crotonia deliqua</i>	<i>Portulaca sp</i>
<i>Acacia arabica</i>	<i>Podonin mucosa</i>
<i>Marrubium Aurandia</i> ^{not 4000}	<i>Practistatna Fabacea</i>
<i>Allamanda Cathartica</i>	<i>Asparagus yucatanensis</i>
<i>Quercus Amara</i>	<i>Erythrina Caffra</i>
<i>Pinia granatum</i>	<i>33 Quercus grandiflora</i>
<i>Preocentia Cayota</i>	<i>Agapanthus Perseca</i>
<i>Lophoceros aborea</i>	<i>Setbonia sp</i>
<i>Tapelia sp</i>	<i>Metocidra sp</i>
<i>Caecilia sp</i>	<i>Strelitzia angusta</i>
<i>Crataegus sp</i>	<i>— regina</i>
<i>Passiflora cordata</i>	<i>Hardonia Humbertina</i>
<i>Alca variegata</i>	

For the Agricultural and Horticultural Society it is very unfortunate that so many of the Fruit trees have failed; yet your Lordship will be enabled from what remains to make a valuable present to that body, with your Lordship's permission I would suggest that all the Oranges, Vines, Figs and Kitchen Garden seeds be presented, to the Society should your Lordship

Lordship approve of this measure I am certain
 that His Excellency Sir St. John, Sir Edward Bly
 Mr. Dunalp, Mr. Styd. and Mr. Bell the Secretary
 all of whom take a lively interest in these things
 will do their utmost to promote your Lordships
 several designs. To the Society I would recom-
 mend that the seeds, and plants so far as pos-
 sible be distributed among the following gentlemen
 Major Gen. J. & L. J. G. & L. G. & L. G.
 Hauser, Dr. Falconer, Subalterns, Genl. Rawley
 Mount, Capt. Mack. Cahool, and Capt. Perkins
 Swabatty with others that might be thought of
 the next meeting of the Society. There are a few
 sickly fruit and fruit trees which would be ac-
 ceptable but I think that they had better remain
 at the Botanic garden, for the present, and that
 they recover, they can be presented hereafter
 The following is a list of seeds and plants proposed
 to be presented at this time.

- 10 Varieties of Oats
- 11 ————— Barley
- 18 ————— Wheat
- 16 " " " Millet
- 1 ————— Rye
- 2 ————— Tobacco
- 2 ————— Cotton - Rice

Kitchen Garden seeds

Living

Living plants
7 Spec. of Figs
2 Vanilla aromatica
1 Scavimus rous
1 Adunia sp.

1 Metrodora spec.
30 Grape Vines

Bot. Gard. There will then be left my Lord 170 plants
embracing 150 species not in the Botanic, with
from 50 to 100 plants in a sickly state which
had better remain in the Botanic garden for
the present, and if they recover they can be
disposed of agreeable to your Lordships wish
a future time.

When I had the honor of accompanying your
Lordship to Barrackpore the other day, the
Garden appeared to me to be very bare of plants,
I have consequently suggested that all the
bulbs, Dahlias, and ornamental flower seeds
should be sent there, yet as there is a large as-
sortment, with duplicates of many species, per-
haps your Lordship would approve of a small
packet being sent, to Lady Ryan, and also to
Mrs Shakespeare, The Dahlias are very much
drawn and I fear they would not succeed if
sent immediately to Barrackpore I will therefore

by

Living plants

Ever ready to attend to your Lordship's
commands, I have the honor to

be your Lordship's Obedt Servant

Botanic Garden }
March 15. 1836. }

W. Martin

Dear Sir

Bot. Soc. Mar 18. 1836

I sketched a letter for you to-
day enclosing a copy of one from Lord
Auckland to me. Sent a box of Hawaiian
seeds to the Duke of Devonshire.

Received yours of 3 March for which
please to accept **Wrfstoy** best thanks. 

14 The Quinoa which is said to be a common
in South America or vice in Peru appears
to be a desirable plant to cultivate
I believe Mr Lambert has been very successful
with it in England, and it is His Lordship's
wish that it should be tried here, I have written
to Captains Cox, Johnston, Wade, Col Shimmer
and Dr Lalconer enclosing a few seeds for
each. Perhaps you will say why not give it
to A. S. Society. I had packed it up for that
purpose, but I was ^{afraid} it would be all given
to persons residing in this part of Bengal
and thus the Society's object would have been
defeated. He wishes to send things wherever they
are most likely to succeed and into such hands
as will take care of them. Fear of the above
I was certain of, and from what I have heard
of Col Shimmer, he is not behind the rest.
To Dr Waller

Miss
20. Received a letter from Lord Anstons
London a copy, to show you that he
still takes an interest in our business.
21. What Mr. [unclear] sending the kitchen garden
some varieties of oats, barley, wheat &c —
What also to the Medical & Physical Society
which His Lordship wished me to do when he
was here the other day. His Lordship has brought
many medicinal plants, and you would
have smiled to have seen *M. arabis* rather than
22. And *M. arabis* among them he has also
brought *A. ovata* sent to Anstons from
the high nursery to Miss Welch. The *A. ovata*
is not so deep colored as the plate, at least not the
border of the petals, the yellow part of the lobe
is deeper, but the white ground is not so clear
of those flowers which have yet opened. The
young growing by leaves beyond comparison.
Will you kindly tell me what plant it is
that produces the form *arabis*. I cannot find
any other than *arabis* upon the subject.

22. Mr. Gibson has packed a chest of orchids for
the Duke of Devonshire to go by the post.
We have prepared one of Mrs. Lodge's small
chests with *Caloglyphus* only, sending about 30/2

you will be surpris'd at my sending all
of one kind. I think I have two weighty
reasons. I had Richard D. Chryson Hermin
&c. but I consider it very bad practice to
send plants varying much in size with
same chest and Mr Gibson is of the same
opinion. Mr Laddiger sent 5 chests of plants
and would not take a farthing for them. I
wish to make as valuable a return as possible
now the Catalogue I know is very scarce. If
there are at all, if I send him a good stock
he will be able to push them into the market
at once, and thus a chest of only one specimen
be of more value than one of different
specimens when we consider that other people
are at the same time carrying home the
same. Besides I sent him 2 chests in my
containing all that I supposed he had not got.
I have also prepared a chest of Palms for
for Baron Ludwig. I have had them put into
one of Laddiger's closed chests and will write
to the Baron begging of him to give it to you
if possible, and send it on to Hackmeyer
This will be a quick return. A chest of orchids
for the Duke. A chest of Catalogue for Mr Laddiger
and a chest of Palms for the Baron.

23 At the last meeting of the Society
it was proposed to ask the Duke Duke
to grant about 6 leagues of ground for
the cultivation of the Sugar cane, which
Mr Grant has agreed to and Mr. Bell
came down this morning to consult
with me about it. I pointed out a position
near the Northern gate between the Tanager
and the Mangrove by the bridge as the most
convenient spot, which Mr Bell approved of
Lord Auckland paid us another visit this
evening accompanied by Miss Eden. He & the
Ambassadress informed me that Capt. Gray
does not intend to put in at the Cape
I must consequently let the Baron's chest
stand over for another opportunity but
His Lordship wishes me to make up a
chest for Dr Lindley which I will do soon
His Lordship approves of the plan intended
for the Duke of D. and for Messrs Laddie. He
thinks Mr Anderson knows nothing about
gardening, he will find out the knowers.

25 Fortunately I did not dispatch your letter
yesterday as I now suppose you are near
home. All yours will. Yours respectfully
W. A. A. A.

If the Med. & Phys. Society can give me any information on the following particulars

I shall be extremely thankful

H

If any, or all of the aforementioned plants can
be cultivated in this Country, is it likely that
they will become essentially beneficial on
account of their medicinal properties:-

In what part of the Country are they most
likely to succeed:-

Are any of the members of the Med. & Phys.
Society conveniently situated for making
experiments with them:-

The Governor General has desired me to ask
upon the information which the Med. & Phys.
Society may kindly afford:-

I have the honor to be

To

J. W. Masters Esq.

Herb. Comp. Botanical Garden
Calcutta

Sir,

I have the honor to enclose you a copy of a resolution passed by the Medical and Physical Society of Calcutta at their meeting of the 2^d Instant and in compliance with the directions of the Sub Committee to submit to your consideration the subjoined remarks on the subject of your letter of the 19th March.

Of the plants enumerated in the list you have to prove beneficial in medical practice.

- Smilax Sarsaparilla.*
- Guaiacum officinale.*
- Pastinaca Opoponae*
- Santonia Contrayerva*
- Quassia Amara.*
- Pistacia Arabica thus*
- *Sentivus.*
- Laurus Benzoin*
- Juniperus Sabina*
- Almondia Cathartica* & list of
- Atropa Belladonna.*

On each of these plants I am directed to offer the subjoined remarks.

For the *Smilax Sarsaparilla* we are possessed of two very good substitutes, cheaply obtainable, in the native Bazaar viz. the *Dioscorea Indica* and the *Smilax China*. The *Diosc. Ind.* is indigenous along the Coromandel Coast. The *Smilax China*

the imported from China and the straits grows in
upper India. The true *Sarcoparilla* would nevertheless
be a great accession to our Indian Pharmacopoeia.
The Committee believe its cultivation would prove
successful and that the experiment might be
safely tried in the Botanical Garden.

For the *Guaiacum* off no good substitute
exists. It is most likely to succeed at Hazareboy,
but its growth is so slow that many years must
elapse ere its introduction can prove of general
utility.

The *Pastinaca Opoponax* is now seldom or
never prescribed, but it would doubtless thrive
well even in the lower districts of Bengal.

For the *Pastinaca Contrayerva* many vegetable
indigenous in Bengal and the adjacent territories
may be advantageously substituted. The *Aristida*
Indica for instance is possessed of nearly equal
virtues. The *Duplezia* ~~and~~ is likely to succeed in
Bengal.

The *Quassia amara* tho' scarcely of superior
efficacy to the *Sentiana Chirayta* of Bengal is still
well worth cultivation and will probably thrive
here.

Tho' the *Pistacia Terebinthus* affords a
fragrant resinous liquid it is scarcely if at all
used in medicine its chief employment ^{* ^ ^} is for
a disinfectant among the Turkish and Persian ladies.
It would probably do well here. The *Pistacia* in a
Sentivosa is (or recently was) growing in the
Botanical Garden of Calcutta. From the extension
of mastic on the soil is of domestic purposes in

India its cultivation should be urged.

The Saurau Benzoin answers well in India. Its products are largely and cheaply imported from the Straits. It was not long since growing in the Botanical Garden of Calcutta.

The Juniperus Sabina would be an important addition to the Indian Materia Medica. It requires a warm sheltered valley and would probably find a suitable place near Hazarebag.

The Adamanda Cathartica is a well known and cheap Bazar Remedy of considerable value especially in native practice.

The Atropa Belladonna requires a milder climate than Bengal but would perhaps answer at Hazarebag. He would be willing to send a portion of the seeds there for trial and some to Dr. Falconer at Saharunpore. *%£iifyfa^Z*^£^ir*X^ It certainly flourished in the Mysore territory. The Committee would deem its introduction a great public benefit owing to the inestimable value of its extract and the difficulty of obtaining it from Europe in a state of sufficient preservation.

The other plants you have mentioned being either of no medicinal value or exclusively commercial interest, the Committee are unwilling to trouble any observations as to their habits or applications. Of the Smilla aromatica alone they would observe that the great consumption of this spice in Europe renders its cultivation in Bengal a matter of much importance. The Committee think the attempt will very probably succeed. The Vanilla arom. grows spontaneously in Venezuela, one found in

Toru and Cuba, and is cultivated in many other places
the Mauritius for instance, & in any hot, moist and
sultry climates and situations, such it best, & very
inferior Vanilla is - raised in upper India and
and it is as is - well reputed and demand there as to a
- much encouragement to the attempt to
- enter 9 rfs-t C4S S/Er, true Sj4.. - raised by the Steam boat going
to the Upper provinces it might be sent to Saharunpore
in the proper season and under proper charge (of
an apprentice) & perhaps (for sj*-j) Botanical garden.

The committee in conclusion believe that
considering the season of the year and all the
circumstances above detailed, the plants should
be taken charge of in the Botanical garden. The
committee look forward with much satisfaction
to the probability of Dr. Mallick's speedy return to
Calcutta, His Excellency the Governor General will
then be enabled to avail himself of the most
distinguished authority in India on all these
important subjects.

I have the honor to be
Sir
your obedient servant

Wm. B. P. Khan Bahadur.

Dr. Gordon,
Dr. Stewart & Self

Members of the Medical Society
of Calcutta. 8th April 1836

Dr Wallcut begs leave most
respectfully to propose the following
plan to the Right Honourable
Lord Auckland, with respect to
Gibson, believing it to be
that which is best suited to be
carried into effect the views
of the Duke of Devonshire.

As soon as the rains
have fallen in next month
Gibson
should proceed in a boat to
Chattuck near the foot of
the ~~Chattuck~~ hills and from
thence ascend to Girri
Pooje. This journey will
occupy about a month. He
could remain ^{in the hills} some two
months, making excursions
in all directions for the
purpose of collecting a vast
store of Orchideous plants
which abound in the utmost
profusion ^{in the proper zone} on the range and
which will be highly prized by
his Grace, who has equipped
himself.

jfc7fcd

himself especially anxious about
besides roots and seeds
of as many other plants as he
can lay his hands upon. The
collections thus accumulating
may be sent down from time
to time by Pranghy and ^{the} by casual
boat-consequences, or occasionally ^{which sometimes} from the foot of the hills
offer themselves for transmission
of such articles from the foot
of the hills to Glanatta. But
the bulk of his harvest he should
take down himself on his
return to the garden. What results arising about 3 miles

After having performed the
above journey it is very desirable
that Gibson should make a
short trip to Martaban, availing
himself of the Steamers that sometimes
occasionally go that way, or
of some ship opportunity. He
will be sure of finding there an
excellent ample field for collecting
things of great interest to the
Duke, chiefly among Orchids,
besides having an opportunity
of taking with him a number
of

of Amherstias, one single plant
of which alone would no doubt
be considered at Chatsworth
as ^{fully} amply compensating the
cost of sending Gibson to this
country. If properly managed
this expedition to Amherst and
~~the mountains in Massachusetts~~ would
not occupy beyond ^{three} four months
at the ~~very~~ ^{most} ~~farthest~~. - The
expense of ~~conveyance~~ ^{conveyance} by the
river and by sea would not
be great; and as to the mere
transmission from time to
time of the collections that
were making, the expenses would
be very moderate. One hundred
dixes would be sufficient
to cover the charges of forwarding
the Chirra harvest to ~~the~~
Here would ~~be~~ ^{be} some
maintenance disbursements
on the hills and on the coast
for carriers, ^{boats} &c. but ~~Dr. Miller~~
~~does not understand any~~ ^{great}
~~expenditures on that score~~
During

but they would
be trifling

During Gibsons absence care
 will be taken at his garden to
 continue forwarding to the Duke
 as many ^{plants} as possible of those ~~plants~~
 after articles which are accumulating
 and as soon as

he ^{U*} ^{^rAjTS-^} comes back from ^{*} his
 final tour it would be advisable
 that he should return to England
 with the bulk of his treasure,
 which would in all probability
 exceed in value any thing
 of the sort ever seen or received there
 in England. Mr. Walter thinks it is important
 that he should arrive ^{at home}
 in England in July or at the
 latest in August with
 reference to that being the
 proper month for raising
 the plants: the proper time period
 for leaving his country will
 therefore be early in March
 next year ^{which will allow of ample time for}
 because ample time for ^{being wanted to for two journeys}
 performing the route which
 Dr. Wallis has ^{been directed to} submitted
 J. Wallis

Received by the Duke

To
Dr. N. Wallich, M.D.
do do do

Sir,

I am directed by the Assoc. of Hort. Soc. of India to offer you its most cordial thanks for the great exertions you made in its behalf, during the period <yX you had the benefit of your valuable services as Secretary.

To reiterate rfi-aa! /K^- *^/*"/ the advantages derived from the exercise of your talents for - and conciliatory address would be but to repeat what every member of the Society is too fully aware of, and in being the humble medium of conveying to you the warmest acknowledgments of a Society which is still honored by your *** advice and assistance, avails of its Vice Præsidi > / ' * & - | I perform a duty the most pleasing that has rs-si&. devolved upon me, r-^Jf/V ^ you did me the honor to propose me as a temporary substitute.

I have the honor to be
Sir,

Your obed. Servant !.*'«~ />

Wm. Seece
Secretary

Assoc. of Hort. Soc.
Office Down Hall
May 11th 1856

Belair Garden 21st May 1835

My Dear Sir

I had the honor to receive your most kind and welcome letter as I was going out for my evening walk otherwise I should have returned an immediate reply. But I was unwilling to detain your servant seeing that Mr. Miller was gathering, I therefore sent him away with my best salutation.

I now sit down in my retirement home to offer you my very best thanks for your great kindness in favoring me with an extract from Sir G. H. Cocks letter to you. I beg when you write next to the Right Honble. Baronet, that you will assure him of my unabated and unceasing respect, gratitude and devotion and that you will express to him my most hearty thanks for the truly flattering & heart-rending encomium in which he is pleased to speak of me to you. I can with truth say that my best and dearest recollections during nearly 30 years of an Indian career are associated with the period when I was blessed with such men as Sir G. Cocks and Lord Hastings; and that death alone is able to diminish or obliterate my strong recollections of both these illustrious names. The country has, I must admit, improved a very great deal, it has improved vastly since the time I departed; but I affirm at the same time that the improvement is far more due to those, and other great men of former times, than what is generally allowed. It is a narrow fashion to ascribe every thing good to the passing generation, without reflecting that had it not been for preceding talent, zeal, genius, greatness - we should not have come to the point of improvement at which we have arrived. In many respects we have made but poor progress - in several others the mighty literature of the East has been retrograded. I shall make a long digression for which I ask your pardon

and indulgence; indeed I have a strong notion that your
sentiments and mine are not much at variance on every
matter to which the preceding observations refer.

Please to remember me in the most respectful
and best manner to Sir Edward. If I were not so overwhelmed
as I am with incessant writing I should take the liberty
to call on Sir Edward this and Mr. Brougham's dinner.

shortly. Would I had but to accuse myself of a long and
unaccountable silence towards my revered friend and
patron for each Sir Edward has been here towards me. But
I know he will forgive me. I know it well.

You wish me to furnish you with an outline of the
Tea question and of my researches on the subject in Affam.
As a most esteemed colleague of mine in the Tea Committee
You are far better able than I can pretend to be give the

^L and an if you wish it
I will endeavour to appear
requesting that you will
Your able pen! P. S. 10

is Tea capable of being introduced
and cultivated in extensive commercial pur-
poses. A Committee was accordingly formed; Mr. Dundas was
sent to China on purpose to bring back or send experienced
manipulators, plants and seeds, and
nurseries were formed in various parts of Hindoo and
... .. for the purpose of rearing and cultivating the Tea in these
lofty regions. Towards the end of the year a fact was brought
to light which at once put the matter on an unexpectedly
novel and delightful footing. It was ascertained that the
Tea plant was a native of Hindostan, on its western A. Coast
frontier of Affam, growing wild and used as tea, although in
a peculiar manner by the Singpa and other barbarous tribes
inhabiting those parts, stretching to the S. and Eastward through
a vast extent of (partly Burmese) territories until those of
- Canton

tenants or natural tea forests reached the Chinese frontiers
provinces of Yunnan, where the shrub is most extensively cul-
tivated and the leaf prepared in the Chinese fashion. This
most interesting fact was not the result of quite a new
discovery, for it was known in Aflam some 10 or 12 years
ago. But it was now for the first time brought to public

knowledge by means of a series of reports the probability
of any future doubt that the plant, rather than the bright tea
with which it is ^{*JC <***.4 ^.} identical at tea of China (either green or black

it, of which). It was immediately determined
that a scientific deputation should be sent to Aflam mor-
-der ascertain and report upon a variety of particulars con-
-nected with this great subject. You can best bear witness
how anxious I was to be excused from this duty. How earnestly
I pleaded my long Indian life, not very firm health and
the various journeys I had performed in Hindustan, Nepal
and Burma. How ever I pleaded in vain. I was allowed to
name two assistants or a pistants which I did, in a man-
-ner which, I am proud to say, has more than counterbalanced
my own inefficiency and thank God after an absence
of nearly 9 months the deputation has recently
returned, I trust, with the fullest success. As soon as
we arrived in Aflam than we obtained information that tea-
tracts occurred much more to the southward and westward

£3 e ^ytr'-

than we ^{plated before leaving Calcutta;} that it
was not confined to the King's territories but extended into
Upper Aflam through territories belonging to Chieftains over
whom the British Government exercises perfect influence
and control. We accordingly visited two tea-jungles or
tracts among the King's countries to the E. and S. of Luddaya
(which is the furthest most southern part in Aflam) between
the Nowak Diking and Doro Diking (branches of the
Pranapootra); two in the Muttich or Pongpowa (Moul-
-marren) country belonging to the Burmese Rajahs; and
lastly

lastly one at the foot of the Sago hills in the territories belong-
ing to the Rajah of Siam - Puraudor King. We found the plant
at all stages of growth and fecundity - in bud, flower, fruit &
and we found it associated with a variety of these very plants
which constitute some of the most remarkable features of a
forest or plantation in China. In short the Deputation

... circumstances of which they had any information, and I need
not add that a most successful harvest on all branches of the
Natural History has been reaped. I am deeply engaged in
preparing a report of my labours - and I shall be happy if
I can produce something which may not put you, my Dear
Father, and the other Members of the Committee to shame for
having selected one to head the deputation which may not
apartite on you all and the public at large as an operator.

In the meanwhile I am glad to think that the Com-
mittee have warmly entered into my views of the importance
of getting possession (say on a long lease) of insects, with the abuse
free the hearts for the purpose of putting them into a proper
train of management. Three or four Chinese cultivators and
manufacturers who have lately arrived from Canton are now
on their way to Siam; and I trust that the Government
will fully adopt the plan recommended by the Committee. For,
what is our present position compared to the case or a situation
when we were first nominated. Instead of accentuating,
whether we admit of being introduced and cultivated ex-
tensively for the sake of its leaf - we know now that the
Tea plant will and grow perfectly wild in Upper Siam.
Instead of being obliged to establish new plantations, which
would have been indispensable if the shrub had only been ascer-
tained to grow among the King's, we have natural forests
ready prepared for our experiments among our own, far more
civilized friends and allies. Thus with a vast saving of ex-
pense as well as time be effected. and I very willingly agree
to

to stake any little credit I may boast of possessing in matters of Botany and Agriculture that a good saleable and potable Tea will be produced ere long from our Spanish forests. Patience and perseverance will enable us to compete with China in respect to the superior sorts of that great and invaluable comfort of life. - what a course of prosperity will this not be to that fine and most important country. Spain?

I am half ashamed of sending you this evening return for your most welcome communication. But I cannot write more this evening. Indeed I am not very strong, having had a good attack of indisposition since my return from Spain to the excessive heat of lower Rongal. Accept of my best thanks for your polite present of a basket of Prunes and believe me with very great esteem.

My Dear Sir

Your very truly

J. M. Wallis

Long
Letter to Dr. [unclear] [unclear]
about [unclear]
20th May 1836

My dear Good M'WJL

^f/Q/M,^ M~*- A&-&+Gc*-^z*r To enclose

ji-tru- remarks on the subject of Indian Materia Medica. I trust you will do me the favour to submit to the Medical and Physical Society at their next meeting. The remarks have been copied from the 8th part, just received in Calcutta, of Mr. Royle's Illustrations of the Botany of the Himalayan Mountains - a work so replete with the most interesting and important facts, both practical and scientific, that I am unable to name any other publication, which possesses a higher degree of value or utility as far as this country is concerned.

You will observe that Mr. Royle urges the great importance of inquiries being made with the view of bringing to light the full resources of his country.

H. W. Goodwin Esq
Secretary to the Medical and Physical Society.

in the production of medicinal drugs, especially such as may be attributed for those articles which we are in the habit of receiving from Europe. After instancing several ^{Indian} articles which are extensively in use out here as well as in Europe, he very justly argues that a country producing some of the most active medicines, cannot reasonably be supposed to be by any means deficient in those drugs of which the physical properties being less obvious and the effects on the human system less decided, require for their discovery and ascertainment, nice powers of discrimination." The author concludes his very pointed observations by strongly recommending the ~~to~~ ^{use} ~~of~~ ^{of} the Native Materia medica to the Medical Officers

of India; and twice most heartily enters his views I feel that I cannot better second these, than by having the honor of addressing myself to a Society which, from

ry^c-^ d* Us*VI i commencement, has shown itself
anxiously desirous to promote and encourage
researches of this nature, and whose recom-
mendation ~~with~~ must in the present instance
have a far more powerful effect by way
of inducing its members to persevere in
bringing to light the many as yet hidden
treasures of our Indian Materia medica,
than any individual effort, however earnest,
could possibly ^{produce} effect. We all remember the
zeal and perseverance with which Mr. ^{Living}
entered into researches of this nature, and
there cannot be the least doubt, that
other Members, equally anxious in these
matters ^{as} our late departed friend,
will readily continue their aid in so desirable
~~and~~ ~~undertaking~~ as that which has been sketched
out by Mr. ~~Boyle~~. As to myself, I beg to
offer my humble services as a pioneer on
this occasion, by endeavouring to trace
any new or unknown drug, which may be
entrusted

The Royal Asiatic Society of Great Britain & Ireland
11, Grafton Street, Bond Street,
London W. 1st of January 1876.

1 My dear Sir,

The opening of the session for the
year has afforded me a suitable opportunity
of bringing to the special notice of the Council of
the Society your late communications, your extremely
valuable donation of the *Uta Sahasrika Pragna*
Paravata, and your liberal promise of the *Nava Dhanu*
and of the other *pauranika* and *tantra* books of the
Sangatas, which are your sketch of
Buddhism, with the view to enrich our Library with
a complete series of these original Sanscrit depo-
sitories of the *Bauddha Philosophy & Religion*

I am desired by the Council
to convey to you the expression of its highest praise
for your able, zealous, and, in the fullest sense of the

Yours faithfully,
—*—*—

term, philanthropic exertions in this research,
That not from India or Nepal has been for so
many centuries, there, and there only perhaps, can
it be expected to find remaining, unaltered and
undeniable monuments of the ancient institutions
of the plains. - The Council is quite sensible
that to you alone the praise is due of opening this
vein of knowledge, not only to the philosophical world
at large, but to England in particular, whose duty,
as well as pleasure it is, to learn to know those
whom she governs.

The Council perfectly coincides with
you in opinion as to Sanscrit being the language
into which the Brahmha Sages first committed
their doctrines; and therefore, that it would not be
advisable, unless other reasons should offer themselves,
to your notice, to continue the Tibetan series, or
to make additions to the volumes of the Yim division
of the Kahgyir.

I am desired to request you will
accept the special thanks of the Council for
your highly valuable communications. - Convinced
that you must have made great pecuniary sacrifice
in the prosecution of your researches, [^] I would
desire to come forward with assistance & co-^{jtC}^
operation in this respect also, but I much regret to say
that

that the state of the Society's funds does not
at present admit of its doing so.

With the best wishes on the part
of the Council for your success, its admiration
of your exertions, and its hope soon again to hear
from you, - in all which it gives me much
pleasure to say I most cordially unite.

I remain,

My dear Sir,

Yours very faithfully

By
Brian Houghton Hodgson Esq^r

Ratmandu

Nepal

My dear Mr. ...

1857 5th July 1857

My dear Mr.

Many thanks for your letter. The accompanying reached me yesterday. What generous fellow!

What English are! The books will cost me 2000 Rupees, I must try all.

Got a word from Bennett. He said he that he told about writing. I am getting on with the subscriptions. 100 names nearly. The drawings are

coming daily, & a little delay will allow room for the next batch equal to any ever published in England. Will send you a spec. for Mr. John. Send through the post office of work.

But for the trouble I could get more than enough of subscribers in India. Must try & do you. Sent with printing.

Got bamboo post like paper. Send. do you want? Good friend.

24th July 1857

Mr Wallcut has the honor most respectfully
to submit the following Memorandum for
the consideration of the Right Honorable
his Grace the Duke of Devonshire
The Duke of Devonshire has been
in the Duke of Devonshire's
gardens should depart on the expedition
to China. It is proposed that he should proceed
with a party of some thousands of
men who will be going in a
few days to the same destination
under the sanction of Government
Everything that can be done
a successful
will be attended to as far as possible,
and there is every prospect of an ample and
rich harvest being reaped. Capt. Lister
the Adjutant General at present
is happy to facilitate the Duke's
but still Mr Wallcut humbly submits that
an intimation to that effect through his
Lordship

- r 8 * ^ " ^

*" "&"&

Private Secretary seems to attend
A^>C & degree of benefit not to be expected
from any other source. St. Walburgh would
not have ventured to make his requests, if
were not for his hearty and anxious desire,
to the truly splendid liberality
of the Duke of Devonshire
in this affair. It is hardly worth
mentioning that such an extensive
and valuable collection of plants, roots
and seeds long made accumulated
during the last month. Much it is intended
that the gardeners should devote to the
Kewer to which he will be ready to set
off from his garden in 8 or 9 days
with regard to the superb
most valuable collection of plants brought
and presented to his garden by his
Landlord, St. Walburgh has the honor to add
a detached list from which it will be
seen that out of 400 plants that reached
the garden alive, 332 are

of the letter from Mr. Laurier to Mr. Gadenon twenty
to the Medical and Physical Society, and the
letter in reply from the latter mentioned in the
date to the date mentioned 8th April, explaining the
error of the Society, the same day Mr. Walker
was honored to confer to him the deposit of
the medicinal plants, which were offered to him
by his Lordship's directions. It may be seen
to appear that all the proceedings recorded
in the correspondence have taken place
during his absence from Bengal and that
he arrived from Agra on the 22nd April

3KnSL>j

Restored by his Lordship to his spiritual
and horticultural Society it is not
surprising to admit to have been as I believe
understand that his Lordship has had
a direct communication from that Society
to the best, except by observation, that
his wishes have already been in part
implied with, and that they will be fully
realized, as far as existing means will
admit of it. —

It would indicate that the following
circumstances may be neglected. Firstly, by far
the greatest proportion of the specimens
consist of plants that are natives of tropical
countries that are heated in some or other
house plants. Many are produced in great
quantities in South America, as recent
a case, I have seen long experience that
they will probably occur in the district of
Brazil.

2. Some individuals have already
been considered for an instance to
day, and it has been found necessary
to plant out some days ago, although
there exists only one specimen in the
whole collection.

3. A whole number is now in
a remarkably healthy condition, there are
duplicates of a great many, and among
them of some most interesting medicinal
and other plants, for an instance the Quina,
Guajacum, Vanilla, Sassafras. Some of the
have

found already very much multiplied. Under the preceding considerations Dr. Wallis feels no hesitation in expressing his opinion that as nearly as possible a complete series of the collection should be retained at this garden & thereby the danger of a successful introduction of the plants in the country would be rendered much greater than would be reasonably expected if any of the species of plants were to be sent abroad for the present. He therefore begs leave to recommend that he may be authorized to proceed on the above principle in his humble endeavours to do justice on this gratifying occasion, sparing his Lordship's pocket with as little as possible that is his first destination that presents

at the present time, the Company of the East India Company, whose very great and indispensable services to the Government of India he is almost to preserve and

L ~ J

« 2 ^ * . * » < * * *

i - >

-itt > ^ , ^

^ L ^

£

and multiply profusely the distribution both in the
hills and the plains, and plants as may be
forwarded to him. Some of the plants may with
prospects of much advantage be sent up to

China Coombe by the party ~~returning~~
departing for that place. & come to Capt.

London at Gouahatty. His extraordinary

zeal and the delight he takes in matters

of ~~industry~~ ^{are} is only equalled by the ardour
with which he pursues every enquiry connected

with the prosperity of the province and which
he exercises ~~in~~ ^{with} controul. A favourable opportunity

is despatching a selection to him with my

shoaly care as a load load of other plants

will be sent ^{to him} from hence in a few days.

The principal series ought, however

as above suggested to proceed without loss

of time to the Salampore garden, and

as it is now a considerable number of

years since any supplies have been furnished

from the garden there shall be permitted

by the Government to forward at the same

time a large assortment of such other plants

is cannot be communicated by seeds or in any other manner. The whole expense incurred, ^{to be} and the assurance should be limited to the sum of a total of about 500-roubles but then and the wages

of a mantle and a pair

and Botanic Garden, *Umsialuk*.

Royal Asiatic Society, eL.<*&u Street
12th July 1836

My dear Sir,

I return you my best
4LA^£- ?# i • thanks for your very interesting letter of the
28th June 1835, as soon as I had the pleasure to
receive it I called upon Sir James Ca- << the then
Deputy & present Chairman of the Directors
of the East India Company & also upon Col. Sykes
I showed it to them - to the first with the view of
pointing out to him and through to the Court of
Directors - the value and political importance
of your intended publication - to the second with
the view of ascertaining from him in what manner
the Royal Asiatic Society could most effectually
forward your object - Sir James Combe assured me
that he was fully aware of the utility of such a
publication & that he would give it every encouragement
in his power, Col. Sykes explained to me the nature
and extent of the e* pport which you may expect
to receive in London.

I likewise consulted ^ it your relative
the

the Dean of Carlisle & with Mr. Beuret the
Secretary of the Zoological Society. I particularly called
the attention of Mr. William Jardine of Jardine Hall
in the County of Dumfries to the subject. Sir
(fLEU41**us J**&) is equally distinguished by the knowledge
which he himself possesses of natural history & by
the zeal with which he cooperates with others in
promoting its study, enters very warmly into your
plan & has, at my request, as he tells ^{me} written
to you explaining the course which he would advise
you to pursue. I am convinced that no person in this
Country is more capable than he is of affording
you valuable assistance and I am therefore extremely
happy to find that he has opened a communication
directly with you.

I shall, as soon as you let me know, the details
of the plan which you have adopted, be most
ready to lay them before the Royal Asiatic Society,
the Board of Control, and the Court of Directors
and to urge each of these powerful bodies to give
you such aid as they may respectively be enabled to
do, & I shall, in a short time, send out to Lord
Chancellor a resolution of the Committee of corres-
pondence expressive of their sense of the
great

great advantages which the people of England
and the natives of India must derive from
your cautions & of their hope that Lord Suckland
will both publicly and privately patronise your
researches in every way he can.

