

Dr.

Wallich's

Compend.

1841
I

The first thing I noticed when I stepped
 out of the plane was the cool air. It felt
 like a fresh blanket. The landscape below
 was a mix of rolling hills and patches of
 green fields. The sun was just starting to
 set, casting a golden glow over everything.
 I took a deep breath and felt a sense of
 peace. It was exactly what I needed after
 a long day. The car ride home was quiet.
 I thought about the day and how it had
 gone. Everything seemed to fall into place.
 The night sky was filled with stars. It
 was beautiful. I closed my eyes and
 fell asleep. The morning sun woke me up.
 I felt refreshed and ready for the day
 ahead. The world was still so beautiful.
 I smiled and started my day.

The 13th June 1841
Dear Mother
I received your kind letter
of the 10th and was glad to
hear from you. I am well
and hope these few lines
will find you the same.
I have not much news to
write at present. I am
still at school and
study hard. I have
just finished my Latin
class and am now
beginning my Greek.
I have also been
reading some of the
new books that have
just come out. I
have not time to
write you more
at present. I will
write again soon.
I am, my dear Mother,
affectionately,
Your son,
John Smith

[The page contains extremely faint, illegible handwritten text, likely bleed-through from the reverse side of the paper. The text is mirrored and difficult to decipher.]

I have been thinking of you very much lately
 and wondering how you are getting on
 I hope you are well and happy
 I have not much news to write at present
 but I am sure you will be glad to hear
 from me when I write again
 I must close for this time
 Give my love to all the folks
 I am your affectionate friend
 John Doe

The first thing I noticed when I stepped
 out of the plane was the fresh air. It
 felt like a warm blanket after a long
 flight. The sun was shining brightly,
 and the birds were chirping happily.
 I took a deep breath and felt my
 chest expand. The world was so
 beautiful and so full of life. I
 couldn't help but smile. It was
 exactly what I needed. I had been
 so stressed and so busy, but now
 I was here, in this beautiful place.
 I had found my peace. I had found
 my home. I had found myself.

[The page contains several paragraphs of handwritten text, which is mirrored and thus illegible.]

-w

Handwritten text, likely bleed-through from the reverse side of the page. The text is extremely faint and illegible. A large, dark, illegible signature or name is visible in the center of the page.

My dear Sir

I have metted one of two copies
of your printed report to the Superintendent
of the Bot Garden here, requesting him to
report what plants of those enumerated
he had not got and were desirable to
be introduced here - I now enclose
a copy of his report and I should feel
much obliged by your sending a supply
of the plants which he considers desirable.
The Agents of his Govt in Calcutta are
Gillanders & Arbuthnot.

Yours very truly
A. Cunningham

Dr. Wallich

12/1 1041

My dear O. Halliwell,

I believe that I mentioned
in my last note that Mrs
Mrs Miller was going home
with her daughter in the
plantation on the 20th Inst.

She is very anxious that
her daughter should see
your lovely gardens before

departing and if you
would ^{permit} them to pay you

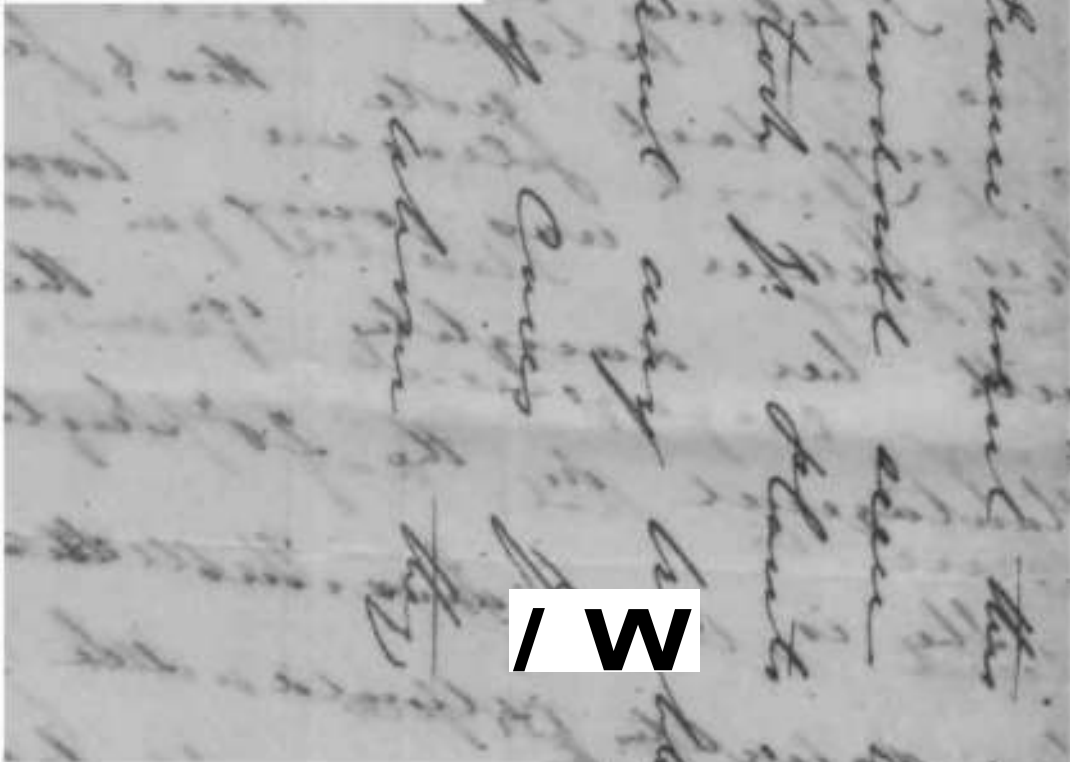

a visit on Friday next

Mr Miller says we say she

O. Halliwell

she should like "very much"
to drive down and just
walk through the Gardens
where her beloved husband
had such pleasure in
walking. - Should you have
any engagements from
home on that day pray
don't allow Mrs. Sellers
to interfere with you
on any account, It may
also be painful for you
to witness Mrs. Sellers disagree.

Believe me your very kind

Adm. J. Gardner

12 Lang 1841

My dear Mr. Halliwell

I shall be very
glad to take the
botanical notes and
our special interest
in the Chinese; could
you send me the
Boreas; the Chinese
leaves the place

Dr. Halliwell

Botanist's Garden

that that movement
receives your note
I'm glad to find my
appreciations are understood
yet I fear some deception
has been practiced about
the size of the boats, I
note the one I would
cannot built old; as some
as the boats are like
I may desire your people
to order them up to
Bunkers Gutkat, on the
Canal. With regards from
Cocopines,

My regards to
Yours
E. R. D.

Friday Evening
I believe

My dear Mr. Bunker

When I was
down seeing the Boats

I. of which I write
to you last evening, I
thought they'll inform
me that, the boats

boats were not being
built on the Boat,
I that you had sent
the sample with a
note

you see, I have not
received it yet but
I expect it will be
sent within a few
days. The Board
has the matter, I
trust, settled, and
will be glad to
hear from you
again. The Board
is very anxious
to hear from
you.

Yours to the
Secretary, that it
will be a good
idea to visit the
Board in the
winter. The
Board will be
in the city
at that time.
I am, Sir,
Yours,
J. H. Murray

I am, Sir,

Charles C. Smith
July 1841

Extract of a letter from the Secy to the General Council
Public Instruction to the Secy to the Govt of India in
the General Secretariat No 8 of the 6th January 1848
communicated to the Council of the College
of Arts in Dr. Nichol's letter No 101 of the 28th January
1844

13. The Gov. Genl in Council has been sorry also to learn
that for a very considerable period, the lectures upon Botany
had been omitted. The Gov. Genl cannot accept Dr. Nichol's
Excuse that the distance of his Residence & his avocations
in his Garden & the Tea Committee, have made it nearly
to impossible for him to fulfil his Engagement. He should
not in this manner have absolved himself from the duties
entrusted to him, nor should the visiting Committee or College
Council have allowed the omission without bringing it to the
notice of the Gov. Genl. It is not yet that a complete & correct
course of his lectures in Botany should be carried through at
the College. There is no less use of this, & an accurate know-
ledge of minute dissections of long Catalogues of Plants
will be generally of far less value to
many other branches of the Geological Sciences. That it
might be expected for Dr. Nichol that
each term of study delivers a number
of lectures

as the Prime the Medical Students & some Members of
the Disputation & therefore & perfection of that
to spend a general night with the Science and
look to the good of the system & those who might
be to do good for further the general Research.

Mr. Smith has been with the pleasure of the
the whole of the same day doctor. —

Extract

of the report
of the Secretary of the
Board of Education
in the General Report
No. 9 of the 6th January
1844 to the Secretary
of the Council of
Public Instruction

3

I have thought it best writing to you on the subject
 of the *Thymifolium* substituting it -

Thymifolium continues, perhaps to retain good health,
 your excellent piece with characteristic enjoyment
 your way too, but change is the name and of

My dear Sir,
 Yours very faithfully,
 Wm. T. Miller

Mr. T. Miller writes me by the *Arctonotus* that
 morning. It seems that of the foliage of the
Arctonotus, and Roger's *Tea*, differ; you may be
 so in the manner of sending a specimen of
 each - I have not of you before seen a specimen
 of the *Arctonotus* for 1814 - I brought 2 pounds
 of *Thymifolium* taken, I think, to form some of
 the basal parts of the *Sumbac* part of you then
 if not, I am quite sure Sir W. T. Miller could send
 you a piece that you may receive your own
 word on it perhaps -

My dear Sir,
 No 23 July

I am led again to trouble
 in your good office, in the name of an object,
 which I submit, not, will readily reject your
 feelings in favour of the successful as in plants such
 without, however, you with a more lengthy *Arctonotus*
 than in the *Arctonotus*. I propose to name *Arctonotus* the
 new one distinct of my *Arctonotus* and *Arctonotus* *Arctonotus*,
 the *Arctonotus*, having of 20. etc. I say, to add to
 a valuable series of specimens of every description
 of wood, *Arctonotus* or *Arctonotus* known to have been
 used to this *Arctonotus* from the *Arctonotus* *Arctonotus*, in
 some of the *Arctonotus* - but you will probably
 learn with some surprise that, although he has
 used it in obtaining the *Arctonotus* of
 the *Arctonotus*, and in the *Arctonotus* of
 in *Arctonotus*, in a *Arctonotus* *Arctonotus*, arranged
 at the *Arctonotus*, in the *Arctonotus*, in a *Arctonotus*
 that, although *Arctonotus* *Arctonotus*, in a *Arctonotus*
Arctonotus *Arctonotus*

London, 19th Dec 1841

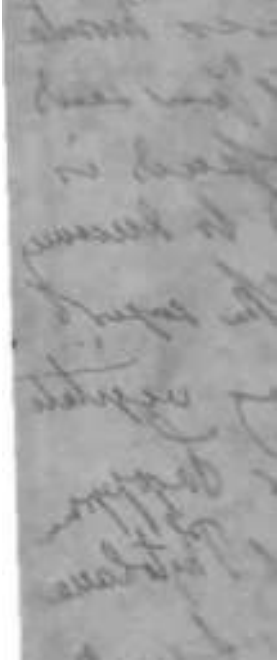

Dear Sir
I have the honor to acknowledge the receipt of your letter of the 17th inst. in relation to the business of the Bank of England. I have the pleasure to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Your obedient servant,
J. G. Smith

Yours faithfully,
J. G. Smith

Private
reply 24 Feb 1892

As I have been in the habit of thinking of you since
the 25th Dec. and the week of absence was
unpleasant. I believe the plant will be well from seed
as accepted, but I do not think it is
sufficiently a species yet and may tend to become
detached species. I hope to have a copy of the
Columbian report soon, hoping they may be
available, also some of the specimens in the
herbarium, also some of the specimens of the
plants in the collection in the herbarium and I will
be happy to see them. I will be glad to see
the specimens in the herbarium and I will be glad
to see them.

I cannot tell you how acceptable will be the
gift of the specimens. I am sure they will be
of great value to you. I have seen the
specimens and I have seen the results perhaps to
be expected. I have seen the specimens that are
near the highly interesting specimens here. I
will be glad to see them.

plants used
solely at that
D. Buchanan, making
a difference of 60
plants only!

287

The following is a list of the plants used in the
experiment. The plants were divided into two
groups. The first group consisted of 300 plants
and the second group consisted of 300 plants.
The plants in the first group were used for
the purpose of determining the effect of
the treatment on the growth of the plants.
The plants in the second group were used
for the purpose of determining the effect of
the treatment on the yield of the plants.
The results of the experiment are given in
the following table. The first column shows
the number of plants in each group. The
second column shows the yield of the plants
in each group. The third column shows the
difference in yield between the two groups.
The results show that the treatment had
a significant effect on the yield of the plants.
The yield of the plants in the first group
was significantly higher than the yield of
the plants in the second group.

I have the pleasure to enclose herewith
the enclosed for you on behalf of the local committee
I have a pleasure of your return, please to
inform me they are happy, and I hope they
will prove worthy of your acceptance. I should
like to see you to discuss a lot of the present

On the 11th inst. night I had occasion
to call on of about 100 people, and was
very glad to see you. By the Park Trust's
the 'Madagascar' game has been sent to
you, and you may find it in a letter
which I have sent on the 6th inst.

Yours sincerely
W. W. R. R.

W. W. R. R.
Hartley

Vol. 1. Part 1. Page 20 of 21

The first part of the book is devoted to a general
 description of the country and its resources. It
 contains a detailed account of the various
 rivers, lakes, and mountains which form the
 natural features of the region. The author
 also describes the climate, the soil, and the
 principal occupations of the inhabitants.
 The second part of the book is a history of
 the country from the earliest times to the
 present. It traces the progress of the
 nation through its various stages of
 civilization, and shows how it has
 gradually become one of the most
 powerful and influential nations of the
 world. The author also discusses the
 political, social, and economic
 conditions of the country at the
 present time, and offers his views
 on the future prospects of the
 nation.

I have just received your letter of the 14th
 and am glad to hear that you are
 well. I am at present in the
 country and have not much news to
 write at present. I shall be home
 in a few days and will then
 write you more fully. I am
 very affectionately
 yours
 Wm. Lloyd Garrison

Handwritten text, likely a letter or document, written in cursive script. The text is extremely faint and illegible due to the quality of the scan. It appears to be a formal communication, possibly a letter of introduction or a business document, given the structure and the use of phrases like "I have the honor" and "I am, Sir, your obedient servant".

[The page contains several lines of extremely faint, illegible handwriting, likely bleed-through from the reverse side of the paper. The text is too light to transcribe accurately.]

London, 23 January 1841

23 January 1841

I had the honor to receive yesterday
from Mr. [unclear] (at [unclear]) announcing to me that
the Society of Friends on the Island of
Trinidad has been pleased to place my
name among its corresponding members

The honor thus conferred upon me is
to highly prized. It is enhanced by the fact
that I should be so honored has been
communicated to me by a most valued
friend, who has very often, and for a
long period placed me personally as
well as the garden under my charge, under
my great obligations. This pledge a

... as well as the other. I will be sent
to you to report every possible incident
of policy, or even in a small degree the success
of the society for a week, by making reports
of what I have or learn. Be pleased they
should make these my sincere sentiments
known to your society, together with the expression
of my cordial respect & affection.

