I pray you therefore make
a bandobast for me aforesaid
Agree with some Captain who is
to sail about January 1st to 15th.
Direct him communicating with
Weyers or with Bennett at
Calcutta. So surely as he is ready
between Dec-30 & January 30. /55,
so surely will I be also.

I shall have about 8 to 12
Quadrupeds & 60 pheasants
or so, to make over to him;
He will convey them alive
to the **J^r^.** on fair terms to
be fixed at Cal^a by you, or
at London **^*-t ^*?**
Attend to this & arrange this
season prospectively.

Have you seen our Iscent
Sipahce Nam Prasad at
Kramley's? I told J. Prinssep

to send me by that man a
mountain barometer
or two, & a couple of thermos
for boiling water to ascertain
heights. Do speak to P. [unclear]
& if P. is disinclined, or
not my man for the purpose
pray speak to Sur. [unclear]
offering to pay for instruments
promise him the results
their use here, & Capt. [unclear]
bureau tenens affairs will
immediately help you to
the [unclear] to [unclear].

Yours truly
W. H. Murray
W. H. Murray

Shall send Fasciculus Primus
of Fauna Hip. (to serve as pendant
to your Flora) presently.

19 Jan 1833

My dear doctor

My pleasure on the
subject of your last kind letter, for
the facts which perhaps have excited
some suspicions - I presume very ex-
cellent friend Fokand to confirm them
I write from a bed of pain & sickness
on which I have been laid for the
now not far short of a

My remittent fever has completely
exhausted the remains of strength
I had, and I am about to quit this
life province, which has so
decidedly shown itself inimical
to my constitution, that it would be
dangerous to try any longer residence
here, even if I be cured of it

Which here, from my present dis-
-ments - The H. B. Surveying vessel
the Sophia

What has been employed here, if
I understand likely to become
this for talent in a few days,
& have in this case been kindly
offered a passage. - Your
kind & pressing invitation to
to take up my quarters with
you, and to what my own wishes
in distinction so strongly incline
cause me to write these scrawled
lines to notify my approach & my
intention of arriving myself at
y^r kind & friendly offer. - It
so circumstances have occurred
which might render my presence
an inconvenience - I feel however
I am about to subject you - or
rich Innate, - a troublesome
further - a continual course
of annoyance & trouble - all this
w^l be disagreeable at any time,
- the arrival of the family, or
the peculiar circumstance
may

may have caused such change
as it renders this more inconve-
nient than you w^d kindness
foresee. If so I earnestly trust
you will say so & let me not under
any circumstances be a burthen
upon one whose kindness has been
my only claim - If the vessel will stop
on her way up ^{to the} Garden, I may call
out at once if you
me - but this fancy is not likely to be
of use - officers do not wait upon
small people, - directly then / sh^d have
more sight on the reach Calcutta
I shall write you - Stop! I shall write
to you from Kedgesee - a painful com-
plaint w^{ch} has improved on my
fever makes it probable as well as
the latter, & the weakness produced by
both, that I shall sh^d be on my couch,
- right glad that she sh^d be
otherwise - I shall send to Mr. Oulton
on arrival, where if you receive the letter
in time you will perhaps have a line
from me - God bless you my kind & excellent
thanks, I hope to be preserved to see you again
believe me, most affectionately
R. O. M.

To 2nd Westing
19th Jan^y 1886
My Dear Madam

I have been so small
since I arrived in Calcutta
that I have been quite
unable to undertake such
a trip as down to London
Reach, I am no longer
better that if I reach
some a day before the 23rd
when you will be at home
I should like much to call
and talk over, all our news
since I saw you; I hope you
have good news from Mr. W.
George - I would like
M. W. E. P. O. K.

My dear Wallack

I am really so unwell
that I cannot venture out so,
far as the Sanders today in
fact I am next thing to being
confined to my Bed. — They
tell Howard pardons for
being so late of apologizing —
but fact is I expected to be better
until the last minute & by an
exertion to be able to give
Best Compliments to Mrs W —
& I am my dear Wallack

Your Servant W Wallack

22nd May
1836

W. Wallack Esq
Garden Reach

My

As I am receiving
the cones, & would
you please ship
about to suit for
Hawaii, ~~may I~~ ^{may I} beg
for a description ^{of the}
capture, of the
best time & mode
of planting the seed.
I wish it to put in
such a form as
~~it may~~ ^{it may} be forwarded
to the King of Hawaii
for his information.

How not the Doctor
had the indignity
of being hurried all
round in -

I have given out here
my recollections of the
5th of March of 1848
and of the various
affairs, your course
at night, and the
the whole of the
last day or so - The
various affairs of the
various subjects of

the Doctor's course
in case of the
March.

Recall that the
Bar is

How do you feel about
the various subjects

Bar is
Bar is

They give information
to the public, as coming
into the public eye
and the public eye
of the public.

My dear Mr. Peckham
I have just written you

in relation with Compton's information

one: I am very sure that

you will find it very interesting

Yours truly

Henry
26 January 1834

My dear Mr. Matthews -

You will see a tract of the
Government of Solomon George
"Country" as the folks there
= about - half a score hundred
shall be sent to you - they have
begged to start supplies mostly
being to see nothing as it is
and as regards length of time
and demands of matters - I
gathered up about 20 to 30
that will be found to be
the regular and simple have

been forwarded in previous orders -
but for some six days we
were without answer - stated -

I have just received from
London & Co. Portland - This
disorder starts with such
in Dublin - Believe me

Yours very truly
Wm. Murray

July 1st. I must send you a letter off for Richard
to day. He has a deal to do - & you are to find
him on a possible day - & you are to find
me literary - but a
manly man. Pray tell
me your garden in the
to hear of the Mallick &

run of things I can
have had no letter
I think what they
of

i*S72zjL

^ * .'

they
be

reported - Education to be proposed &
the law has to be modified. The principle
of the union & to come into conflict with
that of the free body. Grant has a safe
your plants and taking in regularly from
the beyond. constantly at work in
the cabinet begins to fill. It will not be
at success but your own patience &
as a result to be feared always up with
in the country living in museum. It
to be used in the past days of it

been the small one with your plants. The un-
der the tree ^{^ L} in a garden house is been
last about - you would ^{*-*?} Ben they
kindly to do the work. I don't really ever
knows when we. In a room ^{/?*fJf} will have
to be selected. I shall write for Bureau
I think the Society will do
the Council will probably recommend
some titles here. They say the Duke of Devon?
Recruits well. Paul Jones friend of your
disapprobation of his boy who seems to
have been advised against more ^{<v-l}
money. He will adhere to the subject to
again. He puts the young kindred are
most grateful for it. Thomas the son
of lady R. to have paid his way home.
It was the contract, ^{>>>*-t*-'} but friend here
by the road in various way. At the
D. and he has experienced it. It was
people said that the way may be
his expense. Thomas R. because not what
I do with him. I have felt the call
his purse. - Atkins - Das to do. Yates
Jewett - Peter to no extent. Paul has
plant to have addition to his property
I think ^{>>>*} street house
of 5 - Atkins & Co

I have had no letters
of any kind - & I have not written to her
nor to my own. - I shall now expect
to a few old friends as my Mother is in the
jaws. Mrs. Booth's mother is with us - her
in good health. Mrs. B. is thin & weak
the children thrive admirably.
My dear darling letters to you by R. -

God bless you my dear & happy
friends. May I for long years hear
of your health & welfare & that of my
little ones. I am the
anxious to be with you
notion, but no anxiety can in
truth cast a momentary shade upon
my affection & love for you.

My Brother in a late letter tells me he
has had a Box of Balls from you & I
hope has written to you - my heart
thanks for this kindness. Love in
me & ever
Yrs faithfully & affly

N. Welch Esq
Boston

F. Booth

24 March
Bataavia Borneo

To Mr
J. Richards Esq

Calcutta

Recd from Capt. A. H. Quincy Feb 1, 1836
2 weeks note by Capt. Quincy and
the parcel, the 5th bundle
by Mrs. Quincy 1834
Wentworth House Boston
20th Nov

I have seldom entered the store & found
an such interesting & increasing attention of plants
without some of the success of the season, the more I
see the more I wish to see them & I have often
asked to turn leaves & write to you. I am at last
strong enough to do so & to tell you that cultivators
in this country are almost mad about the Orchids &
that a trifling of a ship having arrived at Newport
with a package on board from Dr. Wallis for Lord
Rothschild supposed to contain some of that family
I happily made of one or two new plants
the leading other varieties in the vegetable world
and could greatly interest them & some of the
great names of the bot. having once more revised
captured his former power & dignity.

As the head botanical gardener says that any
thing that you send over is sure to grow & in his
hands is not likely to be lost & I really must
say that he makes his best good; he is the
best successful cultivator I know & most liberal in
his distribution. I need hardly say that Lord
Rothschild will be but too happy to be at any
expense in transport & its contingent charges

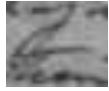

I send with this an account of the meeting of the
British Association at Cambridge last year thinking
that you would be pleased to see that many of
your friends in this country have not been idle & hoping
that the specimens of their hand writing

V A R A

of sufficient general knowledge
meaning of the speakers. Our next meeting will
be at Edinburgh. David Brewster
see, I understand, **& *S*+**
the latter. *** ^ * ~ X -**
a volume on the same subject
we seek, a most desirable addition.

Dr. Henslow has received a large
collection of dried ferns from Iceland on the
coast of China, many embryos here. We have
tried to raise some from seed but the specimens
had been somewhat damaged by salt water, we
were not therefore successful. This has been a
disappointment as we had never failed before even
when the seed was procured from comparatively
old herbarians.

A friend of mine has taken out a patent for the spirit
oil of "Indian butter", this is a very light oil
of less specific gravity than Ether & is a most powerful
solvent. The discovery has excited much interest in
chemical & manufacturing world. The very finest is
at £2 a gallon. He has now 200 tons of India
in his warehouse & the orders for the oil are
numerous. It is distilled in a common retort.

No 6th July
 Larry Street Norwich 23rd Feb 1836.
 Have you my kind friend ever accused me of
 caprice, neglect, inconsideration? I know you have not, I
 am sure you have made many excuses, & suggested
 some reasons for my long delay, rather than reflect
 than on my kind thought of me. An letter which I
 wrote after an excursion into Norfolk's last April
 was by an accident lost on its way to Dr. Booth
 soon too soon after that I was overwhelmed with
 the news of the good Rajah's death, & made sev-
 eral vain attempts to express my thoughts to you.
 - When I reflect that his invaluable life was sacrificed
 at mid age, and the dawn of his glory, for want of
 that rest his bodily constitution required, & that
 demanded, I am grieved at heart that his attached
 friend did not presumptively urge him to repose
 for 6 or 12 months - If ever man ever
 to promote the reign of Christ on earth it was he,
 the light of men, the

My dear Mother -

I hope this will find you
not felt any ill effects from
the oppressive heat which
prevailed here on Monday

morning. I can assure you
that my health & spirits was
exceedingly delighted with

my day at your house

last Sunday, and very grateful

for your attention to me

Yours
M. J. S.

M. J. S.

Mr. Blair I also feel deeply
obliged - I had some words
of sweet preaching, & that
I will not forget.

It will not be long
by your ~~return~~

Quincy,

I hope we

shall see

you very soon

you may to your friend

or perhaps to some country.

From our best wishes

26 Feb 1834

W. T. Trivette

Miss M. M.

To
N. Welch Esq
for the

Honored Sir,

We arrived in Town the night before last
and yesterday I attended Mr. Porter and family and
took up my abode for the present at Garstin's Buildings.
I intend to take the first opportunity of seeing you, though
some business in Town, will I fear deprive me of that
pleasure for a few days. In the mean time would you have
the goodness to send for the four Cheats of gouging Planks
on board the Helvidge, which I have directed to be delivered
to you, I have no list with them as I can find out the
quantity when I come down. They are principally Green
and White - with best prospects to Mr. Welch.

Your faithful servant

Geo: Porter

From Hobart's office
Wednesday morning
26th July 1836.

Rec^u par Sophie -
my return from Africa
April 23 1836. -

Monsieur,

Monsieur le Dr. Buckland veut bien intercéder
pour moi auprès de vous, afin d'obtenir une faveur
qui peut contribuer aux progrès de l'Ichthyologie.
Depuis plusieurs années je consacre tous mes loisirs
à l'étude des poissons fossiles; j'ai vu la plupart
qui en possèdent et examinés avec soin les
collections

animaux. Cependant il m'importerait encore de pouvoir
faire l'anatomie des parties molles, des genres qui ont
des espèces fossiles analogues et pour cela les exemplaires
de la plupart des Musées sont trop vieux. Je vous
aurais bien des obligations si vous daigniez m'en

pense dans ce vase comme à le recevoir. Les genres
 qu'il m'importerait le plus de pouvoir examiner
 bientôt sont les Balistes, les Ostracions, le Diodon,
 le Tetraodon, les Alutines, les grands Syngnathes et
 les Squales à dorsales épineuses, surtout la Cestracion de
 Nouvelle Hollande. Après cela les Chaetodon à longues
 dorsales et anales, les Fistulaires et les Acanthurus.
 Je desirerois aussi beaucoup avoir quelques Anabas.
 Ce sont là les objets auxquels j'attacherois le plus
 de prix pour la comparaison que j'en dois en faire
 avec les poissons de Monte Dolca et du Liban,
 cependant comme l'hist. nat. des espèces vivantes

à l'attention de mes. J'espère que par conséquent,
je pourrais avec reconnaissance sentir ce que vous
espérez à admettre.

Je vous remercie, Monsieur, que je n'ai jamais
pu en l'indiquant de vous faire cette demande.
Si je ne connaissais pas votre Dole pour l'usage
des recherches, j'aurais pu être à l'abri par la
particulière que ces recherches contribueraient à
l'avancement de nos connaissances sur les animaux.

Agreez, Monsieur, l'assurance de ma
haute considération et de mon affectueux
Respectement

2. Justice

*Après l'ajournement l'on est plus près de la loi à l'avenir. Il me faut
 à l'heure présente émettre quelques lignes sur ce sujet à cet égard on sait
 que les lois sont à la fois une sanction et un guide, mais aussi, qui ne s'arrête
 pas à la sanction de la loi qui n'est qu'un moyen de punir, mais qui s'arrête
 à l'empêchement de faire le mal, et qui s'arrête à l'éducation de la
 conscience et à l'enseignement de la vérité. C'est pourquoi on doit considérer
 la loi comme un acte de justice, et non pas seulement comme un acte de
 puissance. La loi doit être faite par des hommes sages et par les représentants du
 peuple. C'est pour quoi on doit s'efforcer de rendre le corps législatif
 indépendant de toute influence étrangère. C'est aussi pourquoi on doit s'efforcer
 de rendre le corps législatif responsable devant le peuple. C'est pour quoi
 on doit s'efforcer de rendre la loi plus accessible au peuple. C'est pour quoi
 on doit s'efforcer de rendre la loi plus éclairée. C'est pour quoi on doit
 s'efforcer de rendre la loi plus sage. C'est pour quoi on doit s'efforcer
 de rendre la loi plus humaine. C'est pour quoi on doit s'efforcer de rendre
 la loi plus utile.*

*La loi fait de chacun de nous un être responsable. On ne peut donc pas
 se plaindre de ce que la loi nous impose. On ne peut pas se plaindre
 de ce que la loi nous défend. On ne peut pas se plaindre de ce que la loi
 nous commande. On ne peut pas se plaindre de ce que la loi nous punit.
 On ne peut pas se plaindre de ce que la loi nous récompense. On ne peut
 pas se plaindre de ce que la loi nous guide. On ne peut pas se plaindre
 de ce que la loi nous protège. On ne peut pas se plaindre de ce que la loi
 nous éduque. On ne peut pas se plaindre de ce que la loi nous sauve.
 On ne peut pas se plaindre de ce que la loi nous rend heureux. On ne peut
 pas se plaindre de ce que la loi nous rend libre. On ne peut pas se plaindre
 de ce que la loi nous rend digne.*

*Tout ce que nous avons à attendre de la législation est elle-même un point de départ
 d'une action plus grande. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous impose. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous défend. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous commande. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous punit. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous récompense. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous guide. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous protège. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous éduque. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous sauve. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous rend heureux. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous rend libre. C'est pourquoi on ne doit pas se plaindre de ce
 que la loi nous rend digne.*

Adm. de l'Université

(Genève, le 18 Mars 1834)

My dear Walter

The enclosed slip of paper may
save us from committing a robbery
on principle. - Is there no member
of the Society from whence they
work emanate. Whom you would
wish to propose as a corresponding
Society of reports on the
Member. - also of any other Conti-
-nent. - If you will propose a corres-
-ponding member belonging to two
Societies on the Continent, we
can send these Societies each a
series of our Transactions from the

Commencement. by writing to Wilson.

I will rejoice to second those whom
you propose but I think it would
be more complimentary to your

friends, that they were seconded

by the president. How much

very much I am obliged by your
attendance at last night's meeting.

Very most sincerely

Yours

J. Sprengel

Received 16^{te} March 1834 by Mrs. H. Sprengel

Leicester March 17. 1834.

Rec^d 15 Aug^t - 21st Sept^r
off^d Aug^t.

My dear Friend,

My friend might have contrived to George
that his hour is nearly come & that our letters
might be closed forthwith as he may be here
in his road to London any day. He I must
writtle off a few lines to inform you that in
note of our silence you are to me one of those
things that shine with a steady & con- * s
stant and unobscured light. But

by reason why I did not
write before. George who in many respects
is no finer a youth as our friend was for
some time after he came here rather wild
& suspicious in his habits, & I felt I could
not write without telling you the truth.
at the same time knowing his youth, & hoping
that he would gradually become steadier, &
that it were easy to instruct him to a better
heart than to some

of some thousand miles, I deferred writing to you
from week to week. & from month to month.
What I anticipated has come to pass. George
has become more attentive to his studies & some
pecuniary difficulties have brought him I trust
to your notice. His attendance is an ample
one as ample as any student ought
to be with

& from whom he now, several minutes
every Saturday is the Discourses - a gentleman
who holds a government situation connected
with the Scottish Fisheries & in particular friend
of my own. There is another & younger wife
& daughter - all equally amiable &
correct. I have found out accidentally that,
in several instances he has got very whole
advice from them & I know they take a great
interest in him - one of the sons is studying
medicine & I believe has more influence over
him than any one else - the influence of
a daily companion must always be great &
it is particularly fortunate that in this instance
it should be of the best kind.

I do not know whether Wright has written to
you lately or not. He lives almost entirely
at Blair working in a most exemplary manner
over at his Indian plants. He & Broth are
the dearest of things at a pile of dried specimens
I ever saw among all my botanical friends.

As for Smith I really believe he is
about to be sailing & looks with a sort of pity
upon those inferior spirits who enter into the
beauty of a living, breathing glowing flower.
A plant is to him what the subject is to an
anatomist, he can cut & carve & lecture upon
it, & the associations are all with the dead species
upon a dead subject. The living representatives
are cut half so amiable in their eyes. In
fact Smith is abstract in his botanical
feelings & altogether the oddest specimen
himself in rank botany I ever met with.
As I said before he & Knight - ^{t*— &e*-~t'X'-.** - *-*}
perately hard at their Flora of the ^{A/a^}
Peninsula & I have no doubt it will be
so highly successful work - judging from the
checks I have seen. I am doing the
Hya for him for he means to introduce
the English. There are many new species.
Knight will do great things, if he is
spared, when he gets back to India.

What account can I give you of myself?
Nothing - positively nothing in the way of
business worth writing about - my things
have been cut up in all sorts
First there was the great one
I was chosen or delegate by
plain ^{J^*/£ \$r~^-.^}

jL»<£>*

abiba

/

most Lord Althorpe & Mr. [redacted] & [redacted]
over the progress of the bill - with that was
a labor of more than 2 months & no lesser
labor either; for I was chairman of the
United Committee of the Anti-Slavery Society
& the Delegates - & was [redacted]

&L^*~*^* - >%t--*^*-*c*-r* <&-'

J^ ipCc **^&*~c~y* **-

here [redacted] writing, I could
give you some curious [redacted]

J f ^V

and [redacted] of the opposite party
but are more too sharp for them. However
that business is settled, & West India
property is rising in value, & one recent re-
solution declares that the "prosecutors were
right after all". This is very gratifying.

Then as to myself again, I have been
in England many weeks on a visit of
charity to a relation who has lost an
member of her family, & we soon as I

y^^*^^S * S .

am going to have a good spell
of work, we surely dare something come
to interrupt all my plans. At this mo-
ment I am free to [redacted] hope to get 2 months
work in some [redacted] - at the end of
[redacted] going with a party of

the northern society of Scotland - perhaps
early the many societies of Great Britain
do! should not the
of Scotland.
... ..
from observations published. We are
building a light boat to take on the
our
delightful summer excursion of two
months.

I suppose friend Hooker has told you
that there is no chance of getting up our
projected British Antiquary - subscribers
will not come forward, & in fact there
is a stagnation among illustrated
Nat. History works. We must attack
them in a different shape. Hooker's
illustration has been long dead & he
has only just
with
published under the name of The
Bot. Journal - but I fear in too weak
a manner - being exactly like the
Miscellany - that I think deserves no
proportion & not sufficiently purely
botanical for most botanists, while

circumstances enough to
please non-hermits. But I am
sticking like a limpet to the labial
& retaining them in a manner that
will shock the senses of the Germans.

In September next we have the
Association meeting in Edinburgh;

I have already commenced our
preparations for the reception of
many

you were within a reasonable dis-
tance! God bless you My dear friend
& believe me your affect. & grateful
Wm. Grewille

I have written unpleasant columns
& shall certainly recollect in
the most vivid things I wished to
speak of as soon as I receive
and my dispatch
in the next few weeks. I have
put off writing to the last moment

Enclosed I have the pleasure to send the Shipping Order
for the Hanks and Skins on the Henderson. They should be put on
board, if convenient, on Monday. I shall be on board about 12
to 1 O'Clock on that day and will see that the Order is
it will be convenient to send all the birds at the same time. I shall
be much obliged to you. The ship will not drop to the Cowley Bazaar
before Tuesday morning. ^ <&. + > * -, VE ^ ' ^ < . B must be put when the cargo
is off the Barkshire Hand.

I will call at the Gardens before I go to
receive my letters. You may be pleased to pass on with probably on
Tuesday morning, perhaps if I may venture to entertain on your
goodness to far as to suggest an ^{intending} ~~intending~~ to any of the
Governors of Christ's Hospital. I have felt ever grateful as I
could wish to get my boys into that institution among others, I
believe, the New School, where some relations of mine have
been educated. Sir Robert Wigram is one of the ^{Governors} and
Mr. Patten has for an acquaintance with most of them which he
says

say he is out, or he would hardly do the work. We are
very busy preparing for our departure. My things are packed
on Monday. Mrs. Foster is in the neighborhood of
No. 1000. My, Fred and

Baltimore the 25 of February 1836.