Allow me to add that I & all my friends in
this Country entertain the greatest admiration
for the indefatigable activity which you have
shown in encouraging inquiries into the natural
history & literature of India & will feel the
greatest pleasure in taking every opportunity
to make the public in this Country aware of the
debt of gratitude which all those who have an
interest in the improvement of the situation
of the natives of India ought to acknowledge
to you for the liberal manner in which
you have directed your researches to the
investigation of questions which are so intimately
connected with their happiness & prosperity.

I think it of so much importance that
your views as to the natural history of India
should be generally known as well on the Continent
of Europe & in America as in England, that
I shall have your letter to me upon the
subject

subject published in the next number of the
Quarterly Journal of the Royal Asiatic Society
which has, I understand, at present, very
extensive circulation. I shall, when they are
printed, send you a copy of the proceedings
of the last anniversary meeting of the Society -
by them you will perceive that I alluded to
your plan in the report which I made to the
Society at that meeting, as Chairman of their
Committee of correspondence.

Believe me, with great

My dear Sir

yours very faithfully

his * 4 will appear in the Asiatic Researches, and
perhaps *V^ also in the Asiatic Journal. I am not quite
certain that Mr. Buppel will approve of ><<<-
fr i I 0*4 are sketches to his Lordship's notice, &
in my humble opinion it is because Ai*y * i* more
sketches, made with almost incredible rapidity, that he
has had such a large number of S S recognized to be
the hand of a most accomplished artist. Mr. Buppel's
ft sketches drawn m***m? are exquisitely beautiful, and given
as I have said, in a systematic manner (of which his Lordship
is not only the author, but the whole botanical works in the
nomenclature, which Mr. Sackbald has been
mentioned to me, of delineating an excellent collection
in Upper Abyssinia for the present, and perhaps of sending her
a copy to - { var. -

^ . is another reason for sending these sketches
it is this, that I am likewise £ the satisfaction of
exhibiting to his Lordship how skilfully y he has
has copied his papers of the sketches on the peculiar part

these are papers of botanical sketches of highly magnified
unusual details drawn by Mr. Buppel, in view
every possible disadvantage of haste, being ultimately
them belonging to certain very masterly specimens of
112

Memorandum for Gibson

1. I have written a long letter to Capt. Sexter at Chival also intended for his Apartment Mr. Inglis which you have read; so that both will know that you are on your way and for what purpose. Of course you will call immediately on your arrival on the Hills (I will give you a note) and present your Credentials from the Senate to the Governor General.

2. On your way to the foot of the hills you must write to me by every opportunity, if you pass by Bulua in the Sunderbans, and by Laeca from thence. It is not generally known that there is a Post-Office at the former place, and I know there is.

3. I will give you a note to Mr. G. Inglis at Chatur near the Hills (the father of W. H. Inglis at Chival) who will kindly advise you how to get on to Sandooa towards the ascent, or to Company's down, also in that direction, most probably the former place, and from thence to the top of the hill.

4) I have told you that any letters addressed
to me officially on matters connected with your
tour will pass free. You must countersign the
address, and head it "on botanical service" and
small rocks, even small orchids, plants
forwarded under a letter cover, provided
it is heavier than what you
have seen coming down from Kamsu. The
oftener you send in this way the better - on
your coming to Charra you should always
have a lot of such despatches ready for being
forwarded one or two or more (as) by each
rank. Recommend your numbering them
on the outside (1, 2, 3, 4) in a large and
conspicuous manner that we may keep a
sharp look out and prevent any discovery before

List of Plants collected at Chirapunji
 Sent by Bangs to the H. B. Pot. Garden
 Commencing in August 1836 at 4500' alt

The first basket marked No. 1
 containing
 A very delicate species of Orchidea
 probably Dendrobium grows upon
 trees in great abundance in Broom
 wood & flowers in the Raining season
 2 Orchidea sp. probably Epiparis. bears numerous
 small delicate small white flowers. Grows
 upon trees & Rocks about Chirapunji -
 flowers in the Raining season in August
 3 Orchidea sp. is found in abundance
 about Chirapunji, upon trees. Flower
 stem about 1 foot long, bearing
 numerous small white flowers, which
 are beautifully fragrant. Flowers in
 the Raining season -
 4 A very pretty little African plant which
 grows upon Rocks, in low shady
 places, and by the sides of Ponds
 in the valleys plentiful about Chirapunji.
 Flowers in the Raining season -

List of Plants collected at Chomabuzie
 in August 1806
 Sent to the Noble G. Botanical Garden
 September 1st 1806

a small
 of Bosc
 of plants

Rec^d with letters of 20th Aug^t

1 Dendrobium densiflorum
 containing also a pretty shrub which grows upon
 rocks in the woods about Chirra - it flowers
 in the rainy season —

3 2 Dendrobium sp. 3^o — this species has beautiful
 yellow flowers, with a dark violet lip
 from the joints — bearing from 2 to 4
 flowers at each joint, — and as many as
 20 or 30 on **** * ^ * g£JZ -**
 found at Choomy & at Chomabuzie, growing
 upon trees, flowers in the rainy season.

3 3 Dendrobium sp. 3^o this species grows in wet
 wood about Chirra - but not abundantly
JrfJ+ * */ ^ *** senty in the hot **4 ^ * ^**
 containing also plants of the several other kinds

3 4 Dendrobium sp. 3^o A most beautiful species,
 bearing its flowers in Racemes at the extre-
 mity of the Branches from 3 to 5 flowers
 in each Raceme. flowers beautiful yellow
 with a dark lip **-Z-** found in a wood

to the northward of Moosony in Shan-dan
growing upon trees. flowers at the latter end
of the season -

5 *Cypripedium* *venustum* -

and also one other kind of Orchidea

6 containing plants of W.S. only -

6. 6 *Dendrobium* sp's this is the most beautiful
Species I have seen the *Dendroba*. it
bears large terminal branches of beautiful
white flowers, marked on the lip with purple
streaks - it bears from 2 to 3 large
flowers on each stem there is a large
white ~~white~~ bractea at the back of each
flower which half covers it -
found growing upon trees, at Chahadio,
not common - it appears a very
delicate species - it flowers in the
rising season -

7 *Orchidea* 3 *Terrestrial* species which
is found at Moosony and in most
woods about Chorra - it flowers
from the sides of its young stems -
apparently - it will be in flower
in September -

8 *Lymbidium* sp's found growing upon

The Stump of an Old dead tree to the west-
ward of Chirrapungie an interesting spe-
cies of *Phoradendron* & *Platanus* etc. containing
also *Pholidota imbricata* - *Bolbophyllum*
brachycomum - *Sabal*, a species of *Caryota*
& one or two other kinds -

Ouranobium sp. 3 this is a most interesting species
resembling in appearance *D. dichroflorum*
but has compressed stems - it flowers
at the T**^' rpjtzrjZm - as - large pendulous
flowers 3' but said by the natives to
be beautiful - flowers growing upon
trees in a very low and damp swamp to the
westward of a clearing - It is this plant which
apparently flowers in the hot season as it
now is dead -

10 *Cymbidium laurifolium* - terrestrial flowers in the
rainy season -

11 *Liparis* - named by Wal. - grows 35
years upon rocks in dust & in decayed
sandy soil common in the woods
about Chirra - flowers in the rainy season

12 *Orchidaceae* 3 named by Wal. -
It grows upon Rocks & trees in dense
woods - X * . . . * ! * but Chirra - flowers in

The hot season apparently -

- 13 *Dendrobium* sp. 3. a pretty species bearing 2 or 3 pretty whitish flowers, but the stem with orange stems pubescent, found in moist woods about Chorra (not flowering) flowers in the rainy season -
- Containing also an *Orchid* and plant within a Rumba it has a long if not umbelliferous stem terminated by two thick leaves & also a scape -
- likewise one plant of No. 1
- 1 containing plants of No. 1 only
- 2 containing plants of No. 2 and No. 18.

- 10 14 *Dendrobium* sp. 3. - a curious species it bears its flowers in a cluster at the top of the stem, of a dusky brownish blue ground growing upon trees in moist woods about Chimaylanes in the rains -

- 15 *Orchidea*. A most beautiful terrestrial species of *Orchidea* and scope in diameter about 4 inches long bearing 30 or 40 beautiful articulated yellow flowers in a round bunch, it grows at the feet of large Rocks in decomposition of vegetable mould in very dense woods about Chorra - (flowers in the rainy season) (it is seen in flower)

16 Calanthe versiflora 3. Terrestrial -
Common in every wood about Chorra
it is a very beautiful plant flowers
in the R. ^{+£*+2} -rtL* com. -

11 17 Orchidoe 3. Curious parasitical species and
4. »m'4A- pretty common in every wood
about Chorra. flowers in the Rainy
Season -

Contains also plants of No. 14

12 ——— plants of No. 12 only

18 Orchidoe 3. an Epidendrum like sp. - grows
upon trees in dense woods about
^{^ x ^ U - ^ _ js/£<~>.> >} apparently early,
in the Rainy Season -

19 Orchidoe. Pholidota 3. Common in every
wood about Chorra. grows upon
trees. flowers at the commencement of the
Rains -

Containing *t *L<4+ / or 2 other kinds

14 Contains plants of No. 10 only
^{the plant here is the same as the one in No. 10} Cryptochila

15 20 *Cratogeomys interrupta* Wal.
A beautiful CSS. sp. grows upon trees
in woods plentifully about Chorra.

16 2) *Orchidea battiyya* like *Sp*
grows upon very high trees at *Alloosmy*,
and there not very common. it also
grows to the Northward of *Alloosmy* -
I have not seen the flowers of this *Sp*
but it is said to be very beautiful -

17 containing plants of *MS 21* only

18 22 *Orchidea* *sp*: A most beautiful species.
Resembling *Stanhopea* in appearance
flowers in pairs at the base of the leaf;
flowers beautifully spotted all over
with blood coloured spots - grows
upon the perpendicular sides of dry
rocks and also on trees - in the woods
about *China*, & flowers in the rainy
Season.

19 23 A most beautiful species of *Calceogon*.
flowers resembling *C. jumbata* in
color, but twice that size. grows
upon trees at *Alloosmy*, and flowers
in the rainy season.

20 *Orchidea*, * *var. w~^* this like *sp* bears pretty
pale pink flowers, with ^{and} *orange*
coloured lip. grows upon trees
to the southward of *Alloosmy* ^{flowers}
in the rainy season. ~/£

25 Pollophyllon baryanum -
and also ~~two~~ or two other kinds of
Orchidaceae. -

20 26 Phajus maculatus 3 -

21 27 Calogyne fimbriata 3 grows upon rocks
at Chirradang. & flowers in the rainy
season.

28 Calogyne 3 grows upon trees to the westward
of Chirra purige. at a wood called
Chirradang. - appears mostly of flowers in
the hot season.

29 Calogyne 3 grows upon trees in most woods
about Chirra - it grows in large
tufts and hangs down 3 or 4 feet
from the branches of trees - of flowers 3

30 Calogyne 3 a robust growing kind
which grows upon trees to the westward
of Chirra ^{^y4*} & ~ - > ^* flowers 3

31 Calogyne 3 grows upon trees in most woods
about Chirra ^{mmm} y? ^**^ < us 3

22 32 Plurastallis 3 common in almost

every wood about Chorra -
Containing also a Lycopodium & a Begonia -

2303 Cymbidium sp. 3 grows upon trees in
most woods about Chorra. but not
abundantly in any of them - flowers
apparently in the hot season,

34 Orchidac. - a Sarcanthus like species which
grows upon trees at the Chorra wood
to the Northward of a Hoosmy - very
low and in dense places. flower 3
Containing also 2 or 3 sp of Orchidac.
Lycopodium & a little alpine plant

2405 Orchidac. 3 sp. a very pretty delicate species
with curiously marked leaves it
bears a greenish white flower with a
little tinge of pink ^{at the} extremity
of the trailing roots. it grows upon
the sides of Rocks. & attaches itself
by two or three roots only. and lays
almost bare the Moss in which
it sends its roots - grows in woods
about Chorra & flowers in the rain.

36 Orchidac. 3 bears long spikes of whitish flowers
which are very fragrant -

grows upon trees in every wood about China.
Flowers in the Rainy Season
Containing also a sp. of Caloglyphus.

25 Contains plants of No. 7. and a g. also a B. y.

also *Ascymanthus* & No. 51 & No. 4

London

Burton Street
25th October 1855

Dear Mr. J. G. ...

My dear Sir,

It is sincerely with great pleasure that I regret on the line that has elapsed since you expressed your wish that I should myself in some communication with Mr. Richardson on the subject of your projected work on the Geology of Nepal. Both, he and I have made in the interval very ~ ~ ^ attempts at seeing each other, but $\xi \sim \wedge^*$, .. iy^\wedge until this morning. /?" promised to write to you, and has undertaken to $S+$) this letter for me.

* — c' of the delay and negligence has been occasional, I believe, by the difficulties which both he and I saw in the matters and which, I am .. in .. influenced us both so far as to induce a deferral of the consideration of them, in the half-conscious hope that some clear mode of escaping from them might occur to us. But the delay has not thus operated, and the question must be discussed with you, and your determination be sought for on it.

Looking at the work in a $v \dots$ financial point of view, and it is quite essential that it should be

1

be considered in this light as well as in others, he
will speak to you of improbability of its covering its
expenses, unless with fictitious aid: and will suggest
to you that subscribers must be sought for, and that
a large number of these ought, in prudence, to be
secured before commencing the publication of so large
an undertaking. I have already hinted to you somewhat
about this, in speaking of general Hardwicke's
Illustrations of our Laws, particularly to the great
importance of the Company's patronage, if accompanied
by the necessary appendages (which I apprehend, is not
an unusual one) of taking at the same time forty copies.
To secure the disposal of this number would be half
to secure the work; and a few subscribers to the same
amount in India would almost make it assured.
A few English subscribers would probably be to be had;
but in no case would there be many; and even a moderate
number would probably not be obtainable unless by pains
being taken. Yet if from 100 to 50 Copies could
be disposed of the price might be so arranged as to make
it not altogether a losing speculation.

I have to please you of your drawings in the
hands of the lithographer and to require him to make
for you a set of them on stone. This, I think,
for less than 100 copies. The same, the impression
from them would cost, with the paper, about 100 pounds.
The colouring would probably be, on an average, about
60

6th each. Say ***&6** with the printed wrappers & etchings^{s?}
the cost of 100 copies of each set of 10 plates would be
about £120. A hundred more - ~~which~~ - ~~at~~ - ~~each~~
and some chance sale at 27/6 or 30/6, for there must be
a trade allowance of 25 per Cent. off the selling price,
and you might **6~f~*** or to a *** ^ * ^ .** - ~~it~~ of the ~~to~~
though there would then be 10 per Cent. to be allowed
to the publisher. So far then, it might be practicable,
with some previous arrangements as to securing subscribers,
to enter on the speculation with a probability of not

/^Xf/^ ^^y

But this view assumes that the plates **, - - - - ^**
published alone, that is to say without being accompanied
in the first instance. **Z** The publishing
of the plates without text has the advantage of rendering
it unnecessary to deliver copies to the public bodies **S**
by law to receive them, such as the universities **+** and
that eleven copies are saved. But it is said to me that
purchasers hesitate about acquiring books with which
letter-press is promised, and that they abstain from
encouraging such works, in the fear that they may not

P^S* j?L^) Vtl+X ^^MC^H^UM^^ < In his time a

again publishing plates without all the explanatory
text that was at any time intended to accompany them.

On this plan he has since acted in his European
Bis **&S; /** his **! ^** in his **2C*** His
instance is that of a practical man, and as such

J

I quote it. Let me add that the disinclination to purchase plates which are hereafter to be erected, if it exists at all among your probable purchasers, will not be diminished by the case of General Barrow's Illustrations. Not only is the Prod named Fund India Ricentalis promised to accompany them, not now published though long due, but it is even probable that it may not appear at all, for Mr Gray and the general's Executors are corresponding on the subject through the intervention of their respective solicitors: the Executors being anxious to making the advances requisite for the printing of the work.

In the union of plate with your plates, however, independently of the annoyance of having to give up eleven copies out of so limited a number as you will have to deal with, there would be the additional difficulty of its being prepared by you at so great a distance from all collections but your own and from extensive and recent libraries. Accounts of animals prepared under such disadvantages must necessarily (you would say it yourself and I feel that I need not hesitate in saying it) require to be carefully revised, and this revision, extending possibly to remodelling, and in some cases even to variations would be incurred also with great disadvantages by an edition at a distance who consequently could not consult with you * <v.^C# might introduce statements or views with which you might not fully accord, or reject others that you might conceive ought to be retained.

In all this there is evidently considerable difficulty.

Let us, however, assume that either with or without letters press you wish the work 'to be published' and with the aid of subscribers. We must then consider what we are to ask them to subscribe to - a volume of *Nipals*. But to what extent with the work and? Shall we say 100 plates of *Mammalia*; 300 of *Birds*; 50 of *Reptiles*; 100 or 200 of *Fishes*? and without taking into consideration at present the *Insecta*, *Mollusca*, *Arachnida*, &c., almost innumerable, think *Vertebrata* only - 600 or or 650 plates - 60 or 65 Nos of ten plates each, at 20/ 25/ each - to subscribers £ 60 or £ 65; to non-subscribers £ 80 or £ 100. Will this, or will it not, have a deterring effect? I fear that many who might be disposed to encourage such a work, would hesitate about undertaking upon themselves as considerable a charge. Yet persons asked to subscribe to a work would require to be informed, before engaging themselves, to what they were called on to become bound. Audubon's work is indeed more costly and there are much fewer plates for the money; he has too succeeded in getting very sufficient support for it, but he has enlisted national vanity on one side of the scale and on the other he has most strenuously exerted himself; but yet his subscribers are far from being all delighted at the periodical drains upon their purses for the long continuance over which they will extend.

This leads to the consideration of the duration of the projected publication. If published at the rate of one number quarterly it would in progress for 15 or 16 years; if published every two months, it would go on for 12 years

at the least: to publish it more frequently would, I should think, even if practicable be injudicious. This is rather a long time to look forward to: but it is the shortest that can be conceived. **** . &O Ao ^ *; rarely be shortened, but may, by accidental interruptions, be prolonged. In that length of time old subscribers die, and their successors are not disposed to continue the work; others change their minds; the circumstances of others change; and a thousand occurrences happen to create imperfect copies and other evils. New purchasers after a given time will on the other hand be few; for they will be deterred by the first great expense of purchasing the back numbers from the commencement. These are reasons against a work extending over a long series of time.

If then the extension of ^{the} work as to absolute quantity and as to time be both objectionable, we may think of the expediency of diminishing this extension; and I have already, in what I have lately said, so far regarded it as diminished as to keep out of view (for the present at least) the invertebrate portion of the Fauna. Can we *^ft~*L, +vLUn

of Pöpal as one subject? On the Reptiles and Fishes either as one other or as two others? This would reduce each series, the Birds excepted within moderate compass, and would so far be apparently advantageous. But, as a counterpoise in some measure to the advantage, we have here, as every where, corresponding evils. The number of purchasers for the several works, regarding each series as a distinct work, would be very various. More persons would purchase the Birds, a smaller number, the Mammals,

jm{ <***v *f***-<; added, the Reptiles and Fishes. Rea
of... accidentally to this latter remark I may mention
to ~*0** that it is understood that Hamilton's Fishes of the
Ganges would never have been published had he not given
to the bookseller at the same time his *Travels*: the publication
of the Fishes, a work on which •f*+**_* ***** ! ***** his com-
pensation for the Copy right of the P... in which
profit was hoped. To return for say... to
point whence I have led. If we must be looked for
from the cold-blooded Vertebrates, it is possible that this
may be diminished by some profit from the warm-blooded
of the sub-kingdom. The Birds, if well done (and they
may be well done at less cost than the Mammals) may
A*~et*~*~* pushed, do more than cover their expenses. The
Mammals, at the utmost, will scarcely cover their

There is yet another mode, besides subdivision, of
diminishing the extent of the work so far as price is
concerned, and it is a mode which to a naturalist would
be a very grateful one: to diminish '< & ***' considerably the
number of plates, by omitting figures of all... animals
which have been previously fairly represented... but
might extend over all the animals of the country; might
classify them, observe upon them, describe them, & explain
their habits; for those already recently figured it might &
refer to the figures previously published; for those not
before figured, it would refer to the accompanying
representations. In this manner the subject would
be kept complete, while a large proportion of the
expenses would be spared: of the Mammals probably
not.

| + t

Our friend Wallis's work, which is much before
the eyes of your imagination, did not go even the length
I am now suggesting; that of talking in all the objects
of the country in the text, and all the insufficiently
known in the illustrations: it confined itself to figuring
~~the most interesting only, and to describing & explaining~~
those only which were [^] used. The others were thrown
into the mass of the same, and left in other hands.

With the plant Asiatic courses before [>], JfL ^{*^tR}
its magnificent appearance and noble size cannot but
excite you to wish to emulate it in both a ^{**M^r} but
is a folio, a giant folio, necessary for your purposes?
Might not a quarto answer? The mammals must,
many of them at least, be reduced in size under
any circumstances, and a quarto plate would be
fully large enough to do justice to them. Of the
Birds too, some must be reduced in size, however
large your folio, unless you go to the double oblong
of Indusor, and were he is sometimes compelled
to force his birds ^{**L.jjit+*+.' uttZ.} limits of his page.

How unimportant to do the smaller ones appear
on so large a page, if each plate is confined, as it
ought to be, to a single species. It is only by in-
troducing groups, and plants and nests that he is
able in many cases to cover over the centre of his
paper; and amidst a mass of showy flowers the
birds are sometimes by far the best important
objects in the picture. The cost of paper and
of printing increases of course with the size:

the

the capacity of paper for receiving words diminished
with its size a folio can be little else than a book
of plates, for who can read a folio? ^{**T} Its
size scarcely adapted for the readers, these
days.

It is now to ^V illustrate themselves. You
have for ^{∴ «*«*» v'} years directed ^{*^L<S *?+*+*} attention to the
preparation of the drawings, and to breaking in
the individual ^S employed by you to make them; &
some little debility is perhaps requisite in hunting to
you that ^{, u*£>} notwithstanding all your care, your artist
seems to me to be still in the view of an artist, his drawings
to have ^{*-^} the character of Indian drawings.

I am not enough acquainted with art to explain
to you how this and know little more on the subject
than that I am pleased with this and disappointed
with that other: yet in Indian drawings it seems
to me that there is always a stiffness, an exaggeration
of points (such as the ^{lines}) to which the
artists attention has been directed, and a ^{Mtffc} of
on of the colouring. These defects do not exist
in all equally; but they seem to me to pervade generally
the work, and your manuscripts are not free
from them. Bear with the remarks, which, after
all, is not that of a connoisseur.

If however, it be in any degree correct, ^{' a} is
desireable to seek to [∴] it; and I shall suggest
as the most advisable ^{∴ J'} [^] ^{*+4fc**f} to
England of sketches rather than of finished
drawings.

drawings

drawings, the sketch to give an idea of the expression
of the animal's countenance, of its general form &
of its attitudes: of these last several sketches might
be given, so as to enable a home artist to choose among
them. For to a home artist would I leave it to
make the drawing to be used here. To enable him to
do so, he should have the power of filling in all
the details; which power he would obtain by your
transmitting to us entire skins of the several objects,
these skins also to contain the skulls unattached. It
does appear to me that in this manner we might
improve upon the drawings already sent. In speaking
of sketches, I do not limit the artist to small ones
merely; for I suspect it probable that he might
succeed better on a larger. *^J^, *E

several years since pencil drawing of your wild Boy,
for instance, pleased me much by its spirit & general effect;
and from such a drawing, aided by a perfect skin in-
cluding the skull, I should be vexed with an artist who
could not produce a good engraving.

This leaves us to the engraving. For Birds, especially,
with the artists we could have recourse to, nothing is
usual to stone. ~~But for quadrupeds, I am I do not put con-~~
fidence in lithographers. I doubt the power of
the material with which they deal to give the various
qualities & lengths of fur, their power of contrasting

and

and amending expression is also limited. Hence
 for choice, I ask for copper for mammals, notwithstanding
 its greater expense, from 50 to 100 per cent. Against
 this ^{/M. ^,:} however we set the better result, in art,
 viz, the power which we thereby acquire of taking
 as many impressions at a time as we want, while
 with stone (as **9-** would be worthy to pay the hire of
 the stone to allow [^] the drawing as well as on it)
 we are bound to have ^{& ,&} in the first instance all
 that we conceive we are ever likely to want. The
 copper is ^{ii ^ - < * ^ r ^ v * ^ >><- ^*Tw ' <<} however the
 stone is cleaned, and ^{^^} we want more impressions
 a fresh drawing must be had. Reptiles & Fishes,
 to be well done, should also, I think, have copper,
 as enabling a greater amount of correction & finish.

In every case the person who authorises, in the
 report, the publication of a figure, should have
^{< ^ >} a specimen of ^{^St} object: a skin of the bird
 or beast, entire, a spirit specimen of the reptile or
 fish, also entire. Reptiles and Fishes would
 require to be accompanied by a coloured drawing, showing
 the colour of the recess ^{jio&k -a ^7} the colour of the irides,
 beak, legs, claws, and various parts of Birds should
 also be depicted.

One other point, and I have done with ^{X *t} subjects.
 The skulls and teeth could, I ^{. * >} think, be better shown
 here

less than with you. Detached skulls should be sent for this purpose, & from them the drawings could be made at once upon the stone by an experienced hand.

Have that unburthen my mind to you on most of the points connected with your projected work; if you used some connected up you will attribute it to my thoughts to you over a subject **«^W** has been often present to my thoughts during my travels.

You believe that the undertaking might be commenced under better auspices and purchased with more **>** satisfaction to yourself, if carried on under your own superintendance. But I feel too that as your return to **gstS}** **«mi** it probably not **^.^L/*** since for some years, you may feel that in the interval you might be anticipated by others, and **xi> *^<f ^** that in consequence of the delay the chance of your seeing completed the large work which you have pictured to yourself might be diminished. The fact cannot be disguised that, in the more attractive parts of the Fauna, there is great probability of anticipation. Independently of any casual intruder, and in these days of universal inquiry where is the part of globe into which Europeans do not wander for the purpose of observing, you must feel that there is, in your case, a special person who has already publicly connected himself with the subject, & who may believe himself to be called on by the public **^.*.***, & farther what he has actually **mon.**

Gould

Gould's Century of Himalayan Birds would probably
have been, or this, but the First Century had he not
been heavily engaged in other works; but it occurs to him
respectfully to hear that his work is incomplete, from
species not figured in it, and there
is a conveyance to him to carry it on
and to complete it as far as practicable. That this
intention has not yet been
owing to his other engagements; not, in any measure,
to his want of materials. Then he has a very
great extent from sources altogether independent of us:
you may have some judgment of which there is
in his hands by the account which you will find in the
proceedings of his new genus Anthracoceros, a Himalayan
genus altogether, in which to three species previously
known by him he has now added three others. True that
these are from specimens in the Society's collection,
but the use of them, or sources of any thing else, could
not be denied to him, nor to any competent person, nor
indeed ought it to be. It is only been
given where the donor himself had no objection
of himself using the subjects prevented by him; and your
new species would be in this predicament. But many of
them some things come to us from other
these no interdiction could be put
come to him and to other persons, and these of course
are altogether out of our control. The possibility
of

** ^V*!«

f

m

M~~S

-d*-his M~**.

j^m

interposition in this line to a considerable extent is
consequently imminent.

If your drawings are absolutely so.
Though in the Society's possession, they are in the
Society's strong box. A man who has the only
other key besides mine is Mr. [redacted] of their secret kept
from use. It is in the hands of the Assistant Secretary
Mr. [redacted] business.

Get into such a line from a nest of [redacted] a needless step
which I would wish to be attached to the specimens
of your new species in our stores. Do you feel
sure enough, with the aid of the St. Louis [redacted]
to you and of other means within your reach, to grasp
at the probability of a bird being new? If you do,
attach a name to the first specimen of it which
you send us, and you may, perhaps, be impracticable
but also occupied by [redacted] of [redacted]
and [redacted] and [redacted] of the [redacted]
reading public, we shall [redacted] fall back
on Gould, and he too is heavily occupied. But
he is, at present, more under control than any one
else, at all competent.

I think, he is [redacted] so far as
practical information on [redacted] child, not
of the grasp that one would wish for. Many
hauver

however, must be **rTfe' . * . <** is; and unite logic to all
you can catch them. The speaking of our friends
as regards the Society, are perhaps more in want of a
good orator than anything else and are most glad
to get Gould's help. Better help, indeed, it would in
my estimation be impossible to have, had we but a
man capable of generalizing what he knows in details,
who could well use the facts that he would impart.
Goulds would ascertain whether the brass or iron, or
I could manufacture a character in the Proceedings
are all that are at first contemplated. If however,
a goodly volume of text is to accompany the plates,
then I suspect that your notes and Gould's notes
must be put together by some third hand.

You've asked me. I remember, as to
Gould's position in Society. To you, living in another
world, it matters but little. Your distance prevents
essence your ears from being affected by that which
in closer proximity and in a more delicate atmosphere,
might perchance be annoying to others. If a man
& well **?KL** lamp by which he labours, your nostrils
are not so acute as to offend by it in another hemi-
sphere; if his hand be hardened by labour, you cannot
scrape it and you feel it not; if he strikes with
the hammer or with any other mechanical tool,
your ears catch not the sound; the impress of an
obscure writh on his features, or of an unpolished
education

education on his hearing, are not visible to your eyes:
you understand of a man here that his knowledge
and his skill have been productive of information
and of pleasure to yourself as you are interested
in him. But it should seem by the tone to which
you refer in your letter to me as though among
those with whom he is brought in contact there were
occasionally different feelings: and that I were
sufficiently aware of the misfortune which had befallen
down in the author the mechanic the son of honest
but poor parents, and the man of English see looking
I believe that feeling strongly pervades society.

It is within the circle that of the Fellows of our
Society, de
which I have seen Gould's employment observed to
me with joy that we ought to be sent for again
to deliver in the gardens. I remarked on his prac-
tical knowledge: on the impossibility of finding
any one possessed of equal information to see him
the answer was that he knew nothing but what he
had learned with us, that if he, a
had in case himself capable, any other journeyman
gardener might equally make himself so. My
doubt was settled, perhaps both parties were
so: but Gould had been a working gardener, he
is a man working at a trade, he is receiving wages

^AAf**^**

y* *?<

he has consequently no station in society. But
he will be known, he is to every heart he has done,
while the Knight who thus attempts will probably
be heard of - except in the history of the
pages of the life of a saint - to whom
he once, perhaps, was so fortunate as to be
servicable.

If I speak thus of your service feeling
you will suspect that I have not much in com-
with aristocracy: we are I wish to visit a
corner of the world. But I have on personal
this letter already, without making it
with any account of myself.

Reasons - no doubt for the birds coming,
in some measure, help of the least require
a little attention. In this department you will
hesitate to work free, go well, and will
have experience and that to you. You will
probably look to me here as a friend to watch
that the names of the birds if I state may be
not very far wrong: and to see that observations
of nature are given in the process of what I
must be fortified with the power of referring to
perfect specimens. It will be given with the
states, that text should be your own, but with
power

power to me to strike out perhaps sometimes slightly
to myself, or even to contradict if need
out going the) and to explain and compare further
than you can. This implies large confidence, but
without such power the office would scarcely be
satisfactory one. I cannot promise either that I
would ^{> - - -} them well; but I would endeavor
to keep the work on even with the state of knowledge
if not to advance it.

The nomination and description of the
** might also fall to my share, for there is,
I shall before
I receive your ^{1. 12} from all
active share in the ordinary bus, . . . -f&tL **f&* &
and have consequently more time to devote to
matters that please me better than the semi-political
struggles which are agitating both our Council &
the general body of the Fellows. Here again I need
sincerely speak of the necessity of perfect specimens:
they shou'd be in spirit, for with skins of fishes
I am never half satisfied. All the notes & information
of course be

with respect to the Reptiles it is probable
that Mr. Bell, although I have not yet spoken
with him on the subject, might be induced to
Take

take the same course as that which I have sketched
out for myself. ^{^v} ^{^f.T} as the Doctor. He would
better could not be done. but I shall try and - A***^
do well, his hands are now over full. I will see
if he will clear away some of his engagements, and
make himself parcel-free at least, ⁷ S? ^{<*~*~*~\$!}

I may speak to you of the Reptiles and
familiar, not only for the purpose of
class, but ^{Uyfo.} ^{*A} a few of choice in consequence
of the Warwick's commission ^{4-- < *~} been the subject of
a special study. But if the hands of others
are [^] Mr. his are always truly over-loaded. However
this might tempt him, and I should be very glad we
will endeavour to keep him to the work. It is
chiefly on account of other [^] engagements,
and of the consequent approximation to the possibility
of his performing all that he could wish that
I have not before spoken of Mr. Gray as to be
applied to for any other position: for all would
be nearly equal to him. But he cannot do all,
and he could do the Reptiles more satisfactorily
than any one else, except perhaps ^{v-} ^{??} But therefore,
if ^y the Reptiles for Mr. Gray.

We have now disposed of the Vertebrates subject
of ^{^^Srviv^t.} enough for one sitting. The consideration
of

of the Lower Vertebrates may well [^] for the present,
be left out of it? in an approximate to a com-
parison.

The questions are

Shall the Fauna of Nepal be published **4t+ffa**?
or in parts?

Shall it consist of plates? to which? to be followed
by letter-press in 8vo? or shall it have descriptive
letter-press also, appi: [^] like to each plate?

Shall every animal of Nepal be ^{r-^jM} figured?

Or shall it be limited to those only which are
new, or which have not been figured before?

In the latter case shall all the text, whether
descriptions or notices of the animals?

or those only that are new?

Shall it be arranged in systematic order?

or each of them following its nearest affinity?

Or shall the order be confined to keeping
together animals of the same class [^]?

Shall it be subdivided, published as distinct works
the Fauna of Nepal & the Birds of Nepal? **4** /-

or shall it be published as one volume to
complete a Fauna of Nepal, and to give necessarily
such a general title?