... as I have for some time now
been able to study to spare out the 1823 edition
of your travels and have been found with
the map of highly interesting, practical and
useful information about us already
collected & given to the world. His accounts
are with you, your society prosper
and flourish through every day.

There is a deep understanding in our country
of the state of the world.
Respectfully,
Deputee

to be opened. And also, I had another one for more
of this kind in a well packed envelope
from Mr. Taylor at the India House, by the Bristol mail recently arrived
The letter to the 18th November was almost destroyed by the wet water
soaking both to the lid-papers and to the inside of the envelope some
of the paper, and some it not for the successful condition - which the letter
was estimated should have yielded some to make it of use, as it
contained matters of much interest to me which my excellent
friend writes a great deal. Some of the letters must have been very fresh
and by their decomposition must have suffered destruction, for the
whole in a packet formed one wet mass from which it is
impossible to extract anything. As in the case of the long paper
of the package was as perfectly fresh from any
moisture -

...

I should have been very anxious to see you if I could have
found a chance, but I had to attend to the all-day
session on a double case which had to be taken and at one o'clock
to be present at a College Council on urgent matters, required by
the Council of Public Instruction relative to the University
the duties of each of the Professors. It is in connection with the
case, as far as mine are concerned, that I venture to lay before you
a statement, which if I do not quite
mistake, has occupied a week to ... *f. In
point of fact as I had the honor of mentioning personally
there is no peculiar feature in my function as one of the pro-
fessors of the College, which I should feel that
it should be supported in adhering to, by your Lordship's out-
spoken and concerned.

My duties at the Medical College consist in
teaching of Anatomy in Introductory and Medical
Anatomy. I recommended a course of lectures on the History of
Anatomy to the students of the College.

Al & -

young ships, consisting of 44 students, down here, and at
the end of the day, the land passed, from four in the afternoon
to 6 o'clock, on river to have practical demonstrations and
the habit of putting questions to the students.

...to repeat his memories, and after
my first course I mean to devote some hours to a paper
...after which I propose commencing immediately
upon my second course of Medical Botany. Now and then
I devote an hour or two to Microscopic matters which are both
useful and afford a wholesome relief during the life-
laborious portion of introductory studies. Upon the whole I
quite sure that it would very much gladden your labors
and give to the delight which the students, Christian
Lander as well as the American manifestly take in these
pursuits and when the theatre is well supplied with the objects
with abundance of living specimens of various
kinds, from the garden, this is a laborious and
demanding, after the lecture is over, and during the progress
of the dissection during the leisure hours of the students. The dissection
of the microscope is a matter of consequence to

this institution enables me to point out to them in the spot
Can it be a sin read, wherever what is the proper
Sunday - reading - to read also a little botany on that
day? It is at least worthy to read in a page of nature
than in a I allude chiefly to our Chic
-lean Medical Students, as to the others I take it for
granted, as

CAVA

/ * + ^

are quite well employed and as far from having any
down hand on Sundays, as they would be any where out
of the garden -

But my Lord, how do I caluminate you, by your
eminent presence during one of these Sunday demonstrations of
Botany in this garden - that is providing some Lordship
do not disapprove of them, in which case I must truly
discontinue

of it and as far as regard the student, my task is too simple
to devote any week-days **Zfc^^r-|^ £.*** I am ill &
wrote me this for, in that view nothing more nor less than a
testimony of attachment towards an Institution **r w** which I should
not to decline is in my humble opinion the most interesting
important and successful - and the most interesting I would
add, in all India. If I am not wrong individually in admiring
the student with the garden and accompanying them over these
grounds or perhaps to fix upon these minds, perhaps, which
has been brought before them during the regular hours of
lectures - I should think there can be no wrong in their
being in the College on that score. Besides Sunday is
the day when families and visitors generally come down
here for a little fresh air and relaxation. Must I shut
the entrance to them & wrought to be distant from which
a few pleasant and interesting rational students, because
independent of a little fresh air, the particular relaxation
into the young mind can be improper. I am happy
to say that pursuit of this nature are extremely
congenial to the nature of the Country. And I may
have to spare and was better qualified than
I have any pretension of being - I would make
splendid testimonials out of some of the Students.

I beg to apologise for the great liberty
taken before them in
Yours

Dr. Professor Wallich

Sturman
Laguerre

30 January 1844

Dear Sir,
I have the honor to acknowledge the receipt of your letter of the 25th inst. in relation to the above named subject. I have the pleasure to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Your obedient servant,
J. M. Smith

Handwritten text, likely a letter or document, written in cursive script. The text is extremely faint and illegible due to the quality of the scan. The page appears to be a single sheet of paper with a vertical crease on the right side. There are some faint markings at the top left and top right corners, possibly indicating page numbers or initials. The overall appearance is that of an old, faded document.

J. K. H. W.

présidents:
 Le duc de Bassano,
 Le marquis de Saxe-Cobourg,
 L'Amiral Baudin,
 Le comte de Lamoignon,
 Aide-de-camp du Roi,
 Le comte de Tournon,
 grand d'Espagne.

PRÉSIDENCE
 Secrétariat général,

Vous l'honneur m'enverrez,

J'ai l'honneur de vous remercier que
 désigné avec l'affection des membres du
 Conseil Supérieur de l'Institut de l'Afrique
 par son Comité de présentation, vous
 en avez été proposé "Membre ~~correspondant~~"

PARIS.
 N° 6645

Il attacherais d'autant plus
 de prix à votre adhésion qu'il est
 fondé dans le but de protéger l'humanité
 la race africaine, de civiliser l'Afrique,
 avec l'appui des gouvernements européens,
 l'assistance des philanthropes, des économistes,
 & l'expérience pratique des voyageurs &
 des missionnaires.

&/ .fj

Comme dans vos
 espérances qu'il inscriera prochainement
 votre nom sur un tableau parmi
 ceux de ses membres les plus distingués.

Le Conseil, après avoir reçu votre
 adhésion, aura l'honneur de vous faire
 parvenir votre diplôme.

Revenez, l'honneur m'enverrez
 l'assurance de ma haute considération.

Le Secrétaire Général hon.
Antoine

Wallon 109. St. 2. 6. Institut. 7. France.

INSTITUT D'AFRIQUE.

la fonJittfiun.

ARTICLE I^{er}. — L'Institut est fonde dans le but de contribuer a la civilisation et a la colonisation universelle de l'Afrique par l'Agriculture, le Commerce, l'Industrie, les Arts, les Lettres et les Sciences.

a. — Il a pour but de perfectionner, d'éclairer et de développer la Race Africaine.

3. — Fonde dans l'intérêt de toutes les nations, l'Institut d'Afrique embrasse dans ses limites toutes les contrées qui forment cette partie du globe.

4. — Il se compose de sections appartenant aux nations des deux continents.

5. — Chaque section a un ou plusieurs présidents, choisis parmi les hommes les plus considérables de chaque contrée. Cinq membres constituent, à l'étranger, une section correspondante chargée d'éclairer l'Institut sur les besoins relatifs à chaque point de l'Afrique.

6. — Chaque section agit *pour* l'Afrique, la direction de l'Institut, conformément aux principes les plus propres à arriver à la civilisation et à la colonisation, et, sous le rapport religieux, chacune conformément à sa foi.

7. — Chaque nation est représentée par l'Institut d'Afrique, siégeant à Paris, par un Président étranger qui, avec le Président titulaire honoraire, est respectivement chargé de la signature du diplôme de sa section,

8. — L'Institut représente et agit auprès des gouvernements les intérêts de l'Afrique, il répand dans le monde, à l'aide de livres, de conférences de colonisation, et de documents relatifs aux meilleures institutions sociales, les lumières de la civilisation européenne,

9. CLASSES. COTISATIONS.

L'Institut est composé d'un

nombre de membres nationaux et étrangers divisés en quatre classes.

. que veut bien me donner l'Institut d'Afrique en *we* nommant President. C'est une grande recompense de mes efforts j'our 61 re uille a mon pays et agreable a mes comiiairiotés. — (PanY, 17 juin 1833.)

LE nuc DE DOCDEAUVILLE.

M. le vice-amiral ROSAMEL, Ministre de la Marine et des Colonies. — J'ai regii 3a lettre < j'ue vous m'avez fait Thonneur de m'ficrire pour m'annoncer que le eooaeU scicntiBque de l'liistitut d'Afrique a bien voulu me nomraer l'un de scs Presidents honoraires. En m'admeltant a un si haul rang dans son sein, cet illus-corps me donne le t&noignagc d'un sentiment qui m'houorc beaucoup. Veuillez filre, • Monsieur, aupris du conseil scieniifique, Tin-terprcte de ma profonde gratitude, et recevoir l>our vous mon remerclment partieulier des expressions flatteuses avec lcsquelles vous m'avez fait connailre sa decision.

ROSAMEL.

M. le L-G³ Marquis DE FiitGEvrLLE, — Test avec une veritable reconnaissance que j'ai appris qu'oa a bien voulu n'agreger a line soci^lfi dont le but est si louable, el votre iiterniediatrc, monsieur, angmenie le prix de cotte distinction.

LEWDEFREGEVJLLE, LIEUTEWAHT-

M. ISAAC LOCVERTUUE. — J'arccpte avecle pins grand plaisir le litre doiit m'honore l'lo-stfiiit d'Afrii(ue, par l'entremise de son digne sea-etaire. Je consencrai toute ma vie le sou-venir de cette marque de distinction el de bien-veillance.

ISAAC LOL'VERTCRE.

M. LAiSNfeDEVILLEvtQUE^J'accepteavec plaisir ma nomination comruc Qienihre de Via-siiiut d'Afrine. Veuillez faire agrter mes res-pcciiienx remerelments au Conseil et a ax mem-bres qui comiiosetit cettc association, scion moi, emhiemireirt natioiiale et patriotique.

General W. B. Skill

Feb 11

Major General Walker

Dear Sir

Letter I will forward it that
said. You are welcome
2nd February John M. Caldwell

Mr. Prof. Paul Walker
My dear Professor
Feb 11

I have got small
to give an account in writing
for Dr. Walker's information,
of what he knows or can see
to take in the way of gardening.
I think it not unlikely that the
person who has been speaking
of him to the Doctor may be
a man formerly of the 9th and
temporarily employed about
the garden - if so he is little
competent to judge, not being
himself a gardener. But it
will be for the Doctor to decide
in the matter, without any

quick about it myself
 I can only say that double
 is a better way they nearly
 unperformed and suitable
 of making being
 and of following
 and direction he
 may receive. I mentioned
 before that the state made
 to commission it over to
 give up his claim upon
 the device; he said he
 per making a trial of the
 which he said he would
 see to the right like it

and also to enable Dr
 Hall to pick to judge if he be
 qualified to see he take
 it. In the event of Dr
 He working to give him
 the opportunity of showing
 what he can do, I should
 not be afraid that the law
 in Chief would make any
 serious objection to granting
 to a government man who
 would voluntarily be well
 provided for if he proved
 competent to take his dis-
 charge. I suppose you can find
 in the opinion of the Public Justice
 City of the government in the

I have been thinking for some days of many
 things which have come in the way of
 education that it is not taken upon some
 one or the same kind of footing. It is not
 intended to be put in the same class as
 ordinary (university) parties. It is not
 the same as the

... feel interested that you will
 interpret my meaning in reading than the average
 one of the body of the general gathering of
 persons in that country, that is, that
 the Government will be obliged at a date

... at a very great inconvenience to the
 ... of a top stone that is, more
 ... to be that work has been
 ... so faithfully
 ... upon a particular
 ... however

152
The first thing I noticed
when I stepped out of the
plane was the fresh air. It
felt like a warm blanket
after a long flight. The
ground below was a mix of
green fields and small towns.
I had heard that the weather
was perfect, and it didn't
disappoint. The people were
friendly and the food was
delicious. It was a great
start to my vacation. I
was looking forward to
exploring the beautiful
scenery and the rich culture.
The trip was exactly what
I needed. I was going to
relax and enjoy the moment.
It was a wonderful experience.
I had never been before
and it was so exciting. I
was going to have a great
time. The trip was perfect.
I was going to have a great
time. The trip was perfect.
I was going to have a great
time. The trip was perfect.

The first part of the letter is devoted to a discussion of the
 various aspects of the problem. It is shown that the
 various aspects of the problem are interrelated and
 that a comprehensive approach is necessary for a
 complete understanding of the situation. The author
 then proceeds to discuss the various aspects of the
 problem in detail, showing how they are interrelated
 and how they can be approached in a comprehensive
 manner. The author concludes by stating that the
 various aspects of the problem are interrelated and
 that a comprehensive approach is necessary for a
 complete understanding of the situation.

The first part of the book is devoted to a general
history of the world, from the beginning of
time to the present day. It is written in a
clear and concise style, and is well
adapted for the use of students in
schools and colleges. The author has
drawn upon his extensive knowledge
of the subject, and has presented the
facts in a logical and systematic
manner. The book is a valuable
reference work, and is highly
recommended to all who are
interested in the history of the
world.

I have not seen so much of you since
 you were in the hospital. I am
 glad to hear you are well. I
 have been very busy lately. I
 have been in the hospital for
 some time. I have been very
 busy with my work. I have
 been in the hospital for some
 time. I have been very busy
 with my work. I have been in
 the hospital for some time. I
 have been very busy with my
 work. I have been in the
 hospital for some time. I have
 been very busy with my work.

Kiddapour 6th Feb 1841.

