 the return character was
 in the last 10 days were
 in the first 10 days of the year.

[The page contains several lines of extremely faint, illegible handwriting, likely bleed-through from the reverse side of the paper. The text is mirrored and difficult to decipher.]

The first thing I noticed when I stepped
 out of the plane was a sense of
 freedom. The air was crisp and
 the view was breathtaking. I had
 been told that the weather was
 perfect, and they were right. The
 clouds were just what I needed
 to clear my mind. I had been
 so stressed lately, and this was
 exactly what I needed. I had
 heard that the view was amazing,
 and it was. The mountains were
 so beautiful, and the water was
 so clear. I had heard that the
 food was good, and it was. The
 service was excellent, and the
 staff was so friendly. I had
 heard that the trip was worth
 it, and it was. I had heard that
 the view was amazing, and it was.
 The mountains were so beautiful,

My dear Sir

I have metted one of two copies
of your printed report to the Superintendent
of the Bot Garden here, requiring him to
report what plants of those enumerated
he had not got and were desirable to
be introduced here. I now enclose
a copy of his report and I should feel
much obliged by your sending a supply
of the plants which he considers desirable.
The Agents of his Govt in Calcutta are
Gillanders & Arbuthnot.

Yours very truly
J. Hooker

Charles L. Stone
 19th May 1841

Abstract of a letter from the Secy to the General Council
Public Instruction to the Secy to the Govt of India in
the General Department No 8 of the 6th January 1848
communicated to the ~~Secy~~ Council of the
College in Dr Nic's letter No 101 of the 28th January
1848

13. The Govt. Council has been sorry also to learn
that for a very considerable period, the lectures upon Botany
had been omitted. The Govt. cannot accept Dr Walker's
Excuse that the distance of his Residence & his avocations
in his Garden & the Tea Committee, have made it nearly
to impossible for him to fulfil his Engagement. He should
not in this manner have absolved himself from the duties
entrusted to him, nor should the visiting Committee in College
Council have allowed the omission without having it to the
notice of the Govt. It is not to be complete & laboured
course of his function in Botany should be carried through at
the College. There is no less use of this, & an accurate know-
ledge of minute dissections of long Catalogues of Plant
and be generally of far less value to
many other branches of the biological sciences. But it
might be expected for Dr Walker that
each term of study delivers a number
of lectures

as also give the Medical Students some knowledge of
the Organization & Structure & Professions of Health & in
to attend a general meeting with the Science and
and to lay out fund raising every 2 hours with night
to be directed for further the annual Research.

All sorts of work with pleasure. All of which
has led to the same day's doctor. —

reply 24 Feb

I have been thinking of you since
 I saw the Post Office and the sort of substance
 in it. I believe the plant but shall see
 all the accepted, I believe, but I do not
 know whether it is a species yet and may be
 that it is a species of the same. I hope
 to see you very soon, perhaps, but I
 cannot say for certain. I am very
 glad to hear of your success in the
 study of the plants and very much
 interested in your progress. I hope
 to see you very soon.

I cannot tell you how much I
 am interested in your study of the
 plants and how much I am interested
 in your progress. I hope to see
 you very soon. I am very glad to
 hear of your success in the study
 of the plants and very much
 interested in your progress. I hope
 to see you very soon.

January has been pleased to place my
name among its corresponding members

The honor thus conferred upon me is
to highly prized. It is enhanced by the fact
inasmuch as the nomination has been
communicated to me by a most valued

friend, who has very often, and for a
long period placed me personally, as
well as the garden under my charge, under
my great obligations. This pledge of

of the Society of Antiquaries
received. The Society of Antiquaries
of London

... as well as the other. I will be sent to
 you to report every possible incident.
 I will be in a small degree the chance
 to make his make, by making report
 of them as soon as possible. I am pleased that
 you will make these my sincere sentiments
 known to your Society, together with the expressions
 of my cordial respect & affection.

The papers or laws for some time have been
 been able to take to glance at the 1822 edition
 of your laws and have been found with
 the map of highly interesting, practical and
 useful information about has already been
 collected a given to the world. This anxious
 desire will pay your Society proper
 and financial through many many years.

Yours &c

I have been very much obliged to you
 for the acknowledgment of the honor that has
 been done to my tract it will be admitted as
 one of the most noble ones - I wish that
 you had not given altogether unprofitable, alone
 of the other parts of the magazine with the
 same regard of Mr. Richard's laws to Boston
 (Lovers p. 27) I am indebted to that
 noble and able gentleman for a admirable work
 which I had brought back with him, and
 it may not be uninteresting to the Society
 to know what success I have had, and at what
 cost it could have germinated in the work
 I might say that there were 25 or 30 sold
 on the 16th May last year, among an
 amount of 1000 copies under the kind care
 of the Society of the whole number 1400
 I would not consider an instance of great progress

My dear Sir —

About 10 days since I had
the pleasure to receive your letter of the 18th of Nov.
acknowledging the reception of a copy of the
"Vocabulary & Phrases" which I did myself
the pleasure to send you. Last Saturday
(the 28th) I also had the honor to receive
your second kind letter of the 9th of Dec.
accompanied with a beautiful thank
please accept, my dear Sir, my warmest
sincere and grateful thanks for
this truly valuable & useful present,
which I shall most highly prize and
which I shall ever feel it an honor
to bear witness of respect & esteem for
the kind disinterested friend who
presented it. I cannot need say
that both my dear husband & I are
feel ourselves highly indebted

honoured by these flattering atten-
tion from a Gentleman occupying

Testimonials. 1840

Extract of despatch from Government of India
to Resident dated 20th Oct

"The Governor-General, in reviewing
these transactions has to thank you for the marked
ability, firmness and judgment with which you
have met a long course of adverse & evasive
negotiation on the part of the Nepalese Government
and he begs you to accept the expression of his
cordial acknowledgments and approbation of
your services on this subject."

Extract of letter from H. Prinsep Member of
Supreme Government dated November 4th "I
congratulate you on the issue of your late
troublesome negotiations. They are all you
could wish & will gain you great and justly
earned credit here & in Europe."

Extract of letter dated 20th October from H. Corson
Secretary to Government of India. "Lord Auckland
said, whilst sanctioning the cautionary force
on your frontier, that 'it was due to you to send
it';" meaning that you have shown yourself so
right in all your judgments appertaining to Nepal
policy that your recommendations ought to meet
with attention from personal as well as political
grounds."

247
Extract of Letter from General Canfield
Resident at the now dated November 18th "you
have been placed in a situation very delicate & of
travelling and you have done your utmost with
wisdom grace and promptitude meriting
the approbation of Government & the acclamations
of all."

Extract of Letter from J. Buckley Esq: Secretary
to Government dated Baltimore November 14th
"I congratulate you on your important
successes at Baltimore. The credit will
do it to you in Indian History. May we have
line to witness the workings and to connect the
good results with the opportune provisions
which it has been your omnibus & distinguished
not to say."

Post-Office

Calcutta

My dear Sir

In prosecution of my duties
in investigating the natural resources of
the Tinasserim Provinces, Lord
Ancltoms told me yesterday that he
thought I should find it useful to have
in my Establishment a Native who
has ~~acquired~~ some knowledge of Plants,
the packing of seeds, &c. and that
probably you would be able to point
out a man amongst your Corps of
Gardners who, receiving now perhaps
4 or 5 rupees a month, would be
glad to go with me for 20 -

If you can assist me in this

to be opened. And also, I had written a few more
of this kind in a note packet of cards, which
you had sent to the Arctic place, by the Bristol mail, nearly a week
ago. The letter to the 18th November was almost destroyed by the post, and
nothing left to the card papers and to the inside of the envelope some
of the packet, and was it not for the successful winter - which the letter
was substituted should have yielded some to make it perfect, as it
contains matters of much interest to the party which my excellent
friend sent a packet. Some of the letters must have been very fine
and by their decomposition must have suffered destruction, for the
whole inner packet formed no more than a few sheets of paper
which will be melting. As in the case of the long packet
of the package was perfectly fine for any purpose of
communication -

I should have been more careful in sending the
French book, yesterday, but I had to attend to the editorial
duties on a double course which had to be done and at the same
time to be present at a College Council on urgent matters, required by
the Council of Public Instruction, relating to the distribution
of the duties of each of the Professors. It is in connection with this
matter, as far as mine are concerned, that I venture to beg before you
excuse me, which, if I do not quite

mislike, I am surprised a week to be at the point of foot as I had the honor of your having personally
there is no pleasure greater in my function as one of the pro-
fessors of the College, which I have felt and do feel that
it should be supported in adhering to, by your Lordship's out-
spoken and concerned.
My duties at the Medical College consist in
teaching of Anatomy in Introductory and Medical
History. I recommend a course of lectures on the History

./, > ,, - A | & -

of my ship, consisting of the students, down to, several

are quite well employed and as far from having any
down here on Sundays, as they would be any where out
of the garden -

But my Lord, how do I salute you, by your
sincere presence during one of these Sunday demonstrations of
Botany in this garden - that is precisely? Your Lordship
do not disapprove of them, in which case I will continue
serenely

of it and as far as regard the student, my heart is too wide
to desire any work-days. **Zfc^^r-|^ £.*** I am the
most one therefore, in that view nothing more nor less than a
state of attachment towards an Institution **r w** which I should
not to declare is in my humble opinion the most interesting
important and successful - and the most interesting I would
add, in all India. If I am not wrong individually in regard
the student and the garden and accompanying them over these
grounds or perhaps to go upon these grounds, probably, I
has been brought before them during the regular hours of
lectures - I should think there can be no wrong in their
in the College on that score. Besides Sunday is
the day when families and visitors generally come down
here for a little fresh air and relaxation. Must I chat
the student, to them & amongst themselves from which
a few pleasant and interesting relative subjects, because
independent of a little fresh air, the particular relaxation
into the young mind can be improper. I am happy
to say that parents of this nature are extremely
congenial to the nature of the Country. And I
have to assure and was better qualified than
I could, any pretensions of being & would make
pleasant botanical visit of some of the students.

I beg to apologise for the great liberty
I have taken in this

I have just for my eyes seen some fine
specimens of the woodrat in the high marsh.
I will get some in the day I am up. I have
seen some in the high marsh, some
I saw in the marsh, some in the high
marsh.

I have just for the first time, as the weather
is so cold, I have seen it. I have seen
it in the marsh, in the high marsh, in the
marsh.

I have just for the first time
seen it.

I have just for the first time seen it, and I have
seen it in the marsh, in the high marsh, in the
marsh.

I have just for the first time seen it, and I have
seen it in the marsh, in the high marsh, in the
marsh.

Dr. Professor Wallich

Sturman
Laguerre

30 January 1844

Dear Mother
I received your kind letter of the 25th and was
glad to hear from you. I am well and hope
these few lines will find you the same.
I have not much news to write at present.
The weather here is very cold and the
ground is covered with snow. I have
not been out much lately. I have
been reading some of the papers and
am interested in the news from
France. I hope you are all well.
I must close for this time. Write soon.
Your affectionate son,
Sturman

Handwritten text, likely a letter or document, written in cursive script. The text is extremely faint and illegible due to the quality of the scan. The document appears to be a page from a book or a letter, with a signature visible at the bottom center.

Le Secrétaire Général hon.
 M. de Ségur

Vallon reg. et. 2. 6. Institut. France.

INSTITUT D'AFRIQUE.

la fonJittfiun.

ARTICLE I^{er}. — L'Institut est fonde dans le but de contribuer a la civilisation et a la colonisation universelle de l'Afrique par l'Agriculture, le Commerce, l'Industrie, les Arts, les Lettres et les Sciences.

1. — Il a pour but de contribuer a l'amelioration de la Race Africaine.

2. — Fonde dans l'interet de toutes les nations, l'Institut d'Afrique embrasse dans ses limites toutes les contrées qui forment cette partie du globe.

3. — Il se compose de sections appartenant aux nations des deux continents.

4. — Chaque section a un ou plusieurs presidents, choisis parmi les hommes les plus considerables de chaque contrée. Cinq membres constituent, a l'etranger, une section correspondante chargée d'eclairer l'Institut sur les besoins relatifs a chaque point de l'Afrique.

5. — Chaque section agit *pour* l'Afrique, la direction de l'Institut, conformément aux principes les plus propres a arriver a la civilisation et a la colonisation, et, sous le rapport religieux, chacune conformément a sa foi.

6. — Chaque nation est représentée par l'Institut d'Afrique, siant a Paris, par un President étranger qui, avec le President titulaire honoraire, est respectivement chargé de la signature du diplôme de sa section,

7. — L'Institut représente et agit en face des gouvernements les interets de l'Afrique, il s'étend dans toute le monde, a l'aide de livres, de journaux, de conférences, et de documents relatifs aux meilleures institutions sociales, les lumières de la civilisation européenne,

9. CLASSES. COTISATIONS.

L'Institut est composé d'un

nombre de membres nationaux et étrangers divisés en quatre classes.

. que veut bien me donner l'Institut d'Afrique en *we* nommant President. C'est une grande recompense de mes efforts j'our 61 re uille a mon pays et agreable a mes comiiairiotés. — (PanY, 17 juin 1833.)

LE nuc DE DOCDEAUVILLE.

M. le vice-amiral ROSAMEL, Minislre de la Marine et des Colonies. — J'ai regii 3a lettre < j'ue vous m'avez fait Thonneur de m'ficrire pour m'annoncer que lc eooaeU scicntiBque de l'liistitut d'Afrique a bien voulu me nomraer l'un de scs Presidents honoraires. En m'admeltant a un si haul rang dans son sein, cet illus-corps me donne le t&noignagc d'un sentiment qui m'houorc beaucoup. Veuillez filre, • Monsieur, aupris du conseil scieniifique, Tin-terprcte de ma profonde gratitude, et recevoir l>our vous mon remerclment partieulier des expressions flatteuses avec lcsquelles vous m'avez fait connailre sa decision.

ROSAMEL.

M. le L-G³ Marqnis DE FiitGEvrLLE, — Test avec une veritable reconnaissance que j'ai appris qu'oa a bien voulu n'agreger a line soci^lfi dont le but est si louable, el votre iiternediatrc, monsieur, angmenie le prix de cotte distinction.

LEWDEFREGEVJLLE, LIEUTEWAHT-

MR. BOSTON

General W. B. Skill

Feb 11

Major General Walker

Dear Sir

Letter I received at Fort
Haid. The great pleasure
of February. Asks for the

Mr. Prof. Paul Walker
My dear General Feb 11

I have got small
to give an account in writing
for Dr. Walker's information,
of what he knows or can see
about the way of gardening.
I think it probable that the
person who has been speaking
of him to the Doctor may be
a man formerly of the 9th and
temporarily employed about
the garden - if so he is little
competent to judge, not being
himself a gardener. But it
will be for the Doctor to decide
in the matter. Without any

quick about it myself.
 I can only say that I would
 is a tract for the year. You
 sufficient and suitable.
 of making being
 and of following
 and discussed the
 may receive. I mentioned
 before that the state should
 to commission at once to
 give up his claims upon
 the service; he said that he
 for making a trial of the
 which he said he would be
 do it the night like it

and also to enable Dr
 Hall to judge of the
 qualified to conduct the
 it. For the credit of Dr
 it. In working to give him
 the opportunity of showing
 what he can do, I showed
 not to suppose that the law
 in Chief would make any
 services objectionable to granting
 to a government man who
 would ultimately be well
 provided for if he proved
 competent to do his dis-
 charge. I suppose you can find
 in the course of the following
 city of the government.

I have been thinking for some days of writing
 you a long letter but have not had time
 to do so. I have been very busy
 with my work and have not had
 a moment to spare. I have
 been very busy with my work
 and have not had a moment
 to spare. I have been very
 busy with my work and have
 not had a moment to spare.

I have been thinking for some days of writing
 you a long letter but have not had time
 to do so. I have been very busy
 with my work and have not had
 a moment to spare. I have
 been very busy with my work
 and have not had a moment
 to spare. I have been very
 busy with my work and have
 not had a moment to spare.

123
The first thing I noticed
was a strong sense of
direction. It felt like I
was being led by an
invisible hand. The
scenery was beautiful,
with rolling hills and
small villages. I
wasn't sure where I
was going, but I
tried to stay calm.
The journey was
long, but I didn't
mind. I was
in good luck.
I had heard that
the trip was
worth it. I
wasn't wrong.
I had found
what I needed.
I was
home.

The first part of the book is devoted to a general
history of the world, from the beginning of
time to the present day. It is written in a
clear and concise style, and is well
illustrated with maps and diagrams.
The second part of the book is devoted to
a history of the United States, from the
beginning of the settlement of the
country to the present day. It is written
in a clear and concise style, and is
well illustrated with maps and diagrams.
The third part of the book is devoted to
a history of the world, from the beginning
of time to the present day. It is written
in a clear and concise style, and is well
illustrated with maps and diagrams.

Kiddapour 6th Feb 1841.

My dear G. Melick,

Government but

writes a good hand & paper

find the **tU&+ . Xtr-** money has

paper thro' his hands, & no pe-

-cuniary transactions confided

to him while in my office - so

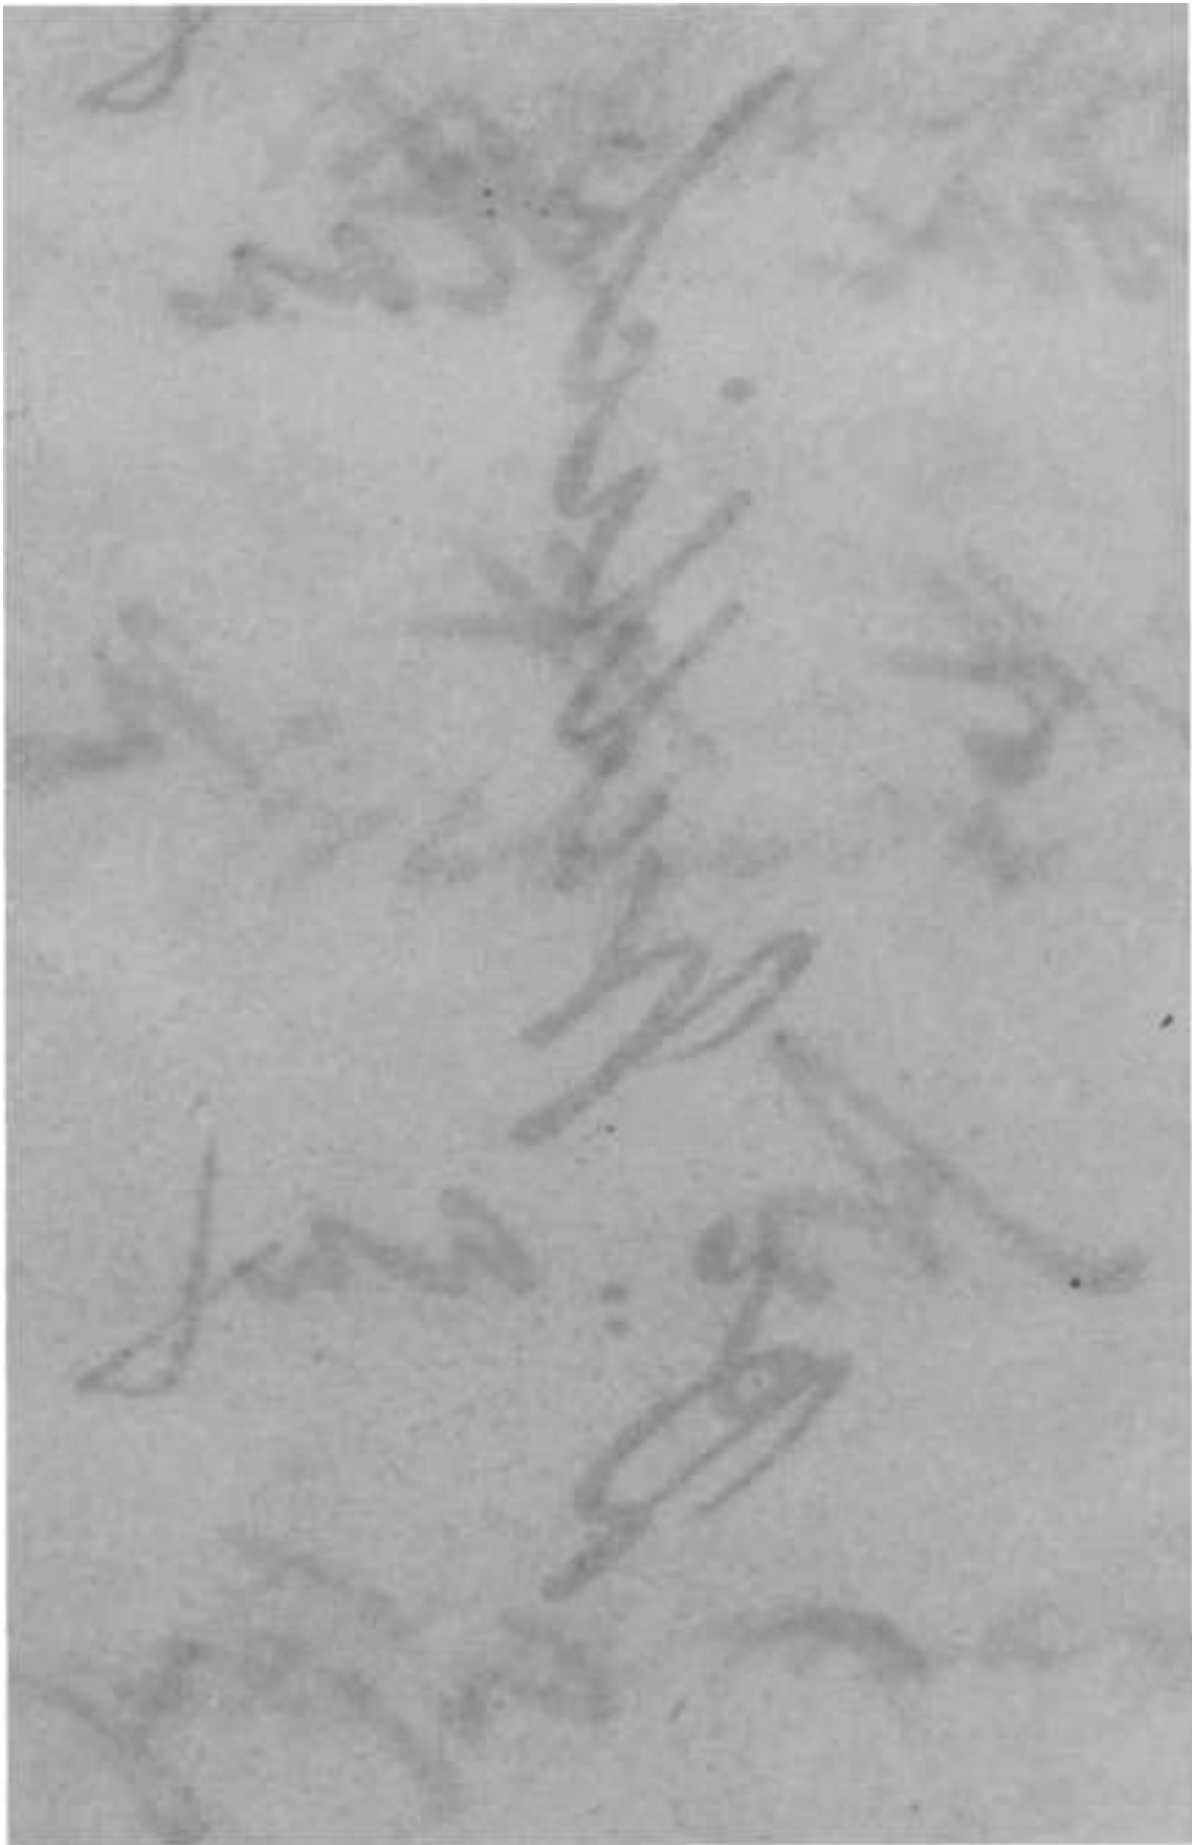

I can say nothing about his

honesty, which however I believe

to be rather above than below par as
compared with the majority of his
countrymen. As an index, the
paper-writer & copyist I found
him very useful, & have found
it reasonable to testify to his
regularity & attention to his
duties.

With very kind regards to
the ladies cordially yours
D. P. Mallard

Very Obedient Servant
John M. Buean

Dr. Gullick

8/2/41

My dear Madeline

Excuse me

Henry H. Gray

Instead of awaiting my reply
I'm kind & sincere I
invitation to spend a few
days with you I am
thinking of taking a run
down in the Amsterdam
& back - I had nothing of

7/3/51

My dear Madeline

The basket of apples

you have ordered in

capital order I have - kindly

let me have the \$10.00

letter if you can spare

it as I shall have to

submit it contents in

Wednesday. If you can

please do with it means

in the state of the
facts it could be
most acceptable

I hope we shall have
the pleasure of seeing
you on your way.

I have a great admiration
of your strictness
& regard for the
wise - the wisdom

will be on my mind
just as on Timmons
best advice -
As I have just a bit
made out by one of your
people - perhaps the
the very same copy
should be a pleasure
in the list.
How are you? I am
about again but feeling
the same - perhaps

rev 19/2/41

... to
... your kind letter of the 17th inst. written with so much
... of consideration on the day after receipt of
... from Boyle constrains me to break at once
... through my very respectable habits of privacy
... I believe you at once from all idea
... of my having in any way felt anxious about
... the non-arrival of the microscope - you will
... aware

... in his power & all that could be

iA £52L 'A' > ~ * - >

... I would therefore, be interested

of you, my valued friend, to lay aside
all concern, resting assured that I feel
no impatience - *A^XP~ JU-d^^itf^'
thanks for the great kindness you have
shown in undertaking a commission
which I could not otherwise have had
executed - I exceedingly regret that the
matter should have caused you a
moment's anxiety.

I have said that I have had no leisure
for botanical pursuit - and in truth
having taken charge of a new dis-
-trict in Dec-59, with which I had to
make myself acquainted - having then
been kept out in Camp until the 14th
June - and had in consequence an enor-
-mous arrears of business to get through
during the Rain - while my marshing
Commenced again in the beginning of
Nov^r & will continue until the end
of May, I have had no time consci-
-entiously to lay aside for either relax-
-ation or correspondence. beyond
what might be absolutely ^{indis-}missible -
and thus it is that your most friendly
of the 24th June has remained

£/£

so great a length of time unacknowledged.
I really trust amend - or shall justly for-
-feit your esteem - & that of others to whom
I have belated equally ill - During this
long period, I must have almost forgot
the name of the thing, but for the ar-
-rival from time to time of I work
- & I trust be yourself - is

was procured for me through your
kindness - Many besides myself & the
Jubbulpore have delighted to sit over
these works; & I trust profited by
them -
In a recent matter, however, I have
been obliged to turn some attention
to my falling in with my official duties - some
flax I had down according to the express
directions of Mr. Hodgkinson who was
then in his way to Calcutta & passed
through Jubbulpore - however he
found too late, -
woody, & we were
of the some
to show with
paper season
- spring of the

able to make anything
however, I was used
my own hands at the
that is, just at the be-
gins - and the fibres

obtained for it we considered pertinent,
- Carl goes - I have just sent a bundle
of it down to Spray per steamer in order
that it may be fairly tested by judges.
There I have put up with it a piece
of cloth or canvas unwashed & also
washed, which have been made up
by the Irag prisoners in our school
industry - though these last are not
yet the proper thing - Pray kindly
inform Spray with any very kind
regards of this dispatch, but I should
not be able to write to him in time
and tell him that I am anxious
to know what value is put upon
it in Calcutta for export, or what
price it would realize at home
in order that we may judge what
it would prove remunerative -

v- t**^* -

of cotton I regret to say that
I could not procure in time for
the last sowing a sufficiency of
the seeds of any of the reported
kinds - but I have brought a
considerable crop of the country
cotton to maturity & have had it

perched with the greatest care & cleanliness allowable with a view of sending a bale of this also down to Sp... in order that its value as an article of export may be ascertained - as this appears to me a very great point as a first step.

it were brought to the notice of the Socy, & great I saw back felt here to the introduction of improvements ~~the~~ through the people, and I should think the same would hold more or less in other points also, that in the Bazar of the country little or

is made in price between the kinds of cotton - & still less in any respect paid to its cleanliness or otherwise. which last point I believe tells more than any other in the English market. The cultivators here have repeatedly told me that if there were any Capitalist or the spot

at once give them say one rupee per hundred more for clean cotton than the current rate of the season, they would at once take measures for preserving the clean portion of their cotton apart from that which has been mixed with it - and I have no doubt that the same will hold good likewise in regard to sowing the seeds of the superior kinds of cotton. But at present whatever efforts they

V L ^ ^ . ^ ^ ^ ^

^ t ^ e ^ P * . < ^ £ *

fa ~ sd * < # &

£ US ~ X & ---- * ~ _ * - * ^ 5 s)

ought make, it is certain that they
would have to sell the produce at
the very same rate realized by any
other cotton in the Bazar - which ne-
cessarily precludes them from moving
in the matter - and I think it will be
well worth the consideration of Govt in
the endeavours they are now setting on
foot for improving the cottons of the
country, whether it will not be well
to organize some plans for purchasing
at fair rates all improved cottons
that may be offered - until the sys-
tem shall have become so far matured
as to admit of private capitalists es-
tablishing dealings of this nature with
some certainty of adequate returns.