Dec 9 1836

Your most friendly letter of the 5th inst. with
its accompaniments reached me yesterday and I sincerely
opined you that I have derived very great gratification
from the very kind manner in which you have permitted
me correspondence to be resumed. It affords me much
satisfaction to reflect on the happy news that I papered as
you have been enjoying the blessings which were then promised
to hide and that, notwithstanding I have
now discovered that it was pregnant with mighty evils
but let me not dwell on this painful thought, which cannot
be dispelled from painful recollections. I will remember
the lines which concluded with "In happy memory for the day"
but if you had not mentioned the subject I probably should
not have recalled them. When I will see and hear, I will
not be in a better or more warm meeting you. Although I
am in the least doubt on the subject, and you is in
my intelligent close-minded man, and will give things the
world with his eyes open. I have never met with any person

Rec^d 4th April

My dear Nath.

Many thanks for
your last long stone
& for its interesting contents.
You shall have 300 copies
for the Linnean in a day
or two. Send the enclosure
to the Secretary of the
Royal As. Society of
London. Duplicates will
go to you tomorrow.

The wood is in size the
trunk of a medial tree.
6 feet long by one of mean
diameter. Lots of paper
is gone & going to you.

God bless thee

W. Wood

W. W. Woodman

1257
1884

My dear Mr. Woodman
I have the pleasure to
acknowledge the receipt
of your letter of the
10th inst. in relation
to the matter of the
rent of the premises
situated at No. 1257
Broadway, New York
City. The rent of the
premises for the year
1884 is \$1,000.00
per annum in advance
on the 1st day of
January. I am, Sir,
very respectfully,
Yours truly,
W. W. Woodman

Apr

March 1834

Since our late leaving on Wednesday morning we
have had little else than an succession of strong breezes from
the Southward, so strong as to prevent our making much way down
the River - the tides not having sufficient power to do us any good,
we got aground in the morning too near, close to the Thames
& Champs, but fortunately soon got off again. The weather we
get now enough the gales are so frequently strong that they blow us
up the River again in spite of the Tides & as it is the opinion
of many and others that this weather will last during the
first quarter of the season and then probably break up with a North
Wester, they consider it better to lay here a day or two longer
than to expose the ship to its fury at the Wand Heads - & that
my letter you may have written will reach us from Redgrave. I do
not think we shall get out of the River before the 1st of April - We
have a good found number of Passengers 4 Ladies 15 Children and
12 Gentlemen. The Captain appears to be an excellent man and steady and
careful and we are all very well, so that we expect to make
pleasant passage to ~~the~~ England. -

H. Jones

y \$^ £*J

I have received a very kind letter from G. Patten Esq
in which he states having forwarded ~~to me~~ ***t-4U.A** ~~me~~ ~~the~~ ~~books~~ ~~I~~ ~~forwarded~~ ~~to~~ ~~you~~ ~~through~~ ~~Mr~~ ~~Centers~~
and requesting me to forward it to him who I had done
to this in the books I forwarded to you through Mr Centers
office, perhaps it may, by the time I have come to him, ~~be~~
I beg the favor of you kindly forwarding it to G. Patten.

The little ones here all share a slight bout of
sickness as the small cases a considerable number, but I trust
will ultimately do them much good. - The State, sends to me all
safety should and will have my best care. - Wishing you and
your respected family health and much happiness during your
stay.

p£~>/ ^ & I remain
Dear Mr. G. yours in best respects to Mrs. - Miss
Elizabeth, yourself and family. Once more Farewell

I remain,
respected Sir,
Your much Obliged
and faithful Servant
Geo. Porter

P.S.
My address will be to the care of
Miss Ingrid Porter
2 Main House - Haver
Mass.

Japan. March 25th
no 7th April 1834

My dear Wallich,

I have recently sent
you, by Dink, two large
packets, containing Sumi-
-nations criticisms on the
subject of Buddhism, with
ample quotations from
original Sanscrit works,
in confirmation of my
own views. Send one copy
of this paper by the Steam-
-er then, by the first
ship that sails, to the
Royal As. Society of London,
By the S^r Bond S^r.

The ~~parsons~~ ^{parsons} will be upon
me for my disparaging
mention of their order.
But, as I repeat, Parsons
are not Christianity. & I
merely speak for illus-
-tration's sake, not for
controversy.

About the middle of the
preface, it strikes me
there is a material
lapsus calami in the
original, which is
corrected in the copy.

It is in the following passage.
"Mr. Upton asserts that I
am wrong in denying that
I am, in its first

copy is by
the original

*4

most characteristic form,
rejects the distinction
of Clerus et Laicus."

Two negatives make an
affirmation: It should
now admit the dis-
-tinction of Clerus et Laicus.
Look to the original
paper & alter, if need
be. This copy or duplicate
is, I know, correct.
I sent you 300 R. in
subsidy for my compos-
-ition as an income.

Paper has gone to you
in cart loads. The wood
shall go, & when opportunity

offers, after the rains,
in piecemeal or whole,
as may be. I will do
the thing prudently.

Several of your picked
flowers have germinated
25 or 26 half-horns. The
produce hereafter.

As [^] ^{^2} Ten culture,
it has not succeeded
in Nepal. We grafted
on the Cam. Japonica
but not successfully
& we have now not a
half dozen trees after 12
years. The climate of
the valley are already in
print in *Naturalist's* *Annals*

on goats, & is more on
the migrations of the
also in the Catalogue
of the Mammalia.

Nothing could be added
to what is there said on
the climate & physiognomy
of the habitat; and
for the plant, I
am told you already
that the attempt to
multiply it has
failed.

Yrs

C. P. Robinson

Report. April 3, 1944
No. 112

Wool in Wallish.

I have some letters
of the 20th. Many things keep
your case & attention.

I will send you, if I can,
a slice of the wool, by
Kangby, fitted to prove
its value as timber.

How much more paper
do you want? The

wool is that of the
Honiak Sheep of Tibet

which it appears to be

an object to naturalize

at home. Put the specimen
into the hands of an
expert person at Cal^{if}
for a report of its worth;
or, send it home for
such report. The animal
can be had, if the wool
prove as good as it is
said to be. As to the
men. of the Tibetan M.S.
Copy it in your own hand,
omitting my indorsement
& send it after the book.
What matters the identical
bit of paper I used. The
indorsement for the Institute
was a mistake.
Whom shall I send to

bring out my Zoology
of Nepal? I want no
assistance for the prepara-
-tions: but the arrangement
of the birds after the
newest fashion is too
tedious a work, if feasible,
as it hardly would be without
access to museums & to
more books than I have.
Then, will the drawings cover
the expense of publication,
lithographed merely? If not,
how should I proceed?
Some member of the Zool.
Society (to which specimens
of the birds have been sent)
would be best; and I

numbered. The specimens
enable me to refer
to my own drawings
& notes, which will be
retained here, & duplicates
going home.

How should I publish?
The drawings & the letter-
press? ...
Send to the printer.

Yours J. Apple
W. Morgan

My dear brother,

The mail just reached the ship,
and as the Post Office is immediately
before the storehouse there is keeping her
fairly warm. The weather is still
not so good as to be warm, however the
water will, and having a favorable puff
of wind, we shall probably not require the
aid of the Stove.

Since Captain Webster's departure
the weather has been the intention of trusting
that I have done so long without feeling
about much, but is without much delay.

The length of the passage may be about
three or four days, with the assistance
of my Stove, the forecast will be a great
improvement, and as the still bath of the
ship will be kept in a very good state,

I will be glad to see you
and all the family.

...to have ^{done} reasons for ^{going}
heart, and ^{they} therefore be
convinced as certain. —

For a while you ^{are} ^{the} ^{best} ^{of} ^{friends} — you know how much I ^{shall}
take your ^{copy} ^{of} ^{my} ^{most} ^{treasured} ^{and}
sacred ^{day} ^{by} ^{yourself} — The bright
fair ^{prospect} ^{of} ^{happiness} that my
day ^{dreams} ^{have} ^{not} ^{yet} ^{been} ^{denied} ^{to}
will be presented to me, ^{if} ^{the} ^{day} ^{of}
my ^{wishes} ^{be} ^{realized} — but the
chilling sense of my own ^{destitution}
nothing ^{of} ^{the} ^{little} ^{years} ^{that}
have ^{gone} ^{for} ^{my} ^{purpose}, and of
the many ^{unfavorable} ^{circumstances},
with ^{which} ^{these} ^{wishes} ^{must} ^{contend},
continually ^{torment} ^{deprive} ^{me}
hope ^{alone} ^{animates} ^{me} ^{when} ^I ^{look}
back ^{think} ^{how} ^{utterly} ^I ^{depend}
of ^{such} ^{happiness}, as the indulgent
approbation

approbation of Mr. W. D. G. himself -
The reflection of that unexpected view
whether some not to which I speak,
even in the present case, though more
doubtful still, - and the hope is too
small to be lightly resigned. -

Agree to persevere - cannot but sorrow,
I am hurried to confusion. - What
write by the Pilot - Make my kindest
compliments - may say regards? -
acceptable to Mr. W. D. G. - my
prayer prayers beside remain with
you, - believe me ever

Very affectionately yours
W. D. G.

20 ^{Duke} ~~Duke~~ Street, Westminster
22^d April 1834

10th scale

Your friend Capt. Paisley on
his arrival at Liverpool immediately
wrote to say that, he had brought for
me your box (containing the two bottles
of *Decidua cedar seeds*) and enquired how
they should be sent to me at Malton. I
requested Lord Stanley, who lives very near
Liverpool to go and apply for them, and I
received them safe. I beg you to accept my
best thanks for these seeds, which are a
most acceptable present, and I have
the pleasure to acquaint you that, so far
as observation upon the trials thus far
made of it enables us to expect, this
decidua cedar is likely to grow pretty well
in the cooler parts of England, and, if it
turns out to be as good as the *char-*
acter sent you from India, it must
be a great acquisition to our Country.

Yours
John Hall

country of Colchester

You have so much knowledge and
experience about sending home seeds that
I was not alarmed at finding the two
close sealed up. If they had come from an
unexperienced person I should have been al-
armed on finding them closed entirely from air.
You have the goodness to promise me a few
cones; if you should have the opportunity
of sending half a dozen it would be a great
additional obligation. For, as the trees, if it
continues to thrive here must be nearly dead
before it bears cones, a few from the Country
for specimens, as well as for seeds are very
desirable. At Ralsay near Newcastle up
Tyne I cultivate 48 distinct species of pine in
the open air. The Douglas pine from the Colchester
River on the west coast of Northumberland grows most
freely in Northumberland, and makes a fine
shoot at the end of summer.

Thanking you again for your very kind
attention to Mr. Colbrooke's request I beg
to subscribe myself
your most obedient servant

Chas. Monck

labours of a friend.
 But you are of a man! I cannot sufficiently thank you for your perfect business-like & zealous expectations. I have many good friends at all but not a soul amongst them would give me the benefit of a by the while which you have taken! Thank thee

My dear [redacted] "over & again

your arrangements are
the best possible, I am

very sorry

to see [redacted] the economi-

cal fit which made you

reject the steamer for

the [redacted] paper. Why

man! I would have paid

readily 6 times the sum.

You forget the delay, and

its consequent danger

of being anticipated.

But let it pass. What

was meant for the best,

is accepted for the best.

What a precision you

are! ad â. well, I never

gave a thought to the

must bring my
self to do so now. Else I
would tell you that your
example - dei prov. omnia
singulata, is bad, since
the plural verb understand
them certain, without need
of a [^] **27** prov. is ablativus!
And, generally, in a language
so grammatically constructed
as Latin is, the agreements
or inflections will always
serve to make these
relations clear - to the wise.
I did not, therefore, follow
the old fathers, I learnt
at school, & by my faith
the odds are that I follow
it still by sheer dint of
habit. However, so often
said

<f~ -K «

your hint, I will attend
thereto, for the pleasure of
satisfying thee. Yet, by
my soul, I can hardly resist
letting off one of Butler's
squibs at you.

And thought no sin so deeply red
as that of breaking Priscian's head
there, thou man of command,
take that! Your old friend
Mr. something Smith, must he
give you this humor of
exactness? The Cap. Museum

je-&t^&i^ t?

be attended to, & the
paper described be sent,
the wood, & the picked
flowers which you note
for propagation on your
account - & all & sundry
your desires shall be fulfill-
ed. And shame upon me
were it otherwise; for you

have done 'Gouman's service'
for me. & & &

The Barometers will certainly
be spoiled if they come up
charged. But Robinson
in the mean to advise a new
short market. Send them
to the care of W. S. Holt,
Patna. The Capt's words
take fright, were he
ordered up, here.

I've a great mind to read
you a lecture touching that
paragraph, 'Tibetan or Bud-
-dhist - all one - to me'. Go to,
thou Cyclops! Know'st thou
not that Buddhism is the
most universally diffused
faith on the face of the
Earth? I mean, the faith
claiming the greatest number
of followers? Know'st thou
not that it is the creed of

all extra functions in
Ceylon, & most of the other
Indian islands, Persia,
Tartary & all known
than not that its origi-
-nated in India & that all
its original scriptures are
Sanskrit - & that the Tibe-
-tans are among the least
civilized & numerous of the
various people who have
adopted this faith?
I say thus much to interest
thee, my dear Mother, in a
subject which has long
interested thy loving friend.
I write to you seated in a
very pleasant & charming
Caravansary, or Hospitium,
built, long ago, by some
father & son, who built the
case of it in the year 1732

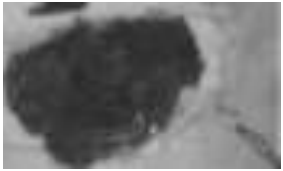

temerous pagan little
dreamed would ever be
defiled by the vile Feringees.
It is a right pleasant place,
& beautifully situated,
on a ridge, with a fine
open unindented country
to the back or eastward
of it, so open that one
can oversee the hare
over its 'velvet lawns'
I am here for change of
air & am much better
since I came here, having
been previously suffering
from weak digestion & its
concomitant, irritable
lungs.
Love to the boys, love
Therrie affle
I hope the drawings
will please you. My
are most carefully done.

April

Louisa, N.Y. 11th 24th - 22nd Feb 1851
My dear Mr. Melville

Your letter of Nov. has just reached me at the moment when my poor wife is following her last to the grave. Yes! she died on the 25th of Nov. 1850 and on her way to the church yard of All Saints Church she died having closed her eyes. It is now discharging the last poor duty of filial piety. Now that I have my dear Melville, we to bear up against these sorrows, little efficiently discharge our duty.

Are we impeded by Religion? Since then undeniably, I have studied in silence & reflection his appeals to the New Testament, & have come forth a firm believer in all that Christ taught - but an indignant opponent of all Churchmen's dogmas. I subscribe to his faith another faith thing, & I have implicitly to his

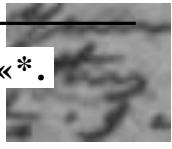

rather - whole miraculous power I believe in simply & truly. Channing's argument in favour of Christianity is to me all that I need. I believe in its truth - and follow the mighty

Christ, considered as true a father & a saviour. I believe in its truth - and follow the mighty influence that flows from it whenever they baptize a leader. I see nothing in Christ's precepts or examples that offer us regression, or delay was from all the progress which I had as the Christ. He came to reveal the truth of that simple & sublime faith, which is capable of the heart is religion - that to the mind & spirit is pure - that forms & ceremonies are things new pure - that forms & ceremonies are idle deceptions - that one day is as another - that virtue alone has the power to assure an ever lasting happiness & that time is but the commencement of eternity. I read the creeds of others - prefer with neither the unstrained faith of those nor with the indifference of others, but with an ever way rejoicing. —

Red 19th May

My Dear Sir

For your letter and
the list of plants I
should have thought
now long ago I ought
to say that the plants
have not yet reached
altho I had a lot of money
which I had at the same
time have been here
for 10 days. The post would
have now set in & I fear
the plants will suffer.

On my return I was very
satisfied that few of the
birds sent me had seen
any other which were
in the country. I
am however glad
on the ground for want
of birds of the same
you are able to see
with a single eye. The
season I hope you
may be able to see
a better one of them.

Mr. Brown says the best
of being able to see a
quantity of you know

our you could recommend
to us. I hope you and all
your family are in good
health & in the best
of spirits

Yours sincerely

Friend

Dear

I have just been informed that a gentleman named Esch has been for Calcutta & will carry a letter for me, & I must give me off without loss of time. I have got you of Nov. 22 & am very glad to see your kind writing again, as my children seemed to need a copy, for they know your hand & give me some notice from all end of their house to the other. I rejoice to hear that Mr. Wallish & the children have arrived - for to say the truth all your friends in England were under considerable anxiety about them. George is very busy with his Latin studies & has three volumes of paper at work. I can safely say that he has been a student of Lake, which I am sure is the result of a purifying intelligence

Brother & sister
of the best of you from this part of the
of the best of you from this part of the
with whom the friends had a consultation
about some weeks ago & came to
on somewhat considerable
matters. He is now fairly restricted in
regard to public ministry, in order that the
debts which he has incurred may be
paid. His inconsiderate which we hope
will have a good effect in teaching him

which, although their pseudo-balls had become rather shrivelled, were recovered themselves after a little airing.

The Hook of the late Mr. Rouse on vitaminous plants consisted of 15 Numbers, and the price paid to him by the subscribers was 20 of each Number at £15. for the whole.

Your Account of Mrs. Wallis's arrival with 3 of her children at Calcutta delighted me so much more, as it proved that she must have had a very quiet passage, and I am confident, her presence has very considerably added to your happiness & comfort. St. Night returned to Madras at about the middle of last month, and since then, I received a letter from Mr. Griffiths, stating that he had sent off to the care of his Agents some packages, directed to me, for the purpose of explaining them, after arrival to St. Night, who however gave me directions, to forward any thing which might come over for him, to Mr. Walker Agent in Madras, but if you should have any objection to communicate the above to Mr. Griffiths, whose letter is dated Aug 29. last, but in which he says in its conclusion, that he is to send the same evening for the P.O. papers, I should be very thankful to you for it.

From the date of the remembrance of this letter to the present day, I was intended to wait with finding it off, in consequence of the arrivals of other vessels, which by letter in packages from you on board, viz: the ship, Capt. Winkler, and the Commodore, Capt. Bell, but the Royal Anne is still behind, and I have not been able as yet to obtain any accounts from her, and I will, with your permission, conclude this letter with stating the names of those persons to whom I have delivered your respective little packets, viz:

- | | |
|-------------------------|-----------|
| Lord Fitzwilliam | Mr. Rouse |
| Mr. Brown | Mr. Rouse |
| Mr. Robert Dg. 3, weeks | Mr. Rouse |
| Mr. Abt. Rouse | Mr. Rouse |
| Mr. Lambert | Mr. Rouse |
| Mr. Rouse | Mr. Rouse |
| Mr. Kelly | Mr. Rouse |
| Mr. Rouse | Mr. Rouse |
| Mr. Rouse | Mr. Rouse |
| Mr. Rouse | Mr. Rouse |

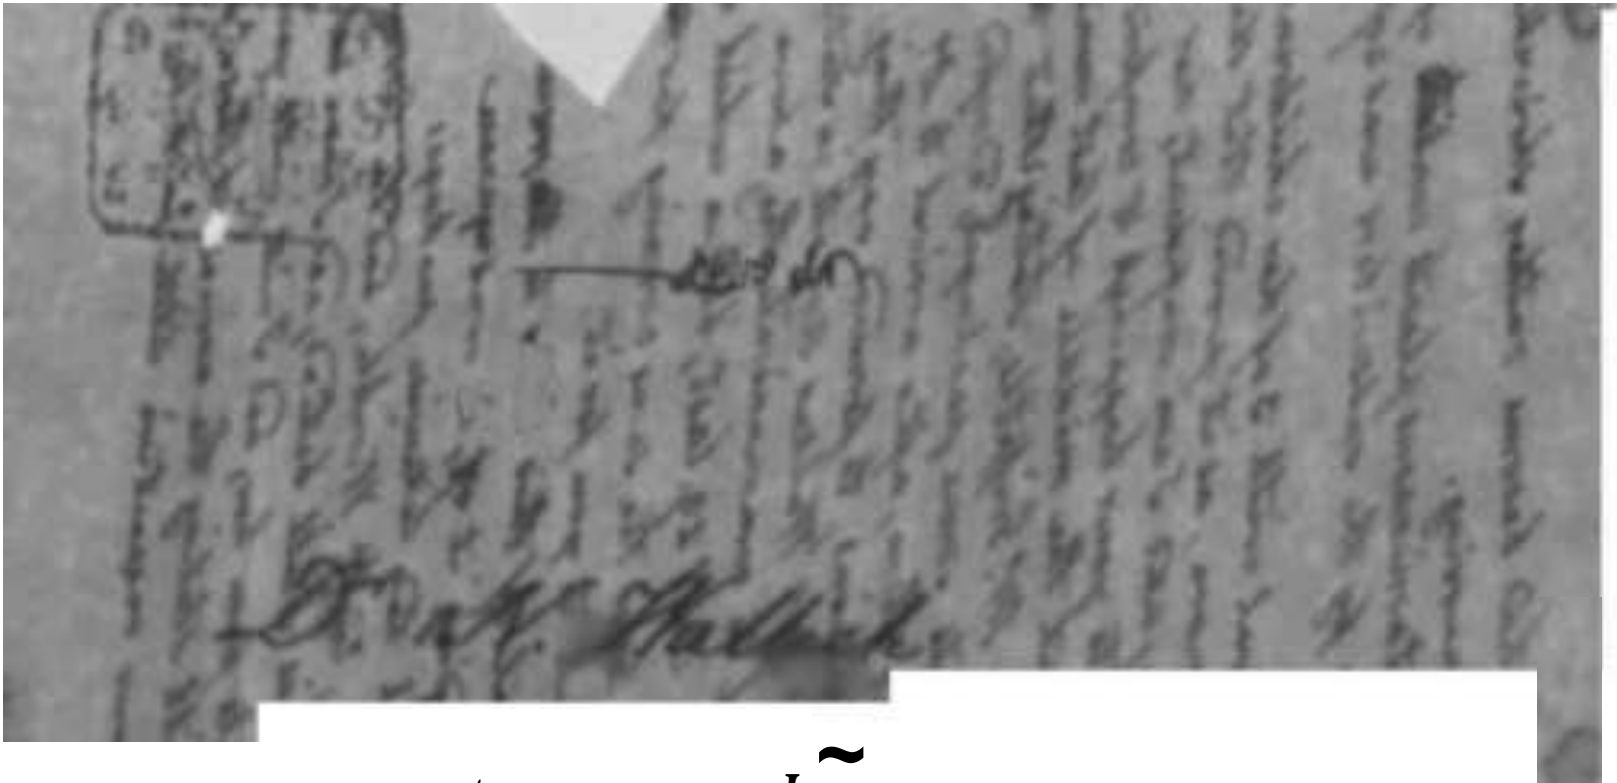

one more for Mr. Rouse, which letter he has thought proper not to send for yet, although I sent his immediate notice of its arrival. Should the Royal Anne eventually reach our Port, such packets as she brings from you, shall be as punctually delivered, as the above, to their respective addressees, by

Yours very obed^t double servant
J. Rouse

P.S. The Books sold, you or kindly sent for my own disposal, I have already distributed in about 12. Subdivisions amongst botanical establishments in the Continent.

Reply 15

I was happy to find by
 a letter from Mr. [redacted] the other day
 that you had received information
 of an English Gardener for [redacted]
 man lately [redacted] he was employed
 I hope the man of good character
 for the atmosphere of business does
 not seem favorable for the growth
 of moral worth in [redacted] of his
 rougher life. I trust that he also
 was a successful [redacted] Gardener
 for his industry & [redacted] of his
 most regular and [redacted]
 no fear as [redacted] [redacted]
 [redacted] a man quite equal
 to his task.