My dear Dr. Welch,

Government but
writes a good hand & papers

fair the **tU&+ . Xtr-** money has
papers thro' his hands, & no pe-

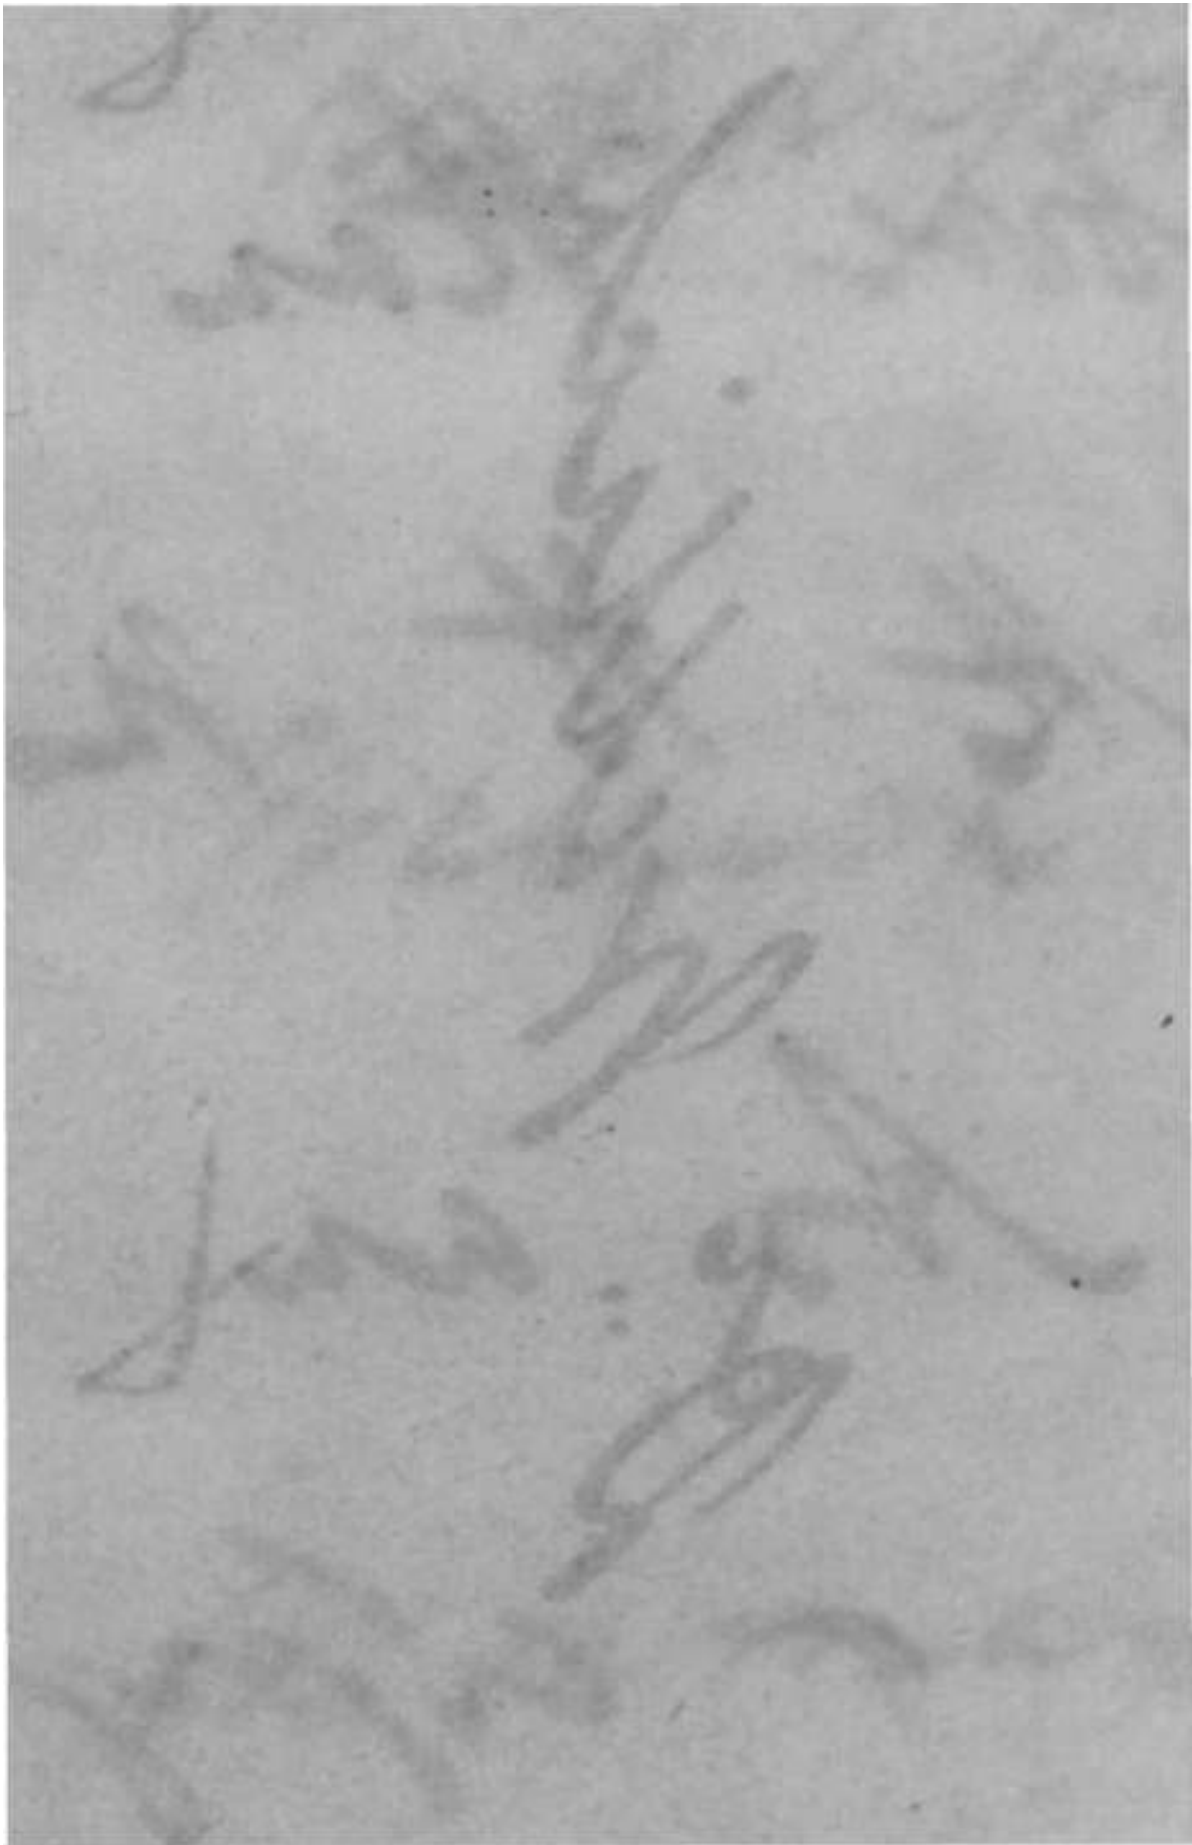

-cuniary transactions confided
to him while in my office - so

I can say nothing about his
honesty, which however I believe

to be rather above than below par as
compared with the majority of his
countrymen. As an index, the
paper-writer & copyist I found
him very useful, & have found
it secure in testifying to his
regularity & attention to his
duties.

With my kind wishes to
the ladies cordially yours, Dear Sir,

Yours Obedient Servant
D. Palkiel
John Buean

Madam

Henry A. Gray

instead of a month's supply

of your kind & generous

invitation to spend a few

days with you I am

thinking of taking a run

down in the near future

& back - I have nothing to

Feb 89

My dear Madam

The baskets of apples

sent me were received in

capital order I have - kindly

let me have Mr. Knott's

letter if you can spare

it as I shall have to

submit its contents in

good time. If you can

reply we will be pleased

in the state of the
safety it would be
most acceptable

I hope we shall have
the pleasure of seeing
you on Wednesday.

I have a great satisfaction
of knowing that
the safety in the
wise - the containing

will be all our English
friends in the
book of the -

A few days yet a cut
made out by the
people - perhaps the

the very same safety
would be a pleasure
in the list.

How are you? I am
about again but feeling
the same - perhaps

rev 1912 141

London the 14th of June 1841

My dear & most considerate friend, to
find that by culpable silence, and protracted delay
so long a period, I have allowed you to feel distressed
& anxious in respect to the Commission you have
so kindly undertaken to get executed for me - by
your kind letter of the 17th inst. written with so much
friend of consideration on the day after receipt of
one from Royle constrains me to break at once
through my very respectable habits of privacy
& reticence, & relieve you at once from all idea
of my having in any way felt anxious about
the non-arrival of the microscope - You will
be aware

£ — * > ** < f res ^ £ > ^ £ — 7 - s * ~ ^ ? Z ~

able to secure from
of any official labours - and assured of
been the fact that had it to the present time,
had I already received it, it would have been
out of my power to have made use of it.
which follows enables me to make every
allowance for Dr. Royle - who must doubtless
be so constantly engaged with the in-
portant matters in which he has taken
of the leading part, as to have
but little time for correspondence - Hence
we doubt however, that in all which is effected
towards securing the satisfactory completion
of the Commission he will have done
all in his power & all that could be

ryzf***~Y'

iA £ 52 L ' A > ~ * . - >

I would therefore be

of you, my valued friend, to lay aside
all concern, resting assured that I feel
no impatience - *A^XP~ JU-d^^itf^'
thanks for the great kindness you have
shown in undertaking a commission
which I could not otherwise have had
executed - I exceedingly regret that the
matter should have caused you a
moment's anxiety.

I have said that I have had no leisure
for botanical pursuits - and in truth
having taken charge of a new dis-
-trict in Dec-1894, with which I had to
make myself acquainted - having then
been kept out in camp until the 14th
June - and had in consequence an un-
-welcome arrears of hut work to get through
during the rains - while my marshing
commenced again in the beginning of
Nov^r & will continue until the end
of May, I have had no time consci-
-entiously to lay aside for either relax-
-ation or to correspondence. beyond
what might be absolutely ^{ind}isable -
and thus it is ^{>^} that your most friendly
of the 24th June has remained

£/£

so great a length of time unacknowledged.
I really trust amend - or shall justly for-
-feit your esteem - & that of others to whom
I have behaved equally ill - During this
long period, I must have almost forgot the
the name of Botany, but for the ar-
-rival from time to time of I work
- & I trust be yourself - in

was procured for me through your
kindness - Many besides myself & the
Jubbulpore have delighted to see
these works; & I trust profited by
them -

In a recent matter, however, I have
been obliged to turn some attention
no falling in with my official duties some
flax I had down according to the express
directions of Mr. Woodhouse, who was
then in his way to Calcutta & passed
through Jubbulpore - however he
found too late, -
wooly, & we were
of it - some
to show with
paper - season
- giving of the

* ^ -
* ^

^ ^ ^ jE*L**

^ - T ^

able to make anything
however, I was used
my own hands at the
that is, just at the be-
gins - and the fibre

obtained for it we considered parties
- Carl good - I have just sent a bundle
of it down to Spry per Steamer in order
that it may be fairly tested by judges
there I have put up with it a piece
of cloth or canvas unwashed & also
washed, which have been made up
by the Shag prisoners in our school
Industry - though these last are not
yet the proper thing - Pray kindly
inform Spry with my very kind
regards of this dispatch, but I should
not be able to write to him in time
and tell him that I am anxious
to know what value is put upon
it in Calcutta for export, or what
price it would realize at home
in order that we may judge when

iv- t**^*~*

to prove remunerative -
of cotton I regret to say that
I could not procure in time for
the last sowing a sufficiency of
the seeds of any of the reported
kinds - but I have brought a
considerable crop of the country
cotton to maturity & have had it

brushed with the greatest care & cleanliness allowable with a view of sending a bale of this also down to Spinn in order that its value as an article of export may be ascertained - as this appears to me a very great point as a first step.

it were brought to the notice of the Socy, & great I saw back felt here to the introduction of improvements ~~made~~ amongst the people, and I should think the same would hold more or less in other points also, that in the Bazar of the country little or

price is made in price between the kinds of cotton & still less in any respect paid to its cleanliness or otherwise. which last point I believe tells more than any other in the English market. The cultivators here have repeatedly told me that if there were any Capitalist

at once give them say one rupee per hundred more for clean cotton than the current rate of the season, they would at once take measures for preserving the clean portion of their cotton apart from that which has not mixed with it - and I have no doubt that the same will hold good likewise in regard to sowing the seeds of the superior kinds of cotton. But at present whatever efforts they

\JL ^ ^ . ^ ^ ^ ^

^t^e^P *.<^£*

fa~ sd *<#&

£US~X& ---- *~—*~**^5s)

might make, it is certain that they
would have to sell the produce at
the very same rate realized by any
other cotton in the Bazar - which ne-
cessarily precludes them from moving
in the matter - and I think it will be
well worth the consideration of Govt in
the endeavours they are now setting on
foot for improving the cottons of the
country, whether it will not be well
to organize some plans for purchasing
at fair rates all improved cottons
that may be offered - until the sys-
tem shall have become so far matured
as to admit of private capitalists es-
tablishing dealings of this nature with
some certainty of a moderate return.

I have sent me up a splendid
supply of seeds - but unfortunately
from some mismanagement of my
agents on the river, they did not reach
Jabalpur until Jan. when I was
out in the district - I have had all
the wheat, oats, & Flax raised care-
fully, however, with every prospect
for irrigation - so that I trust this

liberally will not have been so far misapplied - but I fear the vegetable seed will now turn to little accounts & shall anxiously hope to receive some foreign cotton seed from him before the end of May -

I have in hope too, my friend, of receiving from you some tree seedling if a sufficiency of these should be available - or some seeds, if more easily

I think I have before mentioned to you an idea of some that some of our Hill sides are well adapted to this - Also may I hope for some Mahogany & other tree seeds - Sagar having heretofore benefited from the packages you formerly kind sent me - but as to Jabalpur - the Brazil beans you sent us so liberally, we have used some plantations - I had and would like for the American Cotton planters, as invaluable coadjutors in a but I grieve to think we have after all been denied them -

London - my father has been here
one on the London side for 2-3 weeks
I will be a resident there in the 10-12th

Dear Sir, I have been thinking of writing
to you for some time but have been
so busy that I could not find time

15th March
1841
Dear Sir
I have the honor to acknowledge
the receipt of your letter of the 10th
inst. in relation to the proposed
amendment to the Act for
the better regulation of the
London and Westminster
Highways. I have the honor
to inform you that the
Commissioners have considered
the same and have resolved
to assent to the same with
the following amendments
which I have the honor to
inclose to you. I am, Sir,
Dear Sir, your obedient
servant
J. M. Stoddart
10th March 1841

Very respectfully
I have the honor to inform
you that the Commission
have considered the
proposed amendment to
the Act for the better
regulation of the London
and Westminster Highways
and have resolved to
assent to the same with
the following amendments
which I have the honor
to inclose to you. I am,
Dear Sir, your obedient
servant
J. M. Stoddart
10th March 1841

✓

The apple-grafts from Mr. Hooper in report
 state you sent the graft to me in the
 winter in a long box with leaves, easy and
 the pot from the garden earth so dry
 that it looked as if it had been baked, and
 as hard as a stone armor. Only two of the
 grafts were alive and carried potted.
 I am quite certain that all the plants left
 to Hooper in a fine condition, but I am
 equally certain that some negligence has
 been committed in the way down, in
 as much as a great many of the plants
 were killed by the winter frost, which
 I have sent into the garden this
 year about the middle of the month. This
 is the first time I have ever seen
 such a loss of plants in winter.

But you may examine them yourself. It is
the perfect allowance, the plants & pieces
from a mass of water, which have been
during the latter part of the passage, even
passing from the perfectly dry and solid
state of the road or bank of snow, & the least
that has affected. Some of the above and
32 plants were to be seen - but only
a small proportion.