I may send me up a splendid
supply of seeds - but unfortunately
from some mismanagement of my
agents on the river, they did not reach
Jabalpur until Jan'y, when I was
out in the district - I have had all
the wheat, oats, & Flax raised care-
fully, however, with every prospect
for irrigation - so that I trust his

liberally will not have been so far misapplied - but I fear the vegetable seed will now turn to little accounts & shall anxiously hope to receive some foreign cotton seed from him before the end of May -

I have in hope too, my friend, of receiving from you some tree seedling if a sufficiency of these should be available - or some seeds, if more easily

I think I have before mentioned to you an idea of some that some of our Hill sides are well adapted to this - Also may I hope for some Mahogany & other tree seeds - Sagar having heretofore benefited from the packages you formerly kind sent me - but not Jabalpur - the Brazil beans you sent us so liberally, we have used some plantations - I had understood that for the American Cotton planters, as invaluable coadjutors in a but I grieve to think we have after all been denied them -

Let me now examine them You will find
the perfect in all manner, the plants to be
from a want of water, some have even
many the latter part of the process
passing from the perfectly dry and yellow
state of the roots or bark of some, others, least
that had affected some of the above and
the plants were to be very scarce - but only
a small proportion.

I enclose to you a copy of a report
on the Census that arrived yesterday with
some notes from Mr. Oakes. This is
also a one of my ^{plain} plants, taken at
a distance of 1000 miles, which I enclose
from you are of *Parus bicolor*. In
consequence of the box not being
yet closed, the plants have
a number of narrow branches which show
all that can be done, shall be affected to have

Q

the list

contract ordnance Carriages were, but to supply half weight material
for their repair ^{at} the magazines under the Presidency - - In
October last I sent my ^{order} ^{& / or} Contractor to Mysore District on the order
to purchase & cut up Sipoor Timbers that might be available there
and sufficiently well seasoned for the purpose - he has returned
last month I forthwith detached my servant to obtain more in
British Madras and I have myself visited various places within
the limits of this & bought all I could find calculated for my
purpose - I intend to trouble you with all this detail mostly better
but it is a difficult matter to procure the necessary Sipoor Timber
for our heavy and constant demand now, and that a time will
arrive when - perhaps Govt. will be embarrassed to obtain this
at any cost - but these considerations, I deemed it my duty to offer
my plan for the plantation, and although I may continue to provide
all my wants until the end of next year when I am compelled to
renew from the service, I cannot help lamenting that what appeared
to me after having been nearly nine years in my present office
a matter of some importance, should have been so summarily
disposed of - and apparently deemed unworthy of your consideration
I know little except my opinions may have
with the Govt., there is reason to be alarmed at the
management of this costly concern here - When I arrived
the Timber was supplied by the Commissariat Department
and after a long correspondence, I satisfied the Govt. Board
that no system of supply could be so expensive to the State
as that which obtained & the result has been in consequence
amounted to saving of nearly one half by allowing me
to supply myself - I bought the one day 500 Sipoor Timbers
for 24 & 25 Rs each and the surplus which was used for
ordnance purposes were sold by Auction for on the average
Rs 21. 10 - a valuable proof my bargain was a good one

many of the woods sold for more than the best had cost. —
I think have answered, because there were many fine
specimens of the Saffers in all the surrounding Grounds & Gardens
and I was afraid had I selected a tract of the very valuable
lands which yield Potatoes, Wheat &c in the neighbourhood
the sacrifice of Revenue would have proved an intermission
able objection; again had we gone to any distance in
search of a desirable location, the thing might have failed
as I understand a similar attempt did in Scotland/Italy
of that constant superintendance which could
have insured success. — In me the plantation would
have been a hobby in which I should have taken great
pleasure and been well happy to be guided by your advice
in the management. —

As to the operations of the Saffers in the
by the Saffers from the City of Burmah and also in the
they actually work and the value of wages are about one half
what the same description of aborigines can at Calcutta, and in
addition to the few Europeans there are mentioned there are
only to Ministers on the Establishment who are the servants of the
state, but as all hands employed here ^{have} been many years engaged
under European superintendance in manufacturing &c &c &c
of all descriptions, the work is as well performed as it could
be were the People paid by Govt. from one year out to the
other. —

I remain Dear Sir with much respect
Sincerely Yours
(Signature)

indica -
stansata, & dentata the latter
by scab. column
bifolius.

- 1 Pilea tofolia
- 1 Lantana indica
- 2 Bauhinia - yellow seeds
- " " in great variety, mostly yellow
- 1 Capparis -
- 1 Gopium - uncultivated, tall, column coarse
- 1 papilion - like the P. furtiva, flowers
white, of a very ill odour -
- 2 Cryptina - scab. & large
- 2 Morina - see very pretty a blue spike,
shaped like a horn, very soft, yet firm
- 3 Monarda -
- 3 Eridia - Most beautiful, spikes large,
on column, or spotted blue & of a very strong
- 1 Symplocos - a most delicate specimen
leaf in bright green

In the same time I have observed no-
thing uncommon. The principal genera
are

- Sten-*
- Polyphallus*
- Adiantum*
- Polypodium*
- Asplenium*
- Lycopodium*
- Polybotrya*

One other *Asplenium*. I forgot to mention
about 1 ft in height, in shape like a
miniature *Asplenium*.

The rocks I have examined have been
found by the Hon. John Lubbock Esq.

I should be extremely happy, so far as my
ability extends, to ascertain the nature of
the rocks which you wish to have examined.

✓ My dear Sir,
 I have not like the intricate contents
 of the note of the 10th ult. regarding your letter
 upon the report on the expediency of releasing
 all tea matters on a sort of general warrant, but
 heartily agree with you in saying that such
 is the main-spring of the operation, and that
 to them not with the result to any thing but
 to force state as well as some other to all
 things to the proper persons, until they
 have seen your many reasons of the same kind
 but the fact would be as it were to let
 your tea-revenue & economy to be
 kept at the expense of the state, and
 what you do not believe. I have seen the
 fact it is not the thing, and that the
 business into these better matters have
 had no reply to my representation upon
 the 6 pages of plan, and have the opinion
 that

Washington 11th July 1864

Dear Mother

I do not like this wilderness containing
 up here at the Ball. I was very glad
 again to report on the expedition of John
 will be a matter an act of faith & venturing
 heartily open with you in saying that neither
 to the main - saying of the expedition & I
 bottom but will the result be any thing but
 responsible as well as very useful to all
 going with whom I am sure that they
 have got me very much to do but I
 that I shall be able to do it
 to - expense - I am sure that I shall
 work at the window for you I shall
 and I do not feel as if I had to go
 that I must be very much interested
 I am into her and I am sure
 I am sure to my satisfaction
 to be a good friend, and I am sure that
 that

Your affectionate son

and a description of the space-faring in 1884
 in which I was present for plants intended for the
 right - mostly with the hope of obtaining specimens
 of the various plants of the various parts of the
 world. I was present at the party - of course I saw
 the plants yet have not had a chance to see them
 that the party to whom the plants were sent
 have been very busy to see for a long period
 and a number of specimens of the plants had been
 the specimens of plants that were brought up
 in 300 of large plants, and those that were
 of smaller size were arranged for the occasion
 and the plants were placed in boxes for
 shipment and the little things were separated
 little last in the delay that might have been
 in the arrival of the plants would have been
 fully understood on his occasion for
 letters in other ways in which
 persons had appeared on the subject
 when the boxes have been unpacked

Plant

What will you be tomorrow.

What you propose about that person
produced from the hall of justice to my
before you this morning. I believe he went
yesterday to the bank. If you
as a result of his health, which has
today, otherwise he would have
entered the matter of time.

I shall think the great best and full
of work. It is the accused detail work
that robs me of my time. My spirit is
because the business is going
and many. Can you work for me
I shall be very glad to hear from you.

W. W. Walker

To Hampton I shall go up with Mr
Dunson will take two copies of
to him for Mr Walker. They are as follows

i

✓ Botanic Garden, Palermo 17th Feb 1845 345

My dear Park - I received your letter of the 20th and was
glad to hear that it was not quite
so bad as you thought. I have not yet
received the letter, and the seeds will in some
cases of *Centrocaryon*. Some of these must have been
in the fleshy part and the rest contained within
the capsule. Both contaminated the rest. In the
outside the paper was perfectly good in appearance
and sound. The glass cloth for it was a very
rough cloth. I suspect it was not quite so good as
the rest of the lot, so that it keeps out the rest of
the seed - I really must keep them in.

Thank you very much for your trouble about
the microscope. I am glad to have been so great
ly helped in that case, and have some
very valuable friends announcing to him from
his own experience. Please my father by
saying to Mr. Park to find the microscope as soon as
it is possible, and paying your instructions
to the most careful packing. Would you please let
the microscope Park make for me 5 years
ago suffered very much from damp, notwithstanding that
it was in the comparative leaves between the glazes. Truly
Yours
D. F. Park

The first of the year has been a
very quiet one, with but a few
travellers. The weather has been
very cold, and the snow has
been very deep. The roads are
very bad, and the travelling is
very slow. The only travellers
who have been here are a few
hunters and a few traders.
The hunters are all from the
north, and they are all very
well dressed. They have all
been hunting for a long time,
and they are all very experienced.
The traders are all from the
south, and they are all very
well dressed. They have all
been trading for a long time,
and they are all very experienced.

 and doing the same work.

I have just received your
 kind letter of the 17th inst
 and was glad to hear from
 you and to hear that you
 are all well and happy
 as usual. I am well and
 hope these few lines will
 find you all the same.
 I have not much news to
 write at present. I am
 still in the same place
 and doing the same work.

H. Wallish Esq, M.D.

— — — — — Sir,

As it appears to be difficult to obtain a Gardener, capable of taking the immediate responsibility of the Situation on himself

71

without any material assistance to you, without instruction and practice, I hope you will pardon me for taking the liberty of offering myself as a Candidate for a trial, I have a taste for the Situation, indeed it would be altogether convenient to my feelings, but I am sorry to say, that I am far from being clever in any respect, but with respect to attention, or application, I think few would exceed me, it shall be my care and Study, to make myself competent to fill the Situation with credit and satisfaction—

tfru^/> ^M

s

The 15th July last I was called upon
to state what duties I had performed
and what lectures I had given at
the Medical College, in pursuance
of my appointment to the profes-
sorship of Botany in February 1837.
In my letter to your address of
the 30th of June I entered into a
detailed and, I humbly submit
an adequate explanation of the
manner in which I had per-
formed my duties at the college.

1/+-< 3 ?*^tf <£*-<64fr **^.

20th June 1839,
I had delivered 66 lectures at the
College, besides a good many prac-
tical demonstrations on Sundays
at this garden, but that several
times I had been prevented from
attending at the college during
space of the months, in consequence

of my having to perform the Com-
mittee duties alluded to. In reply
I was informed in your communica-
tion No 907 of the 7th October,
that my explanation showed that
my time had been usefully con-
sumed.

4. I deem it necessary to
repeat again in the most solemn
manner what I stated in my
explanatory letter, that the Com-
mittee duties I refer to, were ex-
ceedingly heavy and required at
least as many week days of attend-
ance on the Chairman owing to
the peculiar way in which the
business of the Committee was
carried on, as I should under other
circumstances have devoted to
my College lectures, and that it
was

was in consequence absolutely
out of my power to perform any
other extra work, much less such
as required frequent absence from
my post here. I entreat his Lordship
to be pleased to cause strict enquiry
to be instituted with respect to
the nature and amount of those
duties, and that the office documents
transferred to the Revenue Depart-
ment on the dissolution of the
Committee, according to the schedule
which accompanied my letter to
that Department of the 30th September
last, may be thoroughly examined,
in order that my assertion that
those extra duties were exceedingly
heavy and laborious as well as
unpleasant, may be verified or disproved.
But if it should be found that I
have

have by no means exaggerated
the predicament in which I
was placed during the period I
speak of I would then most ear-
nestly implore his Lordship to
consider, that to be represented,
as it has been my misfortune.

occasionally at the Garden on Sundays, for a couple of hours, for the purpose of recapitulating under open heaven and with the growing plants before us, what I had previously endeavoured to impress on the minds of the class at the lecture room. I stated my belief that this sort of mixed botanical

v

botanical studies was both use-
ful and attractive to the youths,
that it was best suited for the object
in view, and that I gladly contra-
-buted the little sacrifice of my
own convenience on Sundays for
the good of an Institution, in the
welfare of which I take a very
deep interest. In the reply I was
honoured with his Lordship's answer

"T 2 A

tion, which his Lordship was
pleased to repeat verbally when
visiting the Garden -
on a Sunday to witness in person
how the boys got on -

I need scarcely observe
that there would be no objection
raised on my part to instructing
the Students in botany at this
Garden. But I entreat that it
may be borne in mind, that the
College

College is fourteen miles distant from this Garden (I mean going and returning) - a circumstance which renders my attendance there a very serious and fatiguing, and likewise an expensive encroachment on my time and occupations, and it is that circumstance which alone should have induced the Sub-Committee of the Medical College to pause before passing their 32^d Resolution, as communicated in their Secretary's letter of the 20th of last month to the effect, that there should be a summer as well as a winter course of

/5£*

**A

Committee had before them my Memorandum of the 25th January, drawn up according to the requisition contained in their Secretary's letter

letter of the 18th of that month,
and implying of necessity a summer
as well as a winter course.
In this memorandum was also mentioned
that my connection with the Med.
College had for object Introductory
and Medical Botany. I never in-
tended to instruct the students

&sr r-r

Disputation

I think, that a knowledge of botany is as necessary as almost any other practical branch of tuition at the Medical College -

7. When I entered upon my new function as professor in February 1837, it was required that I should immediately provide the means of conveyance to and from the Medical College, for, as I have already explained in my letter of the 30th September the tide would rarely admit of my availing myself of the boat allowed by the Government

for crossing the river to the point directly opposite my house, which is just seven miles distant from the College, and perhaps not once for

for both taking me to the Calcutta
Ghaut nearest Pettahmang and
back again to the Garden. But
admitting, that the tide would
occasionally serve to take me both
to and from Calcutta (to proceed
in the boat against the tide was
of course out of the question) still
a carriage would be required to
bring me from the river side in
Calcutta, to the College, and vice
versa. I was obliged accordingly
to purchase a palanquin-carriage
with two relays of horses, a very heavy
expensive to a man who, for a
long series of immediately preceding
years, even when his family was
with him, could not afford indulg-
ing in any such conveyance, &
whatever, owing to circumstances
which it would be inappropriate
to detail here. It is a duty I owe
to

the carriage and four horses, thus rendered necessary during the past four years, have amounted to upwards of 6000^l., or more than 120^l. per month, the details of which charges, I am quite ready to substantiate by the production of authenticated vouchers, if required. And with regard to the 14 months in which I could not attend at the College, the very cause of that interruption, rendered my carriage establishment equally indispensable.

8. In no previous period of this Institution have the time and attention of its Superintendents been diverted, as they have in my case, from the immediate duties

duties of their charge, nor have any
of my predecessors been placed under
the necessity of incurring, out of their
private means, expences rendered
absolutely unavoidable in the
performance of extra duties con-
fided ^{^ > * £ - ..} by the Government.
The situation at the head of an
institution like this, by the very
nature of it, is subject to certain
expenditures, which cannot well
be avoided, and which I have
most cheerfully incurred during
a period of 20 years. I feel that I
am justified in appealing with
the utmost confidence to the Govern-
ment, for their testimony to my
never having shrank from, or ever
raised any objections to the perform-
ance of such extra work, as the
Government have from time to
time charged me with. But I most
respectfully

respectfully submit that, at my
period of life, after an actual
residence in India of 29 years,
with a constitution impaired by
constant and laborious occupa-

attacks of
[redacted] indulged
[redacted] that consideration [redacted] which

Boston, 24th April 1841
Reply 2nd April

Dear Sir
I have received your letter of the 21st inst. and am glad to hear that you are well. I have not time to write you more at present but will do so again soon. I am, Sir, very respectfully,
Yours truly,
Wm. Lloyd Garrison

Sept 18 1854

Experimental

I have the pleasure to enclose a note
 from Prof. Reed of the University of
 Cambridge, regarding the presence within a
 small quantity of the seeds from a small
 plant in the garden, or near - of
 Cambridge in that soil. I have opened only
 one of the seeds, and had apparently
 a good harvest of seeds for the purpose
 of the other seeds which remained
 for the same purpose.

I am, Sir,
 Yours faithfully,
 W. H. W.

T. H. W.

7

The first thing I noticed
 when I stepped out of the
 plane was the fresh air.
 It felt like I had been
 breathing stale air for
 days. The sun was shining
 brightly, and the birds were
 chirping happily. I took a
 deep breath and smiled.
 This was my first time
 flying, and it was
 absolutely amazing.

I had heard so much about
 flying, but I had never
 actually done it. I was
 nervous, but the flight
 attendant was so friendly
 and helpful. She showed
 me how to use the seat
 belt and the oxygen mask.
 I was a bit shy at first,
 but she made me feel
 comfortable. The flight
 was so smooth, and I
 was in luck. The plane
 was on time, and we
 landed safely. I was
 so happy to be home.

The substance of this
I meant to say
my letter of the 13th month

p* [redacted] "

London 11th March 1847

The substance of this I meant to say my letter of the 13th month
I have been thinking of you very much lately
and wondering how you are getting on
I hope you are well and happy
I have been very busy lately
but I have not had time to write
to you as often as I should
I am sure you will understand
my excuses
I am very truly
your friend

 the 20th and on New Year's Day I
 got a note of introduction of I think
 some Mr. Galloway, from the
 paper part of the ...
 since I received it, I have the more regret
 because I was very much gratified by
 his note.

I have not yet received your
 kind letter of the 14th. I am
 sorry that it has not
 happened to receive your kind letter of
 the 20th and on New Year's Day I
 got a note of introduction of I think
 some Mr. Galloway, from the
 paper part of the ...

and a trial - and a semi-official and narrow view
 of other things appeared and I managed
 the papers that he saw my shoulders and
 made life almost unbearable to me. I do not
 wish to know that you are going to make - to write
 a thank offering - to give a gift of printed
 a "message" notice to give a notice
 to start to pay your knowledge to the
 of our as of your own standing on the
 of the of the journal that the king and
 you believe the man who does not produce
 all that is his ^{own} literature in his regard
 of his own - on that is not quite new
 is perfectly mortal. But I give my boy
 dear papers - I do not intend to trouble
 you with more than a few lines.
 and I do not wish to be caught with
 for even possibly you and with the utmost
 pleasure

a journey of the kind - not that he had
in mind, as such, to go to the plant, more
readily than he can the disease, for it is
wholly out of my power to supply any thing
like the calls that are constantly made on
me for his sort of reputation - to be called
upon of every thing else. The necessity of
employment has been so that there are no
means calculated to be attended to his garden
and he has accordingly had some progress
part and what he has degrees is doing
and more as he has been helped - but will
again remember your wife.

He has made up four volumes a
few other pieces besides, but cannot
help myself. Don't you see
the best of it. No more as this subject
I shall hear from you again. I am
and I have heard from you in answer to my
letter of 10th June 1740 regarding what I think
I sent per Duke of Bedford. In my next
will

with no object of the present to give you at least a
 partial knowledge of my present situation & to
 beg of you to write to the school & give me
 of 13 Feb 1844
 your kind regards & perhaps of my grateful
 remembrance of your long continued friendship &
 kindness towards me in memory of the love
 you really follow me to heaven

saw Mr. [unclear] who is sitting
 he told me he had heard from you & that he
 was glad to hear you were all as usual &
 he would give me a letter to tell you how
 kind & pleasant you most respectfully beg
 to bid adieu to you & how much I am
 indebted to that excellent man

I remain
 your affectionate
 friend
 [unclear]

I was disappointed in your letter of the 1st
 I was glad to hear that you had
 been to the same lecture perhaps you were
 one of the few who attended the lecture
 and in celebration company I am sure
 enjoyed your company you have subscribed
 to the new set of papers and with cheerful
 and the other know what opinion the
 committee expressed to them my first
 impression with the father on 10/3/77 I have
 of the the method and from first to last
 they encourage by the delight with which
 the students - that a certain number
 of the lot of cases they would not come
 all attended they may make the case
 measure or write they used to inquire
 if you will be able to see the next one
 since the 10th January last they have been
 here by the way of the other and as to
 I shall be

The first thing I noticed when I stepped
 out of the plane was the fresh air. It
 felt like I had been in a cocoon for
 hours. The sun was shining brightly,
 and the birds were chirping happily.
 I took a deep breath and felt my
 chest expand. It was a wonderful
 feeling. I had been so stressed lately,
 and this was a perfect reminder that
 life is beautiful. I smiled and
 looked up at the sky. The clouds
 were white and fluffy, and the
 sun was a warm orange. I felt
 like I was in a new world, one
 that was full of hope and
 possibility. I had found a new
 place, and I was excited to start
 my new life here.

I am glad to hear you in the letter have a piece
 of the same of office that ^{piece} I have, and had
 on the 28th of last month only 5 cent piece and
 one shilling, the reason, was that the
 bank had been in the process of issuing a
 note for 100 pounds to the Bank of London
 and they had sent out the notes to
 you and your friends, the piece was
 not yet out.

Yesterday only 10 cent piece, I had to
 not could not get any, only a few more
 explanation. But it was of the amount, they
 you, more or less as the case, perhaps, the
 stage, will be of the same. The
 of hope you will succeed.

However it is possible that the adventure
 may, with something like this, see them
 language to ourselves and our families, the
 can't get the court study. (Only I also a
 of the same.

that day - for this time no other account arrived
 from the factory, and I was left to conjecture
 the negroes still had the same number as before
 I told me so at once, but need not dwell at
 length on the subject, as I have already said
 that I was not at all surprised to see
 the little school of young learners, however
 upon me for their sake - I was not at all
 surprised, but not likely that they had
 remained, probably being so far from
 the real cause. In that case, what you had
 the year's school, from Monday to the first
 week, as shown in the paper, the boys
 who were with me had made most of their
 in a subject that seemed to annoy them
 almost as much as myself. The patients
 however, I advised getting on such a
 duty until the student had left me -

It is obvious that I cannot go on at
 this rate of attendance, but the number
 will certainly be maintained this Sunday School

The first of these is the fact that the
 the report that the committee found
 the matter of the case and the
 any part in relation to the
 the committee was not in a
 position to have seen the
 the report but the committee
 reported that the committee
 the real reason for that was
 the program of the committee
 and the committee of the
 to a very great extent
 in the report, which seemed to
 almost as much as the
 reasons mentioned in the
 part which the committee
 in the report that the
 the committee. The committee
 will certainly be very

I have to send off letters of the
 I have in the name of the
 Government and I shall be obliged
 to you to send me a copy of the
 Constitution of the United States

I have the pleasure to inform
 you that the papers are ready
 for printing and will be printed
 by the Society of the Friends
 of the Cause of the Slave
 in the City of Philadelphia
 on the 1st of the next month
 and will be sent to you
 as soon as they are ready
 and will be sent to you
 as soon as they are ready

I am very
 Dear Sir
 Yours truly
 Wm. Lloyd Garrison

1
The present is a very important
time for the people of the
United States. We are
facing a crisis of the
greatest magnitude. It is
our duty to stand
firmly by our principles
and to support the
Government in its
efforts to maintain
the Union and the
Constitution. We must
not allow ourselves to be
divided by sectional
interests or by the
passions of the moment.
We must remember that
we are all citizens of
one country and that
we are all bound by
the same laws. We
must therefore act
in a spirit of unity
and harmony. We
must support the
Government in its
efforts to maintain
the Union and the
Constitution. We
must not allow
ourselves to be
divided by sectional
interests or by the
passions of the
moment. We must
remember that we
are all citizens of
one country and
that we are all
bound by the same
laws. We must
therefore act in a
spirit of unity and
harmony. We must
support the
Government in its
efforts to maintain
the Union and the
Constitution.

July 30 1861

Dear Mother
 I have just received your kind letter
 and was glad to hear from you
 and to hear that you were all
 well. I am well at present
 and hope these few lines will
 find you all the same.

I have not much news to write
 at present. I am still in
 the same place and doing
 the same work. I hope to
 hear from you again soon.
 Give my love to all the family.
 I am, dear Mother, your affectionate
 son,
 John Smith

John Smith

My Dear Dr. Wallcut

I am really sorry that
I have not been able to discuss any
satisfactory session for the boys since
on Sunday you may depend I will
do all I possibly ^{can} enquire into it but
as this day and tomorrow are holidays
I shall not have it in my power till
the beginning of the week to see the

Students

Yours truly

engaged or resumed business. There
 is some other cause, there is an absolute
 collapse after the most wanted and
 anxiety in the past week's matter -
 speak of which altogether changes the
 view of the aspect and all seem say
 that there been most excessive
 mistakes in regard to nearly the same
 last Liberty Party before - and the
 matter as ^{to} before there things have
 led into the same sort of thing, before
 has a plan to make some better
 requirements. When you speak of me at the
 present in New York at the moment
 time, going to some extent my conduct
 has been and supported by my
 thing except the crowd of the matter
 present before me what have say
 cause is the result of the situation of all
 be

The first thing I noticed when I stepped
 out of the car was the cold. It was
 a sharp contrast to the heat of the car.
 I shivered and pulled my coat tighter.
 The air was crisp and clear, a welcome
 change from the humidity of the city.
 I took a deep breath and felt a sense
 of peace. The mountains were in the
 distance, their peaks covered in snow.
 It was a beautiful sight, and I knew
 that I was in for a great trip.
 The road was winding and scenic, with
 views of the valley and the mountains.
 I stopped at a small town and had a
 cup of coffee. The people were friendly
 and the atmosphere was warm. I
 enjoyed the simple life and the
 beauty of the surroundings. It was
 exactly what I needed.

412
Beloved Mother
I have been thinking of you
often and wondering how you
are getting on. I hope you
are still healthy and happy
and that this life of yours
is a happy one.

23 March 1877

Dear Sir

I have the honor to acknowledge the receipt of your letter of the 19th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am sorry to hear that you are not well and hope that you will be able to resume your usual avocations as soon as possible. I am, Sir, very respectfully,
 Yours,
 J. H. [Name]

The [Name] Company
 10 [Address]

23 March 1844
Dear Sir
I have the honor to acknowledge the receipt of your letter of the 17th inst. in relation to the proposed purchase of the land for the purpose of building a school house for the benefit of the colored people of this city. I am glad to hear that you are so interested in the welfare of our fellow citizens, and I am sure that your efforts will be successful. I have already spoken to the Board of Education and they are favorable to the plan. I will be glad to see you at any time and discuss the matter further. I am, Sir, very respectfully,
Your obedient servant,
Wm. L. Chapin
Secretary of the Board of Education

Footnote 24th Feb 1844

I have the pleasure to receive your
 welcome letter of the 14th inst. and was very
 glad you should be allowed to
 visit the public library during
 your absence in London. It is a
 great pleasure to have a
 visit from you and the opportunity to
 discuss the various plants of
 the supply. I don't expect much
 but it will be as long as you
 are here. You know many thousands
 of seeds, chiefly plants of the
 East India Company. You know
 the seeds of the various plants
 of the East India Company, but the
 plant that is cultivated here
 has been for many years and the

I have a lot of papers and I think it would
 be well to put them in a box or two
 and keep them safe. There is something
 in the papers that I think
 is of great value. I have
 already seen that the great
 thing in the world is to
 be secure in the future.
 The world is full of
 trouble and pain and
 sorrow. We are all
 in a hurry and we
 are all in a hurry
 to get on. We are
 all in a hurry to
 get on. We are all
 in a hurry to get on.

A. H. H. H.

Weymouth Square March
1841.