*P

"^"S,

Ss*t / . t < *'

in rather [redacted] [redacted]
 in our land [redacted] of [redacted] for all
 the [redacted] & [redacted] [redacted] on [redacted]

to know that we thought
to suggest a plan for the
garden with the pine and the
consider to the Bookish Regulation
is much better. I have you
now in the center of the site we will
soon you will find that we
would not have in the
and also you have a small
space for yourself. Some of the
to be seen through that
garden is well as the
with fruit trees we should be
up access and from
arranged in that than
your property. I will
- want to have to be
good large Pelilla which
fruitful and a little apart
from the other garden may
be loaded with various fruit
trees especially any other
to which they give a warm

and that you now shall never
will much longer depending on
all the case here but I understand
so that our or two succeeding the
different case besides which you
have will be very acceptable.

Regarding need I would to you
that this will be a good offer
to get for getting them up.

All the friends of the cause will
be as much interested and I hope
that if this favourably you mean
to do to afford us good plants

of Mungos we are getting a
supply from Malda but of
the Alphonso there you can
see us 2 or three young ones
will appear that is said to be
a good kind.

Pray excuse all this trouble and
the liberty I've often taken thus about
my own
Yours sincerely
W. Johnson

W. H. W.

30 May 1831

My dear Dr.

I send you a list of the
parties to whom lists of the Decree
have been transmitted with a copy of
the original Decree enclosed at your
service the others you sent me. The
whole went from the Chairman to
I at least hope you will give me
credit for circulating the precious concerns.

Yours truly
J. Ballin

I do not find that any have
come up. I was to lodge at Harkins
some of his have appeared. I wish to
see how his robes he had which
suffr moist in it.

I hope you have not been humbly
by. I am in good a piece of paper
for a moderate stay when we are
satisfied from home.

It is only in haste but I heartily
wish you every kind of health & happiness
Remember me to Mrs. Wallcut & do not
fail to let me know how you are
yours

graft from it, & the
Residence. Those of the
former, have perished
through neglect - our
survivors & we have
multiplied
with the *Samoa* *Yap*
- *nia*. We have
two large & four smaller
trees - all healthy &
thriving, so that we
might have had some
scores had pains been
always taken. I have
now fixed directions
for the trees to be
our trees are now in
the Residence garden;

which you know well.
As for the climate in
point of temperature
& of moisture, there is
an accurate account

copied in Bramley's
essay on the (I don't
know) & in my essays
on the Migration of
Birds & on the Mammal-
-malia & in Buckenham's paper.
By the way, you will
not mention my share
in Bramley's essay,
though, between ourselves,
it was the Lion's share.

American Medical Botany, a
work which I published some years
ago.

Your allusion to Dr Booth
has touched a chord of sympathy,
with which my best and earliest
associations are combined. I had
the pleasure to see Dr B. in London
last summer, and to hear the
anxiety expressed by him & other
friends for your safe & timely arrival
at Calcutta. The final intelligence
on this subject has gratified all
lovers of science.

Accept my thanks for your
valuable "List of woods" and believe
me
your obliged friend
Jacobs Pringle

John - Thank

Many thanks to you
note - It is almost to
much to expect you to
attend at our meetings,
a. such good things in other
days hand of Hampton
Frank Jackson's under-
-positions yesterday - His
a fine sea storm only later,
but it gave me the same
sketch - Please be con-
sistent - Hand your paper
now - In connection, as

H. W. Wick Esq
No. 10
or or or

Dear Mother
I have just received
your kind letter of the 10th
and I am glad to hear
that you are all well
and happy. I am
well at present and
hope these few lines
will find you all the
same. I have not
much news to write
at present. I am
still in the hospital
and have not yet
been home. I
am getting better
every day and
hope to be home
soon. I will
write you again
when I have
more news.
I love you all
very much.
Your affectionate
son,
John

the paper equally as well, and each Spirit would require nothing further,
but its name to be affixed to it, and placed in a common box.

Whether the seeds of *Sium Thibeticum* & *Sedum*, sent pt. 1st, will have
similarly suffered with the *Salvia* seeds, by coming over similarly packed,
is an object to which I shall not fail to pay particular attention, and to
report to you an exact amount of it in due time. The seeds of the *Podas*
were declared here to have been sent on their passage and considered that
to be the cause of not vegetating.

If I should be able to afford light. While in the disposal of the living plants,
which he brings over for his own use? I shall certainly do it with the greatest
pleasure, but in their arrival in England, I am convinced, they require an individual
and careful nursing in a hot house, if their growth is to be preserved, and
it is principally on that score, that I am deterred from any attempt to make
a similar trial from our botanical establishments on the continent, unless
I could feel extremely sure, if they were called upon, to pay for seed plants, and
they must remain constant with seeds only, which however they will always
accept, not only with utmost gratulation but be at any time ready to receive
of seeds similar nature, if ever it happens that any European seed over
of any particular interest to you.

My first letter to you, in answer to yours from you, I put into
the letter box at the India House, but whether they are forwarded in
that manner sooner or later, I am not positive of. I think however
propose to send this instead to Mr. Audley, Secretary
Directors, and to beg of him to get it transmitted by the earliest and
quickest conveyance; but I shall consider it a favour, if in your next
you could give me, if necessary, your own instructions, how I am
to proceed in forwarding them from here, so as to have the best
chance of their going as quickly to Calcutta as possible.

Trusting to your availing yourselves of my services on all possible
occasions I remain with the highest regard

Dear Sir

Yours very obedient servant

J. P. Thunberg

enclosure

10 June 31

My dear Dr.

Recd 19th a
July 20th a
I have called on
Miss [unclear] & [unclear]
[unclear] [unclear] [unclear]

I think the enclosed note
of Patrick's not undeserving
of being preserved as you
note you are taking the notes
of Messrs his letter. There is no fine
to be made like myself. —

much struck with the cotton
and I am quite certain that
the ground I have seen. I think
there is a vast quantity - is better
adapted for the best American
cotton than any I have met
with. — It is exactly suited to the
sea island seed. — Note
what he says of my silk & see to
the notes of you — before he
parts with it.

I note a P.P. from you today

Always this were leaves of the Peruvian paper
and the white paper of the same length

What do my heart & satisfy
you I am not understanding
of this favour. I send you
separated the leaves from the
other wood - what do not
agree with the paper on - this
belong however to a very young
succulent branch - what was
a beautiful grass that you
show - I do not see a other leaf
and this cost me 2 Rs what set to
account against the heavy expenses
I have put the paper to. It
not an inhabitant of this in the
vicinity of my grass with on this
great height - there will be no mistake
I suppose the person who brought
me this brought also some of the
other sufficient than in seen. It
but the identification beyond doubt
I have written a folio to Chester

about the Tea plants - The plant
I shot in the garden came from
Fisher-Cachas - I knew it was
not Tea - but did not know
the name - F. told Mr. who
sent it - he replied I know a division
- its one of the rarest found
in the jungle here in the Cachas
jungle - I have got a small
Herbarium here preparing for
you - which if you effect it
shall be prepared in duplicate
so that you may send for any plants
to the Govt. - but you can take
at plants I brought down &
did you find anything new

In haste today

Yours
W. J. F. Perkins

my garden, I beg respectfully to
inform you that any favour
in the way of plants
will be most gratefully acknowledged
More especially from New Holland
The Cape, East, and West Indies,
South and North America, China
The following are a few of
the most desirable plants

any of the Cacti, or succulent family.

of the Orchidaceous or Parasitical kind

The Bread Fruit.

• Alligator Pear.

• Anchovy Pear.

• Alce Tree.

• Mango.

• Mangrelan.

Mahogany.

Quercia

Glove Tree.

Cinnamon

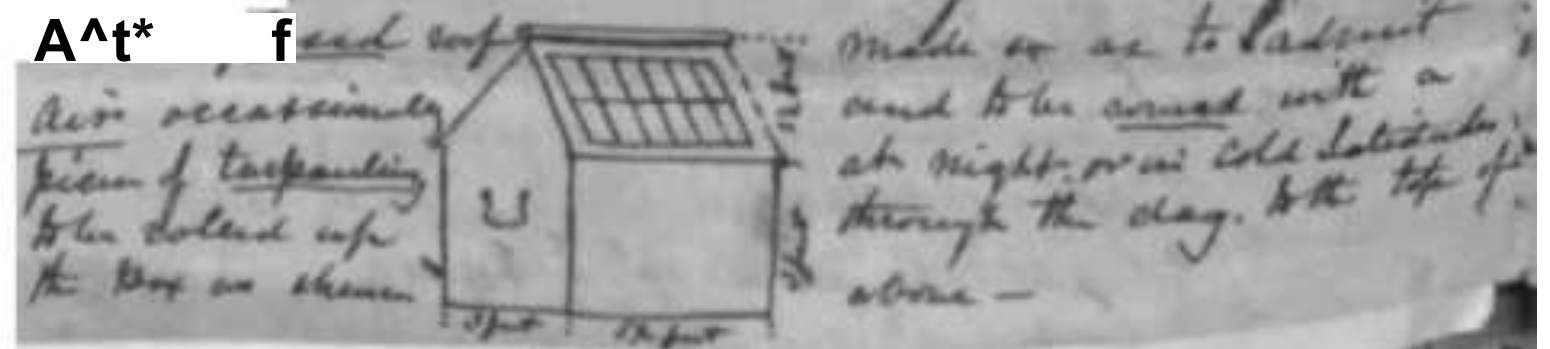

Nutmeg.

Cocoa Nut, or any

other of the Palms

The best mode of conveyance for such plants is the following. In the Cacti, and Orchidaceous plants to be collected during the dry season, and packed in Boxes amongst perfectly Dry Moss, or some such material. The Box to be perforated with holes in the sides (one about the size of a Musket ball, for the admission of air. The other plants named, and such like will require to be raised from seeds, or slips, and or planted in Pots, some time previous to packing, and when they are to be carefully turned out of the Pots and placed close together

in the Boxes, filling up between with fine mould similar to that in which they grow. The best form of Box for purpose is the following

Air occasionally
piece of tarpaulin
to be rolled up
the Box as shown

made so as to admit
and to be rolled with a
at night, or in cold latitudes,
through the day, to the top of
above -

For the conveyance of seeds,
best method yet known, is to collect
and being carefully dried (if gathered
damp state) put up into separate papers, with
about an equal portion of perfectly dry sand -
Then named, or otherwise, marked - after which
the boxes transmission - after which
being carefully
packed, either in tin or tightly wooden boxes
laying in one layer of papers and one layer of
the dry sand, alternately. until the package is
complete. The lid to be well secured for as to
exclude the air and damp.

My dear Sir

Having heard of
your return to Calcutta,
I await, myself of the
Department of sending to
you by the Ship City
of Edinburgh a Box
of Plants of this Country,
of which I enclose a list
prepared by the Gardener.
I fear this list is not
correct, but I have not
time today to examine
it, nor to send you a
Parcel of Seeds as I intended
as the Ship

If you will let me
have a list of such things
as you wish to know
how to know, I shall have
great pleasure in sending
them to you. -

Any paper seeds will
be acceptable here. -

I have recently been
to ~~and~~ that I have
lately heard that our
Nottingham friends in
London were all well.

Yours faithfully
Geo. W. Lewis

Friend. Rotterdam 17 Octob 1834.

On the 13th I understood from the messenger
that some officers ^{of the frigate} had been in the garden
the preceding evening (Sunday) who had told
him they wondered why they had not sent for
a bag of plants and parcel of seed from
New & Wales, which that ship had brought
to plant. Now it is a pity to conceive how
readily she must have brought in
brought me Mr. Hall's things in this manner,
as they had not seen a syllable of information from
it at once arranged to me as likely that the
plants might be gone away with the M^{rs} C
letter had announced, and which was expected
on the City of Dordrecht's arrival from the
where I understood she was on my receiving
the letter. I wrote immediately to the Board
and to answer reply with the plants chest, and
I also wrote to Capt. Chapman, whose reply
was also answered. - I could not possibly believe that
he had taken the plants away - not having seen
letter whatever except this and this I was with
agreed to think he undoubtedly ^{was} ^{sent}
today. The last objection is that he ^{was}

could not but suppose that the letter which he took from
Madame would not be ~~of the same~~ ~~of the same~~ ~~of the same~~
this kindly taking the opportunity to inform her that
from the City of Philadelphia.

Madame
I have the honor to
acknowledge the receipt
of your letter of the
10th inst. and in answer
to inform you that the
same has been forwarded
to the proper authorities
for their consideration.

that very few, comparatively, of the seeds
in bottle have vegetated, & an ingenious
friend of mine supposes that the vital
principle may be destroyed for want of
a supply of fresh air. — It is possible that
some fermentation & decomposition
of the air might take place within the bottle
after it has been hermetically sealed
which might first excite & then destroy
the vital principle. — This might be
prevented or rather cured by
renewing the seeds in frequently
turning them down. I have
been extremely anxious to try several
times how long it was possible
by management to preserve the vitality
of plants, cuttings, &c. & find that some
in a dormant state, as the seeds

S.

I had the pleasure to receive
 lately at my House in London, No 20
 Duke St. Westminster your very ob-
 lying letter of the 18th of January,
 and the box containing the bottles of
 Deadness and Osmus seeds and the
 two coves of Deadness. I feel exceedingly
 obliged by your very kind attention
 in sending these seeds, and am only
 so

Your directions about soaking were
 followed with one
 of the rose: those from the cover
 rose. Upon enquiring at the Horticult.
 Soc: I find it has happened the same
 with them. Perhaps you may have
 thought

Thought that in closely sealed bottles they
succeeded from insects & damp, which they
were: that entire exclusion of
communication with the atmosphere
was destructive of their power to vegetate.
They appeared to be most beautifully
well selected seeds, for out of the
I did not get of seeds as prime as
as many as would fill the bottle or
full. Now, I venture to say that if
damp from insects & damp
enclosure in bottles, they might succeed if
the bottle was large, say a pint or quart
bottle, and only one quarter filled: then, if
in spite of this the quantity of atmosphere
included with them might be sufficient
to support their very reduced rate of life
during the voyage. The best of all ways, however,
I think is to send the entire crop, and let
them fester a little unripe, that they
may not fall to pieces. The Cornus
probably like our silver fir, to which it is
nearly related, with the scales quite loose
soon as the seed is ripe. The Cornus
does not grow well in our society's garden
which. The situation is that the air is not
sufficiently pure, & the air is not
sufficiently pure, & the air is not
sufficiently pure, & the air is not

ago. I hope this may find you well in health
begging to accept all possible thanks for
your much obliged & obedient servant

Recd with a note from Mr. Stoddard dated 17th Dec in the 18th
of 1834

Waltham Mass 11 July 1834

I have just received your letter &
feel much gratified by your kind remembrance of
me & your present of the case of Scars Decidua
with the most acceptable. Nothing, in fact, can come
with which I could in any way be illustrated in my
"Anatomical Diseases" or which would materially help
me by sending me at any convenient opportunity
specimens of such sections of woods, such as
will in due time return the obligation by sending
you the specimens of plants as I have mentioned
he is already reading in the steps of his father
and having zealously attached to the science of
Botany I will file the remainder of this paper
with an account of some experiments I have been
making during the last 5 years on the growth
of plants in closely glazed pots. These experiments
have been attended with results so curious as I think
them to be practically important. I will send you
my early inquiries & I am

placed the bottle outside on a
 side with a southern aspect where it
 was calculated to receive the most
 direct light within the (the Pantheon & Apollonia) the
 and contained the young mycelium without any
 of fresh water. At the end of this period they presented
 the appearance of the advanced form from the starting
 of the leaf. I have repeated this experiment in
 circumstances upon more than 300 species of fungi
 & the result has been that it is established

of the Phorm & mycelium depend not upon the
 direct radiation, but upon the heat of the
 water with which such a mycelium is filled
 it would be necessary to examine all the experiments
 made to determine this point. I will therefore confine
 myself to one case with the Myrothecium trichosporium
 & Myrothecium under the most favorable conditions
 which have been created to grow this form. I will
 thus place in a bottle half filled with water & will
 be protected from direct contact with the atmosphere
 because by placing the bottle in a room with
 its relative humidity 2°. The second condition that plants
 have been noted to require fresh supplies of water
 for a very long period of time - So soon as the
 conditions of the Myrothecium have not been noted for
 time & space. 3°. That will be the
 degree of cold & of heat that has in the ordinary
 this point upon showing the close connection existing
 between the vegetable & animal kingdoms - When we take
 the Apollonia bottle & other experiments having been
 given the cold from water we recollect that the
 of Poy & others who state that they will bear any
 degree of cold provided the amount of a mycelium has
 been kept at the water - while on the other hand when
 we observe the Myrothecium exposed to the full influence
 of the sun & protected by an envelope of glass

July 1836

recd 12 July

early 18th July

My dear Sir,

Pray remember it -

Believing that Citrate of lime
is a very valuable article
of commerce - and that it is
made equally from the juice
of both the Citric tree (in less
proportion from some than others
of the genus of course) and

no place that has

greater advantage in the
possession of unbordered
stones of the whole family
of Citrus than, the process on the
face of the Kasial hills -
I want to put my friend

of Santos - Mr. Harry Taylor
in the way of turning his
out of these means to every
possible profit - thousands
of barrels of sugar & cotton
& Linnons perish there for
want of the means of transport
to market - before they are
destroyed. - You will
probably do me the favour
of consulting Mr. P. H. Taylor
who would tell us in a
moment the best & most
profitable way of getting
about the thing - These
kind require the line

a very expensive apparatus
and much cost in packing & so
that the whole affair
is a preparation of a
kind of transport - and with
that is always sent to the
Government in England
for transmission into the
Please make some suggestion
I ask you to do so
at the cost of other matters -
Gordon (with a Gordon) will
tell us but he may not choose
perhaps he dabbles in it
I think - I'm at Christmas -
we have the same of the
piece on the spot of the

I presume it can be most
profitably made.

Don't forget this please -
Send you some package
of long Banyan Seed: as a
forerunner of a letter to come
afterwards in answer to your
demand for vegetable seed.
- We have been few choice
seeds vegetables but knowing
that all seeds are better for
migration I will send you some
I am afraid of your being
indifferent - and you shall
know. I hope I won't find
it abundant please the
best of wishes that way
take. — — — when you

have an opportunity - please
send Lady William if she
will take a look at Chirra
for me - I am sure a little
sobered I can pick out
a nice spot of ground for her
I am invaluable J.S. - a
good climate - I wish she
would come & bring you
in the steamer with you her
The Kasich hills are not
what one might at first
think but they are most
favorably situated with
regard to Calcutta - further
east in the same range in
the great Kachar mountains
is one of the finest countries

The world have not
to see the completion
of the - a delicate count
- that is to say - but the hands
you have made & shown that
fit - may you also in words -
not a few in reality the only
remains the others of them -
a copy - a sea - a copy
a copy - a copy - and
a grain count - beside -
has not the evidence of the
from 1700 to the year 1700,
that part of the in the year
counts are in the year 1700
and a perfect their counts -

his letter may you No 13 Dear Sir / £ July 22 July 1834

Dear Sir
I have just received your kind letter of 11th inst. & I have duly come to hand - also the Scudder's seeds & Box of plants by Capt Biddle - we are very much obliged to you for thinking of us - but are sorry that none of the Scudder's have grown, and of the plants nothing was alive except a great quantity of seedling Livingstonea, which unfortunately is almost the only Palm which are already abundant in here.

We have put up a Box for you by return of Capt Biddle who has been kind enough to offer it a place in a new principle being made as close as possible with glazed lights - and not to be opened on any account on the voyage as it is that which kills plants - pray let us know when you get it the exact state in which the plants arrive - as we wish to ascertain most particular

Now Dear Sir if you will do us a great favour and oblige us infinitely, pray fill some Box in the same manner with Orchidaceae flowers of the kinds which are frequently named or any other New ones & when the Box is filled let a quantity be placed round the sides every where and then have the Box perfectly closed and tell Capt Biddle to let it be placed anywhere, where it has all the Sun & light, and not by any means to open, or water, or do any thing to it on the voyage - we interest you these Orchidaceae and nothing

anything which we can send you you know always most heartily at your service.

Yours truly yours,
W & G Loddiges.

Dear Sir

I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the above mentioned matter. I am sorry to hear that you are unable to attend to the same at present. I will endeavor to do all in my power to expedite the same as far as possible.

I have also the honor to acknowledge the receipt of your letter of the 15th inst. in relation to the above mentioned matter. I am sorry to hear that you are unable to attend to the same at present. I will endeavor to do all in my power to expedite the same as far as possible.

I have also the honor to acknowledge the receipt of your letter of the 16th inst. in relation to the above mentioned matter. I am sorry to hear that you are unable to attend to the same at present. I will endeavor to do all in my power to expedite the same as far as possible.

I have also the honor to acknowledge the receipt of your letter of the 17th inst. in relation to the above mentioned matter. I am sorry to hear that you are unable to attend to the same at present. I will endeavor to do all in my power to expedite the same as far as possible.

I have also the honor to acknowledge the receipt of your letter of the 18th inst. in relation to the above mentioned matter. I am sorry to hear that you are unable to attend to the same at present. I will endeavor to do all in my power to expedite the same as far as possible.

Recd 8 Dec 1834

Presley 25
7 July

Zoological Society of
London
Bentley St
22 July, 1834.

My dear Sir,

Your letter to Mr. Vigne of
Paris, enclosing one from Mr. Hodgson
of Oxford, has just reached us. It
is Mr. H's wish that we should
immediately communicate with you
on the subject of any arrangement he may
have to make to the Society. I find
I get the same in his letter that it is pos-
sible that in the present could serve

D. W. L. S.

There may be at Calcutta persons, who
and hearts intended by him for shipment
to England for the Society. Should not
be the case, you will oblige us by
making arrangements, the best you can,
for their freight with some Captain
who is likely to take care as well as
charge of them, and by advising us of
their departed and of the arrangements
which you have made. To the person
who will have more immediate charge
of them, you may promise that a present
shall be made on his arrival proportioned
to the number that he shall succeed
in bringing alive. You will also have
the goodness to know on the Society
for any expenses that may be incurred
previously to their arrival and during
their stay at Calcutta. I trust that
this latter arrangement will not be in-

convenient to you; if it is, mention it
and point out a more agreeable mode
of discharging the pecuniary part of
the obligation; but, other circumstances
equal, we should prefer paying here
to establishing an agency at Calcutta.

I inclose a letter to Captain Thomas
Sherris, of the Ship Duke of Brunswick,
who sailed hence for Bombay on the
29th last month, and who is recommended
to us as likely to take good care of
any living animals, should there be
any ready to send at the time of his
leaving Calcutta. But this letter to
him you will make use of or not
as you think best; for your acquaintance
with the commanders of vessels will
enable you best to judge as to who
is likely to be most useful to us;
and the circumstances of freight and
perhaps most of course have some

we have, I think, but one course to pursue
it is to leave ourselves entirely in
your friendly hands, trusting to you to
make the best arrangements you can
for us. I have already stated this to
you in a letter addressed to you about
a fortnight since; and must be taken
then repeat our conviction that you
will manage this affair for us in the
most satisfactory manner.