Shall the engravings be made from your drawings?
or from drawings made here, as I have suggested?
had

had shall they be on copper, on stone & or part
on one and part on the other?

Shall the work carry for your return? Or shall it
proceed in your absence? In the latter case,
a superintending Editor shall be appointed,
whose name should appear on the title-page.

This latter observation brings us to the question
of remuneration to your co-operators; for all
men must be remunerated in some way or other;
some by gold, some by fame, and some by both;
the latter being, of course, generally the most ac-
ceptable. The golden harvest, in this case,
will not I suspect afford much to share among
the labourers: yet it might be worth consideration
whether a sharing of the profits, if any, might not
be promised to them, at a certain number
of copies of the part of the work which he is to do
with might be given to him, with one copy of
the whole. Then, if gold is not to be fame
is the only recompense beyond that of having aided
in the good work; that can be offered; each man
must consequently have the public credit of what
he does. The pecuniary risk of the work falls wholly
on you: this is hard; but on some one it must
fall

could be in the first instance secured, if a detached portion of the work were to be first published: then you will be able to judge, from the rough estimate I have given, of the probable outlay for a given number of pieces. This outlay must money: for artists need the ready cash. For paper and for printing I presume that credit would be had to a date that would ensure some return from the work itself to meet them. Preparatory advertisements of various kinds would be required, and these would call for the ready money -

I have taken the liberty of requesting Mr Richardson to send to you the *Travels in Brazil - Americana*. The first volume is by Dr Richardson, the second by Mr Swainson & Dr Richardson: the third now in preparation, & the fourth by Dr Richardson, will be succeeded by a fourth, & so on by Mr Kirby. Swainson's speculations may amuse you; the work generally may be of information to you: but beyond this it is worth your notice as it may lead to the consideration of a law for a scheme similar to that adopted for North America might

assured that the course you may point out will be
advantageous to science, rely upon my most cordial
cooperation. But let your sailing instructions to me
& 2-dt^t, j and explicit in **C&A-
respecting money M will be made with your agent.
in this part of the business the visitor should have
nothing to do but to certify to the report i t > l of articles
requiring payments

Throughout the whole of this letter I have
been speaking to you with an openness which
may have led me in some instances to touch
perhaps rather rudely on some particulars but
on none have I offered an observation that did
not appear to me to me to call for your consideration.
I have been, as it were, thinking to you '~*6..
of ^* ^ yourself: accept this the only apology I can offer,
as an excuse for any awkwardness that may have
appeared to you less conspicuous & less delicate
than under ordinary circumstances might have
occurred in my correspondence with you. In
this tone too I have spoken of living men of
their living businesses to you as to myself & these
observations, I am sure, will never pass beyond
yourself.

Bele then rest for the present the fauna

*A

of Nepal. Until I hear from you in reply
to this, it seems to me that no further steps
should be taken. What more further steps
shall be depend on your instructions.

Yours very truly

B. A. Johnson Esq. () Edward T. Bennett

Proposal to publish by Subscription a Work
— on Nepalese zoology

A Gentleman who ^{resides} in an advantageous situation ^{for the} collection and study of the various Insects and Birds of the hills proposes to publish by subscription a Work calculated alike to satisfy the scientific and the sporting communities.

Drawings of each subject will be given either separately on a large scale, or with the text on a small one, as shall appear to be most generally approved with reference to the opposite advantages of cheapness and adequacy of illustration. Opinions are required on the point — Should Gould's Century be the model, or, a modest Octavo or Quarto?

The Drawings are admirably faithful, and comprise some 200 Birds and some 100 Insects and their Allies. The text will furnish all procurable information as to the habits and manners of the subjects portrayed by the pencil, and the Author will have the assistance of able co-operation in England where the Work will be got up in the best style.

It will contain almost all the Game Birds & Beasts of the Bengal Presidency, which are no where so common now-a-days as in the Nepalese Terai.

The Prospects of Nepalese zoology is printed in the Asiatic Journal. It also contains a list of the Insects intended to be drawn and described.

List of Plants

Calcutta December 3rd 1836

Collected on the Kishoree Hills

Red on the 13th Dec^r in letters
438 from the 5th Dec^r John Sibson

Plant
No.
of
Lands

- 1. 1. *Orchidaceae* fine sp. found growing upon trees on the bank of Dooa Poree.
- 2. 2. *Orchidaceae*. like *Panmuthera* in habit. Parasite found about Allypore, before about
- 3. 3. *Lychnidiam* sp. flowers fine & very white, with a tinge of Orange in the eye. Parasite found about Cherra.
- 4. 4. *Plumothallis stansomphala* ?
- 5. 5. *Vanda* ? Spals & petals greenish. Lvs black & cold allypore & Nungt. low. Parasite. flowers white containing a small saccolarium and a sarcocolla like plant with other Orchidaceae.
- 6. 6. *Orchidaceae*. a fine sp. with very long fusiform Pseudobulbs. flowers in November. Grows upon Rocks and Trees about Nungt. low.
- 7. 7. *Lychnidiam giganteum* ? different from 6 & 8 grows upon trees about Allypore. flowers in October.
- 8. 8. Containing Plants of 6 & 7 only.
- 9. 9. *Vanda* trees ? grows upon trees about Allypore contains 1 plant of No. 2 also a *Myriophyllum*

4h .

17 y L>L<4u^k!* like Sunda trees in habit curious sp. found about a Vangklaw. Rocks & Trees.

8 V Dendrobium with large stems. Containing Dendrobium densiflorum on ... with curious habit ... as upon rocks at a Vangklaw & Plants of N. 12

*9 11 Dendrobium densiflorum. Dendrobium, a fine sp. grows upon Rocks & trees about a Vangklaw, this is said by the Khoras to be beautiful fragrant with which by ornament their hair

12. Contains Plants of N. 12

*10 } 13 Dendrobium densiflorum found also about Chorra ^/, - ut allyrang " r

105 } 14 Calyptra elata Wall

107 } 15 Calyptra ? before sent Containing also a N. 14

108 } 16 Calyptra ? before sent A ^ - ^ ^ ^ ?

109 } 17 Calyptra ?* found upon trees about a Vangklaw

23 18 Dendrobium long slender stems some thing like C.
Pinarctic grows upon Rocks & trees about
Nangklew

24 19 Dendrobium grows in tufts upon Rocks generally but
also upon trees about Nangklew
Containing Plants of a Koyman the parasitic
Vanda trees.

25 U* Orchid. . . . yUx6
Plants of t i

26 20 Orchid. with ^{^6U} bulbous roots named ^{<-*W#}
bulbs from ? ^Jk. trees about all of

27 21 Orchid. ^{<./*~>* ^} on trees on the banks of Bura River
also about Syria Ghau >

28 22 Orchid. s

29 23 Orchid. found at Nangklew
Containing also other Orchid. Plant

30 24 Orchid. delicate sp. grows in tufts upon Rocks

31 25 Orchid. grows upon the sides of Rocks ** <t about, \?

32 26 Contains Pl^{jt^y}. I^{26.41} also another Orchid.

33 27 Caloglyph an ^{^n&P} ^{^M^'/u\£JM,} arim

34 28 Orchid. Pollophyllum before sent.

26 29 *Dendrobium* sp. before sent
27

2800 *Dendrobium* before sent

2901 *Liparis cuspitosa* & *Alcyonanthus* Parasitic

3000 *Orchidias*, grows upon trees in the Banks of the
River -

3100 *Obionea* large kind bearing long brownish
spikes of flowers -

3200 *Ditella*, something like *Orchidifolia*

3205 *Orchidia*, a Curious sp. grows upon trees in
valley of the River. Containing
Plants of N. 100 & small *Orchidia*

3300 *Orchidia* sp. found about a Yangtze low -

3400 *Orchidia*, several that are found at Yangtze

3405 *Orchidia* from the Banks, **FLCfj^***, River

3500 *Leptochylis sanguinosa* -!

3505 *Orchidias* several sp. found Yangtze

containing Plants of N. 30

3600 containing Plants of N. 40

3700 *Calceola maculata*

3800 *Calceola Wallichiana*
39

*50 40 *Orchidea*. Five Sp. found upon trees on the
banks of Bura Pooce

51 - Containing Plants of Nos. 40 & 41

44 *Orchidia*. *Calogyne* ?

52 Contains *Eria* Sp. & another *Orchidia*
before sent -

*53 45 *Orchidia*. also *Polysta* and one other *Orchidia*

54 46 *Eria* ? Plentiful about Myrang.

Contains also *Gymnidium* before sent

*55 *Dendrobium* Sp. with long slender stems
Plentiful in most woods about
Lhoma -

56 *Dendrobium densiflorum*, *Calogyne*
interrupta L. Sp. *Gymnidium*
and several other *Orchidias*
Plants before sent -

Mr. F. Johnson
East of Maple Hill
per that from
Chas.

2nd Dec 1836

[Faint, illegible handwriting throughout the page, likely bleed-through from the reverse side.]

London & Continent Company
King William St City

Sir,

I have the pleasure of sending by direction of
Prof. R. ****&(tu>^//g** samples of India Rubber of the quality
and thickness that is ***t +.* * * >** suitable for the use it is
put to in this Country for Elastic Materials, many
thousand tons of which **4. i « C * * * * * " ^-w**

The natures of **t ^.,** from **4&1 « ^ / 5 - * "**
forming sample cones. make a clay shape of the form
of the bottle and when the **£*|*** mould is dry, ***/<+^**
in the juice which excesses from **£A** it, and that is re-
peated until after each successive layer (which is
dried previous to another being laid on) gives it the
thickness desired. There are from 30 to 50 layers upon
each bottle. by process the clay mould is then broken
and got out at the neck. It abates the making of
these moulds, as much as to get a bottle **~*/L/***
of India Rubber for **tt** purposes, I have
sent the accompanying wood mould, which should
first be dipped into clay water so as to leave a thickness
of clay when dry of about 1/16 of an inch, to prevent the
India Rubber from sticking **r> ' * y s m . . .** for the dipper
into the solution and coating after coating dried, until
it becomes of the required thickness (about 1/8 of an inch) It

will be then removed from the mould, and the same process again repeated. The moulds sh^d not be dipped higher up than the line marked upon it.

Great care must be taken, that the layers are put on so as to form one solid mass, and not to separate. The bottles or pieces so formed should have as smooth exteriors as **~ / y & * & . * * *** water marked with spots or denises.

The 'London & Antient Coin Company' offer a reward of £50 for the best samples of water less than 552 lbs weight that may be sent with proper certificates that it was gathered from our East India possessions. I am your obedient servant.

The samples must be sent to the Secretary of 'London & Antient Coin Company' (London)

The eyes at the top of the wa **r**. moulds are to hang them up to dry.

Copy
of the
London & Antient
Coin Company
of the 18th Decr 1756.
The Letter is
in the
original.

Finally I have prepared up a box of American
wood timber. Lots of the West India wood
that of being ^{..*} ~~scarcely~~

The above supplies are contained
in two covered plank chests, two boxes and
three **Sy,*-** will be embarked as soon
as I receive the shipping order for which I
have made ^{the requisite} application yesterday.

I have already alluded to the extra-
ordinary number and variety of timber and
otherwise useful trees which abound on the
coast. In order to verify this **K.**

y now only refer to the late Commissioner
Mr. Maingy's list of 102 sorts natives of
Martaban, and 175 of Siam, a copy of which
was communicated to me in a letter from
the General Department dated the 29th July
1822.

I humbly suggest that it would
be of great service to the **H.** to be supplied
with a copy of the list in order that he may
be the better able to ^{facilitate} ~~facilitate~~ his researches
into the ^{particulars} ~~particulars~~ and thereby furnish

* : : cause of identifying the different sorts
of wood by forwarding to Bengal dried
specimens of the respective trees which you
will

specimens of the respective trees which you
will

Some of the largest timber trees in the
^&*JU and in j£ species especially among the
family of plants called Dipterocarpaceae
which is deserving of notice in another
part, in as much as it yields both resin
and wood. ^{the} ^{tree} ^{is} ^{the} ^{most} ^{valuable} ^{member} ^{of}
that family, or a species closely allied to
the same, grows at Mualangno. Mr. Murray's
travels ^{do} ^{the} ^{necessity} ^{of} ^{my} ^{entering}
into further details; they leave, however, to
add one or two remarks on the part of my
subject. It may be expected that the Coast
to which St. Palle is proceeding is as fertile
in the production of Bamboos as Mauritius
where the "Cory" ^{is} ^{well} ^{known}, both for its
height and diameter is found, not to mention
several other extremely ^{useful} ^{articles} ^{derived}
of the common purposes for which the ^{^t**/*^}
ful article is employed. I have to observe that
there is ^{at} ^{present} ^a ^{great} ^{demand} ^{for} ^{short} ^{and} ^{tall}
tall Bamboos, such as may perhaps be met with
on hills, for ^{of} ^{panace}. Length, straight-
ness of growth, toughness and lightness are the
qualities to be kept in view in this respect. ^{*J<}

printed journals

extensive cultivation and the opportunity we
should not be lost by preparing a joint
view at hand where a tract should be made

*1**' Tenacious I have accordingly, in
with a view to the improvement of the Tea Compositions and in
consultation with Mr Gordon, enriched three
of Tea seedlings. Two of these have very recently
been received from China and one of the Black
kind from Hon to and United a third contains
plants raised in this country from
China seeds, probably Black and
the eastern source that in the year 1800 on the
same year from Apurva. Mr Gordon
has paid great attention to the
of Tea in China and the necessity of affording
the above line of distinct sorts
of soil and water. The Chinese
Black Tea should all be placed in a peculiar
soil without any manure ^{but} a little watering
the Apurva Tea (supposed by Mr Gordon to be
of the best kind) should have a rich soil
and require to be watered. It is very desir-
able that the China Teas should be divided
among different sites, so as to afford them
a variety of aspect, elevation, soil and thus
The course of husbandry pursued

Tobacco and Sugar Cane are two articles for which the country is eminently suited. In regard to the former we know that an extensive cultivation is carried on in Java although it is of no very good quality, and the excellent sort that is produced at Sansouy is still further encouraged the hope that Europe may be enabled to yield a superior sort. The East produces a sort of fine purple yam and a variety of the Turmeric, and Cardamum tube.

much useful information may be obtained likewise plants affording fine cordage. In Java there is a sort of Sterculia the inner bark

for J x^o * 5 <>> typing packages (see it occurs also in the lower provinces. The Pineapple grows in such vast abundance about Bangayon as if it were an indigenous plant, it is of a superior quality, and deserves to be introduced here in order to increase our scanty stock of fruit of that kind.

Detailed information regarding the country and the drugs within the borders of such countries, such as plants, medicinal, being valuable indigenous or imported, and to very valuable and scarce especially plants, to which attention will be valuable, also mentioning the drug

Diagnosis

\wedge_r / \wedge_i r_{\leftarrow} $/ \wedge$ $> \wedge$.

It is needless to say that the identification of the plant yielding the medicine or drug, whenever this can be effected, is a matter of

great importance, and it is to be urged the importance of obtaining correct names

of as many plants and useful articles derived from them as possible. This species of information is not easily procurable,

but with ^{due caution} skill and perseverance the imperfect which is so generally practiced in respect to native names may in a great degree be remedied.

As a general rule I would beg to observe that unless there is very strong grounds for supposing that the name given is the real one, and not fictitious or coined for the occasion (which may be ascertained by comparing the name received from more than one source) it is better to avoid altogether attaching a name to specimens, and to refer to the name as indicated.

recommenced in Singapore. The
Mangrove and Curian would be equally
suitable, and it is very probable that coming
from a climate intermediate between
the humid ^{one of the} Malayan Archipelago and the
comparatively dry atmosphere of Bengal
these fruits would succeed better than has
hitherto been the case. The Mangrove
which has been introduced here from Penang
grows tolerably well; not so the Curian, ***a£.4£**
we have great difficulty in keeping alive.
The more plants are sent of both these trees
the better. Seeds of them may be even in
cases and forwarded in that manner. We
have

kl*S • Labors They /£ me to recommend that
a quantity of ^{r>C n—iC*} fine paper and
Wax cloth may be supplied to him from the
Public stores, and as he will require a very
L<jt^j^t- antity of paper for his botanical spe-
cimens I should think 20 Reams of the former
would not be too great a quantity. • <r <*>&€*- 4*4
to be allowed to recommend he • if ***y supplied
with a Mountain Barometer and a Thermometer
Finally I hope to be honored with the Con-
tinued correspondence and I shall be truly
gratified if I can by any means be of服-
the service in promoting the objects of his
interesting Profession.

H. C. Dalrymple Secretary
7th January 1837.

Yours
W. Wallis Esq
Lieut

Do more than hint at the ^{need of} ~~great~~ ^{importance} of Schimper's preserving specimens of all the plants
which he meets with during his researches, and
when it is possible to procure both the
plants in their ^{different} ~~various~~ stages of flower and
fruit and taking copious notes on the spot
of all the species he meets with, at least
those that appear most rare and curious,
or do not admit of being well described
in their dried state. ~~For public purposes~~
Should plants be ^{collected} ~~preserved~~ at least ^{five} ~~two~~
specimens ^{fresh only} be reserved, ^{wherever possible} for being sent to
the hands of the Courts of Directors ~~placed~~ at
the disposal of the Government. None
of such plants as *Asplenium* *Trichia* CIM 4
fruits ^{1 >} also ~~be~~ be ^{unavoidably} preserved
in country ~~specimens~~.

How come ~~see~~

have got the *Thoungan* (Hespero-locata) ...
which is one of superb timber tree of the
coast, but we want several other species
of that genus and of many other trees of
tropical growth which abound there. There are
several sorts of *Polypodium* plants both *terrestris* and
epiphytes evergreen, and they may except to the
Andromeda may be among the scattered
plants that are forwarded to ...

Memorandum
for Mr. Welch
1st January 1837

Revised

y*~t*frf ((hJIT /' osh and seeds supplied to
Schimper, proceeding to the Coast of Tenoban

Growing Plants

Chest No. 1

No. 1 - 54 Tea seedlings of the Woa &c Black Tea
recently received from China by the
Tea Commission

Chest No. 2

No. 2 - 41 Seedlings of Anhai Black Tea. No. 1

Chest No. 3

No. 3 - 17 Tea seedlings raised in his garden
in 1835 from China (probably Anhai)
Tea-seeds. These may be distinguished
from the following by their being contained

in 3 flower-pots plunged into the soil
in the chest.

No. 4 - 5 Tea seedlings raised in 1835 in
his garden from seeds forwarded
by Capt. Jenkins from Tongva in
Apau.

Chest No. 4

5 - 6 Litchie

6 - 2 Malda Mango, grafted.

7 - 2 Alphonso do do

8 - 2 Laurus plumbus

9 - 2 Coccoloba

- No 10. 1 Scotch white Bellie
 11 2 *Urtica nivea* Willd. Calce Kemp (*Urtica tenuis*
alpina Pers.). It grows wild in the hills, but
 it is not known whether it is indigenous
 also in the lowlands.
 12 2 Gogue Name (Honey pot)
 13 1 *Melaleuca Casipate* Pers. The genuine
 Casipate tree, and different from the
 Leucadendron tree.

Nest No 5

- 14 - 2 Peachey Orange grafts
 15 - 2 China Peach
 16 - 2 Dwarf Peach
 17 - 2 Nectarine
 18 - 2 Guava, large sort.
 19 - 1 *Heliotropium peruvianum*
 20 - 1 *Vanilla aromatica* Sw. This plant should
 be placed close to a tolerably shade tree, when
 taking it out of the pot in which it is now
 growing, and gently tied to the trunk of the
 tree in order to encourage it to strike
 roots on the bark. It should be watered
 sparingly, and only by sprinkling
 the water on the leaves, and the soil should
 be ~~watered~~ and rarely should the earth be
 watered.
 21 - 2 *Cactus coccinillifer* Linn. ~~The propagation of~~
 ment is not practicable, but the country is
 nearly, if not quite, as good, and requires only
~~water~~ and proper ~~management~~

22 - 2. Tucha-pant; a drug so called, much used by the natives for its perfume. It is a Labiate, but the genus *ly* named as the plant has only 1 fl. come into the garden and has not yet flowered.

- 23 - 1 *Pandanus inermis* Roxb. *longifolius* Lamour.
- 24 - 1 *Piper nigrum* L. *Malaga* of the Philippines where the tree is indigena
- 25 - 1 *Scaevola taccada* Willd. *the fruit is edible and is a native tree is indigenous*
- 26 1 *Scaevola Sapota* Roxb. *Sapota nigrum* flowered.
- 27 - 1 *Patna* Fig.

Chest No 6

- 28 - 2 Red Guava
- 29 - 2 Bencoolen Orange
- 30 - 2 Lillat silo
- 31 - 2 *Ficus* *lucida* or *Allogica* long leaved sort
- 32 - 2 Silo Do Round leaved sort
- 33 - 2 *Ficus* *disticha* Roxb. Like Rubber tree
- 34 - 1 *Scaevola pumila* Lamour
- 35 * - J *Olea papaua* *lanceolata* Lamour *scented plant*
- 36 - 1 *Papilionia racemosa* Roxb.

Wm. L. G. L.

(copy)

London 9th 22nd / 1834

... in the Asiatic Journal of the
Royal Asiatic Society
on 10th June Sir Allan Johnston in the Chair.
Letter read from E. R. B. to Sir A. J. expressing his
wish to publish his Drawings and a letter with the
patronage of some public body - and the aid of some
man of science selected by such * * * * * with
whom he might cooperate in some such * * * * *
as Richard ~~did~~ with Lovison

... his purpose was "to marry opportunity & skill"
("we believe subscription lists" & splendid
and highly useful work are open at the
Asiatic Societies of London & Calcutta and
at the Geological Society - E. L.)

Mon^{da} London August 1836

1 - Called at the Geological Society Rooms, found Mr. C. J.
Bennett was dangerously ill - on application to his brother
(Mr. John Bennett, Balston Street) referred to the Club,
L.S.G. and on enquiring into the custody of the Drawings
and specimens, he went off for the person in charge of them
but instead of the one named (name forgotten) he brought
forth Mr. Gault who said they were all in his care
under injunction to keep them secret and that they were
strictly so kept - he said that it was very material to hasten
the publication of them as while they were lying there
many had become and many more would no doubt become
known to the world through other channels - & that he
himself had had opportunities through other sources
of

of getting specimens or description of several and let
published accounts of them in his work - a Mr. Gould
considered it impossible to produce a full work on
the scale of his own under an expense of £ 8000
deeming that his own tho' all the drawings were done
by himself & family - had cost him £ 2000 - & could never
have been accomplished without this advantage & that of his
daily & hourly superintendance.

Mr. - argued on him and the Sub. Sec. as well as Mr. Gould
the necessity of the Deposit being kept from all eyes -
No "subscription List" here.

Genl. Charles Deane (my Cousin) Secy of the Department
of Ancient Coins & Medals at the British Museum his
opinion was that they were ill placed in the hands of the
Geological Society - and they would stir in it no further
than as might be the means of doing honor to their own
Institution - after saying they should have been sent to
the Museum - but allowing that, except for the purpose of
exhibition there & the honor of producing them, that would
have done no good, he called Mr. Gray of the Museum
producing also the work of Gould & the still unfinished
works of Genl. Mandeville - they entirely concurred that
an idea of publishing in a better splendid style could not
be carried into effect - that known subjects could not be
included with advantage in a work more costly than a
plate work on a small scale all at once, without too much
of time - that it was best to publish descriptions - a plan by which
as fast as coins could be got ready - they to establish a claim to
original discovery without waiting for fresh original notices
or descriptions, which might be supplied when necessary
afterwards - best to do this by Papers in the Transactions
of the Geological or the Linnaean Societies (but the latter

it was observed was too slow) as you have done with some birds
and animals for even of some of these you are not now
the only descriptions.

The Asiatic Journal of July has ~~been~~ ^{referred to} the
Notice of the letter of B. H. H. to S. B. on the point of cooperation
adverted to - not with Dr. H. H. - nothing with Dr. H. H. was
emphatically remarked - in a continued conversation on this point
Dr. H. H. spoke of his brother - Mr. John H. H. - a useful & willing assistant
Dr. H. H. (with original) Dr. H. H. as a useful & willing assistant
& nobody could be better according to S. B. but this supposed
mere Agency I apprehend - & S. B. continued to the end to insist
rather to show every thing on sending forth such detached
& Notices by degrees - but in quick succession as would este-
- which originality -

During the time you have been engaged by particularly
within the last 2, 3, or 4 years the rage for collecting foreign
subjects has been pushed with the greatest activity - not by
correspondence but by Agents sent out by Societies & even
Individuals of this Country & of the Continent - not so much men
of high Knowledge to begin, as active Men to seek, they often
to pick off all manner of subjects - particularly from the
3 favorite fields of the Peninsula - Australia & the Cape -
Mr. Gould has brother now in Australia & Mr. Jardine
is understood to have Agents out in more Quarters than me-

introduced myself to Mr. ^{*} Johnston & was so true
intelligent man who entered heartily into the whole subject
£«« 4JSS£* to find had already written to B. H. H. &
explained his feelings & views - he treated lightly all supposed
difficulties of pub- L- tion - & was of opinion that the work
should go forward at once - but without defining its
size or extent - & he pointed out Mr. Jardine's

(Judith Hall - Everyman's edition) as the most likely person
to cooperate & bring forth the publication - the most able & sensible
& most to be depended upon to overcome all difficulties & to
advise what was & what not to be introduced & on what side
Mr. A. had correspondence upon it with Mr. P. & Mr. J. & it
was understood to have already communicated with
C. H. B. to explain advice & offer his assistance - who it is
represented to be a man of old family & great property devoted
to Nat. Hist. & himself engaged in a monthly publication
on the subject in concert with a severe criticism in
Edinburgh & thus prepared to commence an undertaking
at once with great advantage in any form that might be
agreed upon.

at a 2nd meeting with Mr. A. he produced three copies of the
letter to C. H. B. & offered to send over a duplicate, thus under
more particular reference to it accordingly. It appeared that
Mr. J. had actually set to work to make known the value
of the contemplated work & to impreg the Chair & Exp. of
the B. S. B. & the new four year P. & K. & how desirable
desirable it would be & how creditable to themselves to
give encouragement to a great work while they enjoyed the
benefit of so able & zealous an Ambassador in command of
so great means of illustration the whole subject - to give
their patronage at once & in the right season - while they
might share in the honor of it - & not as Bonaparte
patronized Courier - when he could do without him.

Presented myself to Dr. Henslow at the Museum of the
B. S. B. - from him I found you had written a sort of
Circular to him & other leading Scientists - as well as to
Vigors, & that he represented as creating a difficulty for some
of them to act independently - he had thought of trying
a meeting (i.e. of Bennett, Mr. Vigors & himself) but

Edward Innes

had not set about it - & your the illness of H. must retard
of fact prevent it - but I urged him whatever he might do
or desire - not to lose time - but to send you at least his own
sentiments - & that without regard to such petty opinions
as he expressed to me on the subject.

He seemed strongly impressed, even more than anyone,
with the difficulties in your way - & as all your materials
were ready to yourself on the spot to be decided, & arranged & every
very thing into execution - it was impossible for him to take
any part with you - his own published work he had found -
tho' his own interest in it has lessened the toil, still a most
tedious business, to a degree nobody unacquainted with such
things could conceive, & he had still works of his own (on
Insects I have thought) that engaged his attention.

The opinion of yourself that it might cost
£1,000 probably (500 to 1000 certainly) to display all your
subject in the style of Gould & Jen. Parkwick - that interest
in such a work & the chance of its taking was much lessened
by these & other Discoveries - that it could not answer to
bring out your work on their scale - not the whole of your
subjects (the known with the unknown) on any scale, & that
I did not recommend you to go at most beyond the size of
his own work (Zoological researches in Java) but as to
confine yourself to a smaller (*'fa***-%.^C ***]*-** was mentioned)
to secure to yourself quickly a claim to originality to set your
descriptions go forth immediately in some form or other at the
first great point - without staying for Engravings - to publish
in India first in the Asiatic Researches or otherwise an
abstract of your discoveries - a "Programme" or List of them
without finished descriptions - & then with a view to publica-
tion in England - to decide quickly & definitively first on
the size to be adopted then on the number of subjects to
be introduced which in his view should not exceed 100
Animals & 150 Birds - a selection to this extent he thought
might

might answer your mind to the purposes of science

In the allusion to the style of writing work [^]

these are all ^{• 7t+*s+*} to you

no mention of the communication understood to be shared
with you ^{?ts'ir~} W. S. i. ^{U/} and you should be careful: Mr
S. J. had described Mr M. as a rich man devoting his private
& property to science but Mr M. appeared to think him very
likely to draw you to an extent of expense beyond what he
would willingly share.

5. Called upon Mr. Riggs - but had not the good fortune to meet
with him

^{6. 21} Safe custody of your Drawings & specimens for that number
of them - out of the hand ^{ift-^} the zoological being small had
deemed of the first necessity - & learning from Dr. Howland
that you had given power over them to the Esq. of Belknap
wrote to him at Killington to beg him to exercise his
authority - or to transfer it formally to me - & received
from the Esq. the answer therein sent.

- Looked after Mr. Butterworth Bayly in Derby Street, North
City - but he had given up his house - & was supposed to be at
his Family at Brighton - being out of the Circuit to go

I may add the opinion of an old Indian, altho' not
of the learned (your Mother's good friend Mr. John Stebbins
see ^{i**^i^} it is not confined to him singly, namely that you
should lock up every thing till your return - keep all
& locking up & not trouble yourself with any thing else.

It is considered that Dr. Mitchell's success with his
publication - was above the result of his personal
direction & diligence, with his extensive acquaintance
& means of giving credit to the subject which naturally

its novelty or brilliancy could have obtained for it.

It is clear enough you will say what would be the advantage of your presence here for consultation & action in the origin & progress of an extensive work - more clear than what may be the disadvantage of assisting & leaving to some extent what others may do & what may be left for you to do - after them - when you may have every chance to prevent your entering & walking over the course.

N.B. Saw also Richardson but could &+ get nothing fresh from him either in the shape of information or advice.

Extract

Canterbury Aug¹⁵ 1836

My dear Brian

After detailing my enquiries in London to you & how you came on me on your publication I know not what I can add to any further in the way of comment - still less of advice - I can too well understand with how much mortification you would abandon your hope of putting forth a great & complete work in the best possible form - but now with all the difficulties before you - to abandon or still to cling to that hope is a question no one but yourself can decide.

— as also the rest - what has could be attempted - ** I'm show'd the S^r whether Mr. Jansone may be able to open a road to you trust to
t v p*** of

of the greater or lesser difficulties for ^{y ^} can only be
unfortunate to see difficulties in every ^{.- a +} case with hardly
a glimpse out of the ^{*} - most heartily I wish, ^{*} my be-
ables to decide to your satisfaction.

My dear: Have set down in the order of ^{s ^} my
it was not till late that I was clearly not that Dr. Vigor
was the person addressed in the letter of which you sent
me copy - it was not till the last that I found the Esau
has power to possess himself of your Engravings & with
moment of Mr. Bennett's dangerous illness (how trivial
I do not yet know) it would have been difficult and
delicacy to effect a removal of them, but I shall see to
that of the Esau does not immediately save me the
trouble - hitherto your injunction to me to "carry them
all ^{pf'} if Bennett suffer them to be pilfered" were
not quite practicable in this respect & I had one idea to
show - how could I should ^{<*,t*c} had any charge of
them is unaccountable, except by accident to have
removal of the Museum of the Establishment from
Brixton Street to Leicester square in Bennett's
& abominable in any case, it was the danger of making
them known to any one of the British Museum that
alone disinclined me to consult my friend Hamilton
about them a year or two ago, for I knew no one else
to give ^{y+-.} at good advice on the subject.

Chambrunayor, ce 19 Janvier 1837.

(rec^u 20^e Janvier 1837). —

Paris 27 Janvier.

Monsieur le Capitaine,
J'ai l'honneur de vous adresser ci-joint

Je vous renvoie ci-joint la lettre que M. Richard
Directeur de l'arsenal, *E*^e anique de Bourbon m'a ap-
prisée pour son usage je ne vous envoie pas
autre par usage en m'ayant dit que vous étiez
absent de Calcutta.

M. Rich^{ard} <*> .** sans la spécialité,
un homme fort distingué, et avec lequel les
relations sont toujours sûres et agréables.
Il est parfaitement en position de vous
fournir toutes les plantes que vous pourriez
desirer soit de Bourbon soit de Madagascar
et de vous fournir sur l'agriculture et la
botanique de ce pays les renseignements les
plus exacts et les plus récents.

Si, par la nature de mes rapports avec
le Capitaine des Navires français qui font
la navigation de Bourbon a* -f*m+*As
je puis vous être de quelque utilité pour le
transport de vos plantes vers /*—**',s

à Monsieur le Docteur Wallich, Directeur de l'Institut
impérial, à Calcutta.

Chaussegros, le 30 Janvier 1857.

10^e St. John

dearly patronized by Fitzgibbon
sending Ransing's brochure
on the vegetable
and zoological
of Indian woods.

Mon cher Monsieur,

Il est de votre devoir, l'aim de savoir une disposition
naturelle et générale de répandre les lumières
qu'ils proposent et de contribuer, sans
distinction de nation, au bien-être des
populations; Je vous prie avec une
certaine confiance d'illuminer de votre obligeance
des renseignements qui me sont demandés
sur l'économie des vers à soie et la culture
de morue dans le Bengale. Je joins
ici un état dans lequel j'ai résumé et
indiqué les questions sur lesquelles je desirais
obtenir des réponses détaillées et développées.

Vous êtes sûr de me mesurer, Mon
cher Monsieur, de me fournir des notions
exactes et positives sur les diverses espèces
d'arbustes et de végétaux qui servent à la
nourriture des vers à soie à *4f* & Bengale

à Monsieur Le Docteur Wallich, Directeur des
Jardins des plantes ~ ~ à Calcutta

ce sur la nature du sol, et le signé au
laboureur où ils prospèrent.

Recevez à l'avance, Mon cher
Maurice, mes bien sincères remerciements
pour la peine que vous vous êtes bien
prisée à répondre à ma demande.

J'ai l'honneur d'être avec un
haute considération,

Mon cher Maurice,

Votre très humble
et dévoué serviteur

Ambroise

Chambray, ce 5 février 1837.