Enclosed is Mr. Brewer's report
on the Cases that arrived yesterday with
your note from Mr. Oakes. There was
also one very ^{plain} one, plant - layers, with a
great number of Mushrooms, which I doubt
from your case of *Parus ineditus*. In
consequence of the late not being so good
and get closed, the plants have early, with
a number of narrow branches. I think that
All that can be done, shall be effected to save
the

contract ordnance Carriages here, but to supply half wrought material
for their repairs ^{at the} magazines under the Presidency. - In
October last I sent my ^{order} ^{& 1/2} ^{or} ^{more} ^{to} ^{be} ^{sent} ^{to} ^{the} ^{Magazine} ^{at} ^{the} ^{Exp}
to purchase & cut up Sipes Timbers that might be available there
and sufficiently well seasoned for the purpose - he has since
last month I forthwith detached my servants to obtain more in
Gillotee Balam and I have myself visited various places within
the miles of this & bought all I could find calculated for my
purpose - I venture to trouble you with all this detail merely to show
that it is a difficult matter to procure the necessary Sipes here
for our heavy and constant demand now, and that a time will
arrive when a future Govt. will be embarrassed to obtain them
at any cost. - but these considerations, I deemed it my duty to offer
my plan for the plantation, and although I may continue to provide
all my wants until the end of next year when I contemplate retiring
from the service, I cannot help lamenting that what appeared
to me after having been nearly three years in my present office
a matter of some importance, should have been so summarily
disposed of and apparently deemed unworthy of your consideration
with the Govt., there is no reason to be attributed to my
management of this costly concern here - When I arrived,
the Sipes were supplied by the Commisariat Department
and after a long correspondence, I satisfied the Govt. Board
that no system of supply could be so expensive to the State
as that which obtained & the result has been in consequence
a saving of nearly one half by allowing me
to supply myself. I bought the day 500 Sipes
for 24 & 25 Rs each and the Sipes which were unfit for
ordnance purposes were sold by Auction for on the average
Rs 21.50 - as a valuable proof my bargain was a good one

many of the most sold for more than the best had cost. —
I think have answered, because there were many fine
specimens of the Saffers in all the surrounding Grounds & Gardens
and I was afraid had I selected a tract of the very best
lands which yield Potatoes, Wheat &c in this neighbourhood
the sacrifice of Revenue would have proved an insupportable
objection; again had we gone to any distance in
search of a desirable location, the thing might have failed
as I understand a similar attempt did in Ashland lately
for want of that constant superintendance which could
have insured success. — So the plantation would
have been a hobby in which I should have taken great
interest and been well happy to be guided by your advice
in the management. —

As to the operations of the spinning machinery
by the factories from the City of Manchester who are
employed they actually work and the value of wages are about one half
what the same description of artificers earn at Calcutta, and in
addition to the few Europeans there are mentioned there are
only 40 British on the Establishment who are the servants of the
state, but at all hands employed here ^{have} been many years engaged
under European superintendance in manufacturing by means of
of all descriptions, the work is as well performed as it could
be were the People paid by Govt. from one year end to the
other. — I remain Dear Sir with much respect

Sincerely Yours
G. Curzon

Dear Sir

We were very much obliged by your attention & constant supply to the apparatus which is procured, on behalf of Mr. Elliott of Palm Bay, in order to enable you to report the quality of the plants you imported from England for sale under British advertisement to members of the Horticultural Society. We observe that the site is advantageously placed on secondary rocks, viz, the Red & White Gneiss being abundant. The plants are in good condition, Mr. Elliott has a few plants which will be in the hands of you in a few days. We request the favor of you if you would send words by the way of Mr. Elliott's address for the plants.

1 *Hyacinth*
 2 *Hyacinth*
 1 *Hyacinth*, a very beautiful flower.
 4 *Hyacinth*
 1 *Hyacinth* rather large, & particularly full.
 1 *Hyacinth*, a large flower, some with
 flowers with long leaves, resembling the water
 in which I first discovered it. Of this I
 only found the first specimen once though
 the plant was in abundance every where.
 Several undescribed in my books, one
 greatly resembling in figure the *Spheropteris*
 habit of *Thalassia* ^{plant} *Sera*, excepting that the
Indusium instead of being open in the middle
 into two parts, opened like the

6^*^>e- ^

with a fringe -

One, very curious, growing in Guadalupe. Glaves &
in water, very **JC** tubular, but in some could
I perceive any sort, In all the specimens I ex-
amined, the **&+***-** plants spring from a small
round knob **&+***-** cuts of the frond, capped
like an indusium, but when removed under
my glass, consisting apparently merely of a leaf
but germinating as the parent plant does.
The plants was succulent, handsome in form
& I recognized it to be a Fern by the mode
by the formation of the stalk, when cut
transversely, & by its only head & shaft.

Another in full fructification exactly resem-
bled a moss plant, a parasite, leaves alternate
ly oval & linear, thick & tough like moss;
sort situated on the linear shaped frond.
round, ^{with} in the midst of a star shaped in-
dusium - I hope to find specimens of all
the above named plants.

The "**/&** *Asplenium tetragonum*" was common at
r **<** species of *Waltia* *brachy-*

The following is a list of the plants that I
have observed in Chitragong, they are
mostly what have attracted my attention
during my sojourn, in various parts of the
I see not the fruit of any, but some, I think
which I should imagine would have great
by command then. November 1797.

- 1. *Curatella* - very tall, in the greatest profusion.

indica -
stansata, & dentata the latter
by scarlet colour
bilicifolia.

- 2 Pilea trifolia
- 1 Santania indica
- 2 Bauhinia - yellow seed
- " Solanum, in great variety, mostly yellow.
- 1 Capparis -
- 1 Gopium - uncutivated, tall, cottony wood,
- 1 Papilion - Solanum the P. foetida, Wood
is pale white & of a very ill odour -
- 2 Brythia - scarlet & large
- 2 Morina - tree very pretty, a blue spike,
shape like a woman's head very soft, yet very
- 3 Momordia -
- 3 Eridia - Most beautiful, spikes large,
on column, a spotted blue & of a rare colour
- 1 Symplocos - a most delicate specimen
clad in bright green

In the same time I have observed no-
thing uncommon the principal genera

- Polypodium
- Adiantum
- Polypodium
- Polypodium
- Polypodium
- Polypodium
- Polypodium

One other Polypodium I forgot to mention
about 1 ft in height & in shape like a
miniature fern tree -

The books I have consulted have been
Gardner's Flor. India & London's Voy.

I should be extremely happy as far as my
ability extends to answer any questions
you may have on the dried specimens

of plants, or specimens of any kind
of any living specimens, or in forwarding
any genuine character of particular species,
viz, as far as my moderate knowledge of
the subject will admit of.

I have been thinking a great deal lately
 about the fact that the intelligent community
 in this country are all inquiring & yearning to know
 more about the rights of the colored people
 and tea matters are not of equal account to
 be thought upon with you in saying that neither
 is the main-spring of the population since it
 is those not with the result to another but
 of our state as well as our affairs to all
 things to the African population to be
 very poor for many because of the heavy tax
 that the state would have to pay but that
 our tea expense is a heavy tax of our
 state at the expense of the state. I understand
 that the fact is not correct. It is true that
 but it is not the thing which is the result
 of the state into these things matters have
 had no reply to my representation concerning
 the 6 pages of paper, and have the opinion
 that

July 18th 1844

My dear Mother
 I do not like the wilderness containing
 a hundred miles of the best vegetation
 to report on the expedition of the
 will be - weather on a part of the
 country open with you in saying that
 in the main - saying of the vegetation
 bottom has with the result of my
 performance on well as my mother
 again, with whom I am very
 you have been very kind to me
 that in fact I shall be very
 over the - expense - saying
 part of the work has been
 at the 100 not to be. In fact
 it is not the thing that I
 saying into her saying
 had only to my experience
 in a paper of the same
 that

and a statement in the defence papers is that
 in order to secure for plants intended for the
 profit - namely, with reference to the various
 types of cotton, and other similar plants, to
 an equal degree of effect, it would be
 the in order to get them to be a good result
 that the party is shown the first thing is to
 be a kind of a crop, to be for a long plant
 and a number of plants of the same kind, and
 the procedure is that the work is done, and
 on the other side, the plants are shown, and the
 character is arranged for the various
 and the same is to be done, and the
 depends on the little, the more the more
 little, and the delay that would have been
 in the arrival of the plants would have been
 fully understood on his occasion, for
 the same matter of work, and the
 persons are, especially on the subject
 when the cases have been examined

✓ Botanic Garden, Lapland 17th Feb 1845 345

My dear Park, I packed in well in the night of the 16th Feb. The letter I put in of 3rd Feb. reached me on the 26th all in such a state that it was with great difficulty I saved the letters, and the seeds were in some measure destroyed. Some of these must have been in the fleshy parts and the wet confined within the envelope both contaminated the rest. On the outside the packet was perfectly dry in appearance and was wrapped in black cloth for it was a cold day. (I think) I suspect is not good for seeds except if the seeds are not too old, which it keeps and the rest of the seeds - I equally much keeps them in.

Thanks my dear Park, for your trouble about the microscope. I & Mr. Lead have been in great anxiety on that matter, and have now put in some values found unnecessary to keep from that excessive information. Please Mr. Lead by writing Mr. Park to find the debt as soon as and it is possible, and pray pay our instructions to his most careful packing. Would you please let the superb microscope Park made for me 5 years ago suffer any much pain being mounted with the compound lenses, between the glazes. Truly Yrs
W. F. Nichol

My dear Mother

I have just received your letter of the 14th and was
 glad to hear from you. I am well and hope
 these few lines will find you the same. I
 have not much news to write at present. I
 am still in the same place and doing the
 same work. I have not much to write at
 present. I am well and hope these few
 lines will find you the same. I have not
 much news to write at present. I am still
 in the same place and doing the same work.
 I have not much to write at present. I
 am well and hope these few lines will find
 you the same. I have not much news to
 write at present. I am still in the same
 place and doing the same work. I have not
 much to write at present. I am well and
 hope these few lines will find you the same.
 I have not much news to write at present.

Yours affectionately
 Wm. Skippin

I have often written that some people are really
 for nothing but the pursuit of the present
 concerning the old flora of the year
 intentions of a study concerning them
 are mixed and often into neglect. Still
 also has much occurred in the past
 to avoid a comparison with what
 is now here the objects of an
 Eye. But for me, I have never
 seen any part of it. I expect
 to see it with great pleasure. I have
 been in various parts of the country
 a small number of people at all
 believe I am a great deal and
 have experienced what I have
 seen. I am sure that I have
 become

I have been thinking of you a great deal lately
 and wondering how you are getting on
 I hope you are well and happy
 I have been very busy lately
 but I will try to write you more often
 I love you very much
 Your affectionate friend
 [Name]

The first thing I noticed when I stepped
 out of the plane was the fresh air. It
 felt like a warm blanket after a long
 winter. The sun was shining brightly,
 and the birds were chirping happily.
 I took a deep breath and smiled.
 This was my first time in a new
 country, and I was excited. I had
 heard so much about the culture and
 the people. I was ready to explore
 and learn. I was ready to start
 a new chapter in my life. I was
 ready to embrace the unknown. I was
 ready to be brave. I was ready to
 be happy. I was ready to be me.

I have been thinking of you
 very much lately and wondering
 how you are getting on. I hope
 you are well and happy. I
 have been very busy lately
 with my work and have not
 had time to write to you
 as often as I would like to.
 I have been thinking of you
 very much lately and wondering
 how you are getting on. I hope
 you are well and happy. I
 have been very busy lately
 with my work and have not
 had time to write to you
 as often as I would like to.

With many apologies for this long silence
 and with the highest respects,
 Dear Madam,

Yours truly,

communicated to

the Council of the Medical College

of St. Andrews's letter of the

"f^**^).

7.

y
of us ever contemplated my succe-
ding a dozen lectures, or being placed
under any controul or orders as to
the manner in which I should
think proper to perform this
gratuitous service; much less
could I ever have imagined, that
after having exceeded the number
of demonstrations originally sug-
gested more than fourfold, I should
be subjected to a reprimand of
the most painful nature for
interrupting my attendance at
the Medical College during a
period, in which every spare
minute of my time was in

^ «.*-^ev
r f ^ ^ k

It t

asked

The 15th July last I was called upon
to state what duties I had performed
and what lectures I had given at
the Medical College, in pursuance
of my appointment to the profes-
sorship of Botany in February 1837.

In my letter to your address of
the 30th of June I entered into a
detailed and, I humbly submit
an adequate explanation of the
manner in which I had per-
formed my duties at the college.

1/+-< 3 ?*^tf <£*-<64fr **^.

On the 20th June 1839,
I had delivered 54 lectures at the
College, besides a good many prac-
tical demonstrations on Sundays
at this garden; but that since
then I had been prevented from
attending at the College during a
space of 4 months, in consequence

of my having to perform the Com-
mittee duties alluded to. In reply
I was informed in your communi-
cation No. 907 of the 7th October,
that my explanation showed that
my time had been usefully con-
sumed.

4. I deem it necessary to
repeat again in the most solemn
manner what I stated in my
explanatory letter, that the Com-
mittee duties I refer to, were ex-
ceedingly heavy, and required at
least as many week days of attend-
ance on the Chairman owing to
the peculiar way in which the
business of the Committee was
carried on, as I should under other
circumstances have devoted to
my College lectures; and that it
was

was in consequence absolutely
out of my power to perform any
other extra work, much less such
as required frequent absence from
my post here. I entreat his Lordship
to be pleased to cause strict enquiry
to be instituted with respect to
the nature and amount of those
duties, and that the office documents
transferred to the Revenue Depart-
ment on the dissolution of the
Committee, according to the schedule
which accompanied my letter to
that Department of the 30th September
last, may be thoroughly examined,
in order that my assertion that
those extra duties were exceedingly
heavy and laborious as well as
unpleasant, may be verified or disproved.
But if it should be found that I
have

have by no means exaggerated
the predicament in which I
was placed during the period I
speak of I would then most ear-
nestly implore his Lordship to
consider, that to be reprimanded,
as it has been my misfortune.

5

neglected
that

of my

^

occasionally at the Garden on Sundays, for a couple of hours, for the purpose of recapitulating under open heaven and with the growing plants before us, what I had previously endeavoured to impress on the minds of the class at the lecture room. I state my belief that this sort of mixed botanical

v

botanical studies was both use-
ful and attractive to the youths,
that it was best suited for the object
in view, and that I gladly contri-
buted the little sacrifice of my
own convenience on Sundays for
the good of an Institution, in the
welfare of which I take a very
deep interest. In the reply I was
honoured with his Lordship's answer

"T 2 A

tion, which his Lordship was
pleased to repeat verbally when
visiting the Garden -
on a Sunday to witness in person
how the boys got on -

O. I need scarcely observe
that there would be no objection
raised on my part to instructing
the students in botany at this
Garden. But I entreat that it
may be borne in mind, that the
College

College is fourteen miles distant from this Garden (I mean going and returning) - a circumstance which renders my attendance there a very serious and fatiguing, and likewise an expensive encroachment on my time and occupations; and it is that circumstance which alone should have induced the Sub-Committee of the Medical College to pause before passing their 32^d Resolution, as communicated in their Secretary's letter of the 20th of last month to the effect, that there should be a summer as well as a winter course of

/5£*

**A

Committee had before them my Memorandum of the 25th January, drawn up according to the requisition contained in their Secretary's letter

letter of the 18th of that month,
and implying of necessity a summer
as well as a winter course.
In this memorandum I mentioned
that my connexion with the Med.
College had for object Introductory
and Medical Botany. I never in-
tended to instruct the students

&sr r-r

J* j^L^.

dry catalogues of names of plants.
I have confined myself wholly to
making them acquainted with
the principal Medicinal or otherwise
important plants, chiefly with
reference to those of their own country.

^fV

utation

I think, that a knowledge of botany is as necessary as almost any other practical branch of tuition at the Medical College. -

7. When I entered upon my new function as professor in February 1837, it was required that I should immediately provide the means of conveyance to and from the Medical College, for, as I have already explained in my letter of the 30th September 1836 the tide would rarely admit of my availing myself of the boat allowed by the Government

for crossing the river to the point directly opposite my house, which is just seven miles distant from the College, and perhaps not once for

for both taking me to the Calcutta
Ghaut nearest Pottulungu and
back again to the Garden. But
admitting, that the tide would
occasionally serve to take me both
to and from Calcutta (to proceed
in the boat against the tide was
of course out of the question) still
a carriage would be required to
bring me from the river side in
Calcutta, to the College, and vice
versa. I was obliged accordingly,
to purchase a palanquin-carriage
with two relays of horses, a very heavy
expedient to a man who, for a
long series of immediately preceding
years, even when his family was
with him, could not afford indulg-
ing in any such conveyance, &
whatever, owing to circumstances
which it would be inappropriate
to detail here. It is a duty I owe
to

the carriage and four horses, thus rendered necessary during the past four years, have amounted to upwards of 6000^{rs}, or more than 120^{rs} per month, the details of which charges, I am quite ready to substantiate by the production of authenticated vouchers, if required. And with regard to the 14 months in which I could not attend at the College, the very cause of that interruption, rendered my carriage establishment equally indispensable.