In that letter I mentioned to you
Capt. Menzies of the Duke of Buccleuch
as having been pointed to as a gentleman
who would take great care of the money,
but left it entirely to your discretion
as to whether you should speak to him
on the subject. In fact the arrange-
ments must depend so much on cir-
cumstances that no instructions can be
given from hence for the guidance of
those who are on the spot and able to
judge of all the circumstances taken

together.

And that I have not in my
will had any of the things
before in my year past at
will & accordingly let the
friend market's per.

Yours truly

Samuel J. May

how
any

The General was remarkably well - considering his great age - He was all bustle and anxiety in arranging his business by his birthday, for the celebration of the 80th anniversary of which society invitations had been accepted. I had not seen any man - and I had not had a look at his letter again - I fear for some time.

Trust my dear Son - you especially have long since been returned to health - Bengal is a trying climate for the season of the year - Here we are more fortunate - by the descent of Rangoon we are nearly as hale and strong as in an English climate - provided always as the rest of the people will be abstemious and lead a regular, sober & steady life - I am now sitting very comfortably in a black jacket, fine weather breeze blowing over the lake, Therm 78° (6 am 2 1/2 PM) - Heaven so so pleasant & bracing - and very different from the hot close stuffy atmosphere of the City of Dacca. It is a favorite of many years since I have had no desire to see it again - for should I ever have the means of going Home, it will be via Bombay & Egypt -

With best thanks for your kindness, Dear Sir

I regretted to see yesterday
 you wished to see Dr. Parsons's
 "Life of James". I therefore have the
 pleasure to send it to you, before I
 announce its arrival, in order to
 give you, more time, to read it at
 your leisure.

I was extremely sorry
 to hear from Training that you had
 had a most painful sick headache, and
 that you yourself had also been
 a little unwell. I sincerely trust you
 are now completely recovered, and that
 your family are fairly off the sick
 list. — When you have time to

Books of English authors, there
to ~~see~~ marks very recently of
what we have good paper that
I may not see next year

...you will not have some hesitation being
...Should be

My dear Dr. McTear,

I thought, and I will not revive the painful
recollections which my beloved Mother's sudden death
will have occasioned you before I have reached
you, your dear Mother's will have divided into
wonderful memory of him, and which I may say is
dear than he merits, as he has the smallest
merit, and a deep sense of your kindness and
kindness.

It is yet but a week that I have known any
humanity, he will say I have known it have
brought down not only upon him but upon
without an object, for we had been together, one
but - one life, and that was in being together -
the future, our future was our reunion, for
without that we had no future, no joy, no hope,
and he is gone! and my poor Mother's mind
is left to mourn one who loved her, as we never
you shall be good - The whole of his heart
was love, and he poured it out upon us our
our mother's presence, but we were changing, we
we were, but his whole heart was in his affection,
and that he gave to us - I thank God that in
the hour of anguish, he has permitted us the consolation
that we are his loved ones with the same
testimony, - otherwise our Calamity would have
been beyond human power of bearing -

You know, my dear Mother, under peculiar
circumstances, - on his death and in its momentary -
I hope he will not all the
to satisfy the most ardent affection, - will he not
and value, and will - I am a lover

* . . . ^a£L

r^^

p

-sC* ^>t.#" -?&*

itself - all delicacy and all feeling, and here was a
presence in that feeling - **<*V^ -*yft~4^44*** beautiful, - a smile to the world, and its chilly coldness
and its simulation - That happiness was it blind
with him? - I thought he was not - but then to whom
he developed himself, they ******* *t ~*~^£. ~^t.** could
not but esteem him highly, and as to more and
more devoted himself, his feelings - became
the stronger - but not, - to whom behind his heart
lives, and we who found it the same, all that is
pure, and noble and admirable - no more than
loved him - it was with such love, as he loved
us - We are now indeed devoted - yours is our
own habit, - and with him our future life, or
at least what he calls the latter life -

But this is not right, - I am writing a letter to
you in pain, and I have many things
to say - but first let me express my
truthfully, - my wishes to you - do I have
my part to play in his love, or should I have obligations
to be humane, which he felt, **^S,** when his own
in your house, he recognized the officer, - the father
business - the universal attachment of affection, which
has not only his whose delight is to have been
to make him ^{happy} far away - It will be a
pleasurable pleasure to you to hear that the happy
days he passed in India were under your roof - but
how he found the culture, - great domestic life, which
he most prized - I know that **Y ^** the comfort has
for all was in the end, with his own
to the end his own admirable life, which,

I was about to exchange a comfortable home and an
happy circle, for a small temporary movement they
could take. I have taken the same in point of
safety - A?
of hands, for nothing else had I to offer, - and such
is being, that I cannot see, though I have had it, how
brotherly ought that might have been, a simple
removal of my grateful remembrance
I suppose, as an American engagement has been it
was not decided, - as a memorial, let me hope
it is unnecessary.

An address in other places to be necessary,
and it is of yourself and family, and in and
I fully says - This kindness, even
followed me after departure, for the Walker
looked me with tender and anxious good
things for the comfort of the invalid, being
that he is now in . . . ^
& . . . ^
I cannot copy these verses, and am sure
appropriate of my poor the . . . ;
without feeling the assurance of your
and that Walker, and I think you will believe
that this is not the transient feeling of spoiled
emotions of grief, but a strong and enduring
sense of immortality, and most kind friend
on your part towards him -

I doubt comes to the end matters which needs
upon me to inform, and which a powerful reply
to a quiet myself of you, has made the address
you earlier than I should otherwise have done
I am well able to do -

Now - Mr Factor will doubtless oblige me so far
 as to take equal precautions, in ascertaining whether
 my poor Brother left any thing unpaid in England,
 & if so, as I said before, to pay it - He however may
 take some little time, & I do not think it
 proper to expect more, Mr Factor has better know of our
 one immediately for the balance at present available
 take care to him, and he can draw upon me a good
 amount for all ~~the~~ further ~~the~~ my poor
 Brother's account, whether disturbed by you or
 himself -

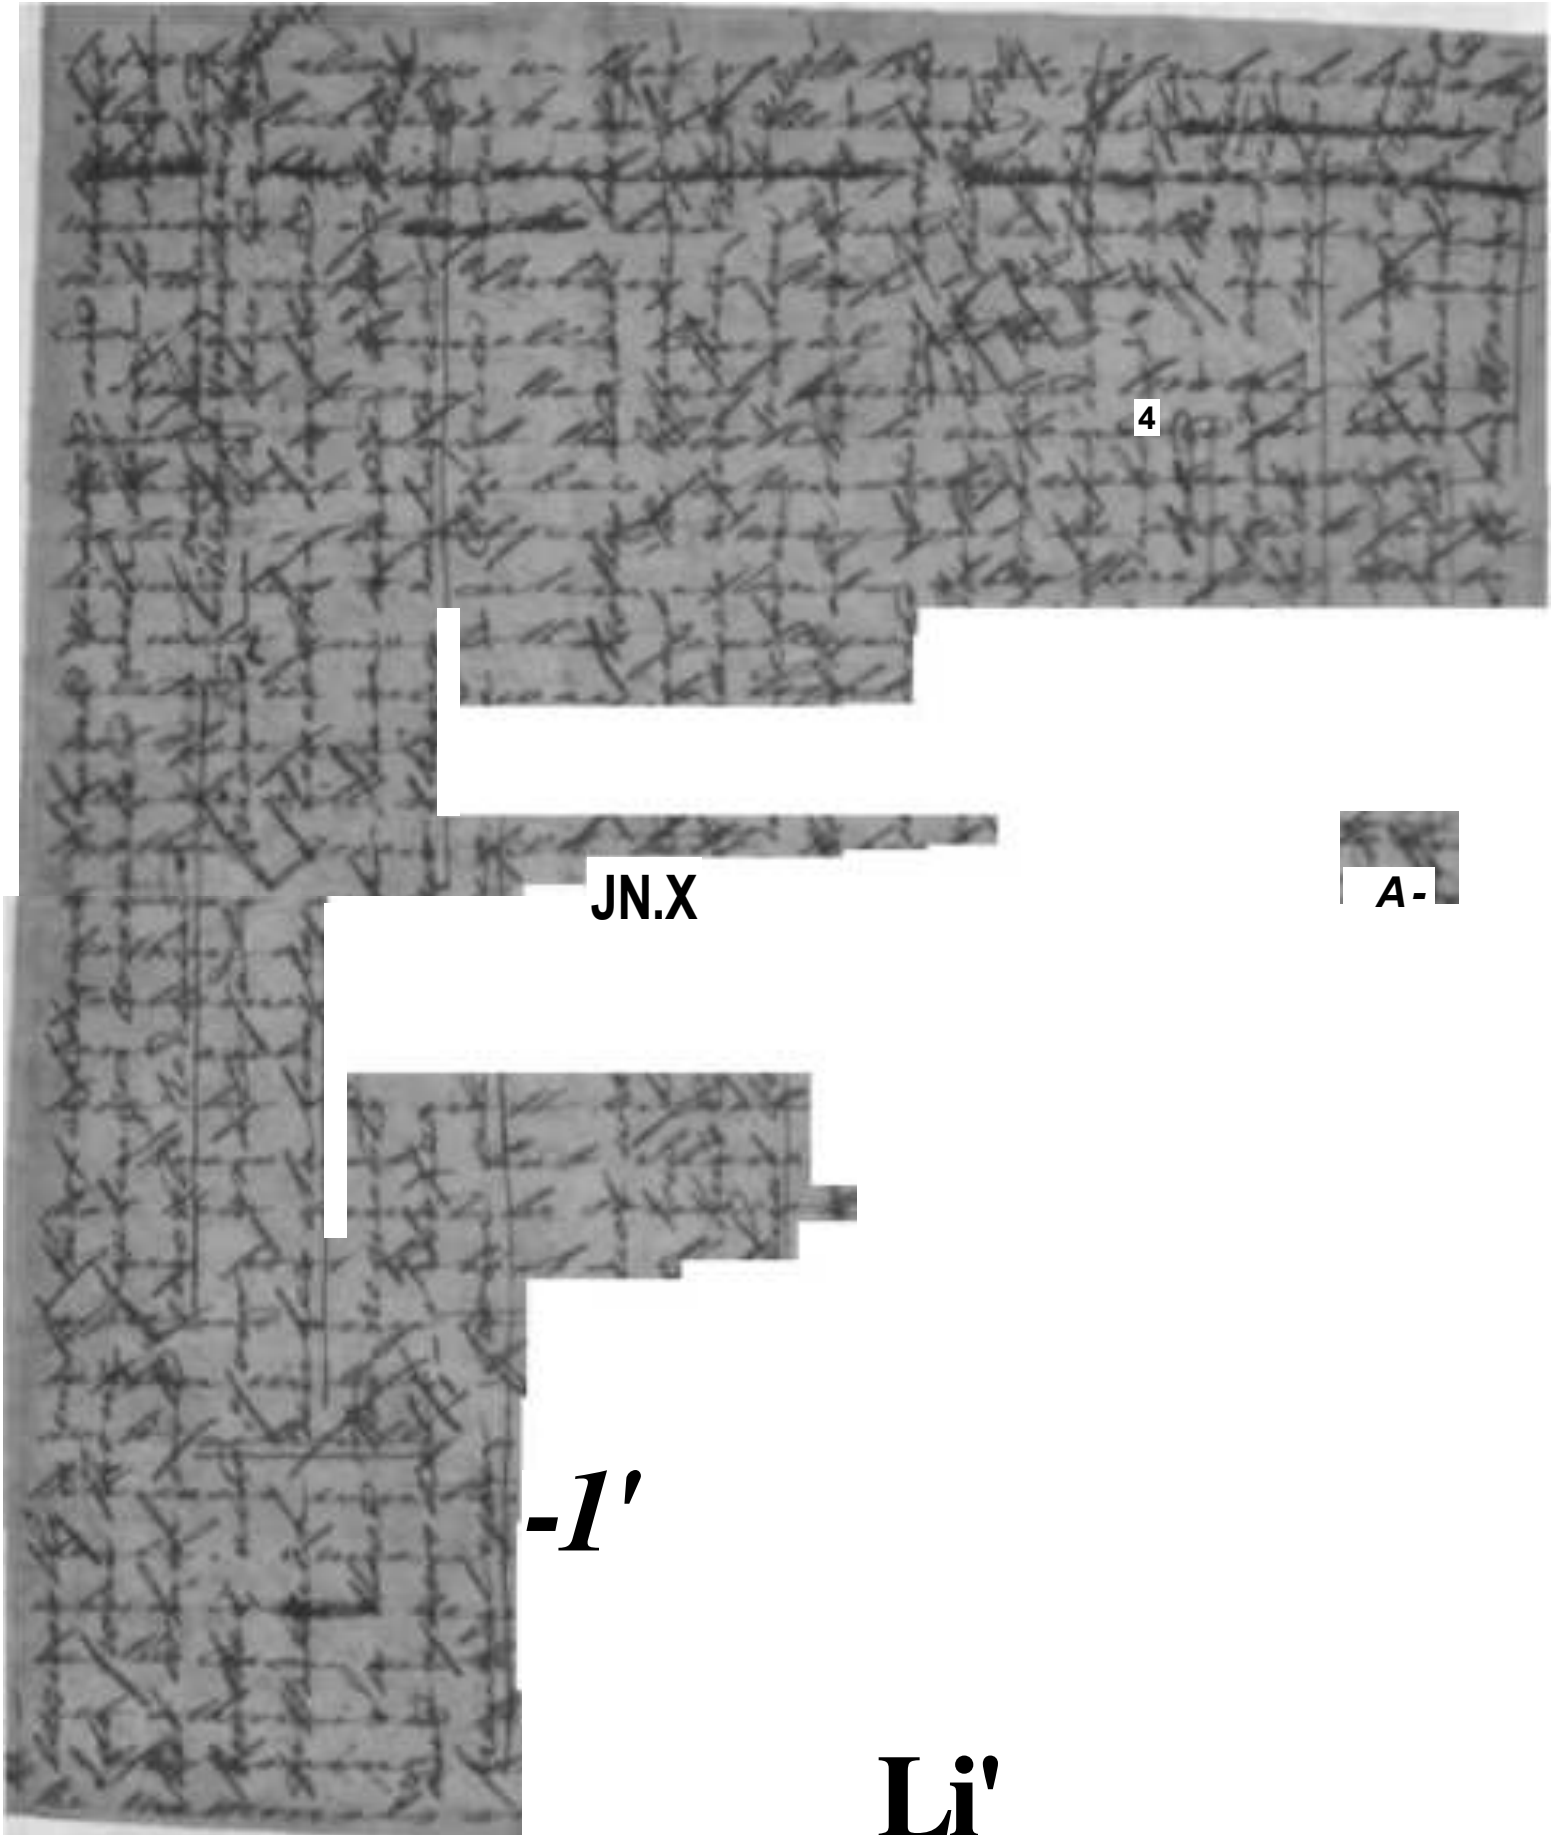

Send you a copy of my poor Brother's will - I
 presume an estate was to be made for you, and
 know of no property he has in India, which will
 not be to you as he intended and in my
 representation of my late friend of respect
 to my lamented Brother take care of what is
 his claim upon the house of Christopher W. but
 about which I am wholly ignorant -

I have been much inclined to write to you lately
 from my apprehensions that you may be
 following the reports, but I do not, perhaps, express
 lately - in which **<£ Jfc-- *+ *, -sf** is
 settled in India, but **j-'rf <w ■** without hope
 that Mr Kullback, has undertaken to give to my
 poor Brother left a ^{may have} ~~hand~~ ^{of his}
 and send him to the ^{may have} ~~you~~ ^{wait} ~~with~~ ^{of his}
 from me - I hope you will be well - I
 be, to me, dreadfully painful ~~to~~ ^{to} ~~hear~~ ^{of}
 telling his things in ~~my~~ ^{my} ~~own~~ ^{own} ~~word~~ ^{word}
 of my poor Brother's Legacies -

You will observe Legacies of 100 and 50 from Robert
actually left to his elder Brother Robert John Keble
Brother Robert - I believe should be the easy name.
proceeds are to be left on pay unless I want to have
Dumans land - Will you advise to them, and may
be acquainted with the ~~character~~ ^{part} of my few
other contents to be sent plain, which I mention.
The father will perhaps, the Legacies, as also the
proceeds to the same amount from myself, and
include the whole in the foot Bill it is to be
upon one. - If you, you will pay many poor
brother's proceeds all around up to the time his
death was made known to you, and not only
up to the time of her untimely fall, which from
the appearance of his Bill, without an expectation of
a different death, you might be led to do -
I should like to know the price of residence of
the old man, - I cannot know why, but there are
many things which are in the line of a
by which we can find no ~~information~~ ^{information} ~~information~~
I should like to know, whether he has managed
from his savings or other means, of passing his
days comfortably for the remainder of his life.

I wish, if I were able, to send a few lines for
my Brother's friend, set field, and also to Lambourn
William Foley, & George Muller, as also to Susan Keble
Memorable however, I will allow you to deliver to them
such articles as my poor Brother has bequeathed
to them respectively, & perhaps will put forward
in his will, and be of such value of the books, of
which I want a list before I have the letter.

Truly Affectionate Wishes and many thanks in
the books are marked to have proceeded. I fear you

My dear -

I am now addressing myself to you
with a consciousness of deep emotion and tender
love of my beloved Mother, made many a
long hour of his bed-room table paper interestingly
and pleasantly - The same friendship which has
long since been forgotten, I do not doubt you
are sincerely interested for her -
I am now in communication with a friend who
I may know has well appreciated her worth, and
and having lived with her would have advised
the warmth of heart and her beautiful disposition.

That a sorrowful life is to all whom she
regarded, but to me what are other sorrows,
love, whom she loved with the tenderest affection
to me, indeed it is an ever subsiding calamity.

And her melancholy death, arising from the
withering stroke which had visited him, sprang
again to life, and again indulging in the hopes,
and then to be snatched from us when we
were so near to our dear Mother.

I am, my dear Mother, ever
your affectionate son

1853

* -

- 1^".

V^^^ew-^5*-* ■

Some and happiness is your friend
and never more than feeling
which but such a charm and pleasure to life,
more more can know for... he looks in
my breast. - In looking there, - my more than
brother, - I seem moving on without any
object or a hope, - wholly regulated -

Reflection does not disturb but increases my
grief, but to your being it is not, and you
will sympathize with me, for you cannot
live -

He left by ****_^*** **^**
^EO slight remembrance of his
friendship, by his death will dated 20 Aug 1853, and
was during the time he was so severely ill, as you
well remember - He says thus -

To remember William Polley, June and
I remember, with the last above address
to be equal with **t^J?~** I - the his
school of two of the four papers of my letter says that
I shall, should they be known - also my pocketbook

^

My brother's kind friend & Father, and have the
kindness to carry his regards with affection to
his mother of the late, & give your kind regards
to the young ones for you, as follows -

My dear brother's kind friend & Father,
I have just received your kind letter of the
21st inst. & am glad to hear that you
are well & hope you will continue so.
I have just received your kind letter of the
21st inst. & am glad to hear that you
are well & hope you will continue so.
I have just received your kind letter of the
21st inst. & am glad to hear that you
are well & hope you will continue so.

With your kindest regards to all
I am, dear brother, your affectionate
friend & father
I have just received your kind letter of the
21st inst. & am glad to hear that you
are well & hope you will continue so.

With much esteem
Your very friendly
brother

Malvern
12 June 1835

My dear friend
I yesterday received the
accomplishment from the
four late excellent & lamented
friend Capt. Mansfield and
I believe I am indebted to you
for it. It is not surprising
that one so much related
to him should deplore
the life he sustained in
so touching a manner. For
there was but
even slight acquaintance
with the deceased who does
not

regret the termination of a life
that promised to be so
useful & who did not
perceive & appreciate the
many admirable qualities
that he possessed. I feel
a pleasure ^{to think} that my dear
departed friend thought
me worthy of his regard
& remembrance, & left me
as a memento of such the
books so mentioned in
his father's letter. If these
are in your possession
perhaps you will be so

kind in to forward them to
me if some opportunity
The dogs I make over to the
care of Major Watson
she - If they are still
with them I should certainly
like to receive two of
the pups (later) my
friend alludes to
viz "Carlo" and "Seila"
both are of a Chestnut
red color - the former
a dog & the latter a
fitch.

I have heard that you

be on the ground bearing
testimony for his own
... with you very
...
the latter I feel confident
will attend you & that great
advantages will be derived
from your labours

Malouin is likely to be
my residence for some
time - I must say that
I give the preference to
Thyork Thyoo on the whole
I miss the sea bath
& sea breeze very much
The

Kindly compensate in
that I can amuse myself
with gardening here
The soil is tolerably good
& the climate favorable
to the growth of nearly
European flowers &
plants. If you could
favor me with a
few papers of "Flower
Seeds" or seeds of any ex-
traordinary or rare shrubs
or trees you wish to thrive
in this climate, before you
leave I shall be much

indebted to you for the

Flower seeds, many thanks.

Chaps be down during

the Cold weather.

The wild trees (in general)

perfect similar to that

Cultivated in our garden

is abundant in this

province. I would think

that it may be cultivated

with success here

where attempts introduced

I am remaining on the

at great length, encroach-
ing upon your valuable
time & wearying your
patience - Pray pardon
me, & believe me, with
every acknowledgment
of your goodness & polite
attention to my wishes
Truly yours

Wm. Foley

H. Wallich begs

Recd from a friend 15 June 1836

My dear Madam -

Paris from the 1st of June 1836

Your kind letter of the 5 and 10 Sept. 1835, safely received and the latter sent of April, and the trouble that gives you on this melancholy occasion, disengaged from me, in immediate return to your rest.

I could not however at once sufficiently overcome my reluctances to actively engage in anything which related to the human life which I obtained - I was the first to bring and frequent acquaintance, I intended to do, and I hope I shall my duty to my beloved brother's memory in the most explicit respect to her wishes, but since that time I have shut up within myself the thought, and emotions which the recollection of the sweet doubtless causes to arise, and these should so long from my outward action relating to it, that I require to have commands to approach the necessity of quitting again on subjects which I had wish to.

This may be a mood of mind, when separated rather than indulged; but the

slightly alluded to a state which is almost
unaccountable in words, though well understood
by me in feeling, to induce you to pardon me
late in a renewal of your letter.

I would much, that the information be
conveyed to you just as possible
your recovery, and I should be glad
to see you think otherwise of me. -

I am highly gratified that Dr. Mitchell chose
honorary of his friend, and I only hope he has
selected what he most wishes to possess, for he
was my intention. The Cabinet was made
especially for my poor Brother, after his
drawing, to contain his little library, and
to serve alike the purposes of travelling
of stationary quarters.

we much also, that you have acted
the same delicate kindness in talking to
trust you will kindly be maintained
his former views. - I have through
followed my mother, and have every day
I could have done, but I have
accept them, they are very valuable, and very useful
and believe that I shall never forget

...which I am under the impression
of Mr. Bell, as well as have conferred upon
... brother, as well as upon myself.

... you will have reached me quite
... and I am much obliged to know
... in my
... account. - You, indeed, will
... with the small number
... -

The plan which you propose in your
proposal, you will not hesitate, on my earnest
request, to keep them in as a gift
which the execution of the association, that
may belong to them, that you may have no
difficulty in their further obliging me.