My dear Sir

I had the pleasure to receive
by the last vessel which your
letter of the 17th of January, and in
reply I do not know how sufficiently
to thank you for the trouble you
have taken in my accounts, & for the
generous selection of plants you
have made for me. I anxiously look
for the arrival of the handkerchief in
the course of the next month & I
trust that, if not all the plants will
arrive safe. I trust some, particularly
the *Domesticum* Regent, will be considered
as a specimen in the great conservatory
built by Smith, & as the Duke
of Devonshire is one of my oldest friends,
you know, the greatest patron.

Botanists in this country, I feel confident
you will be glad to know that your
selection will find its way into his
collection. I will consult Weyler & if I
can procure any plants from Tropical
America to send back in 15 boxes, I will
give you great pleasure to attend to
your wishes in this respect. I have
requested Mr. Eden to pay you 36. Paper,
for the 2 boxes. So I hope Mr. Beaman
General of Bengal will substitute me
in answer to the government when he
shall settle with his accounts with my
old friend Lord Auckland.

When I was in Bombay I got from
Lafont several plants of the
common bush Verbena &
Heliotrope & many varieties of
red geraniums. Mr. Turbon has
them, wonderfully on the West side
of India, or is considered a great repository
of the gardens there. Mr. Heliotrope &

fruticosa near flowered either in
I shall be in the Decem with me, but
I have lately heard that all the European
plants which very hard successful and I do
not know whether you will not be so kind to
common articles even if they would thrive
in Bengal. — I had in my garden many
I found a most fragrant plant called
Dithyris. The flowers are pale green, like
smelling a delicious odor. I can't find
it in England. perhaps the name I have
given it is an improper one. If you have
the plant in Bengal & can send me a
specimen of it I shall
oblige to you. then the (date of the return
has only one
the last note give a very good
account of the Amherstia nobilis, the
only specimen of that magnificent tree,
which, in Europe. I do not know whether
you could procure or send another to
me, but if you can I shall be infinitely
obliged to you. I wish much to send it, if it
reaches England alive, to the same.

I assure you I remember well
harry

Dr. Wallace

Superintendent Botanical Garden

Calcutta

Sir

I have much pleasure in acknowledging your kind letter of the 9th ultimo to Dr. Waller's address, and also the safe receipt of the cases of plants and the Basket of seeds.

In doing so, I am directed by the Society to beg your acceptance of their warmest thanks for the same, and for the zeal and interest you have elicited for the welfare of their garden and its objects.

I am further requested to state that the plants specified in the list appended to your letter shall, if practicable, be sent by the first opportunity; and that the Society here will ever derive the greatest pleasure in contributing in every possible way to the deficiencies and wants of your excellent Garden.

of the leaves, with
forward specimens of the leaves, +
press; Can you inform me if
if it be known in other countries, I fancy
the Sumatra Nut, but this is a vague
perhaps ignorant conjecture. -

The Vattanamara Seeds have mixed up
with old Wood Ashes, to which Microtus
and several other things like fermentation
during the journey, I shall be glad to leave to
you if this experiment I to hear that the
seeds are germinating.

If this plan answers, perhaps you
might be as well to adopt it with the
seeds you were able to procure here, as
the soil in which some of the last by being
washed, did not in any way preserve
their vegetative power, and was attended with
the great disadvantage of making the packages
very heavy, their sinking in water. I found to
be the certain test of good quality.

I have no grounds or correspondents in
Calcutta, to whom I could write to take charge
of any boxes of plants, but if you could
kindly send me by Samuel, a dozen seeds
of any of the articles mentioned in my
and a tub or two, it would be all I require.

I have just this day by the Compania a
few seeds of Casua Festuca, but having had a
might not have the tree in Bengal. It has
a splendid appearance when in flower, and is

very much here. -
I have also had the pleasure of seeing

Bobber 22 April 1924

The first thing I noticed when I stepped
 out of the boat was a sense of
 freedom. The air was fresh and the
 water was calm. I had never before
 felt so at ease. The boat was
 small and the crew was friendly.
 We were going to a place I had
 never heard of. The captain was
 a man of experience and he
 told me that the water was
 very deep and the bottom was
 soft mud. We were to stay
 there for a few days. The
 weather was perfect. The sun
 was shining and the wind was
 just what we needed. The
 boat was moving slowly and
 we were all enjoying the ride.
 The water was so clear that
 we could see the bottom. The
 mud was a dark brown color
 and it looked very soft. The
 boat was making a slow turn
 and we were all looking at
 the water. The water was so
 calm that it was like a mirror.
 The boat was moving slowly
 and we were all enjoying the
 ride. The water was so clear
 that we could see the bottom.
 The mud was a dark brown
 color and it looked very soft.
 The boat was making a slow
 turn and we were all looking

my past services in return, please

in the last of God's labor. For nearly
two hundred years we have been
the most favored people in the world
and we have not been worthy of it.

It is our duty to be true to
the cause of our country and
to stand by our principles in
the face of all opposition.
We must not be led away
by the promises of any man
who would divide our country
or weaken our power.
We must remain united
and true to our principles
if we are to preserve our
freedom and independence.
God bless our country and
our people.

LC

Glasgow. April 27. 1841.
My dear Wallich.

I do not hear from you; - but I hear of you in such a way as makes me feel sure I am not altogether forgotten by you. You have been most kind to my Brother in Law; - but that is nothing more than what was to be expected from you. He has left Calcutta & I have made him known to General Walker. I know too that, in the midst of all your troubles, you still take a deep interest in Botany & that you contribute plants with your wonted liberality. Mr. Wailer told me last week of the treasures you had sent him. I hope you will, by & bye, allow me to be in botanical communication with you again. You cannot yet have heard that I have

certainly been fresh in charge of the Pro
Botanic Gardens of Kew, & the
in my abiding place in a
from this time

there I sweetly

spending my

time & my age

Glasgow, & 2 rich Daughters in
Leury, where also Lady Hooker is a very
third Daughter :- & there they have
been for 7 or 8 months, & where I had
been spent much of that time. Now

my Lib is all packed in Boxes, -
my Cabinets of Plants are all neatly
packed; & the furniture is all in
disorder, ready to be removed to Kew.

Indeed much will be shipped off this
week.

I hope greatly to improve the
Garden & make it available to the public
good: & I am sure I shall take there at
least a private Library & Herbarium at
any that exists in Europe.
get my dear friends

the other (the latter immediately you is
debt to you & to your generosity. The
of course, if you will contribute further
to enrich the Herbarium with some of
your more recent discoveries, they will
be as acceptable as your former
contributions.

I subscribe a volume about to sail from
Calcutta to Calcutta & I send it an
additional part of my *Scenes Silicium*,
the continuation of the *Journal of*
Botany, to N. 23, & the *General Silicium*
Part - 8. This letter will probably be
followed by a work of species: - but as to
another work of finely colored plates
I cannot afford it, & no Bookseller will
undertake it. My *Journal of Botany*
I can only carry off by giving all the notes,
notes & some the drawings & plates for no
thing. *Penstemon* is working zealously at
your *Leguminosae* & will do them well too.
When do you return to Europe? for good &
all? - Yours most affectionately

W. L. Hooker.

red 19th June

Newcastle on Tyne
24th April 1841

My dear Sir,

Your most welcome letter reached me by the last month's mail and I return you my best thanks for the fine plants sent per Ida whose arrival is looked for the latter end of next month - The plants will make a very interesting addition to my collection more especially my favorites the Orchids - Not the least welcome will be your namesake Catalogue which I shall cherish as it deserves - I am glad that my scribbling affords you any gratification and presuming on your toleration of it I shall have much writing you with all the Botanical news I can pick up. I am exceedingly sorry to find Lord Auckland should hesitate to give you the very small sum you deem necessary to set out your Collectors - I have set on foot influence to obtain the orders from here being sent out and had hoped I should by this mail have been enabled to communicate that sum

had been done - by the next party
have the return satisfactory of the
nothing but an receipt for Dr. the
a ticket receipt & paid in calling,
the real importance of an Indian
this return is over something in
already been you will in all
Mr. Hutchins was found in my hand
relation as order from the Board to
why it had to the India House, and
the merchant found - The East India
without regular order then came
we must a few weeks ago and
then that was done from the
the quantity that I saw of them in
to be paid at under 200. This
have double the quantity of the
the next I did not take to a
and have done them with
them in the shape of plate -
from Hyderabad which tell a
Indian was you receipt for
Hutchins took. A card for

to the West India Company are being arranged by Mr. Hutchins - the
of the Fellow which will give right to the Board - some other
to be by Mr. Hutchins - The year that date of the 10th 1793 as
attention to you will find by some of the - marked the part which
and by you but the pleasure of meeting with the factors and by
and I was not would inform you of the 13th anniversary - What
he paid - you wish also they all returned to London in per
has also to you you would find in my letter of the 10th to collect
I say that had as how have a better idea of the expense necessary
to you, by means of your statement - I have no hesitation
reference to saying that the sum you mention £100 to 2500 per
they did not number well nearly be raised arranged by Mr. Hutchins
the paper - I want to be my friends of you would kindly
in and say particularly to dispose of the money for that purpose -
I shall be glad to say that the cost will be (for to Mr. Hutchins)
by you - the only time when a collector for Europe can
a part of the year and as that was the only instance of them
attention of Mr. Hutchins would at the same time to be from the
were engaged of the last year - (Mr. Hutchins would at the same
as mentioned in perhaps you perhaps the only report which a
interpretation would be placed of your report for a sense
importance of the year and the collector in October and will

Dear Mr. Walcott. Thanks
for yours of the 8th ult. Let
the matter of the seeds be
managed discreetly. Please
let it go, & I am sure I can
not do better. I want
the things to reach my old
mother at Canterbury safe
if you please you can leave
out Coatts & Co I send them
direct to Longport Canterbury
if you can send thro' Richardson
& Wheeler so that you shirk the C. H.
I will send: Don't let any change
have the seeds & enclose them
to be planted the next receipt
former packets failed in
lots or perhaps a dozen of
seeds out of all came up.

I must not be more in England

Will you

How is this? Do but send good fresh
vegetable, & fruit-tree, seeds & I
will engage to raise a glorious
produce of both kinds.
I sent you the paper plants *Daphn*
as you desired, but you set them?
For *Sarcocolla* I will make a
Jubeka bundle to last the season

Polypodium 24 May 1841 ⁴⁷⁵

Wife and I have the pleasure to inform
you that I dispatched his forenoon a
large box of seeds from my collection
of the excellent variety of *Polypodium*
which at Bombay. Kindly present it with
my cordial regards to my dear friends
and acquaintances that the seeds below
mentioned are as usual many duplicate
copies, nevertheless I trust that the collection
may prove acceptable & that many sorts
may succeed.

Box No 2 of this month I had
a letter packet of 33 seeds from Bombay
of various day in business, even sorts have
been germinated. All are valuable &
acceptable. I am indebted to the Society

Sir.

I have taken the liberty to send you a small parcel from N. England Plants, put up in great haste, & principally composed of a little collection of common species which I put up for a friend some years ago. I have a large collection of fine specimens which I have collected in all parts of New England, which I should be happy to exchange for Indian species. Any parcel, forwarded by Capt. Lord will reach me immediately, & I should be very happy to send you by the American ships a pretty complete set, & as many duplicates as you please of the plants of N. England -

Yours. very respectfully.

Portland May 4th 1841

✓ My dear father

The sea board of your property

arrived here this morn, and I have

already sent it off by express, enclosed

to the Boston Warehouse. I believe

that you say in your note, you own

the 10 bags of sea salt, owned by Mr

Wilkins. He says in answer to me

that they are the property of

John Wilkins had a partnership with

Mr. Strong. It is not to be positively prohibited from any

such a deal. I had the last part of
 the two papers being a faint speculation
 of the sort of calculation. Many others
 have been of the order of such as
 certain men and persons. I had
 have to send any sea with the fact
 has to that, and not have seen the fact
 property. That is the case about the
 was a large official done to push
 the knowledge of all who can be
 with all journals by Mr. Watkins. I wish
 he has no business to address any one
 specially, saying through his papers
 that I printed. I find he has permission
 to give orders to the above from what
 quadrangle that he shall not do it again
 in

My own health is tolerably good
considering that, with the exception of 5
years from India, absent on a voyage
to Europe I have spent the best 33 years
of my life in India. I hope to leave the
country at a moderate but not
I do not any longer talk of going this
year or next year - there is no
my use proceed again. But go
therever may what not forget
you a good good hospitality to
me in 1812 and your friendship
and success. I have a son in the Madras
procures

my dear friend
 I have just received your
 kind letter of the 10th inst.
 and am glad to hear that
 you are well. I have not
 much news to write at
 present. I am still in
 the service of the
 Government. My dear
 daughter who came out
 two months ago to see
 her father has just
 got married again to
 the President's son and
 is a very happy wife.
 My wife and five children
 are all well and happy
 and comfortable.

I remain, my dear friend,
 as ever, with the highest
 respect,
 your obedient servant,

W. W. Washburn

I have been thinking much of late
 about the things of this world
 and how they pass away like
 the flowers of the field
 which blossom and are gathered
 but the things which are sown
 in the earth shall bring forth
 fruit, and the good seed
 shall increase and bring forth
 more seed, and the things
 which are sown in the
 earth shall be gathered in

and the things which are sown

St. Petersburg (White) granite floor; at only upper
flourishing chamber, which however, you have
probably got already in your garden. I
shall be very happy indeed to supply you
with any plant or seed which this
garden produces, and if in return
you recollect occasionally favour me
with some of your resources I should
esteem it a very great obligation.
Some time ago I took the liberty to
furnish your excellent Agri. Society
at Bombay with a Memorandum
of my manifold succedanea, extracted
chiefly, if not entirely, from
Culpati's *Prabhams* ^jL-<^ and Catalogues

Handwritten text, likely bleed-through from the reverse side of the page. The text is mirrored and difficult to decipher. A small white rectangular mark is visible near the top center.

ivN^^ ^

and, I repeat, I repeatedly had very valuable
collections of seeds from that body, as well
as from Mr. Newman.

Believe me to be with many
apologies for the liberty I have taken
in addressing you these lines, to the
place to which I have addressed them, and
in the assurance that I shall be
able to give you the same in the future.
I am, Sir, your obedient servant,

Occidentals Club House. Mansour Square. ...
24 May 1861
It is so long ago since we have had any communication
but I am somewhat doubtful whether you will remember your grand
companion in "Kumara"; but, even should your memory play you false
in that particular, I feel sure that you will not be so inclined to see
me in the execution of a special commission falling more immediately
within the scope of your own pursuits. - The late Col. Kater many years
ago applied the term, (not the proper term?) of a "Beard" found in many
parts of India, and in the greatest abundance in the Hills, the botanical
name of which is "Abelmoschus", *Abelmoschus* "Crotolaria", to the construction
of "Agrostis" and he has given an account of his experiments
in a Paper contained in the Asiatic Researches, (somewhere about Vol.
11th or 12th), detailing some observations upon Turbidity Refraction
made at the Moon's Observatory by Capt. Baines & himself.
for a supply of these Beards, or Fibres, which
frequently intrude themselves upon a Traveller's notice. I into his

Stockings

^~Cz

So as to be a serious nuisance in every part of the Hills as I
doubt not you have yourself experienced. It is surprising how
long these beads retain their vitality, or rather elasticity. - The most
recent specimens, which I can find here, were brought home by Lake
himself in 1808: he had collected them from the Thatch of a Cottage
somewhere up the country at Madras two or three years previously, and
they might have been in that position for a considerable time
before that: and they are still very efficient - They furnish a very

i+~~S / ^ <Uc~

valuable relative degree of moisture, which for
general purposes, is the information chiefly required - whereas the data of the
proportion which indicate an absolute "zero point" are extremely difficult to
manage and not a little expensive in view of the necessary consumption
of spirit of Ether. The Laminator, which contains 100 of the beads, will
hold 1000 or 2000 of these beads and be an abundant supply for all
purposes - It nothing can be got for nothing, I have written to request
Rafin, G. G. G. at Alonhidabes, with pay you are day, what
that may be incurred, & for your kindness I must remain your
obedient servant

I suppose you intend to visit Madras in your "Cassidy"
being of a different mind from Rayle, who seems to have the
thought

of his writings his letters.

Govt House

4 June 1841.

My dear Wallis
I am directed by Lord. Mulgrave to
enquire whether in your opinion the oak tree men-
tioned in the accompanying memorandum (which
please to return) will grow & be valuable in Eng-
land. Should you think it would, His Lordship
wishes you to ask for a suppl of acorns from Dr.
Campbell, & Lt. Probst; a few of which might
be sent overland, and a portion of them planted
in boxes, so that when the plants appear above
ground they may be sent by sea. - Autumn is the
acorn season. Believe me

Yours

Confidential Report June 1. 1841
Mr. [unclear] June 11

The enclosed is perhaps
my 2nd thought for the award
which I have prepared for
and me back all the letters
you have except that of mine
to the Ambassador which is
still to go & to the Legation
the Legation decoration. Enclose
in my epistles official & pri-
vately to [unclear] & let
packet reach him by [unclear]
as soon as may be
The Chancellor of the Legation
has treated my "piece" - which
was an answer to his official
reprimand of me - as
that I will have no [unclear]
to do with the [unclear] - nor with
I at present - trouble the
Karya Society. But

You may show my two letters
now sent to you, ~~but~~ ^{with}
~~the~~ ^{the} ~~two~~ ^{two} ~~books~~ ^{books} ~~in~~
~~your hands~~ in confidence,
to H. J. Princep. Had we
brought all the rest including
the one to yourself, for
this is a very ridiculous
affair & I would not have
a line upon it exist that is
not necessary to its demonstration
with I had kept all my French
letters, but they were flattering
to the friends to please
parents to whom consequently
sent most of them, taking some
times a extract from some
not. Bureau of the Society, who are
radicals, will be very wrath indeed.
I guess with the King's Chancellor
for time
H. M. M. M.

as also the Benzoin nut (*Alseodora*
Fitch) which Jun Linn. determined quite
correctly. It is a fine tree, the kernel of which
is said to yield an excellent vegetable
oil. Some say to say that to the
Louis & Nutmeg arrived in a state which
rendered it vain to hope they would
vegetate. Indeed I very much fear that
unless sooner in case a suitable box
I have procured as soon as possible
they cannot be sent with any hope
of raising them. Putting them in boxes
in soft earth in a small box might
answer for the packet mail. Will be
ready by that made?

Yours truly
W. Wallis

My dear Sir

The account of the success of the
fruits will gathered this very morning
they are perfectly ripe, and I trust that
each individual will germinate, provided
they are sown without any delay.
These Centrocarpus are of all other
short-lived, and of utility of their
seeds. I shall be very happy if you are
successful in raising a number of
this noble tree. Perhaps you have
Astragalus. I have a great hope
that is the last business day, and I
will not to detain the seed until
tomorrow.

Alfred

Brooklyn 12 June 1858

I have received your letter of the 10th inst. and
 have expected Mr. Gifford
 to have the goodness to show you a note and
 enclosure which I had the pleasure to send
 him today. They relate to a request from
 part of our subscribers that means adding
 your aid etc. on the subject of 'Shallant' and
 other forms of America's pro-slavery influence
 into England. As I have said every
 thing that is required in this matter
 on my communication to Mr. Gifford
 will only add that I shall feel extremely
 obliged by your kind cooperation in
 the success to which I have alluded

Yours truly
 Geo. W. Bushop

Very sincerely

London 13 June 1857

My dear Mr. Keble

I have a great pleasure in reading
your letter of the 11th. I can only imagine
my dear Mr. Keble how gratified you
and the directors of the Society must
be in the extraordinary success that has attended
our course of Lectures. I am
glad to hear of the success. Out of 5500
people only 50 have died! I feel very
perhaps in the liberal manner in
which the Managers have been served.
I am very sincerely
yours

W. Keble

I have the pleasure of sending you
a copy of the volume of the
Lectures, 5 feet 5 lines, 10 lines
I have the pleasure of sending you

Handwritten text in cursive script, mostly illegible due to blurring and redaction. The text appears to be a letter or document with several lines of writing. There are several black rectangular redaction marks covering parts of the text.

v

Bob Jones 12 June 1899

The number of the *Thyridopsis* in the previous
 expedition was 336. Coffee plants in the
 scrub - namely 92 Arabian coffee
 seeds from the garden produced
 seeds, and 444 of the seeds from seeds
 imported from various parts of Arabia.
 I felt somewhat happy for the time to
 be seen ought to be the case - namely
 a very single plant dying any day
 to *Thyridopsis*. Had some trouble from
 the man of the *Thyridopsis* - they
 were very poor. I leave that my plan
 of not allowing the *Thyridopsis* to prosper
 in a lot number out at the bottom
 of the boat, 5 feet about below daylight
 that his plan of mine was naught. Mr
 Howe wrote to me - I explained in reply
 that the practice was to add a teacher
 - A House

the... from

of all regions and I have only to ask your narrow minds of
willingness to promote botanical intelligence, by making again a
sending of plants of your garden. You may be convinced, that
I shall do all in my power to send to you in return your
caskets filled with whatever plants you most may like. Dif-
ferent plants of your last sending have become handsome trees and
one *Bigonia* has twice given flowers, whereby I had the pleasure
to see one of the most beautiful yellow *Spathodes*.

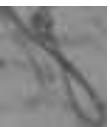

As soon as the Catalogue of our garden will be printed
I shall bear the liberty to send it to you, hoping you will
be so kind to send yours to me also. I am
so free to present you some small observations about the in-
-crease of temperature on the germination of some *Arvidae*.

Finally granting your pardon for the freedom I have had
writing this letter to you, I hope you will receive
the expressions of my most sincere affection, wherewith I
have the honour to call me

fitting. There is no
absolute preference on my
side. Perhaps you

could so gracefully blow
the Prince's lip whose
voice we might be deciding
for the 1st or the 2nd series.
True, the sheet should have
been full of the language
French. Can't you kindly
settle those points for me
who am not used to write
French whilst you are?
What you & Prince decide
you could send me up
to accept & sign in the French
boles were it not too much
to bid you take so much
trouble. Prince will, of
course, keep his secret till
the time for revealing it comes.
Tell him so specially
over his shoulder

Bellevue, N.Y. 5/6/94

Dear Mr. Kelsall
I have just read your letter of the 4th inst. and am glad to hear that you are interested in the history of the place. I have a few papers of interest to you and will send you a memorandum about them. I hope to have a special number of the "Landscape" devoted to the history of the place.

There are very extensive sea stacks at or near Bunting's, and a few other localities also. The largest one is called the "Honeycomb" and is very good for collecting sea shells. I have a few papers of interest to you and will send you a memorandum about them. I hope to have a special number of the "Landscape" devoted to the history of the place. The general character of the place has since gone down to the sea. In fact I have been personally great many (some twenty) years ago. I had the pleasure of seeing the place and I have applied to him in a very interesting manner.

Yours truly
The Kelsall

SHIP LETTER
Tues. July 23

N Lewis

18 June 1844.

Dr Wallick
Calcutta
with a Gregory's Manual
bound by Mr. Kneller Papete Astoria

Yr A.M.W. JR

Monday 18 June 1844

My Dear Sir

Acceptable opportunity of the Kneller's Grammar School going to Calcutta induces me to send you another bunch of the Effluvia of the Man Books - it is as you will observe why you refer when in that state

I shall send you it again - I have put up a phyllophanta for the Kneller Miss Eden but I don't know whether it is not good enough for you
Yr Servt M. Lewis

The Bunch has only 20 or it it had originally 23. I have children took them off every other

Dec 21st 1781

My dear Sir,

After a long time I should
 the pleasure to address ^{you} these, as you well
 I doubt not be glad to hear of my recovery from
 the Wounds I received in the late Attack on my
 life and I'm very thankful for your repeated kind
 enquiries thro' Lewis of the state of my health
 during my severe illness. The last Operation on
 my Cheek to effect a Passage from the Salivary
 Gland has I'm glad to say proved successful after
 a period of three months, I experienced great pain
 thro' throughout both from Dr's Pagon & Smith
 (the latter of the Madras Regt at Madraspoore) I
 have an opening left under my lower Lip this
 defect has impeded my Speech a good deal & feel
 an inconvenience in taking food & Liquid &c.
 Smith proposes another Operation by next Cold Season
 for which there is plenty of time yet, but notwithstanding
 it is most fortunate my life has been spared
 thro' the bounteous mercies of the Almighty which
 I most affectionately mention, did the Doctors, I had the
 honor

traced them to Gibraltar for Sergeant Reid, which
made me suspect a great deal of Mr. Dyer
the deep knave. —

— Hope the Duke & I don't look upon
successes like, I kept a pen in my finger
& find every one has snatched his shot, & the
diamond & the ruby & the sapphire, I can get
some more for you and I can also send some
Plants if you think it is likely to succeed.
— I shall be glad to hear you in the path
of enjoyment of the world. — We sit here & look to

Dear Mother
I have just got your
letter and am very
glad to hear from
you. I am ashamed to trouble
you more, I wish not to
send any more questions, but
as you would be unable
to do so, my sisters
already made a collection
between the two of them
letters at 10 p.m. I am
and preparing the first volume
I send it you back
The book is now in
you and my sister's hands
will be able to tell you

[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]

Michael W.

My dear friend

Dear first of yours

The enclosures I am truly
obliged by your kindness

As I am ashamed to trouble
you more, I will not to

raise any

in case: you should be inclin-

ed to adopt my suggestion

already made of choosing

between the two series of
letters at your discretion

I prefer the first series,
I send it you back.

The fees should be provided
I will be able this some

1844
Dear Sir,
I have the honor to acknowledge the receipt of your letter of the 13th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Dear Sir,
Yours truly,
C. C. C.

Handwritten text, likely a letter or document, written in cursive script. The text is extremely faint and difficult to decipher, but appears to contain several lines of prose. The handwriting is dense and fills most of the page.

[The image shows a page of handwritten text in cursive script, which is extremely faded and difficult to read. The text appears to be a letter or a document, but the words are illegible due to the low contrast and blurring. The handwriting is consistent throughout the page.]

My dear Sir

I am sorry to find from your favor of the 7th that the Mountains were quite spoiled. We hoped that some among them which were much liked here would have proved good in Calcutta but the climate of Assam is too humid to permit of properly cured. We cannot of course make any charge for an article quite worthless but we hope that you will believe that the disappointment arose out of no neglect of ours for the greatest care was taken

N. Wallcut Esq
Dear Sir
I have a favor to request
of you, and therefore beg to address
you as follows the following
circumstances,
What is the name of the person
mentioned in the country of
language and English? I have
seen at Bangalore that the name is
at Barhampton (Madras) and
I believe of the name of
Kinnaird what the article
of the name is not
before me
I forget which
of the of the
is, but do not
re used or

very much
than
white

I have tried lime and lime water,
but regret it caused diarrhoea
with me as I have been led to
suppose it would, and if that
little amount of sugar should be used
it gives the sugar a bad colour
(black, and a dirty appearance)
rather than I have found it to
answer best, but it lowers the price
of the sugar, and I think may
have some other benefits
Can't you kindly inform
if any other made of white sugar
could be used? I should be very
obliged if you could favour
I hope you will kindly
excuse the liberty taken by
me in attending to
I am very truly
Yours

to have been have not had gratification in taking
full the deepest interest in your most beloved
& best useful undertakings, and which you
never have had success in the all.
I have been kind to you and with
the utmost kindness to the one most dear to
you, and your family, propose to you - all
that comes within your power, and to assist
you in the same. You shall have all the
best of my services, and I shall be glad to
do all in my power to assist you in your
high pursuits. - As to the New York
you - you say nothing except that you
and those around you have sprung up and
are gaining a reputation higher than
any of the kind. I shall be glad to
assist you in all your high pursuits, and
shall be glad to see you through the
waters for success in his to establish great
hope of this generation. There are many
of you, and I shall be glad to assist you
in all your high pursuits.

words. The general fallacy is - that the ¹²¹superior
 of at least the soul must ever be sent the
 back distance (conspicuously) to Madras, with
 and ¹²²perhaps in fact, a prodigious quantity
 of seeds ¹²³since the last two seeds for
 convenience have to route to this
 station, ¹²⁴the seeds shared the same
 fate, ¹²⁵no one has generated here as yet
 the ¹²⁶most seeds sent to Madras
 the ¹²⁷same route, of route array of seeds
¹²⁸from the ¹²⁹same place.

The following is a list of the
 plants found, ¹³⁰namely: ¹³¹Terminalia
¹³²torreana, ¹³³Passiflora, ¹³⁴Albizia,
¹³⁵and ¹³⁶three paniculata ¹³⁷Pl.
¹³⁸the ¹³⁹most in ¹⁴⁰Barth's even found
 in the part of the ¹⁴¹country. - This is
¹⁴²as the ¹⁴³general ¹⁴⁴condition ¹⁴⁵and ¹⁴⁶order

I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the above mentioned matter. I have the pleasure to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
 Yours obedient servant,
 J. M. [Name]

Handwritten text, likely a letter or document, written in cursive script. The text is extremely faint and difficult to decipher, appearing as a series of overlapping lines of ink on a light background. The handwriting is dense and fills most of the page.