8. In no previous period of this Institution have the time and attention of its Superintendents been diverted, as they have in my case, from the immediate duties

duties of their charge, nor have any
of my predecessors been placed under
the necessity of incurring, out of their
private means, expences rendered
absolutely unavoidable in the
performance of extra duties con-
fided ^{^ > * £ - ..} by the Government.
The situation at the head of an
institution like this, by the very
nature of it, is subject to certain
expenditures, which cannot well
be avoided, and which I have
most cheerfully incurred during
a period of 25 years. I feel that I
am justified in appealing with
the utmost confidence to the Govern-
ment, for their testimony to my
never having shrank from, or ever
raised any objections to the perform-
ance of such extra work, as the
Government have from time to
time charged me with. But I most
respectfully,

respectfully submit that, at my
period of life, after an actual
residence in India of 29 years,
with a constitution impaired by
constant and laborious occupa-
tion, and frequent attacks of
illness, I have indulged
in that consideration, which
has ruined

1

have done my very utmost, faith-
fully to discharge according to my
poor abilities and strength the duties
that have been assigned to me, and
relieve me from interference on
an occasion, when I have given
proofs of my anxious desire to
act with no ordinary feelings of
conclusion I beg
to have

have to select that, as the duties
of Professor of Botany, in the Medical
College must be henceforth
discharged with the same labori-
ous exertions and invariable
punctuality as those of the other
chairs, as the lectures required are
equal to $\frac{2}{3}$ of the number given
by the other professors, as the dis-
tance at which I reside is more
over so great and expenses are

» ,

■ ■ ” ” ,

My dear Sir,

My friend Mr. Williams
has written me under date of
11th inst. & requests you to stop
sending any more numbers of
"Night Hawks on Botany" & which
I do not subscribe asked to give Stanton
\$200 that you will be obliged to
send me the payment say 10th inst.
You may have paid on his acct. —
He requests me also to present
his respects to your wife & family. —

Believe me
My dear Sir

The first thing I noticed
 when I stepped out of the
 car was a warm blanket of
 sun on my face. It felt like
 I had been wrapped in a
 soft, golden embrace. The
 air was crisp and clean, a
 perfect contrast to the
 humidity of the city. I took
 a deep breath, savoring the
 scent of fresh air and
 the promise of a new
 adventure. The road ahead
 was a blur of green and
 brown, leading me towards
 the horizon. I felt a sense
 of freedom and possibility
 as I drove through the
 winding roads. The sun
 was low in the sky, casting
 long shadows and a warm
 glow over the landscape. I
 knew this was the start of
 something great.

The substance of this
I meant to put
my letter of the 13th March

p* [redacted] "

London 11th March 1844

The substance of this letter is that I have
been thinking of writing you for some time
but have been so busy that I could not find
time to do so. I have however received
your letter of the 13th March and am
glad to hear that you are well. I
am well at present and hope these few
lines will find you the same. I have
not much news to write at present.
I am however very anxious to hear
from you and hope you will write
soon. I am your affectionate friend
L. Robinson

Bellevue 8 March 1841

My dear Sir

I have the honor to acknowledge the receipt of your letter of the 27th inst. in relation to the purchase of a quantity of the same. I have the pleasure to inform you that the same has been ordered and will be forwarded to you as soon as it is ready. I have also the pleasure to inform you that the same has been ordered and will be forwarded to you as soon as it is ready.

a quantity of the same - not yet the kind that
 is made here - such things is to plant some
 seeds soon before the disease, for this
 is wholly out of my power to supply any thing
 like the calls that are constantly made on
 me for this sort of vegetation - the value
 almost of every thing else, the reputation of
 Government has been set that there are no
 plant-collectors to be attached to his garden
 and we have accordingly had none for some
 part. And what the present degree is of
 our work as regards the help - the work
 seems however from my list.

Mrs. W. M. M. M. M.

He has made up four cartons a
 few other plants besides. I have done but
 cannot help myself. For I am reaching
 the best of it. No more as I have mentioned
 you shall hear from me again. Now by
 you I can hear from you in answer to my
 letter of 10th June 1840 regarding what plants
 sent per Duke of Bedford. In my next
 will

with as much respect as you can at least
I hope I have done in respect to your
has of late in letter by the death of your son
of 13 Jan 1844

had now received your letter
I think with feelings of deep gratitude
recognition of your long continued friendship &
kindness, therefore in memory of the same
you will follow me to heaven

now I hope to get it by eye
he told me he had seen your name in
copy of the book and are as well as
I have seen meet with it in all the
kindly present the most respectful
to him. I have now kept some

37
possible employment, but I must leave you to
the decision, whether the advantage is a very great one
comparable to the value of the measures, getting out
perhaps to several years, by leading the man
to the war to come and so to the day of the
a person who could, just, perhaps, have an
get perhaps in such a case, would, perhaps
I can give him, might become an advantage
man might be had more than usually, that
moral feeling, to the next place, the object
is to differ it to new women, that all the
those who must in some respect, have
seen beyond that place, would, perhaps
bring a new woman, perhaps, than the
recommend might perhaps carry, better, for
a man, and not especially from, perhaps
than at this moment, perhaps, perhaps
both are soldiers, but in such, there are perhaps
concerned with each of them, that have made
the best of things, perhaps, perhaps, perhaps
during the war, perhaps, perhaps, perhaps

Handwritten text, likely bleed-through from the reverse side of the page. The text is extremely faint and illegible due to the low contrast and blurriness of the scan. It appears to be a continuous paragraph of cursive handwriting.

The classification of *Polyporus* (Strobilium) is not by
 the shape of the head, but by the shape of the
 stalk. In fact some rather strange forms are
 seen which have much the head of the *Polyporus*
 but the stalk is very long, down to an
 enormous length, and the head is very small.
 The first set of specimens which I saw
 were those which I saw what appeared to be
 certainly belonging to the form my first
 specimens were the latter in 1837 I have
 seen this method, and found first to be
 this method by the delight with which
 the students - Prof. - a certain number
 of the set of larvae they would not come
 all attended here, may make the case
 matters as well they seem to enquire
 I will you be able to see the next one
 since the 10th January to which have been
 here but I am not certain of them, and as to
 I have &

The first thing I noticed when I stepped
 out of the car was the cold. It was
 a sharp contrast to the heat of the car.
 I shivered as I walked towards the
 entrance. The air was crisp and
 clean. I took a deep breath and
 felt a sense of relief. The building
 was grand and imposing. The
 columns were tall and slender. The
 arches were high and vaulted. The
 light was soft and warm. I
 walked through the entrance and
 into the main hall. The floor was
 polished and gleaming. The walls
 were covered in murals and
 tapestries. The ceiling was high
 and vaulted. The light was soft
 and warm. I walked through the
 hall and into the main hall. The
 floor was polished and gleaming.

that day - for this time no other answer or great
 success in getting the school to improve. I
 the negroes - still had the same number as in 1821
 till we so advanced - had much success at
 my rate in getting for the school - not to say
 the whole school - my success has been
 upon me for this sake - I have done a great deal
 it is possible but not likely that this is the
 argument; to talk by the way - I find it is not
 the real cause. In that case - that you had
 the year - I had been coming by the fact
 and - I have seen the fact - the fact
 of the year - had made most of the
 on a subject which seemed to annoy some
 almost as much as myself. The fact is
 reason - I have seen the fact - the fact
 party until the student has left me -

It is obvious that I cannot go on at
 this rate of attendance. On the whole
 will certainly be a failure this Sunday School
 - 64

late a ward of the Lower

School is anxious to be employed under

the Sea Company in Apam. He says that

if you or William Pinnep will only take

him by the hand his fortune will be made

He has been informed that there is one

or more vacancies just now, if he has

come to me for a recommendation. He

it known then to all to whom these presents
may come that I have known Anthony
for the last 6 years, & believe him to be
a steady, well-conducted young man -
one that will do his duty in any situa-
tion for w^{ch} his abilities & his acquire-
ments (reading, writing & ciphering as far
as vulgar fractions) may qualify him.
Dr. Wallick will recollect that some
3 or 4 years ago the Breves waited
on him along with another boy of
decker hue; & that they returned
only labelled - the one the representa-
tive of Black, the other of Green

Tea. how this being the case, what other
candidate can be found for the vacant
post than he that has been pronounced
by the Botanical Oracle of the East
the representative of the Plant itself—the
Plant—

"which cheers
But not inebriates"—

Sincerely hoping you will
be able to do something for the young
men, & that you will excuse the freedom
& troubles of this communication, I
remain, my dear Dr. Wallich,

Yours by Miss

N. Wallich Esq

John H. Breen

18 March 1841.

The first thing I saw, as I stepped
down the stairs, was the
splendid view of the
city of London, as it lay
before me, with the
River Thames winding
through it, and the
Tower of London on the
east bank, and the
Palace of Westminster
on the west bank.

The view was indeed
magnificent, and I
felt as if I had
entered a new world.
The air was fresh
and invigorating,
and the sun shone
brightly on the
water and the
buildings. I
could see the
great dome of
St. Paul's Church,
and the
spires of the
cathedral, and
the many
churches and
houses of
learning.
The
view was
indeed
magnificent,
and I
felt as if
I had
entered
a new
world.

The first thing I noticed when I stepped
 out of the car was a sharp, cold breeze.
 It felt like a hand reaching out to shake me.
 I shivered, pulling my coat tighter around
 me. The air was crisp and clean, a stark
 contrast to the warm, humid air of the city.
 I took a deep breath, savoring the
 freshness. The sun was just beginning to
 rise, painting the sky in soft, golden
 hues. The world was waking up, and
 with it, a sense of possibility.
 I looked down at my feet, at the
 simple, sturdy shoes I had bought in
 the small town. They felt like old friends,
 reliable and true. I took a step forward,
 then another, and another. The ground
 was firm beneath my feet, a solid
 foundation for whatever was to come.
 I smiled, feeling a sense of peace and
 purpose. This was my chance, my
 chance to start over, to begin again.
 I took a deep breath and stepped
 forward, ready for whatever the future
 had in store for me.

 It has the pleasure to receive your
 welcome letter of the 10th inst. and was very
 glad to see your account of the success of the
 various experiments which have been made
 in raising a fine crop of the best
 quality of coffee seeds - that in seeds gathered
 nearly four months ago, and which were
 sown in various places, have
 yielded a supply. I don't expect much more
 can be done, as no more is being
 done, but you know many thousands
 of seeds & cheaply, plenty of seeds
 are at our disposal. By the same
 means I could send you quantity
 of the best Colonial Opuntia, but I
 must stop in this letter here as
 has been for many years, and the

 sure you will be happy to
 hear from me, when I have
 written to you.

A. Wallis.

Weymouth Square March
1841.

My dear Sir

I had the pleasure to receive
by the last overland mail your
letter of the 17th of January, and in
reply I do not know how sufficiently
to thank you for all the trouble you
have taken in my accounts, & for the
magnificent selection of plants you
have made for me. I anxiously look
for the arrival of the parcel in
the course of the next month & I
trust that, if not all the plants will
arrive safe. I trust some, particularly
the *Conocarpus* Regent, will be considered
as a acquisition in the garden & very
likely with *Chalocoma*, & as the Duke
& Duchess is one of my oldest friends
you know, the greatest patron.

Botanists in this country, I feel confident
you will be glad to know that part of your
selection will find its way into his
collection. I will enquire whether or if I
can procure any plants from Tropical
America to send back in 15 boxes, should
give me great pleasure to attend to
your wishes in this respect. I have
requested Miss Eden to prepare 30 boxes
for the 2 boxes. So I hope the Accountant
General of Bengal will interpret me
in answer to the government when he
shall settle with his accounts with my
old friend Lord Auckland.

When I was in Bombay I got from
England several plants of the
Common Park, Verbena, &
Heliotrope, & many varieties of
red geraniums. The Verbena has
thrived wonderfully on the West side
of India, & is considered a great acquisition
to the gardens there. The Heliotrope &

graciously from flowered either the
I shall be in the Queen with me, but
I have lately heard that all the European
plants which very hard successful work. I do
not know whether you will take I do not know these
common articles even if they would thrive
in Bengal. — I had in my garden many
Fruit a most fragrant plant called
Dilliberry. The flowers are pale green, like
smelling a delicious odour. I can't find
it in England. perhaps the name I have
given it is an improper one. If you have
the plant in Bengal & can send me a
specimen of it I shall
be obliged to you. When the Duke of Devonshire
was in Bengal he had a very
good account of the Amherstia nobilis, the
only specimen of that magnificent tree
which is in Europe. I do not know whether
you could procure or send another to
me, but if you can I shall be infinitely
obliged to you. I wish much to send it, if it
reaches England alive, to the Duke.

I assure you I remember you will
be very

Sir

I have much pleasure in acknowledging your kind letter dated 9th ultimo to Dr. Weddell's address, and also the safe receipt of the cases of plants and the Basket of seeds.

In doing so, I am directed by the Society to beg your acceptance of their warmest thanks for the same, and for the zeal and interest you have elicited for their welfare of their garden and its objects.

I am further requested to state that the plants specified in the list appended to your letter shall, if practicable, be sent by the first opportunity; and that the Society here will ever derive the greatest pleasure in contributing in every possible way to the deficiencies and wants of your excellent Garden.

6th May
Dear Sir
2 packets recd from Duff
I have much pleasure in
replying to your letter of the 13th of Ultimo
Havimg as you mention collected some
of the Vattanamara (which I
will find useful for showing
to) I send them by this day's
mail to be sent to you

^ 1 -

■#^

+

Sf s*o

the tree here giving out
a silbert, but I do not
know how rapidly, in
to

How does it
look? Over large, with
forward specimens of the leaves, &
a fruit; Can you inform me if
it be known in other countries, I fancy
it is from Sumatra but, but this is a vague
perhaps ignorant conjecture. -

The Vattanamara Seeds have mixed up
with old Wood Ashes, to absorb Moisture
and prevent any strong like fermentation
during the journey, I shall be glad to learn the
issue of this experiment, & to hear that the
seeds have germinated.

If this plan succeeds, perhaps it
might be as well to adopt it with the
seeds you were kind enough to present me, as
the soil in which some of the last by rough
wire packing, did not in any way preserve
their vegetative power, and was attended with
the great disadvantage of creating the packing
very heavy. Their sinking in water found to
be the certain test of good quality.

I have no grounds or correspondents in
Calcutta, to whom I could write to take charge
of any Boxes of plants, but if you could
kindly send them by Samuel, a young son
of one of the British Merchants in my
and a subscription, it would be all I require.