Reply 12

Mon cher Monsieur,

J'ai reçu en même temps votre lettre, du 6 ce 7
de ce mois, et je suis honteux de n'avoir pas
dépensé à leur contenu pour vous exprimer

*** > . . . » *fc

de reconnaissance, de bienveillance et de sympathie
que vous voulez bien m'en témoigner, croyez que il
est aussi impossible d'y être plus sensible que je le
suis. Je me suis en beaucoup de relations, qui

vous ont fait connaître, et M. Richard, directeur
du Journal Breton que de Breton, pour lequel j'ai
la conviction que, dans un avenir prochain, les populations

de ce pays, qui ont été honorables emplois pour
en faire une partie, que la France pour que les
affaires soient au mieux de ce qui semble, l'un

homme comme vous, Monsieur, par le monde
pour patrie et surtout à part de la nation
de tous les peuples.

Un de vos amis de Nantes L'Epée a bien
promis de vous remettre une certaine lettre et de
vous la faire parvenir, que vous vous proposez

l'envoyer à M. Richard. Il paraît qu'il a à
un tel point qu'à demi. La Navire a bien

à l'honorable Docteur Wallich, député à la Chambre.

quitter Calcutta et cette occasion est perdue, un
heureusement nous n'en en aurons pas. Je
vous ai joint ci-joint des lettres pour les Capitaines
de Navire Français, la Compagnie, le Directeur de
ce la bien-aimé. Les Capitaines n'ont pas
de nouveau à leur bord, les plants de la grande
qui nous vaudra leur équipage, ce sera peut-être
plus grand bien. Je partirai dans le courant
de la semaine prochaine.

Je me ferai un devoir de vous plaindre l'absence
M. le Gouverneur de Bourbon de tous ces
nantes bien faire pour avoir le jardin Botanique
de cette Colonie, afin qu'il accorde à M. Richer
la protection nécessaire qu'il pourra valoir
pour recommander nos bienfaits. Je vous envoie
particulièrement à ce sujet au sujet de l'usage
des botanistes, le travail à faire et je vous transmette
les instructions qui nous ont été adressées dans
le bas de l'apporter la conservation pendant la
travaille. J'espère qu'il mettra beaucoup d'empressement
à satisfaire à votre demande. Les Navires Français
qui viennent charger le Riz au Bengale, l'Inde

ordinairement sur leur bord, de sorte qu'il sera facile de les faire sauter, sans le secours de la poudre, et de les faire servir à tout usage.

Les capitaines qui en ont promis de prendre des copies de plants pour Bourbon, en ont copié en même temps, le sieur Masson, une instruction pour les prendre à bord de son vaisseau, l'histoire de la découverte de ce précieux minéral.

*^>

f -

Je vous envoie une note à ce sujet qui sera traduite en français, et sera présentée une copie à chacun des capitaines qui en ont planté.

^—L^

Taking Vigors Synopsis Avium, in the
 14th Vol. Linnæan Transactions, as a
 guide, I want only the genera
 thus. Raptores. I want only Circus.
Columbidae. Columba. Bubo & Furnarius.
Indestores. In Fissirostral Tribe want
only Ceryle, Colaptes & Tanyptera.
 In Dentirostral Tribe, I want all but
Muscipeta. Pityra. Gubernator. Edolus.
Ceblepyris. Cinclus. Megophonus. Oriolus.
Petrocincla. Motacilla. Saxicola & Parus.
 In Coraciiform Tribe, I want all, save
Alcedo. Tyrigota. Tyrannula. Thryon. Nucifera.
Pica. Furnarius. Corvus. Gracula vel Guir-
alis. the Duculidae. Scozia. & Ceryle.
 In Scapular Tribe. Fam. Ramphastidae
 none. Psittacidae. none. Psittidae, only Guir-
alis & Picumnus & Colaptes. Fam. Ceryle & Guir-
 Except Tichodroma. Lophophanes & Titta which I
Fam. Cuculidae, I want only Indicator & Poly-
philus & Saurornis & Tenuirostris. Fam
Nectariniada, only Nectarinia. Cinnyra &
only Drepanis & Trochilidae only Trochilus.
Promeropidae, all. Meliphaga ?!*<*/ all ex-
 cept Pomatorhinus.

Order Rastores. none but Goura. Phasianidae.
Polyplecton & the common type of Platyrhinus.
Pedix & Tetrao & these I wish to omit
 or rather, the I should willingly
 if funds permitted, types of Cuvier's Tetrao
Machetes et Tringa as well as of Calidris
Falcinellus et Erolia.

There is a list of the negative kind
 showing what I do want, by marking
 what I do not want.

P.S. pray, get at the Captain of the
 ship, by letter in England. It is of the
 last importance to know whether
 he delivered or not. The enclosed is
 for Cooby's journal.

Recy 27th March - embroy No,
Lows vol 7 11th March

My dear Mauchly

Received the 12th March
from your friend
Prof. Dr. ...

A dear old friend!

Notwithstanding
that you art just now,
I know but ahabiliow,
still venture to desire
that you will forward
the enclosed to our
worthy ally at Neudras,
ycept Cole, begging
him to send me some
copies thereof.
I trust too that you
will interest thy nephew
in the matter of fishes
legions & snakes. Specimens
by shall have, fresh fair,
thro' thee, & all the honour
& glory of describing, as he
covet the whole.

God bless you; be cheerful &
heed not calumnious tongues.
What of this new professorship
of Botany in the Hamburg College
have you any pay?

Thine ever affy
H. Moosman

To
Mr. J. Prinsep Esq
Secretary to Government of
Bengal - General Department

Sir

I have the honor to acknowledge the receipt of your letter of the 5th instant appointing me Professor of Botany to the Medical College, the duties of which post I will do my utmost to fulfil to the best of my ability -

2. In regard to the Boat allowance of 50 Rs. which has been granted to me I am sorry to observe that it is barely sufficient to pay for the crew of a ten-oared boat, leaving only a surplus of 2 Rupees for the hire of the boat itself. Under these circumstances I think that I should be obliged if you will please to grant me a suitable boat, such a conveyance being indeed indispensably required for my situation

at the garden under all circumstances
and still more so in consequence of
additional duties which have now
devolved upon me. My circumstances
will not allow me to keep a boat
conveyance, and as I shall at least
have to go to Calcutta three times a week
without reference to the tide being
against me or not I anxiously hope
that his Lordship in Council will
please to grant me a ten-oared boat
of such construction as will enable
me to do this with some comfort to
myself and with as little loss of time
as possible, and which will admit
also of my writing in it during the
journey. A boat of this description
built expressly for my use by order
of Government in 1807 and I shall be
very grateful if a similar one is
returned to me -

Secretary

Botanic Garden
9. March 1837
A. M. Parker Esq

My dear Sir,
I went on board several
tikka boats yesterday with Mr. [unclear]
on purpose to examine them prior
to the Master attendant engaged
temporarily while the new boat
is being built for me. Only one of them
a two-oared old and clumsy boat was
in a tolerable condition, the rest being
very

very bad and nasty. You will have
heard that for none of these did the man
ask less than 75^{cts} a month; and for
the one which Mr. Spingie thought
might answer as a temporary con-
veyance the carriage demanded
90 Cents. -

Under these circumstances
I think it may perhaps relieve
your mind of some embarrassment
if I suggest now that I have then
latter day's one intimating that a
two year lease is ordered to be
constructed for me, that I be allowed
to draw the 50^{cts} monthly until
the boat is ready, which I hope
will take only 3 or 4 months -

I beg you will excuse
the liberty I take and have the honor
to be

My dear Sir
Yours
Squire J. Wallcut

Mon cher Monsieur V**^

C'est toujours avec une reconnaissance pleine que je
 lis vos aimables et obligantes lettres; tantôt portant
 le caractère de l'étrême bienveillance qui nous
 distingue, tantôt de la haute que nous mettez
 dans vos questions et vos demandes qui servent au mieux
 de nos intérêts et de ceux de nos contraires chers
 et inévitables, obligés *m*

Permettez-moi de vous en remercier et de vous le permettre
 d'après votre prière d'aucun 1^{er} de vous en remercier
 de vos soins de planter des terres sèches et de
 vous en remercier de votre bonté pour être employé
 dans la corvette La Reine. Afin de profiter
 de toutes les chances de découverte je vous
 envoie avec moi la description de deux casiers d'airant
 et de la description de deux autres casiers d'airant
 que vous voudrez bien examiner et me faire part de
 vos observations par l'usage de la plume, et de votre
 bienveillance à l'égard de la Reine.

Ayant à régler les dépenses faites par la
Banque pour la vente de Bengale, j'ai
pu me procurer la bonté de vous envoyer la
liste des frais occasionnés par la vente de

la vente de la graine de murier, que vous avez
été l'extrême obligeance de faire préparer pour
être livrée au Jardin Botanique. Je vous prie
aussi de me faire connaître à qui j'ai fait
payer le montant de ces frais à Calcutta.

Monsieur T X C, commandant Baillou, a
composé un très bon aperçu de la beauté
et de la richesse du Jardin Botanique de
Calcutta, et surtout un vœu admiratif
pour la qualité personnelle de l'homme qui
le dirige. vous saluez que ces vœux sont
désormais gravés dans mon cœur.

Veuillez me, /ir--*+/*,* Daff.....

To,

M. J. Ponsop Esq.
Secretary to Government
General Department

Sir,

I request that you will do me the favor to lay before the Right Honorable the Governor of Bengal the enclosed Original letter just received from Captain Vaillant, Commanding the French Corvette La Bonite, dated yesterday, because it relates to a present which accompanied it, and which as I cannot but look upon it in the light as being made in behalf of the French Government. I deem it incumbent on me to place at the disposal of Government.

The services of which Mons^r Vaillant is pleased to speak in terms of such flattery but wholly unmerited praise were rendered bona fide as a matter of duty on my part and were especially due on so interesting an occasion as that of a Botanist arriving in this country on a voyage of discovery on a Foreign Government's behalf. I accordingly enclose such plants seeds and specimens

✓ A'fa sutf,* r/» on and liberty, Prof. ...

?&'

specimens as were especially desired for being
 imported into France by the two gentlemen
 named above, and by the Honble the Government of
 Chandernagore, among others three cases of
 Mulberry and other silk worm plants, three
 cases of various other growing plants, **3**
 large and two small boxes of seeds.

The present alluded to above con-
 sists of an extremely elegant tea set of
 several pieces, namely

- 1 Dozen of Saucers
- 1 Sugar B.
- 1 Milk "
- 1 Creamer

besides a large japanned tea Tray

Expédition
de la
Bonte

A bord de la Bonte, ⁱ le 11 août 1837

Mon cher Monsieur

A la veille de quitter les bords de l'Angly,
il m'est bien agréable de vous exprimer tous mes sentiments
de gratitude pour l'obligeance parfaite que vous avez eue
à m'envoyer l'Expédition de singes intéressants pour la
botanique et à me procurer différentes espèces de minéraux ou
autres végétaux curieux de l'Angly pour la nouvelle
des vers à soie.

A mon arrivée en France mon premier soin
est de faire connaître au Gouvernement de Paris, la liberté
que vous avez bien voulu m'accorder de vous faire participer aux
richesses botaniques rassemblées par vos soins dans le superbe
établissement que vous dirigez d'une manière si remarquable
et si favorable pour les sciences naturelles.

Je remercie M. Monsieur Valenciennes, qui a l'obligeance
de m'en charger pour vous le offrir, quelques produits de notre
Industrie nationale, je me plains à croire, Monsieur, que
vous voudrez bien les agréer comme un souvenir de l'Angly
de la Bonte de l'Angly. Je vous rappellerai que le
Capitaine Vallant et plusieurs de tous votre mérite en qui il me
sera toujours la mémoire de l'offerture de l'Angly que vous
lui avez fait avec qui ont personnellement fait partie de l'

expédient placé sous son ordre.

Je vous remerciera bien sincèrement, mon cher
Monsieur, tous mes remerciements, et je vous prie
d'agréer l'assurance des sentiments de reconnaissance et
de haute considération avec lesquels j'ai l'honneur d'être

Votre tout dévoué serviteur

Le Commandant de la corvette
de S. M. C. la Bonité

We the undersigned individuals of our own free will and accord here by consent and agree to proceed to the land of Mauritius ^{& £} 6 * & CO* as the servants of M^r ^{upon as we may be} transferred to by mutual consent to be declared before a public Officer to be by him or them employed in the cultivation of sugar, tending cattle, Repairing roads, and generally in ^{all} the customary work of labourers in the said Island -

We engage to perform willingly & diligently our said duties from daylight & evening with the usual time allowed us for rest & food, and should any of us of at any time during the period of the aforesaid unable to perform our duty from sickness or other inevitable cause we relinquish all claim upon our said master ^{djft^4*f*C*?} during the time we are absent provided we are found in food and clothing while so absent from work.

We further bind ourselves to serve the said M^r ^{Adm} L'Bellegie for the full time of five years from the date of this agreement.

In Consideration of the Services aforesaid to be well and diligently performed by us we accept the terms offered viz. The Sum of £10. Five p^r. Month with the undermentioned food and clothing viz.

- for Diem Rice - - - 1 lb Salt fish 1 1/2 D^r
- Shall - - - 2 D^r Tobacco 1 - 5^r
- Biba & Coe. - 1/2 D^r Salt 1/2 D^r
- 1 Annam 1 Bengal Blanket - 1 Lascars cap
- 2 Shirts - - - - - 1 Wooden plate
- 1 Shanty Jacket

also medicine and Medical attendance -
On

On the termination of our period of leave
should we be desirous of returning to Bengal
agreed that our said employer shall provide us with
a free passage should we however then decline
returning we release our said employer from
obligation.

We hereby acknowledge having
received from Mr. A. Sandys the agent of
Messrs. L. & Co. Six Months wages in advance
consideration of which we give up all title or claim
to wages until the expiration of Six Months from
the date of this agreement.

We finally agree that in all
cases where any of us should commit a breach
of this engagement to abide by the decision of a
jurisdiction awarded for such offence or offence
by the proper authorities of the said Island.

In witness whereof we the said parties
to this agreement have hereunto set & subscribed
our respective marks at Calcutta this 15th day of 1822

The undersigned being duly authorized
& empowered by Messrs. L. & Co. to engage
the undermentioned parties consent and agree
his behalf to the terms of the foregoing agreement
hereby ratifying and confirming the same.

When I arrived in England the Duke informed me that
he had had an interview with Mrs Wallis -

Chatsworth

Dr. Wallis

October 21th 1837

(21)

You will think me rather negligent as I have not written to you soon to inform you of my arrival in England, but when you know the useful reason you will not for a moment attribute it to negligence. I little thought when leaving Calcutta, at which time I was in such joy when I reflected on the splendid success with which I had been so highly favoured, and at the anticipated success of arriving safe with all my valuable treasures in England, that the first news I should have from my friends would be that of the dear ^{! *S / my Father} death. I have with the deepest regret to say was the case. What distressing and melancholy news was this to await one who had the greatest respect & affection for a Parent, that was so dear to him, and who was so good a Father, nothing in this world could have been so ruinous on ^{^ ^} us as was this most unfortunate event ^{r ^ .} almost broken-hearted. Just about the time I arrived at Calcutta from Chirrapoonjore my Father died. Could I but have seen my Father when I should have been a happy man, but now I am deprived (but I hope not for ever) of that, the only gratification I wish for, I have his last and a Mother to console me on this most truly lamentable loss.

I hope you will excuse me writing a very long and detailed account of my arrival in England, and of the things which accompanied me [^] . < I will proceed briefly

briefly to state a few particulars relative to the
plants, I am happy to inform you of information
on the voyage home, how the plants were
and the last I believe was from St. Helena
and you will not be disappointed when you see
that nothing could arrive in England after so
long and tedious a voyage as that from St. Helena
more beautiful order and preservation than
the whole of my ^{any} collections, and I do assure
that the Duke of Devonshire was delighted beyond
everything with the plants, and he said in the
warmest language possible, that he could not
express enough of his satisfaction of the manner
in which the ^{the} mission had been conducted and
fulfilled, and ^{*f} to it had [^] surpassed his
language expectations, only one thing connected
with the mission that he did not approve of
was its seeing several Dichroites and other
in different collections in England in plants
and before he himself possessed plants of the
same kind. (Several of which he had purchased
at 10 Guineas a plant) and afterwards I saw
the same plants from his own collection
whom he said the others must have been
and he thought that he might with propriety
have saved first, then he should have
that in seeing them elsewhere and he
have done all in his power to have
the plants as extensively as possible according
you might have wished, but this is not
worth troubling you with, as it is too
to be recalled.

Falc. chan. and unguis

When I wrote you from St. Helena I thought
that the Duke of Devonshire was very sickly, and
that I expected to lose it. I am sorry to say

that it did shortly after. The one addressed to the
Honble the Count of Directors arrived and was delivered
in a lively and very transient state, and you will be
glad to hear that the Count of Directors so liberally
presented it to His Grace the Duke of Devonshire
and I am happy to tell you that it is, like the other
fine Indian plants that accompanied it, displaying
its fine foliage in the House at Chatsworth
I was unsuccessful in my attempts to propagate it on
the passage, but have since succeeded in rearing
a young plant, which I intended for the
Count of Directors, or rather for their disposal -
Several of the Indians besides have flourished
at Chatsworth, and were very much admired.
I have figured about six species not yet out,
The first others has flourished at Ladysgate, and by them
figured also several £, thus.

I have occasion to write you of
some and are all preparing to Chests of plants. If
be forwarded by the first ship that sails there
for Calcutta, which I expect will be about the
first of November. I shall write by the
ship and give you a list of their contents,
and I shall at the same time annex a list
of our considerations and I have no doubt, you
will do all you can to forward such as will be
most convenient, the first opportunity.
As I did not arrive in England before the 1st of
July, the season is far advanced before the plants
can be properly packed, but another season will
be more to be depended upon as the Duke has ex-
pressed his wish that the Chests shall all be returned
filled with such plants of your consideration
Trusting this will find you in good health as I am
glad to say it has done. I have the honor to
Remain your
Obedt servant

To

J. H. Mack Esq.
Surgeon British Army

Sir
With reference to the retirement
of Mr. Surgeon G. G. Campbell from the 2^d Sep-
tember 1851. I am directed to acquaint you, that you
have become one of the 10 Senior Surgeons of the 2^d
class and consequently to the regulations your name
has been registered as subscribing in the rank
of Lieut. Colonel from that date, on a difference of
donation of £1000 and a monthly subscription of
£100. The former is payable by twelve monthly in-
stallments of £83 6s 6d with interest at 5 per
cent per annum, the latter monthly, and you are
required to discharge your obligations to such an
amount as you may see fit to pay and allowances accordingly.

I have the honor to be

no 1. 1/2 3/5
M. Ser. H.

à Monsieur le Ministre de l'Intérieur
à Paris

Je vous prie de m'excuser de ne vous avoir
pas écrit plus tôt, mais j'ai été si occupé
de la lettre que vous m'avez écrite le 2 février dernier
et qui ne m'en est parvenue que longtemps après
sa date. La lettre que me signez de vous
n'a fait que rendre plus vif le plaisir de recevoir
une nouvelle preuve de votre amitié et de votre

intérêt. Les relations affectueuses que j'ai
avec vous pendant mon séjour dans le
Bourbon sont profondément gravées dans mon
cœur et j'ai été vivement contrarié en
quittant Calcutta, de ne pas avoir pu aller
vous dire personnellement adieu, mais j'ai
été sensible à toute la bienveillance que vous

me avez témoignée pendant mon séjour
et j'ai été très honoré de vous avoir
vu à la séance de la Société d'Agriculture de
Calcutta, où j'ai été très flatté par la part
que vous m'avez prise dans l'un des discours
qui ont été prononcés, et de la bienveillance
que vous m'avez témoignée pendant mon séjour

à Calcutta.
Je suis, Monsieur le Ministre, avec toute
l'estime et toute la reconnaissance que je
vous dois, votre très dévoué serviteur,
J. B. S. J. Botanique de Calcutta.

Le bon Mr. Richard mérite beaucoup plus
ma, en remerciement qui nous ont été
nous nous occupons dans ce moment
faire un second envoi de la cachemire adé
plus considérable que le premier. Ces objets
vous sont remis par Mr. Caillat, Capitaine
la Navire la Thérèse qui en a prouvé
d'un point le plus grand soin pendant la
traversée.

Dans la lettre que j'écris à notre
cher et fidèle Mr. Dill, j'ai dit de même
remerciements qu'il m'a demandé de
j'ai pu obtenir sur la qualité de la cachemire
que nous vous envoyais. Elle n'est pas
fautive, c'est bien la véritable grana fine
qui a été introduite à Bourbon en 1781
Je comprends très bien que l'opinion d'un
homme aussi éclairé que Mr. George Poirier
a pu faire naître des doutes à cet égard, et
il y a lieu de penser que son erreur vient de
l'altération que la cachemire qui nous a été
envoyé a pu éprouver pendant la traversée
de Bourbon à Calcutta. Ces insectes qui

... l'au... l'au... l'au... l'au... l'au...
Caractères de la grande fève, telle qu'elle en existe
par les auteurs de notamment par Thiery de
Ménauville qui l'a trouvée sur sa terre d'Amigny,
ni par ailleurs.

Je vous remercie beaucoup de la brochure
que vous m'avez envoyée sur la préparation et la
culture du thé noir dans la province d'Annam. Je
sais toute la part que vous avez eue à enrichir
l'Inde anglaise de cette riche production, mais
comme vous l'avez vu vous même, il y a lieu de
craindre que si le gouvernement abandonne les
expériences qu'il avait entreprises, l'industrie
particulière n'arrive que très lentement à
améliorer cette espèce au point de la rendre propre
à la consommation des classes supérieures de la
société.

Mais n'avez-vous pas, à votre jardin Botanique,
des plants de thé. Si il vous était possible de nous
envoyer des plants de thé [?] de l'Annam, mais de
la Chine, nous nous ferions beaucoup de plaisir.

Je suis heureux d'avoir contribué à établir
par le passé une grande bienveillance, les relations
d'échange qui existent entre nous deux jardins.

Principally
Secy to the Government of Bengal
in the General Secretariat

Sir

I regret being
under the necessity to bring
to the notice of Government
the following case of gross misconduct
on the part of Mr. Masters,
the Head Quarters of
the Institution

Enclosed, they have
transmitted the copy of a
letter which I addressed
to Mr. Masters on the
10th Inst., conjointly
with two other gentlemen
who, with myself, had
been attached on some
recent pamphlet, there
alluded to. The letter,
however, cannot be
understood without
some

some ^{explanation} ~~unpleasant~~, and this
I have the honor to ~~assure~~
furnish in a concise
and clear form, in the
accompanying Abstract
from the Proceedings of
the Agricultural and
Horticultural Society
of India ~~at~~ the 3^d October
but

^A^OkMjU^Cb^l

under daily papers with
the signature of the
Secretary Secretary.

3. It is with pain to
~~the Secretary~~ matters of this
nature ^{to} are the
consideration of his Honor
the Deputy Governor, but
I feel convinced my
meaning will not be
misunderstood. I have

no other means of substantiating
my charge, I have no other
course to adopt on this
occasion.

4. His honor will
please to remark that
Mr. Masters has had the
audacity to make a
Declaration in the presence
of the Court I have already
referred, most seriously
impugning my own
character and that
of other gentlemen. I
entreat his honor to
support this Declaration
with one
in the accompanying

• i***w1_*^

copy of a
Mr. Masters wrote to me
and another gentleman
eleven months ago. He
two

two declarations relate
to one and the same affair,
and yet they are diame-
trically opposed to each
other: the one disclaims
all knowledge of and
participation in that
very calumny, which the
other aims at fixing
and substantiating. Copy
of the answer which I gave
to the letter is annexed
to it.

5. Had Mr. Mather's
statement in the pamphlet
been true, his disobedience
of positive orders from
his superior, and the
deceit he has practiced
are *a2r* *VA&LU* *dL*-*, would
render it impossible **A** me
to

to place the least portion
of the confidence on him,
which is so indispensable
between the head of an
establishment and his
Subordinates, for the
due execution of its
duties. But I declare
on honor that the state-
ment is untrue, and
may one of the points,
to which the joint letter
of the 10th Inst. requires
an explicit answer.
Up to this day no
answer has been returned
— none could be
returned, without an
aggravation of the predi-
cament in which Mr
Barton has placed
himself.

I respectfully
submit

substant that it is impossible
for me **** fit* &** to
with a man who has
condemned himself as

the manner Mr. Mackintosh
has done, and therefore
request the ~~Government~~ of
Government for his remo-
val from this Garden.

I enclose the names
of the persons who
are to be consulted
in this matter.

Your most humble servant
J. W. Walker
Superintendent

H. Post. Garden
22 Aug. 1838

Calcutta August 10th 1838.

Mr. J. W. Masters,

Sir,

A Pamphlet having appeared under the signature of Mr. William Griffith, bearing the title of Supplement to Vol. 5 of the Transactions of the Agricultural and Horticultural Society of India; in which at Page 17 is a declaration signed "J. W. Masters, Member Agri. & Hort. Society of India, bearing date Calcutta 29th July 1838. He who constituted the Committee appointed by the Agricultural Society of India to superintend and direct operations in the Nursery at the time to which the said declaration refers feel called upon to request that you will be pleased to state in the most unequivocal terms, by whose orders, or with whose knowledge the several & various operations of digging, hoeing, weeding and otherwise cleaning the Society's Nursery were carried on?

7th We request you will inform us with reference to that part of your declaration; "and that the Nursery did not exhibit the same untidy appearance on the 18th Septem^r"

"visited by

the Secretary,

"exhibited on the 21st of August when visited by D. Griffith" what alterations had taken place (as we do not understand the exact meaning of the term "untidy") and whether during this interval you were not desired ^{4^"/} Committee, and repeatedly enjoined by D. Wallis, not to allow any of these

4, A < / * d ~

4 ^ " /

^^uMf^d

those parts of the Nursery to be touched
anemad missions especially applied?

3 Since you have noted particularly the number of labor
employed, you will be pleased also to state whether the
*Extract from Bill's deed in Monthly
under the signature of J W. Thaxter
Head Gardener and paid by the
Secretary in Dec of the Society, New
York

1857 Number of laborers employed.

	Head	Male	Female	Children	Boys	Girls	Total
January	1	0	4	7	0	11	12
Feb	1	0	4	6	0	11	12
March	1	1	3	6	0	11	12
April	1	1	3	6	0	11	12
May	1	1	3	6	1	12	13
June	1	1	3	6	1	12	13
July	1	1	3	6	1	12	13
Aug	1	1	3	6	1	12	13
Sept	1	1	3	6	1	12	13
Oct	1	1	3	6	1	12	13
Nov	1	1	3	6	1	12	13
Dec	1	1	3	6	1	12	13

formed the establishment for the
of August 1857 and whether any
accusation of labor was brought
to bear on the Nursery before
the date of Mr. Griffith's visit
and the meeting at the house
of the Select Committee and
whether the "certificates" appear
of the Nursery was imposed
by their orders, or with the aid
of any of the vendors, or
individually or collectively,
whether it was believed by

any notes emanating from yourself? These are points on which
we request you will be explicit.

4 As you have declared that the Nursery was in an un-
factory state, when visited by Mr. Griffith, will you say whether
you did at any time bring this, your opinion to the notice
of the Committee or to the notice of the Superintendent of the
of communication, and whether you never thought it a part
of your duty to notice the "certificates"
" & L fjll A-J J

\$>&><+<~64L«<^,,^td<

Your Journal & and how you reconcile the statements therein
in toto fiction?

(Extract from Mr Griffiths Pamphlet)

(Extract from Journal kept by
J. N. Meares.)

"I have been called
upon to do so as a Member of the
Age & Sex Society of India, that
between the 24th of August and the
18th of October 1837 ten Men and one
Boy were constantly employed
in digging, hoeing, weeding, and
otherwise cleaning the Society's
Nursery, and that the Nursery
did not exhibit the same untidy ap-
pearance in the 18th September last
when visited by the Select Committee,
and the Secretary as it exhibited on the
27th August when visited by Griffiths."

"27 July 1837"

"All the Canes, and all the
bottom, with every other plant
of interest are looking very
well. Two fine beds of
Asparagus plants from
American ...
plants of Capt Stirling's taken
from Fernando P. Neary
all the ground is trenched
ready for cropping"

J. N. Meares

Member Age & Sex Soc of India

Calcutta July 29th 1838.

Lastly We request you will state, if from a state of things
which appears by the above entry, to have called forth your
unqualified praise in the 27th July, such a material change
took place in the aspect of the Nursery as to make you
declare that when Mr Griffiths visited it on the 27th August

Journal of Proceedings at the H.C. Botanic Garden on behalf of the
Age & Sex Society of India

it bore an "untidy Appearance" You can in any manner
for such Change?

Did it proceed from relaxed vigilance on your part since
the 27th July when you expressed so favorable an Opinion
things in general, or to what Cause do you ascribe the
change of Sentiment? On the other hand as the Nursing
declared by you to have as suddenly $\wedge \cdot \sim \wedge f \gg$
"untidy" State after Mr. Giffith's visit, as it had before
into between the 27th July and the date of such visit -
are requested to state, of greater vigilance on your part in
the Cause, or owing to what Circumstances this singular
fluctuation of Opinion has been effected?

Or in other Words -

With the same Complement of Labourers, as when the Nursing
described by him to be in a promising condition - how do you
account for its (supposed) unfavorable State, and for having
allowed it to get into such a State at that particular time
when Mr. Giffith's animadversions appeared - And by what
extraordinary Means was it brought back to its former
admitted promising Condition when visited by the
Committee?

Yours
Yours Obedt Servt
(Signed) W. Wallcut M.D.
W. Stearn
John Bell

To Messrs N. Wallich Esq. M.D.
and John Bell Esq.
Dear Sirs-

Allow me to address you on a point, which
at present gives me a great deal of uneasiness - From
the apparent angry tone in which Mr. Bell addressed me
on the subject of the Ganges when the Association were last
met in the Society's Meeting, (for which I could not then
account) certain remarks which have been made
by Dr. Wallich since that time, I am inclined to think
that you suppose that I had some hand in writing, or
advising others to write the letter lately published in
the Agricultural and Horticultural Society by Mr. Griffith.
I am further induced so to think from the opinion
of a friend confided to me last evening, in whose mind
the same idea had occurred owing to an expression made
by Dr. Wallich yesterday - Should this be the case, allow
me to request that you will kindly remove the unfavorable
impression from your minds, for I can assure you that
I positively know nothing about the affair until I heard
the President read the letter at the last meeting, and I
am certain that no member present could possibly feel
more annoyed than I did, being, confident as I am that
no more effectual means could ever be adopted in order
to cause unpleasantness between a subordinate Officer and
his Superior - and indeed I think it must appear
evident that I could not by any means approve
of the measure which has been recommended, as it

EV -52) ^ C

t-^fc2Q ^~

most inevitably be a source of continued trouble and
annoyance to me. I shall be glad to learn that
these are unfounded and that you have not formed
such an unfavorable opinion of me. I trust you will
pardon me for addressing you on the subject, and all
is to remain.

Yours respectfully
J. W. Walker

Robt Gordon Sept 22^d 1837

Sir

Tuesday 22^d Sept 1837.

Your letter addressed to me and Mr Bell conjointly is
unsatisfactory to me. What I said yesterday afternoon, in
the Age: Treasury Manuscript I perfectly well recollect. Indeed Mr
McCallagh, who was present at the time, if he had read the
manuscript and falsehoods that had been levelled against me and the
Gordon, and I expressed my hope that the names of all those
concerned in them might be made known.

Mr Bell is in town, but I must observe that, so far from
uttering any angry remarks about the Genoa, or intending to
do so, Mr Bell was much pleased at the extract I had given
from the Manuscript Book respecting the Constitution of the Bank, on
days previous to the time, to which you allude.

I will not say more at present, except your letter will be laid
before the Treasury Committee which as I told you yesterday will
hear this afternoon. The Committee consists of Messrs Bell and
myself. You must be aware that you heading the letter as
"Private" cannot expect it from this corner in the first instance.

To
Mr Messrs

Jan 4.
J. W. Walker

Calcutta 21st August 1838.

The Hon^{ble} Sir Edward Ryan
President of the Leg^l Society of India

Honorable Sir We are compelled to bring to your
Notice the enclosed copy of a letter addressed
by us to Mr. J. W. Masters on the 10th Instant.

To this letter we have received no reply, &
indeed none could have been returned without
Mr. Masters placing himself in a still more humili-
ating position than he already occupies.