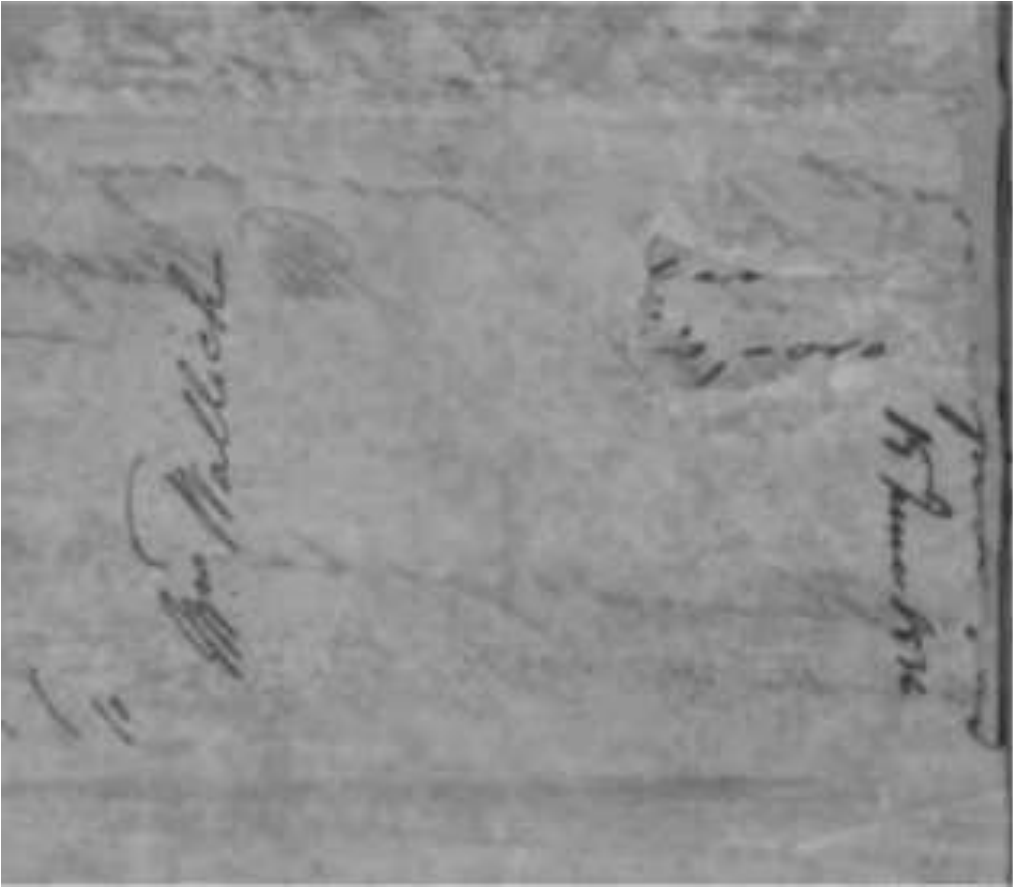

... you have left to ...
... and ... as my brother's last disposal
of them is what I most wish to consult. It
... they were intended by him for his
... I ... because
I ... with the others.
... from your
... whether you intended to
... them, or not.

show an unfettered right to send papers published
in January 1834, I must surely be r^^w^?^ of the
La Belle Alliance, a Remonstrance of my sister. It
has been done expressly for my Mother, and she
had taken much interest about it. I think too
that in one of her letters, she is content with
great sayings, she told me that she had a letter
from her kind friend of the mission here when it
reached at India - I hope it has not been
lost, and would on many accounts really
give me more than I could desire -
Perhaps you would add to Carter to know
- that search to be made for it at the
Catharine house, or at Mr. Chapman's, - or at
any other place where the papers may have
been likely to be found. - There was nothing
else with it, or that it is a small parcel,
the last of my present collection was
directed to my Mother into the care of Mr.
Carter - if ^{the latter part of} that however, I am not quite sure
I should oblige myself to send it to
Mr. Carter, if he will take some interest
in finding this Mission here for me, though
I feel I have no right then to impose
upon his kindness. - It is very likely also
that you may be other parcels of the
same have been found. -

My beloveds have never been
opportunity should be in Rome to be
kindly take in also my feelings towards
yourself and yourself. He of the
Kurtz, and the other person of the
interest in your self management
I have the they are Mason, my
the place to take the life in the
suit of -

death is not at all
inhabitable in the case
you were led to believe.
He was not the sort of
any great addition to
his collection of specimens,
and I know that history
a very secondary matter
of his journey - were I
distrusted with his work,
I might as well as all. He
said I was to have three
together, and certainly
a case here of course, but
the water element with such
of course - he would no doubt
have considered them all of

the other hand to be
specimens, but in that
present, there was a very
field in the present
part of my collection
I speak with certainty
the subject - he would have
of the case up to the present
of his history. The present
you should be, must have
been inserted by some one

specimens

and I strongly urged him
also to await more fa-
vorable weather - but for
unately without avail - he
left about 7 o'clock at the
latter end of August & for
two or three days previ-
ously to sailing was ill-
ably debilitated in spirit.
He took little with him - on
stepping into the boat - pulled
off a rug he was in the
habit of wearing and desired
me to take care of it & his
other property - His watch and
all other valuables were amongst
these - They had a favorable

mostly

As the waves are about
to break - she has sunk
as low as the said bank
on which she rested and
allow her - and there was
no danger in remaining
there. As was subsequently
found to be better, one's
regret to know that not
only might poor Mary have
have been saved by re-
maining in her - but even
when the little boat upset
he was actually within his
depth - and he had only to
walk upon a bar, which ca-

erriage ^{the first} is
at the entrance of which is
a bar, which is my hope
at one place and another
to be approached as I af-
forded (understood) but in
the most moderate weather
The Commander was quite
ignorant of navigation and
and equally so of the parts
of the danger. He therefore
sent upon the boat the
whom he struck and sent
filled - and the crew & passengers
took to a small boat. Such
I had seen - it was quite unfit
to carry so many as crowded
into her. The final sea that

struck her circumstances.
The Captain and two sailors
made the signal and
were in John Mackay
then he attempted
to swim the shore. There was
a strong current shown
to Mr. Spots. but had he
persevered in his first in-
tention he would doubtless
have been saved. Perhaps
after struggling against the
stream, and other windings
on exhausted, he turned
round & endeavored to make
for the ship, struck in his

III

then state he soon saw
the 8 Jan. a current
which he had no strength
to resist except his arms
and after a struggle, which
was protracted for some
time he found he could not
hold the water, he
tried no more. He
must account his untimely
death but may see that
those with confidence, that
so easily heanted a career
has cost nothing by the change
but that he is now, where
the heeded cease to trouble,

IV

needed from that spot to the shore to have
got to land without an effort. It was the
one deemed, & we must bow to the ways
of Providence, which he have daily lessons
to say, are indeed uncuttable.

If I should be able to see you before
the ship goes down ^{the} river, I shall as usual
do so, and if I can be of any service to you
in collecting specimens in the Beccan
whether I am bound - I shall be both
proud & happy to fulfil your wishes.

I write in haste & I fear I can
reply, which may excuse -

Believe me

My dear Sir

Yours very faithfully

The body of South was

I regret to say never recovered.

A reward was offered but

without avail. It is thought his body
and those of the three sufferers were swept
out to sea by an under current.

congratulating you on the success of the expedition and some proof
of the specimens magnification. I am very glad that the yellow
collected this last trip will end you some fresh and better
plants. I have sent you a package of my old friend Thomas
Saxine to be your gift - I hope I have received a long list
from our shortening period the September in Cambridge and the
east than a collection of 199 new species of my study room
of an instance for his gift volume which will contain the
whole for my study. I hope that will be available for my study
from you. I believe me my dear Sir

J. M. W. D. K. S.
Cambridge

Yours faithfully
H. T. Taylor

Nerby 13th Oct 1884 Sept 28th 1884

Dear Mr. [unclear] 1884

I have yours of the 22nd ult to Secy M. A. S. which will do. The object was to stay publication of the Transactions in proof till the amended condemnation reached the Society.

I wish you would see the notice of my drawings going home in Principis's journal, alluding also to the vast sequel of ornithological subjects which is coming.

Some a Quadruped or Bird of Nepal is left unfigured; & the structure of distinctive parts is always given. These drawings are the result of ten years' labour, whereby the diversities of beak, sex, & age, have been definitively settled in regard to each subject. Abundant notes of structure of soft parts, food, & manners

are for the coming, so that if
I could have anticipated this
publication, his work only
touches one corner of the field
and that very superficially.
The matter might be
referred merely with refer-
ence to the progress of
History in making in India
a new day.

I give to say that all your
chosen flowers perished, by
reason of the original injury
done by the carelessness of the
Males sent with them.

The wood shall go down to
you with my line Phantoms,
to be at Cal^a about the 20th
Dec^r - I have 20 or 30 birds.

Will you have a ship
ready to sail when the birds
reach you. God bless you. I
am still ailing & suffering.

Thine ever aff^r
M. Wilson

Bramley sending
- 1/2 doz of the wool

Short notice of the plant and your
opinion of its utility. This will
once engage the attention of the
whole ^{of the} active and intelligent part
of the population in India - and nu-
merous trials of the Met. will
be quickly made. - ^{your} ~~the~~ letter &
the small specimen had better go
before the meeting on Saturday next
and ~~before~~ ^{by} the following meeting I
will place in your hands a record
of my modicum of experience of
the practical value of the Met.

I would also suggest to you
whether it would not be well
to write a note

requesting an order to get the
whole carefully powdered at
the N. B. Dispensary, & put
up in 2 oz vials for the
purpose of being used.

I am glad that the worthy man
D'Azeta's little specimen of bitter
drug is likely to lead the Society
to a use

of your sentiments to Bramley.

Yours ever most sincerely

1834

W.

Aldersgate Street London

October 8. 1834.

Red March 5² 1835

My dear Sir

Allow me to introduce to your notice and attention my old pupil and friend Mr Knight who has entered the Medical Service of the East India Company. — You will find him a highly intelligent gentlemanly man: he is the son of the Secretary to The Bank of England here. — He is determined to devote himself (so far as his professional avocations allow) to scientific subjects. Any little kindness or attention which you can show him I shall be much obliged for.

I trust yourself, Mrs Wallich and all your family are in good health. — I have not heard one word yet how you got over & whether you have again got settled after your long trip to England. — I was reading a few days since the Encyclopedia of Geography edited by Hugh Murray, in which your name is mentioned by Hooker (who writes the botanical parts) in

a very pleasing though proper manner, and
nearly a page is devoted to you. — I believe
Mr Knight has ~~the~~ book. — I do not
know whether spiral vessels had been
discovered in Texas before you left England
if not I suppose you have heard of this since
they are readily made out. — If you should
have an opportunity of sending any of
the Asmitum ferax or other poisons over
to England I should feel obliged by your
remembering me. —

Have the kindness to make my
kind remembrances to Mrs Wallick
& with my warmest wishes for your
health and happiness.

I remain

my dear Sir
most sincerely yours

John Percey

My dear Sir
 I have the honor to acknowledge the receipt of your letter of the 20th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
 Yours obedient servant,
 J. M. Smith

come up but I cannot say positively
of one or two of them - Scapers, flowers
the shrubs of all kinds flourish here

and do large trees but fruits in
all seem to fail owing to the
disease committed by insects for which
I have been unable to find a remedy

I am most happy to hear of the
discovery in Apsam - it confirms
the opinions of [redacted]

probable locale of the tea plant,
all the descriptions of the climate
in which it flourished in China
appearing clearly to me to apply
to the damp climate of Apsam
and Achar in which

^ L ^ ^

have no doubt we shall also find
the tree. I have now established
a post of Sepoys in our Peshawar
hills and in a few more days
my people will be able to commence
collecting plants among which
I sincerely hope some may be
found to interest you -

I have a very good Malabar or
Calcutta man who has had a
deal of experience in various
parts of India - if when you
send seeds for trial here
you would kindly cause a
note of instruction as to treatment
to be drawn up in Bengali

it would enable him fully to
follow out your intentions -

I am
Yours truly

J. H. Fisher

Quincy John May

Dec. 24th 1854

Rev 26th

My dear Sir

I received your package yesterday and shall have great pleasure in delivering the subscribers at Rochester. Many to the high joys in the showings we have made very show papers but I hope in the course of time as these letters we shall be flourishing ever, say unshackled across the desk.

Many thanks for ^{your} kind and repeated invitations which I hope on our return to have the pleasure of accepting, I understand means see to thank you also in his name and to present his best respects to your family - Will you kindly give my best wishes for a Merry Christmas and happy New Year as we say in old England and believe me to remain

Dear Sir Very truly & sincerely yours

Wm. May

Rec^d by Dr Dunbar (who
with the Rev. J. M. Queen } 10 July 1834
breakfasted with us)
My Dear Wallis

I doubt whether I shall have
time today to write you more at length than
necessary for a mere introduction of my friend
D. Dunbar who is the only man in this country

I hope

If I have

I shall

I am

&AA\JV
*

a^H*-syA*m*4l4A^

in the first place to save my character
with D. Dunbar's brother, who by ap-
pointment, called for it yesterday, & may
find me unprepared for him again
if

if I do not make this quite brief -

Dr Sembar goes to India under the
authority of his Patrons of the Duchesse of
Sutherland, into whose family he enters as
an antidote to cholera, succeeded so well in
praying away the devil, that he has procured for
himself a **t// K,** several appointments in the **Grade**
of the **Postume** - He is **acclaimed** of an in-
to you, I believe the first European
who was **afflicted** with the disease in Cal-
cutta - Cholera is now established here,
we shall as soon get ***tJ*f~** by this time
as of it - we have it now almost in
every

every quarter of the Kingdom, moderately, but
doubt not that, as with you, in particular
season it will thin our superfluous po-
pulation -

Yours ever &c my Dear Friend

Robt Graham

Edin: 25th Decr
1873

Wish very many happy & happier returns
of the season to you my dear Walter

1870
an application from
Butterworth comes to the
attention of the Court
of Massachusetts. The
applicant is a well
known man that has
more than mere pebbles
who are acquainted with
the nature of history
who have the power to
make a point in
him to the notice of

Saylor - I will take it as
a great favour if you will
have the kindness to do this
for me - Very little knowledge,
such as all young surgeons
want hands of medicine would
help me but I fear I should
not know how to use them who
have studied natural history
are not ignorant the most
defective in the knowledge
of medicine & surgery but
the reverse for they possess
subjects of application which
have them in their studies
I am

which has struck fast, and since your departure
has commenced, and the anxious & personal re-
vision of Benthams is that in my hands
we may hope to see something more of them than
the distribution of his books, or simply entitled
to the goods of his shop. Myself & another
book sold has appeared - my system, my
pseudo-doctrines, my say, to a very satisfactory
extent within reach - Rogers, Whiston
admirably - I'm pleased to see his illustrations
will be appeared to by Potomac historians in the
two splendid compendiums works of the or, in the
early history of hisia - Hope is only a work of
this is I think all that concerns hisia except
you know of - that Man had a good way of
ed specimens for Griffiths 1/2. Massey is from
Proclamation - Europe Potomac has little to
you, unless it is that they talk of the
^>& /<

plants at Paris, which I don't know - I don't know
if the Comptes are expected soon to go to press -
Another is a Handbook - that Lacroix's, I mean
Another is getting through his Liliatae - I'm working
with the part of Buchner but slowly - so want of time
I'm afraid to scold for all manner of things to persons
the world for valuing them as so many holes in my
pocket that what is found in other seed cases, all being
at the other. Moreover what Bonn's about - unless you
my answer being something "that has taken hand which is
the only thing" - Oh! the Professor's as you call
call on - to find this circumstance of things -
I hope keep the money - the paper is much improved
in any way to my wishes but able to earn way of
the kind you have not. The Professor has failed completely
when such is said the seed is said. They are always said
justly by his
I'm sure you will find them in small quantities
to an even good - pack them in small quantities
in brown paper packets - Indeed there is a thick-titled
book too - but that too is in the hands of the world

attached till at least the contact box shall be restored
in half dozen others - By this means I suppose the temper-
ature of the seeds will be maintained more equal than in
any more yet invented. It also sends us some Ox-
chide. The bullock ones will be soon to come of

My Dear Wallace -

Jan 21, 1875

With very many thanks for your kindness, I return you proper Apologies on the plants of Egypt, which indeed I intended to have sent home much sooner.

I have been sadly hurried and interrupted by the arrangements requisite for the embarkation of Mr. Twining & the little girl. I should ere this have commanded the books you wish with the (Teori) Turpethum, & a few sent for experiment, but I trust it shall be well tried. - With our united best kind remembrance to Mrs & Miss Wallace believe me always My Dear Wallace your most sincerely
W. Twining

Feb 14th

Hills n. of Ouzh

Feb 5 - 1838

My dear Wallich.

W*-*v?t

me to send him specimens of the
confines of the hills and more
particularly of a new species which
he is bringing out under the name
of *Abies inornata*. He desired me to
forward them through you - and I
sent by yesterday's date two parcels
under cover to you for Royle. Will
you do me the favour of getting
them despatched at your earliest
convenience - either by private opportunity
or otherwise as you may deem best.
I have also today made to you

H. Wallich

with you as to send under cover to
you another packet containing
drawings of fossil plants for
M. Poncep, which I beg to
express of your forwarding to him
enclosed I send you a small
packet of the seed of your
Alum Giganteum in smaller
order.

I have got a lot of information
from Cap. Wilson, who was on the
Asiatic Geographical Survey
about the Asian sea. He had
it brought to him. The hills from
which he had it, were so far
as I can make out, of the same

formation as the *devalitti* - which
fact *Strett* along the whole length
is from the Punjab
ans *addr*, more or less
The tea plant

also
as the
great

from *dudhya* - but nowhere as
valley itself of *dudhya*. The desc
leads me to judge more favorably
of the *Remison* *Thomson* *fruits*
of *tea*. There is about as much
differences between *Yunnan* &
Tea in *China* where the fine
is grown - in *climate* - as the
is between the *Yunnan* *Garage*

position of the Himalayas and Afghanistan
Hence "para ratione" Agents will
yield inferior tea to Kumaon &
Sirmoor. The valley of Rameswari
is splendid ground in my idea on
all accounts. - and I am most
sanguine that it will yield
the most favourable results.

Yours Ever Truly

Haldane

Dr. Wallich

Wishes a happy new year to you and all
your family circle. May you
all experience happy returns of them

St. Albans
25th Dec 1833

My dear Wallis

I am greatly gratified by the
perusal of the long list enclosed with
your note, and now returned; I believe
the contents were in part known to
many of the members present at the
Sunday's meeting but apart not
the whole, ^{nor} you may if you please
say in merito - every body else will
say the contrary, and apart that you
have worked hard for those invidious dis-
-tinctions - The Society has done itself

and it in adding one to the number of
that long list. - and no one rejoins
any on the occasion then

Ati-V^ e/

*+%04JLL

I ought to have replied
earlier to your letter, but have been
out quite all day - and nearly all last
night. - I regret that I do not know
one person moderately qualified in
knowledge of natural history, who is not
already more satisfactorily occupied than
he would be at - Spain. - From daylight
this morning till this moment - (Half past
10 p.m.) I have been not half in hand

at a time at home - and now after
finishing this hurried note I have
to write a little Medical History of
my poor Child, for the information
of any one who may have to prescribe
for her in England.

noon. which

As you may suppose causes much
anxiety & confusion in our

A0*r*-*-<z.t

Make our united kindest regards
acceptable to Mr. Wellick & your daughter
as before in charge of your Wellick
Yours most sincerely - W. Twining

N. Welch M.D.

My dear Mr Allen

I yesterday was requested by Captain
Wilkinson - who formerly commanded a ship
from this port, but who is now one of the
head clerks in the Custom House, to give
him a line to you, praying the favor of a
few plants. - He is a very worthy good man
& has often got business of packing boxes at the
Custom House promptly done for me, with so much
kindness that I have on many occasions felt
greatly obliged to him - I felt much pleasure in
giving the note he wished. - He has a very small &
very neat garden in Choring Lee - but I believe is
not a Botanist. - I know you will kindly excuse
the trouble I thus give - & believe me always
My dear Mr Allen - Yours most sincerely
W. Twining.

From the specimens of
a plant of which the name
by the name album &
just sent to search with
the specimen of the same
plant sent by you &
I understand it follows
in May and I have not
think it of your specimen -
consequence I will then
send you some of the
specimens - I expect to
say that the white-
sent you sent some
entirely different ones
and having come up -

My answer that I cannot
if it is the same plant that
I saw recently, but I may
see this specimen before
I receive the specimen;
then on a chance will
send it with a specimen
I think as to send the
appearance of more
having been -
I believe me

Confiance

Comme je l'avais prévu, le Capitaine me charge de vous
faire agréer ses remerciements pour une invitation qui le
flatte beaucoup, mais que l'urgence de ses affaires, ne lui
permet pas d'accepter, le navire partira complètement chargé
d'Indigo. Cependant on trouvera le moyen de placer quelques
caisses, pourvu que les dimensions ne soient pas trop grandes.
J'aurai l'honneur de vous en donner la mesure, jeudi prochain,
dans l'après midi. Je pourrai aussi emporter un ou plusieurs
caisses de plantes vivantes. En vérité, je lui confie de
bonnes que vous avez, pour moi, et que certes je suis loin de
mériter. J'irais à M^r. Bourgoinart combien vous l'avez
honoré en ma personne, et je le remercierai avec reconnaissance
de sa puissante recommandation.

J'ai l'honneur d'être, Monsieur,
avec le plus grand respect

votre très humble et obéissant serviteur

McMurry
6/2 3/3

Wed 21st July

Bombay the 3rd of February 1835.

Mad. My dear Mother, shall I find words
to express to you, for so kindly thinking of your old friends, and for
the beautiful supply of plants and seeds, which I
have received from Captain Anderson, to whom, he
expressed, that I shall show every attention that I
can. If he had arrived here, a little sooner, it is
very possible, that I should have been able to

Engage in the undertaking, but, she left me on
the 27th ultimo, to proceed thither; and to endeavor
to obtain, some appointments for my two eldest
sons, of that dynasty. I fear, however, that nothing
will be done for them, by any of the many heads
of Leadenhall, to whom I am personally known.

The plants are all alive, and I hope that they will
prove more enduring, than those which you kindly
sent me last year; but, we are sadly off, on this side
of India, for gardeners. The men, so called, who are
to be found here, with few exceptions, know nothing
of the management or treatment of plants or shrubs.

Feb 13 1885

Pat 24176

My dear Walllich,

I have had a letter from my brother Sandy which has pained me very much. He tells me that I have given your cause for offence, by having consigned to your care the packets for Royle which went you last month. I am afraid that I have greatly increased my offence by the subsequent packages for Graham, Hooker and Lindley. But never I can assure you was offence more unintentionally given. The package for Royle, I sent to you at his own request. It contained specimens of ~~the~~ Coniferae - and seeds of the first despatch that I made, as one of the specimens belonged to a new species which Royle was anxious to bring out early. On the 9th of the month (Jan^y) I sent you a large packet containing 152 sorts of seeds from the Himalayas - being the first destination to which I sent any of the seeds. I had collected during the season - containing every thing I had except the Grapes. Umbelliferae

&—«.: it-

Compositae and other difficult families which
I had not had leisure to separate. The first small
packet which I sent - {r to *Lilium Giganteum*
I despatched singly, because I considered it rare
and valuable - and that it might be accepted
as you might not have had an opportunity
of getting good seeds of it. In sending the packets
I had the most diligent idea that specimens could be
obtained at what I had done. It was on the
other side of the Atlantic that I had not
found but I had sent you a small packet of seeds
of the single *Chelidonium* which I had
traded for some time. I have not before
other specimens of this kind. I would
that so, which, if they are of value to
me, I would be glad to see them. I have
as before, which I have not before
which I ever could entertain. I will not enter on
them, it would disturb us both. But I will call
to your attention something that I had before. When
I was embarking from Portsmouth, I wrote you a letter
I have not yet received. I have not yet received
I have not yet received. I have not yet received
which I have not yet received. I have not yet received
When I went up to London, I had

- - % *
?