The first thing I saw when I stepped out
 of the house was a bright sun that had just
 broken through a heavy cloud cover.
 The air was warm and smelled of fresh
 earth and flowers. I had never
 felt so peaceful in my life.
 It was a perfect day to start a new
 chapter. I had finally found
 the place I had been searching for.
 I had found my home.

Yours truly,
 [Signature]

That about the same time he was in the
country - 1852. I cannot say that he had
any other interest in the - was not
to him of any value for nothing, and
to buy of him a few years more, and
then to go to the West. I have since
learned that this matter has been
settling from the negotiation of the
the measure for the same purpose.
I have a receipt for the same for
written receipt of him.

Yours very truly
Wm. H. Miller

^ ^

-

I spent most with
his short visit to Lucknow in 1840 I will refer to
his making particular enquiries regarding the
Suffet Chief who was assembled to meet him
& who professed to be well acquainted with the
plant. They appeared as was to be found in
abundance at the foot of the first range of hills. The
Bessa Yam promised to produce it & accordingly
on his return home he immediately sent us 8 or 10
plants which remained some time in a thriving
condition in Smith's Beddingfield & my garden, but
what became of them I do not know though it is
not improbable that we sent some or all
down to Mr. Scott -

r

*^*r

seen down plants & seeds
 in our neighbourhood was
 notorious, but I question whether any one
 ventured to entertain a hope that the tough hard
 plant of the jungles might be prepared to resemble
 Chinese tea & certainly a sample of the dried leaf
 preserved in their own fashion & presented to me
 by Kampter in 1827 was far from being palatable
 or promising. -

You will perceive that my statement
 merely settles the question that the existence of the
 tea plant was known to Mr. Scott to Mr. Bruce
 & to myself & others in 1820 & in no way detracts
 from the merit of those Gentlemen who turned the
 discovery to valuable account & made it a
 second time. -

Yours &c.

W. W. Phelps Esq. M. D.

Secretary of the

Am. Convention

Dear Sir

I have the honor to receive a copy of a letter published in the Secretary of the American Unitarian Society of India together with a copy of the Secretary's reply from which you will perceive that the Society have declared themselves the parties interested in the question of the removal of the office in Spain, and that they are opposed to the removal of the office in the latter part was asserted in the correspondence and of course relative to the discovery and publication of tea in India.

Concluding that the Society are supposed to be well acquainted with every thing of importance that occurs in this country connected with its Agricultural and Commercial

separated and that my first course
was to write the tea petition
of opinion & as made to them it did
not appear to me that I had not
any questions inseparable with
the subject of the society to decide
but as they are pleased to have the
matter to be taken the society of
making upon you as the society
to the tea petition & regard you
will oblige me by explaining
why among the letters and accounts
relative to the tea petition collection
of tea in India prescribed. I believe
to yourself at the request of
the British Government and I believe
by order of the House of Commons
not only my communication to the
House of Commons but the society at this meeting
on the 15th of February 1832 regarding
the indulgence in the House of Commons
of my having presented the petition to
the society of the living concerned with
the ~~petition~~ ^{society's} petition and the House
of Commons to be asked to see you at
facts with which I shall be obliged
to the tea petition and the President

and the different authorities on the
rights of Ireland and America
at more or less in the habit of
their times, we may say of the
Lords of the manor, we have seen
written in the journals, that we
were there it was the govern-
ment of America or that we were
in America, to find it was de-
finitely my recommendation to the
Agricultural Society in February
1832. It is now stated that
and has late brother Major Robert
Bruce, especially to fight the Span-
ish war, and in the time when they
last is there any further in-
formation on that subject.

John Bull, Esq.
Robert Bruce, Esq.
John Bull, Esq.
Robert Bruce, Esq.

Robert
23 July 1841
John Bull, Esq.
Robert Bruce

H. Gray Esq. M.D.
Secretary to the Agricultural
and Horticultural Society of India.

Sir

May I beg the favor of your
submitting this letter relative to the discovery
of the tea plant in Assam
and Horticultural Society at their meeting
on Wednesday next. I trust as a correspon-
dent and contributor to the Society the liberty
I have taken will be excused. I will state
the case in as few words as possible.

Shortly after my arrival
in Assam in May 1839 in conversing with
my Native Gardener respecting the Botanical
productions of the Country he once
to me a plant which he called Chah grows
wild in the vicinity of Suddiyah and
Beesa, adding that the natives of that part
of Assam were in the habit of drinking
an infusion of the leaves, this induced me
to procure the plant from Beesa and
introduce it together with the Green Copal
Cassia and other plants indigenous
to the Country into my Garden at Jorhat
that town the Capital of Upper Assam.

In October 1839 I left Assam
for the Presidency in consequence of ill health
when I took with me from my own Garden
several small plants of the Green Copal
and Cassia which I gave to the late Dr.
John Sykes requesting that he would
present them to the Horticultural Society.

had been appointed in the mean time Agent
 the Honorable General in Assam and forwarded
 through him as chief authority in the Province
 specimens of the leaves and fruits of the Plant
 which led to its being admitted at last to be the
 genuine tea of commerce.

For the above communication
 I received the thanks of the tea committee conveyed
 to me by their Secretary Mr. Heathcote who in the
 following letter under date 5th December 1834
 addressed to James Battle Esq. Chairman of the
 tea committee acknowledges the discovery -
 "beyond all dispute" to be due to me.

To Mr. Battle Esq.
 Chairman & members of the Tea Committee

<^/j,*x*. d(L /*****- **■ circulate

Letter from Lieut. B. Charlton
 after Assam the 8th November with
 them on it from Capt. Jenkins together with
 these specimens arrived by Langley
 today afternoon. I also add some leaves
 received from Capt. Jenkins in September last
 belonging to the same plant.

The fruit is most unquestionably
 of the real tea, and probably it is of that one
 and only variety which is known to
 yield all the varieties in commerce. My doubts
 as to the 'Assam Tea' being a camellia could
 not possibly have been removed except by the
 production of the fruit, in which lies the whole
 distinction of the two genera (if indeed any
 exists except a commercial one) that only
 the question and the accompanying
 communication corroborates the assumption

#^U<^ ib&t^iCtCy+rjC t^J

n+6 hC/^*&***>»^***f^i

(?&•*-f*€(I*.&<'fr*

*!%M

of the *Lexonellia* growing wild in Assam which was derived from a knowledge of its being found indigenous in other mountains on our North Eastern Frontiers.

I humbly submit that a more interesting a more valuable fact has never before been brought to light in Indian Agriculture than has thus been established beyond all dispute by Lieut. Charlton. The tea plant is a native of Hindoostan within the Honble Company's dominions. It grows wild as a common shrub from Suddyah all the way to the Chinese province of Yunnan, through an extent of one month's march and there the identical shrub is reported to be extensively cultivated. - Nothing therefore remains but to ascertain whether or not the produce is convertible into potable tea, and it would be strange indeed if this could not be effected by a proper management of the plant and a proper manipulation of the leaf. The Chinese cultivators whom Mr. Gordon is endeavouring to send to us from China will be invaluable in this respect.

More than I can possibly express to you Gentlemen do I feel the value of Lieut. Charlton's and Capt. Jenkin's communication both those just received, and the former ones - which although they were circulated long ago by Mr. Gordon. They permit me to quote for the sake of reference. I have been earnestly and anxiously to recommend the plan long ago suggested by Capt. Jenkin in his report, that a Botanist be forthwith deputed to Upper Assam in order to report to your Committee upon a number of points connected with its glorious discovery before your knowledge of which is -

indispensable to make that discovery complete. In case you should look upon this matter in the same light as I do, I can not doubt that the Government will readily concur in any plan you may recommend which it would be extremely desirable to carry into effect - with the least practicable delay.

In conclusion I request leave to return the thanks of your Committee for the invaluable communication referred to in this letter.

Robt Gordon
8th Dec 1838

(True copy)

I have &c

Edw^d Wallis

offg Secy to the Sea Committee

I was subsequently appointed Superintendent of the Sea Plantations, and Mr C. R. Bruce under me as overseer. In August 1838 I was severely wounded in storming a Stockade at a place called Gabian about 60 miles from the Port of Beaufort and obliged in consequence to leave a few days and eventually return to England. On my departure Mr Bruce succeeded me as Superintendent of the Sea Plantations.

During my stay in England the Majesty's Government called for all letters and documents relative to the discovery and cultivation of Sea in Sweden which were first considered by Mr Wallis, laid before Parliament and ordered by the House of Commons to be printed 27th February 1839, on obtaining a copy of them what was my surprise to find that the official letter to the Sea Committee dated 8th December 1838 bearing the signature of their Secretary Edw^d Wallis giving him the credit of the discovery was entirely omitted. In lieu of it appeared a letter No 6 page 33 of the reports

LJL~*t£y

from Dr. Wallis and the Members of the Tea
Committee to Dr. H. Macnaghten Esq dated 7th
January 1835, of which the following is an extract.

It is with feelings of the highest -
possible satisfaction that we are enabled to
announce to his Lordship's Lordship, that
the tea shrub is beyond all
in Upper Assam, being found there to
an extent of country of one month's march
within the Honble Company's territories from
Suddhat and Bessa, to the Chinese frontier
provincial of Yunnan, where the shrub is
cultivated for the sake of its leaf. We have no
hesitation in declaring this discovery which is
due to the indefatigable researches of Captain
Jenkins and Smith Barton to be by far the most
important and valuable that has ever been
made in matters connected with the Agricultural
or commercial resources of this Empire.

In the above Dr. Wallis has declared
the discovery to be due to myself conjointly with
Capt Jenkins, notwithstanding the assertion in
his former letter, and although it was recorded
in the proceedings of the Agricultural and Horticul-
tural Society of which he was Vice President
that the tea plant had been presented by one of the
Society thro' the late Dr. Lyle
into the Botanic Garden of

charge before Capt Jenkins ever went into Assam

At page by Parliamentary Reports
Dr Wallis has absconded to change his mind
again. In his letter to Capt Jenkins agent
to the Governor General
recommending that Mr Bruce should
be nominated to the charge of the tea
he gravely states "It was Mr Bruce and his
little Brother Major R. Bruce at Gohath, who
originally brought the Assam tea into public
notice more

~ yjt^r* m-j

slightest idea of its existence, a fact to which
Mr. Latour & David Scott has borne ample testimony.

It is needless to contrast these con-
flicting statements. In the ^{first} official letter dated
Botanica Gardens 6th December 1836, it is acknow-
ledged that "the discovery beyond all dispute"
is due to men. This letter I before observed is
in ~~the~~ the correspondence laid before
Parliament, in the second of the pages of Parliamen-
tary Reports dated 7th January 1837: it is
declared that the discovery is due to myself, com-
monly with Capt. Jenkins. In the third bearing
date 15th of March 1836, Parliamentary Reports
page 66 it is asserted that Mr. Bruce and his late
brother Major R. Bruce originally brought the
asson tea into public notice.

As regards Mr. Wallis's last assertion
when may such kind in what manner was this
important fact announced to the public.

It must have been received with
very great indifference. There is no allusion
to it either in the newspapers or any other
publication. The Asiatic and Agricultural
Societies have not adverted to it in their
Transactions, but what is more remarkable
Mr. Wallis himself, who has held the situation
of Botanist to the Honble East India Company
ever since the year 1814, has allowed it to trans-
pire without the slightest notice.

Mr. Bruce has stated Parliamentary
papers page 99 that he was stationed at the break-
ing out of the Barmah war (this must have
been in 1836) at Suddaby where he was
residing, and had been almost constantly
until my arrival there the latter end of 1836.
Can it be believed, the tea plant growing near
him in such profusion, if he really supposed
it to be the genuine tea of commerce, that he

would not have taken some effective mea-
sures to prove it was so, he states in the
same letter that he sent seeds and plants
to the late Mr. Smith and other officers below
there is no evidence at all on record of his
ever having done so, and that he afterwards
verbally and officially brought the subject
to the notice of Capt. J. C. King in 1838, this
may have been the case but the tea plant
had been presented by myself to the Agri-
-cultural and Horticultural Society and the
fact of its growing in the vicinity of Suddiah
made public the year before in February 1832.

I will not trespass longer on the
patience of the Society. I have only now to say
that the Society will determine and record
on their proceedings to whom they consider
the discovery of the Assam tea plant due.
I need scarcely add it has been ascribed
to Mr. Bruce and the Society of Arts in
England have awarded him their

My dear Sir

I have been
very to hear of your
studies, and particularly
to have been told of the
6' theophony that it has
been so serious as
probably to take you away
from India, at least

the

may

to make, and that you
may be able to give me
a good account of
yourself - On the other hand
if you think determine
upon even a temporary
absence, I should be
glad to learn your
plans, that I may
give consideration to the
necessary arrangements
and endeavor to comply

with them your convenience
as well as the interests
of the bank, I am
very respectfully &c
Dear Sir

after by Beaman
Bhangy sticks, and by the
for William's cues, picking
and that kind of thing is
able. I shall be able to
you full information
Subject, I have specimens
The Wood, Lewis, flowers
led coming in to me from
Chunar Hills - I have known
found as a valuable one,
years, but nothing of the sort
which it was obtained
a few roots of Orchidaceae
I brought from Hays and
I could produce, towns, but
flowers, I hope you have
either back, the Scilla, the
in flower with me - I
inquiries to send you the
Vicia Plants, perhaps
better to wait

meat
could be ^{possibly want,}
I only fear that now I
be moved before then
The Relief which has just
out looks as if we should
remain here another year -
I suspect that I should let
you, for no gentleman in
the neighbourhood can bear
the same - I am the
the Chunar Hills so
they did not bring
worth keeping -
time to increase the
some cuttings should you
are bound that the same
at Jomuchpur (30000)
wonderfully well, a
in perhaps by with
I am that you are

Being requested by you to
reply to the petition of the late Sirdar, and
in reply, I beg to state that after reading and
carefully weighing the different sides
of the petition in question, the Sirdar
is
throughout my reply
project

may
that

,^^±*

re

refer

The Sirdar in
period should have complained of his
conduct and produced the above memorial
had I been anxious for his dismission,
with respect to injustice there is not a
man on the Establishment who can prove
single act against me. The P.
the petition it is stated that I
stopped the pay of Boy, the
without investigating the
a dispute between the boys

++*t

JGZ

t

v> "/•*

caused so much trouble was lost by a Boy
it appears who borrowed it for the purpose
of extracting a Thorn from his foot which
he did not return to the person from whom
it was borrowed, and after carefully investi-
gating the matter, I made a faithful report
of the proceedings to you when you ordered
the Boys pay to be stopped for the purpose
of purchasing an other knife, it is stated
in the petition that the Boy being called
away, consigned the care of the knife to
another Boy, who denied knowing any-
thing about it, when a man or Boy
borrows an article he alone can be made

from wh
it was borrowed, which was your opinion
case, when made known to you,
the investigation and your decision
transpired a considerable length of time
before the pay day, which the Sirdar was
perfectly aware of, yet he never spoke
of the matter until the pay day, from
which I conclude that his intention
was to offer a public and gross in-
sult which he did by setting up
his opinion as a criterion in prefer-

It is only by very hard work that your orders can be carried into execution at any time, but how much more so when opposed by the [redacted] at [redacted]

his power to carry the orders into execution

In conclusion, I beg to state, that I have suffered more insults, abuse, opposition and calumny, from the late Sirdar, than ever I suffered during the whole period of my life before, and more than many Europeans would have suffered, particularly from a native, and a man of known bad character, many grievances and false charges have been preferred against me as well as the [redacted] in the petition which were all made with the same object in view that of driving me out of the Garden, yet cannot prove a single charge derogatory my character. Thank Providence, I have conducted myself so as to render me independent.

20 July 1844

July 31st - 1841

My dear Sir

I am glad to hear that you
are better than you were, and shall
be pleased to see you, if you
will call at Government in the
last part of next week. I propose
going on Thursday, to Barnack here, for
two or three days -

I have talked of visiting the Botanical Garden
this afternoon, & showing it to his Honour
the Duke - but, our plans must depend
on the weather - At any rate we shall
try to see you, but I would ask you

to give your garden chair in reading
room after the usual
manner that I wish to see
you
Yours
Ashton

R

The work of the Government
 is to be done in a
 way which is
 consistent with the
 principles of the
 Constitution. It is
 the duty of the
 Government to
 protect the rights
 of the people and
 to maintain the
 peace and order
 of the country. It
 is also the duty
 of the Government
 to promote the
 welfare of the
 people and to
 improve the
 conditions of
 life. The
 Government
 should be
 guided by the
 principles of
 justice and
 equity. It
 should be
 fair and
 impartial in
 its dealings
 with the
 people. It
 should be
 honest and
 sincere in
 its actions.
 The
 Government
 should be
 accountable
 to the people
 and should
 be subject
 to their
 control. It
 should be
 responsive
 to their
 needs and
 desires. It
 should be
 flexible and
 adaptable
 to changing
 circumstances.
 The
 Government
 should be
 efficient and
 economical
 in its
 operations.
 It should
 be able to
 carry out
 its duties
 in a timely
 and effective
 manner. It
 should be
 able to
 meet the
 challenges
 of the future
 and to
 ensure the
 well-being
 of the
 people for
 generations
 to come.

= pronouncing the dispatch
in the 26th of 1827 and

Thanking you for the plant formerly
with allusion to your
wishes in the area
country. The letter is
doctored by you and is
stated the answers on
the 12th August - but Spirit
we have no letter book
in our possession from
May 1827 to October 1832

and unexpected I have
to read of your wife
the nature of the reply is
I read and fully intended
sending you the letter to
look at but she Robin
was here this morning I
I spent about the night
with book as I had written
I ask him to search for
it and I shall be his own
ceremonie taken the letter
away.
I have been to the Hill then
what book he explained the
tell me the answer at

at 58 years of age with
supine spine & by about 2
good papers in addition
Killer & others
been contributed.

How are you doing
I trust going on all
right.

Dear Sir

Received your letter of the 14th
of March 1850

I am very glad to hear that
you are well and hope you will
continue to be so. I have been
very busy lately and have not
had time to write you more
often. I am well at present
and hope these few lines will
find you the same. I have
not heard from you for some
time and am glad to hear
that you are well. I have
been very busy lately and
have not had time to write
you more often. I am well
at present and hope these few
lines will find you the same.

Yours
A. J.

All the best
to you and
yours
A. J.

Dear Wallcut,

was greatly delighted
last evening by the receipt of
your letter of the 31st, I had
for some time been aware
of your dangerous illness,
from letters from my, and
I have desisted from writing
you though I had had news
to give you. — I shall
be glad to hear you are
hastening your departure
from the climate of Brazil
which for some time past
appears to have been
trying your constitution
hard —

From the enclosure

i *

C

you will perceive we
have got hold of the
Plukinetia, its now
in flower & fruiting
and when the seeds
open I will take every
possible care to secure
them -

Mr. Linnæus must
surprised & pained
by the correspondence
going on in the papers
about Charlton's claim
to be the discoverer
of the tea - which he
is no more entitled
to the honor of that

you or I - and I painfully
fear that Charlton is
well aware of this - &
I wish to see a part - I
thought well of so to speak
of small jealousy &
ambition to do the
best - that that
tho' me he has a distinct
recollection of the knowledge
of tea from the Benci's
distilleries before Charlton
came into the room &
that he had used tea
plants from them
& from the old Shan
phokun here now

There is not the
slightest doubt that
we may not be able
to have any documentary
evidence to this
effect -

What is this trouble
which you have got
& who keeps up this
Fid against you in
Calcutta? M.

*r(j)tJLt

London 16 Aug 1841

My dear Sir,
I am most happy to receive copies
of a paper addressed me by your very interesting
communication to Dr. Gray, the worthy Secy of
the Hort. Socy, here to be enabled to furnish
you with a correspondence by mutual service
promised to accept so much and attend
to it. I fear the fault of interrupted
correspondence entirely on my side has
prevented me from granting me the pleasure
of renewal of your intercourse.

The specimens of *Sonchae* enclosed
were taken to the Editor of the 2nd and 3rd
issues of the *Journal of the Hort. Socy*
London and the *Flora Indica* 2nd Vol. p. 101
where you will find a reference to a paper
of the late Dr. H. Hunter on the 4th Vol. of the
Journal of the Hort. Socy in which he
describes the nature of the herb in Malabar
and the fruit used as a very important
part of the diet.

to the ^{best} together with a series of letters.
Remember please that the second part sent is
not quite complete - instead of being 2-lobed it
is more laminae, 3 lobed - each lobe usually
one cell. The third set is similar to the
specimen enclosed, and have the redness
in regard to form - second sent you saw
Other specimens, were it not for my being
very infirm and sick from a late most
unpleasant and dangerous attack of cholera
I have undergone (Cholera) and therefore
ago there was a slight threat of a relapse.
I am ordered by my best friends to go to
Europe - I will hope to be at Frankfurt before
the next hot season, or at least to some
European climate as a temporary resort.
Indeed - feel the least that my boys in the
country speak in numbers, and that even
at best that is going home they want the
same - I can't help several children and
great respect - for my own health

Belgrade 14th Dec 85

I have much to do and cannot
write now, but I have been
thinking of you very much and
am sure of the fact of your kind
recollections on the 12th.

I shall be happy to comply with
your request, but the rules of the
Institute require that you should obtain the
same agent in Belgrade who would
look out for a conveyance of the
manuscript, and who would pay an
allowance for the same. The
manuscript is in the hands of the
Institute. The subject should
be ready to prepare a dossier
for the part of what is in the
manuscript, and the request
will be for restoring the
manuscript, not for calling
attention to the request. The
manuscript has an excellent
place in the
Institute.

who was his great correspondent still in the East
I doubt not but he would be able to inform us
that I shall not only possess the advantages one may
be derived from the introduction of tea cultivation
but that he had suggested to

Before we actually procured the plant, he used
to express his conviction that it would be discovered
in our neighbourhood. It had
already been found in the Chinese islands, or perhaps
Manilla... it is yielded most abundantly to us
which, if I recollect rightly you must have seen
that the plants we cultivate would turn out to
be the same as the Chinese tea.

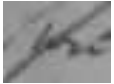

That we were in possession of the secret
tea in 1826 is for us a weighty trust. The opinion
of long poles & the most who were in the
country it is of course from the borders
the province of Yunnan, was at
my route to the Spring matter of naturally
at the time and I am happy to perceive that there
are still some of our little civility, remaining
can give evidence of the fact. Should you want
to see already known it, let me beg you to search
for an interesting letter in the British papers
about a fortnight back from the present date.
Do not know who the writer is although I thought
only gave an reference to the article. But

Left for Monday
Afternoon

My dear Doctor,

Yours

that we was not aware of and
I hope that that flag, consequently
would be over here early, to give
the Factory to be at the end of
Monday in time for
your usual dinner time

I will be about quite
early in the morning, as I
have promised to pay on
the experiments on the case

In regard to my own Affairs
I am extremely Anxious &
Much fatigued, being had
at work from 5 o'clock this
morning - so I pray you
will kindly excuse this hurried
note & believe me to remain

My dear Sir
With the greatest respect
Your most Obedt Servant
J. P. [Signature]

P.S. In prospect of my being
able to leave Calcutta for
the week yet to come
Yours
J. P. [Signature]

Sept 20 Monday

My dear doctor,

Being in earnest
conversation with Dr. Spry
last evening, I forgot my
"Libes" therefore left it
in the "Bolsa", perhaps
you can be kind enough
to have it given to the
bearer of this, as also
the 12 Chinese boxes, you
so obligingly promised
to send me today; Hoping

to have the pleasure
of seeing you on Wednesday

A day to remember
My dear Doctor,

With much respect
Yours most faithfully

L. A. Wells

Dr. Patrick
B. G. Curtis

My dear Mr. B. & C. & D.
I have just received
your letter of the 10th
and am glad to hear
from you. I am well
at present and hope
these few lines will
find you the same.
I am, dear friends,
Yours truly,
A. B. C.

Dr. Welch

Dr. Welch
A. S. B. Graham -

Mr. Schick

J. G. Adams

Dear Mother
I received your letter of the 14th and was
glad to hear from you.

I am well at present and hope you are
the same. I have not much news to write
at present.

I have been thinking of writing to you
for some time but have been so busy
that I could not find time. I have
been very busy with my work and
have not had much time for anything
else.

I hope you are all well and
that you are enjoying your time.
I have not much news to write
at present.

Love
Your affectionate son
John

on to attend university, the cooperation in getting
 out the book are promised on the part
 of various influential persons, but the
 work has not developed in any substantial
 manner, and I am writing it off with a
 heavy feeling, not however, I think, to people
 who are not to be blamed and in the same
 way I don't regret.

I don't say what you mean by referring
 to your "Plausibility" fact as the
 similar and evidence taken at the
 first college. I don't think it is
 and that you are taking, right as I might
 as the best man - I have had a
 course plenty of experience - I want to
 and have four articles to his opinion in
 of other magazines, he was young in his
 and not a person in Oriental love fiction.

This - since I can about correspond

Bohannon 24th Jan 1844

My dear Dr. [Name]

You will have reached me on the 22nd and yesterday last. Between was so obliging as to send me your large tuber and the small one with the caudate tuber & a most interesting thing & I am very much indebted to you for the information & the specimen. The plant is *Dasycarpus tuberosus* (now *Pueraria*) tuberosa or perhaps a distinct species. I must know that the plant grows so far down to the lactation of it is the real tuberosa (*Pueraria*) in [unclear] garden, where, however, I am [unclear] the plant has no harm. It produces seeds abundantly. Now that I want you - and that I am sure you will be happy to oblige me - to send me the earliest possible to the [unclear] can [unclear] with a stick to [unclear] part of the stem is attached say of 2 or 3 feet in length.

Yours [unclear]

[unclear]

V

Sk*

The plant is *Asplenium adnigrum* (Lam.) Presl
 or perhaps a distinct species. It is
 that the plant grows so far down to the bottom
 of it is the real *Asplenium* (Presl) in part
 of in the garden, where I have seen many
 the plant has no leaves. It produces seeds annually
 how thick the leaves are. I have seen
 them will be found to differ in the form
 to resemble the largest *Asplenium* that I have
 ever seen with, of a thick bottom part of the
 stem is attached to a leaf of 2 or 3 feet in length

Belmont, 14th May 1947

120

My most valued, dear beloved friend

I have just had a lot of fine cases of plants which were embarked on the 14th on the Great Western, under the kind care of the Hon. Mr. Lord. Worsley. Yesterday had the happiness of receiving your kind welcome letter of the 31st.

I am sorry that I cannot be in the garden, but I am on the way to it. I shall be there by 11.30 and will be very glad to see you. I am sure that you will find everything in the garden in a most satisfactory state.

I am sure that you will find everything in the garden in a most satisfactory state. I am sure that you will find everything in the garden in a most satisfactory state.

I am sure that you will find everything in the garden in a most satisfactory state. I am sure that you will find everything in the garden in a most satisfactory state.

I am sure that you will find everything in the garden in a most satisfactory state. I am sure that you will find everything in the garden in a most satisfactory state.

I am sure that you will find everything in the garden in a most satisfactory state. I am sure that you will find everything in the garden in a most satisfactory state.

I am sure that you will find everything in the garden in a most satisfactory state. I am sure that you will find everything in the garden in a most satisfactory state.

The first thing I noticed when I stepped
 out of the plane was the humidity. It was
 sticky and oppressive, clinging to my skin
 like a second layer. The air was thick with
 the scent of tropical flowers and the
 distant hum of insects. I had heard that
 the humidity was unbearable, but I was
 determined to see it for myself. The
 landscape was lush and green, with
 palm trees and tropical fruits everywhere.
 The people were friendly and welcoming,
 but I could see the struggle in their
 eyes. The humidity was not just a
 physical challenge, it was a metaphor for
 the challenges they faced every day.