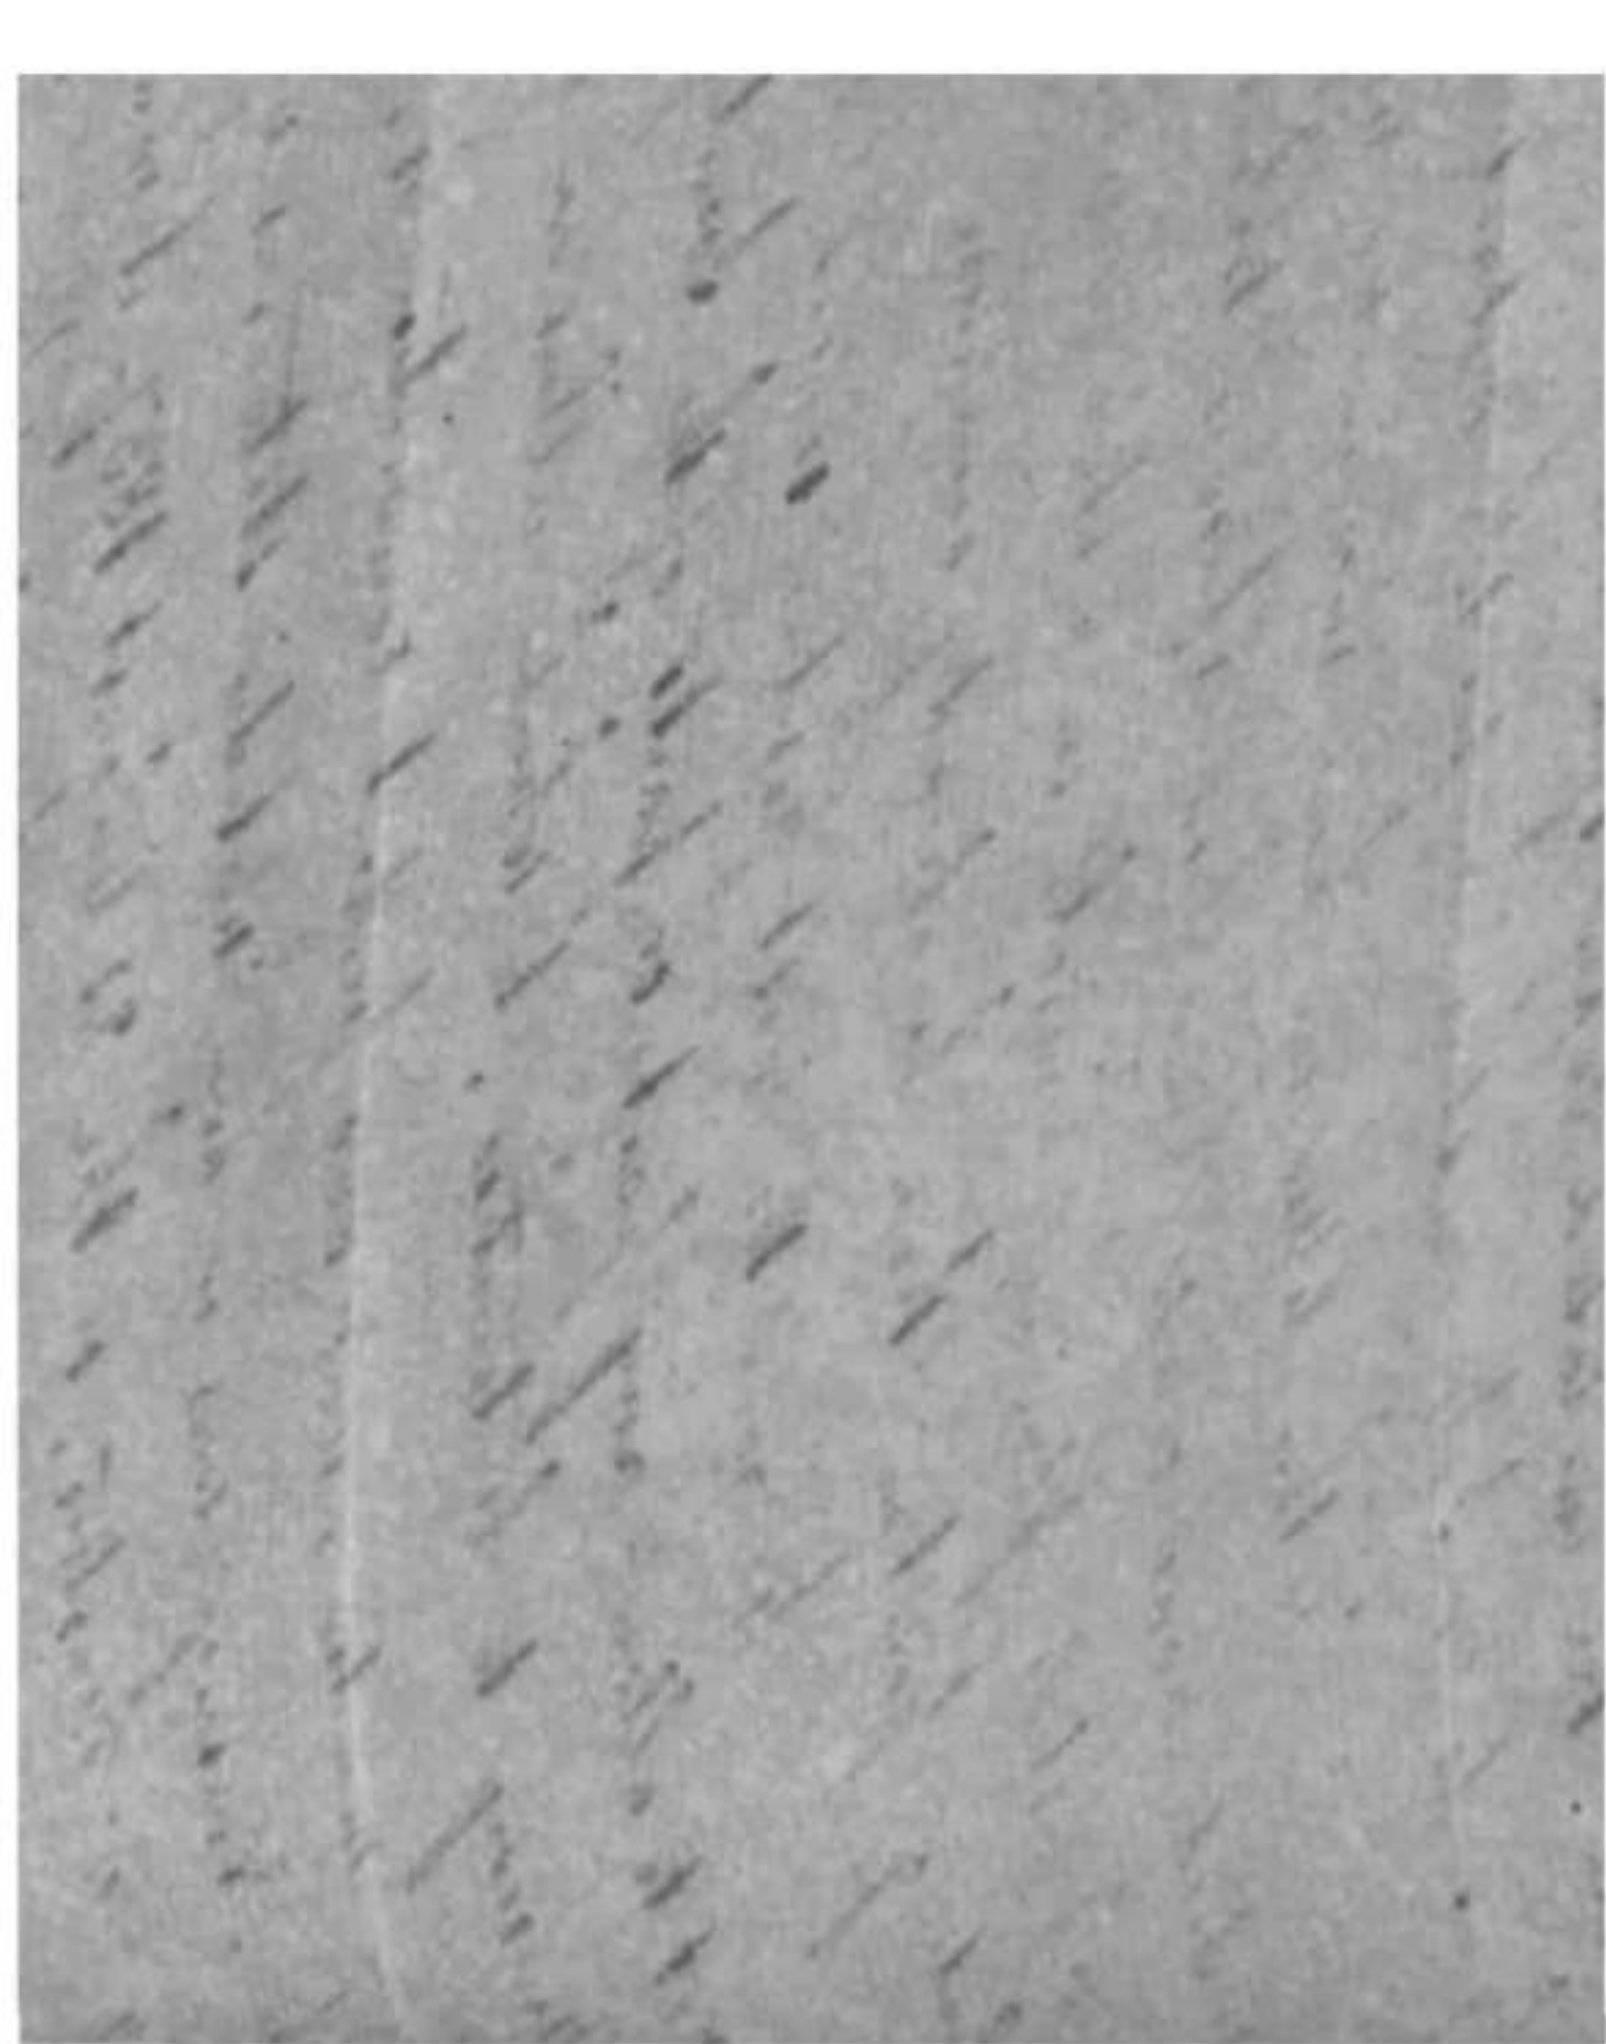

We gave the most positive orders to Mr. Masters
not to allow any part or parts of the Society's
Nursery to be touched, to which allusion had
been made, and our ^{ylr^^ t*^ J2&* J, tf^*}
the Nursery was in an 'unbiding' state, as represented
by Mr. Masters, on the 21st August 1837. it must have
been in a still more 'unbiding' state when visited by
the Special Committee on the 18th September.

We have nothing further to add,
except the expression of our confident hope that
the Society will adopt some measure that will place
our conduct and motives in an unquestion-
able light before the public.

We have the Honor to be

Hon^{ble} Sir
Your Obedt. Servants

Signed { H. Wallis M.D.
W. M. M.
John Bull

To,

M^r. S. W. Masters

Sir,

Putting a reference to the Govern-
ment on the subject of your note of today
I hereby excuse you from your situation
as Head Gardener of this Institution.

I decree that you will deliver
over charge of all the public documents in
your custody to the Head Quarters and the
Head Clerk.

I am &c

M^r. C. Potamius Jenson }
4th September 1838 }

(Signed) A. Wallick M^r. 2.
Superintendent

To,

A. T. Prinsep Esq^r

Secretary to Government of Bengal
General Department

Sir,

In consequence of a fresh instance
of insubordination on the part of M^r. Masters,
exhibited in his note to me of this forenoon,
which I beg leave to enclose in original, de-
clining to perform what was undoubt'dly his
obligation

Genl. Secy Sir,

I am directed to acknowledge the receipt of your two letters dated 22^d August last and 4th ultimo. In the latter He states that the Hon^{ble} the Deputy Govern^r of Bengal ^{<^C £>£****' -H. <T&} find that the situation of Head Gardener is one in which the Government has recourse to itself ^{JtZit- 6*ryLsp,*h~C rj} for appointments and removals, nor does His Honor see any necessity to interfere on the present occasion.

•C /-?

know to acknowledge receipt of B of
of 29th ult enclosing a b. from the Sept. Mt. Soc. also its
several enclosures, & here I beg leave respectfully to shew
that I can extremely sorry that any part of the Correspondence
of the 22nd Sept 1847 sh^d have been suppressed, as immediately
on the receipt of D W. b. of that date, I apprehended that I was very
sorry that my b. was unstates factory & that I was willing to give
any explanation he might wish for -

2 I sh^d b. I beg leave most respectfully to reply that had I re-
sponded the subject referred to in the b. of the Newbury Comtee
to relate to the W. B. Eadsen had have considered it my duty
to have given an immediate ans^r as connected with the
Ag^y. Soc. only I considered it less incumbent on me to reply.
Considering the b. as one coming from 3 Members of that Socy
Secy, & treating of matters belonging solely to that Society, I
c^d not consistently take any notice of it, in any of the
time & manner in which it was written. I sincerely hope
that W. B. Eadsen will be pleased to consider the reasons
stated above to be sufficient to excuse my not having
answered the queries put to * * * h^ - ^ y ^ ^ L

was the same. In the concluding part of third Para, I have the
honor to say that the Nursery was altered partly by order some
noting from myself in ignorance of Mr G's Complaint &
forth, at the instigation of D W, I presume with the know-
ledge of the Members of the Nursery Council -

7 I have not made use of the term unsatisfactory in
my declaration, nor have I stated that the Nursery was
in such a Condition at that particular time as to de-
mand the attention of the Council. My statement placed
in particular position in the 3rd Para of an ^{very} remarkable
or the plants generally were looking well in the 21st July &
state the Nursery was ^{very} well on the 21st Aug^r -

8 The Council in their last Para appear to observe
a great deal more than can be inferred from my simple
declaration as to the actual state of the Nursery. There
is a remarkable difference in the growth of plants in the first
& second months after the setting in of the rains. About the
beginning of July plants recover the ill effects of the hot
& dry season & spontaneous vegetation shows itself in a
remarkable manner in Bombay. New plants spring up
new buds are developed, & the number of branches

my motto to stimulate the men to bring in with their
wrote. I suppose they had that effect upon me, saw a
change, the course appeared to take much more interest
in the Cause, than they had previously done, but I
knew not the Cause.

9. I have thus agreeable to your instructions, endeavored
according to my ability to furnish an Act - to the point
which was the true Cause, I also to explain
the Cause of my not having said that Mr. S. L. B.

I have endeavored to state things exactly as they were,
without the least wish to speak the Cause towards
another, which properly belongs to you.

10. I am extremely sorry that it should have been an incident
in my life to bring such a heavy charge against me before
the H. Court, especially as I have now been compelled
by the obligation under which I stand of completely obeying the
orders of Gov. to state many things which without this
obligation I have continued unrevealed in my heart
entirely in D. Wallis's Act - What I stated to Messrs. H. L. B.
on the 22nd Sept 1857 in my V. of that date, Copy of which
before the Court. I stated also before the Agri. Socy on the

Swan River Nov. 20th 1838

16th Jan'y in letters fr W Brailleau
Sir, Dated 24th Nov 1838.

I send you fr Dr Wallich, of the Calcutta
Produce Garden 41 papers, of seeds of some
of our finest Swan River plants, I would have
sent a much larger collection but the seeds col-
lected last year had been nearly all packed up
to go to England by the Fortna Carol and the
seeds of this year, are very few of them ripe,
in those I send Dr Wallich, will find seeds of
the Myrica, Hinjia, & species of Conyza & those
all fine plants, the Splendid Scarlet Geranium,
the Crimson Mabea and Celestial Blue
Leucaethia all first rate plants, there
is also 3 beautiful species of a new genus
belonging to the natural order Chamaedecia
of De. Candolle the seeds of that genus
are easily over-taken, ^{they look like with a flower} each flower is followed
a single seed placed just under the fringed
Calyx which becomes as it dries a sort of wings

XfiX

^ /feM

to disperse the seeds, in the paper
seeds there are 3 seeds of the Nut tree of
district, and the seeds of a beautiful
Leymusian plant called by the Tethers in
that district the Swan River Lupinus
think it is a fine species of Astragalus,
with purple flowers, and 4 fine species
of Kennedia, one of them is called by
the Tethers the Swan River Vetch.

Handwritten text at the bottom left of the page, including a signature and date.

Puintangoy 10. Decembre 1754.

Mon cher Monsieur Wallich

Non sery sans doute bien etonné
d'apprendre par la présente que je
suis encore habitant de Java, et que
la lettre et le vase de Plante que
vous m'avez écrit dans le mois de juillet
dernier au M^r Kamitch, capitaine du vais-
seau Vahet, pour être remis à la per-
sonne actuellement chargée de la super-
intendance du Jardin de Botanique de
Puintangoy, ne seraient parvenues dans
cette qualité; quoique je dois m'empres-
ser de vous dire que le titre de Directeur
de ce jardin est loin de m'être devenu
un botaniste, puisqu'il ne me fait
jamais particulièrement occupé de cette
partie de l'histoire naturelle, et qu'il

et qu'il est seulement pour moi un
titre Honoraire, qui rentre dans une attri-
bution comme Chef ^{Suppléant} de la Commission
de naturalistes qui contiennent l'ex-
ploration des possessions hollandaises de
l'Archipel

Ainsi donc cher Monsieur, je
dois vous faire une double apologie
pour la négligence que j'ai eue à
ouvrir avec vous une correspondance, qui
est par vous permise de ramener si
agréablement nos anciennes relations
domestiques, et de vous faciliter récipro-
quement la acquisition la plus préci-
euses

D'ailleurs je me reproche d'autant
plus aujourd'hui cette négligence, que je
me trouve à la veille de me plus possible
en profiter, n'étant enfin décidé après
un long exil de 20 années à repartir
dans le courant de Janvier prochain.

La seule excuse que je pourrais faire
faire valoir peut être, est que je me suis
depuis long temps laissé préoccuper et

absorber par des occupations de culture, conduites
tant pour son propre compte que pour l'intérêt
du gouvernement; occupations qui par les
beaux résultats qui s'y sont obtenus dans les
dernières circonstances, ~~ont été~~ ont été les
que j'ai l'avoue à un homme.

de l'histoire naturelle.
non non comme en particulier beaucoup
occupé ici de la culture du thé; qui présente
les plus beaux résultats, si tant soit les qualités
du produit répondent à la beauté des plantations,
ou du lieu et à la force de végétation que
le sol déploie en particulier sur les argiles;
non élevé de ces hautes montagnes, mais
qu'on que le rapport s'échange soit en ce point
plus satisfaisant à cet égard, c'est même la
partie. Le point douloureux de la question.
quant à ce qui concerne la production avec
les terres probablement pas aussi avancées que
chines, et une grande partie non plantées déjà
un grand nombre d'ouvriers chinois et indiens
très inférieurs, mais nous il a été prouvé à Pékin
via un atelier de dépôt ou bien le thé. Les
efforts, retournés de nouveau et sagement
engagés avant leur expédition....
les plantations réalisées et le rapport plus
vent déjà fournis environ 30000 livres de
thé.

annuellement et chaque jour elle présente une
nouvelle sensation. . . . la qui en a surgie
dans la maison de Mr France sur la fabrica-
tion du thé telle qu'elle est conduite à présent,
c'est l'absence d'Habileté de vos ouvriers chi-
nois, qui ne semblent pas en vouloir que
la plus excellente espèce de thé qu'on fabrique
dans le royaume de Canton, mais c'est un mal
venant que vous avez bientôt surmonté, je
crois, et tirant tout-à-propos, par la
grande expérience que il vous sera possible de
donner à cette culture dans la latitude la
plus analogue par la nature du sol et la
correspondance de latitude avec celle ou la
moitié de celle en Chine, on pourra de là
en pouvoir manger d'autres productions
d'autres pays dans une foule de
très avantageux.

Pour revenir maintenant à
ce qui concerne la botanique et en particulier
le bot envoi de plantes que vous avez bien
voulu me faire, j'ai le plaisir de vous assu-
rer que les plantes sont arrivées dans l'état le
plus satisfaisant, puisqu'on pourroit de les
laisser en moitié et elles sont vivantes et
que leur avoir été jusqu'à la hauteur
et dans un très bel état de conservation que

non pourvu d'être regardés comme acclimatés.
C'est acquiescence avec les d'antenne
plus précieuses que les autres de ce genre
qui sont en possession par : en voici la liste

- Datura bijuga
- Platycodon grandiflorus
- Buteo imperator
- Bignonia adenophylla
- Stipulata
- Spathodea venusta.

de venir bien que par le dernier rapport
l'autre dire pour la conservation des espèces
dans l'annuaire catalogue
de votre journal, avec les détails les plus
vérités que nous l'avons été : car d'abord
il avait été par suite parvenu à l'état de
rapport des travaux j'ai de faire garantir les
travaux de la liste que j'ai le plaisir de
vous adresser aujourd'hui, et d'être comme
j'ai en votre catalogue en attendant cette de
ce que vous possédez j'ai des plantes en
par au hasard, j'espère cependant qu'elle
un plaisir de voir arriver
en son

f\2* S, <i~t, f~*

en avoir un bon état, que telle quelle
ont remplacé, puis quelle peut planter dans
la même caisse et recevoir abatement de la
même manière.

pour avoir du vert, nous avons dans le
Cours de ce dernier anné, employé pour
nos expéditions de plantes, un moyen assez
plus simple que celui-ci, et qui consiste à
transporter tout simplement avec un peu
de terre et abatement sans aucune addi-
tion de terre, les plantes que nous voyons
soit dans des bœufs soit dans des chèvres
hermines, que nous avons
• „ as ** manière
nous avons un peu plus de terre, qui nous
servent d'engrais, mais tout-fois cette méthode
est un moyen toujours valable pour les
plantes herbacées.

La terre du Jardin de Montigny
est confiée à deux horticulteurs, Mathieu
Leymann et Hans Karl, qui y sont attachés
particulièrement, et qui sont chacun dans leur
partie de très habiles jardiniers. Nous
leur avons leur adresse les suivis que vous
voudrez bien diriger par la suite de ce journal

et ils pensent qu'ils ne s'occupent
de leur côté. Aucune occasion de répondre
à toute ses demandes, et même de les presser
sur si non voyez bien leur adresse le
catalogue des plantes de votre jardin.

Autre Motif. Les savants Marshall
ont eu entre eux une discussion. Et à Java un
jeune officier de santé très habile botaniste
qui se trouve chargé de quelques recherches
spéciales, a les intentions desquelles il doit pour
un public de résultats. retourner par la

Hollande. Depuis j'ai appris par diverses
qu'un jeune Naturaliste de Sydney nommé
Sutton avait été employé depuis pour
pour l'étude de Java, on il accusera probable
ment de la cause de 1849, vers voyez qu'il
s'est occupé de cette branche de l'histoire Naturelle
de la Java; et même

a^*#3sr;

pour les complaisances de qui
sans

,v*,-5^t ^M^^W''-*1

tant de fois avec le mal. et ce n'est rien que
mon avenir en Hollande.

Quant à mon intention positive que de
venir en France après avoir jolies dans ce
en France, et non de rester. Honneur
attaché au service du gouvernement de ce
pays. Sans le but de réaliser une
je n'out pas fortamment en ce cas de
réaliser les idées depuis bien des années
celles d'apporter au développement de
l'agriculture, commerciale et de l'industrie
indigène de cette île les procédés et les
méthodes les plus modernes de l'industrie. Les pays
qui peuvent y être introduits avec le plus
d'avantage à ce commencement. je n'ai pu obtenir
ce système régulier par l'intermédiaire de
Monsieur de Vassier. J'espère tant de fois
avec l'abolition de l'esclavage et peut-être toujours
un jour de voir une véritable colonie
de ce pays. Je fais entendre dans les
plus agréables. Dieu de mon pays de
voyage cette d'avoir un jour le plaisir de
vous revoir à l'abolition de l'esclavage.
De l'humanité avec lequel je m'entend
toujours. Votre bien sincèrement dévoué
Dieu

Mr Wallich

Dear Sir,

I have the pleasure of
receiving a letter addressed to me of
the sea cultivators. This relations business
rather clamorous for money; and I hope
that this Hofam's friends will soon make
remittances. We shall endeavour to get
you the seeds, but though we have the
promise of a supply of genuine Bolea,
we can not make sure of them before
they are actually in our possession.

I should consider it a very
great favour, if you would kindly
send to me a variety of Indian flower
seeds. Though I am no Botanist, I
have a great garden and am very fond
of flowers. I ~~should~~ could send you rather
in return, as our flora is exceedingly
scanty.

Wishing you every blessing for
the present & high and seeing the favour of
further details respecting the sea cultivators
in Hofam, I remain

Dear Sir

Yours respectfully
Shyloff

11th May 1839

Madras 8th June 1859.

no 15²

Sir,

Under ^{the} instructions from the Committee of the Agric. Horticultural Society of Madras, I have the honor to acknowledge with their most sincere thanks your very liberal contributions of seed for the use of the Society's Garden many of these have been sown but as yet an inconsiderable portion have germinated, owing, the Committee think, to the very unfavourable Climate which prevails here at this season. To guard us against loss from this cause many of the seeds have not yet been sown, but all will be so soon as the arrival of more favourable circumstances will permit. Such indeed is now the case but as the change has occurred at an unusually early season of the year, there is reason to fear it will be followed by a return of the unfavourable circumstances alluded to above.

Your letter respecting the Paris Prize I have laid before the Committee who

who consider the information it conveys of so
much value that they have requested me to
extract those portions relating to the economi-
cal applications of that plant for publication
in their transactions. In addition to the

information you possess regarding it, I may
add, that this Bean is now much cultivated
about Hobart town as a garden vegetable.
There the young pods are sliced and served
at table like French Beans at the commence-
ment of the season, and by and by when
further advanced the bean

is now

was always been cultivated
field crop on any part of Australia.

I have the honor to be

Yours faithfully
W. F. F. F. F.
Secretary

Richard Gordon Colgate

Dear Sir

It is with great pleasure I am writing to
 the undersigned that of 6 boxes of plants which I sent
 to the Board of Commissioners has been the kindest manner
 allowed me to exhibit in the exhibition. The plants
 number 17 were sent to the exhibition days
 ago by the Board of Commissioners under the care
 of John in order that they might be
shown - without travelling from the garden
 in valuable and in provision a good
supply of Colombia tobacco - especially of female
plants for this purpose. I begged them to assist
you in that to be very important and
that I should not my self appear from
his view. That you will grant me your very
kind and success in perfectly content
with therefore not say one word more, being
pleased my wishes fully to Mr Richard.

Among our many old plants in this
 Garden the Campanula had a very large
cross place. You will therefore confer a
 very great favor upon me by sending me
 as well as growing plants of as many as possible

Richard
 Gordon

(AV-f^)

20 Oct
Lester Borden (Lester Borden)

I am in
I am great pleasure in writing to
the enclosed list of books which I have
Killed Borden in the United States
I should be glad to send you a copy of
number 10 and 11 and to be sent to you
see by the "Borden" and the "Borden"
of the "Borden" - I hope that you will
Borden + Borden being of the Borden
in valuable and in procuring a good
supply of Borden taken - especially of
Borden for the Borden. I hope that you
you are not to be too very important
that should not be too very important
be Borden. But you will find in the
and on the occasion I am perfectly
will therefore be very glad to see
explaining my notes fully to Mr. Borden.
I am very much interested in the
Borden the Borden and a very
Borden. You will therefore be
very glad to see them upon me by sending me
as well as giving them to me by sending me
Mrs. Borden
Borden

of that beautiful and gigantic tree. The leaves are
young ones beautifully here, and I shall be
then send to the same. I hope of you to send
as they are popular plants of the island.

I am sure to be disappointed if I
have been rich in herbaria, and I know full
well that you will grant me a most section
of your ^{r*}rites. Most happy shall I be to
supply you in return, on the best compact
measures of which you would be glad
to have a specimen of each thing you
have got from me - what have some
and under your excellent management and
that are the plants that are most barren
of receiving from this garden.

Other well known species
Euphorbia glauca (Poir.) (Poir.) (Poir.)
May 62 No. 2902; and in Poir's Herbarium
No. 3527. I cannot, scarcely, make any
more than one species, which grows abun-
dantly well here. - Also I have lost my
Euph. lophozona (Lamour.) (Lamour.)
Lamour. I think to send me some plants of this
valuable variety. *Calceolaria*, and *Cypripedium*
magnificum

Mon cher ami,

J'ai lu avec bien d'intérêt votre lettre du 9 juillet
qui m'en parvenant par le Navire le Trident. En l'absence
de M. Richard je vous remercie des deux caisses de
plantes que vous nous avez adressées par cette occasion.
La langueur de l'été a beaucoup nuï à la conservation
de ces plantes, il en est mort une grande partie. Né-
anmoins nous sommes très reconnaissants de ces envois
mais regrettons surtout les plants de thé, en
vous priant d'avoir la bonté de réparer cette
perte dans le prochain envoi que vous aurez la
bonté de faire à notre Jardin botanique.

Je vous ai déjà annoncé, Mon cher ami
la création d'un comité d'agriculture à Puerto
Je vous remets ci-joint un Numéro de l'un des
Journaux qui vous fera connaître que ce comité
s'en définitivement constitué ce que ses membres

ont bien voulu m'en leferer, à l'unanimité,
la Présidence. Pour ce choix sans je suis
peu digne, mes honorables Collègues ont
eu beaucoup plus d'égards à mon zèle qu'à
?><- jw**rtu. JU^ & -& <K*s*'CsH**A***~£*4* de Bourbo
qu'à mes campagnes en agriculture.

J'écris à Chanor--~J6. c& &. Ryan
pour solliciter la faveur d'établir des
relations actives avec la Société d'Agriculture
de Calcutta. Il ne peut manquer de résulter
de mutuels avantages des relations qui vont
s'établir entre les deux Sociétés. Nous pouvons
compter de votre part sur la plus favorable
disposition à nous servir.

J'aurai soin de vous adresser le bulletin de
nos travaux, qui paraîtra à la fin de chaque
Trimestre, nous attachons beaucoup de prix
à recevoir celui de votre Société au nous

pourrais puiser le précieux enseignement.

J'ai été bien touché, Mon cher ami, de la manière
d'estimer que sur la proposition de Sir E. Ryan
appuyé par vous, la Société d'Agriculture de Calcutta
a bien voulu m'accorder. J'attends l'avis qui en
sera donné par la Société pour exprimer à vos
honorables parents toute ma gratitude.

Cette lettre vous sera remise par mon
jeune ami, M. Edouard Richemont Duboulay
que je prends la liberté de recommander à toute
bienveillance. C'est le fils de M. le C^{te} Desbordes
de Richemont que vous avez sans doute connu
à Calcutta en 1818 et pour lequel j'ai les sentiments
de respect et d'attachement d'un fils. Mon jeune
ami qui vient de venir en France par la voie
d'Egypte, doit passer un mois à Calcutta. Veuillez
le présenter à vos honorables amis et notamment
à Sir Edouard Ryan. Je suis persuadé qu'il
deviendra comme moi un admirateur de l'esprit
de courtoisie et d'hospitalité qui distinguent l'Asie

Communauté de Calcutta.

Adieu, Mon cher & bon ami, après
de nouveau les sentiments d'estime et d'affection
de votre bien séant

vice Department.

I am yours

Wm. P. Kincaid

Secy to Gov^t of Bengal

Fort William
The 13th November 1839

Extract from letter N^o 31 of 1839 from the
Honorable the Court of Directors in the Public
Department dated the 21st August.

Para 1. The new reply to your letter
dated 7th September N^o 112 of 1835 para 12
dated 1st October at 16.

to March N^o 2 of 1839 para 10 relating
Botanic Garden.

A ^{*>*t+S} A

attributed the extraordinary
 delay of six years in the receipt by us of Dr.
 Wallich's Report, chiefly to the neglect of the
 Government Dr. Wallich having
 that our orders of 29th September 1830, and
 13th August 1834 were not communicated
 to him till the 6th February 1835 His Report
 but this
 delay is satisfactorily explained in his letter
 of the 10th May 1835.

Transmitted the
 Report of the
 f/t 'Mm*
 >A, **/**' '*%/
 and in the
 month of Feb (1835)
 1835 of 1835, 1835
 obtaining the
 all delay
 arrived for the
 1835 1835
 Plans to the
 Garden at

3. In reference to our Despatch of the
 16th September (No 92) 1835 & we acquaint
 Dr. Wallich of having with hold his report
 of the head Gardeners decease from February
 to October 1833 that went having been fully
 brought to the notice of the Government du-
 ring his absence in a letter from the head
 Overseer of the Garden to Sir G. Mitcalfe.

4. The Report of Dr. Wallich was made
 in consequence of our desire to be informed
 of the actual practical benefit of the Botanic
 Garden, and of our suggestion that the re-
 ductioms which were proposed, and afterwards
 brought into effect, might be carried still
 further.

5. We entertain no doubt that this
 Institution has been

-/y**'/*',,,,?* /, /£

services of Botany, by facilitating the collection and dissemination of the vegetable productions of India, and by communicating libraries, seeds and specimens to all parts of Europe.

In this very interesting Report Dr. Wallich shows that much practical benefit has arisen from the Botanical Establishment. He represents that thirty years ago there were only a few gardens among the English and none among the natives; and that well cultivated gardens are now becoming common throughout the Country not only among the Europeans, but among the Hindoos and Mahomedans of the middle classes all of these parties as he states, have been & still are freely and liberally supplied with plants, cuttings and seeds from the Botanic Gardens from whence alone they could possibly procure them and the demand is constantly increasing. In the absence of Gardeners, Nurserymen and Seedsmen, he considers that the Garden is quite necessary, and that the time has not yet arrived when it would be advisable for the Government to charge for the plants as the industrious and less opulent classes are the most frequent applicants.

71

J^h3,

7. Dr. Wallich also represents that the Botanic Garden has raised from seed and distributed to Upper Assam, Khasia, Sirmoor and the Peninsula, many thousands of the Tea Plant that a variety of plants are grown for the use of the present Department. ^{? 4} A separate nursery which was established in 1828 and although the support allowed for its maintenance ceased in 1838 it had been continued and extended that many hundred thousand plants of the best sorts of Timber trees, as Teak, Sissoo, Mahogany and others, some of which have been recently introduced into India have been distributed round the Country and that several new fruits and vegetables and many flowers and ornamental shrubs have been introduced from other parts of Asia, the Eastern Islands, and those of the Pacific, and many existing kinds have been greatly improved.

8. The Report of Dr. Wallich has made a very favorable impression upon us with regard to the practical benefits enjoyed by the Community through that Establishment. We shall not therefore require that the resolutions contemplated in former ^{'f*/<./*} shall be carried further than those made in

1835, but we shall require full information
as to your future management of this Garden.
9. We take this opportunity of stating
our anxious desire to continue to promote
the introduction of useful and ornamental
Trees, shrubs and Plants into India, and also
to encourage the transmission of the produce
of India to this Country. With this view we
gave special directions in our Despatch
in the Revenue Department dated 20 August
1834, as to the best method of packing seeds,
and we are happy to find that seeds so packed
have arrived in good order, we also understand
that cuttings of English Fruit Trees have
been received by your Governor General
with such expedition through Egypt, that
there is every hope of their being successfully
cultivated in the more temperate Districts
of India.

10. We direct that you give due attention

fa* UtA-i/Cl^^ ^y^^

Mention, what was might
be this right of being
inserted by way of notes
at the end of the paper,
or at the foot of the
page. - I should not
have

have thought it ~~not~~
necessary to trouble you
with this little matter
had I not observed your
official signature to
the concluding part
of the report of the
committee on
the subject of the
proceedings
therefore
request that he said
other names may not
appear on the face of
the same in question
either in the body
words or merely
practical proceedings.

Kindly oblige me
by attending to this

Yours
respectfully

request & believe me her

[Signature]

My Dear Sir

I must of course feel
much flattered by your adding
botanical notes to my little
memorandum; but nevertheless
I insist upon the notes not
being incorporated in the
Memorandum itself, neither
in the Records of the Society,
or in the printed Minutes
Report of its proceedings.