Locust
 Magazine

b
 4

stood in every way
 they had felt inclined to notice me - to have done
 it with the pride and consideration / patronage.
 But it was far otherwise with you. You made me
 feel a welcome guest at your table - and a
 welcome hanger on at your study. You treated
 me with the familiarity of a friend, you were
 unreasonably kind. You gave me an introduction
 to the scientific circles of London - which gave a
 share to my reception - you gave me access to
 the societies - all which was particularly valuable
 to a young man in my situation - and but for you
 I should never have had the opportunities - All was
 done with a kindness which doubly enhanced the
 value of the favours conferred. Here are the sentiments
 with which I parted from you and they are those
 which I still entertain - and if I have given you
 any cause to be offended with me, I am most
 sincerely sorry for it. I regret much that there
 has ever been cause for an explanation of the
 kind between us.

On the 22^d & 23^d of last month, I sent the
 papers I have above alluded to - addressed to
 Rafe, Hooker, Graham, & Sinsley. I will consider

an especial favour if you will this time cause
them to be despatched, or hand them over to
Messrs. Cantor & Co. as my brother for the purpose.
I received the packet of seeds from the Horticulturist
which you sent me, and I am happy to
say that most of them are coming up - and
they will be very valuable. Most of them came
in time to be grown for seeds. Many thanks
for the continuation of Lindley's Synopsis which will
be most valuable. I shall include time as I get the origin
I imagine savecasts of my specimens below to be
general. I have lately been looking at my prepared
specimens of the *Grandis* orchids about which
I wrote you before. The three anthers are distinctly
~~attached~~ on one and attached - but from shaking
of the plant they have dropped off the others in the
transport to me, but the filamentary processes which
they are attached to the column remain. I would
submit evidence of the structure in all. By the middle
of May I hope to be able to send you fresh specimens
for your examination. I have received your letter
of the 24th concerning the dispatch of the tea seeds
and shall answer it tomorrow with my best Comps
to Mr. Wallace and all your friends. Believe me
Yours very truly
H. Balcan

100. Dispatches to Dr. Wallich Supt. Bot. Gard. Calcutta
 on Jan 9th 1856 H.F.

Weymouth Feb 20. 1855.

My dear Wallcut.

I am utterly at a
loss to account for your
long silence. You used to
be the best of correspondents,
& the most active of friends.
Yet my animals & books
have never been acknowledged,
nor has any report of
their transmission reached me.
If the animals, i.e. the five
birds, are still at Palermo,
few or none of them can be
still living; & the pains of a
year & half bestowed on the
taming & gradual acclimatizing
of them, must have been wasted!
'Eh bien' so be it. As for the

books they cannot suffer much
by detention at Calcutta: &
yet the generation of insects,
by reason of that detention,
is the cause of much
injuring to the books during
the voyage home!

Are you offended? & in God's
name at what? The babe
inborn is not more guiltless
than I am: but having said
this, I have too high a stomach
to say more: I can only request
of you, in case there be some
chapin which this disclaimer
may not remove, to make of
my commodities & for Peris
merely apprising me that you
have done so. I sent you lately
by Bony, some pamphlets, &
with an account of its culture.
Yrs & Affectionate

July 24th 1885

My dear Mother

The my mother's home
last night I received you

communications - with
the special letters for
and my mother & Mr

Whitmore - also
Bones special, the
for Lord's & the

shall be taken special
care of & I shall duly
behave. - For my own
case you have my
assent

5J I

Ever my dear Mother

Believe me
most sincerely yours
Elizabeth

W. B. Russell Esq
Boston

most thank -
Do not forget me
my dear friends
when I am far
away - I wish
you knew something
of how I am
I am
in London in case
of

f r >

of Miss M. Crawford
between us - I hope
you will give me
some news when
I hear in any
way be of use to
me, pray most
kindly come in and see
me next week day.
Good bye - God bless
you with health
regards to your mother
ever

by the first dollar to the last. I am
more than obliged to you for
the continuation of this story.
I am in much haste. It
has set me up for the
trouble. I have just heard
of the few seeds remaining
for the length of Sukranipati
and tomorrow I hope they
will reach me here and
then all will be right.

Yours very truly
J. W. Waller
P. S.

1852
J. W. Waller
Enclosed I
have the pleas we of sending
you a list of the seeds which
we dispatch to you on this
particular date. I have
not the specific names as they
as they were not collected, unless
my eye and way in doubt
about the species. Many of
them I imagine you will
find - as either being name
or not but in the Cupid
Cupidolater Plant the Liliace
I hope has many Indian names
they are all in Capital letters
I think - as they were presented

in the great care. I have
the same idea which
I shall send you afterwards.
The books discovered which
I mentioned to you in the
former letter were going on
with great success, and I am
sure you would be glad
to hear of it. From the blame
you had in the introduction
discovered. Many of the animals
are identical with those
you and Grass had found
in the Amur. and there
are other besides. I have
putes, not collecting - and
I am constantly hearing
of some large assemblage

to the collection. Are you
going to examine? or the desire
of our science I hope you
may - on your influence and
high standing with the Govt.
will enable you to have the
uniform put on something
of a value the scale of
those of your former noble
tour - and what a splendid
to me way we are then
to do it. But you have done
to extract any more
specimens and large number
examined for description from
any former letters duplicates in
explorations
stand for the
"Museum of the Amur" and
"Museum of the Amur"

tut

him, & at last mean with you...
wrote to me to afford every facility...
allowing him to go to prison, but when the...
His expenses therefore have very far exceeded the maximum sum al-
lowed him by you, as it has been utterly impossible for me to prevent
it. I am sorry to tell you that his outstanding debts, as far as of
him has been able to collect it, & including £150 which I have advanced
to him, ~~has~~ amounts to £422. 8. 5¹/₂, & which if there be added
£70 drawn by me from Richards, & Co. & £150 lent to me by Mr.
Smith, it will appear that George's whole expenditure since his removal
in London on the 21 of April 1832, - that is, two years & six months,
two months of which time he was absent, & incurring no expense, & that
has been £642. 8. 5¹/₂, his board & lodging being paid in advance at the
beginning of May: - With any degree of attention on his part to reduce to
your wishes, I am quite certain it need not have much exceeded, if in
the greatest probability (as

<^~jQ +JL^0L)

you will see by one of Mr. Sillars last letters, that actions will be
immediately instituted for the recovery of his debts. - I am most deeply
sensible of the inconvenience & delay that you will not delay sending the

deserve, since the grounds of the opinion, which I should wish to see, & would willingly to let the truth of this suspicion by his credit, & I asked as particularly as I did about it in my letter to Dr. Sitter, what you will receive because having made him a present of his arrival in Berlin, I could ascertain who was my master he might have shown to Dr. Sitter and really his. It is quite possible that being to bring him an injustice by the suspicion, but I am sure that some must be to believe that he has it not. Not long ago he got it, the watchmaker from I thought applied to me to ascertain if he was safe in banking a higher of for it, the balance being to be paid, as George said to him when he received it. After he had the savings came to be offered from his yearly allowances of his debt. This was not passing with his credit to obtain a command of it, if it was merely a piece of thoughtless extravagance to obtain something he wanted, that it was both a handsome & a better one than I had carried I saw almost three times his age. Now my dear Walter recollect that I sent you to peruse with great attention the whole of the letters & copies I sent to you, and instead of you, after you had done so, to write at length upon the circumstances in which your son is placed, & send me precise instructions. Behold, my grandfather, you are too far off to receive any requesting explanation. Do not be apprehensive that I shall take offence at the high tone your son has assumed regarding me in his last letter to Dr. Sitter; - It not being that on this account I shall cease to supply in into relations may be necessary, or whatever his Uncle may wish to send you instructions. - I am perfectly conscious I have acted towards in the part of a sincere friend, & whatever his sentiments regarding me are, he can never make me forget, that I undertook the charge from my regard to you, & that regard can never be diminished. - The letters & copies (the latter made by Mrs. Graham) you will perceive are numbered in the order in which they should be read. -

After this long letter on this painful subject, I cannot write much upon Botany. - The Leguminosae go on much more slowly

slowly than I could wish; I however worked them when I can
& never lose an opportunity of comparing my observations with
those of others - at last I hope to produce an arrangement of them
which will satisfy you. - In the box with the letters you will

107

find a pretty considerable collection of seeds, which I hope may
prove acceptable to you - The British Association for the improve-
ment of Science met here in Sept. last. Playfair brought his legu-
minosae with him to Scotland, & volens volens I kept him in the
house, till we had together gone over the whole & compared them
with your specimens - I hope to be remembered to my Aunt, & am
heartily joined by Mrs Graham in every kind wish to you & her Belove me
& in ever & ever yours most truly
Glas. Graham

à Nord de l'Isne le 6 février
1835.

Mon cher Monsieur

Mais je n'ai été par à Nord lorsque les boîtes^{de graine} sont
arrivées, je leur ai cédé de suite, comme à de bons
amis, une part de mon étroit habitat. Je
partagerai avec elle l'air qu'elle respire. Elle vivra
si toutes fois l'enveloppe de bois et de toile cirée dont
vous avez fait leurs poumons, permet à l'air
vital de pénétrer jusqu'à elle. Quant à la grande
boîte, dont je ne m'occupe en rien, le succès
n'a été pas très bon! Les esprits mercantiles
et les esprits scientifiques, ils disent que si la
physiologie fait un pas de moins, la pauvre
bête aura de plus, pour le voter, un chapeau
blanc en bleu dans la manufacture de Rouen
ou tout le contraire. Non partons Samedi.

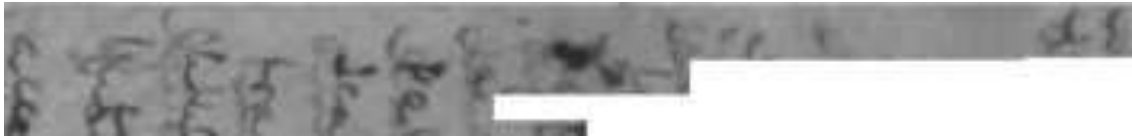

Dimanche non hrom à l'ouli balzer, et ainsi de
je quitterai à pays avec un sentiment d'admiration
que l'habitude n'aura pas en le temps d'homme
L'ayant aimé qu'on se dit de d'œuvre parfaite
et de vous, Monsieur, en part à l'air, une lettre
de bon plaisir d'aujourd'hui, que je ne puis, que
avec le temps, mais ce qui me peut en augurer
ni d'ailleurs, c'est la haute et respectueuse
avec laquelle je suis

resté très obéissant serviteur

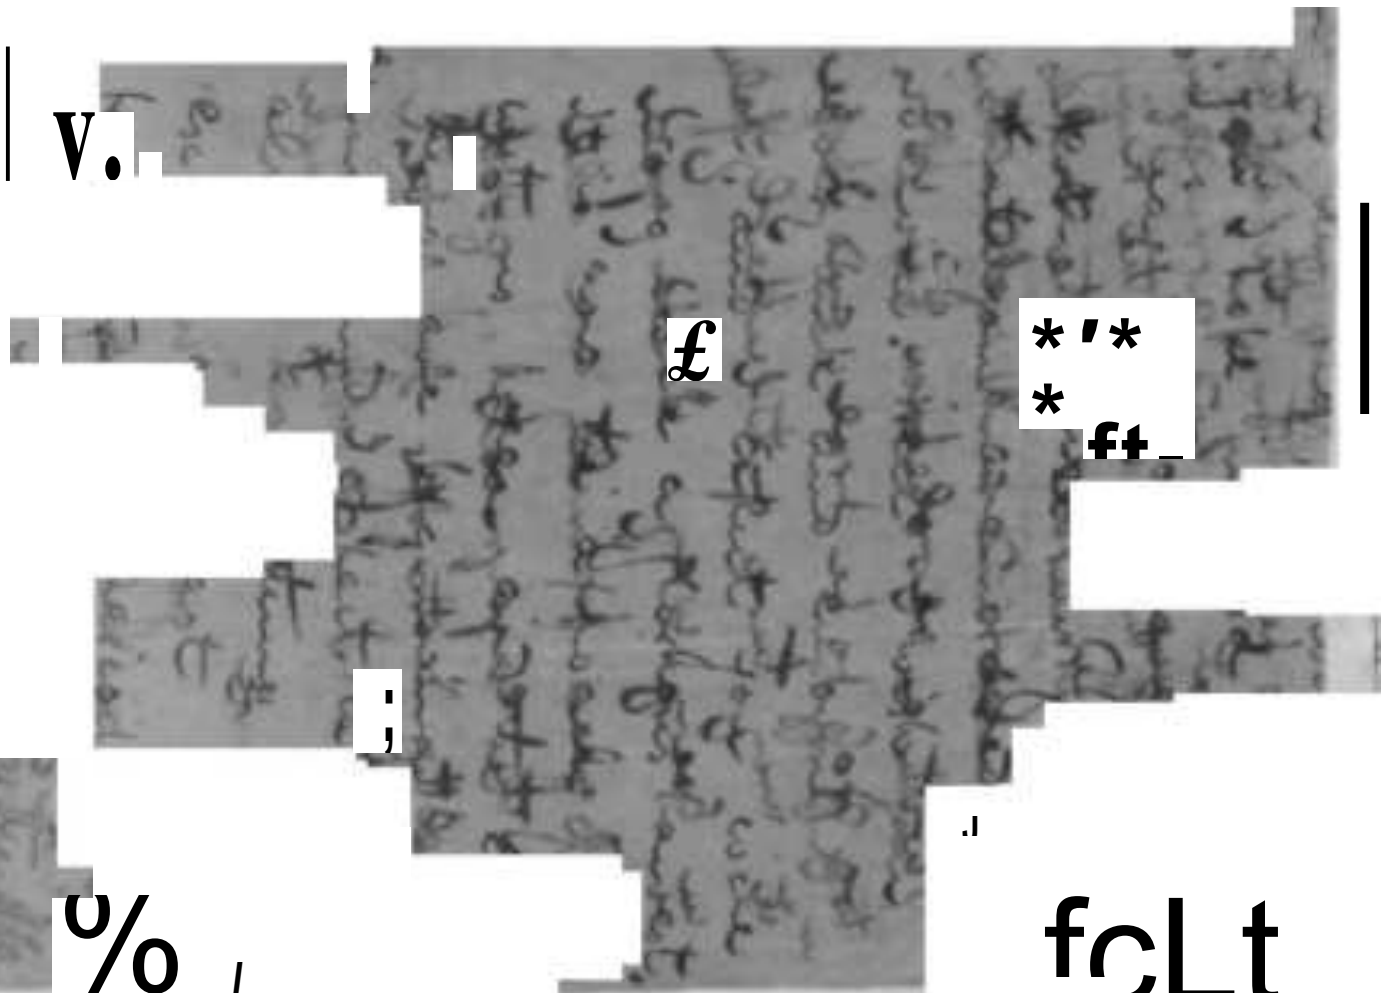

Paul de La Roche

Il ne reste plus pour compléter ma cargaison que
que la petite caisse de M^{re} Chiant. La visite
lorsque je pense que vous devriez ainsi la partie
obligé de tous les navires qui arrivent ici de
points de la terre, je ne sais comment vous
passer à tout d'urgence d'œuvre, je vous plains
vous admire.

Je présente mes compliments respectueux à M^{re}
à Madame de La Roche.

Handwritten text, possibly a signature or name, including the word "Cant."

V

In a previous letter I mentioned that
I was desirous to obtain seeds of the
Sambur tree of Nepal, or of the colder
parts of India, and of any flowering or
other ornamental plants which are
likely to bear a temperature as low
as sometimes as 28° or 25° of Fahrenheit.

This degree of cold is unusual of any
short duration & plants of suitable growth
can consequently be protected by a covering
of straw. Seeds of plants which are
interesting simply as botanical specimens
could not be valuable to me.

I hope you will excuse me
Yours truly
J. D. Hooker

My dear Mr. West.

The enclosed ought
to have gone with the Juncea
rice. It was omitted by
mistake. I anxiously
expect to hear from you
in
re-
ply to my last. ⁱⁿ
our real Tea plant which we ^{the}
have here (brought from China)
tallies exactly with your de-
scription. It is healthy but of
slow growth - & not always ma-
turing its seeds. I have three
parent trees: ten grafts by aid of
the Cam. Nip. & by daboning merely
in the earth: & 6 sprigs raised
from the seed. I regret that my illness
when the Chapmasy set out
caused me to overlook you

as yet answered me, & my
drawings are gone home to take
their chance. I wish you
could procure Horsfield's coopera-
tion with me: first to bring out
them, & then to...

ation

A millennium of structure
 & manners, the
 drawings of mammalia are
 complete & gone beyond, but
 new ones are still forthcoming,
 & the delineations would doubtless
 be accurate for the illustration
 of this, as well as of the ornithology
 series. The drawings of mammals
 are surprisingly less than nature's
 proportions; but all the birds
 however big, are figured of the
 full size. I think actually
 ready cannot be less in number
 than 1000. The artist is a native
 but he has been trained carefully
 for years; has used that little
 magician the camera's aid in
 all essentials,

. ^ -i^ -c ^r^,

these derived from the
 practice, has acquired a degree
 of skill & of accuracy quite
 admirable. Hardwick's delineations are
 admirable things compared with
 my draftsman's, nor are fossils
 even, superior on the whole.

to faithful portraiture of the life;
in regard to forms & to colours
(one or **&T*~.**) my man carries the
palm from them all. He has
not been required to try skins
& single: he has had **A^^;^**
first in multitudes for
drawing.

How must I induce, & that
speedily, a gentlemanly &
able cooperator at home?
W*ink of this, & devise some
means. The drawings are a
deposit confidential with the
secretary of the Zool. Soc. & I shall
of course be very eventful &
spiral. I wish

he won't join me: for, besides
that he is second to none in
England, & could take our
whole & liberal. That too
to have in their Museum the
extensive series of specimens
which will be needed for the
work, to which I am ready to
send home. My actual stock

to sail about the end of this month.
We will be quite sufficient, and
be one already read - provided
an ear conveniently open
it.

Yours very sincerely
J. W. Bentinck

I congratulate you on your
father's recovery, which
may be considered almost miraculous

Robert W. M. C. C.

My dear Sir, I beg to say
that I have the honor to
acknowledge the receipt of
your letter of the 10th
inst. and in reply to inform
you that the same has been
forwarded to the proper
authorities for their
consideration. I am, Sir,
very respectfully,
Your obedient servant,
John Smith

your friends; I trust the
most happy to be united
the occasion of the
your presence had not been
and that I was a bit of a
entirely given to the
the same of course it is
the most interesting of the
dear I will present
the most to you of the
Waltham - and I am sure
please to both of you and
& believe me very truly
Yours
Monday

M. Malik Es
W. K. Singh - Bot Jodhpur
Munafar, Calcutta

My dear Mr. Malik Es

recd April 1st
July 20th
My pleasure to hear of the

return of the bot
calcutta family
vice, show which you
have one happy
family & a happy
family, if you
need it. Also
no time & attention
to be cultivated of
which peace.

What say you to
my sending some
tea to you to Calcutta

Dear Sir,
I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the above named matter. I have the pleasure to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Your obedient servant,
J. M. [Redacted]

^ ^ 7 * * 1 > ^ |

taken in having them packed by a
Hudson's Bay for my use -

I owe you an apology for not
addressing you with the usual desig-
nation, but be assured I hope you
will do me the favour to assure
you that it ^{was} not ~~proceed~~ done
from any disrespect of my dear
and sincere friend but merely from
a mistake or slip of the pen if
I may be permitted the expression

Believe me most sincerely yours
J. D. Mallik Redbank

*-f «?

My dear Madam,
I have to offer you my most
cordial thanks for your taking the
trouble to send me an extract of
of the Court's Decree. so will
as the great modesty and delicacy
of the Court you have shown in
not mentioning it yourself. You
also to make you my warm wishes
I hope to see you in the present of
the winter and to see you soon

My Dear Sir

I had sown the vegetable seeds of which
papers I herewith send to you, as well as the wheat
which you had the kindness to forward to me in a Box,
in my Gardens near Calcutta, on a rich soil dug out
of Tanks; but none of them I am sorry to say, has vegetated.
I also regret to state that the roots of the *Milium*
which you were so obliging as to send me by your Nephew,
(who planted them in one of those Tanks) have not grown
as yet.

Anticipating the pleasure of going over to see
the Vapour tomorrow at noon, accompanied with my
Relations, I remain, my dear Sir, yours very sincerely,

Rajahmundry

Cal. the 21st March 35.

Sydney New South Wales

26 June 1875

My dear Dr Wallace

Recd 21st June per
Warrior Capt. E. Park with a box
of specimens

Although I have had your

very acceptable letter in my possession for
some months (during which time it has never been
out of my letter case.) I have not forgot your wishes
in so far of which, as regards your ^{letter} ~~contribution~~
friend Capt. Mangrove, I am unable to
comply — You will doubtless have heard
as much as I ^{have been} ~~was~~ able to

end of this talented gentleman — I wrote to
him on receiving your letter which he forwarded
to me from Van Diemen's land, accompanied by ~~you~~
copies of the words &c. of India — One of which
you request me to present to the Horticultural
Society here but as that Society as far as

herbarium is concerned or interested. The
plants & seeds sold **Y&U** are not thrown away
upon them. but shall present it in your name
to the library here which I hope you will approve

f-
I have used J. Warren's bound deed
& Calcutta a box of dried Sp. of the
rarest plants of the Country collected
to Intend by my old colleague Andersson
who is established here on a Collection of
Seeds & Plants on his own account - he came
out with me but from his modest
pretensions has only paid now (by
my advice) your renewal on the 1st of
advantage his occupation

you will see by the accompanying the nature
of his collection whether you would like
him to send you what novelties he may
find to be new - As for medals of
Cyprus I regret very much I have been
unable to attend to it as yet having my
time most fully occupied wth my own concerns
which require the eye of the master to be
constantly on them - I have promised our
friend Loddige several things but I
have not yet had time or rather opportunity
of sending him any thing worth the price
- Loddige has sent me several things many
of which succeeded very well - - Last year
you sent Mr Stacey (of Post Stephens) some
seed &c - he sent me several seeds last

to have some movement & enjoy some
pleasure at the Athenaeum where I
hope we may one day meet again. I
dine with Philip de Sole & the "joint" - How
days are past - but we may look forward

Director of the Botanical Garden

Calcutta

Capt. P. King
26 March 1838

Reply
20th May 1836.