My dear Willmet

I have returned your very
kind letter and thank you for it,
the des. appointments are in less or more
stated. your answer did not
reach me till 10 PM Saturday;
I was immediately sent to your
Cutter Jess, who returned a
man, Salom, and I concluded
that he would not go after 12th Feb.
^{next day} however he expressed a strong
desire to see you before he left
Calcutta. So I was obliged
to take him down in my boat
to the Ghent, where we found
our boat waited there some time
ago. Backy had a and I took
us to the Ghent as you

went out, we found
towards your route and after
rumoring about for some time
went back to the House; there
was nobody to give us any information
where you were, we thought you
had gone to the Bushes, Alagoa
and our slipping fingers we mistook
while looking over the same ground
to others as before and there at 7 1/2
it was of no consequence, kissing
of hope to have the pleasure

Miss Wain,

This is just to send
you some tea made before
me at Sabras' without
teed up in: after —

The only thing particular
in the tea that it is of the
sixth gathering of the leaves
and very few indeed were
found fit for plucking —
Notwithstanding the fine
precious gathering however
the trees would not permit.

had as the papers appear
to hint at. — I wish
I was the Lord's Mantle
addressed for five minutes.
Greatly thank must food
might be made out of
this evil even — but her
must spend money
without stint & now
take no more for this
spitting of blood than if it
were milk — There is
an awful call for decision.
We are all great thank God
inspiring ever yours

[The page contains several lines of extremely faint, illegible handwriting, likely bleed-through from the reverse side of the paper. The text is too light to transcribe accurately.]

✓ early 30/92

The handwriting is very faint and difficult to read. The text appears to be a handwritten note or letter, possibly dated early 1892. The content is mostly illegible due to fading and bleed-through from the reverse side of the page. Some words like "early" and "30/92" are visible at the top left. The rest of the page contains several lines of cursive script that cannot be transcribed accurately.

Some copy of Dr Wallis's notes
 on the Gumboze tree reached me by the
 Swinton and I hasten to reply before her
 return to Mombasa, as I should regret to
 see any thing given to the public on the
 subject until the original question can be
 answered satisfactorily, and being, as I am,
 opposed both trees every day season, and in
 particular concerning them, on any point of their
 fruitfulness, can be furnished with little dif-
 ficulty when I know precisely what is required
 in a singular disparity between the male
 and female plants of the small leaved tree
 the proportion where I have fallen in with
 them being about twenty to one, but since I
 wrote you before on the subject I have met
 with the female flowers, and find it really
 and the fruit though not properly formed has
 a slight inclination to being formed at its apex
 as the distinction that I saw between it and
 Aoybungh's *G. pictura* varnish, and I now have but
 little doubt of its being the same plant. Still
 there is a marked difference between the small and
 female flowers, in respect to the peduncles of the
 former not noticed in Aoybungh's description, and
 the want perhaps of a good glass, has too likely

Moreover, I considered the botanical quality
of comparatively small importance, for so long
has the use of the tree or trees that
produce the gamboge of commerce, whatever
may be determined in relation to the genus
and species of the Peninsular plants will form
nothing as to whether the production of these
trees be or be not the gamboge. Occupying
the same habitats and reported by a chain
of mountains only, the strong probability is, however,
that they are the same trees as those that
produce the Siamese gamboge. The question should
be examined and reported upon, but no notice
appears to have been taken of them.

Brooke published more than fifteen years ago
that the gamboge is one of the products
of ~~the coast~~, but it has been affirmed and
often since, quite inapplicable
for the public to form any correct opinion
on the subject; the more especially as so weighty
a name as Dr. Walpole's is among the negatives.
To have the question settled satisfactorily to the
world was the object of my communication
to you in Calcutta, and I hope it will not
be allowed to rest till this object is attained.

Allow me to add that it ought to be borne
in mind that gamboge has been found the same
as Ruffin's, a chemical analysis of its product
is not the less necessary for some has yet
been made of that from India, the result
that the color is "not so permanent as that from China"

would not to be received without further examination. The specimens although received might have been from young trees, or from other causes might not have been fair samples. I colored a piece of paper with the green tinge of the two trees of the Coast, and put of the shape about of each other, and after exposing it to the weather, wet and dry for a whole year, I could discover no more change in the one than in the other. Though done carefully, being intended for my eye but my own, I submit them for inspection.

Valletta 1 Aug 1891

My dear Wallace -

I shall not be able to see you to day or
tomorrow, but I send what may assist you in pre-
paring your notes in this tea discussion, & shall not be
sorry days of following.

In Nov. 1827 - W. Scott wrote Taylor from Jambou
about kitchen vegetable seeds & the matter of sowing them at
that place - In a P.S. to that letter he says -

"P.S. I regret exceedingly to say that both the tea plants arrived
dead; I had been previously aware of the valuable present
you were ~~going~~ going to make me & would have sent
- shall down an purpose to take care of them, which
I fancy the pear could not, or would not do." -
"W. G. King, Scott."

I conclude from this that you were furnishing W.
Scott with tea plants, to enable him to test the reported
tea plant in place.

In a letter Taylor from Gombally of 26 July 1827, he
received by you an 11th Aug. W. Scott says - "I have the
pleasure ~~to~~ to forward you by this day's mail,
a small box containing seeds, and the box

" of the Sea plant, and which have lately been
" succeeded from a ship sailing on the
" borders of Yunnan. - about a year ago I
" had the pleasure of addressing you on
" the subject of the aforesaid Sea plant, and
" at the same time forwarded some seeds,
" preserved for inspection; you will probably
" have met with the same plant in the
" coast territory where I understood it is
" found in great abundance, and known
" by the name of *Lip-ship-pin*. - I conclude
" that you have made an interesting and
" valuable collection on your late two years

The above letters were coincidently addressed
to you either as a private friend of Mr Scott,
or as Capt. of the H. Gardens, for the address

Reply

resp.

in the very day after you
 In the first vol. of our Transactions Mr.
 Legister mentions Mr. Scott's letter of 1823. but
 only that part of it, which refers to the Beagle.
 The omission of Mr. Scott's Tea
 therefore, was entirely Mr. L.'s who did not ap-
 parently attach importance to Mr. Scott's any
 important P.S. copied above - as important as the
 P.S. of any other lady's letter, wherein it always
 forms the marrow of the correspondence. - I
 cannot have put your three letters, but I
 am anxious to show them to Sir E. Dyce.

I hope

to

in Capt. Wilcox, in which he says that
he was at Suddya in 1826 when Mr. Jett
was there, and when Chiefs came to meet
him, & presented to him the Sea Plants.
Mr. Krue was also there; Wilcox adds that
he was directed to take charge of the plants
but that they died, and I think he adds
that Krue had sent ten plants at that
time down the country.

I will make no comment on these
pages, but leave you to digest them
for a day or two before I see you.

Very truly
Wm. M. Gifford

"of mine August or September 1833, which I
"think is about the first official intelligence
"of the existence of Tea in Apsam. If you could
"get hold of those reports, you would find much
"information about the country beyond Ladoga.

Some days ago I wrote to Mr. Maddick
to ask for a sight of the said despatch. I doubt
his reply received late yesterday evening, from
which you will see that nothing could be found
in his office. May it not be that the document
has been transferred to your Department, or by
Captain Jenkins's expression "the Political
Secretary" was meant that his letter as Agent
Governor General may have been superscribed
"Political Department"? - The bit of Extract
contained in his private letter has something
upon the matter of Tea - I only want a sight
of the despatch and gratefully shall it be
restored to you ~~immediately upon perusal~~

I forget to say that the draft
of the Tea Committee's letter will be found in
one of the bundles of drafts of Proceedings or
drafts

My dear D. Wallack

Since the receipt of your note the day before yesterday I have been making search in the records of my office for the letter you want but I regret to say that nothing of the kind can be found.

I have been much grieved to hear of your late attack but I am glad to hear that you are now rapidly recovering from it.
Yours &c

D. Wallack (Signed) S. R. Maddock

My acquaintance with Mr. Robinson being
very many years, enables me to declare, that
I consider him to be one of the very best phre-
nologists as well as theoretical phrenologists and words
employed in the Brain by, in all the books
of those names, and therefore, that in my
humble opinion, Mr. Robinson is eminently
qualified for the situation of secretary to the
Glasgow Company for which he is now applying
and on which occasion he has requested
I forward him with my acknowledgments.

Believe me Sir,
Yours faithfully

take up
the matter

Report May 8. 1841.

Near Wabitch.

Last January I sent
you a large packet of Arifaluse
medicinal roots & plants with
a list giving the native names
what became of the drugs & list?
I send you a duplicate of the
latter. Report in all our her-
baria famous in India for its
economic vegetable fruits
& poisons; some of the medicinal
uses of useful ones might, I
think, have been collected. I
botanical character of the plants
however could not have been
reached by means of that dis-
patch. Wherefore I because
it was probably mislaid
I am now transmitting you
an ample assortment

of 20

with a part of the
plants yielding the drug attached
as there to in a fresh state.
Can't you do the Botany from
these so as to tell the genus of
the vegetable? I can't do a rough
risky analysis the chemical
& medicinal virtues, when it
is worth while from novelty
I have not yet utility
I will spare no trouble or cost
in forwarding supplies
will understand
them used. A list of
equivalent for the vulgar name
of the ~~list~~ ^{strongest} ^{preserving} ^{from} ^{me} ^{it}
which a native said's account
of the virtues of each drug
is being attached, w^h itself be of
great value probably of
the first packet ^{the} ^{now} ^{sent} ^{to} ^{you} ^{on}
the 1st & three more ^{yesterday} in
Piangs with ^{the} ^{now} ^{sent} ^{to} ^{you} ^{on}
on a wooden label attached to each drug
list is being made out. ^{which}

has you
has you
has you

Dear Hall
I have just
received your
letter of the 15th
and am glad to
hear you are
well. I am
well at present.

Thank you very
much for the
copy of the
letter about
revising your
presentation of
the process.
I am glad to
hear you are
well. I am
well at present.

... at 80° at noon & at 60°
during winter.

The few tropical fruits that have been introduced have not succeeded. The banana is cut down by our winters. Plants from China or from the Himalaya would most likely prosper.

At present the Botanical gardens established by Col Pawler are not flourishing; the financial difficulties that have oppressed the colony have naturally affected an institution which may be regarded rather as a luxury than an object of necessity, but as we are now to become a Crown colony, there is every reason to believe that provisions will be made for the support of a Colonial Botanist.

At all events we may promise that we will do our best to requite the kindness of the Botanical Society at Calcutta by returning the cases filled with Australian plants.

I have the honor to be

them

Then again its fiscal value, ^{part} to the agricultur-
 ist as an oil-yielding soil, and second to the
 county as a magnificent source of revenue
 to its exchequer, though one on which its financiers are
 ever being warned and stigmatized for retain-
 -ing in their budget, as if India groaning under
 its burdens already, could afford to lose its
 Opium revenue. ~~It is moreover~~ There can of course
 be no doubt as to its demoralizing, debilitating and
 decimating effects, when taken to excess, just as
 the case of spirituous liquors, but it must be
 conceded that only a very small portion of the
 Chinese are abandoned and confirmed opium
 -eaters, and that the ~~the~~ great bulk of the
 population who indulge in it all do so in
 moderation, as will be admitted by those
 who know the Chinese, their industries, ^{their economy}
 -ies and their general habits: ^{the no question} There can I think, in
 spite of the opium-evil, as a national indictment,
 that they are second to ^{the} nation on the globe
 for their general industries, and patient perseve-
 -rance in accomplishing all they undertake. ^{Then}
^{unimpaired} ^{in the arts and science generally is not}
 a fault of the county in which they are born, ^{it is} ^{of its} ^{fault} ^{and} ^{its} ^{opium} ^{evil} ^{which} ^{are} ^{of} ^{the} ^{county}

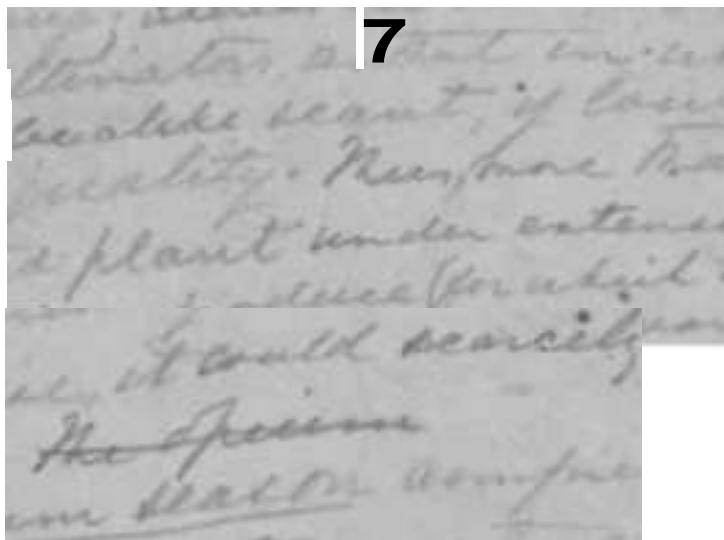

tftfy

*
/ & ' > .

and not clearly a ~~system~~ system in each
The laticiferous ~~system~~ ^{continues} ~~with~~ ^{with} ~~the~~ ^{with} ~~rest~~ ^{rest} ~~of~~ ^{of} ~~the~~ ^{the} ~~plant~~ ^{plant} is a canal ~~formed~~ ^{formed} ~~by~~ ^{by} ~~the~~ ^{the} ~~main~~ ^{main} ~~and~~ ^{and} ~~lateral~~ ^{lateral} ~~branches~~ ^{branches}, and no doubt is formed by the
reabsorption of the transverse membranes that once separ-
-ed them into a series of more or less elongated cells. They
are also regarded by some authors, as originally open inter-
-cellular channels, utterly devoid of any special membrane,
this being subsequently acquired from their fluid
secretions. The view however of which we have nothing
Analogy in other vascular formations, has little to
commend, and looking at the smooth, uniform and
transparent membrane of a delicately soft, herbaceous
-ous texture which forms the wall, it can scarcely be
regarded as other than of cellular origin by the ~~presence~~ ^{presence} ~~of~~ ^{of} ~~the~~ ^{the} ~~absorption~~ ^{absorption} ~~of~~ ^{of} ~~the~~ ^{the} ~~dividing~~ ^{dividing} ~~membranes~~ ^{membranes} ~~in~~ ⁱⁿ ~~the~~ ^{the} ~~longitudinal~~ ^{longitudinal} ~~axes~~ ^{axes} - vertical and transverse. Le Mesit and
Decaisne, in their excellent "Systeme de Botany", have the follow-
ing observations on the laticiferous vessels. - "We have seen
"referring to previous explanations" that proper vessels present
irregularities resulting from the modifications of the inner
-membrane; there are others, however, which contain a peculiar
and the latex. These anastomose and form a
complicated network of which the tubes meet
at obtuse angles. These tubes are
swollen here and there from the ac-

of latex in certain places, while below these swellings
the vessel is gradually constricted, and the communication
between the constricted and swollen portions
thereby impeded. The laticiferous vessels are then
distinguished from proper vessels by their transparent
walls, and by branching, and forming a continuous
canal." In laying before ^{the Society} any explanation
of the phenomenon of peristalsis, as exhibited by
the opium-puff, I feel it necessary to make
myself clearly understood, that I do not in the
first place give you a short account of the value
of extraction and insolation of the drug from the
capsule and the influence of weather and season
on the quantity and quality of this valuable drug-
produce. This I hope will be acceptable to members
generally, as I have scarcely ever before laying that
a majority may never see an opium field in course
of drug extraction, and the few that have seen
neither had time, nor opportunity, to become in
the afternoon the process of insolation, the
consistency of the drug and on the following morning
by drug back to again pour it concrete and all
whether the early drugs were plump and firm, or
thin and flabby: the former affording a fine rich
well-coloured drug of excellent quality -
the latter is of low consistency, dark-coloured
and mixed more or less with a deteriorating sub-
stance, termed "passewah" or opium-sweating. The
observations being continued from day to day,
the differences in the produce will be seen
or less correlated with weather differences.

03*- UjL*

developed their produce by the middle
end of February. From the period of germination
to the opening of the first or terminal flower
occupies from 80 to 90 days; the flowers are
effeminate, falling off in from 50 to 60 hours
- capsule then increases rapidly and by

and vigorous plant of course - be due
to a first scarification, for the
- al and collection of chaff. This
every second or third day, and
chaff-producing capsule, ^{^ ^ r}
from 8 to 12 and even 14 scarified ^u
the other hand a scant producer (of
which ^{there is a very large population and} in the ordinary crop, simply, as I have
- icted in my reports to Government, ^{see}

use only the seed from their most ef-
- (chaff-producing capsules), will yield
from two to three ~~four~~ times only
so easily it is exhausted. However,
in some crops, a not inconsiderable pro-
- portion may be facili- ⁹ with hard, rather

terminal capsules yield little
in the crop. The crop is then, by the replant

This however the generality of the officers of the Revenue
Department will insist is unavoidable owing
to the apathy of the natives, and I fear must be
to be regretted, as there can be no question, the
produce would be very greatly increased in a few
years should they admit of a proportionate
decrease in the land under culture
-tion, which has long been, and still is the desider-
atum of the Government of this country.
The period over which the

iL«^

TO.

**~a&tt*0%>

and carefully attended
with scant - dry
The crop would then undergo
movement. This seems to me a certainly reasonable
one in the opinion of poppy, as it has been in the
selects lands with goats and cows, and though there
leaped to another Kingdom, we have not a little
analogy in so far as regards the phenomenon of secre-
-tion: of milk-sap in the poppy and of milk and lymph
in the animals named. I feel sure that an English
or Scotch agriculturist would no more think of
sucking his crops from a scant-dry producing
capsule, than would

dry

any breeder of highly improved animals
think of blending his strain with the origin-
al unimproved race.

We have now to do with
reason as affecting the quality and quantity
and seed

correspondence with the absorption
of each fresh cambial layer in the cellular tissue
of the stem. The young and really active system would
be adjacent to the inner face of each successive
cambial layer.

trfc-

The puffy is the great centre of the capsule in
as it also is of the finest and most
latex: that in the stem and leaf being
much thinner, more watery and of lower consistency
By a result of the position of the terminal and
more exposed position of the capsule. Now, this
leads us to the question of the disposal of the
the plant in its natural condition. This we
not as may have been, previously considered
absolutely but useless to the plant, but
as we will show in a moment, this is
after having fully completed its protective
work. Truly there is a small amount of

a portion of the latter system corresponds
highly developed underlying it, is taken from the
base on the placental line. From it will be
observed that all have cut extremities, either
one only on both, these in many cases are the continuation
of the vessels of the foetal-mesoderm system from
which all draw their origin. Others may pass into
another cluster of ramifications.

We may now pass on to the second
lead, in one proposed to represent the texture
of some minute physiological phenomenon
organ. From this we have seen each of these
club shaped vessels consists of a thin or
less numerous cellular lining, individual
fibro-cellular, or cello-cellular, vascular organs.
The membrane of these organs (until near the periphery)
of the maturation of the capsule is thin and
flexible, and from a part of the
lining, so that it is always comparative
and peculiar as it would appear highly cohesive
to sudden changes of temperature, as also to dry
and moist currents. These vessels, as I have yet
observed, no thickening of the cell membrane
of the development and deposit of special secretions. They
are opening on any special force, have no special
any inner organization, have no special
to, that partake simply of that latent
to pertaining to the plant, and which occurs
then death the actual organization. Sensitive
are then, to sudden
to by remote stimulation, and invariably upon it

^ c t ^

j^Uc

y

S

sent in the tissue, because the latex necessarily
escapes, or from a mechanical pressure on the
tissue; which sets the latex in motion, as
also that this motion soon ceases. This rapid
-tion of the motion of the latex under the microscope
is I believe largely if not wholly due to the congeal-
-ing of the fluid from ~~them~~ due to the diminution of
temperature. It is considerably prolonged by slight-
ly heating it with its thin coating of glycerine
immediately prior to the application of the section
piper glass.

Mr. Schultz's explanation is an improvement
upon that of H. von Mohl. He
observes that "the
chase parallel and near each other. The
in some and fall
of lateral vessels, the
from right to left, on the reverse according to
apparent rule. The essential cause of
motion is the perpetual oscillation of the
globules." Elsewhere Mr. Schultz corrected
contradicts the above by stating that "the col-
-red granules flow in continuous tracks
his opinion by the latex ~~and~~ currents in
various directions along the course of
the anastomosing latexiferous vessels.
"They again" think an incessant tendency
to unite and
tendency ever overcoming the
with elements of vessels one: The same
as the globules of latex, it follows that
walls of the vessels and the globules

in some and fall

walls of the vessels and the globules

Certain have the same tendency to approach and
attract as the globules themselves have with
respect to each other. As this motion of coming on
takes place in a determinate direction, it
necessitates and regulates the progressive
motion of the latex. It would also
follow from the above statement that these globules
possess magnetic properties, with ~~reference to~~
the phenomena of repulsion and attraction
of the globules to each other and the walls of the
latex vessels are simply explicable on

The convenient scapegoat of an universal
vital force amuse himself if he will, but
he must not imagine in doing so that he is
preparing anything scientific". — M. Trecul,
is of opinion that the milk canals are in direct
communication with the pitted ducts, and
other vascular tissues, participate
the general circulation,
shown as it were

2

Again Professor Balfour
remarks on the so-called
"beehives" caused by a

Cyclopus
vis a tergo, because it is by no means const-
ant in its direction, and these
to supply a propelling
cannot be attributed
like that which operates in causing the sap
to ascend from the root to the leaves. Now
over its galls in for some time in parts detach-
ed from the root, where neither of these powers
can be exerted. It would then appear to be a
vital movement, connected with formative
actions, and attributable to affinities ex-
isting between the tissues and the fluids
concerned in nutrition. The cause of the
motion in them it must be admitted
sub judice".

We have now before us the opinions
of those authors, who have made the ph-
enomena of peristalses more or less a
special study. None of them however
afford us any satisfactory explanation
of the nature and origin of the motion
of the lumen, and indeed they are far
from agreed on the direction &c. of the be-
movements of the lumen in its various con-
and branches. These we have seen are most
complicated, indefinite and independent
as to render the phenomena most perplex-
ing, and it is then no matter for wonder that
there should be considerable diversity
of opinion in the modes of explanation,
not one of which however is at all satis-
-factory for less conclusive on the points
at issue. Dr. Schultz indeed to his own
satisfaction doubtless disposes of the pheno-
-mena by referring all to the action of a
vital force, but now-a-days, nobody is
satisfied with such explanations, and ^{will not}
look beyond physical or
laws, believing that there will appear
efficient cause for the phenomena in
question, without having recourse to

London May 16th 1789
My dear brother
Your letter of the 11th inst. I have just received - and have read it with
a great deal of pleasure. It is indeed a happy circumstance, that I have
not only that this has been successful, but that I have
the highest degree of my happiness in the possession of
your regards, - of my good fortune, the greater because
undisturbed, of your benevolence, and that some
mechanisms to preserve both, by all that my untaught
endeavors may effect. - The doubt is, whether it
is not a natural, when every kind expression from your
pen, tends to excite me in my own interests, and every in-
dulgent encouragement of my little passions, as
in your own, proceeds to a blissful end
- arise with you the

The people some of your books and instructions with
these present, - with of the books not yet issued all the
- instructions that you have had only been left to the
- British because they have been employed in the
- task of making the only the proof books and you
- of flattering attention with my imperfect
- ability present - the thing before you of today I did not
- have enough Phylog. I checked filled with the plants
- in his plants collected in the adjacent fields - I did
- not write me to take a note of its contents 1 ^ ^ ^ % ,
- not that had it been because it is been of any
- use - I thought it is been mentioned the remembrance of
- species but I thought they would be with you almost as soon
- as our should open this letter what is it is made sure that
- I suppose them - I suppose that the state of my health has
- greatly obstructed the accomplishment of my best hopes
- to supply you to the extent of your desires - I have been
- obliged to concentrate my best efforts and the most careful
- but my dearest instructions can not be of any personal
- use to you - undoubtedly my pen is at Kyauk Phylog.
- and as I do not doubt through the morning hour my
- own collections have been confined to them to be found
- if your health has not been left and to be found
- my own inclinations - the kind of a companion to
- should be my own of traveling - you with know
- say there are the causes of each and every one and
- the truth is to guard you against its obstruction
- in this instrument - I hope to be found in of
- their careful and they will be as a test book to
- with your own direct and reliable with them I hope to
- be found with unassisted health - The species that are
- not mentioned far of your presence as there are more
- species

could - No! - I should expect I have not that I have found on
they want - but if I should be the case here, and you would
be gratified and obliged - let it be called Dr. ~~Medicine~~ -
I have such tributes as justify me, and I should be proud
- much prouder of having added to the name of your society, than
to be assured of a haughty constant to my own
memory, which is more justified in my eye, than I should
name a plant, after one whom I had just learned to
highly, than on every respect in a book different given
designated by my name, of an (accidental) earnest -
Columbus, my dear Doctor, was a true discoverer - the
man who first landed on the Brazil (I forget his name)
is scarcely ever heard of - he was known there by a name
- before there was a knowledge of what I think, or I suppose
to the time you propose to me! - By the Duke boat which
will I hope carry this (i.e. the first) I shall send to you
a package of dried specimens, of what I think
is best - What! you will say, are these all? There are more
all (with good examples) of the plants, than is listed,
the same are in duplicate, triplicate, or quadruplicate
the best - In explanation of the structure of the plants
I have taken to what I should call, and hanging under the head
of plants, I add that the number of plants only taken
of a month or five weeks - * - ^ > - J
of some of the specimens I have sent - some could hardly
- such as 17, 18, 19 + 20, and some others - I inserted them
without consideration, and do not now regret the list,
as they will but give you the trouble of selecting those which
deserving of - I give with the paper - I am like to see in the
of preserving plants, that as might be expected, many
are very imperfectly and faintly done, not above a good
quantity - I have not on the specimens of some of
the plants - the number is very small, but the fault has in
beneficial - I should like to see them fully received - If
there is any one - > ^ / -
that be much of your kind - they are under a particular
board of your office, if you have leaves, a specimen of
- 200 - is the number of the specimens is numbered - W. 34
is the number - I have made no allusion to the
plants - you will explain them - I have
my own botanical descriptions & correspondences
so that whatever one of the latter you may wish to refer to
I shall be able to recognize it. - I will only hope no success
may be their success, make them worse than they are -
I have pleased, the only reference I know of, I think the smallest
of the world must be obvious to them. - I give paper
of your specimens - I have not a single one of them
myself, with a list of the plants described, I think to be
about one - you will find some in the time 10, 11, 12, 13
of the plants are attached - I have given in this paper
like that sent in my letter - The fragments of the plants
of the supposed life and other specimens in my collection
to be referred to in your paper of the 10th - I shall be sent in
the next sheet - when you perhaps before of the plants
is offered - I think what you will - I have not to mention
some and many wanted a dried specimen of the leaves
{L./ik<^*.- ~, with the other dried plants, but that will be
- 4 - ~ S S ^

The Oak - at any rate, it has a hard & heavy foliage -
I regret that the Oak is not found in this vicinity, & that
along the mountains, & its uses are too numerous to
mention, to accomplish of itself into supplies - There
is a tree here, a species of mangrove, the wood of which
has just been told, strongly resembling Oak in texture
& color, & is much used by the natives - The species
of "my cork tree" - is your description, it is of the
the "Lithium" - same in search of - found two or three
small pieces of the cork, or old bark, which I had lying
my table, with the dried plants, and several other
pieces of a few seeds, & a part of the "the species" No 10 - & very pretty
plant, which has been in flower, & nearly dried, & some seeds
have been in the province, or else the sea coast is better
known than at present - It is a small plant
- some on the edge of the mountains, & some in the
canyons of the mountains, & some in the
country - I hope during your travels you will discover
what in the heart of the mountains, & some in the
the woods, & some in the mountains, & some in the
how exactly your heart would feel under a blow, and how
certainly that any hope is built upon - I am delighted
that you have so well struggled through the winter season
you have had in Calcutta, - though your
a serious loss by the death of your head gardener - The more
the death of your head gardener, & some in the

Wotton's Garden 22nd Dec^r

My Lord

I beg leave to acknowledge the receipt
of your Lordship's most kind & descending
Letter. I shall not fail having the honor of
waiting upon you at four o'clock tomorrow
morning by the coach express'd therein. -

I am sure your Excellency will as-
sure the justice to believe that I enter heart
into the scheme of naturalizing the
Lupinus in England & that I do rejoice in
knowing the scheme to be countenanced
& encouraged by the very first & highest author-
ity in the land - as perfectly as I am assured
of the soundness & practicability of the plan
I cautiously & carefully have I & others weighed
all its bearings before we came to our ^{present} favorable
conclusion. ~~conclusion~~ ^{conclusion} that, excepting
uncertainty, which is inseparable from all
human undertakings, even those originating
in the loftiest & most gifted mind
which cannot be foreseen - ~~less~~ if foreseen
even admit of no remedy - it has been considered
almost impossible that it should fail in the
execution; provided the proper steps are taken
at the outset & judiciously pursued in the
sequel - provided, in short, that the plan is
conducted & executed under the very auspices
which previous conversations & the present commission
with which I have been honored promise for it.
I humbly submit that the preliminary step, agree-
d by your Lordship, of appointing a Committee of four
persons to deliberate & report upon the question is
in every way calculated to ensure its being properly
adjusted & matured. & I trust you will please to
allow me to declare that, either on the Committee or
not, in any possible way in which any possibility
can be of the least use they shall be exerted in the best

in view: indeed I cannot imagine to myself
an occasion on which my feeling of bound
duty would be more ardently & anxiously aroused
by my best wishes & inclinations.