I have just received by the Company a
few Rods of Casia Fistula, supposing which
I might not have the tree in Bengal. It has
a splendid appearance when in flower, and is

very much free -
I have also had the pleasure of seeing
and have seen in your studies as are
expressions of

W. B. Brown

Dear Sir

Yours sincerely

W. B. Brown

Mr. Murray

Glasgow. April 27. 1841.
My dear Wallace.

I do not hear from you; - but I hear of you in such a way as makes me feel sure I am not altogether forgotten by you. You have been most kind to my Brother in Law; - but that is nothing more than what was to be expected from you. He has left Calcutta & I have made him known to General Walker. I know too that, in the midst of all your troubles, you still take a deep interest in Botany & that you contribute plants with your wonted liberality. Mr. Wailer told me last week of the treasures you had sent him. I hope you will, by a bye, allow me to be in botanical communication with you again. You cannot yet have heard that I have

lately been put in charge of the
Botanic Gardens of Kew, & the
in any subsiding place in
from this time

there I sweetly
spending my
have a very agreeable

Glasgow, & 2 rich Daughters in
Leisy, where also Lady Hooker is a very
third Daughter :- & there they have
been for 7 or 8 months, & where I had
been spent much of that time. Now
my Lib^{ry} is all packed in Boxes, &
my Cabinets of Plants are on their feet
mounted; & the furniture is all in
disorder, ready to be removed to Kew.
Indeed much will be shipped off this
week.

I hope greatly to improve the
Garden & make it available to the public
good: & I am sure I shall take there out
fine a private Library & Herbarium at
any that exists in Europe.
get my dear friends

the other (the latter immediately are in
debts to you & to your generosity. The
sincerity, if you will contribute further
to enrich the Herbarium with some of
your more recent discoveries, they will
be as acceptable to your former
theories.

I subscribe a vessel about to sail from
Port Hook to Calcutta & hence it an
additional part of my *Scenes Silicium*,
the continuation of the *Journal of*
Botany, to N. 23, & the *General Silicium*
Part - 8. This letter will probably be
followed by a work of species: - but as to
another work of finely colored plates
I cannot afford it & no Bookseller will
undertake it. My *Journal of Botany*
I can only cover off by giving all the notes,
notes & even the drawings & plates for no-
thing. *Penstemon* is working zealously at
your *Leguminosae* & will do them well too.
When do you return to Europe? for good &
all? - Yours most faithfully

W. L. Hooker.

red 79^a June

Newcastle on Tyne
24th April 1841

My dear Sir,

Your most welcome letter reached me by the last month's mail and I return you my best thanks for the fine plants sent per Ida whose arrival is looked for the latter end of next month - The plants will make a very interesting addition to my collection more especially my favorites the Orchids - Not the least welcome will be your namesake Catalogue which I shall cherish as it deserves. I am glad that my scribbling affords you any gratification and presuming on your toleration of it I shall have much writing you with all the Botanical news I can pick up. I am exceedingly sorry to find Lord Auckland should hesitate to give you the very small sum you deem necessary to set out your Collectors - I have set on foot influence to obtain the orders from here being sent out and had hoped I should by this mail have been enabled to communicate that sum

had been done - by the next party
has the custom satisfaction of not
nothing but an oversight for both
a paper excellent paper in outline,
the most important of our affairs.
This letter is not something and
already been done will in all parts
Mr. McNeill and kind regards to
obtain an order from the Board to
buy it land to the Adm. Board, and
the mainland Board - The land has
without Proprietor's order than can
be used a few weeks ago and to
then that ever since from they
the quantity that 75 of them are
also packed in similar 200. This
were double the quantity of the
the rest I did not take to a
and have done them with
them in the shape of plants -
and by the way I think till a
and has you would not be
inhabited town. A road has

all the kind of things are being arranged by Mr. McNeill. The
of the Board which will quite delight the Board. I am glad
to see both the Board and the - your kind letter of the 10th of
attention to you will find by name of Mr. McNeill and the
and by the way the pleasure of meeting with Mr. McNeill and my

I believe you might think that. No way to be kind to at all. He came up full of all matters relative to
 me by the return mail to this and I will then have plenty. Now here this was new since and I have from
 the hands of your spiritual and counsel with my and your theme from the magazines - He explanation is
 in that a short way he made in Wisconsin state.
 my and keep a pocket in India is a part of the magazine and I presume you have plenty of
 in copy. in such work for your own part. I must not be too far from you. I have plenty of
 and that too. I had more for me now. I think I will start in my part - I have no doubt
 with the books that have appeared to this - every thing in my part - I have no doubt
 and very pleasant to this and to the other with the other and I have no doubt
 in a little that had passed yesterday he says he is not at all - I believe they are going to be in their ordinary
 proper conference meeting up and expect to have his work. I think I will start in my part - I have no doubt
 what copy this is. He has had a very comfortable and the few collectors of books in such books.
 would for him else to this - He follows he has had and of Tennessee have asked much to the
 in his family - his youngest daughter is in the with the large hospital in the
 the last days of confinement - His daughter in law has only 2 boys - to much for your
 but for the other and her young creature the day by Mr. Parter. He has had a pleasant
 in the winter in a short year or so long - He is a very nice writer and I think
 writing every of the pictures and explaining the color distance in some other that to
 you have full of the materials to know - He has been 107-8 and now - But must conclude for this month.
 but he from him and hope to shall soon have 107-8 and now - But must conclude for this month.
 and I think to the Magazine - He starts with my last week for your health and happiness and
 which will know more than ever. He is a very nice writer and I think
 I have no more - He has many children and I think
 in the winter and is becoming quite comfortable.

Yours and my friends
 very faithfully yours
 Wm. W. Miller

do not get a sure bet but you shall harvest as soon
as you get it propagated - it extends to 10 feet or more
in it - it has stems on both sides of the plant in your
own garden.

Dear Mother
I have just received your letter
of the 14th and was glad to hear
from you. I am well and hope
these few lines will find you
the same. I have not much news
to write at present. I am
still in the hospital and
do not know when I shall
be able to go home. I
will write again when I
hear from you.
Your affectionate son
W. Wallis

My dear Willie

I have done myself the pleasure of
writing to you by Post & I know merely as to
say that by the vessel that takes this letter
I have sent you a small parcel of books.

Do not forget me.

Yours ever

gentlely

& affectionately

W. J. Hooker.

Sir.

I have taken the liberty to send you a small parcel from N. England Plants, put up in great haste, & principally composed of a little collection of common species which I put up for a friend some years ago. I have a large collection of fine specimens which I have collected in all parts of New England, which I should be happy to exchange for Indian species. Any parcel, forwarded by Capt. Lock will reach me immediately, & I should be very happy to send you by the American ships a pretty complete set, - as many duplicates as you please of the plants of N. England -

Yours, very respectfully.

✓ My dear Professor

The three impositions of Gouletta
and see Shupp on the matter have been
cases which you sent to me on the 1st
for my opinion of it I shall refer
the African Language. I am happy to say
it is very valuable and worth in every
condition. So we the favor to spare the
Secretaries that the whole collection
shall have all very best care until
you send for it. The reason is very
feasible and should be very much
mind that no great delay should take
place in forwarding the plants to
their destination in Africa. The following

10th 6th

My dear Sir
A date Boney Parcel containing
13 Prop. Blanks for meeting has been
received in safety and I have
trans ALsC /&-

for and my law-ful plants have
been secured by means of Captain

Patrol at Belton

X^, <# "XXXX

Cases of Blanks sent up for Steam
and in the case of Ab Hampton I

have not heard a word about

and I am afraid that my

'tfa? * v

are taken back in the summer

The first Case of Blank Lin

has been successfully near Abington

than that of last year and

7* *<<

The quality of the leather is so poor that
I have some I want to
hand at the Green Tin Division
to which I am going.
The means placed at my
disposal are much too small
for any useful purpose. With
a Chinese establishment capable
of producing 20,000 cases of
I am not allowed

N.*JL

kzx^&J g**^.* /

^ * / < ^ ^ ^

Yours truly
J. M. Walker

Chulawa 20th May 1841

If I am afraid that the more arrival
of the Blacks alarm reforms to
cause of delaying for some

/far *£&+L# cw-^

The present season

as if I had known him by the end of
next month I could find time
to run over to Suisun to get the
labor's permit and then be

able to get away

The first in the January

I have only a small compass
for a few days for an Chinese
Sea Matron to Mr. A. J. DeWoods

If you can send them up in any
of the Gov't Boats I should feel
them kept as these men richly

deserve the greatest kind
Gov't can show them.

Memorandum.

A league of ground will give [redacted] being
3 feet in all sides for drains, the holes are to be at
the distance of 6 feet each and 3 feet square on
the surface of the ground and about 15 inches at
the bottom, and a foot and half deep. — for planting
in the dry season say, from October to the latter
end of January. But two or three months previous
to the setting of the rains the holes must not ^{exceed} one
foot in depth.

200 Cans are sufficient to plant a
league of ground, they will give 1200 pieces, each
piece containing three joints and two pieces in
each hole. Which in a favourable season will
yield about 2000 good canes.

Appl. Hort. Socy
Nursery H. C. Bot Garden
20 May 1841

By order of the Court May 4th 1841

✓ The above is a correct statement of the property of the said

arrived here this morning and I have

already sent it off for being unloaded

at the Custom Warehouse. I believe

that you say in your note regarding

the 10 boxes of sea salt owned by Mr

Watkins. He says in answer to me

supplies the property that they are the

property of Osborn. You hint that

Mr Watkins had a connection in

partnership with Mr Strong. It is

not to be positively prohibited from any

A

V .

.

such details. I had the least proof of
 the two papers being a joint speculation
 of the Dept of Education. I would rather
 have been by the orders of your
 American Committee, and I am sure
 have to send any sea with the least
 least that, and not have for the
 property that is in even about. There
 was a large official letter to Prof
 Mackenzie by all who were concerned
 with all possible by Mr. Watkins but
 he has no business to address any one
 specially, saving through his Superior
 that I myself. I find he has proceeded
 to give orders to the absence from
 quadrangle that he shall not do it again

The Duke - all these things - when
will go to the Indies they say they think
arrest or arrest concerning of the funds
and despite like sweet peas, I can not
make any thing out of it. Poor John Thomas, I
trouble poor many - many years ago
at my entrance - that is his work, a year
30th a month present work but to
his purpose.

Thanks for your kind congratulations
on my daughter's marriage. Capt. Piddler
is a fine steady, well man. He is a cousin
of Sir W. Parkers (one of the best of the Admiralty)
who is coming out to sea - and of Mr
W. B. Piddler. He will get a half-pay £
for a few years but I suppose he will get
nothing for my report, so I have done for the
society. much

been to refresh my heart with felt still
more warmth of attachment to you my
honored old friend - if that be indeed
possible - for your kindness has now
been renewed with Mr. Withers. I had
requested them to take charge of a dried
box of plants for you which I had
prepared on purpose to proceed with
them in the E. Robinson. Well - I
wrote ten days ago to the Commodore
asking his permission to embark the
box, and as I never had a line in reply
he inference is that permission could
not be granted. I must - and must therefore
wait until I find another opportunity for
sending

of the white grand-flower, a truly superior
flowering chamber, which however, you have
probably got already in your garden. I
shall be very happy indeed to supply you
with any plant or seed which this
garden produces, and if in return,
you send me occasionally favour me
with some of your resources. I should
esteem it a very great obligation.
Some time ago I took the liberty to
furnish your excellent Agric. Society,
at Bombay, with a Memorandum
of my manifold desiderata, extracted
chiefly, if not entirely, from
Curtis's & Graham's ^jL-<^ Catalogues

Handwritten text, likely a letter or document, written in cursive. The text is mirrored across the page, suggesting it was scanned from a document with bleed-through or is a double-sided page. The handwriting is dense and somewhat difficult to decipher due to the cursive style and the mirroring effect. The text appears to be a personal communication, possibly a letter of introduction or a request for assistance, given the context of the visible words like "I am writing to you" and "I am very glad to hear from you".

ivN^^ ^

and the ~~same~~ ^{repeatedly} had very valuable
collections offered from that body, as well
as from Mr. Hemmings.

Believe me to be with many
apologies for the liberty I have taken
in addressing you these lines, to which
my small acquaintance has led me, and
I hope to see you in the month that shall
appear in the Journal as early
as possible from your own or my part to
express in the W. W. Wall papers
the Principles in the proposals of the
same, especially respecting proposals to
the Right honorable Members of the
House of Commons.

wish, that the event which, under existing circum-
stances, Mr. Pincey fears will not take place,
may sooner or later be realized by your Lordship
coming back to India, at the helm of its destinies.
I feel that I have with no small anxiety
to the arrival of the next anchored mail, & I
hope to receive favourable accounts of the
arrival of your Lordship. Two days we
had some degree of anxiety to find that you approve
of the selection generally, and are proud to
think that you design some of the plays to
be the subject of exhibition at Chatsworth.
Most truly happy indeed would I be if I could
send you an Ambrosian for the Duke of
Devonshire - the most magnificent person
of the science of botany as well as horticulture,
but unfortunately we have the
greatest difficulty in obtaining cuttings of it.
We have repeatedly tried grafting & layering, but

at last

but in vain. During the last two seasons (the
end of March or beginning of April) our best
individual has given a profusion of flowers
without any attempt at forming fruit. Last
time you the farmer observed on the mountain
& the specimen sent was the quantity
we two had and several others
which were obtained perfectly ripe near
which had given. From this may
not appear that there were
to gratify me by some full seed, and
that as soon as I get my, or have any
plants I shall be successful of your wife
you will soon to know that his
plant of which is in operation was
time, and soon more of any man can
see it - it will be the only one
with Mr. P. ... the farmer
is almost as beautiful - it is
only to that queen of flowering trees, and
them

The image shows a large, dark, rectangular area that appears to be a scan of a document page. The text within this area is extremely faint and illegible, likely due to the quality of the scan or the nature of the original document. The text is arranged in several lines, but no specific words or phrases can be discerned. The overall appearance is that of a heavily underexposed or low-contrast scan of a handwritten document.

W. W. Woodbury
I have a great deal of
business to do, and I
am sorry to hear that
you are not well. I
hope you will get
better soon. I shall
write you again when
I have time. I am
very truly,
W. W. Woodbury

Wm. Lloyd Garrison
New York, May 29, 41.

My dear Mr. [unclear]

the letter I sent you
yesterday

Very ever
Wm. Lloyd Garrison

The late body of Paris [unclear] the
order & we should have the
righting of its own honour
in this strange event?

W. W. Woodbury
2/18/72

Occidental Club House, Manoeuv Square, London
21 May 1861

My dear Sir, I am glad to hear that you are well and hope
that you will be able to visit me, and will be glad to see you.

It is so long ago since we have had any communication
but I am somewhat doubtful whether you will remember your grandson
compared to "Kumara"; but, even should your memory play you false
in that particular, I feel sure that you will not be so unkind to see
me in the execution of a small commission falling more immediately
within the scope of your own pursuits.