East India House 27th March
1835

My dear Sir,

His Grace the Duke of
Glanville (as I believe you know) is very
much devoted to Botany, and he is very
desirous of procuring from India a
choise collection of your rare and

— s&^~ #2 ^t***

Moreover,

to their being brought to England in as
perfect a condition as possible, His
Grace has determined to send out one
of his own gardeners in the *Serpenter*
Nor of War, which conveys Lord

Hayterbury to India, with a view to his
employment in selecting the Plants, and for
the purpose of taking care of them during
the Voyage. The Gardeners
will return in the Indica, and Capt.
A Court, her Commanders has kindly
undertaken to give the Plants every
accommodation in both Ships and
Hayterbury will also, I am sure, take
an interest in the execution of this
Botanic Commission - I am quite sure
that your best Offices will be used
to give full effect to the Duke of

Dunshire's wishes, and a more favorable
opportunity, could scarcely present itself
for conveying to this country a rich
collection of your Botanic Discourses
with every prospect of success.

Believe me,

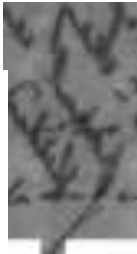

Dear Sir

Very faithfully Yours

A. G. Fisher

London, April 7, 1835.

100? - Minutes; of 16-26 cards
at Lyons 10th Decr 1835

Sir,

I have now the honor to
acknowledge the safe receipt of your
letters of the 22nd & 26th of August, 1834,
containing certain corrections and amend-
ments from Mr. B. H. Hodgson, referring
to his paper of Quotations in proof, on
Buddhism, - which paper came into
my hands through the Right Honourable

Sir

1 April

My dear Sir -

ms 15th April 25
reply 16th April

Mr. Weston writes me on the 14th
Dec. that he had not been un-
derstandful of your order intended
to send me seeds of the *Hy. Tamaris*
but the Botanist was absent
and he found besides that
Mr. Welfley had laid hands
on all seeds that were easily
procureable to be sent you
by Mr. S. Abington — By the
same Mr. W. Mr. also writes
from my friend in Cornwall
who had procured to send
you seeds most faithfully —
So you see that you attack

me when I did not deserve
it - if you do not get seeds
in return from my friends -
it will not be my fault -
at least for I have done
all I could to urge them
to make a suitable return -
and I do not doubt but
they will be as good as
their word - Weston
is highly pleased with
your box of seeds - of the
trees unfortunately only
2 quart of 2 manjoes
reached him alive -

Enclosure and extract from
a letter of Baines that went
up to Govt. the 1st. Sept. with
a letter of mine August or Sept.
~~last year~~
What I think is about the
first official intelligence
of the existence of tea in
Assam — If you could
get hold of those reports
you would find much
information about the
country beyond Sudeya

can get it only through the
trader, & must wait its
pleasure. Pray communicate

the accompanying drawing &
description to J. J. Pearson,

lijS*^i~ £&~L^

of the Medical Journal;
desiring him to return them
presently for retransmission

by you to me. These names
of zoologists in England affect

ignorance of all that is printed
in India; the better to appropriate
all discoveries themselves!!

Do you know Horsfield - the Com-
pany's Museum Curator to whom

f e e *f<>

you gave my large box of specimens
I should do, get him to
join me in bringing out the
Faded Nepalese; assure him
of how ***Z^*^L- <#** materials as means
yet were collected to illustrate
foreign Zoology; & say that if he
aid me the beautiful series
of drawings & the plates of specimens
I have, shall all go to
enrich the Company's Museum,
so soon as they have served
the turn of our book.
I tell thee, man, that I have notes
of structure & of habits, such they
compare, delineations of structures
that are absolutely true to nature
and that my drawings have been
corrected, each one, by comparison
with a dozen specimens of the
■ ^ ^ < ^ Z * ? The described delin-
eators from single dried skins & the
all hide their faces when my book
comes forth - provided I can but get
a man of true science to join me
in bringing it forth. A ffs them
H. Madgeon

I had the pleasure of receiving your
obliging letter and soon after the seeds of the
Drosera. I am well assured that the report you
expressed in the last volume of the living
life I had bestowed by the death of my brother was
sincere, for no person who had known him in his
late life, could have looked upon him with affected
regard. To see the life is precious indeed. His
has continued bringing into execution the plan of
his garden at Highclere, where the seeds, obtained by
a crop with the Nepal Rhodod. above from some very
conspicuous plants. The Drosera seeds were entirely
spoiled by being trodden; the soil had expanded from the
fermentation. The seeds have come better in brown paper.
Do not trouble yourself to send me seeds of forest
trees, for they are too bulky to suit my garden.
Pachyodan helioides plants will be particularly
acceptable to me, & every thing that is ^{seen than not} flowering
before the end of summer. The Rhodod.
in paper ^{is} acceptable, viz. particularly the Himal.
Lilhet, the Aristata, & I believe there are yet some that
are in Japan's place to be desired: and if you should ever

obtain the small libron, for as high a situation as the
state it is in an acquisition. Had I been the
is lost here & I would wish for it a more beautiful form
found in your books. The Libron of the Libron. The Libron
Huntington & Co. Libron of the Libron. Libron of the Libron
of these ^{two} parts of Libron. squeezed up in a small ball of
they & I think come better than in any other way. I have
not met with his ^{small} Libron. I fear it
is nearly lost in England & I doubt it being
I saw a packet beneath a note by the Libron
of the Libron. I am sure that I can obtain.

Truly a great deal of interest in the life of the
excellent man of Cambridge, who it is now a well
known

Repal April 16. 1835.

Vol. 24th Spl

My dear Wallich.

I send the enclosed to
Cuvier or to Temminck with my compliments
& acknowledgments for the profit
derived from their works. It is
a delineation of a New Genus of Waders,
preceded by a statement of its use
I want to prove my title to character-
ize it, both from discovery, & from
the knowledge than was possessed
by the Author who took that
office on himself. The nomenclature
I acknowledge; nor do I claim
the paper as an original, but merely
as a publication at Pal^a. But still
the standing of it may flatter; &
in simple truth, I wish the Continental
Zoologists to be put in possession
of its generic character, in order that
they may adapt it as well as the
specific name. Have you got the
sea seed? Ever thine affly

Mr. Hall

I think that men will become the wisest, the most virtuous, & the most
rich, who overlook as little a precept, a verse or a word of the Scriptures
as little as a Pilot overlooks a star. — But, pardon my dear Sir, this
digression. It is possible it is the duty of a Clergyman in his second volume.
I am, Sir, your Obedient Servant, & your Obedient Servant, & your Obedient Servant.
I have the honor to receive by the way of your Obedient Servant, & your Obedient Servant,
your letter containing several of your valuable enclosures. The enclosure about
the History of the Church is highly interesting; the paper concerning a proposed Work on Gardening
is most welcome to me as a Botanist who delights in observing the History of plants
from its first sprouting, but with little or nothing at all about the manner of breeding them.

my calling, all
to be pleased
to be in love

not feel at liberty to devote a moment of
my time absolutely required for recreation. All what I am doing now
many plants collected in the hills by me & some of my servants, and to superintend
the drying of them, if I should find any new plants, I must leave it to them,
if any really I try to examine one plant which particularly attracts
my curiosity. I shall be quite happy to receive at any future period
from you such specimens which fall occasionally into your hands, or
if you wish you may use to deposit in my quarters after the receipt of
different species with.

I have just received leave from the Commanding Officer of the Church Mission, of
the 1st of 1841. "The Missionary" but since the
leaves

of Christianity

Fig, I am not being my mind to make use of the leave in those
things; and if I do not get know, what I ought to do. But I have some
reasons to think, that in a few months hence, circumstances may so change, that
I shall return to the Hills with full satisfaction to my mind. - I very expect
to hear from Sir Fred. Adam. Also the Dalhousie, in a conversation which I had
with him, when I passed through Mysore, seemed to intimate that he would find
means to enable me to return to the Hills. However, all these things I leave
to the God of Providence, He alone knows what is

4*

my unexpected arrival to Mysore, although it quite changed the
the things I said, was born of an admirable beneficence, after respects, of course, of
study of history, I have collected a number of laws, good plants, and one was, when re
I am to the Hills, and to compare.
Dance on the ground will come down with riches which would be calculated

There can be no doubt of Dr. Brown's having
Hon. members there is an especial regulation

My dear Wallis

W. J.

We have had to consider of similar
subjects before, and in case of papers being sent
at the same time to other places for publication
it has been decided to take no notice of the
circumstance till the papers were circulated for
publication in the transactions, and then to reject
them as not original. The reasons I will be
able to explain to you when we meet, which I
trust will be on Saturday, and I will then be
able to show you that perhaps Brett may be
excusable, so on account of a scolding from me
he tried to rectify his mistake.

Respecting Hutchinson's paper I entirely agree
with you, he has been premature in sending it
forward for publication, but it has been your

£*

^ i^^-i^C

•k-/Lrtj£Z *****

*?

/

It is desirable to have it imp'd at the same time
 & thereby the subject be better elucidated, - also
 in some cases **A.** not just to the next in
 succession is wanted for prompt publication &
 stamps **fit-sir** on for an early reading, there
 were the reasons for which the word selection
 was inserted in the Regulation, - most people
 who can write a good ^{paper} thing, are aware that
 it does not spoil by a little keeping. The
 papers (until printed) are held to be strictly pri:

re to, and the authors can with -?>*. *J &&£ at
any time they like, prior to publication in the
Transactions, as it has been often done. - We
have in these matters sometimes to deal
with the impression 7f u*<z> t7 S^t-ls**** actually, and
it is well to have a merciful consideration
of them, for the sake of quietness, when the
intrinsic merits of the facts would claim
a little severity -

When I see you I will
tell you of the anxiety
of early publication of
one of our friends that

will a little surprise you at first, and still our
explanation there is some excuse for it.

Believe me very soon to all with - with
best respects to Mrs. Wellish & your daughter
Yours ever most sincerely

My dear Walleich,

I wrote you Walleich a note of the
plan I follow in hooking Couper and sent
some prescriptions that might be tried if
you thought proper. ^{For Syde's purpose the prescription was added on the label}
I hope they have done
good. - The fact is I could hardly be done
long for any of them would be right, not
seeing the little pet - but I was sitting
& hardly in a state to go down. - I hope the
little pet is better, though we must not
expect quick recoveries in hooking Couper. The
indications of cure in which depend to much
on the existence of suspension or inflammation
- sometimes slow but always unobscured.

Do you know any plant or shrub
by the Bengalee name of Birungo,
what is its Botanic name & what it
uses - I am told a purgative - I am
to get a specimen of it to send you -
- There is an intoxicating or stupefying
leaf used by the natives in their
intoxicating preparations - (an infusion of it
is drunk) the natives call it Siddi
or Sitti - is that the Gungo, or Candaba?
May ~~the~~ ^{make me know} the Botanical names
of the Birungo, and of the Siddi.
With kindest regards
to Mr. Walker & his wife & children with all

My Dear Sir

By the kindness of Mr. Dixwell I
am enabled to send you a small box of seeds which
have been procured from the best & most careful
grower in our country, Col. Carr at Philadelphia -
I have engaged him to collect for me during the
present season & coming autumn as complete an
assortment as possible - He has also promised to add
a root of the *Spondia julapa* which Dr. Cox of Phila.
received from Jalapa in Mexico & of which he
published a description which you probably have seen
this also I will endeavour to add - I may also be
fortunate enough to meet with the above some seeds
from Cuba for which my brother, who spent part
of last year there, has written to the conductor of the
estate of the Comde de Fernandez, who has more
taste for plants & flowers than other gentlemen in the
island - I hope I shall not be disappointed; but if
even I am not I perceive that I shall make a very
inadequate return for your very kindnes -
If Mr. Dixwell on his return should be able to bring
any plants with him I should be glad to receive
a root of your gigantic lily, the seeds you so obliging-
ly sent not having vegetated - a plant of the mangosteen,
your palms, & any siliceous roots or
all the seeds of the *Dracopis* were dead

addition to my
 letter of the 15th inst.

refusing to cooperate with
Mr. Holmes. It is not cloth
surprising to me that the
Bishop should venture to
denounce the outrageous con-
duct of Mr. Holmes, not only
by advising you to associate
with him before such apology
was made, but also that he
should threaten you that in
case of refusal you should
repent of it during your
whole life. It is not before
judging that Mr. Holmes finds
that in a moment of imper-

My dear, Fellicia

Since I last saw you
I have not ceased to think
of the wrongs which
you red to me, and to feel
that so unworthy a subject
should have been forced on
you, and have caused you so
much anxiety and so many
with respect to the outrageous
opinions used towards you
by Mr. Holmes, there seems to
have been no doubt in the
opinion of the Government,

By the By perhaps just allow
to you?) in case we think
any of the value of opinion,
namely, that we are not
photography in the matter
to you - from the experience
of those people to you the
G. S. consider the possibility
perhaps person to contact with
the Department of the office
as in that office he has
not been just - but he has
acknowledged that you was
allowed to visit you down

are unacquainted and are
the photography - at the same
time he has understood
to make you say that you
are satisfied, at certain
times no photography is done
again, and he tried to know
you voluntarily to make
society, and how you had
and he had printed to them
also has opened up to fill
in with. But it is the opinion
photography has been the
I think you are right in

13J

li

'vj ^r^ is

4

t

opposite with him, is ad-
 vanced to the consideration of the
 the copy of your letter.
 than to my return was not
 list, and in truth, over work,
 but I am unwilling that you
 should suppose me indifferent
 to any subject which concerns
 you. I readily know how to
 advise, but you will I am
 sure give me credit for wishing
 to advise rightly, - when I say
 consider whether the publication
 would prove you ed up or
 give you further annoyance

Opportunity of
 the approach has
 matter, -
 question yet remains
 let it how can you
 the least possible
 than to yourself often
 sup you have sought,
 which you have long

was in to believe that both
the Gov^t and the Bishop
conspired you into it? -

After the letter from Prof by
intimation of your own in
your heart, here you ought
to justify the paper, or do
you better compare with
showing a copy of them to you
friends would answer the
same purpose - It must be
said to by the Bishop that
that he has made his eyes
closed leads on Mr Johnson's

side of the question, as
that you can expect nothing
but ruin with you that
is all - The threat of the
public sphere will be a
strong motive to make the
leads go that is right, as

I think you are justified in
saying that you are not
justified until you get an
opportunity, but that is all
I should like Mr Johnson's
& thinking in your own
- on, that you are completely,

I almost fear that this
note will recall to your
memory the past business
dealings, but I've thought
so much about it that
I cannot help writing some-
thing - though I hardly see
what good can arise from
what I have written.

With kindest regards & best
respects to Mr. Wallcut &
your daughter - Believe me
they have well - your devoted
most sincerely W. W. Waring

Extract of a letter addressed by the Judges of the Govern-
ment of Mysore to the Secretary to Government in the Judicial
Department under date the 4th July 1824.

4th The knowledge of the Pundit for the
Recent duties have brought us more in immediate contact
with the Coolies. But the latter are excellent characters in
the City and neighbourhood and as a man of more than
common abilities he was formerly a Scribe in the College
of the City of Mysore and has been Scribe of the Registrar
Court of the City of Mysore for a short period when he gave
full satisfaction. He understands the English and Sanskrit
Languages and is otherwise a man of good acquirements
and according to European and Indian methods of so called

5th His age is about sixty & though
not so strong and healthy as the Coolies he is perfectly
competent to perform the duties of a Judicial officer
and is now employed as Scribe & as such is not Pundit
of the City Court.

True Extract
(Signed) C. Smith
Judge

(Copy)

Having seen but for a short period
in this Office, I do not feel competent to pass an
opinion on the Charge, but a high Character and is well
spoken of by former Judges and by the Court of Appeal.

The same remark is here applicable
to and my opinion which I could form can be
left to the value from the testimonials on his profes-
sion given by former Judges of the Court of Appeal.
It would appear that they considered him a man of
more than common abilities and well acquainted
with the Russian and English Languages and of
liberal knowledge in European Service.

The shortness of my Charge has
also perhaps an opinion. The Matter of the Judge
might be referred to for a Judgment of the Cha-
racter and qualifications of the above three Judges.

(Signed) T. Richardson
Judge

(Copy)

Sir,

Calcutta May 31/35

Since the very kind interview
which you granted me on Sunday last
I have thought much on the observation
which you then made respecting your
intended visit to Assam. I have an
account heard of that kind of knowledge
which is only obtained by such means;
and considering that such another offer
may never again offer on any time
I had to address you on the subject
I fear that when I called on you the second
time the other day I assured too much,
if you think so Sir, I hope you will
pardon me, it is my practice not to
assume any thing, and especially so when
in the presence of those who are so far my
superior. I understood Sir from your
your observations that some of the

M*%

most celebrated, scientific, learned men
in the country were to compose this
summon, which is to inquire into the
nature of the soil, climate &c of Anam.
If you yourself require working men,
and I be allowed to offer myself
as a working man, should the services of
such men be required, I would make
some sacrifice, if by so doing I could
qualify myself to fill a place of trust should
the Government think fit to employ me
hereafter; could afford not to be glad
to accompany the mission and bear my own
expenses, but my private means would not
admit of my so doing; but should there be
a situation open which you think me
competent to fill, the emoluments
of which are sufficient to cover the
necessary expenses, I shall be amply

rewards by the information and
honor I shall acquire by being in
the company of such distinguished individuals
I shall be much obliged if you can
favor me with any information respecting
the dialect of Assam, in order that I
may prepare myself as much as possible,
in the event of my services being required.
I leave the matter in your hands
being well assured that you have the
much discernment to be imposed upon
and having no wish myself to hold a
sincere. I remain Sir with
the greatest respect
yours obediently
To N. Wallis M.D. W. Martin

My dear Mr. Atwell.

Again I am beginning
to ask myself, what the devil
you are about?

Have you got the Paper on
Androsia for Nov. 1899? &
the Vindex on James Clark's
for some French Zoological? &
the original paper & drawings
of Red-billed Tropicbird for Pearson?
The first to go home, by all means;
the second, to be burnt, if you
will. Better so, perhaps. The
third, to be given to James Peirce
to print in Journal, with a
notice that the copy sent to
Society in 1889, was somehow
mislaid, & so not printed
in Vol. XVIII of Transactions.
Do you hear & understand?
Answer then!! This is the
W. M. Woodhouse

No^o enclosed in box No. of 25th & 26th Feb 35
at Surraon the 2^o Nov. —

North House
24th June 1835.

My dear Sir

So long a period has now elapsed
since I have heard any thing of you,
that I had prepared a letter to go on
with Lord Heytesbury's private secretary
In this however I have been disap-
pointed by a change of Ministers, which
has been equally unfortunate to the
best interests of this country & of India.

The talents, temper, firmness & discretion
of Lord Heytesbury, (so approved of by
the India Directors) — seemed well suited
to allay the irritation which prevails
in the Indian Empire.

I have been assured the other day, that you
Dr. Wallich

Botanical Garden
Calcutta

Have lately become possessed of a very
considerable Fortune, [REDACTED]
hope is true to the utmost extent ^{that}
I heard; - as it will enable you to look
forward without anxiety & to pass the
decline of life in comfort. May you live
many happy years in the full enjoyment
of health, & may add in the further
extension of valuable Botanical knowledge.

Have you met lately with any thing
new or interesting? I have just succeeded
in flowering *Tanda trees*, - the only one that
has arrived alive in England. It is a beau-
tiful flower & is to be figured for D. Lindley.

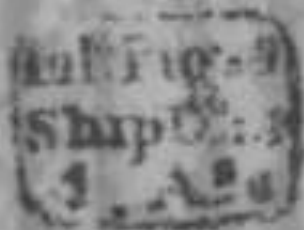

I have also I hope saved the *Diriodendron*
pauciflora which you sent me: it has
lately appeared sickly, but is now recovering.

It is the only specimen that has ever arrived
in this Country. - Some of your samples
are looking well & particularly those which
came over (the last) in a more sandy or
lighter soil. I feel however convinced
that grafted Plants should not be sent
over until the graft had been completely
established, - That the plant had been
completely cut in to reduce its size
& allowed to make fresh wood of two
years growth; - i.e. the plants should have
been grafted at least four years.
Our only Nursery I fear we shall lose, &
of Capt White should speculate in another
cargo of Plants, I wish he would bring Nutmegs,
Cloves Cinnamon & other spices, - & also these
seeds sowed in bamboo tubes at different depths
of soil, the upper part of these
forming a sufficient protection if buried up in a tub
of a ship. - A few sample stones (for stocks to graft
sowed would also be desirable, many stones sowed from

10th June 1853

The sea stock on the voyage would be certain
of vegetation on their arrival here. I did
long also to get *Amherstia nobilis* into
my collection, as it must be magnificent.
The *Stylidium*, & *Pinnus Scylla* are there
but not one seed of the *Deodora Cedar* came
up, indeed it all seemed to be rotten or de-
stroyed by insects. I have however one plant
of it out & thriving, which Mr Lambert is
tending. — I am very anxious to make
experiments for the preservation of seeds
& plants in long voyages, by placing them
in various soils, sand & charcoal, & also at
various depths from six feet upwards. — I
would also ^{try} seeds in clay kept ^{damp} moist, — some
allowed to dry, & some baked in the sun. If
the seed should I should think be quite
& should be entombed at a temperature be
what they require for vegetation. He having

That many seeds will remain for ages
under ground with suspended animation
& apparently restrained by pressure alone
& that moderate. - Bulbs & tubers too will
also retain their vitality for ages. - I can
see no reason why the roots of many trees
& shrubs should not also preserve their
vitality. - Since I last saw you I have
had several changes, but which however
have not been attended with any
serious injury to my collection of
plants. Forster has retired having apparently
more turn for landscape gardening than
for the kitchen garden or botanical range
as he was succeeded by a person who was in
continued excitement, bordering upon
derangement. - but he fortunately retired
last year. - I have now a real plodding peasant
in the garden with common sense, & all the
things has been scarcely a twelvemonth here
every thing is beginning to revive. The Cornucopia
is looking well I have just finished the fruit of
my third season, - some of your Champas will ripen in
next month. The hybrid Cherimoya has also flowered. -
The Dutchess writes with me in both Cornucopia & believe me
I am ever yours very faithfully Northern Ireland

...last night looking forward
with our best wishes - I hope you will
in a few days however we have under
the receipt of shipping for Scotland
this evening I must give up the
hope of an interview with you
you shall hear from me from
time to time our business
the mean time I write these few
hundred lines merely to show you I
have not been idle
I am Dear Lord William Bentinck
the other day looking in perfect health
in high spirits, the lady not so well
I am with you Amherst was very
well on our arrival at Liverpool
I am very glad to hear of Mr. Shephard
I will recognize. I met our excellent
friend Edward Gifford for the first
time

time last night, looking remarkably
well and English - we had rather
a tedious voyage but in all respects
we were very comfortable. We fear
both arrived thank God in perfect health
Kindly let me hear from you often
re-convalescent, and when opportunity
offers a box of your valuable seeds
with the most acceptable participation
Presents to you, none of which
to be in the box you kindly sent
All your seed boxes have been
delivered - I am prepared for time - God
Bless you my dear friend - With
my kind Compts to Mrs & Miss Wallack
Believe me affectionately yours
W. H. Holman
24, Great Brunswick Street, London W.C.