With regard to the transfer of part of the
to the plains in Calcutta I hardly care to enter
my views without very materially considering
the subject: but now & ever respected as the idea
is to me I frankly confess I can see no possible
objection or difficulty unless they be those that
belong to all undertakings of considerable extent
- The greatest benefit to the inhabitants of Calcutta
is to neighbourhood compatible with the manner
of benefit to all India on the points that must
claim attention on the occasion & I should think
that they admit of being adapted to each other in
such a manner as will under the arrangements
which you so liberally does me the honour to propose
for my consideration at once practical & advisable.

I have the honour to remain with sentiments
of the profoundest respect & with the warmest gratitude
My Lord

Your most obedient
& obliged servant

A. N. Wallis

...ring that such a conveyance is
to be at my disposal.

2. The situation of the
D. miles below Calcutta, on the left
bank of the river, and the absence
of any bridge, render it indispensable
necessary that a boat should be pro-
-vided at the service of the Super-
-intendent for the prompt and effi-
-cient performance of his public
-duties, which are of a nature requiring
-frequent intercourse with Town and
-country matters directly or indirectly connec-
-ted with this institution, and often
-of an urgency admitting of no delay.
-Scarcely a ship leaves the Port
-without taking collections of various
-sorts from the garden, the ~~market~~
-of these ~~to all parts of the world~~

this being one of the principal objects of its ~~purpose~~
of its institution - ~~and the only condition on which~~
it rests its claims to those contributions
from abroad which are so essential
to its ~~well-being~~ well-being. This requires frequent
personal

To, Genl Burkhby
~~H. P. Princep Esq~~
Offy Secretary to Government
General Department.

Sir,

It is with deep regret I
feel myself compelled to solicit that
Government will be pleased once
more to take into consideration the
measure which was announced to
me in your letter of the 10th Instant
2. So little did I anticipate
that I should be deprived of the
means of conveyance which from
the first establishment of this garden,
now upwards of forty years ago,
has been possessed by the Superintendent,
that I fear from an ill-judged confi-
dence that the necessity thereof
would be self apparent, I must have
too cursorily or superficially mentioned
in my letter of the 18th October last,
the various occasions

personal communication and explanation with the commanders of vessels, and as their services are small these occasions perfectly gratuitous ^{is} the only return that can be made is to facilitate their visits to the garden, to which a boat is ^{often} sent and often taken advantage of. I may here remark that general visitors have always been in the habit of depending on the means of crossing the river. The nature of the situation of the superintendent of an Institution like this brings him into official connection with a variety of public associations and individuals. I may instance, Asiatic, Medical and Horticultural societies, the Medical Board and the Apothecary General, and at this very time, as a member of the Sea Committee, ^{may} presume to affirm ^{that} from reasons well known to Government, ~~that~~ every possible cooperation and aid in my power are expected.

surely the last

to

the garden

-4*&£srO^'tS*

ted, my attendance in town, and in
verse the preservation of the secrets
of the Committee are frequently required.
All these occasions for the preservation

and numerous other
which need not be
specified here,

use of a boat is entirely from the
nature of the situation which holds here, the
occasions ^{generally} occur ^{often} at a very brief notice, and
often at extra official hours. I have suffici-
ently adverted in my former letter to the
^{many} ~~several~~ instances in which my offi-
cial attendance at the Government
Park at Barrackpore and at other places
on the river has been required.

Trusting that the above expla-
nation will establish the necessity
of a boat being permanently at my
disposal it is evident that the privi-
lege notified in your letter of applying
to the Marine Board at a distance of
six miles, ~~is a great~~ ^{is a great} ~~inconvenience~~ ^{inconvenience} on each occasion
would ~~be~~ ^{be} quite unavailable
at the instances ^{requiring} ~~requiring~~ ^{a rapid}
conveyance, ~~in~~ ⁱⁿ the ~~vicinity~~ ^{vicinity} of the ~~vicinity~~ ^{vicinity} of the ~~vicinity~~ ^{vicinity} of the
of immediate urgency and after

the hour of attendance in the public
offices; besides, in many ^{other} cases
the delay would be productive of
difficulty and embarrassment. I ^{have} men-
tioned in my former letter that ^{no} ~~most~~
^{accommodation} a boat of any kind is procurable here
for crossing the river, ^{and that even} ~~not even~~ a com-
mon Pannice or ^{boat} ~~Thuggee~~ be had
nearer than Howrah or Calcutta.

6. As it is obvious that, should
the ^{boat} ~~boat~~ be withdrawn, I shall be
compelled to maintain one at my
own private expense in order to perform
my public duties as I have hitherto
been in the habit of doing, I would
here briefly advert to the indivi-
dual hardship, which ~~involves~~
such an abstraction from my person-
al salary would be. I humbly trust
I may be ^{able} ~~able~~ to refer to the orders
of the Honble Court of Directors in
which they are graciously pleased
^{to direct} that the reduction, suggested by
Finance Committee, of the salary of the

the Superintendent of this Academy, do
not come into consideration until the
appointment of my successor, a boon
which I am proud to construe into
mark of their favorable opinion of
my labours both in this country and
at home. I hope I may affect without
impropriety, that my endeavours
to deserve the approbation of the
Honorable Court and the Supreme Govern-
ment have been constant and un-
remitting and on all occasions con-
nected either directly or indirectly
with my profession or pursuits I have
been forward (of which instances are
known to some Members of the
Supreme Board may be adduced) with
offers of my services, not only without
the remotest wish for, but expressly
disclaiming all idea of remuneration,
where I considered they might be
acceptable to Government or beneficial
to the Community. My assistance to
the

Si - yJ-

the absolute &> *t&'*?& [redacted] the [redacted]
before explained, this [redacted] the [redacted]
on [redacted] of keeping up a boat along
private expenses for the execution of
my public duties I cannot but
consider that the withdrawal of that
which for so many years has continu-
ed attached to the Office of the Super-
intendent [redacted] [redacted] be looked upon
as forming part of his allowance, as
a virtual, nay almost a direct reduc-
tion of my [redacted] [redacted]
[redacted] fixed by [redacted]
[redacted] amount [redacted]
I therefore

What will convince I must
accept of the extensive practical
benefits produced by the Guide. Then
they produced that people never
study the machinery by which they
have been produced. I don't think
you can do for your present
purpose - I think Guide study
is higher estimate than they put on.
I have just had a first rate Guide
appreciated by the Schuyler family
I will tell him to pay his respects

In the Book of the Magistrate's Court

Read the original letter from Mr. R. Bruce to the address
of D. Scott Square of date the 22^d August 1823.

from the Court of the Magistrate's Court

The Magistrate's Court tells me that a party
has been in his country and showed me some of
the seeds he called the tea or bushy preparation.
I could not tell what it was. I have perceived him in
some of the tea plants and some seeds
and he has engaged to give them. I have not yet been
able to hear of any tea stores.

True Extract

A. Davidson

Magistrate

Mr. The above is the 1st letter on the
subject but I have hopes of obtaining
more in the books of the subsequent
years - A.D.

July 16th

Singapore Aug^r 23rd 1841
rec^d 11th Sept

My dear Sir,

I was at Singapore three days ago and the News
 paper of the 15th the Englishman was sent to me - I was
 much astonished at seeing an attack on yourself and
 on me too - about the denouing of the Sea - I am sorry that
 they should bring you in on all occasions - and would
 think that you are never to have any rest - but in the
 future - these are **JL^*L & £4*4j*r~.** us to see how ***£**t-^O 40-*^ •%£****
 will do us good in the end no doubt - as for myself I
 must say I felt vexed that I should be handed about
 in the papers for every one to make their comments
 and that I was condemned at once without hearing
 I have written to the Friend of India my answer to his
 article - he had better have let his
 pen he has only exposed his unchristian gentleman
 conduct in trying to defame me of what he knew to
 be mine - he he knew that I was the first discoverer
 of the Sea and he also knew that I could not show
 any public documents and that he could, thus
 he is trying to rob me - Why the first plan he
 set on 1830 was sent down by me through his publisher
 and had been known four years before - In 31
 I went down to Johore and saw plenty of
 the leaves of his books - and indeed had
 a long conversation on the subject of tea - I
 think that we had found in several years but of
 not known if it was the true tea or not -

fo^A*

In 34 he was ordered up to Suddacah and here he
commenced writing our tea - his usual
talk are tea very often, and often has he
told me that he did not wish to lay any claim
to the discovery but to having brought it to the
public notice - thus he blinded me while
he was undermining me - he has had a paper
for himself - people of honorable feelings
will shun him - he has degraded him-
self - I have requested Capt Kitch to send for
the Dress Gown and ask him if my Mother
ever gave him a written paper at Rungpoor
before the summer was bid, and ~~that~~
that he would give him a musical ~~instrument~~
for a tea plant - to ask him if I did not request
him to send me the plants, did he send them
and did my questions before me get any
answers on 26 March - To ask him if he did not
send me from time to time for three or
four years plants to Suddacah before
Capt Chantore arrived on the country - Why
the very scapuz of any one living local
being witness that I got the tea plant
down in 28 soon after Suddacah

"£,£<&>***<6-

was occupied by us - the
 Cuccubus family would prove this and
 that they saw it ⁱⁿ my garden - Why it
 was growing at Bergeon at my Mother's
 before Capt C came into the County &
 I sent it to Mr Scott the same time I
 did to my Mother - but unfortunately
 I have no papers to prove all this
 but I have living witnesses - I hope
 Capt Vetch will have the full Law
 on his people before him -
 If you have any papers
 of Mr Scotts or any body
 else and would assist me
 with extracts to prove that
 Capt C has not the least right what
 ever to the tenancy I should feel
 greatly obliged - in the mean time
 I shall not be idle - I have written
 to all those that are alive that I know
 15 years ago - and have other wheels
 in motion - that Capt C shall not go
 off with a fly in his ear - I can help
 you with my life 50 times for the

Abstract of the Proceedings of the Agricultural Society
at the Meeting held on the 15th February 1852.

' Read a letter from Dr John Symon dated 30th October
enclosing two letters from Lieut. G. Langton to him, offering
to the Society's use 'Jum' Brand, Bantshorn and 'Sea'
trees brought by him from America.

' The Secretary reported that these plants had already
been received into the Society's Garden, and he now
requested to convey to Lieut. G. Langton, through
Dr Symon, the thanks of the Society for the donation.

The Secretary of the Society

My dear Sir
 As you once were so kind as to offer to
 assist me & by granting the request I am about
 to make will be instrumental in providing a
 comfortable maintenance for two Widows & their
 numerous family who will ever feel most grateful
 to you, I need not crave your forgiveness for ever
 troubling you. My poor sister Brownlow being
 compelled to relinquish the Cacatchone operation
 which was our only dependence, I have been ad-
 vised by a kind friend here to address the Govern-
 ment soliciting a Pension & on reconsidering the
 Hon^{ble} Courts reply to my Memorial there is little doubt
 but that it will be granted if I can be provided
 with Medical Certificates proving that incessant ap-
 plication to the laborious duties of her Office caused
 the death of my lamented Husband I always felt
 certain that that was the case as I saw him
 under & during his delirium (which

42**t

is alas! painfully improved, and my mind my health
continually raw and sore. I have Office of Health
These certificates appear to all the health required to
ensure a favourable result to my application &
seeing how much depends upon it, & being my
only resource, I cannot but earnestly solicit that
you will grant me a certificate to this effect &
may I venture to request that you will see Dr. Nicholas
(who attended my dear Husband the last few days before
his death) & Dr. Stewart his regular Medical Doctor
& take the trouble to represent my case to them
requesting them to certify to the same as yourself,
then I cannot suppose that either of them will have
state to do. I would have written to both gentlemen

-.^ fjk^> z* 5

n

Liberty

to afford permission
to the Hon^{ble} Court
this second appeal. I have for
been striving to support my family without
having recourse to it, but as ever from myself
& poor Sister have attempted
now compelled to have recourse to it. —
I am now from home, staying for a short time
with my kind friends at Hongkong & hope I shall
derive benefit from the change. I have not been
well lately, I believe chiefly owing to the cause
disappointment the very low price offered in Augst
for our Crotchones, has proved to me. —

I trust you are enjoying health

I remain

My dear Sir

Yours truly

Prosser
29 Aug, 1844

In the case of the late Mr George (Attell) I
can ~~very~~ readily understand, that incessant
application to his Office Duties brought
on the illness of which he died; for I had
good opportunities to know the deceased
character well. His first office employment
was under me for several years, as
Clerk of God's Plantations, ^{I can safely say that} and ^{a more}
zealous and indefatigable man; - one
more ~~intensely~~ devoted to his duties
never breathed. - I have been much
allowed to add this testimony to the
Bill attested by Messrs Nicolson and
Residence Surgeons, in the
accompanying Certificate.

Polygramma Sp. 30. 1841.
no 26. 1841.

My dear Sir

I have to return you many thanks for your
letter of the 27th. I very much thank you for the pleasure
to receive by the last mail. The case of
Plants arrived quite safe late last night, & I will
not wait to announce their arrival by the paper,
but because I was anxious to do so to let you
that I had seen them at the post. I was however
obliged to go to London, & as I was obliged
to return without seeing Mr. Sayer & visit. He
however informs me that he has received
plants from India in small capital order, which
I had including however I am sorry to
say the Magnolia. I received a great deal
of trouble to receive them and I am
happy to tell you I have succeeded in raising
2 plants from the given to me last year by
Dr. Sayer. - Mr. Sayer is very anxious to see
them & specimens of Malacca. I do not know

Yours
D. V. 1841.

Altho' I was to forward the
contents of the box I accidently

sent some 3 specimens at which I
am & will send again

,4..^ - JT -

with the same forwarded before
that they will reach England in a few weeks
more. - I was at Tuesday last in the
House of Lords upon the trial and
amherst the equitable but most deeply
permeated to you. For the sake of the
I am very glad and about to lose and
speaking of his sisters but all their
friends and confidants for them. Return to this

which tells you she will succeed
I think I thought Sir James
Graham would have accepted that
but I am now told he will not
with Lord Melbourne may be useful

TV

I fear not. Mr. Pains is
very young, I shall little chance
of going to India under the late government
and how that my friends are in such a
power I must say the my appointments to fill
this

The most important government under the
Crown is still likely. I like India. I am
wondering the service in every Department,
that I should find it all things, but

circumstances I should find it all things, but
could, in the highly important work of
being offered to that, present, and I am not
accepting it. I have my own ideas of
the British Government and

inhabits with
had my own ideas. It
is likely for the kind of
service to my work,
I will certainly be

Yours, that I will have Mr. Sturges as his
Colleague in Council. - The feeling in this
country is very strong both against the late
government against their persons & I have
no doubt that Mr. Sturges' administration
will be very strong & very popular. Radicalism
is sinking fast. I think you should like to
accept the example of the good cause.

Believe me Dear with many thanks for all the
trouble you had taken for me

Yours faithfully
Charles

I hope Mrs. Chen has paid you for the
 case is I suppose if not please tell me
 I am happy to tell you that Mr. Saylor visits me
 word Amherst has been sent through
 Chatsworth gardens.

Dr. Hallerich

Ellicottport 30th Sept
My dear Sir

Many thanks for your
kind and valuable communication
of the 16th Inst to which I will
reply more at large as soon
as I have made enquiries
regarding the true tea plants,
with the acid now afforded by
the leaf and seeds ^{by the fruit at}
You will have perceived that
I incline to the opinion, that
we are duped by the Chinese,
who furnish to the Europeans
and other nations (nearly all
of Europe) more tea than
could be obtained from Ceylon
without covering the surface
of their land to the exclusion
of more valuable produce

in case of the Board 30
hall meeting
Row sent a query
it is not
favor to gain
kind labors which
of Secretary in the
of the state which had
at the time of an app
and offered notes that
rather be rejected than
as it gave you a query
troublesome. Nevertheless
especially requested
Board to obtain
valuable services

-t

but in this may be entirely
wrong - "Bovone" will
regard the "Bovone" will
endeavor to obtain the seeds
and plant at the present
season - there are two or
not more kinds; and one free
called the "Bovone" is a very
tough wood used as a substitute
for oak, but this latter is obtained
from the "Bovone" which the farmer
call "Bovone" or "Bovone" both
are of the same produce a grain
used in the "Bovone" which grain
the farmer uses as a substitute
(It is said for oil or glue -
However, I know not what it is
As to the paper & least the
for the "Bovone" letter and on

11
I have regret at your late
illness which will however
I trust have entirely left
you -

Should you or Dr. Spring ever
come in this direction (or
learn) from the operation
I need not say that it
should give me the great
pleasure to have the
entire fact of approval
from you and your kind
papers and letters at home
even had the advantage of
a drunk in proteins or
natural history and has
always been a translator
and from Librarian's
and make known a occasional
fact to the times to see what
I suppose you endeavor

by an agreement. Of course
in case your objections should
not be removed kindly say
so. However - I am with much
affection
yours

Hope you are well. My
own health is - as you are
expected - and the severity
of my late attack - and the diffi-
culty of this season in regard
to all convalescents.

Yours sincerely
W. Wallis

As an experiment
I have from observation found
that the commonest kind of
to. however - from both sides
I will see by experiment
I have from one side the
own health is of course
I have from one side the
of my late that - another
only of the reason is
to all circumstances.

Yours very truly
W. W. W.

Weymouth Aug 8. / 41

Should you this
night be the
same has taken
the night
at the
the
it as one
your friends

Mr. Genl. Dimes

General Dimes
21st August 1846

I received your letter of
August on the subject

Captain Chastellain's claim to the discov-
ery of the Sea of Okhotsk in 1741.
You are an old hand that meet
to yourself I am the oldest European
resident in Astoria and you have

in the subject.

to see that your new learned Society
the Association

not strictly deserving a bound to an
elaboration upon our separate State
ment made by Captain Chastellain
as it was merely doing would not
certainly have shown a great disrespect
upon you, and your prior claims
as the Father at large, would have
given it the credit of having done
a patriotic act, when ev-
idence not to be questioned but
as the old song says.

As I am sure
Saw y things

days there was no doubt in
the world he came years after
wards we had Mr. Scott then
to the best of my knowledge re-
ceived many of the African plants
from your Brother, but he had
received such a distinct account
of them from him that he was
quite conversant in of the genuine
Sea plant being in evidence.

When Captain Charlton
came down we dined from the
Singapore society I called up
on him as he passed here and
the Sea plant and the sailing
of Sea was the subject of our
conversation Captain Charlton
did not claim to have discover-
ed the Sea thing if he had
I would have corrected him as
I did fully aware of your Bro-
ther's claim I mentioned to
him that I had infused the leaves
of the Chinese plant in water
then given him by Mr. D. Scott
and by him received from Mr. Wick
and mentioned that I could not
make tea by these means upon
which Captain Charlton explained
to me the process of making it and

compromised it, to buy whose goods
in the [redacted] had no security
and how when and given could quickly
by dated he must remember the
conversation.

The above part is by Capt.
Charlton and the same occasion
it was taken up by the Society as
claimed before named was but I
replied when Dr. Wallis being
able to put them all to rights
on the subject, the subject charge
against him

P*

Charlton's claims because Mr.
Scott & your Brother were dead
seemed to me unreasonable and
I concluded that although they were
dead it was most likely that
Dr. Wallis had some of Mr. Scott's
letters, as I was fully aware they kept
up no active correspondence, besides
I comforted myself that if he
had them not, yet, still the evidence
of Mr. George Swinton could
be obtained on the [redacted]

It is my [redacted] do hope he is still
alive, and I thought you would
not sleep upon the subject, but
naturally enough call upon me

to give such evidence as necessary
power, and that you also will
upon ~~confidential~~ friend General
George Cooper who some time
has been to the spot could give
evidence on your favor or your
Doubtless and against Captain
Charlton's claims, Captain Char-
ton states he got the informa-
tion from his Wally that the
Chen plant was found in the
jungle about Chuddah or Deesa

In the first place, your very
ast. time, who is [redacted]
a Wally? I guess either your
Doubtless or yourself, as no Wal-
-les could have been originally
found, near Sudda at that
time - and next is the word Chen
the Singh plant word for the
Sea plant or Sev may be so
for all I know, but if next it is
evidence that the Wally must
have heard of the plant, from
some Cassipou in whose service

me before Capt. Chantler's arrival
on that part of the coast.
The Dutch's some times bring
down Black tea to their boat
although they are partly close to
China they call tea by the name
of "Dance-poot" not "Chai" from
which I suppose the Sinc-poo
may have a name of their own
for the tea used as it is by
the Chinese name of "Chai" It
appears curious to see that after
Dr. Wallis's evidence by **sf.**->** the
society used a parcel of this

Illichpore 3rd September 1841

July 16th

My dear Dr. Wallich

if/ rtZ.ii

In accordance with my promise few specimens from this neighbourhood, taking the chance of some being interesting, in one respect or other, in your able hands, and those of Dr. Spry.

No 1 - Acrogens plant growing rather abundantly on the Gawilghur range of hills, and on old walls in Berar - the natives call it Rajhuns - also Parisiawushan and Sansi - anxious to procure the legend attached to it in the Shah-Namah if you could procure an extract from that work, through the Secretary of the College - it has reference probably to the want of sexual organs - in the Dictionary of Shakespeare, Pteris lunata is given as the botanical name of the Rajhuns or Parisiawushan & in Johnston's Dictionary, it is termed Adiantum, and is said to be gathered for medicinal purposes - Sindlay describes the Pteris esculenta as substituted for food - the Aspidium fragrans was substituted for tea - that the kind of Pteris has been - heard of in the mountains of Berar - (see place) in books, by Rabon & ...

Sindlay describes the Pteris esculenta as substituted for food - the Aspidium fragrans was substituted for tea - that the kind of Pteris has been - heard of in the mountains of Berar - (see place) in books, by Rabon & ...

No 2 - A fragrant plant the Gonds call it Purru - grows on the slopes of the Gawilghur hills - It is possible there are two kinds, one with this kind of leaf of which if you have any the specimen if you wish this leaf is larger

No 3 - A prettily marked Fern very abundant on the slopes of the Gawilghur range of hills.

No 4 - A growing plant *Urtica trifolia* or a medicinal plant - very abundant in Berar, if of any use - "Kund" of the Gawilghur hills name not known

No 5 - "Kunda" of the hills name not known

Handwritten text in cursive script, appearing to be a letter or document, written on aged paper. The text is dense and spans the entire page.

Dear Mother
I received your letter of the 15th and was
glad to hear from you and to hear that
you were all well. I am well at present
and hope these few lines will find you
all the same. I have not much news to
write at present. I am still in the
same place and doing the same work.
I hope to hear from you again soon.
I am, dear Mother, ever your affectionate
son,
John Smith

P.S. The Amherstia is now growing beautifully. —

Chateaux Gardens

September 14. 1842

Dr. Wallich M.D.

John^d by W. Melrose

19/2 42

Dear Sir

I take the liberty of communicating a few lines by the bearer Mr. J. Melrose, who has been appointed Gardens to the Honble E. I. Company at Saharumpoor, and is now on his way thither. He has been holding an appointment here for some time, and I think you will find him a very nice person, who will inform you how things are progressing here —

Since my return from India I have frequently had the pleasure of unpacking the treasures which you have had the kindness to forward to the Duke of Devonshire.

L. de Wallich

and

bases above named. He made application
to the Directors, stating that he had a

0

/ 7 C

whether any of their own vessels would take them
but this application was repeated and
each time lost by unacknowledgment.

Perhaps you will be kind enough to inform
him what is usually done in this matter,

as he is anxious to return all your
cases well filled with plants, provided
the postage is not charged to him.

Anything the Collection at Chatsworth
contains, is perfectly at your service.

I will have a good stock of cases ready

t ~ ~ fa

for shipment -
favoured with instructions from you -
and as I have recourse to ^{all} your lists of
desiderata, and from what I recollect of
the plants most desirable I flatter myself

ε-1
exceptions they have come in
in excellent condition. The boxes have all arrived
in due time, and Mr. Paxton is writing to you
in acknowledgment of them.

Six glazed boxes were filled with plants in
November 1837, and sent from this Garden to
your address. We have not heard whether they
arrived safe. They contained 3 American Orchids
and a quantity of Roses, Camellias, and
Shrubs, all of which would I think be accep-
table - if they arrived safe.

Mr. Paxton wished me to ask you whether it
was customary to pay the postage of plants
to India, or whether they are paid on delivery
at your Botanic Garden, as he would have
sent quantities of plants long before this
period had the postage not been demanded
when the cases were shipped in London.

I have paid £26 --- on the postage.

we shall be able to afford you some gratification and compensation for the many valuable acquisitions you have been so kind to forward to Chatsworth. Mr. Paxton's ~~new~~ 'Dictionary' which contains the names of all the plants already in our Country - it will be a guide ^{very} ^{useful} ^{and} ^{valuable} ^{to} ^{you} ^{if} ^{you} ^{should} ^{think} ^{proper} ^{to} ^{send} ^{any} ^{more} ^{plants} ^{to} ^{the} ^{Duke's} ^{magnificent} ^{establishment} ^{at} ^{Chatsworth}.

In conclusion I beg your acceptance of my dutiful remembrances, and I assure you that anything I can do in forwarding plants to you, will give me infinite pleasure and shall have equal pleasure in seeing any of my old acquaintances.

My very kindest remembrances to Mr. Wallick & family hoping they & yourself are in good health - as this leaves me -
I remain yours very obediently
John Wilson

Lesy Abraham Carter

Baltimore 16th Feb 1840

My dear Mother

I have been at death's door by an attack
of delirium in the worst form this month ago, and
it is only within the last fortnight or so that I
have in reality recovered something of my former
mental faculties. My medical attendant has frequently
doubted the necessity of my quitting home, at least
my carriage before I could get on, as otherwise I should
be in a state of total prostration (I had sleep several days in
the week 1840) I think in all human probability will
never be able to do so. Of this I have a very clear perception
that unless I receive very soon my day job some
benefit, that my life will be protracted in this country
and probably will not have many days any more
left to have happiness, and for nothing I
shall be able to make home-ward before
the end of Feb. and Buckland has told me
that he would be glad to meet my mother
as far as consistent with his public services. I
trust that he will be with his best intentions if he
can be means I could purchase the best annuity in
the market.

Yours affectionately
Wm. A. R. R. R.

V

Please therefore do the needful with the arrangements for the
 dinner. If you would kindly obtain leave to present
 letters to my wife, I Fitzwilliam St. Pembroke, and
 send general letters to Mr. Home Capt. G. has got the
 gold medal at the Mexico his months at
 which others were by President attempted. But
 what of that? Since that other the case. Oh no!

Farewell, my dear Park. Excuse this last
 personal and believe me, I am
 very sincerely
 Wm. Pitt

|

The first part of the paper is devoted to a description of the general character of the country, and to a notice of the principal towns and cities. The second part contains a list of the principal manufactures, and a description of the principal articles of commerce. The third part is a list of the principal rivers, and a description of the principal lakes and ponds. The fourth part is a list of the principal mountains, and a description of the principal hills and valleys. The fifth part is a list of the principal islands, and a description of the principal bays and harbours. The sixth part is a list of the principal rivers, and a description of the principal lakes and ponds. The seventh part is a list of the principal mountains, and a description of the principal hills and valleys. The eighth part is a list of the principal islands, and a description of the principal bays and harbours.

The ninth part is a list of the principal rivers, and a description of the principal lakes and ponds. The tenth part is a list of the principal mountains, and a description of the principal hills and valleys. The eleventh part is a list of the principal islands, and a description of the principal bays and harbours. The twelfth part is a list of the principal rivers, and a description of the principal lakes and ponds. The thirteenth part is a list of the principal mountains, and a description of the principal hills and valleys. The fourteenth part is a list of the principal islands, and a description of the principal bays and harbours. The fifteenth part is a list of the principal rivers, and a description of the principal lakes and ponds. The sixteenth part is a list of the principal mountains, and a description of the principal hills and valleys. The seventeenth part is a list of the principal islands, and a description of the principal bays and harbours.