I cannot help your
calling seeds or plants
by any names ^{they may} choose;
only let me not have to
answer for your mistakes
I am,

Yours sincerely

[Signature]

Bath 16th Sept. 1829

To Dr. Spry -

April 19th 1839

My dear Sir

In reply to your letter of today I can only repeat what I said in mine of Monday - namely that I dissent upon your notes not being upon any account whatever incorporated in the substance of my letter Memorandum, either as the Official Record of the Society, or in your report of the monthly proceedings. When I saw your unjustified assurance, that this injunctive ^{is fully} ~~is~~ ^{is fully} attended to, will I considered whether to comply with your request or not. Had you made this request in the first instance that is before you thought fit to publish officially

Yours

officially my memorandum
with the addition of botanical
names (two out of three
and three of which are wrong
as told you in my ^{conclusion}
narration of Monday) would
certainly not have ^{been} picked
up from you what the wisest
tyro in Indian ^{Botany} might
easily have supplied; although
I should not have permitted
the names to be added ~~to~~
in the body of the Memoir
I think, by the way, has
been referred to the
Agricultural Commission ^{see}
for their report.

I would most ^{of} ^{course}
have sent you the
delivered orders for the
Cases, had it not been
for

for the Result of the Garden
Council of an early text,
concerning to which a notice
was to be published, offering
thereupon this account to
those who might sign
in their names. If I am
mistaken be so good
as to say so and all the
orders shall be forthwith
made out, but in that
case we can only begin
early next month, as
the public will know
nothing about the Result
in question. I sent orders
yesterday against the
4th part of Mr. M. P. P. P.
(for his own and Mr.
Kear's shares) and to
Mr. S. H. Dangle, who
applied for leave
to

to purchase 500 Coats.

Yours truly

My Dear Spry

I request you will
do me the favor to inform
me in a line, whether
I am to consider my not having
heard from you since the
19th as a guarantee
of your unqualified compliance
with the injunction repeated
by me in the reply to
your note of that day.

Yours A.W.

Boston 21 Sept 1839

Mark Lacy

In

Notwithstanding my

two out of three of the latter
names you had given
to some of the grains, which
I presented at the last
meeting of the Agricultural
and Horticultural Society, were
wrong, you have persisted
in adding them, by way
of notes, to the printed
Report of Proceedings, after
withdrawing ~~them~~ ^{the} names
from the substance of the
Memorandum, in which
you had incorporated
them in your Official
Newspaper Report, contrary
to the rules of that or any
other Society, contrary to
the express declaration

proposed to the voluntery of
his Transactions, and
certainly without my knowledge
or consent. Besides, it
had been resolved that
the Grievances should be referred
to the Agricultural Committee,
to which I belong. -

However ready you
may propose yourself to
be, to take on your own
shoulders, the responsibility
of thus wilfully propagating
your mistakes, and disre-
garding the rights of
a member, or simply
a contributor, I will neither
remain passive under such
a procedure, nor subject
myself to a repetition
of your offensive letters,
or of your late comments.
I have therefore to request
that

that my name may be
withdrawn from the list
of members of the Society,
and that you will submit
the whole correspondence
which has passed between
us on the above ^{subject}
together with this letter,
at the next meeting, as
an explanation of the
ground which caused
me to separate myself
from that honored and
respected body.

It is necessary that
I should state for the
Society's information,
that I will continue
as heretofore to take care
of this nursery at this

Post Garden 5. October 1869.

My Dear Sir Edward

The respect I owe you as the President
of the Agricultural Society, independent of all other
considerations, requires me to address you on this occa-
sion. I enclose copy of a correspondence I have
had with D. Spry, which has terminated in my
withdrawing altogether from the Society. I should
certainly have made this communication to you
at an earlier date, had it not been for a letter I
received from Mr. Robinson of which, as well as my
reply, I likewise beg to enclose copies. I have
heard nothing about the matter since, and therefore
I must not any longer, ^{U GAS,} ^{and therefore} ^{ing on you}
with these lines.

My case requires no comment. I have claim-
ed nothing but what every member ^{<-£+} ^{very} ^{contribu-}
tor has an undoubted right to claim. I have insist-
ed upon the illegality of interpolating or altering
any communication be it of one sheet, or of one
page or of one line only, after ^{£ f jfiX *} ^{been read,}
virtually or pro forma, at a regular meeting.
Even the author or contributor himself has no right
to make any such interpolation, strictly speaking.
In the present instance ^{Memorial} ^{and}
I have

X^

been extracted from Major Cuvaley's letter to me, it
was read at the last meeting, and is properly refer-
red with the grains (or the Grains alone Dr. Gray
will perhaps say) to the Agricultural Committee,
of which I was a Member, both by election and
as an Officer of the Society. Had I at first consid-
ered it proper to embellish the poor lines with
Latin symbols, I might perhaps have done it -
perhaps not. But in case I had, I should have
added Latin names which were true, not false;
I should not have exposed myself to the just
disgrace, as well as ridicule, which I would
have merited through the remainder of my life,
if I had not known that Til is Sesamum, and
Sesamum's Til, and has been so from the remotest
antiquity, except that the old Egyptians called
it Sompren or Somren (or some such name). There
is indeed a sort of Til called Ram Til, which
is cultivated in some of the arid parts of India,
especially to the Southward; but the sort of which
I sent Muster was the universally cultivated
sort, throughout the East Indies, China and Japan
included. Therefore had my Mem^o from Chota
Nagpore simply spoken of Til, black and white,
the

the inference would immediately have been, that
it meant the steamers. But I presented the seed
itself, of both the black and the white sort, and an
English pear is not more ^{different} from an Alligator pear,
qua ad tatum or botanical name; a saddle horse
from a horse-saddle - the *Jus gentium* (which
permits me for argument's sake to call the white
Jus) from the *Jus Nigrum*, or black broth of the
Romans - than is the genus and natural family
of my *Til*, from that of the Secretary of the Agri-
-cultural Socy. That he should persevere in call-
-ing the *Til* names, after being told he was in
error is on a par, quite, with his augmenting my
Memorandum by his classical interpolations which
matter may be creditable and an honor to his bot-
-anical knowledge, - to my poor pretensions as a
botanist they would be a disgrace and dishonor
forever. - Highly as I rate the importance, the ne-
-cessity, of prompt publicity being given by the
Society to true and useful information; still
more important and necessary does it appear to
me, to avoid propagating false or unground, and
therefore worse than useless matters, and to rectify
errors without loss of time, or whenever they are dis-
-covered. The Society or properly learned the responsibility of
the

The facts or reasonings contained in the papers of
their Transactions entirely to the respective authors
or contributors to the credit and judgment of their res-
pective authors as the Memorandum prefixed to each
volume expresses it.

Whether the Secretary has, or has not embodied
my Memorandum in the Record Book of the Society's
Meeting I know not; he has deemed it proper to be
silent on the subject. In the very act of concluding
this sheet I got a note from Mr. Robison in which
I heard nothing more about Dr. Spry
and that - but the thing is too good not to be extract-
ed, which I will get done at the end of one of the open-
-closed papers. He is to ask at the meeting on the 9th
instant whether he is to confirm with his signature
the Proceedings (of last meeting) upon which Dr. Spry
has made unauthorized additions - that is, the Pro-
-ceedings which ~~are~~ not the Proceedings of last
Meeting!! But this is on a par with Mr. Robison's
procedure whenever he occupies the chair. After the
reading is over, instead of simply signing as the
Chairman, as every other Chairman of every other
Society in this world does, he asks "Is it your plea-
-sure Gentlemen to confirm these Proceedings?" So that
in his view the Proceedings are not Proceedings until
50

A<&rj£<6sC

6
satisfied, no vote, no resolution, no nothing, as one
would say, that has been regularly proposed at one
meeting, and as regularly passed or negatived at the
next, has any validity until ratified at the 3^d
Meeting. Such are the views of those that have tran-
spled my rights under foot and are to bring the
question before the Society! But I have another
and stronger objection to Mr. Robison's suggesting
to me what I ought to do - rather to have done.
Mr. R. was the secretary some 5 or 6 years ago, and
because the Society resolved a thing (which you
had recommended through Sir A. Colquhoun
& myself) which he thought otherwise upon, he re-
signed, - but how did he resign? A day or two after
the public meeting. In vain did I exprosecute
with him on the extreme impropriety of not conducting
the business of the Society, at least until the next
Meeting. No, he would not - as a prior Resolution but
and I were forced to perform his duties. But that was
on a par, quite, with his not entering the Minutes of
Proceedings of several consecutive Meetings. The fact
is our record. The blank pages of the Minutes testify the
truth of what I have said; - although ^{it} *a>7i/ ^U Mr<<>
in speaking of blank pages altogether. They are not so
because

because Mr. Robison has in a pencil note explained
the grounds of his not entering. **4^>C*iSL~w-** namely
that they went against his wishes! What I have
done on this occasion I am not ashamed of. One
incomparably my letter acted under pretty simi-
lar circumstances, as I have acted. You know well

.^A^A^A^A^A^A^A^A^B ~&£L_U,*&*^

that resignation; and I shall therefore only say,
that I conceive myself a better judge of what is
befitting my honor, or my dignity (as it is styled, in
the present case), than Mr. Robison.

Had you, my Dear Sir Edward, been on the
spot, I should have appealed to you the instant
I received the Secretary's reply to my first letter,
and I am perfectly convinced that you would have
put matters to right in such a manner as to res-
train the arrogance of Dr. Spay, and render it unne-
cessary for me to adopt the course which has be-
come unavoidable. It is curious to notice al-
though the Sept. Month's Proceedings do not notice
that a motion was made in writing & regularly
seconded, by two members, to the effect that the
reading of the past proceedings, which at present
was thought to occupy too much time, should be
made as brief and expeditious as possible, because
the

the delay hitherto caused, actually kept members
away. One would suppose that however short and
rapidly this proforma business was gone through,
the society would still operate equally forcibly
as heretofore, no interfering or interrupting of them.

I ought to have mentioned in regard to the
Extract from Mr. Robinson's note that I replied by
sending him what he asked for, namely a
few flower plants - and simply & solely excusing
myself for not being able to meet his party at dinner.
Not a syllable more did I say.

And now, I beg your forgiveness for all these
details, & for the bad style and writing of these
hasty lines. I may as well add that not a living
soul has been consulted or spoken or written
to in the above matter. My case stands entirely on
its own legs, and I trust to the good feeling of the
Society, to whom I have been so long and devotedly
attached - to their sense of justice - for a correct and
just interpretation of the motives & reasons which
have dragged me away from them. I have ever been
and will continue to the end of my days to be most
deeply interested in whatever concerns their prosper-
ity and welfare; and although no longer one of their
members

Therefore I shall not be found wanting on any oc-
-casion when my Honor and people's services may
appear to be in the least useful or acceptable to His
Majesty. In the hope that your health had since every
beneficial benefit from your tour, and with the
greatest respect I have the honor to remain,

My Dear Sir (Lords)

Your Serv^t

Edmund, J. Wallis

The Hon^{ble}

Sir R. Symonds

Saturday 28 Sept 1839

My dear Wallcut

I've just shown you all the correspondence between you & him, including your last letter. - I send you a copy of my reply. -

I think you quite right in principle, but quite wrong to give in your resignation of the Society, for such a cause; and I hope you will withdraw your letter, & substitute one, simply stating that you consider Spry's mode of proceeding as a bar to the sale of his (Hall's) similar; ^{Zc~4*+dc*^S*td<2>}

that you will submit ^{^ a} unless he is prepared to admit, personally in writing, that he was wrong, ***** promise to confine himself to the proper duties of his office, (more especially - paid one)

It is not dignified, in you, my dear Wallcut, to resign because one paid fee is ^{/^25^} not; let him, rather, be instructed in his duty as a public man & etc.

Meeting, - I am Kelli's unauthorised assistant,
as I have ^s got us into a sad scrape with
J. White at Madras; and it cost us our ~~and~~
most valuable branch society, the one at
Singapore.

The last part of my letter to you is
in consequence of a little petulant expression
towards myself - I am in tremendous ^{u+} haste
- testis, as you might take in ~~the~~ * - ~r !
certain that for Edmund you would
approve of the advice now given you.

Recd your letter, substituting an ~~for~~

Yours ever truly

W. White

10th office, Saturday
28th September 1849.

My dear Sir,

In point of form, rule, and right,
I walked as right, and you have, in my
opinion, been wrong from the very first; for
you were adding to a communication of S^r Robert
Kept. of the Bot. Gardens of the State. If it
had been the communication of any other
Member I would not have thought you wrong
at all, but I would have considered you
wrong, if you had persevered, as you have
done, in the case of any other member
whatever. -

I cannot doubt for a moment that the
Society will take this view
it

It will be my endeavour between today, and our
next meeting, to induce Dr. Wallis to
withdraw his public letter, and rest content
if he still resolves upon submitting the
matter to the Society, of doing it in his
place, at our next meeting. -

As to the plan, I will attend the
meeting ^{today}, **~3 <E^_ ^^^^f** me; but it will
depend entirely on what then takes place,
whether I leave it with the Committee, or
it be to go to the Lord Auckland, through
Sir Edward Ryan, I will transmit it ^{immediately}
with some explanations and observations. -

I have made a ^{ground} plan of all
Bank Square, and of the spot selected for the
building

building; that will be left with you to be
transmitted officially. - The plan ^{of the building} is my
private matter, at present. -

I am, my dear Sir,
Yours very truly
Richard C. Holman

Dr. Spry

Friday Morning

4 Oct 33

My dear Hallie

The plants you kindly
sent - we have not done
much to hide my naked
self, and I am afraid a
beginner. -

Be so good as see
whether you can spare me
another sweet briar, and
a few roses. - *Uniquales Indica*
gloriosa

Gucca, crumena papiflora
vacinosa; Syona alba, ^{lycea}
Liri / olea trogonus / and
any others you can
of.

rfxi*^

I have heard nothing more
about Spay's case. - Shall not
in consequence of your letter
say a word at the Meeting
that can be construed into
a **cyi.** by you letter
Meeting after matter in dispute.
I shall simply inquire
whether

whether after your strong
objections, I am to confer
& sign your signature, the
proceeding upon which
I have signed unauthorised
additions.

If this appears
my proper course to
be as say is -
my duty
Ch Robison

In my own opinion I hold to the
advice I gave you - C.R.

2^o P.S. / I would / Geo. Jones /
to dine with me this evening
with his sister in law, Mr
Chaceall. - If you chance
to be dining here, I wish you
could come & consult with
about Willy's sept. - Saw Mr
Latham gives me great pleasure

W.H.

Professor Bohrer

Thank you for your
kind communication, and
regret I cannot adopt
your suggestion.

Nothing short of
a most full and unreserved
apology on the part of
Dr. Gray, will ever induce
me to withdraw my letter
of resignation. I will not
on any case Off a-r-^t-*-->-c

That would make any appeal
to the Society. I have and
respect them; they must
know that I do, but I
will not again make
them my judges. Nothing
on earth shall induce
me to do it. —

In one respect
Yours

You shall mistake me.
Dr. Spry cannot offend me
in my character of a
Botanist, except by
daring, & as he has done,
to pin upon me blunders,
which would disgrace
my name, were I guilty
of them. No - he has
trampled on my rights
as a member - or a
contributor simply, if
you please, and - much
good may it do him.

Bolton 4th Dec 6 1839

Here is an order for additional plants. The Doona Poopa intervening I am unable to fix an earlier date than the 23rd inst. for the delivery, besides there are provisions applicants to be supplied whose turn comes before the holidays. I cannot spare any Olee frogs now. I should your wants have had one last week.

Thank You for Your kind invitation for this evening, of which I very much regret I am unable to avail myself.

Yours truly
W. W.
T. K. Robinson

Dr Wallis

Esq,

Have the honor to transmit
to you a Resolution of the Agricultural
and Horticultural Society of India
passed this day.

Have the honor to be,

Yours,

James Buchanan Esq,

President of
A.S.S. Society Room
Town Hall, Calcutta
Octob. 9th 1839

Proposed by (Chas Kuffner Esq) &
Seconded by Major Forbes

Resolved that all discussion regarding the
correspondence just read, be avoided -
that the consideration of the correspondence
be dropped in one day, - and that Dr Wallis's
resignation of Vice Presidency be not accepted.

(Three copies)

17 James Lane.

Oct. 9th.

My dear Wallace.

I return your Bookell's Johnson
with thanks and apologies for keeping
it so long.

There was not a very full meeting
to-day at the Agricultural Society,
but it was quite large and un-
usually enough to express some very
decided opinions.

Among these were resolutions that
the written Journal of the Society
shall contain nothing more than
is expressed at the meetings, or is
abstracted from communications to
the Society. That the names inserted
in the margin of the Journal, by

the Secretary ~~has~~ struck out by
the Chairman: - That though the
Secretary may insert notes in
the printed copies of the proceedings
yet that he shall never do so
against the sense of the confer-
-ence.

That any discussion of the com-
-mended between you and I ~~shall~~
shall be postponed since then; and
that your resignation shall not
be accepted.

Such is an outline of the project
which I thought you would like
to know; and I can assure you
the opinion was one of unanimous
regret that such a dispute had
occurred. Sir H. Stowe was there

I as you will perhaps, ascertain
before you see me, he will give
you more particulars viva voce.

Pray to meet the wishes of the
Society, and retain your position
among its members.

I am sure it is not in your
nature to be unforgiving, and the
members present all hoped that
ever long, proper concessions being
made, that you would agree
to meet Dr. Gray over a bottle
of Champagne, to be poured over
the misunderstanding instead of
the Waters of Lethe - and most
happy shall I be for my table

to be the Altar, and to find
as priest.

My wife united with me in
kind regards to yourself and
in best compliments to Gen.
and Mrs. Walker, and believe
me

My dear Walker

Yours very sincerely

J. M. Jackson

My dear Wallace

I pray have address his letter
added to the margin of our book of
proceedings, and before further, I
took the leave of the meeting when
there should not be expressed before
signed them, & being as part of the
as stated of the previous meeting.-
It was carried that they be expressed,
and I expressed them accordingly.-

I then read you **t&ZT-^ &*S** ^{action,}
and I pray read the correspondence which
passed it.- It was moved by Dr.
Huffnagle & carried that all consideration
of

of the correspondence be postponed for
the, and that your resignation of the office
of V.P. be not accepted. -

It was, last, moved & carried, that
no part of the correspondence, or proceeding
upon ~~the~~ it, should be entered on the
record, or given to the public, but that
we should consider the whole as secret,
having taken place. -

Mr Henry Seton came to the
meeting at my request, and I would
fain hope that you have some commu-
nication with him before you come to any
resolution. - I have ^{just} communicated the above
to Mr Edmund Ryan, who, most likely,
will

will write you before the next
meeting. -

Very truly

W. H. Murray

1 of P.M. Wey 9th / 39

D. Walker

to
his
care

Wm. L. Garrison

at large

My dear Robert

May I say that I am
with do on the point to
express to the Acol. Society
at their meeting tomorrow
that I am very sensible
of the kindly feeling which
induced the meeting on
the 9th ult. not to accept
my resignation. But
before I can enjoy the
honour of resuming my
former position among
them

^j^4^^ *# K.*^~^^y

to ask the society, whether
they would be so kind as to
send me in their secretaries
letters of the 9th ult. fulfilled
the obvious intention of
paying me a flattering
compliment, at the same
time

time they relinquish all
further consideration of
the ^{total} (existing) correspondence
without noticing in any
manner that the cause
of my grievance has been
remanded, and a recurrence
of it prevented for the future.

Most gladly would I
have dropped this matter
altogether and at once
rejoined the Society had
an intimation to the same
effect been conveyed in
the Secretary's communication;
namely that there is now
no difference between ~~the~~
the Society's recorded ^{minutes}
of Proceedings on the ~~11th~~ ^{11th}
September, and the memorand.
which I submitted at that
meeting

meeting, and that the ^{notes}
notes ~~which appear in~~
attached to the printed monthly Proceedings
~~being unnecessary~~, will not
appear in the forthcoming
of the Society's
Transactions.

V*M^VU4***s

I have the liberty to
enclose the original letter
from the Secretary referred
to above, with the Resolutions
annexed to it, for perusal

Botetown 3rd Dec 1837

Dear Mother

My way of variety here I have been with
part of the seeds, which although they have been
manipulated by the water test, in as much as
they are, appear to be for the most part, good
and fresh, at least the general looks so. The sample
I have probably this that these seeds, being a little
less than the rest - namely that portion which
took to the water - the kernel within has
swollen a little. As far as the quantity goes
which has reached me up to date, better

fo

than half has sent an immersion
and says that the whole batch is perfectly
fresh and moreover adds that it has undergone
the test by immersion, the official result
is set very early in November, so that the

U (A-

represent the floating & sinking portion
in process during the interval. but I can
the seed now forwarded that we know the result

two packets of seed to Mr. ... the
also sent yesterday another good quantity
and will continue to bring ...

Postscript 3 June 1892

Quilim, Dec. 1844

My Dear Sir,

Having been lately residing in the Plantations in Travancore where the Tea plants are growing, I am enabled from personal examination to form an opinion which you will find copied in the enclosed a copy of letters to the Gov^t of Madras & to Dr. Wight, and I doubt not you will agree with me that the success of the experiment has been established so far as regards the growth of the Plant in this State.

One of the leaves I have the pleasure to forward by Dr. Wight.

With this I also send an extract of a letter to Dr. Wight regarding a tree called by the natives here Vallatommara, and which it may be common in Bengal, but I do not remember to have seen it there. It appears to me peculiarly

suited to the tropical climate being of a growth which prevails here during the wet season and which weather occasionally experiences in this State.

Copy of the Report of the Committee on the Tea Plantation in Travancore, 1844.

21

you by Baughy specimens of the leaves, flowers &
such, It is of much use to the natives in this country
but they do not seem to be aware of the full advantage
that might be derived from it, I have observed for some
years past, that almost every plant growing within
the scope of its influence, seems to flourish in an
extraordinary manner.

In the event of your not having the
Racina Catechu in the Garden, I enclose a few seeds,

If it be not intruding in your busi-
ness I would ask you to forward to me by Baughy a
few seeds of any of the plants &c. mentioned in the
accompanying list, which you may have, & can
 spare without inconvenience, -

I am Dear Sir,

Yours faithfully,

W. B. B. B.

A. Halliell Esq. ^{24th} M. D.

Quilon 21 Decem^r 1850
R. Wight Esq. M. D.
Madras

Sir

I would beg the pleasure of
reporting in the Tea plants and also receive from
Madras and Calcutta in this & the last year.

Of the few plants received from the
received in June 1849 a small number are now in **f**
in the ground, about 2 feet high, & have recently thrown
out branches, some of the leaves are very large, as you
will perceive from the specimens sent, they were ex-
pected a few days hence some larger when grown being
9 or 10 inches long & 3/4 inches wide, their having grown
to this size is perhaps a certain proof of the adaptation
of the situation selected for them but **y** the best
test of the congeniality of the soil & climate. The healthy
plants received with this lot have not improved much
and are with difficulty kept from going off.

The greater part of the plants received in February
last in O. P. are, being then in a southern state have
still a very unhealthy appearance, many of them
I fear will be lost during the coming hot & dry weather.

Last year I obtained a small quantity of the
plant in flower from the Madras nursery, it was 12 inches
high with leaves 1 1/2 inches long. This plant seems
to be undergoing material change, fresh shoots being
sent forth, & the new leaves are of an increased size.
It is again putting out flower buds.

Yours
Manly

copy
For _____ Dublin 25th Decem 1839

The Secretary to Government
in the General Department
Madras

Sir,

Being aware that an interest is
taken by Government in the progress of the experi-
ments ⁴ that are being made in the cultivation
of Tea in the Presidency, I beg to enclose a
specimen ^{W *»} of leaves from some small tea, ¹ &
that were received by me from Madras in
June last year, the largest leaf that was gathered
measured 16 inches long & 8 inches broad when
green, this was picked from a plant not more
than 2 1/2 inches high, these were forwarded as
being the size rather smaller.

This largeness is perhaps the best
test of the soil, climate, & situation of the locality
chosen for the tea plants in Travancore, being
favourable to their growth, & would seem to
confirm the opinion submitted to Govt. in
my letter of the 10th July 1839.

A more detailed Report of the
cultivation I have forwarded to D. of High
of Madras, and to D. of Madras of

of Indenture with some of the leaves
I have the honor to be

Dear

From Montreal Dec 2

By J. W. M. M. M. M.
C. M. M. M. M. M. M. M.

To The Secy to the Govt of Bengal
Calcutta

I beg leave to acknowledge
the rec^d of your letter No
721 of the 16th inst. and to express
my deep sorrow and learning
that the Govt should be disappointed
at my not having yet furnished
the information required
in your preceding letters
Nos 695 and 566 of the 15th and
22nd July. I trust that his
Ex^{ty} will take into favor-
able considⁿ the following
statement and attributes
consequent thereon to the
circumstances which
details but are no account
to any useful proarrangement
on my part.

2 The duties of Secretary
to the late Tea Commission, which
I have performed during
a period of more than
five years, have been of a

a nature not only to absorb
a large portion of my time and
attention, but materially
to encroach upon the highest
scientific, and by far the
most congenial and
gratifying branches of
my duties as Head of
this great Institution, so vividly
distinct from the heavy
W // &<<< N are routine
matters of daily business,
that could not be interrupted
or put off. I am with truth
dearly, that my connection
with the State Council has
been
(official, (*-^LJ2L •? HULL
The Secretary has also
a member) has been a
source of intense anxiety
and unceasing laboriousness,
the disqualifying me from
by some measure of work
from attending to any other
work, and occupation, and
not seldom materially
injuring

impairing my health. It is
very possible, that to any other
person, the almost incessant
excitement thus caused, especially
during the last two years, would
have been trifling or transient,
if caused at all. Not so,
however, in my case, and
I am sure it will not excite
surprise, that I should feel
the effect, both as respects
my constitution, already
much impaired by my
actual residence in
India of very nearly nine
and twenty years, and
my capacity for again
undertaking any such
incessant labor. While
I gratefully acknowledge that
I have been cheered and
encouraged by the repeated
expressions of the high
approbation of the Honble.
Members of Directors, the
Supreme Government,
the

The Right Honourable Members of
a Bengal, as well as of my
late respected Colleague
in the Council, I now
solemnly declare, that I have
earned those honours distinguished
honours by dint of intense
body as well as mental
labour, exerted much
beyond what had heretofore
been considered as the
sphere of duties of the
Superintendent of his
Garden. —

3 The great interest
excited at home as well
as abroad in Europe, in
regard to Opium, can
not fail to have a due
influence on my proceedings,
and to call forth whatever
energy and zeal of which
I was capable, and the
peculiar nature and extent
of the duties of my late Office,
involving considerations
of high national importance,
entailing

contracting on the part ~~of~~ a long
and progressively increasing
expenditure of general public
affairs (many items of
which, so far as the Office
of Secretary was concerned,
has been disturbed with
the most anxious attention
to economy) placed me in
a predicament of real heavy
responsibility, that I humbly
conceive the aggregate
work connected with it
was quite sufficient to
occupy the attention whole
time of any one individual.
For a proof of this declaration
I most respectfully entreat
his Excellency to inspect
the voluminous mass of
records and papers of
my late office, now deposited
in the Office of the Revenue
Department, according to
the order of Government.

and even they do not coin [^] a
just idea of the large additi*u?
amount of private correspondence,
which has necessarily involved
upon me during the period
in question. Moreover, my
time and personal attention
have been repeatedly
demanded for matters,
to which may a complete
stranger, they being entirely
different from my ~~usual~~
pursuits or profession. To
mention only the most
striking among several
occasions of this sort,
they permit me to specify
the novel duty of preparing
and rec^o within garden,
- May **2** • in the house -
and embarking from hence,
of every ^{^KJkJ^A^^} /
of the that of Abram
Lea that has ever been
I succeeded to the doubt
the

the part of Directors. On me laid
the undivided task ~~of personally~~
of personally supervising
and conducting the details
of these several consignments,
on the issue of which depended
almost entirely, was the
question of success and
of some produce. My endeavours
in this particular respect ^{have}
been several times brought
to the notice of the Government
in various manners, by
the late Council, neither
of great consequence in
thinking, have they been
altogether unsuccessful,
or unnoticed by the highest
authorities both here
and at home.

4 It was the practice
of the late Council to
transact their business
entirely by means of
Circulars in which the
Secretary submitted all
matters

1 matters requiring them,
2 accompanying them with such
3 explanations and references,
4 as were necessary, and on
5 which were recorded the
6 notes of our resolutions
7 of the day. This mode
8 of procedure superseded
9 altogether the receipt of a
10 single casual meeting taking
11 place during the last four
12 years, but it had this
13 disadvantage, that almost
14 every individual occurrence
15 required a distinct written
16 explanation and reference,
17 beside being attended with
18 what proved a still more
19 serious personal inconvenience
20 to myself, by placing me
21 under the necessity of having
22 exceedingly frequent consultations
23 with the late Chairman,
24 and if I appeal to that
25 gentleman for a corroboration
26 of the fact, that I have had
27 to

to wait on him almost
innumerable times in the
execution of my duties. Led
so with a due sense of obligation
for that courtesy and ready
attention, which I never
failed to experience on
such occasions.

5. Having in the preceding
detail of capital duties, to
the performance of which my
sense of the ^{vital} importance of
establishing the tea-culture
in this country urged me
to devote my principal
attention, and endeavoured

H {A*A* to do in what
manner, and to what
extent my time as before
has been encroached

* &...
MI n lir^MJ' some
except of occupations, as
rendered it quite
for me to attend
at

at the Med. * Q College, with
that regularity, I could have
wished, especially during the
last two years, as professor
of Botany, to which post
his Lordship was pleased
to appoint me on the 1st Febry
1837. From the 23^d of that
month to the 20th June 1839
I have delivered three courses
at the College, aggregating
57 lectures, an elementary
and medical Botany, besides
a good many practical
demonstrations at the
garden, partly in my house
where the microscope was
called to aid, and partly
in the open air, on days,
when it was practicable
for a limited number of
students to attend, and
for that purpose A<*>A<*>
The whole number of my
class (Central) of course
not

which were it not for the great
sacrifice of time necessarily
incurred in going and returning,
I would willingly multiply
as an uncollared source
of delight to me, who
take such a deep interest
in that eminently useful
and valuable institution.
It is necessary that I should
observe in this place,
by way of explanation, that
the distance of the College
by land from the point
opposite my house here
is full seven miles, and
from the nearest point
in Salento 12 miles; and
as it would be
best to
I would serve to take
me up in a boat, and
perhaps not once to cross
me & both to Salento and
Spunt and back again,
I have with very few
exceptions

exceptions had to cross the
river down here, and perform
all the distance of going
and coming back, being
fourteen miles, in my carriage.
The ~~hour~~^{hour} fixed for the
lecture, was the earliest
which the circumstances of
the College would permit,
namely $\frac{1}{2}$ past 10 on
Tuesdays and Thursdays,
and thus the best part
of the day was consumed
each time when I had to
attend there, besides being
on my return but little
putajui & y for any serious
mental application for
that day. I used to attend
both at the College and
as the Chieftain of the
late Canaan, whose residence
in Chawingby, is only
16 miles, left distant, joined
at length altogether beyond
my

my strength or ability. I am
quite ready to admit, that
other individuals of more
vigorous ~~body~~ constitutions,
and not tried, as I have been,
by long residence under
a tropical sun, and by
frequent attacks of severe
illness, might have experienced
less difficulty or distress
from that source; but
I feel at the same time,
that upon this point of
physical inability, I may
only with the strongest
confidence rely upon his
Father's most indulgent
consideration. -

I respectfully venture
to submit, that until the
period I speak of, my
time had been considered
as adequately occupied
by the duties of my ~~post~~ ^{post} ~~of~~ ^{of}

of the Botanic Garden, and
that ^{AH} no **L** ^{****} ^{anxious}
has the attention of the Lect

L, diverted from the more
immediate objects of his
station. In my own case
I feel supported by the
conscience, that I have
always deeply applied
my feeble powers to every
additional mark to
which my attention has
been ordered, and most
humbly do I trust I hope
that the above detail,
which ~~may~~ at first
might have the appearance
of being foreign to the
immediate object of
purpose of this letter,
may be excused, my
object being chiefly to
specify the manner in
which my time has been
so entirely and incessantly
employed

accomplished, and humbly trusting
that these circumstances no
error in directing so much
of that time as furtherance
of the most agricultural
wise to day, which has
created such universal interest
everywhere.

It is to be
the Report of the
which have been called
upon

It) [*J>:-usJi••%, nx.),
in the beginning of his
letter, they to a great
landship, that no delay
shall take place, than
that these have relieved
from the exceedingly onerous
and responsible duties

information therein required.

Fort William
The 10th Sept 1810

I am &c
Obediently &c
J. A. Baskby
Surgeon to the Govt of Bengal

N^o 900

To
N. Wallich Esq. M.D.
Superintendent of the Honble
Company's Botanic Garden

Genl Report

Sir,
I am directed to acknow-
ledge the receipt of your letter dated
the 30th Ultimo, detailing the several
articles

duties which have hitherto prevented
you from furnishing the information
required in my letter of the 15th and
22^d July last and from attending
regularly at the Medical College
also stating that as you have
been relieved no further delay will
take place in submitting the Report
called for.

W. C. ...
L. ...
10740

2 In reply I am directed
to state that this explanation
shows that your time has been
usefully engaged, but the Right
Honble the Governor of Bengal
will now expect that your atten-
tion will be given to all the
requisitions of your office as Super-
intendent of the Honble Company's
Botanic Garden with the duties
there and to the Professorship which
you hold at the Medical College.