The late Col. Kater many years
ago applied the term, (not the proper term?) of a Grass found in many
parts of India and in the greatest abundance in the Hills, the botanical
name of which is, *Abelmoschus*, "*Arifragum Compositum*", to the construction
of *Agrostoides*, and he has given an account of his Agrostoides
in a Paper contained in the Asiatic Researches, (somewhere about vol.
10th or 11th), detailing some observations upon Terrestrial Refraction
made at the Madras Observatory by Capt. Baines & himself.

for a supply of these Beards, or Fibres, which
frequently intrude themselves upon a Traveller's notice, I into his

Stockings

^~Cz

So as to be a serious nuisance in every part of the Hills as I
doubt not you have yourself experienced. It is surprising how
long these beads retain their vitality, or rather elasticity. The most
recent specimens, which I can find here, were brought home by Kater
himself in 1808: he had collected them from the Thatch of a Cottage
somewhere up the country at least two or three years previously, and
they might have been in that position for a considerable time
before that: and they are still very efficient. They furnish a very

i+~~S / ^ <Uc~

valuable relation between the degree of moisture, which for
general purposes, is the information chiefly required - whereas the data of
proportion which indicate an absolute "dew point" are extremely difficult to
manage and not a little expensive in view of the necessary consumption
of Spirit of Ether. The Cassinets, which contain 100 of the beads, will
hold 1000 or 2000 of these beads and be an abundant supply for all
purposes - If nothing can be got for nothing, I have written to request
Rafin, G. G. G. at Alonhidabes, will repay you on my behalf any
that may be incurred, & for your kindness I must remain your
obedient servant

I suppose you intend to visit London in your "Parade"
being of a different mind from Rayle, who seems to have the

Govt. House
4 June 1841.

My dear Wallis
I am directed by Lord. Mulgrave to
enquire whether in your opinion the oak tree men-
tioned in the accompanying memorandum (which
please to return) will grow & be valuable in Eng-
land. Should you think it would, His Lordship
wishes you to ask for a suppl of acorns from Dr.
Complish, & St. Pauls; a few of which might
be sent overland, and a portion of them planted
in boxes, so that when the plants appear above
ground they may be sent by sea. - Autumn is the
acorn season. Believe me

Yours
J. T. Poyser

Confidential Report June 1. 1841

rec'd
reply June 11

My dear Mr. Allen

The enclosed is perhaps
 my 2nd thought for the award
 of which I have prepared you.
 Send me back all the letters
 you have except that of mine
 to the Ambassador which is
 still to go & to the Legation
 the Legionary decoration. Enclose
 in my epistles official & fully
 state to ^{you forwarded} Burroughs. Let this
 packet reach him by the
 as soon as may be.
 The Chancellor of the Legation
 has treated my "piece" - which
 was an answer to his official
 nomination of me - so severely
 that I will have no letters
 to do in the line. Now will
 I at present trouble the
 Kenya Society. But

You may show my two letters
now sent to you, ~~but~~ ^{be}
~~the~~ ^{the} ~~two~~ ^{despatches} ~~in~~ ⁱⁿ
~~your hands~~ in confidence,
to H. J. Parnep. Had we
back all the rest - including
the one to yourself, for
this is a very ridiculous
affair & I would not have
a line upon it exist that is
not necessary to the movement
with I had kept all my French
letters, but they were flattering
I put the trouble to please my
Parents, to whom consequently
sent most of them, taking some
times an extract, from the
not. Bureau of the Society, who are
radicals, will be very wrath indeed
I guess with the King's Chancellor

12 June 1855
I have enclosed a copy of a paper
which I addressed to Prof. Caspary on the
subject of some experiments on the
lines. It is evidently successful to have both
peas not only of the excellent quality which
you describe - but also (and still more
so) of all other kinds that grow at higher
elevations. The subject is brief, may be
to send small packets with the present
might under letter covers by some of our
banks. You are no doubt well aware that
unless the peas are perfectly ripe, and
forwarded immediately on their becoming
so, such is the brief period, in which they
retain their vegetative power, that seeds
not arrive here in a fit state for sowing
much later. ~~It is~~ by being dried by the
overland route. However, larger quantities
may also be sent home by bank drafts
at Campbell's of the

... your mother to me. My father has
been informed of this and is
very glad to hear of it. I
am sure you will be very
happy to hear of it.

✓ reply 2-10-68
Boston 12 Jan 1868

I have been glad to hear from you
I have expected Mr. Phillips
to have the goodness to show you a note and
enclosure which I had the pleasure to send
him today. They relate to a request on the
part of some individuals that means adding
you as a def. on the subject of Hallant and
other forms of Arian's pseudo doctrine
into England. As I have said every
thing that is required on this matter
on my communication to Mr. Phelps
will only add that I shall feel extremely
obliged by your kind cooperation in
the success to which I have alluded

Lucy W. Bishop

Yours sincerely
W. Wallcut

Porto Rico 12 June 1844

The number of coffee plants in the province
 reported to be 336 coffee plants a few
 months - nearly 193 Arabian coffee
 seeds from the gardens produced
 seeds, and 144. I do not recall from seeds
 imported some years ago from Bourbon
 that season being the same to be
 the best ought to be the case - namely
 the right seeds plant dying in the way
 to the ground. Had some been from
 another man of the same - they
 reported to Mr. Llave that my plan
 of not allowing the plants to prosper
 in a less number but at the bottom
 of the plot, 5 feet about to the depth
 that his plan of mine was naught. Mr
 Llave wrote to me - I explained in reply
 that the practice was to add a head of
 - A House

My dear Mr. Peacock
I have much to say to you but
must defer it until tomorrow. I have
just to have a peculiar business
to do this afternoon.

I have been very anxious to see
you at your house in Brompton
and I have been there also. I have
been to see a young man of very great
talent to establish a company. I have
been seeing Mr. Peacock's papers and have
been very much interested in them. I have
been to see the general manager
of the railway and have seen some
things. In fact I have been personally
great many (some twenty) years ago.
I have been interested in the
railway and applied to him in a
direct manner.

Yours truly
R. Stephenson

11/11
The following is a list of the names of the persons who have been appointed to the various committees of the Board of Directors of the City of New York, for the year 1901. The names are arranged in alphabetical order.

Committee on Finance: Mr. J. C. DeLoach, Mr. J. B. Condit, Mr. J. H. McMillan, Mr. J. W. Smith, Mr. J. R. Taylor, Mr. J. M. Wilson.

Committee on Public Works: Mr. J. C. DeLoach, Mr. J. B. Condit, Mr. J. H. McMillan, Mr. J. W. Smith, Mr. J. R. Taylor, Mr. J. M. Wilson.

Committee on Education: Mr. J. C. DeLoach, Mr. J. B. Condit, Mr. J. H. McMillan, Mr. J. W. Smith, Mr. J. R. Taylor, Mr. J. M. Wilson.

Committee on Police: Mr. J. C. DeLoach, Mr. J. B. Condit, Mr. J. H. McMillan, Mr. J. W. Smith, Mr. J. R. Taylor, Mr. J. M. Wilson.

Committee on Fire: Mr. J. C. DeLoach, Mr. J. B. Condit, Mr. J. H. McMillan, Mr. J. W. Smith, Mr. J. R. Taylor, Mr. J. M. Wilson.

Committee on Health: Mr. J. C. DeLoach, Mr. J. B. Condit, Mr. J. H. McMillan, Mr. J. W. Smith, Mr. J. R. Taylor, Mr. J. M. Wilson.

at a point, one reason a gentleman of 70 years
of age ago, forgot at his moment
some, and it matters thickly because
even now that he entirely forgot the
name that he passed on his return
and whether he may have set on the
ground of a family or not in the
details of information upon the
particular circumstances of the

There are contradictory accounts as to
the number of the plantation, and
whether as to the quality of the work
performed, or already completed
interpretations of the real state of
affairs in both these respects, I cannot
best determine.

How were the plants prepared,
whether by plants a short season,
or by cutting down already mature
ones, or by planting in post-plantations of the
old from China - and this to a very
large extent.

My dear Mr. Wallcut.

You said well that
 the first series of letters was all
 right, and would I have
 done the Chancery collon
 let merely, but the fact was
 turned over to the French
 you totally to the French
 upon a simple ^{merely} about which
 Puissep is apprised I wish
 P... can discharge me of the
 that I suspect the long interval
 between my 2^d series reaching you
 my yesterday's reply to you
 will have settled the case
 proposed to you by my
 yesterday's letter, I am
 sure I am not troubled
 about the matter, nor shall

I have been thinking of you
 very much lately, and
 wondering how you
 are getting on. I
 hope you are well
 and happy. I have
 not much news to
 write you at present.
 I am, my dear friend,
 ever your affectionate
 friend,
 Wm. Wallcut

London June 17, 1841
My dear Mr. Wallis.

The enclosed to be forwarded
will enable you to adopt if
you see fit, the course first
proposed by me, even tho'
the second has been followed.
In you can send after
your first dispatch, another
to France enclosing the
letter to the Chancellor (it
will do at a pinch in English)
with the accompanying
the kind of help we
in the distribution of the
accompanying printed
papers, sending the same
in Paris to any name

1/6/91

You prefer De Letter or
other. Because all the
previous trouble for some
time of me I because I
do not often write you
except for

18 June 1844

My dear Sir
I am very glad to hear of the
success of the Honble. J. P. de la Roche
in his mission to the Honble. J. P. de la Roche
of the Honble. J. P. de la Roche - it is as
you well observe why you
suffer when in that state
I shall send you it again -
I have had a copy of the
for the Honble. J. P. de la Roche, Edin
but I do not know whether it is
not for the Honble. J. P. de la Roche

Y^r A. W. D. R.
The Honble. J. P. de la Roche has only 20 of it
it had originally 23, but the
children took them away from

Dec 21st 1781

My dear Sir,

After a long time I have
 the pleasure to address ^{you} these few lines
 I doubt not be glad to hear of my recovery from
 the Wounds I received in the late Attack on my
 life and I am very thankful for your repeated kind
 enquiries thro' Lewis of the state of my health
 during my severe illness. The last Operation on
 my Cheek to effect a Passage from the Salivary
 Gland has I am glad to say proved successful after
 a period of three months, I experienced great allevi-
 -ation throughout both from Dr. Pagon & Smith
 (the latter of the Madras Regt at Madras) I
 have an opening left under my lower Lip this
 defect has impeded my Speech a good deal & feel
 an inconvenience in taking Food & Liquid &c.
 Smith proposes another Operation by next Cold Season
 for which there is plenty of time yet, but notwithstanding
 it is most fortunate my life has been spared
 thro' the bounteous mercies of the Almighty which
 I most affectedly mention, did the Doctors, I had the
 honor

travel that I go twice for Surgeon Reid, which
made me a surgeon against the will of Mr. Dyer
the deep wounds. —

— Hope the Publics I sent last year have
succeeded well, I kept a few in my paper
I find every one has enjoyed this Book, both
domest & the Indies I got it at 1/6, I can do the
same more for you and I can also send some
Plants if you think it is likely to succeed.
— I shall try to get you in on the public
employment of the salt. — Visit West Point.

to

Portland 22 June 1844

Dear Sir

I must first thank you for
 your kind letter of the 18th inst. in
 regard to the report of the
 Dr. Jenkins, who he by whom
 you are collecting the fish. The sample
 furnished at the above place all
 the papers were forwarded with them
 to the museum the night before last.
 I have examined the same and really think
 that the fish of the genus *Salmo* more
 or less resemble your report in colour
 and also in the manner described by
 the authors. I have not yet seen
 any other of the same kind in the
 north of the Pacific. I have
 been looking for them in the
 waters of the coast.

Dear Mother
I received your letter of the 12th and was
glad to hear from you. I am well and
hope these few lines will find you the same.
I have not much news to write at present.
The weather here is very warm now.
I have been thinking of writing you for
some time but have been so busy that I
could not find time. I hope to write you
more often in the future. I love you
very much and hope you will love me
just as much. I am your affectionate
son,
John Smith

When first we saw the old building
it seemed to us a scene of great beauty
to be sure but we were not
to see the old building
but to see the new building
and to see the new building
in the new building
and to see the new building
in the new building

contents of the four packets were all lost, what
was the reason of this? The cause
was an earthquake in southern Java - caused by
an extraordinary powerful earthquake. There
had always been a supply of rice here, in
the garden, and I have forwarded
a great deal to Madras for the Government.
I see a few days ago a letter which makes
me fear that not one seed will be left.
There were here have sprung up
without an exception scarcely - the
hard of the thing is that the life of
this species seed is extremely limited
in duration. I expect to find some
superior seed bearing in the packets
only and not on the boxes, I am happy
to hear that you have not lost

Dear Sir
I have a favor to request
of you, and therefore beg to address
you as follows the following
questions,
What is the name of Sorpocaba
Verticillatae in the country
of language and English?
I have at present that the sugar
of Bathampton (Madras) is
of a color of clay, and
knows what the article
is that is not
before me
I forget which
of the above
is, but do not
re used, or

is greatly
than
white

I have tried lime and lime water,
but regret it does not answer
with me as I have been led to
suppose it would, and if that is
the case, I think I should be
it gives the sugar a bad colour
(Crack, and a dirty appearance)
rather to I have found that
answer best, but it leaves the
of the sugar, and I think may
leave some stain behind
Can't you kindly recommend
of any other made, or article that
could be used? I should be very
obliged to you in the future
I hope you will kindly
excuse the liberty taken by
me in accordance
I am very truly
Yours
Wm. [Signature]

that I could not find time. I hope
to hear from you soon. I love you
and the children very much.
Your affectionate son,
John Smith

1847
I have been reading in
your letter of the many
things which have been
done in the way of
improvement in
the city of New York
and I am glad to hear
that you have been
successful in your
endeavors to improve
the city. I am sure
that the many things
which have been done
in the way of
improvement in
the city of New York
will be of great
benefit to the
people of the city
and I am sure
that you will be
successful in your
endeavors to improve
the city.

only 10th Aug

I have the 3rd July 1844 regarding
 the plants you sent me which I will be
 happy to receive in due season, and
 I hope to return you my thanks
 for the trouble you have taken in
 interesting yourself of the St. Mary and
 for the valuable basket of plants which
 was delivered to me on the 20th of the
 month in the best & possible condition
 & circumstances which I had the pleasure
 of signifying to you, adding to your
 kindness, in a note delivered to your person
 when you were up to Ballypauert where
 I understood from the report that the
 Guards boat was being your pots containing
 the following plants. Namely, 1st a
 small plant, this should be placed near

The first part of the book is devoted to a general
description of the system. The object of the
book is to give a general idea of the system
and to show that it is a system of
principles which can be applied to
any case. The book is written in a
clear and concise style and is
easy to read. It is a valuable
reference work for all those
concerned with the system.

Rockford, Feb 14th 1863 23

✓ Please to give me information about the
brigade of the 1st Division

My dear Sir
I beg to say that I have
been told that you will
be in the neighborhood of
this place in a few days
and that I may be
engaged in my capturing
of the present summer.