The eighteenth part is a list of the principal rivers, and a description of the principal lakes and ponds. The nineteenth part is a list of the principal mountains, and a description of the principal hills and valleys. The twentieth part is a list of the principal islands, and a description of the principal bays and harbours. The twenty-first part is a list of the principal rivers, and a description of the principal lakes and ponds. The twenty-second part is a list of the principal mountains, and a description of the principal hills and valleys. The twenty-third part is a list of the principal islands, and a description of the principal bays and harbours. The twenty-fourth part is a list of the principal rivers, and a description of the principal lakes and ponds. The twenty-fifth part is a list of the principal mountains, and a description of the principal hills and valleys. The twenty-sixth part is a list of the principal islands, and a description of the principal bays and harbours.

72
other times. I have only recently got some the ⁷² but
a most vigorous black, which in fact has
been of indispensable necessity that I
should visit India before March next at least
possibly. But I am now hope to do so
soon.

With great pleasure of the
time we met out here, and required
my acquaintance at home, there is no
reason of a plain meeting, you before long.

Very sincerely,
Yours very sincerely,
W. Wallis.

Collection No. 1041

722

✓ *Asplenium*

part of my present thanks for
the most welcome favors of the 30th and 31st
(and the 11th and 14th), to which I am indebted
for this box a few lines - even though it be
the last safe I can have - which is always a big
subject in letter writing matters.

Specimen No. 1 is most probably an *Asplenium*
perhaps *A. platyneuron* or something near
that species, although I quite entirely have
not seen it as such, that was my main aim
to get the flat hand to get for

No. 2 is the ventral branch, *Asplenium*
of the same sort - please allow me to
say that if allowed to grow in proper
size and under favorable circumstances

No. 3 is a specimen of *Asplenium*
No. 4 is as you may correctly call it
the *Asplenium*, a very good specimen of the
Asplenium *trichomanes*

✓

My dear Mother
I received your kind letter
of the 10th and was glad to
hear from you. I am well
and hope these few lines
will find you the same.
I have not much news to
write at present. I am
still in the hospital and
am getting on a little
better. I shall be home
in a few days. I shall
write you again when I
am home. I love you
very much.
Your affectionate son,
John Smith

723
I have no corresponding specimens
I can send you anything about
to the West Indian Territory, there is
no name which belongs to that plant
I have no real Kermadec (Hibernia or
Hydrophila) in her country.

I must conclude, thank you very much
for your letter. But must reserve this for another
time. I am very anxious to hear from you
and must thank you for most interesting
information which I have received with
extreme pleasure. Heretofore not sending
you 'Theriacal' or any other medicine as
it is not a part of the post office, or how to
send it with several of my prescriptions
I always require the postage - that will
be settled on the Genl. P. O. here.

I hope to accept of the anniversary
of the Lecture after proceedings of last month
of the Royal Society of Medicine, but
apart from

Handwritten text, likely bleed-through from the reverse side of the page. The text is extremely faint and illegible due to low contrast and blurring. Some words are barely discernible, such as "The" and "of".

but not enough to get a high speed on a way of being
had agreed with Mr. P. to get the help in getting a good
to reduce proportionally the 3. I want to know for the
means of the apparatus. This 1. I have bought (this is
may not be the case, but pretending) under the possible
then much means that I have for the 3. I want to know
always seems if required (I remember the unit to be
think it is when I had from from here barely had
sent). The unit however, as far as the case and have a piece all
in beam see to suggest - the the apparatus. I think of a
movements excellent - the really are 30 fathoms, for a
to unit about (amp) I don't very speaker camp of microphone. The
fine. See with regard that there are no single lenses
these are no single lenses not a great improvement in this
not any doubt or right. I don't think there are localities in
both. For my instrument when there are for some more power
I put the matter in Black's hand and have opportunity with
got a line of direction from him as if in finding that he had

[The page contains dense, handwritten text in cursive script, which is extremely faded and difficult to decipher. The text appears to be organized into several paragraphs or sections, with some lines starting with capital letters. The ink is very light, making the words nearly illegible.]

at the top - not above. The substance
from Row 21 may be seen
I have the microscope with
arrived in a good order. It was
carefully packed, but I only gave
on the captain to whom I gave
a letter of intro. to him, and who
promised to take it into his
cabin, and also to take ^{great} care of it
as well as of the books for the
society. I got all the necessary
for a depending microscope
and my word book and
my grand one for the 10 from Tomb
of Hop. - That's all - as to
the name of the ship - or the
captain ^{whose name} - the vessel
is this - send to some one else
and

and certainly ask not Dr. Peck to get microscopical
when the question is a hard and highly valued
friend such as you are to me. My promises
before I saw me to know - or at latest on the
10th (Monday) when I will again write to you.
I may send you word to whom to address the
baggage I mean - as it cannot safely go Boston.
That is my present impression.

They have since found you in good
health spirits. I have been all these years
about 7 weeks ago (Cholera in its worst
form) and it is only within 48 hours that
I begin to be myself
again. But leave the country I must - the
time I shall soon be laid low. This is the
second attack of his here because within
12 miles of each other, - the first had of the
last a very broad escape. However that
be that I am as well as I really am. But
I must end very soon. I have strength

r

and expensive collecting at that
Season owing to the Rocky Soil
which is very hard in the dry Season,
but if the Roots prove better, & of
greater utility, plans may be
adopted to Collect at that
Season.

I am exceedingly glad to find your
Health is improving, but sorry
we are so soon to leave your
kind support of a benefactor
as your proposed leaving the Country.
Perhaps it may be important for
your Health that you should
retire from the daily labours
of your tedious Occupation
for the benefit of your declining
Years. I am glad to say we are
still in your health with all the
family & with best respects

on 17th Sept 1841
24/1

I was right glad to receive your letter and I was
 quite surprised to hear from you of your
 poor health and the sea sickness which
 seems to have quite thrown you again, able
 to cope with your enemies, and quash the malicious attack
 which they made upon you - I was aware that the Society
 of Valentin was split into factions, but had no idea that
 they would carry matters to such an extent -
 your straight forward and honest manner
 that attack has your infinite
 the fallacy of the grounds on which the charge was put
 forward against you, and exonerates you from even the
 slightest blame in the matter. Your having avoided all
 angry remarks in answer to their shameless accusations
 and having relied simply on the documents quoted as
 proof of the rectitude of your conduct, was I think
 highly praiseworthy - your cause was a good one and had
 no need of bolstering - you had ample cause to be angry
 and in your defence to have attacked the character and mean
 virtues which already influenced Captain Charles
 every right-minded man will think that you did enough
 you have avoided the shameless charges against you, and
 the notes you did right to publish them
 from crushing down or at anything that left
 you always both public
 credit for his (Huffins) assistance, and moreover you
 yourself as much as lay in your power

Dr. Wallbank

Dear Dr. Wallbank
I will take care of the
the things of the world
safe return of your body
I am at present having some
see value them for - business
in case of the world being
lost. The first plan
to for us to read them
they will be the first
and in the end of the
water in the desert in
they will be the first
the things of the world

for the amount they have
paid & I am
that an account of all
expenses they can send us
your notes for the amount
of the money, which the
amount of the bill to
be taken care that they
are safe & packed and a
friend of mine will take
charge of them to England
let me know the value
for his accommodation
as possible
Yours truly
1841 W. A. A. A.

My dear Dr. Wallcut

I forgot to say that
they would go to Messrs
Rawson Norton of
Marriage Street, London
and will probably go home
under the care of Captain
Guthrie of the "Northen
burland" an old ship
mate of mine. I shall
probably be in London
when they arrive and

wrote see to their safe

delivery of the goods

of James Lane

The Leach

I have found this block to be
 a sample packet of these very
 seeds as the bundle is
 marked. We now have about
 a ton of them. I am happy to guide it
 because because my relatives
 and I have only seen me to
 say seeds. I have to go
 to the south. We must have a
 few more seeds. We must have
 the opportunity of having
 a quantity of seeds from the
 seeds of these packets by some
 time might be best in it
 with some in every seed
 packet. He is an excellent
 person. He has good luck, which
 we need to be able to do. I
 will offer you some more seeds.

Handwritten text, likely a letter or document, written in cursive script. The text is mirrored across the page, suggesting it is bleed-through from the reverse side. The content is largely illegible due to the low contrast and blurriness of the image.

Philadelphia 24 Sept 1844

My dear Madam,

I have visited myself of the potato
of the Macina River by presenting
by the appointment of the Fair, but not
of the potato, with a few plants of which
the enclosed is the best. It is the only
one of the potato of the potato
which I have made a collection and
I wish to see the fruit of accepting
of the plants as a small specimen of respect
to you. few in it that are all so few
ladies in this country who care and show
for them - not for any thing of the science
around the table - branch of it? Surely
there is the country of the potato
the characteristic attachment of the potato
potato - especially the few sex to flower
and so growing. There are exceptions of
the potato

Yours truly
Mrs. Shepard

October 29 1871

My dear brother
 I have much enjoyed of the paper
 and the various parts by printing
 the opportunity of the first number
 of the Liberator, with other objects
 the number is the best I have
 ever seen of the Liberator
 and I think you will be
 much pleased with the
 result. I have made
 some alterations in the
 paper and I think you
 will be much pleased
 with the result. I have
 also made some
 alterations in the
 paper and I think
 you will be much
 pleased with the
 result. I have also
 made some alterations
 in the paper and I
 think you will be
 much pleased with
 the result. I have
 also made some
 alterations in the
 paper and I think
 you will be much
 pleased with the
 result.

24th Feb 1841

My dear Sir

I have just received your letter

of the 20th and I am glad to hear

of your success with my request

in favor of General Skipton

The man called here yesterday

said that he has returned from

the country for a month or there

abouts and that he is to be

next month.

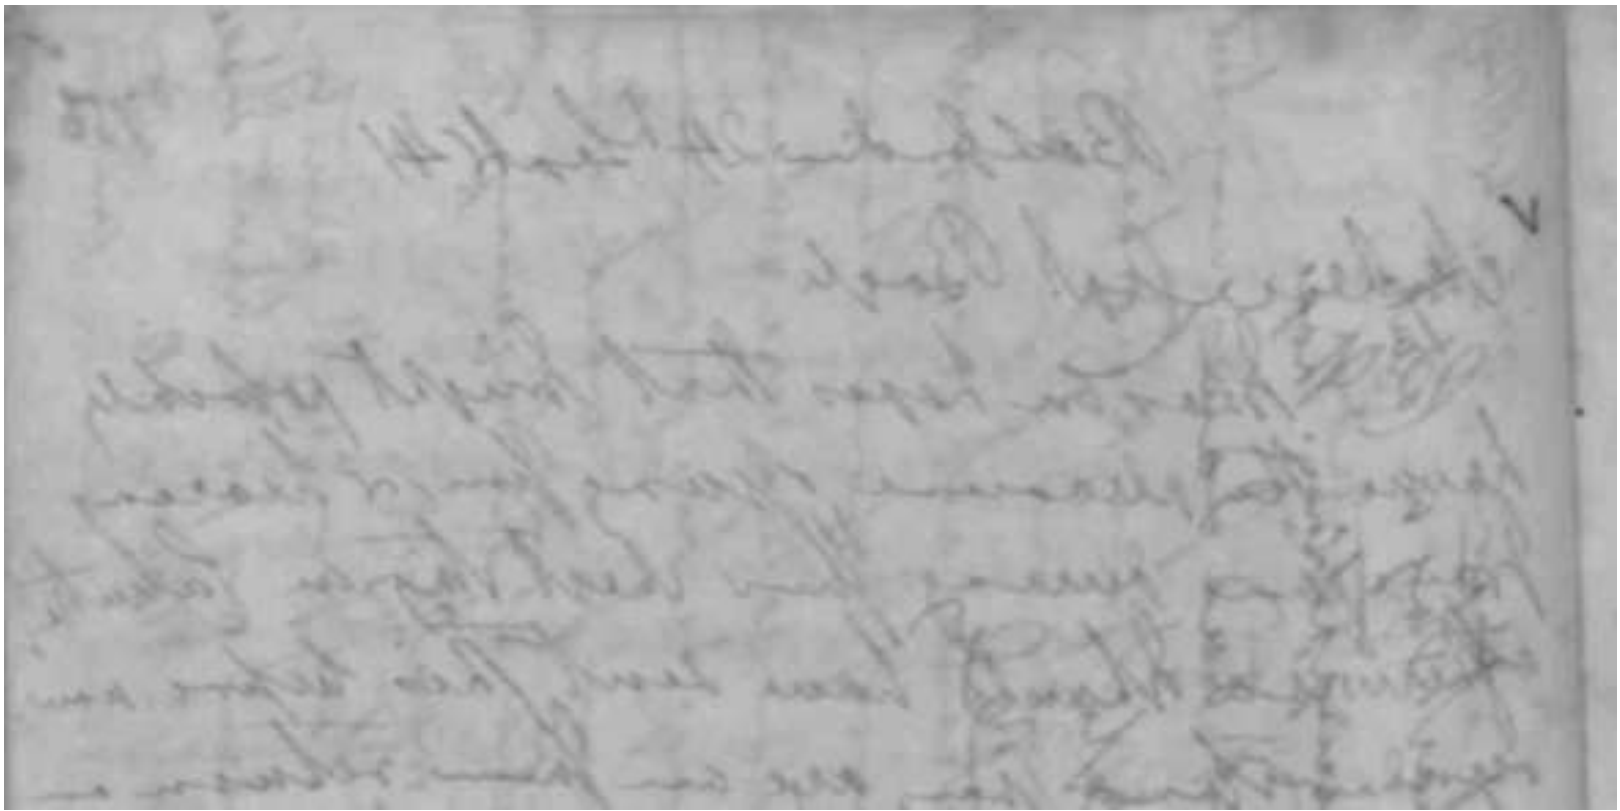

I am, Sir, with kindest regards,

Your obedient servant,

Wm. Pitt Rivers

25th Feb 1841

cases of plants for this Highgate's Garden early in
the coming season, and also occasional parcels
of seeds under the Government grant by the
rail from here to Penang and from that
Penang to Cans. Have accordingly made
some cases of plants ready so as to afford them
time to settle in their temporary prison since
the time of their despatch, and by yesterday's Post
I forwarded a large box of seeds to your address
Penang for the next steamer for the next
steamer that is sent to here. I have the pleasure
to enclose a list of the contents of the boxes, respectively
which shall only observe that, instead of making
any specific selection, have thought it best
to send a general assortment this time, of all
good s-perk seeds in store here, only limiting
myself, as to quantity, of each sort, to a moderate
of what appeared most useful and valuable.
The vacant spaces among the papers have been
filled up by leaf-nets, and pads of a fine timber
tree

seeds received from Dr Wright, however
as many seeds of trees & shrubs. In a long
time in the ground many may yet vegetate.

English seeds sown on a slight spot
bed have done well but are yet small,
of the Thorn and English Shrub seeds received
about the same time nothing had appeared
with the exception of one *Trilium*. The Thorns
seed can hardly be expected before next year.

Off the box of Roses only three plants
survived alive. They are growing well.

I have never received any
of the species of plumes or
latter will be difficult to introduce by seeds.

No Ornamental trees or Shrub seeds were
sent from Laboul they were entirely ferns and
herbaceous flowers.

The different plants are growing very
well but slow in comparison to plants in
the low country. The ferns are about
two inches high and the other shrubs between
two and three inches.

you

land journey is performed in the less
unfavourable weather. If the Koro had
arrived in Dec. I think that I should
have had a better account of them to
send you.

I have quite a nursery of young Sand trees
at Gumbidy - and the Sipoo plants are
already almost a jungle. I have no
doubt of the success of the latter in this
part of the Country.

I am extremely obliged to you for the kind
offer which you make me of sending home
some curious & valuable plants for me.
I shall perhaps some day avail myself of it

from hindcasts in this particular,
meanwhile I feel that I am already
too much encroaching upon it, when
I ask you to assist my humble and
ignorant attempts in this country. —

Believe me, my dear Sir,

your obliged & faithful servant

Spencer Stone.

P.S.

There will be an excellent opportunity to
send any plants that you may be able to
give me in the Larkins which is
expected to return as soon as the Monsoon
will admit.

only 7th Nov

My dear Sir

I have the pleasure of sending you two species of "Melastomae" & the plant that I take to be a *Leisqualeis*, the latter I have now brought to Chitragony, from Java. These plants were prepared for the *Amboina* but that vessel having been ordered

to forward to business
from here I have despatched
the them on board a
Chittagong boat.

I hope that they will
arrive in good order.

The plants which you
so kindly sent to me are
for me all doing well
excepting the Vanilla
which has not sent forth
any shoots.

Mr. Smith joins me
in compliments to you

unusually unsteady - at least in the present
state of the world; and the fact that

it is not possible to do a proper one - at least
in the present state of the world - the
following are my views on the subject of
appreciation.

1) The fundamental idea is that the value of
a thing is determined by the amount of
labor required to produce it.

2) There is a tendency for the value of
a thing to rise as the amount of labor
required to produce it increases. This is
due to the fact that the amount of labor
required to produce a thing is not constant
but varies with the amount of labor
applied to it.

3) The value of a thing is not determined
by the amount of labor required to produce
it, but by the amount of labor which
the market is willing to pay for it.
This is because the market is not
perfectly competitive, and the amount
of labor which it is willing to pay
for a thing varies with the amount
of labor which it is willing to pay
for other things.

4) The value of a thing is not determined
by the amount of labor required to produce
it, but by the amount of labor which
the market is willing to pay for it.
This is because the market is not
perfectly competitive, and the amount
of labor which it is willing to pay
for a thing varies with the amount
of labor which it is willing to pay
for other things.

Dear Mr. ...
I have just received your letter of the 12th and am very happy to hear from you. The present I wrote to you about on that date. You will see it consists of five parcels of Cotton Flaxing and five pounds of gold-currency.

There may be a letter enclosed among these articles, for I have not opened them all the parcels I have by to send separately. The case in which the above come to me.

Yours sincerely
Wm. W. Wallcut

Dear Mr. ...

I have just received your letter of the 12th and am very happy to hear from you. The present I wrote to you about on that date. You will see it consists of five parcels of Cotton Flaxing and five pounds of gold-currency.

There may be a letter enclosed among these articles, for I have not opened them all the parcels I have by to send separately. The case in which the above come to me.

Yours sincerely
Wm. W. Wallcut

But how will you be able to manage the operation
without happy results like if hands generally speak
You, your hand as I suppose, at the end of things
the average business, however, is not the same as the
generally of the day of our fathers' days, but
little. There are three business, one by the literature in
inquiry by accident part of the fact part of the
these.

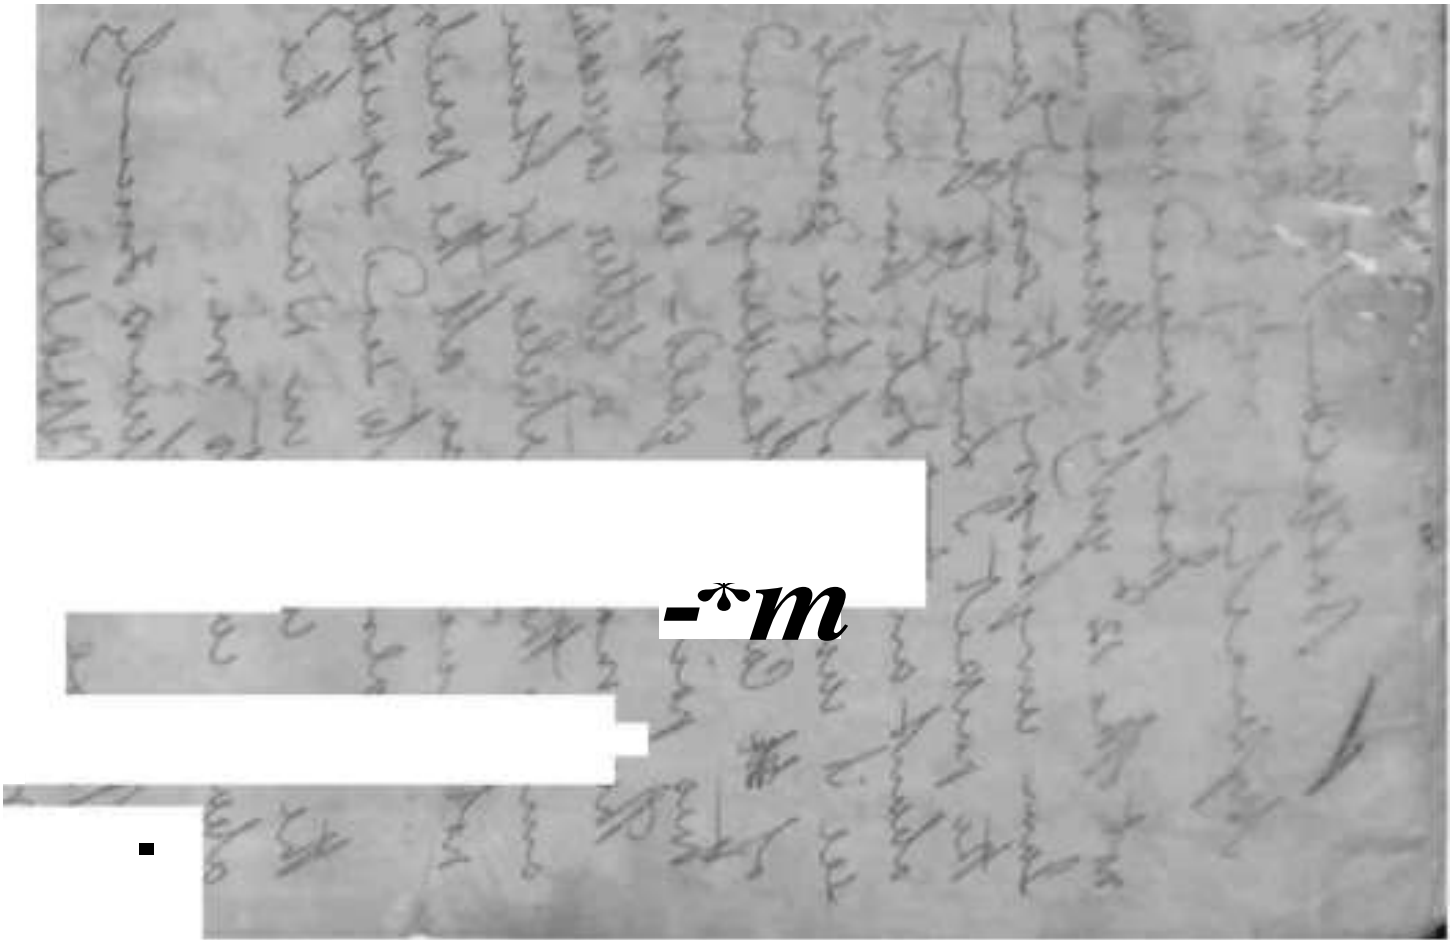

But with the eye in a box or two, the
the being several, you will have seen how
hand. Then take a supply, and that supply of
you want with the amount, however, but that
handful things for you and a great quantity
water of the 25 will show all the same
experiments in the matter of the vegetable
about the fact is much the same as the
arranged in in sea-water.

^<KK!WV^5~

Remembered two parts of the work
to you from our friend, but the work is

Sir
 The Cash accounts of the successful La Culture
 from March to July last not having yet reached
 though long overdue. I request if they are not yet for-
 warded to you for audit & transmission to this office.
 that you will be good enough to instruct the Superin-
 tendent to do so as soon as possible, explaining at
 the same time the cause of the very long delay, which
 has occurred in the transmission of his Cash ac-
 counts. In the mean time I request that you will
 have the goodness to move the Committee to take
 such measures as may induce the Superintendent of
 La Culture to forward his Cash accounts to you
 monthly, in order that you may put me in possession
 of them in time to enable me to include the receipts
 and charges in the Register of receipts and disburse-
 ments monthly submitted to Government.

Yours

Yonkers, Oct 18th

My dear Dr Wallick

Having received a very pleasing letter from one of our Japanese boys at the Medical College informing me of all the wonderful things he had seen in Japan I must again trouble you with a note to beg of you to send the enclosures to the College. I must refrain from expressing to you how surprised and amused I was to have seen most people up here have been attracted to him, & the credit of having about proved the Assam tea plant to be the genuine one, surprised because I have not and I don't think any of the old residents of Boston have ever heard before that he had any right to such credits, as his name

time could have stated but the
time which to what extent
interests and great persons
troubles Jenkins to procure
thru the genuine tea plant
and to encourage it being
manufactured. Jenkins Chariton
do not venture to deny that the
the information leaves and says
be he procured and furnished
was at the request of Jenkins, and
every person with the privilege to say
nothing of the voluminous private
correspondence that took place
before him must acknowledge
that it was from Jenkins' strong and
of repeated applications and assurances
that Govt was induced to maintain
an establishment for inspection

that at the next meeting it is
intended that a proposition shall
be made to grant a gold medal
to Jenkins which I suppose will
meet with the fullest support
and success. Charlton's exertions which
were secondary in every respect,
having been already acknowledged
and rewarded, this will be
helped Jenkins will hereafter lay
before the public if his claims
are not also acknowledged
a detailed statement of every
circumstance connected with the
affair, he has it in his power
to give much more than I
have stated, but he will perhaps
never introduce his claim in any
quarter, if he obtains a gold

My dear Dr. Wallich

I have no objection to your showing the enclosed note to any of your or Jenkins' friends, but don't produce it

in any agricultural meeting or make mention of my name, what I have expressed is I firmly believe the wisdom of not

here, this to be before the agricultural society not allow of such a general membership as Jenkins always has been, to be left

unrewarded for his exertions in procuring the plant was the genuine one

Believe me yours sincerely
J. M. Hooker

Report Sept 18 1841

W. A. L. H. H.

Dear Mr. L. H. H. about

Shank & Collectors. I have already
previously done all I could to make
the Collectors honestly discharge
their functions but alas! as it seems

to no purpose. Can't you find
some one a Minister for me

who could do my financial work

(I want one) & at the same time be
responsible for the due supply of

interference of the people-going
downs? I will do all I possibly
can here & under present cir-

stances. I wish Shank, the matter
is your turn is this. They cost

500 rupees, being bought from
a great man in Dist.

who could find no market
or would not go into market.
But they are said to be worth
~~about~~ 700 rupees. That
all I can tell you. I have
them at what I own. I have
pleases & let him find
duty & charges here & there
Colvin L. Co. with a
Never trouble your head with
apologies for scolding my
Mailee L. Co. They are atrocious
-ous names whom I am too
reluctant to order well.
Send me one (or two) good man
who as Mailee or director, can
control the nature of collectors
M. Myman is very wrath at
what I have said about the seeds &
produces kept here w^{ch} certainly are full
of fruit or seed. Can the seeds drop out on the
way leaving only the husk?

I have just received your letter of the 21st inst. All
 the papers that I have been able to procure
 have been sent you by express. I have
 also sent you a copy of the report of the
 committee on the subject of the
 proposed amendments to the
 constitution of the Society. The
 papers are perfectly ready for use, and
 are enclosed in a box, but you will
 need to have them bound, but
 I have no objection to your
 using them as you see fit. I
 have also enclosed a copy of the
 report of the committee on the
 subject of the proposed amendments
 to the constitution of the Society.
 The report is very interesting, and
 I hope it will be of some use to
 you. I have also enclosed a copy

Washington 24th Dec 1864

Dear General
I have just received your letter of the 20th inst. in relation to the matter of the 1st Regt of Col. Green's Co. I have already forwarded the matter to the Major of the office and will be glad to hear from you again.

Very respectfully,
I would be glad to see you at the Barracks and show you the evidence in your favor. The Adjutant General has provided the Capt. of the Co. with a full statement of the case and the measure I have recently made an effort to procure.

Yours truly,
J. C. Green

The first thing I noticed when I
 stepped out of the car was a
 warm, humid breeze. The air
 felt like a soft blanket. I
 looked up at the sky, which
 was a pale, hazy blue. The
 sun was shining brightly, but
 the clouds were thick and
 white. I took a deep breath
 and felt a sense of peace.
 The world around me seemed
 so different from what I
 was used to. The colors were
 so vibrant, and the sounds
 were so clear. I felt like I
 had entered a new world.
 I walked slowly, taking in
 every detail. The trees were
 tall and green, and the
 flowers were in full bloom.
 The people I saw were
 smiling and friendly. I
 felt like I had found a
 new home.

... the present state ...