Fort William
The 7th October 1840

Sam^l
Edmund G. A. Buxby
Surgeon &c to the Govt

18
I have been thinking of you
of late that he should be
for all account of the paper

re

& !ffi ii

Have to acknowledge the receipt of your very kind
letter of the 27th December on the 15th instant. I don't know how
sufficiently to thank you for the splendid plants you mention you
have sent me by my friend Suba Coomra indeed I cannot express
how deeply indebted I feel for your kindness - such things as Phalaena
tris & the fine Coelogyne I hardly hoped to possess many years hence.
I pray you to accept my warmest thanks. The few plants I sent
you several days ago your acceptance but they were the best I had
and you have enhanced their value by the kind manner in which
you have received them. I regret they reached you in so bad a
state. I set the sail as near as I could pack to what appeared
to be its condition when I received the case. In future I shall avoid
too much moisture and as I can replace most if not all the specimens
that rotted on the passage you may expect them by the Ida on
her return. There is a vessel just sailing direct to Calcutta from
our port & I embrace the opportunity of transmitting this letter &
also a few packages of some of our newer seeds which I trust
will reach you in good order & help to keep up your stock of
hardy plants. Have the new Hippocrepis sent you (H. Orizaba
Burb M.B.) just now in beautiful flower & had there been a better
chance I would have forwarded it at once. It shall come by the
Ida along with some of my friend W.C. Roberts finest Hybrids of
which I have you a pretty fair collection. I don't wonder that
you are almost torn in pieces for Orchideae. They are so beautiful
& so curious as to attract every one. I sincerely regret that you
should not have the assistance of even one collector & hope the
liberality of the Indian Government will not long permit such a
state of things. The treasures yet laid in your fine country must
be very numerous & surely the expense of collecting them ought
not to be thought of. You have seen what may be done by com-
mission in the case of the Duke of Devonshire's collector Mr. Hibberd
who has added quite a host of most beautiful species (especially
of Dendrobium the most beautiful of all the Orchideae) to what was
formerly known. You are aware that it is not unusual now
for promoters of these plants to subscribe a fund & send out on employ-
ment collectors in various parts & I think no place would
be so happy for searching than Sylhet and Assam. Will you

Therefore have the kindness to write me by the first overland mail
stating whether a person (a native Indian I think's best) could be
had either at Sylhet or in Calcutta suitable for such a purpose
the salary he would require & the probable annual expense to
be incurred in bringing them to a place of shipment. This I trust
you can do without much trouble as your past experience will
afford you the necessary data though of course a few private
individuals could not be expected to carry on such an undertaking
in a systematic & systematic manner. Still I have no doubt
much might be done at no very great cost according to the
published official accounts of the wages of the natives in India.

I am aware you experienced great difficulty in cultivating
the Orchidea in your magnificent garden, which has often been
mentioned to me by Capt. Currie in flowing terms, had had no other
that grows so low down as 2000 feet were amongst the number
You are worse off with contractable plants than we are in our
heat but you cannot produce cold. Perhaps the Assam tea leads will
reach here also. The cultivation of that plant in our own Territory is
now becoming a matter of some consequence for I presume you are
now at loggerheads with the Chinese. I am sorry so few of the
American seeds had succeeded - they were collected by Dr. Gardner to
whom I am a subscriber - He has discovered many new plants
in the interior of North Brazil but his distance from the coast is
so far he has no standing seeds or living plants. It is now, owing to
some disturbances in Oeiras making his way south from that
City intending to travel inland to Rio. Perhaps some seeds are
exported & I will if possible find an early opportunity of sending
you a few. The observations as to the Hyacinth trial at
your country and seasons will indeed be most useful.

And now a few words as to what is doing in the Botanical
First of all you will be glad to hear that there has just escaped
broken up & dispersed. The fact is our finances are not in the
state that it was recommended that the garden should be put
a better footing than heretofore & the attempt was made to use
opportunities to do away with it altogether. Fortunately the
for would prove number of both Houses of Parliament made
eulogy against the sacrifice & the matter was dropped. I
shall eventually obtain a regular grant to maintain this class
spot as is now given to the British Museum. You will probably
have heard that Mr. Hooper has lost his class & has gone
fear in Jamaica where he had been recommended for the sake
of his health. He was a very promising young man. His young

Sa-Lf<

is now with the Antarctic expedition to which he was appointed
 assistant Naturalist. Sir Wm is now publishing papers
 on illustrations of the fructification of Ferns & his *Spore-plantae*
 he has also recommenced his *Companion to the Botanical Magazine* in
 which he is describing Jardine's Brazilian collections. They are forming
 a new Botanic garden at Glasgow on a more extended scale. At
 Edinburgh hear of nothing new. Dr Lindley has just published a
Theory of Horticulture which promises to be very useful though there
 is not much really new in it. By the way he attended particularly to
 the packing seeds in India & mentions Dr Falconer's method of drying
 them thoroughly, packing them in coarse paper & putting the papers
 loosely in coarse canvas bags says they have germinated so well
 that we can scarcely say that the failure has been greater than if they
 had been collected in the south of Europe whilst he says the general
 practice of packing Indian seeds in close boxes, waxed papers, bottles &c
 has been proved so bad that "the hopelessness of raising plants from such
 seeds has at length become so apparent that many persons have
 altogether abandoned the attempt & will not take the trouble to sow
 them when they arrive" - this may be of use to any who may ask
 your advice on the subject. Lindley has also issued a 3^d Edition of
 his *Introduction to Botany* which is a decided improvement upon the
 former. He has also published lately a description of many of the plants
 of the Cape Colony. He proceeds with his *Sertum Orchidacearum* but I
 should think at a low rate. Mr Balfour set on very slowly with his
 magnificent *Orchidacea* >S/jkc***\$(&* & ** ^' . \$***' & +***** M,*
 aware of the death of the Duke of Bedford last August. Some plants to say
 the collections are to be kept up. The Duke of Devonshire has nearly
 completed a magnificent tropical conservatory at Chatsworth which
 he proposes shall form part of the carriage drive at that fine place.
 The Horticultural Society of London is also erecting a fine conservatory for
 plants kindred is assuming more & more the character of a joint stock
 nursery from whence thousands derive the various new plants introduced.
 They have a collector out in Mexico who Perkins has heard by been as
 successful as they could have wished. Schomburgk reached England
 some few months ago - he brought over seeds of the celebrated Victoria
 regia but they have not yet vegetated. The Rev. Mr Herbert is now
 occupied with the *Podacea* line & expects shortly to have as complete a
 treatise on that Family as his work on the *Amaryllidacea* to which
 latter he invites me he is preparing a supplement. Dr Robert Brown
 has had one of the Copley medals awarded him by the Royal Society
 for his discoveries. I don't recollect any further botanical news
 worth communicating.

Here are all running wild about railways & the penny

opened until they arrive
at their destination. The great drawback on the old
great drawback on the method near this, had to
be made ~~was this that~~ ^{plants were necessarily} ~~to be watered~~

X

The Chinese empire
 is beyond all question
 abundantly supplied
 with the most interesting
 and valuable vegetable
 productions, yielding to
 no country on earth
 in that respect. The
 nation is not only
 fond of ^{horticulture} gardening in
 all its branches, and
 under ordinary circum-
 stances much aid might
 be expected from the
 native gardeners in
 all the large sea ports.
 Very few Chinese plants
 comparatively ^{recently} speaking
 have found their way
 either to India or to
 China, says and I can
 with safety recommend
 that any object which
 may appear new and
 curious

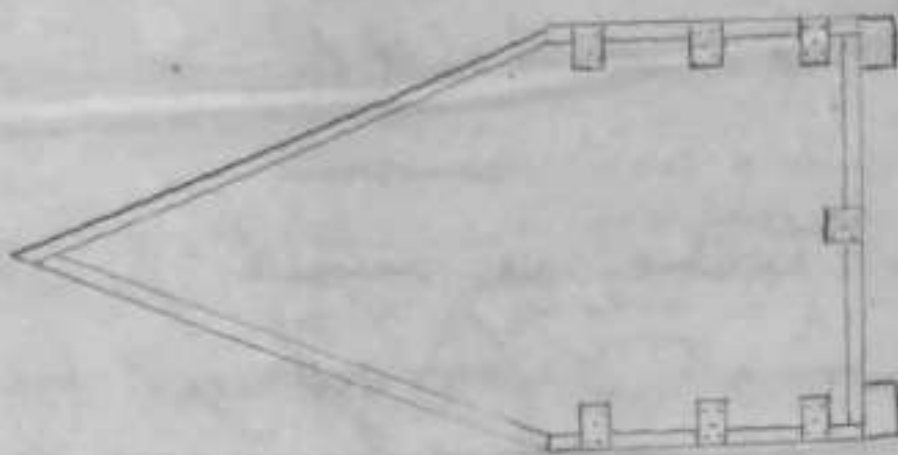

part in it than layers of warm dried earth or sand on a stone
 the former made in by fire the latter -

Remarks upon *S. Mallick*
upon of the Garden
at
Calcutta

in Mr. Robinson
7 13 Jan 1742

Page 2. *Saturea Fastuosa*

Found in Ceylon - & called by the natives *Kalee*
Attana. I cannot find any notice of it in *Sandley's*
Flora Indica nor do I consider it would be worth
collecting; notwithstanding the *Saturea Stramonium*
grows in such abundance in England & is ex-
ceedingly energetic in its properties.

Mangosteen

This from all accounts succeeds in Ceylon.
since I am told that there is a tree in the
Govt. Garden at Calcutta that bears regularly.
I have not been to visit it owing to the
great distance between Calcutta & Tridacina.
Some of the fruit I tasted at Mr. Bellucci's
the Governor's in Colombo in Sept. last and
from the little flavor that I found it to
appear I did not conceive it worth my ex-
penses, to increase the stock by attempting
to increase the stock by attempting to obtain
some seed.

Cloves I have 2 trees that yield a abundance of
seed. & could supply any number of plants
proceeded, due notice was given me
I have no doubt but that the Clove might
be cultivated in this Island with great profit
if we were able to find any person on the Island
who could give me any information on the
subject.

subject or any well work^{L^} \$Z*d&2tj>
on the same. I have taken the pre-
caution of planting out some 50
plants in the R. B. garden, in order
that whenever I obtain sufficient
knowledge, I may undertake the pro-
-paration of the fruit.

The great difficulty in preparing the
Clove for the consists in 2 things - viz
First. That the fruit must be collected
before the flower expands - & hence, being
all done by hand, renders it imperative
that each plant should be topped
at not higher than from 4 to 5 feet.
This brings me to the second diffic-
-culty - viz that the Clove tree, unlike
the Cinnamon, does not bear its fruit on
the sides of the lateral branches but
on their apices. & moreover that in lieu
of the lateral branches growing horizon-
-tally, they all tend vertically - Hence
these must be topped also and con-
-sequently could not bear fruit.

Nutmeg - The Nutmeg trees now in bearing in
the R. B. garden are said to have been
grafts on the Wild nutmeg
The bear, myself, & others have repeatedly
attempted the same but always failed
I find the same difficulty in get-
-ting Nutmegs to germinate - the
best plan is to destroy at least one
half of Prop.

I have great

request to state that the produce was
less in size & with much less aroma
than the Nutmegs of Penang - They had
also a poor shagreened appearance in
place of the Rumpous that the others
possess - Nutmeg plants can be ob-
tained from Penang (by sending for
them) all expenses included at about
1 Riy dollar each.

Papaya - Very Common

Guilandina - This appears to be a medicinal
drug - We have 3 species on this Island
Sudley in his Flora Medica says "The
seeds in powder are powerfully tonic-
decaudalle says they are supposed by
Malabar Indian doctors to be tonic &
diuretic

Odina - Not to be found either in Sudley
or decaudalle

Moringa - Common as a vegetable in this Island.

Adhatoda - We have the Justicia Adhatoda on
this Island - The natives use it to cure
fevers and many other diseases - decaudalle
speaks of its leaves being bitter and
aromatic

%*m

Both are greatly wanted u < /&£/* >
The former for its timber, the latter
for its fruit

Page 2

Mango -

There is a great variety in this Island
but of inferior quality to those of the
Continent of India - caused without
doubt by difference of climate.

Plantain - Very Common

Pine Apple. We have 3 or 4 varieties of the fruit
nevertheless fresh species would be
desirable, provided that the last would
be moderate.

Sitchie. Of this we possess a few
hitherto they have not produced any
fruit.

Sogaah. Beautiful

Pamplesmon. do

Daduan Cayaville. — Not known in this Island
Very desirable that a supply should be
obtained.

Alligator } Very common.
Pear }

Peach. This we have got. but it does not
appear to bear good fruit lower than
Pudava.

Abocochara. —
Not known here - nor can I find
any notice of it either in Sw. Allegor
Sauvion's Works.

Sapota. According to Sauvion a delicious fruit
Very desirable to be obtained.

Fig. — This we have already.

Samrool. If this is the fruit which Sauvion speaks
of under the name of Samrool it
is a very good fruit & very desirable to
be obtained.

Whampin. Beautiful

Island Apple. do

Soursop. Got.

Ray &
nanettia Cordifolia. — Very desirable that it should
be obtained.

Ray &

milay. & W*yu>tA*Jf* - ^fe do not possess this

never id. remarkable - except as a curiosity.

of the old ones } Got
Indians

Maclure, } Very available
Lactaria

Prunella } Got

... } Very available

... - Several good thin species either in

Monsieur le Comte de Saxe
à Paris
Je vous remercie de votre lettre
du 27 et de la bonté de votre
accueil, mais bien plus de
votre amitié pour cet ouvrage
qui vous a été présenté au
Royaume quelques années.

Les deux Livres que je vous en
recevois ont besoin de réparation
et ont été envoyés au Jardin avec des
pages de papier et le fond pourri
pour être réparés comme il faut
et l'ont été déjà et pour les autres
il faut aussi que je vous envoie
quelques autres que j'ai eu de
M. de la Harpe et de M. de la Motte
à la suppression.

Vous m'avez demandé une note des
autres plantes que vous aviez pour le
Jardin de Montpellier et je vous en
enverrai une copie incessamment. Celle
de M. de la Motte de la distribution de
Paris n'est pas encore faite et je
vous enverrai celle-ci quand elle
sera faite. Je vous enverrai aussi
quelques autres que j'ai de la Harpe
et de la Motte et vous les enverrez
à Montpellier.

Je suis avec toute l'estime
et l'affection possible
Monsieur le Comte de Saxe

August Esq
Off Secretary to the Medical Board.

Sir

I have the honor to acknowledge
the receipt of your letter N^o 705 of the 28th
ult. Desiring me to state, where it is
my intention to avail myself of the
Medical Certificate granted me ^{two months ago} nearly
and if not, to return the Office to

2
If I correctly interpret the
spirit in which the Certificate was
granted in my case, it was not as
an alternative under any existing
Disease, but to enable me, by a voyage
to Europe, to avoid further attacks
of Cholera, to which my constitution
had become predisposed by two
preceeding severe and increasing
attacks of the same Disease. If I
am right in this view I anxiously
hope that the ^{Medical} Board will not insist
on my immediately relinquishing this
Certificate, the more so, as

v^-d>*_*_*_*_*
assiduously

conscientiously declare, that it is my
full intention and desire to make
use of it, as soon as I can do so
in justice to myself and those
that are dependant upon me, — and
certainly the instant that I find that
my health is unequal to the performance
of my duties.

3
I trust it is ^{quite} needless for
me to assure the Board ^{of my} want
of due respect and deference to their
expressed opinion, nor by no means
been the cause of my having failed
to anticipate your letter, by so soon
submitting the above explanation.
My impression was, that the Board
^{at least one of its members was} aware
of my predicament, and that ^{the} Board
indulgence which had been shown to
me 14 years ago, under circumstances
of actual illness, would be readily
extended also to the present occasion.
In the instance I alluded to, I left
Bengal for Europe on the 1st
in

on March 1828 although the Board
Certificate was dated then in October
the preceding year.

Yours &c

Musal Garden.

Fort William 12 March 1862

Sir,

I am directed by the Medical Board to acknowledge your letter dated 5th Instant, and to inform you in reply, that the Board do not consider your reasons for retaining the Medical Certificate satisfactory, and they therefore again desire me to request if you do not mean to ^{^Ct>—*9t*.^X><t.O.} yourself of it, without further delay, that it may be returned.

& t * 4 > < > < ~ ? * / ' foyrr - ' - " & * * * * * •

Health that you may deem it
necessary to submit, will meet
with due consideration. -

I have the honor to be,
Sir,
Your most obed^t. Servant,

Wm Augustus
Offs. Secy. Med. Dep.

Wm Augustus
12 March
1842

L. C. G.

To

The Council of the Medical
College.

My dear friends & Colleagues—

I return you my cordial thanks for
the honor you ^{did me} yesterday in being present at 2 O'clock
at the competition for Sir Auckland's two botanical
prizes, and for adjudicating there after the examination
was over. If the result of this field-day has proved
one half only as satisfactory to you, as it really was
gratifying to me, it will afford me very great
pleasure indeed.—

You observed that I had taken up from
the garden some ^{***. * «^ε*** i mens'~jfo 7%Zl WWA}
purpose of testing the Candidates practically; and
that in most cases the answers I got were excellent.
The specimens were ordered quite at random, and
you will have noticed that the very decorations of
the theatre on the occasion, afforded me unexpected
but very fair means of, if I may so say, ^{ask} questions—
—[—]ing the boys in several instances.—

With your consent I challenged ^{'M t+sC&dk}
not to fear our hesitate to come forward, we case any
of them desired to enter the arena with the three
Candidates whom I had pointed out to you, as by far
the

the most advanced among the Students in Latin
I think it showed a proper feeling, on the
part of the Lads that not one offered to come forward

The Candidates were Sathuram Sutt, Andrago
& Ponnus Coomar

There is another past Student, Kudde Chindan
Chowday, who is stationed at Hooghly, whom I should
have named among the best of my class. He had
due notice of the hour and day of the Competition,
and in fact he promised me some days ago that
he would be present, if summoned in time. How
ever he did not attend owing, I dare say, to some
professional detour.

You very properly adjudged the first prize, a
large Compound Microscope to Sathuram Sutt, and
the second, a small pocket Microscope to Andrago,
justly remarking in delivering them, that the
difference in the degree of proficiency shown by the
Candidates was not so great or marked, as the
size and value of the two prizes Microscopes

Unfortunately Ponnus Coomar Miller could
not be rewarded, for we were limited to two prizes
I say unfortunately, because to my positive knowledge
the boy is equal in botanical knowledge to the two
successful Candidates. In every true, he manifested
on one or two occasions some hesitation in answering
questions that were put to him, but that was owing
I am confident, to a little nervousness on his part,
and perhaps I may have, unconsciously, been a little
more severe upon the poor lad than I intended, owing
to my experience of his skill and readiness in many
things

taught botanical questions. But with these very
very few exceptions Professor Coomar Witter was certainly
by out decided to Oudartje during the examination;
and if you kindly consider, that three only of the
very large class ventured to stand forward as candidates I am quite sure you will agree with me in
Opinion, that he is deserving of being distinguished
on the same scale with Oudartje. All these are
most excellent lads, equally attentive and zealous
and I feel justly confident that, had Lord Anstons
been here, a third prize would have been readily
added to the others.

Under these circumstances, let me entreat, of
you to recommend to the Sub Committee that a
similar microscope, or botanical book to the same
amount may be bestowed on Professor Coomar Witter.

Bot. Garden }
April 1st - 1842 }

Your Very Sincerely
J. St. Hallett

Cary
To Mrs. Hammond of
The Mass. College
1 April 1842.

W. J. A. Puckley Esq.
Secretary to the Government
of Bengal in the
General Department

No 91

I regret much
that circumstances at length
compel me no longer
any longer submitting for
the equitable consideration
of Government, the purchase
of my claim for
an indemnification on
account of the heavy and
constant expenditures of
money to which I have
been and still am subject
these few years past and
in consequence of
my volent to
teach at the Medical College
as Professor of Botany &
The expense to
which

which I refer is that for
conveyance by
land to and from the
College: { At the time when
I entered upon the duties
of my new function, in
February 1837, which, as
will be seen by the accom-
panying original letter
from the late ^{Principal} ~~Mr~~ Bramley,
dated the 24th May 1830,
was only designed should
be light, it became necessary
that I should provide
myself with the means
of land conveyance. The
distance, ^{are no doubt} you ~~would~~
be fully aware, from the
School opposite my
official residence, to the
College

College is ~~full~~ ^{fourteen} miles,
and from the nearest ghaut
in Calcutta it is $1\frac{1}{2}$ miles,
so that a boat is not
^{for my journey} sufficient, and it is obvious
that the tide would but
rarely serve to take me
both to Calcutta ^{and} ~~ghaut~~
back again. I have with
few exceptions therefore
had to cross the river
opposite my house, and
to perform the rest of the
distance, both going and
coming, that is to say
full fourteen miles, by land.

Indeed, were it otherwise
the time would not be sufficient,
nor could my arrival at
the College be calculated
on with any approach
to

to regularity. Moreover
some sort of conveyance
from Calcutta ^{the} ~~to~~ ^{river side} to
the College at Puthulunga
would still be required
to be kept up. -

3. The hour fixed for
my lectures, although
the earliest which the
circumstances of the
Institution will admit
of, is one, which necessarily
exposes me to the heat
of the day, being from $\frac{1}{2}$
past 10 to $\frac{1}{2}$ past 11, occa-

sionally to $\frac{3}{4}$ past 11, ^{twice every} ~~at~~ week, namely on

Tuesdays and Thursdays, throughout the east Sepia.

This with crossing the river
and travelling to Puthulunga,
and the same time in

returning

returning brings in the
middle of the day: On ^{very}
particular or urgent
occasions I have likewise
been in the habit of
attending Council meetings
of the professors at the
College on Saturdays at
2 o'clock; on which occasions
I am kept out the greater
part of the day. My time
is ~~to~~ so fully occupied
with the ordinary official
duties at the Garden, as
not to admit of my
remaining generally at
the College beyond an hour,
or an hour and a quarter;
and hence the necessity
which exists for the
maintenance

maintenance of a relay
of horses. This is an expense
wholly new to me, for
before ^S ^{e*s £&?*fi^'Z**^f*^>} my
assumption to the college
I kept no horse conveyance
^{#L*t^*/} sort. I have accord-
ingly been compelled to
maintain an establish-
ment of a Carriage and
two pairs of horses during
the five years and more in which
I have been ^{connected with} assisting the
College, at an expense
averaging \$2000 per
annum; ^{which fact} I am
prepared to authenticate
by the production of
satisfactory vouchers.
This expenditure has
Wm. H. Hays

Therefore proved to me
a very heavy burthen;
I confidently trust that
the Honble the Deputy

Governor will consider
it one that I ought re-
spectively to be relieved
of, and ^{this} which relief it is
is the object of ^{the present} ~~the~~ latter
application most earnestly and anx-
iously to solicit. I ask
for no pecuniary ^{re-} ~~re-~~ if AU < - -
neration for lecturing
on Botany at the Medical
College, which His Honor
is quite aware extends ^{now} to
to a complete course, bears
receiving the pupils frequent-
ly at the garden; although
the time and attention of
the

the Superintendent of
the Garden have at no
previous period been ~~devoted~~
devoted, as they have
in my case, from the
immediate objects of
his charge. Appreciating
the object of Mr Bramley
in the promotion of the
great cause of Native
Medical Education I
readily proffered my ~~full~~ humble
aid in the execution of
the good work, without
desiring to put the Govern-
ment to any additional
expence. But on the
other hand I feel confident
that it was never con-
templated that the faith-
-ful

=ful of ^{Lfr}formance of the
& in and various duties
such as these have ⁱⁿ
been ⁱⁿ ^{to} should
have ^{by} the effect
of reducing my former
established income by
at least 120 Ropis per
month.

To

N. Wallich Esq. M.D.

Superintendent of the Honble
Company's Botanic Garden

Sir

Genl Encl^d
Encl^d

I am directed by the Honble
the Deputy-Governor of Bengal to acknowledge
the receipt of your letter dated the
14th Instant claiming to be reimbursed
retrospectively from the date of your ap-
pointment to the Professorship of
at the Calcutta Medical College the expenses
incurred by you for maintaining land
conveyance &c. at Rspees 120 a month.

2. His Honor fully admits the
value of your professional services given
to the Medical College but he cannot see
any good grounds to justify a recom-
mendation to the Supreme Government
in favor of a claim advanced after a
period of upwards of five years and
apparently without advertence to the
peculiar circumstances of the case.

3. On the occasion of appointing you to the office of Professor of Botany the Government of India recorded its opinion that the duties of that office could be fairly imposed on the Superintendent of the Botanic Garden without further remuneration and for the purpose of your attendance at the College your application for a Boat was complied with at a cost of Rs. 2550. An allowance of 5000 a month had been previously sanctioned for the maintenance of a Boat and it was with reference to the sanction of the Government that you incurred the displeasure not long ago when it was discovered that your lectures at the College had been neglected for a very considerable period.

4. You are doubtless aware that the large salary attached to this appointment

appointment of Superintendent of the
Botanic Garden is personal to
yourself and when to that salary
is added a most desirable residence
rent free, the Honble the Deputy Govt
do not think that a case can be
made out for imposing any additional
expense on the Government in con-
nection with your discharge of the
duties which you are required to
perform at the Medical College &
occupying only from 2 to 2 1/2 hours
weekly. -

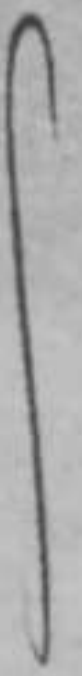

Col^d Williams }

Dear Sir
I have the pleasure to inform you
that the Committee have agreed
to the proposal of opening the
road to the sea, and that a day after
the meeting two of the equal
condition. The cutting of the road and
the work will be in full
order, and reach the sea in
which you were kind enough
to send some of your men who
cut the road and flow freely.
I do not think they will go out with
the tide. I will visit you.
The Committee have with you
the day of the irregular that there
which had been a day longer
the way that would be in better order
than the way that arrived at
the Committee's things there, but one
of which there is any chance

N. Wallis Esq. D.

I think the first 3 were more
rather or so much as that the
kashn stepped off from the wood
(if wood it is) one of them which
arrived the other wing was
more firm and appeared to
believe more ripened or more
the than the tips of both which
I will not send them to
be anything worthy of notice
that the two root tubers were
not in favorable conditions
either for use or they were
dry. As you observe
is of great consequence of the
I think we have been told
try and get some from the
in order to take advantage
of your assistance down
the goods you were kind enough
to send arrived in good order
I am very thankful for them
I received the two boxes
am highly delighted with them

Dr. Paxton is a neat work and
a very convenient, and valuable
companion for the Gardener & however
the Print is too small for me for
my eyes had been much injured
since I have been in America

We have been almost drowned
lately it having rained through out
the whole of ~~the~~ ^{the} month full here
you say "scanty supplies" and "pests"
with eternal "putting" Dear Sir how
can you be so? why you

have only about 500 Acres of Land
and ~~at~~ ^{at} most that 200 men & 100
of a. while I have 2000 Acres
and send down less than 3000 men
and sometimes 5000. and the more
trouble I get. ~~the more~~ ^{the more}

trouble I get. It's dreadfully annoying
to have to do with people who know
no more about plants or cultivation
than a dead Turk and especially if
they don't know the Language of the
~~country~~ they are then worse than
Dr. ~~Wright~~ ^{Wright} for he ~~is~~ ^{is} ~~not~~ ^{not} ~~ignorant~~ ^{ignorant}
tho' it is necessary to Dr. Cary to be
so ignorant of Plants more your

Journal of B. Walker, Esq.

On the evening of the 15th B. Walker retired
to bed in his usual state. He
woke with a peculiar fullness of the
stomach he was awake by frequent coughing, being
up as he supposed particles of phlegm. The cough
continuing he was induced to get up for the
purpose of examining the nature of the expectoration
and found his handkerchief completely saturated
with placid blood but not frothy. In this state
he continued about an hour discharging blood
without pain or effort; there was no fever, coldness
or uneasiness of any kind existing, a slight
degree of dyspnoea. At 2 o'clock he
again retired to bed, and slept, but somewhat
uneasily, and two or three times he brought up
small portions of dotted blood and mucus. At
5 o'clock he went off to Dr. W. Apert Lussan
Spring, the road to be very impracticable
from the number of trees blown down by
the late gale; who on his arrival ordered
sulphuric acid in Decades of Part. with
small doses of camphorated tincture of opium to
be taken frequently. —

on

An visiting Dr Wallcut in the evening with Dr
Frog it was thought advisable to give him Digitalis,
Liquor and Hyoscyamus, and to continue the Sulphur
aid, smothering the decedent attacks. He was at this
time in the blood.

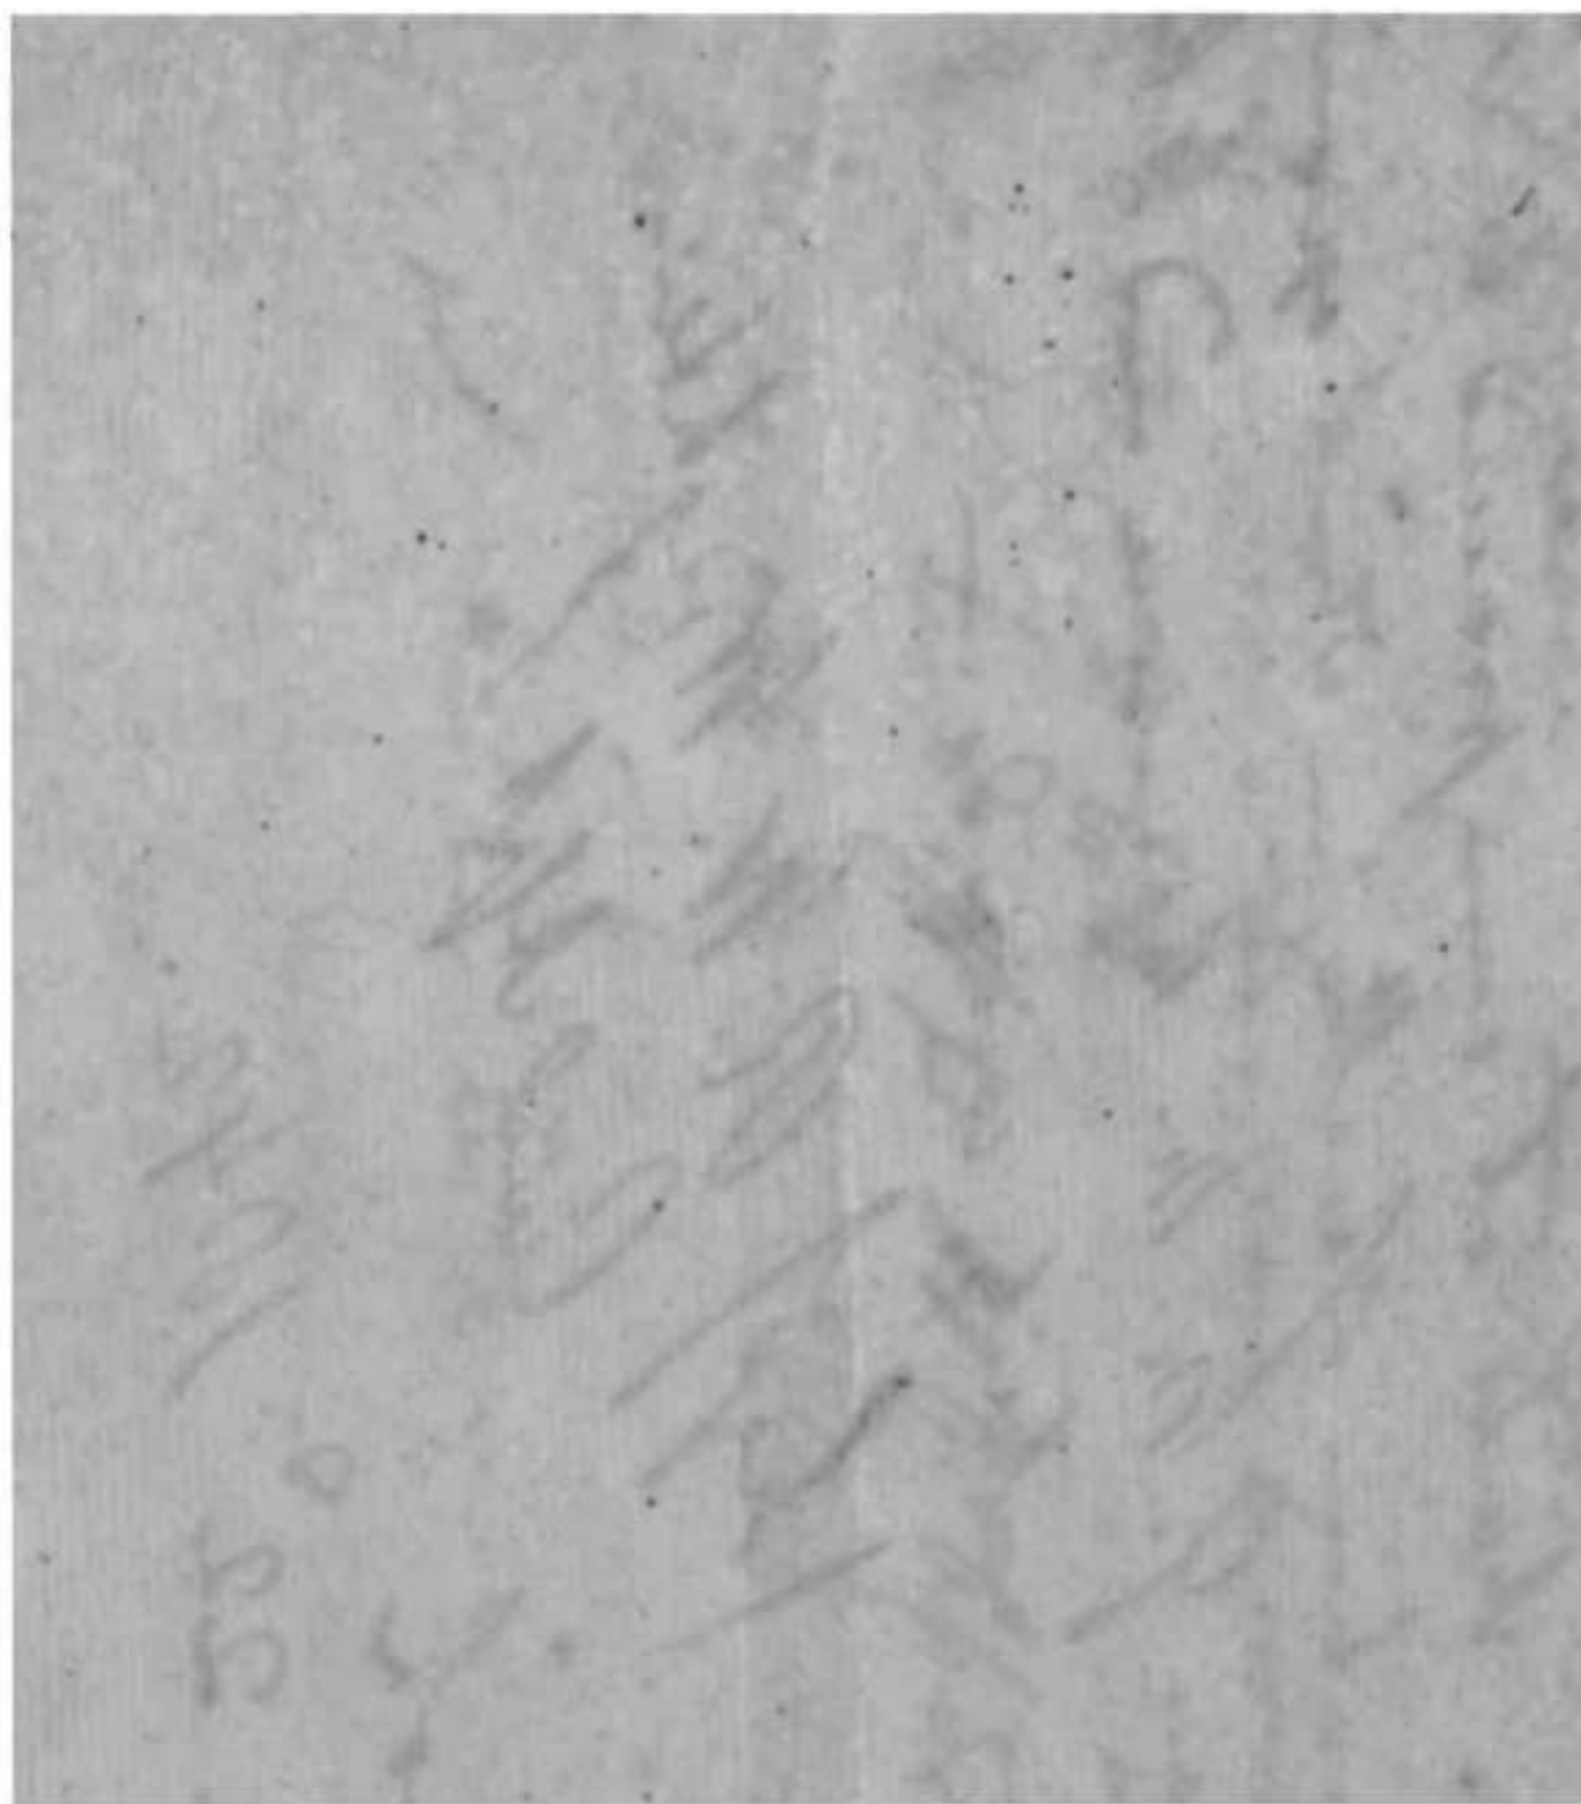

During the last four days there has been no return
of the symptoms. On Friday morning he had a
rigor and at night profuse perspiration appeared.
The nocturnal sweating has since continued, with
any other symptoms of an intermittent nature
type.