I have been week ago
employed by General
Charles S. Thayer
at the battle of
Gettysburg, and I
was killed there, and
my body was
captured by the
enemy, and I
was taken to
the hospital, and
I have been
bravely brought up.
I appear from
some letters I have
received from
some of the
brigades of the
1st Division
that I have
been
seen
by
some
of
the
soldiers
of
the
brigade
of
the
1st
Division
of
the
Army
of
the
Potomac
at
the
battle
of
Gettysburg
on
July
3rd
1863.

at the same time being employed at ...
under your eye, on intention that he
was frustrated in consequence of
and your being such that General
was not known to them - namely, retiring
Haskell - I am Corporal Hayes
Major Road from I repeat
make some inquiries about the man
I have had no reply, in fact the man
was again this morning ^{told}
that the Major had left ^{by boat} ...
... which report was believed
... that the man must be general
... subject, judging from
... which he left with
... and date ...
... How

are founded or not based - with a few
and willing to to suppose
The more than was to great
about reson (particular by course)
superior position from them, and
to agree to.

will feel extremely obliged to you
would be able to obtain additional
information than I hope at this
at concerning scope and of
to be trouble to communicate
I trust - my request is made
a suggestion that you would not
to the Government to the trans
taking her discharge, you are anxious
the present. But there is another
of importance. It is this. Suppose
that

that should be done & I think
you think has a number of good cases
could be made to him in purpose that
might put his children to the test but I
repeat - unwilling to break someone's
to release also would go further in my
action. The man's reputation has been
great interest in his plan
with respect to ^{the} public against
future disappointment -

One more - I hope your kind regards
for the Wherry have been, and with my best
respects from which believe me,

Yours sincerely
W. Wallis

Dear Mother
I received your kind letter
of the 10th and was glad
to hear from you and
to hear that you were
well. I am well at present
and hope these few lines
will find you all the same.
I have not much news to
write at present. I am
still at school and
will be home in a few
days. I will write again
when I hear from you.
Love from
Your affectionate son
John Smith

The first of these names is that of a
 person whose name I have not seen
 before. I am sure it is a name
 of some importance. I have
 seen it in some of the
 old books of the family. I
 have also seen it in some
 of the old papers of the
 family. I have also seen it
 in some of the old letters
 of the family. I have also
 seen it in some of the old
 accounts of the family. I
 have also seen it in some
 of the old records of the
 family. I have also seen it
 in some of the old maps
 of the family. I have also
 seen it in some of the old
 plans of the family. I have
 also seen it in some of the
 old drawings of the family.

I am, Sir,
 Your obedient servant,
 J. H. [Name]

tion which I can contribute will
by the Agricultural & Horticultural
of interest. -
That Mr. Scott

^ ^

-

I first met with him
his short visit to Lucknow in 1838 I well remember
his making particular enquiries regarding the
Singapore Chief who were assembled to meet him
& who professed to be well acquainted with the
plant. They assured us was to be found in
abundance at the foot of the first range of hills. The
Bussa Yam promised to produce it & accordingly
on his return home he immediately sent us 8 or 10
plants which remained some time in a thriving
condition in Lieut. Badmington's & my garden, but
what became of them I do not know though it is
not improbable that we sent some or all
down to Mr. Scott.

r

*^*r

seen down plants & seeds
 in our neighbourhood was
 notorious, but I question whether any one
 ventured to entertain a hope that the tough leaved
 plant of the jungles might be prepared to resemble
 Chinese tea & certainly a sample of the dried leaf
 preserved in their own fashion & presented to me
 by Knapton in 1827 was far from being palatable
 or promising. -

You will perceive that my statement
 merely settles the question that the existence of the
 tea plant was known to Mr. Scott to Mr. Bruce
 & to myself & others in 1825 & in no way detracts
 from the merit of those gentlemen who turned the
 discovery to valuable account & made it a
 second time. -

Yours &c.

to Mr. W. W. Phelps Esq. Secy. of the

Anti-Slavery Society

of the

for

They have to go forward to give
a copy of a letter published in the
Secretary of the American Anti-Slavery
Society of India together with a copy
of the Secretary of the Society from which
you will perceive that the Society
have declared themselves the question
submitted to them, in the manner they
consider the duty of the Society
in Spain has not been the right one
letter giving me the account of the
the letter that was inserted in the
Correspondence and of our position
relative to the discovery and publication
of tea in India

Considering that the Society are
supposed to be well acquainted with
every thing of importance that
occurs in this country connected
with its Agriculture and Horticulture

resolves, and that my first course
was to advise the tea plant
of America was made to them, it is
not a plan to me that is
any questions incompatible with
the subject of the society to decide
but as they are pleased to have
otherwise, I will take the liberty of
saying upon your side Sunday
to the tea committee to request you
will oblige me by explaining
why among the letters and documents
related to the tea raised collection
of tea in India prohibited, taken
by yourself, at the request of
the British Government and published
by order of the House of Commons,
not only my communication to the
Agricultural Society at their meeting
on the 15th of February 1832 regarding
the independence of the plant of America
of any being presented the plant to
the Society of its being enclosed into
the ~~Memorandum~~ ^{Society's} papers and the thanks
of the Society awarded to you for it
facts on the which I shall be ready
to the tea committee and the President

and the different world views on the
accounts of Ireland and Boston
all were or left in the habit of
their being an impression of the
works of John Jay and James Osgood
with the publication of the
same books it was the consequence
that of consequence or took any effect
for instance, to find it was so
far from any communication to the
Agricultural Society in February
1832. It is far from stated that
and has late Southern Major Robert
Bruce especially he with the
the into similar relation. There may
last is there any public cir-
culars of the kind as 1832

John Jay
Robert Bruce

and Horticultural Society of India.

Sir

May I beg the favor of your
submitting this letter relative to the discovery
of the tea plant in Assam, to the
Agricultural and Horticultural Society at their meeting
on Wednesday next. I trust as a correspond-
ent and contributor to the Society the liberty
I have taken will be excused. I will state
the case in as few words as possible.

Shortly after my arrival
in Assam in May 1830 in conversing with
my Native Gardener respecting the Botanical
productions of the Country he once
showed to me a plant which he called Chah grows
wild in the vicinity of Lushyab and
Beesa, adding that the natives of that part
of Assam were in the habit of drinking
an infusion of the leaves, this induced me
to procure the plant from Beesa and
introduce it together with the Gum Copal
Casutehau and other plants indigenous
to the Country into my Garden at Jorhat
that town the Capital of Upper Assam.

In October 1831 I left Assam
for the Presidency in consequence of ill health
when I took with me from my own Garden
several small Plants of the tea Gum Copal
and Casutehau which I gave to the late Dr.
John Lyster requesting that he would
present them to the Horticultural Society.

The following is the matter taken of the subject with regard to the tea plant in the Calcutta Government Gazette dated Monday evening 14th March 1832.

At a meeting of the Agricultural and Horticultural Society of India in their the Society's apartments ^{at} ^{the} ^{Government} ^{Hall} of February 1832.

The Honble Sir Colverdy Blyass President of the Society in the chair.

The following letters to the address of the secretary were read.

From Dr John Sytler to the Secretary enclosing two letters from Lucie Lecharton offering to the Society some Green Copal Casatchuc and tea leaves sent by him from Assam. The Secretary reported that these plants had already been received into the Society's Garden and he was requested to convey to Lucie Lecharton through Dr Sytler the thanks of the Society for the donation.

Lucie Lecharton states that the tea tree grows in the vicinity of Suddyah the most remote of the ^{Barro} ^{territory} towards the east in Assam to the ^{Barro} ^{territory}. Some of the natives of Suddyah are in the habit of drinking an infusion of the dried leaves but they do not prepare them in any particular manner. although the

in their green state they acquire the smell and taste of Chinese tea. when dried; the tree bears a flower very like that of the wild white rose, but much smaller.

On my return to Assam from New Holland in May 1834, I again brought the subject to the notice of Capt Jenkins who

had been appointed in the mean time Agent
 the Governor General in Assam and forwarded
 through him as chief authority in the Province -
 specimens of the leaves and fruit of the Plant -
 which led to its being admitted at last to be the
 genuine tea of commerce.

In the above communication
 I received the thanks of the tea committee conveyed
 to me by their Secretary Mr Wallcut who in the
 following letter under date 6th December 1834
 addressed to James Pattle Esq Chairman of the
 tea committee acknowledges the discovery -
 "beyond all dispute" to be due to me.

To J. Pattle Esq
 Chairman & members of the Tea Committee

<^/j,*x*. d(L /*****- **■ circulate a

Letter from Lieut. Lushington
 after Assam the 8th November with

#^U<^ ib&t^iCtCy+rjC t^J

n+6 hC/^*&***>»^***f^i

these specimens arrived by Langley
 today Afternoon. I also add some leaves
 received from Capt. Jenkins in September last
 belonging to the same plant.

The fruit is most unquestionably
 of the real tea, and probably it is of that one
 and indivisible species which is known to
 yield all the varieties in commerce. My doubts
 as to the 'Assam Tea' being a camellia could
 not possibly have been removed except by the
 production of the fruit; in which lies the whole
 distinction of the two genera (if indeed any
 exists except a commercial one) that only
 the question and the accompanying
 communication corroborates the assumption

(?&•*-f*€(I*. &<'fr*

*!%M

of the *Leucostictis* growing wild in a season which was derived from a knowledge of its being found indigenous in other mountains on our North Eastern Frontiers.

I humbly submit that a more interesting a more valuable fact has never before been brought to light in Indian Agriculture than has thus been established beyond all dispute by Lieut. Charlton. The tea plant is a native of Hindoostan within the Honble Company's dominions. It grows wild as a common shrub from Suddyah all the way to the Chinese province of Yunnan, through an extent of one month's march and there the identical shrub is reported to be extensively cultivated. Nothing therefore remains but to ascertain whether or not the produce is convertible into potable tea, and it would be strange indeed if this could not be effected by a proper management of the plant and a proper manipulation of the leaf. The Chinese cultivators whom Mr. Gordon is endeavouring to send to us from China will be invaluable in this respect.

More than I can possibly express to you Gentlemen do I feel the value of Lieut. Charlton's and Capt. Jenkin's communications, both those just received, and the former ones which, although they were circulated long ago by Mr. Gordon, I beg permission to annex for the sake of reference. I beg earnestly and anxiously to recommend the plan long ago suggested by Capt. Jenkin in his report, that a Botanist be forthwith deputed to Upper Assam in order to report to your Committee upon a number of points connected with the glorious discovery before you a knowledge of which is

indispensable to make that discovery complete. In case you should look upon this matter in the same light as I do, I can not doubt that the Government will readily concur in any plan you may recommend which it would be extremely desirable to carry into effect - with the least practicable delay.

In conclusion I request leave to return the thanks of your Committee for the invaluable contribution referred to in this letter.

Bel. Secy

(True copy)
I have &c
Wm. Wallich

off. Secy to the Sea Committee

I was subsequently appointed Superintendent of the Sea Plantations, and Mr. C. R. Pounce under me as overseer. In August 1838 I was severely wounded in storming a Stockade at a place called Gabian about 60 miles from the Port of Becheval and obliged in consequence to leave a few days eventually returned to England. On my departure Mr. Pounce succeeded me as Superintendent of the Sea Plantations.

During my stay in England the Majesty's Government called for all letters and documents relative to the discovery and cultivation of Sea in India, which were furnished by Mr. Wallich, laid before Parliament and ordered by the House of Commons to be printed 27 February 1839, on obtaining a copy of them what was my surprise to find that the official letter to the Sea Committee dated 8th December 1838 bearing the signature of their Secretary W. Wallich giving me the credit of the discovery was entirely omitted. In lieu of it appeared a letter No. 6 page 38 & reports

LJL~*t£y

from Dr. Wallis and the Members of the Tea
Committee to Dr. H. Macnaghten Esq dated 7th
January 1835, of which the following is an extract.

This with feelings of the highest -
possible satisfaction that we are enabled to
announce to his Lordship in Council, that
the tea shrub is beyond all [redacted]
in Upper Assam, being found there to [redacted] L
an extent of country of one month's march
within the Honble Company's territories from
Suddah and Bessa, to the Chinese frontier
provincial of Yunnan, where the shrub is
cultivated for the sake of its leaf. We have no
hesitation in declaring this discovery which is
due to the indefatigable researches of Captain
Jenkins and Lieut. Charlton to be by far the most
important and valuable that has ever been
made in matters connected with the Agricultural
or commercial resources of this Empire.

In the above Dr. Wallis has declared
the discovery to be due to myself conjointly with
Capt. Jenkins, notwithstanding the assertion in
his former letter, and although it was recorded
in the proceedings of the Agricultural and Horti-
cultural Society of which he was Vice President
that the tea plant had been presented by one letter
Society thro' the late Dr. Lyle [redacted] r*c*~SA~
into the Botanic Garden of [redacted]

charge before Capt. Jenkins ever went into Assam

At page by Parliamentary Reports
Dr. Wallis has occasion to change his mind
again. In his letter to Capt. Jenkins's agent
the late Governor he writes [redacted]
recommending that Mr. Bruce should
be nominated to the charge of the tea [redacted]

he gravely states "It was Mr. Bruce and his
Lieut. Brother Major R. Bruce at Gohath, who
originally brought the Assam tea into public
notice [redacted] 10th

~ yjt^r* m-j

slightest idea of its existence, a fact to which
the late Mr. David Scott has borne ample testimony.
It is needless to contrast these con-
flicting statements. In the ^{first} official letter dated
Providence Gardens 6th December 1836, it is acknow-
ledged that "the discovery beyond all dispute"
is due to men. This letter I before observed is
in the correspondence laid before
Parliament, in the second 4th page 13² Parliam-
entary Reports dated 7th January 1837: it is
declared that the discovery is due to myself, con-
jointly with Capt. Jenkins. In the third hearing
date 15th of March 1836, Parliamentary Reports
page 66 it is asserted that Mr. Bruce and his late
brother Major R. Bruce originally brought the
discovery into public notice.

As regards Mr. Wallis's last assertion
when may such kind in what manner was this
important fact announced to the public.

It must have been received with
very great indifference. There is no allusion
to it either in the newspapers or any other
publication. The Asiatic and Agricultural
Societies have not adverted to it in their
Transactions, but what is more remarkable
Mr. Wallis himself who has held the situation
of Resident to the Honble East India Company
ever since the year 1814, has allowed it to trans-
pire without the slightest notice.

Mr. Bruce has stated Parliamentary
papers page 91 that he was stationed at the break-
ing out of the Burmah war (this must have
been in 1836) at Suddiyah where he was
residing, and had been almost constantly
until my arrival there the latter end of 1834.
Can it be believed, the tea plant growing near
him in such profusion, if he really supposed
it to be the genuine tea of commerce, that he

would not have taken some effective mea-
sures to prove it was so. He states in the
same letter that he sent seeds and plants
to the late Mr. Scott and other officers below
there is no evidence at all on record of his
ever having done so) and that he afterwards
"verbally and officially brought the subject
to the notice of Capt. J. C. King in 1832" this
may have been the case but the tea plant
had been presented by myself to the Agri-
-cultural and Horticultural Society and the
fact of its growing in the vicinity of Suddiah
made public the year before in February 1832.

I will not trespass longer on the
patience of the Society. I have only now to beg
that the Society will determine and record
on their proceedings to whom they consider
the discovery of the Assam tea plant due.
I need scarcely add it has been ascribed
to Mr. Bence and the Society of Arts in
England have awarded him their

Gov. **1** **L*^.**
Revenue Dept.

Sir
I am informed by the
R. H. the Governor of Bengal to return the
enclosure rec^d with your letter of the
28 ult. and to state, in reply to the question
put by you, that the document of which you have
transmitted a copy, does not appear to have
been forwarded by the late Gov^l Commission
to the Gov^l Government with their letter of the
24 Dec^r 1834 and therefore was not among
the papers which were sent to the Court
of

of the House of Commons. This copy
has been owing to the circumstance
that the document in question was not apparently
an official letter, but a private circular
from the Off^g Secretary to the Sec^y
of the League.