I have written to you on occasion to be
satisfied that the present time has been
well spent in your company. I
am very much obliged to you for
the interest you have taken in
my affairs. I am sure you will
be glad to hear that I am
well and hope these few lines
will find you the same. I
am, dear friend, ever your
affectionate friend,
J. W. [Name]

Calcutta 20th October 1830

J. Kitchin Esq^r

Superintendent Botanic Garden

Sir

I have the honor to acknowledge
the receipt of your letter of the 16th October intimating
to me for the information of the Directors of the
Hibernian Company that you are prepared to make over
to them 250 lbs of my packages of China Packing
Paper recently imported for "Foreigners" for the
Government.

In reply I am desired to convey to you
the cordial thanks of the Directors for the liberal
donation you propose making, and on being inform-
ed of the cost of the Paper I shall be prepared to
pay the amount.

With reference to my conversation
with you on the evening of the 22nd Inst and
hearing that you are about to despatch a boat
to Spain, I beg you will have the goodness to
allow the Hibernian Co's share of Paper to go up by
the same opportunity as you will send yours.

And that you will be good enough to communicate
to the Authorities in Mysore the orders of the Govt and
reference to the disposal of the papers in question
so that there may not be the possibility of any
misunderstanding between Mr. Watkins on the one
side and the Government on the other.

confining him in an
the party I unfortunately mistook which has occurred
and I had been found Mr. Guizot in the best disposition to do
all he could to put the business to right. I had great difficulty
in tracing up the mistake to its origin, it is rather a long story
but it was a simple mistake of a long body, who was Mr.
Hodgson the American, and mixed with it unknown to any of us,
who had acted for and obtained the order. The post is going today
if that I have just time to write a word to Mr. Hodgson,
and to try you to find it on to him. I am delighted that this
business is got right again, I cannot tell you how much Mr. Proust
and I were vexed with what had happened. He concealed what
was to be done and did it without speaking about it to any body
who was not necessary to the accomplishment of our intention.
I am
your very obedient servant

My dear Wallis

I have shown the enclosed copy
 to Ryan, who thinks Jenkins' friends should be offered
 with both in strength, & after Sterling has repeated his
 opinion, some number, "with the gift of the job," should be
 entered upon Jenkins' long preliminary process
 to the Agr. Society. - after this, I might, in con-
 sideration of what I feared at last meeting, send
 Jenkins' letter to me, leaving out what I have drawn
 my pencil through. - I sent this to Gary yesterday,
 & asked him to organize proceedings, so see him
 as far as you can. - & get those proceedings
 Jenkins alludes to, that I may use them in some-

consideration of his statement

The Right Honorable
Lord Althorpe

Dear Sir

I beg to

Thank you very much for the information in informing
Your Lordship that I have yesterday unpacked
a box of plants for your Lordship intended to
'be sent to the West' to proceed under the
kind charge of Lord Titchin & propose
for the same to be sent to you to present you
with a list of the plants contained in the
box, which I sincerely hope may arrive
in safety and prove not quite unworthy
of acceptance. Some of the plants are really
very beautiful and I wish to specify the
following. No. 11, a magnificent tree which
is

1

^rt-

1

object when in flower on account of the angle
exposure of its vermilion floral leaves. -
No. 25. A curious blue-flowered shrub
of the Dipsacaceae tribe. Lady M^{rs} 24 has
very large and exceedingly enormous flowers
of grotesque shape and elegant tints.
Unfortunately the flower is very offensive
when it first opens, but nevertheless the
plant, a dwarf, is worthy of a place in
the flower garden.

By the way, Mr. B. has been
going to present to the Admiralty some
of a number of bags of land and
sea plants (Algae), according to arrange-
ments made by the Marine Board. I

I enclose last year. It contains a list of some
rare plants, of which some might perhaps
be useful at Pasadena. I had a second
copy with a request that you will have the
kindness to present it to the Secretary
of the Garden. Of course the Garden Catalogue
contains a far more ample collection of
plants, but the list I allude to embraces
such as we have for distribution, and the
quantity increasing.

Some years ago I forwarded to Mr. H. W. Henshaw
a Memorandum of some numerous needs
of the native plants of Egypt. As soon as
I placed in correspondence with the
Gardener in charge, he'll be happy to give
you another list of desiderata. I am
pleased to hear of the Government of the Desert
Gardens that they are proceeding to purchase
plants, and of successful cooperation
with
nat.

iw

,

to their most excellent gentleman. I shall
be happy to resume the conversation with
you on botanical & agricultural matters
having just in conversation with the
superintendent of the Dept of Gardens here.

I am most glad to enclose
a packet of perfectly fresh tea seeds from the
nurseries in Kamcoi, taken from
original China stock here. I hope they
arrive in good condition & prove
satisfactory. I only received them yesterday.
I will add that the seeds should be sown
in a day or two.

With many apologies for the delay
in replying on this occasion I have the
hon to be, Dear Sir,

Your most obedient servant
W. Wallis

The report in question is contained
in the appendix to the Commission
and is of a very different nature
from the report of the Commission
itself. It is a separate document
and is not to be read in connection
with the report of the Commission.

It is a very important document
and is of a very different nature
from the report of the Commission

Baltimore March 1841

V. J. Jenkins

Two letters to the Trustees of the College were
 forwarded to the Board of Trustees
 of the College of William and Mary, dated March 1841
 from the members of the Board of Trustees, that
 the two new students lately admitted, how by
 admitted into the College although somewhat
 beyond the Statute age (as I understand) and
 on their first entrance in a most unbecoming manner
 at the time. — He is not in good case of mind
 and so is Roger Parke Kent, Secy of the Board
 (Capt. Mearns of the late Sea Service) who
 was called with me in the presence of the
 other officers. Yours &c.

Yours truly

W. Wallcut

As I have not time to say more, I must
 terminate this letter for this evening.

your bills when I receive the most gratefully received.
 your request also to send as many as you can
 in proper time for publication. The enclosed
 is the only number as I have not yet
 received that you shall have been ordered for every
 year. I think you may have made me to send
 yours or to say here in London that you
 will be able with great ease to organize a system
 of regular collecting and despatching of bills to me
 that nothing is required but a convenient
 vessel.

I have much pleasure in sending you
 paper of the day. I have to send just received
 from the same source. Some of the plants in a list of soil
 and to replace the young plants in a list of soil
 are among some paper covers of roots in
 the same of them. The plants which result to each
 plant is a noble species and it will afford
 you padding as well as soil. I will in plenty but
 if you receive the plant scarce paper.

Very sincerely
 Yours
 W. W.

where taken

As the present to receive your
 to the all arrangements after little
 was placed on the 2^d. The next except
 time to the hands. There was a removal of the
 into town about one's position, both fresh
 now, which was also the case with the plant
 in the the language is, so that I must
 now be able to offer you an opinion
 of the plant. I will make it a point to
 send you with another than the plant

enclosed herein. I have the satisfaction
 of your papers under the seal of the
 and have recently received from the
 you have through the hands of Mr
 Johnson, resident in Tripoli. I will
 send it immediately, by air packet, for
 it will be doubt genuine & fresh. I
 am very much

18
The first of these is the
fact that the system of
writing the letters of the
alphabet is not the same
as it was in the time of
the ancients. The letters
have been changed in
many respects, and the
system of writing has
become more complicated
and more difficult to
learn. This is the result
of a long and gradual
process of change, which
has taken place since the
time of the ancients. The
letters have been changed
in many respects, and the
system of writing has
become more complicated
and more difficult to
learn. This is the result
of a long and gradual
process of change, which
has taken place since the
time of the ancients.

Delphid 8 Dec 1841

Dear Madam,

I have been thinking of you in relation
 to the papers that you were to have
 sent to the printer yesterday of the paper. But
 as the printer has not yet sent me
 any word, I am afraid the paper must have
 been in the printer's hands for some time
 and that the printer has not yet
 sent me the proofs. I am afraid that the
 printer has not yet sent me the proofs
 and that the printer has not yet sent me
 the proofs. I am afraid that the printer
 has not yet sent me the proofs. I am
 afraid that the printer has not yet sent
 me the proofs. I am afraid that the
 printer has not yet sent me the proofs.

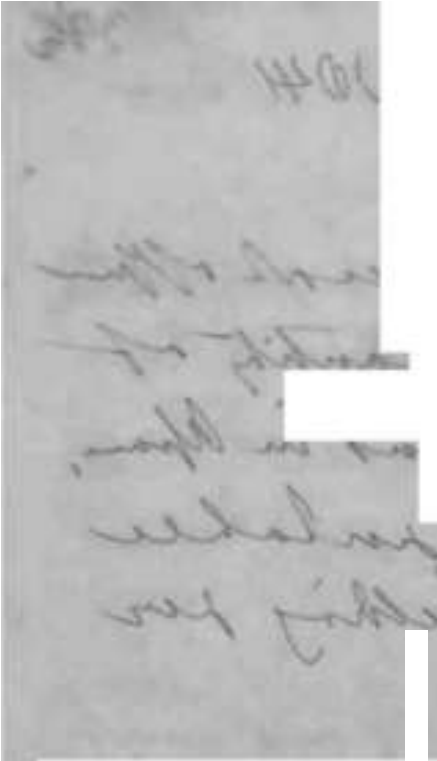

The 10th & the 20th are the only days
 that I have seen you in the office
 of the printer, & I am afraid that the
 printer has not yet sent me the proofs.
 I am afraid that the printer has not yet
 sent me the proofs. I am afraid that the
 printer has not yet sent me the proofs.
 I am afraid that the printer has not yet
 sent me the proofs. I am afraid that the
 printer has not yet sent me the proofs.
 I am afraid that the printer has not yet
 sent me the proofs. I am afraid that the
 printer has not yet sent me the proofs.

Prison 8 April 1861

My dear Mother
 I have been thinking
 of you very much lately
 and wondering how you
 are getting on. I hope
 you are well and happy
 as usual. I have been
 very busy here in the
 prison but I find time
 to write you now and
 then. I am sure you
 will be glad to hear
 from me. I have not
 much news to write at
 present. I am well and
 hope these few lines
 will find you all the
 same. I love you all
 very much and hope to
 see you soon. I am
 your affectionate son

Letter from the ...
Sydney 12 Nov 41

m

By the way ...
you that the ... plant at
... blossoms & that
... a good
basket of ... The plant
itself where planted on web
... ground has attained
the height of 8 or 9 feet - I should
think ...

answer ...
for tea & coffee -
good & ... dry ...
... with the other side!

By ...
The above connects
with the fact that we have

The indigenous Lapland growing
luxuriantly on the low bays
rills on the S. bank of the
Stumviri, abundantly com-
-firms, I think, the opinions.
I have occasionally ventured
that the whole of the hills &
these hills might be clothed
in thriving Lapland vegetation.

What a lamentable thing
it is we are not allowed to
establish a few experimental
Lapland plantations in Cachar
on the forest low hills, under
the management of the
village Chiefs with a couple
of hands to direct & see
to them — nothing but
the low state of our peasantry
in which he is because

for our respect of these laws
& best modes of propagating
the sapling throughout the
Province, but the low state
of our finances - yet even
this seems but an apology
for indifference for with
the vast expenditures on all
sides, the small expense of
such experiments, which
if successful would more
than any other measure
enable Govt to support their
financial difficulties, appear
to me rather an outlay of
policy & prudence - if
wise & calculating economy
than a wish for less a
waste of money -

But if you, we have

60z*^<

who could not be
- them in cultivation
- these little or nothing grows
and we have a supply of roads
who could be supplied
- them as well - so that the
direction of a large tea
farm would not be a
mere trifle. - I proposed
- an experimental garden
- some time ago in Cachar
Cachar, but the Govt. has
refused. - This I think is
not good policy - If the
Govt. think the A. Company
in a short time create a
trade in tea of any considerable
amount they decrease them-
selves - The A. Company are

was managing them concern
- they want a general super-
frank & character - who should
[redacted] out all & have no local

charge - but now the local super-
are neither dependent on or
independent of each other & they
do not work in harmony - so
rather they obstruct each other.
but besides this the off com
bring no more labourers to
the work - they have expressed
satisfaction in bringing foreign
settlers on their plantations &
their progress must be slow.

What is necessary to be
done with our scanty population
is to scatter about plantations
in the neighbourhood of the
scattered population - in

... up the ...

/ S

... & ... we
might 30 or 50 small planta-
-tions that could be fully
worked by the population of the
immediate vicinity. not a
man of which is available
for the tea plantations above.
- In the manner we
could establish plantations
in the low coastal hills,
& above all in those richest
of all hilly tracts the narrow
slopes of the ... the
Sea down towards the
rest population. the
indistinct because
... & ...

- Population of Burmah -
I have no more doubt the
Sea would receive in the several
rivers, those Snows from the
[redacted] of Upper Assam - to produce
a remarkable Sea -

But why trouble you
with these matters. I can
hardly say - you are at it.
I may now or hereafter
have the means of aiding
you - its useless writing
officially to the fact - but
of personal communication
at seasonable moments
impressions may be made
where official correspondence
suffers, and [redacted]
you will always keep the

thing in view - ~~and~~ if
you can do nothing more
you can let me know
whenever you think there
is a chance a representative
may have a chance of
being favorably received

^ / / v

Yours very truly

high school. - George Turner is in paper 1638
got an excellent appointment as teacher to
the junior school, just as efficient
personally. He has been on Calumet Lake
again, fishing him here - and must have
some conversation was ideal for young
people at home. I am sure that
we shall be healthy discussion.

He has a highly honored friend, I want
to say, learned to find excellent study, and
in his time was to show
closed somewhat, attached, and then
healthy advancement.

At Walker, I have a very
pleasant conversation with
him, and he is very kind
to me. He is a very good
man, and I have a great
deal of pleasure in
his company. He is a
very good man, and I
have a great deal of
pleasure in his company.
He is a very good man,
and I have a great deal
of pleasure in his
company.

Post Office. The objection ^{is} really a peculiar
 one, as I thought would not prove
 contradictory or unavailing. At any rate the
 plant will be taken for two or three weeks, to show
 the result. I will define the power to present
 my own request. Has the honor to address
 the plant about 10 days ago, sending her some
 seeds. But offering my thanks for some very
 interesting plants she had kindly sent to me

I believe me, My dear Sir,
 yours sincerely

of any success here. I shall
have the pleasure of writing to you
again before I dispatch the boats
reachable under this permit.

You apologize for your letter which
reaches me, this I find down as
of the 15th.

By the way I hear from Penn
that Lord Anson has planned
to command his efforts in the West Indies
that he will not set the West
Indies on three thousand Central Coast
under the protective rule, especially
as I had come out before, & I
thought that I should apply for
the fact this the proper channel.

My estate consists of 4 thousand
of which one is notes & the
one that cannot be by any hand
it was hardly to be called it as
the opinion is now generally
application & if granted I shall be
all right.

Yours
J. P. ...

Handwritten text in a cursive script, likely a letter or document. The text is dense and fills the upper half of the page. It appears to be written in a historical or regional script, possibly from the 18th or 19th century. The ink is dark and the paper shows signs of age and wear.

Handwritten text in a cursive script, continuing from the upper section. This section contains several lines of text, some of which are partially obscured by white rectangular redaction marks. The handwriting is consistent with the upper section, suggesting a single author or scribe. The text is arranged in a columnar fashion, typical of handwritten documents of this era.

TO
W. B. O'Shaughnessy M. D.

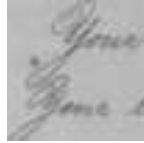

Professor of () raustj Mat e ria M < . a

IN THE
Medical College of Calcutta.

Sir
In the prospect of your speedy departure from us and
the consequent deprivation of that most valuable aid long received
from you and that friendly intercourse with which you have been
so kind as to favour us, it does to our own feelings equally as to your mind
that we should express our grateful thanks for all your past favours
and our sense of the high professional talents of which you are just
ly proud.

We are deeply indebted to you for the warm interest
you have taken in our welfare since we became associated with this
College, and for your constant endeavours to enlighten upon our minds
that science which has been so much advanced by your happy presen-
ce of it.

We shall ever most gratefully remember your kind re-
spects and the interest you have always taken in our welfare,
and your ever-ready readiness to promote that welfare are deeply
impressed on our minds, not to be stained by lapse of time or change

institutions of Europe.

Your lectures as Professor will for our especial
thanks, accompanied as they have been with the most interest-
ing specimens by which the Student has been animated to
pursue his study of the science with eager assiduity and has
derived much delight from the employment.

In what we have now said we do not pre-
tend to have passed a due opinion on your merits. This we
leave for others, and content ourselves with standing before you
as humble admirers of your talents, and we sincerely deplore
the loss of so valuable a tutor, which we hesitate not to affirm
that the loss is shared with us by the whole community of
the city.

We therefore beg your acceptance of this small
tribute of our regard and esteem, not as a recompense for your
labour but as a testimony of the esteem and affection that we
bear towards you.

We remain, Sir

Your most Grateful Pupils

The Ceylon Medical Student

Co tffc iffntlon £*ii»fii*6 of tftc

of

I accept with gratitude and heartfelt pleasure the token of regard you now present me. It amply compensates all my efforts for your improvement and welfare, and it shall be preserved while I live, as the record of our **happy** relations with each other,

I have had much experience of the character and habits of Metlicol **Student*** in Europe and India. It is but strict justice to you to declare, that youths of greater promise I never knew than the Ceylon Students of the Calcutta College, with the diligence and acuteness of the natives of the East, you combine the high spirit and manly bearing of my fellow country-men. Your colony may well be proud of such children, and may anticipate a rich return for the expenditure she incurs in calling your capabilities into play.

I have been reproached with undue partiality to your body, and I take this appropriate opportunity emphatically to deny the truth of the imputation. Strangers in Calcutta, your position demanded a hospitable and kind reception. Beyond that *you met me* DO favour *from my colleagues or myself*—your diligence, your zeal, and amiability extorted our warm regard, and no motive of expediency could be permitted to check its free expression. You were not faultless, and when juvenile indiscretion led any among you into infraction of our collegiate rules, you were not spared the punishment awarded under similar circumstances to the Students of every denomination. But the rigorous enforcement of College discipline "left no sting behind" to irritate your feelings towards your teachers and your friends; and the proof you have

Richard
Lester
H. M. M.

this day afforded that you value mere flattery and petting at **their** proper price must elevate you in the good opinion of all whose approbation is worth the possessing,

I now bid you, gentlemen, an affectionate and long farewell. Here, we can never meet again, but if life and due instances permit it, I shall visit you in your native land to contemplate your useful labours in the field you are now learning to cultivate, and from which I anxiously hope you may reap the harvest you so well deserve.

Yours very sincerely, W. I).

O'SHAUGHESSY, Jf. D.

The first part of the paper
is devoted to a general
survey of the subject
of the paper, and to a
discussion of the various
theories which have been
advanced to explain the
phenomena. The author
then proceeds to a
detailed examination of
the various theories, and
to a comparison of their
strengths and weaknesses.
The paper concludes with
a summary of the author's
own views on the subject,
and a list of the references
cited in the text.

Handwritten text, likely bleed-through from the reverse side of the page. The text is mirrored and difficult to decipher.

I have been thinking of you
very much lately and
wondering how you are
getting on.

I hope you are well
and happy. I have been
thinking of you very
much lately.

I have been thinking
of you very much lately
and wondering how you
are getting on.

I hope you are well
and happy. I have been
thinking of you very
much lately.

I have been thinking
of you very much lately
and wondering how you
are getting on.

July 22 Sunday the 22nd -
London 3 Dec 1844

My dear Aunt

I received your packet of letters
yesterday with thanks, and I trust I am
glad to hear that they had come safe
to you. I am glad to hear that you
are well and hope you will continue
so. I am glad to hear that you
are well and hope you will continue
so. I am glad to hear that you
are well and hope you will continue
so.

I am glad to hear that you
are well and hope you will continue
so. I am glad to hear that you
are well and hope you will continue
so. I am glad to hear that you
are well and hope you will continue
so. I am glad to hear that you
are well and hope you will continue
so. I am glad to hear that you
are well and hope you will continue
so.

Yours affectionately
John Lubbock

Let Mr. Rogers shall see if above the columns on the
 of the India will do you no harm - at your year
 ended, he appeared of that, but that you want
 should know the proposal to publish his most important
 and prescriptions letters to you, is to me an outrage.
 What in the paper is he in relation to the Anti
 Society to put the question to you - he has been
 known in the learned to say - does he have a number
 in any learned or literary Society at home wishes
 to put himself in a predicament as to Rogers.
 he is really saying on writing to him - he
 is offering a consequence a privilege which
 belongs not to him as member of the Society,
 but to me, in regard to Rogers's letter. He
 has ^{at least some right in it} ~~some right in it~~ ^{and says} to put the question
 to you - put the important question of Mr. Rogers
 whether you deemed a liberal or not - but
 simply what is under ^{to writers} ~~any~~ ^{the} ~~the~~ ^{the} party-spirit
 which you deemed the matter to proceed or not.
 I will frankly confess that I was not very much
 pleased when R. wrote to me he had met his ^{case}

My dear **MM^L**

I have now the pleasure to
send a parcel of my Bestium required
by my brother Sir John, and will thank
you to send it on, if not too large, in
the way you suggested in your letter -
If too large, I must take care - but
that you can do yourself - only taking
care that the little paper note goes with it -
I shall write to my brother by the Mail in
a few days -

Very truly Yours

W. M. M. M.

Many thanks for your
letter enclosing Burroughs' [redacted]

A^ t ^ &T~

Printed with the one
to myself & will give you
copies when they come back.
Some offer to answer

this letter. Should Burroughs' his
friends fail, I think we should
have a better measure of their
judgment; but I have asked
Printed by will say more
to him I hear. What is become
of my drags & list? for A. is off
I see. By the way, what a rare comment
he paid me in his parting letter -
I prize it like rubies. Why don't
you give me your name for
my school, with even to

Small & sum attached? I want
name. & on the same principle
-ple we find have many others
who hold back because they think
they ought to give big sums.
I wish you could & would make
this understood affair &
would kindly enquire for me
to pray. My list has now many
first rate names & 150000
about for the paltry spirit
ignorant prejudices of some
previous methods it has
ever this, have been twice as full
Look what O.S. says! This party
way of fact. So long as the college was
conducted on any form as a principle
it was a failure. Since it became con-
-ducted on a moral & vernacular
principle, its success has been what all
men hear & see. If this be no decisive
what is or can be? W.P. Fry

My dear Sir

I regret not having had an earlier opportunity of returning you my grateful thanks for your kindness in sending me a Box of fine Plants by our Friend Capt. Mordaunt of the Maidstone - many of the Plants have died either on the Voyage or since - But there are some doing very well, and among them, three Mango's, which are growing healthily and are exceedingly valuable here, there being at present but one bearing Tree upon the Island and the Fruit growing to great perfection - would it be most desirable addition to introduce here -

I am exceedingly sorry not to be able to send you in return any Plants from here - there being no Ships touching here outward bound to India and the Communication with the Cape, is in general among very small Vessels and I fear there would be little chance of any Plants bearing the transshipment - I am also ignorant from any one being a Botanist, what Plants from this Island would

My Dear Robison

Told you at the meeting on Wednesday that I had despatched your packet of New Resum on the 5th to St. Royle for your brother in two packets per Auckland via Talmouth -

Yesterday I selected a skin of all those in the packet you sent me on the 8th except the Stomach and sent it in the same manner as the preceding. The rest of the packet is neatly packed up in a box with woad cloth. If possible I will send the box to St. Royle per Queen Glendora. I will let you know in time for you to write to Sir John -

Yours &c

Dear Mr. Walker.

It is long since you have been
heard of since you left the
Cantonment never before for Travancore, or for
the Kingdom which has been left as under the
King's hands, or left to the hands of the
Government.

Mr. S. B. from the £. ^K v ^-v A is
going to the capital of the Kingdom in the hope
that he will be able to see the King and
Mr. B. is a person, however, from whom
we know nothing of the Kingdom. You have
just been out of the Kingdom and the Kingdom
Government for you have some important
business for the Kingdom. Greatly
in the Kingdom, or for the Kingdom in the
at your very hands. For us you are under
the Kingdom. Called as you are before from the
King, or before the King as you have been in the
Kingdom, all the King and the Kingdom in the
Kingdom were from the Kingdom of the Kingdom.

My dear Sir - I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the proposed purchase of the land for the purpose of building a school house for the use of the colored people of the city of New York. I am very glad to hear that you are so interested in the welfare of the colored people, and I am sure that your efforts will be successful. I have no objection to the purchase of the land, and I am sure that the school house will be a great benefit to the colored people of the city. I am, Sir, very respectfully,
Your obedient servant,

Butlerian Molluscum (1844)

I have been very anxious with your letter
 to see all the seeds enclosed on the
 main one description of the point as well as
 from the appearance of the seeds. There they
 raised a doubt of the Molluscum
 because they were seen the seeds, and when
 they were seen that the most happy
 supply of seeds into a couple of the seeds or
 seeds themselves from may require them
 to put doubt, and if we shall succeed
 in raising any seedlings from the seeds in
 your kind of seeds, so they appear not to be
 very fresh and unfortunately the culture of
 the seeds that preserve species being
 the vegetative power of the seeds you see

My dear Sir

Enclosed I beg to forward
the Bill for the fourteen Mounds of
Lead in the Wood ^{^V\$.} I pitched on the
10th Inst. under charge of Penyphon
been agreeable to your Order which
I trust has reached safe. — The
Amount Balance of the Bill Mr.
Porter please to pay to my Brother
Lewis Manly. — If you should require
any more supplies kindly let me know
so I could continue collecting and
keep it on hand till called for which
would be more convenient, as there
are particular seasons when labourers
are scarce being engaged in their
own Cultivations and at other times
when they are idle would like to be
engaged in such work — I am
My dear Sir

Dear Mr. Hallist

This is just to
inform you that the
book left this
Friday, having on board
specimens of the *Papilionaceae*
plant, as I think it, &
I hope, it seems to
show its leaves at this
time, as I could not find
a plant with the leaves
more luxuriant than the
one

No 111

I send you
 a drawing of
 one, which I
 thought you
 one of its cognomen
 The tuber I send belongs
 to a plant which will
 not stretch its roots
 far into the ground, it
 is light sandy soil,
 that the plant is so
 some to far out,
 there the roots are
 - Cop - instead of the
 tubers being large, they
 are of a moderate size
 & strong one after another
 the distances between the tubers
 upon

each root has from
one to three feet,
the distance decreasing as
you get from the stem
of the plant. The tub-
ercles again, was obtained
found about a foot below
the surface in a more
adhesive clay soil.

There is a hypothesis
from the tubercles who will
leave about the end of
next month. In those
cases I am going to ask

The favor of your Committee
a large of office plan to
for me. I shall write
to you again -

Yours
C. J. Mearns

The Commission on the subject of your letter
 has been established and is now in the
 process of being organized. It is
 expected that it will be ready to
 report in the near future.

✓ I have also received from
 the Secretary of the Board of
 Education a copy of the report
 of the Committee on the subject of
 the proposed changes in the
 curriculum of the high schools.
 This report is very interesting
 and contains many valuable
 suggestions. It is expected that
 the Board will take action on
 it in the near future.

degree of prostration lasting many days, out of
which his constitution seemed with difficulty
brally -

I consider that there is evidence of a tendency,
in B. Wallis's case, to take on this dangerous
form of disease, from exposure to the ordinary
causes of sickness, at the above mentioned.

unhealthy period of the year, and that there is a great probability of a third seizure at the same time of the year, an event which, judging from the past experience, is very much to be dreaded.

I do therefore, according to the best of my professional judgment, recommend a voyage to Europe, and certify, upon honor, that I consider an absence from India for at least two years absolutely necessary for the preservation of Dr. Wallis's health and life -

Ararah

December 17. 1841.

W. A. Gillen

Civil Appt. Surgeon

The following are some of the data upon which

In July * * * * * Dr Wallack had an attack of cholera
out of

te&*t*-t^ ;^.*-^*^t.f-. X^- ^t^*s<;

morning sounds, and very soon after his return to his
house felt symptoms of the disease. - happily reaction
took place in the course of a few hours; and the disease
soon subsided -

From June last up t^fajfl' ^i£-ic and July Dr Wallack
has not I believe suffered from any severe ailment.
On the 15th of this month, July, at 3 o'clock in the morn-
ing after having for several days previously felt
feverish symptoms, and suffered from distress

He was again attacked with cholera, in a very
severe form, attended with violent . s^jSj6m^*--+*--+ vomit-
ing, and alarming prostration. He remained

nsf-~&?& ^>C*- *^i. e- ^

for several days symptoms, in a state of extreme prostration, out
of which, up to this date, he has not entirely recovered.

This recent attack of cholera, after some t^y/' ** - -r/ **
several days precursory illness, I cannot but con-

sider attributable to the ordinary exciting causes
of disease. f^e^^e^ *^r £&~* /&+*^-& **