Considering Dr Wallcut's present condition
and the severe attacks he of cholera he had
August last, and subsequently serious disor-
ders of the urinary organs, I believe it absolutely
necessary he should at once proceed to sea
for restoration of health in which opinion
I amurgeon J. M. M. Harrison and Dr F. H. H.
strongly concur.

H. N. Spring & Co

Dear Sir

I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the proposed purchase of the building now occupied by the American Board of Commissioners for Foreign Missions, and in reply to inform you that it would be a great indulgence if you were pleased to afford me your valuable services, pending my making the necessary arrangements for going to the Cape; and also that I might by a little relaxation from constant duties recruit my strength somewhat previous to embarking. As an old servant of the Company, and for many years presiding over this Institution, I feel

Yours

My dear Sir;

That there may be no mistake
I beg to repeat that I propose to
leave Kioo on Tuesday ^{morning} first,
and return by Saturday.

I have already enjoyed two
young ladies to buy your plants
and several ladies to collect.

and intend also to "span in"
a German Missionary to assist
in collecting with his
scholars, as he mentioned
to me some time since
that he is anxious they should
receive some instruction
in printing.

I believe I also mentioned to you
that Mrs. Penfold intended going
to the beach with her family and
heron with her, two or three days
from now will enable you to collect
the fungi and beautiful
beach plants and theros
plants. My room is also to
undergo a slight separation
hence I will probably be obliged
to buy of you to take up your
your quarters near us.
I say probably, because I do
not know when the masons
will come & when they do I
must take them, we can
say to day when Mrs. V. can go
to the beach.

I will take care at all events to
have two comfortable rooms
ready for your reception in
a quiet situation although
our country town is not very
noisy. Mrs V. enjoys with me
the prospect of having the pleasure
of seeing you here and profiting
by your labours in examining
our beautiful flora and
receiving ~~some~~ instruction

I am
Yours truly

J. Venfold

Sturminster

20 Nov. 1842

P.S. At the beach you will also be able to
examine the commencement of the

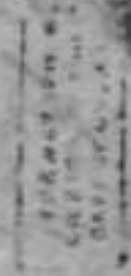

mountain range which stretches from
Cape Horn up to near Chavillan
on the Grand Ice when you are
going with Mr. Peckham to work for
you will say that I have a great
of power of the nation etc for his

Stett. 18 Dec. 1842.

My dear Sir,

Jtu*/- \$''• ^ my the the Lips. Koton.
Cromer yesterday who told me that
Mr. W. Lear is going to the mouth
of the ~~Hoosung~~^{Lipkants} river and not to its
source in the hills as I understood
you to say. I always understood
from Mr. Pugh's old the Civil Commission
at Clamvilliam that the Thermometer
frequently rises in the summer to more
than 100° in that part of the country
moreover most plants have dried
off in the plains whilst there are
many flowers on the hills it
appears to me that the best field
for a botanist at this season
is the range of hills commencing
at Clamvilliam and ending at
Cap-hanglip and towards Calabon.

Don't my dear Sir take offence at my
intruding my opinion - take them
rather as hints thrown out for your
consideration. In the plains you
will be roasted and eaten up by flies
at the ~~bottom~~ ^{base} of the hills you will
find good quarters as Stillwater
V/r ^ ^ ^ h ^ y ^ ^ ^ r Breakfast, French
cook, Paart, Tubbag and the Oh
Dions. In the hills at W. I. Gading
Palmett river - Poloni's French cook
in the hot-eld you will have a
European climate, cherries attaining
here only great perfection - and at
the elephant river - bath - at its source
in the hills - W. McLean will be
better able than any other person
to advise you in this matter. At all
events I hope to see you here before
you start on your journey

and regret that an attack of
illness has prevented ~~me~~ ^{me} having
from enjoying this pleasure
sooner. **C/A*^** be on the

look out every post wagon
day of this week.

My dear Sir

My truly yours

J. Kerfoot.

Have you seen my friends
at Johnston's & Clasen's?
Farris' wagon will also start
on Wednesday first from
Capetown.

Essex. Magnesian

Search

Sir, Dated 11th November 1844

An audacious theft has been committed here last night by which this garden has lost one of the most valuable and elegant plants of the Malabar Islands and there is but one individual left: and that individual being in a sickly state. It is a species of *Dacrydium*.

'JZ, /4~S ~~~~EZ

2 The two ... who have charge of the Conservatory are ... Their watch is confined entirely to the conservatory, the one from sunset ... the other from that time until the men come to their work at 1/2 past 6 (at this season of the year). Their names are Masoo Singh and Thomas Singh.

I irft

The plant was seen by the Head Gardener yesterday evening, about the time when

Jr~£*» A*t< Sing</. was placed on duty. These
cannot therefore be the correct ^{but} doubt, but
the plant was abstracted during his, or else
the other man's watch.

4. It is proper for me to observe that
both of these men had their wages cut within the
last 10 days; Ghomansee for being drunk on at the (J#*J- it
being ^{was} placed at his post on the evening,
and Kaisee (3 days ago only) for breaking
a hand-glass on a pooka bed, his ^{was} care
lessness, being at the time ^{at} his post.

4r s

5. It is possible that the missing
ft (t*i .. it may have been plucked up by some
malvolent villain, merely on purpose
to do harm to the garden, or to bring the
Chowkedars and others into trouble; and
I must say, that the appearance of the
«^1>'&/+•/,/C+mtt^r^y^uy.,*J~j\$£f~
case I should be inclined to suspect one or
both the Chowkedars now sent to you, of the
deed. But either malwalence or robbery
has been the ^{cause} ~~same~~ I entreat you to cause
such enquiries to be instituted, as may lead
to a detection of the offending party. The
property in the Honble Company's Botanic
Garden

I have considered ^{^ ft / 'most} the ^{Vc-⁺C} value of
plants; and I am sure that you will grant
us the same protection for them, as if the
property consisted of any other valuable
articles whatever.

There are circumstances which
have come to light lately, connected with
robberies and spoliations committed
in this garden during the last two years,
which it is my duty to bring to your notice,
^{on the present occasion; it is desirable, however,}
~~but under present circumstances it is per-~~
fectly that I should communicate them
personally, which I will have the honor
of doing without delay.

Shave the honor to be

Draft of Letter sent
to the Board of Directors
dated 11. November

Demerits of the Cyclopedia
Proceedings & Minutes
Chas. K. Blair -

From

D^o A. Wallich, Capt. W. Pitt Rivers
To

H. J. Cockburn Esq^r.

Off^r Magistrate,
Maurah

Sir,

Yesterday forenoon I took the liberty
to report to you that a grievous spoliation
had taken place here during the preceding
night, by which this garden had lost one
of its most valuable plants. I also sent
two Chowkedars to your Catchery, they
being answerable for the plant, in question,
and in some degree, under a suspicion of
being themselves implicated in the com-
mission of the theft.

2. A little before four o'clock yesterday
afternoon a young man with the name
of Lachy Narayan Lushier came the
Head Overseer of the garden to tell him
that he had observed a man on the preceding
evening (of the 12th) at nine o'clock passing
by his, Lachy Narayan's, house with a plant
in

in a flower pot in his hand. This struck him
as singular and he hailed the man who gave
his name Muddhu. Next morning coming
this garden to cut grass (not being himself
attached to the establishment) and hearing
the people here talk of a robbery which
I reported to you yesterday, it struck him
that the plant he had seen carried by his
house on the preceding evening might be
the one stolen from hence. He accordingly
went to the man Muddhu's garden and there
he saw the plant standing in a pot on a
bed of pineapples. Upon which he reported
the whole to the Overseer.

3. The Head Overseer immediately
reported the case to me, at 4 p.m. yesterday
and I ordered him to proceed directly with
the informant to the spot. I also ordered
the Head Gardener and Sheikh Buxor Head
Maullee of the Surson together with two
Ladaks to go with them. The result
was that the plant was found on the ground
of the said Muddhu Sudon Luskau about
a mile and a quarter distant from this garden.
It was brought home, at 2 past 5 yesterday
morning

evening, as also Madhu Suden himself,
whom I now beg to send to your Embassy
together with the ~~man~~ ^{Maragon}
Lushan. I would forward the plant also
but it is so precious that, unless you
absolutely require it, it would be a pity to
endanger its safety, especially as it had
been transplanted since its abstraction,
from the large pot in which it originally
stood, into a much smaller one, - the latter
bearing the stamp and mark of this
garden. You may however form a pretty
accurate idea of the appearance of the
plant by representing to yourself a fine
branchy Asparagus plant of about 18
inches in height.

4. Whether Madhu Suden, on whose
property the stolen article was found,
and who is stated by the informant Luckee
Maragon, to have passed his (Luckee's)
but with the plant in his hands, into the

reality the culprit or some infamous
person or persons have perpetrated the
robbery on purpose to effect if they can,
the ruin of the said Madhu are questions
which

which I have not the means at this mo-
 ment of throwing any light upon. But
 under all circumstances the case is of a
 nature so painful to me, and so materially
 involving the well-being of this Institution,
 that I feel most deeply interested in the
 discovery of the person or persons involved
 therein; the more so as this discovery may
 possibly lead to a clue by which some of
 the other robberies and operations to
 which ^{~*J} referred yesterday, may be detected.

I have signed
 Wm. Wallace Esq. (Signed) W. Wallace Esq.
 12th November 1844 Superintendent

Mr. Wm. Marshall

To Mr. Wm. Marshall
 Esq. of the Admiralty
 12th Nov 44

1.
 To Mr. Wm. Marshall
 Esq. of the Admiralty

Messrs. Neilson and Cameron
Members of the Medical Society
Gentlemen

On the occasion of the
completion of the printing of
Dr O'Keefe's Pharmacopoeia
announced in his letter of
the 24th inst., they to propose
that we express our sentiments
concerning his work, in
a suitable manner.

Do not doubt that you
concur with me in opinion
that Dr O. has performed
his task in a most satis-
-factory, ^{and suitable} manner, greatly
beyond the limit assigned
to him, ^{and indeed anticipated}
by Lord Auckland, ^{as quoted}
at the end of the introduction
to the first volume. That
volume has been very favourably
received by competent
judges at home, and it is
not difficult to predict
that the second volume will
be equally so.

Under this impression
I suggest that we address
to a

a letter to the Medical Board,
stating our opinion of the
zeal, science and scrup.
with which our Colleague

MJbf C&u/k^ L*^ his labours
and important undertaking
to a satisfactory ^{terminating} conclusion,
and through recommending
the Board's adoption of
the work as a text book
at the Medical Colleges, and
as a valuable condensed
repository of information,
comprising the whole

t^^fC ,rfA Materia Medica for the use of our Junior
of our Junior
of course

(A O&^o^ el' the letter should be sent to Dr.
O'Hearnsbury, as a testimony
of our entire approval of
his work, and for his
information.

I have the honor to remain
Gentlemen

Yours very obedt Servt
W.W. (Ligt) W.W.
207 Nov 1844

J. Waterhouse Esq
Lang to the Medical Board

For Approval

Having brought the report
of our Committee to a conclusion,
we deem it incumbent on
us to report to the Board
the manner in which Dr. O'Keefe
has performed the duty
entrusted to him.

2. The first volume of his
works, comprising the Medical
part, has long been
before the Board, and the
Committee need ^{hardly} observe
in this place, that the high
opinion entertained in this
country concerning it,
has been amply shared
throughout the profession
at home. All the English
reviews speak of the work
in the warmest commendation

3. In sending to the last sheet
of the second volume, Dr
O'Keefe has announced
to us that, with exception
of some hydrostatical and
other tables, which are in
press, and will be annexed

as an appendix to the Pharmacopoeia
is now completed. Our function
as a Committee having in
consequence terminated, it
only remains, as an act of justice
and as a part to our colleagues,
to avail ourselves of this
opportunity of declaring,
that such has been his
indefatigable perseverance
and industry in preparing
the work, and conducting
it through the press, and
such his anxious care to
avoid imposing unnecessary
labour upon us, that our duty
from first to last has been
little more than nominal. We
cannot remember having ever
had anything before us, which
we could consider subject
to our revision or remark
in any way. C^H 'n*^ scarce
alone we consider it
O'Haughey as entitled
to our cordial thanks and
acknowledgment.

4 Of the intrinsic merit
of

of the Pharmacopoeia it does not
believe us to anticipate the Board's
opinion, any further than by
expressing our ^{conviction} ~~opinion~~ that
it will, if possible, be received
both here and at home with
still greater favor here as a
valuable and important
accession to the stores of
Medical knowledge, than
the preceding volume.
Hence this impression
we venture most earnestly
to recommend to the
Board the adoption
and introduction of
Dr O'Shea's work,
as a text book at the
Medical College, - for the
use \rightarrow guidance of the
subordinate Medical Department,
and as a very useful, concise
Repository of most valuable
general as well as local
Pharmaceutical information,
upon the whole range of
Materia Medica, for the
use of the ~~the~~ and junior
brother officers.

5 The two copies tables
misfixed

/L-WjttJlt ~£±

Pharmacopoeia
seem to demand some especial
notice in this place, in as-
much as, we believe, they
are not to be found in similar
works, familiar to British
practitioners, although
adopted in several continental
works of this class. The
object of this part of the
work is to guide and
teU^djS&Jt^ research in
a department of medicine,
which, notwithstanding all
that has been done, still
opens a wide field, especially
in this country, for further
experimental and scientific
enquiry. We must, therefore,
consider the tables in

+JjUL*>>Ylt*U**<, as a very
important and creditable
part of the work.

6. Finally, with reference
to the new articles, introduced
into the Pharmacopoeia,
properly so called, we

beg to observe, •C^f vf fikttM
have been an easy matter
^TitlWit-AL*, author, t* KJLU*
swelled the list considerably
beyond its present extent,
but we beg to observe, that
Dr. Wilson has steadily
adhered to his wish, not
to admit of the introduction
of any substance, the
efficacy ^{of which} was not supported
by satisfactory and
clear evidence; and
this rule has especially
been observed in regard

Life of Hope to 11/15
(Babylon's Tower)
New York

My dear Mother

On my return to the Observatory three days ago, Mr. Maule put your letter into my hands, which having read attentively, I could not refrain from taking the liberty of at once enclosing it to Fairbairn, judging assured, that you would excuse the liberty, as the valuable matter contained therein relates to the establishment rather re-establishment of the Botanic Garden at the Cape, which should not be concealed under a bushel. It is therefore in his hands & will be available for fixing any proper actions that may result on the subject & coming from you will carry an authority which a letter from any other person would not. I long thank you for it & say many congratulations on the subject of your good health. God bless you.

The illness of Major Adolph is a matter of sincere regret to us: for even poor fellows if we have so valiant an as not to consider him to be involved in your daughter's happiness from constantly interrupting such a way is to be deplored. Ever yet, the something of an ill is sadly clouded by this visitation. Let us hope for her sake & for all your sake that the remedy about to be tried may be successful.

What Thomson's trial to you printed in the form of a pamphlet some weeks back, through Miss Dumbarton & Barrow. He is gone - removed from this world of trouble (to him) any thing but happiness. He was sent to the (convent) station at (Gardiner's) Dept. pending the decision of Her Majesty. The confinement in Cape Town had much reduced his health aided by the mental agony the separation inflicted. At the station some attention had been paid to his condition & by employing him in writing, but he proposed soon to go out to Labour. Oh my dear Mother what a situation for one like him to be placed in. His strength gradually diminished & he died on the 15th inst. I was not aware of his death until

I am informed since last Wednesday.
Immediately after the trial, Mr. Morrison went to England
the purpose of, in person, applying to those, whose interest might
be available & influential with the Crown. Morrison had many
friends, one of whom is the present secretary to the post office of
the Admiralty. **afy.** Over to whom the object of the mission is a large
of importance but I apprehend the success of the venture will not
be successful.

We cannot form the slightest idea of what became of a large
portion of the missing money. Now that we are aware he had
no other funds than his income from government, we may
suppose him to have spent some two hundred per annum of
the public money. But the amount is in reality about ~~two~~
two thousand five hundred. He could put away much more
I cannot imagine. His outlay I should estimate at about three
per cent per annum, & the residuum part of it in houses. He generally
kept two good houses & a good stable team.

He paid totally about 30 £ per life insurance, the policy being kept
in the hands of Messrs Larocque & Co. (Lect). His son had the
Government's order for three or four years he paid the annual
premium for the insurance of his father's life, which policy
was bequeathed to him (I think £4000). But his father's
debt his son shared of this & Morrison once succeeded
in getting it.

Madam. I told you the **A/M*** value had Morrison's
check in her desk for a quarter's salary at the time of his arrest,
& that an embargo having been laid upon his money in the bank,
the case was referred to the directors of the Admiralty.
After having written a strong letter to their Lordships on the
hardship of the case, we discovered that there was no
embargo relative to checks prior to the date of his arrest.
This was also communicated to their Lordships. Their reply
has not yet arrived. Their Lordships have taken credit for
having paid me in cash! I do not apprehend that
the money.

Smyth has been appointed Surveyor Major of Astronomy at
Edinburgh vice Henderson & is expected to sail for England in
a day or two. He also will be returned from the Napier
expedition towards the South Pole. Mana is working the large
Pheadochie vice Smyth. I have lately worked three of the
Apulhas triangulation stations in four weeks with the
small Pheadochie which beats the large one hollow!
The fact is now on Babylon's Tower which ~~is~~ completes
the triangulation at this end of the colony.

With regard to domestic affairs, the tribe is as usual stout
& merry. God bless them. Mr. Mackay expects to be confined
next month. I had hoped there would be no more, & on his
account I am anxious. He says she never was in better
health nor experienced less inconvenience. Mr. Murray appears
prosperous here.

I have had your black staves who will send you
Mana is a capital fellow. He is living in deep snow on
the Lonsdale, some 5000 feet high. I determined with him
to finish the Apulhas work before long that departure. They secured
me and to this probability of the snow.

Admiral Drey is still here, but daily expect to hear of the appointment
of a successor. Dr. Drey with family often enquire after you, & allude
to the changes in Lincoln Town since you was at the Cape: often
with a sigh the meaning in particular of which it is easy to understand
viz the loss of their boy. Hope to be at their house within a
fortnight, when I will take an opportunity to convey your salutations.

The Governor has been on the frontier ~~the~~ lately (officer) Grieco
Lionel, he met with an accident but has recovered.

Noted at last is to have a regular Government. Nelson's Post
Lionel's name see to it. Mr. North's name type. Stanger is a member
of the Executive Council. I purpose applying to him for a copy of his
written speech. Mr. Stanger presented here some three months ago
with a little daughter. Report places the Bell, as reported in the

Bot Garden 5th March 1846.

Dear Sir,

I am very sorry to trouble you. Kindly pardon
me.

I was quite aware of the existence of the order to
which your official letter this moment received refers
but I had [^]no information from the Deputy Governor, and
an interview I had about 3 weeks ago, that the Govt
had expressly exempted me from the operation of the order
my intention of returning having been officially notified
to the Govt in November - a step which the particular
nature of the situation I hold here obliged me to take.

&*? *s&-gZJ? #4

from of your not despatching the letter

I had

Had the honor of addressing you yesterday, until I have
had the honor of signing you in this afternoon today will
warmly write to the Deputy Secy of the Property Genl.
... with repeated apologies I have &c.

(Sd) A. Wallis

Bot. Garden

5th March 1865.

My Dear Capt. Lang.

When I had the honor of an interview with
the Deputy Governor, about three weeks ago, I was informed
by His Honor that I had been specifically exempted from
the operation of the rules laid down by Govt. in January
last, prohibiting for the present Officers from retiring
from the Service. At least I understood his Honor in
this way. On sending yesterday my application (ac-
companied with the usual certificates of no demands,
Debt or Civil against me) to the Adjutant Genl. of the
Army I was informed in a letter (recd this morning)
which I beg to enclose, that my application will be
forwarded to His Excy. the Commander in Chief for leave
to submit it to Govt. as soon as the restriction has been
removed.

As a fortnight or more must elapse before I can
receive any information, might I beg you would have the
goodness

graciously to submit to the Deputy Gov^t, whether I have
correctly understood him on the occasion alluded to,
and may proceed in anticipation of the affirmative
from Head Quarters, in regard to my preparations for
leaving by the Hindostan on the 8th or 7th of next
month.

Kindly pardon the trouble and believe me,

Yours &c.

(By J. Wallich)

My dear Sir
No. 10, Broad Street, London W. 1st

Sir,

Having **y^N/J, V/;** Gov^t for permission to retire from
the service of the North East India Company, from the date
on which the Pilot may leave the Steamer Hindostan
early next month, I now request the favor of your submission
ft /£ A managers of the Bengal Medical Agency, to
my present application for leave to become an Assistant
on the Fund for the date of each retirement.

Yours &c.

(By J. Wallich M.D.)

Post Office 10th March 1861

My dear Mr. Wallich,

I should have sent the accompanyg. application to
you.

Commiss
of the
to my
house No. 10

2. The following is a detail of ^{tyr & Air/ied} augmentation in the monthly salaries.

A) Head Secar of the Institution from 40 Rupees to 60 Rupees per month. The present incumbent Collyeromas Mookerjee has been

11>y y

years employed here and is a respected man of the highest caste. He has all the responsibility of the payment of the salaries, as well as the current and contingent expenses. He is almost always under considerable advances on account of contingent

expenses, as none is allowed by the Government to

B) Head Overseer's salary from 20 to 40 Rupees. At an Institution like this which is constantly visited by all classes of Society, especially during Sundays and holidays, and daily during the cold season, it is very necessary that the Overseer

should be a person of that respectability & character and conduct which will go much farther to prevent and repress irregularities and offences among visitors than any other means. The present incumbent Mr. J. Chopp possesses those qualities and I humbly beg leave to represent that the increase will be well bestowed upon him.

C) Shank Buroo Head Mallee from 15 to 30 Rupees. He has been here from his childhood

childhood, and is better acquainted with the systematic names and even classes of the plants cultivated in this garden than any man here. His salary as it now stands is comparatively speaking very small. 15.

Mr. Shank Butee Chief Gardener ¹⁸²⁰ has been from 10 to Rupees. He is one of the oldest servants of this Garden. He has the management of the export Nurseries and is extensively acquainted with the names and cultivation of the plants in this Garden. 10.

I have &c.

und ich bin fit. (1)

(Kann man es nicht für Mr. Duclouxen)

Little piece to
let 28 years. and
and to end of the
by me 5 years

lieber theurer Freund! Ich weiß es sehr hoch anzuschätzen
daß Sie mich gerne mit Ihren Briefen erfreuen und im-
mer stets gerne bereit seyn, Ihnen sogleich zu antworten, ob-
wohl es fehlt bei mir die Zeit, und manchmal auch die Reue-
rung öffentl. Zustände sind noch keineswegs beruhigend, obgleich
die unglückliche Rebellion in der Pfalz niedergeschlagen ist.
in Bayern, wo es am ruhigsten, weil wir außer der großem
mung des Handels und der Industrie liegen, haben wir gegen
die Agitation für eine neue Kammer, wovon vielleicht unsere
tägliche Ruhe abhängt, denn eine Kammer wie die letzte würde
verjagt werden wenn die Bürger oder uns selbst eine
neue Revolution gebracht haben. Sie sehen, daß ich alle
dieser Phantasie als ein wohlgesinntes Manu nicht unter-
setzen darf. Ich werde heute den ganzen Tag Briefe in dieser
gültigkeit an meine Freunde schreiben. Ich bin zwar bereit
sich mich auf die Flüchtlinge zu stellen, aber ich muß wissen, daß
sich hier und da ein tauglicher Mann bereit erklärt.

Daß Schleiden ist gegenwärtig, wie er mir gestern schrieb, in der
fischen Bewegung, die er jetzt in Weimar mit im Landtag
Sie, lieber Freund mir über diesen genialen Mann geschrieben
finde ich ganz wahr. Er ist viel zu einseitig, und vertritt seine An-
sicht oft mit Bitterkeit gegen Andree, schont auch das Zwei-
tliche und Unwahre oder Unklare bei ihnen nicht. Dennoch
ich ihn, sowie alle seine näheren Freunde (zu denen ich nicht ge-
hen kann durchaus edlen Mann. Bei ihm ist ein Excess der
hättsliche Schuld, daß er manchmal in einer so bitteren und
groben Manier recensirt.

Wir haben gegenwärtig den Auftrag bei der Akademie erhalten,
die naturwissenschaftliche Erforschung von Bayern vorzunehmen.
Es sind Commissionen: eine für Magnetismus u. Meteorologie, eine
für die Decadenz und die Wasserkraft, eine für Pflanzengezo-
graphie u. Vegetationsgeschichte, eine für Zoologie u. Paläontologie u.
eine für Geographie u. Mineralogie niedergesetzt, u. ich werde davon
in der Classe als Secretar genug Arbeit bekommen. Dr. Sendtner
der unser Adjunct beim botan. Garten geworden u. Privatdocent
bei der Univ. ist, befindet sich gegenwärtig in den Alpen und

re

... sehr lebhaft bedacht, Bekanntheit, dass ich in der
Theil fleißiger Samler in Beobachtung. Ich selbst bin mit dem Ges
die auch wegen der Hitze sehr anstrengend
... durch einige Stunden ist der Calamus-Felsen, die ich als
... beschäftigt.

Zu Bezeichnung auf letztere bitte ich Sie, Lieber theurer Freund, schon
sich in Ihren Sammlungen nach, ob nicht unter n. 804 die List
... auch in Linnaeus's Hort liegt. Ich hatte die Exemplare
... längeren spirulig, wie frutescens, castaneofusca Desf., während
... leichte Rotang kürzere Spirulas und blaße Früchte hat. Koch
... hat ich eine systematisch so schwere Arbeit gehabt, wie diese
... theilich theilweise auch wegen Mangels an gutem Material.

Garten habe ich neuer Malistoceras untersucht, was Sie sich mit
... gibt. Bitte, fragen Sie William Hooker, ob es nicht die Güte
... würde, nur eine Reihe von Säurereisen von Pflanzen,
... Sie die wachsen, zu kommen lassen zu wollen, wenn ich
... die Liste finde? Es sind lauter Solche, die uns im
... Winter durch das schnelle Schmelzen des Schnees im Garten
... an Untergrund noch tief gefroren war, zu Grund gegangen
... seit drei Wochen lang Eiswasser an ihren Wurzeln stand.

... würde dafür sehr dankbar sein. Auch hat uns der vorjäh
... Lauffeblag zwei Drittel unserer Orchideen vernichtet, denn
... die Häuser aller Glasrheiben nach 3 Tage hatten Witterung
... waren sind sie, im Monat August, in Form: Ueber Klima ist
... 1850 für Höhe supra Oceanum sehr rauh. Alle 4 bis 5 Jahre
... lösen wir fast wieder von vorn anfangen. Das ist
... Zeit.

Auf mein Verhältnis bei Buchhändl. Baillière darf ich mich nicht
... zurückkommen. Ich fürchte diese respectable Firma gegen mich
... anzuwenden, wenn ich oftmals mit einigem Abgaben des Verächts
... Wucher Komme, darf aber leichter stark angeht werden kann, wenn ich
... einen Buchhändler die Commission übertrage scheint noch zweifelhaft.
... wie ich aber der Meinung, den Vorath bei B. Laska und Dalt
... einzelne Abtheilungen davon an den Mann Komme, in der ganz
... genehmigen, in welchem Falle ich allerdings Ihre Freundschaft in Anspruch
... nehmen, und Sie bitten würde mich dabei zu unterstützen. Es Kommt
... aber Alles darauf an, darf ich nicht Kom. B. gegen mich anbringen,

denn ich bin mehr von ihm abhängig, als er von mir. Unter diesen Umständen möchte ich Sie, theurer Freund, bitten, daß Sie sich persönlich einmal mit ihm besprechen, um nur zu hören, was er über meine Angelegenheit geben möge. Ich habe dazu Gelegenheit durch das inliegende Jekelichen, worauf ich bitte: 1. mir, nach ein Exemplar von Vol. 7 (1848) des London Journ. of Botany zu schicken, u. 2. Ihre Auskunft zu geben, was ich zu thun habe, um eine Abschlagszahlung aus der fallenden Forderung Black et Alms zu erhalten, bei der ich nicht weniger als 2422 fcs u. 79 Cent. davon habe. Als mein Bankier mich von Leipzig aus durch den deutschen Missionar von Black angeklagt wurde, verlangte man von mir die von einem gläubigen geglaubten Bedingungen, respectiver ich schon, daß ich dann nicht u. nicht kleineren Betrag erhalten habe, als ein einziges Mal ein kleines Quantum. Ich habe mich jedoch nicht fügen wollen, sondern habe vielleicht etwas für mich ausrichten. Einen Wechsel per 1000 Thaler an die Marx enthält habe ich schon besorgt; aber bis jetzt ohne Erfolg. Die Buchhändler machen die Sache für sich sehr unangenehm. Vielleicht wäre auch der junge Buchh. für meine Commissionen anzutragen (sein Name fällt mir nicht ein) willig. Ich würde guten Rath zu erhalten, was ich stets behaupte. Die 3 Trustees die auch mit demselben schreiben sind: William Clowes, Printer; John Hodge, Wholesale Stationer; Charles Armstrong, Book Merchant.

Sehr dankbar bin ich Ihnen für jede Nachricht in dieser Sache. Wegen der Arzneykosten darf ich leider gegenwärtig nicht helfen. Man wird jedoch nie bei solchen ein Hauschen, u. ein wenig Geld, um das Leben zu erhalten. Tageweise unterirdischen Verhältnissen aufzuheben die Unannehmlichkeit zu verbreiten. Dadurch Geld für Schwere nach England zu schicken will, das wäre vielleicht möglich. Kommt fest fest.

Gerne, wie gar gerne möchte ich Sie theurer Freund, und meinen edlen unvergeßlichen Rob. Brown wieder sehen. Ich würde gerne mein Herz vor Euch ausgießen und Ihnen sagen, was ich dabei weinte, ich würde mich ihres nicht schämen. Aber in diesen Augen ist es mir unmöglich nach Engl. zu reisen. Es muß vorher richtig, auch die Cholerie muß ihnen sagen, sonst wäre es tödlich, sich u. d. Familie zu exponieren. Über wäre es denkbar, daß Sie nach Deutschland kämen! - Sie sind freundlich eingeladen. - Frau v. Endlicher's Mutter werden bis in das Herbst hier bleiben. Sie zeigt sich als eine Frau v. viel Charakter großer Leutseligkeit. - Schacht ist Jena, Schüler Schleiermacher in einer großen Arbeit über Fruchtbarkeit von d. Bräutigam Akad. aufgestellten Preis gewonnen. Was sagen Sie über Arbeit von Hofmeister über denselben Gegenstand u. über Suminski, wunderbare Uebersetzung an den Farnkräutern? Andere früheren Ansichten erhalten gewaltige Modifikationen. Seibert ist Carlruhe u. Alex. Brown in Freiburg haben wahrscheinlich auch bei der Chatarophe des unglücklichen Bodens gelitten. Ich habe noch keinen einzigen Mann, der eine mögliche vollständige Sammlung von den unglücklichen G. Gardner's Pflanzen angestrichen kaufen! Diese wären mir äußerst wichtig!

Ich umarme Sie u. Freund Rob. Brown tausendmal in Güte. Gott sey mit uns
 Freundschaft Hr. Martiny

München 14 Juli 1849.
 A. Haller