Wackney July 24. 1835.

recd. Nov 31/35

My Dear Dr Wallis

By the kindness of Capt Henning of
the Ship Windsor I send you out a glazed
Box of thick Plate Glass in metal frames,
as an experiment of the system of enclosing
plants from the air for long seasons, which
I learned of our mutual friend Mr

Ward of Welton Square. it contains
exclusively Orchideous plants as I list
enclosed, I hope they will be acceptable
to you, and try this experiment in
another way: at the same time it is
with the hope

that you may stir you
up to think of us, by filling the Box
in a similar way, and sending it by
the return of Capt Henning. We have
heard a verbal message from Dr Daubeny
of Oxford that though we sent out to you
packed in this way had succeeded, and

that he had received from you a Box
in the same way in noble condition.
we are particularly anxious to try this
many times over, and to see
with our own eyes the success of our
endeavour to transport plants in a
way which we think will be a new
era in the introduction of living plants
to all countries. so let me entreat
of you to send always in such close
Boxes. Orchideous plants in particular
with orders to the Capt. to place the Box
in an exposed situation on the Deck
would it not be possible to send
such boxes to the place where the
Orchids grow in abundance and to
them filled them with as much soil
as possible and sent to you to ship
them. — you will find the Key
fastened by wire to one of the lockes

Pray keep this key, as all our locks
are made to pass and we will send
the Boxes again filled with whatever
you may wish for.

My great wish is for Orchideous
plants, and I enclose a list of our
Indian species in order that you may
not be troubled to send what we have
already, but as many others as possible
we likewise wish for any Magnolia
and Amherstia but again I repeat do not
let even these stand in the way of
Orchids. We will write again by
another conveyance in the meantime

Remain
My Dear Sir
Yours most sincerely
George Loddiges

Mrs J. Hodgson

Sept 17 1155

Dear

By the date of the two other letters you will perceive that Mr John Gibson, a young man from Chatsworth Gardens has been for some time preparing to accompany the General to India. The delay arising from Lord Mynsterbury not going has been a little unfortunate in some respects. I hope there will be no loss, as he now carries out with Lord Anskland a number of plants to you, which would not have been the case, had he gone with Lord Mynsterbury. Lord Anskland has been more anxious about medical and gun plants than those of a showy character. I shall be most happy to send you any plants of any thing you may wish to have, as we are very near Liverpool when they will be readily shipped to you. Amongst the shrubs I have sent 12 kinds of fine double Dahlias, I have also sent some of the superior kinds of Persian Melons

Thank you will like, so also a further day
kind of summer. A Duke of Devonshire
some John took entirely so you think
My mother has been much on his going to City
but you will do all for the best I am sure
He sends school you are kind enough to
his father, arrive at Clifton & I recollect
certain, every trace of the Nelsonians present.

Adieu

Yours very truly
John Jay

My dear Mother

Letter to which you have given in the copy of left
of your ideas that I shall have accordingly
to be their respective directions I have purchased
a sheet of paper of Lippincott & Co. to print the copy
of letter from you respecting the Extra Statute
to accompany you a copy of the bill for an amount
of the said sum the salary which by statute has
been made in the letter of the 11th of the month
you by this time to be received you before you get
them. We have had a letter to you through
of the Dept. dated the 11th of the month
letter of consolidated accounts of the Dept. of the
of the Govt. Department that the said Treasury will
pay the Am. of Mr. Griffith's bill presented to him duly
audited by the Com. Aud. & Mr. McCallan's bill to be
received

t*A

expenses incurred
 from Mr. Holm's visit
 of the letter & the letter as
 above letter, and on my asking Mr. Hunt who
 was to send your letter as
 it appeared, the Copy will answer as
 I have accordingly enclosed to Mr. Bellamy, request
 till I get it, franked by Mr. Hunt & took it to the
 Post office on the 1st instant & directed the same
 to your address with the Westinghouse Patent & address
 as you have used the same by this letter. It will reach
 to Mr. Duffell's letter, Dishes, Mr. Grant, & Col. Swaney
 and it to the Civil Commission office & when papers to
 send his report. Person Miller Carleton & Mr. G.
 told me that he shall send it to his agents & they
 may be able to do the needful. I accordingly asked
 one then named.

: ^ J & . £ % ^

c

I am happy to inform you that I have been able
to realize the money from the bank lease without
taking the trouble of going to the Magistrate with you
myself to any extent, the day I carried
the garden after leaving your Dargah I sent the Jamad
of the garden with the man, with instructions to frighten
him that he shall be sent to the House of Correction
unless he restores the money & for which a letter addressed
the Magistrate of the Police - in the evening of that day
the Jamadar brought me 16 Rs instead of 18 which
as his due, on acct. that I had told the Jamadar
not to give a rupee or two if he can pay without going
to the Police & therefore the amount given 16 Rs & I
am sure you will deduct from the similar bearer's wages
16 Rs when you next pay him - Mr Wallis has taken
from me the above 16 Rs for his petty expenses

Mr Wallis & all your family as well as all
the low ants of the garden & house are well & we love
ourselves & party the same -

Camden, New South Wales

20th Sept 1834

Red 35 Pa A

Dear Sir

Capt^l Bopkins of the H. C. Service
who proceeds to Calcutta direct, has oblied
offered to take charge of a small box of seeds
addressed to you. As I am desirous to obtain
plants indigenous to the colder or more tem-
perate regions of India, I have thought it best,
although a perfect stranger, to address myself
to you, and to say that should it meet your
view, I shall be very happy to transmit to you
a portion of such seeds, (native of this country)
I may from time to time collect, in exchange
for such as you may be pleased to send me.
Unfortunatly although I am fond of Botany
I am no botanist, I may in consequence be
Dr Wallis

frequently at a loss for the correct names of
the seeds I send. But it will at all times
afford me pleasure to comply with any request
for particular seeds which you may make to
the utmost of my ability. These I have sent

f^i*^*^

tg^

from various parts of the
country, but principally from the District of
Maurice, a tract of country on the sea
coast between the 35th & 36th degrees of latitude.

This limited portion of the Colony enjoys a
climate almost peculiar to itself & so agrees
to an intertropical vegetation that it would
appear to resemble a portion of the Island of
Ceylon than a part of N. S. Wales. It abounds
in many places with palms of amazing stature
and with an immense variety of beautiful
trees undescribed & unnamed.

2 ^ _

s

imagines anything more splendid than the growth
of the almost endless variety of hard & tough plants
which clothe the valleys & the sides of the mountains

I should imagine that the greater part of them
could scarcely find a parallel with you. I think
it will be true that the greater part we found
in the richest soil and mutually sheltering
each other to that degree that the earth is

the adjoining districts we passed into a dry
situation the slightest hard frost

is never observable. The place from whence
I write is not so happy in its climate. Both
the great or greater heat during the summer
months. The cold in winter is comparatively
severe; & the more injurious to delicate plants
from its duration, & short duration. During
two or three months of the year the hard frosts at
least occasionally reduce Fahrenheit's thermometer

4° or 5° degrees below freezing - The warm days
 usually succeed them unless they be more
 trying to vegetation. During the remainder of
 the year the climate is *** rf5c^*i^c^it*^' J&*** more hot to the
 plants. As our **^^eW-^Jr^ 0f£j!£~1* <£l*£ej^** & shells are so
 limited I should prefer to have only those plants
 which are found in the colder parts **^_*0*****^_** is a
 very showy annuals. Of the former I will only
 mention the Rhododendron Arboreum. Pinus longifolia

Bambos which will be sold. But any of the
 forest trees or showy ornamental plants to be
 be most acceptable. **SC~-i\$^** which are simple
 curious as botanical specimens I am not
 at present desirous. But any which might
 prove useful in our young communities would
 as well as ornamental plants be considered
 great acquisitions.
 Should you be desirous to have

of the various shrubs which we found only in
the barren sandy or peaty districts. I shall be
very glad to procure them. And I think I can do
many which have not yet been sent to Europe.

The greater contrast can well be conceived than
that which exists between the plants of these two
situations and those of a rich sheltered valley
near <^*&_ coast at Newarran

Dunmore, Sir,

Yours very obedient servant

W. Macarthur

Lovestoft 1th Oct. 1835

My dear Friend, I have with
the pleasure of receiving a
copy of your remembrance
which gave me the sincerest pleasure was the intelligence
of the handsome recognition to your
fortune. May you & the faithful long live to enjoy it.

fyet & *** ' "

Present my kindest regards to her. You will be pleased
to hear that I found both Dr. & Dr. Wood looking like
visions, & every way better than the year before. They
had just had a little girl born - I was not under
their roof. We at an hotel with my Mother when I was
unhappily detained at sea & spent of July by the means
of a most Poyperful fever which he is but now
recurring, which time brought him to the brink of the grave.

* A***;

We have had quite an Arctic summer. The heat & drought
have been excessive but since the 1st of August
the weather is charming - I wish I could send you a
more pleasing account of the Dodder seeds - I sent
them as soon as they arrived to several friends who
had good gardens & gardeners - but with the exception
of one at Chesham got a seed has risen, yet those
from the unbroken cases, when steeped in water were found
to had a fine temperate season - I have not heard since
any at Millham have vegetated - If I go, as I expect at
Christmas I shall hear more - I am certain you will be
glad to hear the good news I send you of that admirable
personage Mr. Cook - He has another son, I hear the first
infant that can be seen, which makes 5 sons besides

17 Oct 1835

Recd during my absence
in Apran, and a parcel of seeds

Dear Sir I think is probably the one referred to
by Mr. Maclean, was recd by Mother
at Nov 1835

I delivered both packets
of seeds safely to Mr. Maclean
who was greatly delighted with
them, & sent you a parcel in
return by the Africaner which
I hope have arrived safely -

I have enquired every where about
the supposed onion tree but
no one has ever heard of such
a thing - Such a plant would be
invaluable as it is difficult in some
parts of the Colony to grow onions.

During a week or two on
Kumteh River I saw little to interest
a Botanist. The Sandy Hills
between Sydney Harbour and
Botany Bay are in that respect
superior to the whole tract of
country over which I passed, indeed
Beautiful flowers are the size of
poor Iris here - while open forest
which has not above thirty
varieties of trees, is the character
of the country I visited - The gigantic
lily grows on high mountains.
I saw its spike and stem, brought
down from them in blossom &
most beautiful -

tT d

&

4^&

Pray oblige me by giving the Capt
of the Wm Harris by which I now
write, a parcel of seeds - I
sent Mrs Partray a fine collection
by the Africaine, they could be
scarcely in better hands -

E. Beaman Esq
107 Coleridge 1835

Red June 1836
with Proceedings from
Jan 1834 to Aug 35
Zoological Society of
London
Bentley Street
10th Oct., 1835.

My dear Sir,

My delay in acknowledging your
several obliging letters and your many kind
offers has been occasioned by the difficulty
I felt in addressing Mr. Hodgson on the
subject of his projected Museum. I was un-
willing to write to you without writing
to him, and I could not make up my
mind as to the very important matter on
which I was bound to communicate with
him. But I have now addressed him very
fully on the subject: so fully that I hope
he will be able to determine on it in al-
most every particular, and to instruct me

D. Beaman.

precisely respecting it; and I am now at li-
berty to write also to you and to thank
you most warmly for the pains you have
taken in providing for his comfortable
passage both at Calcutta and for the
passage, and for the arrangements which
you made respecting their freight; consulting
as you did therein the interests of the
Society, and interesting as you did at the
same time the persons in charge of them
to take the utmost care of their valuable
lives. We are not ungrateful to have failed
after such admirable arrangements. Our
excellent friend Mr. Hadjoo selected good
birds; accustomed them to captivity; and sent
them down to Calcutta at the best possible
season: nothing could be better than this
portion of the proceedings. You received them;
you cared for them; you kept them in health;
you provided good accommodation for them on
their way home, and good care for them; you
shipped them too in health: excellent all this

shipped

cared for, they had twice the cases sickness, and death were being every there: and though the survivors from the first epidemic recovered their health when they got into the colder atmosphere of the Cape, those that were suffering under the Atlantic Equator never looked up again. All were dead before the vessel reached European Seas. Nothing that I can find is to be blamed: all is to be praised: but the atmosphere fought against us and prevailed. Had that atmosphere must always be encountered by them on their passage home from India. In this particular instance perhaps much of the evil was occasioned by the long detention of the vessel near the line in the Indian Ocean: had she crossed quickly, it is highly probable that the birds would have suffered but little;

and so they have in full battle and
spare by the rules of previous division
when attempting the line in the Atlantic
they might have done well, but with the
all they might, for the plan was to get
round us in eight. But being the in with
the all we may get around in other things
than of Royal. But the attempt can be
be made and now favorable implies.
For you know in it allow me your
think you must say it. For in fact
I was with it. It is in fact
matter of our presence. You will see
by the all we are still active.

Dear Sir,
Yours most truly,
Robert Jennings

W. L. Garrison, Thos. W. Higginson, & W. C. Loring

My dear Mother

I know you will be expecting to hear from me and I must ask for your forgiveness for not writing to you immediately on my arrival. You must be aware that on our first landing we were much occupied - however I had not been long on shore before I got laid upon my beam and S *^A the cough - with a very sore eye, occasioned by rubbing my chin against the post ladder and I am still confined with it - and my wife has been very severely ill with an attack of Rheumatism - and it has calmed with such a cough that I fear it will keep her for the winter and she is to say to have our friends [redacted]

[redacted] upon of these matters and the unprofitable language that I made have nearly overwhelmed me in trouble. However we must try to bear up against them and look forward for better luck in future - you will regret to hear the fate of the Amistec. From the first month of our being I received information to drop and with ^{all} my ^{own} ^{eyes} after the papers were read it is

however, />£-^T ^*£k^ :

JL A*

light hopes of its having
life at the root. but towards the latter part
of the year it became to appearance quite
a dry stem. I sent it on shore in this state
but did not venture to look at the roots -
with a note to Mr. Barber, to say that I feared
it was past recovery - one of the mangoes taken
also died just after leaving the Sand Head -
the other with the 2 nutmegs were in good
preservation - with regard to my own share
I lost 10 out of 60. which was as well as
to be expected. I disposed of them at once for
£40 to the Duke of Northumberland and I
was glad not to be obliged to let Mr. Tate
have them - Lady William bore with her
to your friend Lord Powis. but without
a list, seeing they came from the orient, he
said to say I would call on him to see his
improvements on his copious copy. Bubbygo
is a friend the old Lord very fond was
out of our

He was very polite, in fact
with [redacted] but I did not feel well enough
to do justice to his observations. He however is long
therefore I excused myself. He was particularly
in his enquiries after you & your family —
and he begged me to see him again before
I sailed for India — In a few days we are
going into [redacted] to remain till after [redacted]
when I shall come to London, to arrange for
my next voyage at present [redacted]
I have some idea of sailing for
your port about the 1st April, so as
to give me the chance of going on
to [redacted] if advised [redacted] I must
try something new, for my last voyage
has turned out a very unprofitable one —
I wish I could give you some news of your boys
but I have seen no one that can give me any thing
of them — I must now say dear Walter, conclude
with your very best regards to yourself, Mrs
Walter, Anne & the young fry, and sincerely
trust this will find you all in good health
God bless you if from

Your affec^d Friend

write began regarding the results of George
in 20th July but I had forgotten it -
written in 20th July by the same not by
Alexander -
Edin? 30th Oct. 1835

My Dear Friend

I did not keep my word when I promised to
write to you in June of the result of George's examination,
my mad business - Malta mail for July was
always an excessively busy at the end of July, but slip
August mail also - since then I have been wandering
and I have no more time to write by the Nov
which will necessarily be detained till the 22nd,
happening on Sunday - The Lord is of course, I know

Zip. //9 t9*u^y

and therefore I felt that you would
not let me - You have not been
told I was that the examination terminated
It is not fair to tell what happens in the
but I am afraid I think I must do
the opinion

It is well known to pass on to his second examina-
- I felt a weight rise from my shoulders which enabled
me to breathe much more freely for I am, my much
learned for the opinion of the Faculty, particularly in regard
of

of anatomy - but the opinion after some misgivings
on the part was in his favour, so that he has now passed
his preliminary examination viz, in Anatomy, Chemistry,
Theory of Medicine & Botany, & the practical department,
cannot begin next year. I shall not fail to use every
means direct & indirect to keep him to his studies, & I
would have hope that he will be called Doctor in Aug.

my **L &** has abundance of talent, but he is thoughtless
& reckless beyond all conception - I very much fear
his disposition to the most extravagant of money is not
lessened, but I hope I have now succeeded in surround-
ing him with difficulties to prevent his extravagance, & I am
quite convinced that of late his expenditure has not ex-
ceeded what I have allowed him - While in the new lodg-
ing house which I had transferred him, I behaved so
much more correctly that I listened to his urgent intreats
& allowed him to go into lodgings with a strict allowance
and a high opinion. Unfortunately however that school
has unfortunately been sent to Paris by his Father & George
is now alone. I shall however watch him as narrowly
as I can, & by limiting his allowance, & requiring accounts

from him that he has incurred no debt before a second
instalment is paid to him, I hope I shall be able to con-
vince him within the time you originally propose -- Indeed
I believe he would now find it much more difficult than
formerly to contract debt, for his character is so blown
among the trades people that I believe he would not
find money to credit him. Besides I told him some
time ago, & after the receipt of the copy of your letter
to Wight, that my duty to you required me to assure him
that if ever I heard of his contracting out anything
of debt, I should immediately insert an advertisement
in every ^{new} ~~new~~ ^{new} paper that you would not hold yourself
responsible for any debt incurred after the date of your
advertisement, & I believe George knows well that I mean
have threatened any thing which would save your money
without keeping my word, & therefore I believe he will be
careful to avoid such an exposure. I fear he thinks
me very harsh, but I do hope you will believe that I have
been actuated by the single desire of acting the part of your
friend & most certainly I have not done one thing, which
I should not feel grateful to you for doing if you were so
pleas'd

Dear Mother
Dear 16th Nov 1855

My dear fellow: God bless you,
I wish you health to enjoy your
prosperity! This moment I
have your letter, & will not
let a post go away without
three lines & answers. Don't
write in a day or two. Hussy! They
never hit good luck, or a
wonder read!

I have **•*-c. r< /is:** garden
seeds which will go, by
Kangy tomorrow,
I am busy preparing my fauna
& want your commendations
at home, & help with a sub-
scription list in India.
Send me the insects. They will
serve for comparison, or to
bribe some of the selfish
philos at home!
Do tell me why you sent

Wm. M. S. P.
16th Nov 1855

sent just my letter to
Worsfield. I cannot do without
John's patronage of my work,
the natural

channel through which
I seek that patronage.
The tea plants are nearly
ready. Lots of them. Send
orders for dispatch—
the precise how, & where,
& by what route.

Again God bless you &
give you health & grace
to enjoy the good things
most affectionately & so
I sympathize with thee!
Ever Thine
Mcay

London Nov 25. 1835

My dear Walsh

rec^d with a note from
Mr. Mertens dated 2^d or
3^d of 1st June 1836

Our particular friend Edward
Mertens Jr is going to Calcutta
& I hes to introduce him to your
honourable Grandson ~~Mr~~ Mr M.
has been residing for some years
with our kind friend Mr John
Bates. & I shall be gratified
with your kind attentions to
him during his stay in Calcutta.

All your friends are well. -
Stokes is here at this moment play-
ing German air with Mrs B &
Mary. **• / 3** ~~is~~ is well. I saw him
by Mr Bentham a few days ago. Rayle
is busy over the last numbers of his
work. Lambert still lives & presides
over us as usual. The Duke is not
at home. Barker was here

^U-^w ^U

2 months ago I will , <zrx_u*+^ nothing
of Graham. - Brown has
published nothing these two
years - His Rept. in paper is still
in market. Concerning is going
in Jan to Venezuela on a voyage
for shells & plants.

Your plants are all laid in, but
Graham has done nothing with
your Leguminosae - He has
been working at Cyperaceae - &
illustrations of the

genera of ferns.

Of the Smiths we have t- £^C* nothing
left. Burnett of King College
is dead, & H. is a candidate
for the Chair. Prof Dr. Weston
your known is dead - & Dr. Wason
is dead or dying.

Your friends generally are well.

We are all well. How have you
got on, my dear?

I have not heard of your getting off
to Africa, nor of your going over
the paper -

It has been long since I saw Bob
the children write in love
to you - Mrs. Melville - Hannah
the babies.

God bless you

Mrs. Melville

Your aff. ever

Recd Solley's letter for Griffiths and Brown's small
packet to him at Ladysg on the day of receipt vizd 21st Dec^r 1835 I feel perfectly
In the assurance from the 21st Dec^r

We will no longer send to China for our tea
But all our future hopes be fixed on thee

My dear Sir

Great Common Street
17th of Dec^r 1835

My principal object in writing to
you this letter is that I may have the pleasure
of introducing to you my cousins Mr & Mrs
Spear. - Mrs Spear had the pleasure of
meeting you in London but as she has since
changed her name (she was then Miss Solley)
she was afraid you would not know her again;
she is anxious to have your acquaintance as she is
a pupil of Dr Lindley's and though not a very
zealous student. I have to thank

<h*#

which I believe come from you. I can
reposit upon them as we have not
examined them. I hear from

not send y

Yours truly that you have received your microscope
Mr Brown is anxious to know your opinion of it
he intends writing to you soon, in the mean time
he sends you a departing knife which you will
receive with this letter; he also sends you his congra-
-tulations and best wishes for your and Mr Wallis's
health and happiness and for the success of your
expedition in both which wishes I beg most cordially
to join. — I request your acceptance of a seal holder
which which Mr Spear has taken charge of for you,
and which is made to fit on to the stage of your
microscope; it is ^{for} examining Chara or any other
plants growing in water you will see a full de-
-scription of it in one of the Society of Arts microscope
pamphlets and I think you could the use of it
when you were in London

D^r Lindley has been appointed Professor of Botany
to the Apothecaries company I believe you would
have received a letter from him by this conveyance
but Mr Spear leaving London sooner than I
expected I was not able to let him know of it in
time. I think you will be a very lucky fellow
to be engaged in so pleasant an expedition
under your auspices I have written to congratulate

&^ ufatrf A&V *

i^^^&<^5^

the arrival of the box of seeds for which I believe I have
to thank you as well as him. And believe me
I am under your command I have troubled you with
nothing but business for him. I find I have no time

^&0&v As?t/J/Z&*

to write any more. I remain

My dear Sir

Your very sincerely

had been constantly exposed to the sun
but about a fortnight before our
arrival when running through some
severe squalls before crossing the line
accompanied with heavy rain - the
rain penetrated through the top
where it fell on to the box & filled
it with water which when discovered
by me, I merely laid the box on its
side until all the water had drained
out after this, ^{most} the plants blossomed.

Mr. Loddige wishes to repeat the experience
at my return & I shall always be
happy to contribute my mite
towards the promotion of science
however humble my efforts -

The cones of the Himalayas - I was very
much pleased by a ^{kindness of Redford} Lady who was collecting
^{informing} a Percy & I should be much indebted to
you at any future period to enable me
to add to her collection - I trust your
enquiries after the Tea Plant will
be attended with success

I remain

My dear Sir

Yours very sincerely

Alex. Humming

Dr. Wallis.

My dear Mr. [?]

You forget the
Sea plants I send
me no instructions.
I have some 50 ready.
Say where they are to
go, & by what route,
& how? You mentioned
Jenkins: I know not
how to seek & find
him. Tell me, & I forward
the plants. Again I wish
you joy of some good luck.
Yours
A. M. Cross
