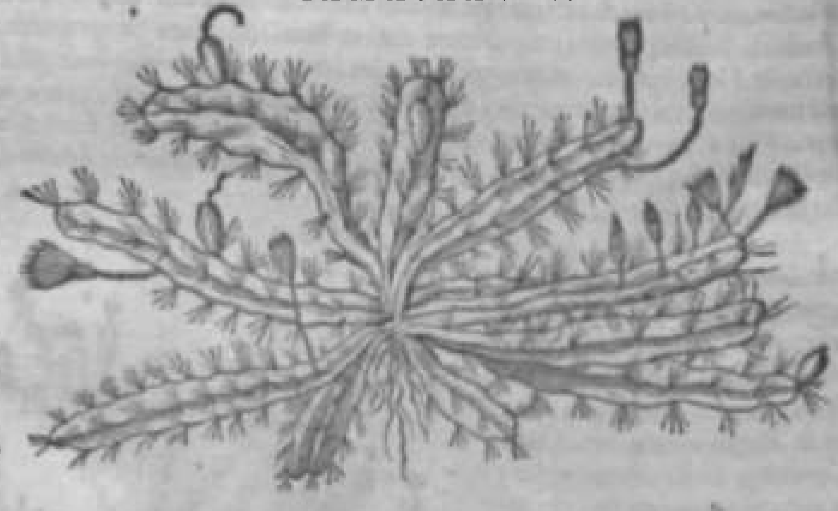
Quarta species tenuibus est ramis & nodosis, ad quos nodus [illegible] ut in reliquis convenit. Trunco est admodum [illegible]o, coque rectissimo sicut *Iaracatia* arbor (cujus nomen abusive hinc quoque *Tamacaru* attribuitur) vere Pinum diceres, si rectitudinem & altitudinem consideres, verum in caeteris differt, quod foliis potius [illegible] procumbentibus, quam ramis in arbores [illegible] decoratur, quae rotundiuscula [illegible] crassitie palmum, longitudine [illegible] digitos [illegible] simulantur. [illegible] arboris nuper à [illegible] fructus, mihi & senioribus Brasilianis [illegible] peregrinantibus, [illegible] Caudex [illegible] illa est Sambucina facile mollior, quae [illegible] arbore, continuo [illegible] exsiccatur, abitque in [illegible] qui decidit, [illegible] cortice relinquitur [illegible] concavus, arundine levior [illegible] ex [illegible] facie [illegible] Quamobrem summa industria [illegible] crassitiei, viginti circiter pedum longitudinis [illegible] nunc in Horto Academico Lugduni Batavorum, apud Clarissimum [illegible] D. [illegible] reservandum dedi.

IAMACARV V.



Quinta Ficus spinosa, *Cambeba* appellata. Ex radicibus tenuibus nascuntur triangularia aut etiam quadrata folia, viridia, quibus alia hinc inde annascuntur ut in Ficu Indica: suntque duplo crassiora quam *Iamacaru* quae fruticibus & arboribus annascitur; sed hujus longiora sunt [illegible] crenatis/crassitatibus, aculeis multis, flavescentis seu lignei coloris: inaequalis longitudinis, juxta se posita. Florem fert [illegible] praecedentes sed minorem. [illegible] figurae oblongae, constans cute crassa, egregie rubra. Pulpa friabilis, & quasi in multos [illegible] conglobata ut nix gelu indurata: Eadem cum [illegible] suis nigris comeditur, boni saporis, Ficum vulgarem superans. Succus è cortice rubro expressus acidi adstringentis saporis ut succus Ribium immaturorum. Folia succum dant brassicae similem: qui si amarus esset, planta haec Euphorbium esset, [illegible] convenit cum illius descriptione.

Hanc Speciem Tunae in Nova Hispania profert Cochinillam, quae tamen hic [illegible], licet sedulo indagantibus nunquam apparuit.

Omnes hae plantae [illegible] nunc tenuibus, nunc crassis spinis [illegible], adeo profunde carnem humanam penetrant, ut vix ullo remedio evelli possint: praecipue autem haec quinta figura, *Cambeba* dicta.

Nana, Braſilienſibus Ananas, Luſitanis.

ACrum agere nonnullis videbor, quod fructum toties deſcriptum & ad vivum [illegible] ubitum huc denuo producam. V[illegible] proſequi ſit inſtitu[illegible] praxin æque ac Hiſtoriam R[illegible] tatibus, [illegible] ab aliis, tum propria experientia didici. Eoque magis quod à fide dignis [illegible]ſenſibus Incolis teſtatum ſit, primum hunc fructum ex hiſce provinciis ad Peruviam, inde ad Indias Orientales delatum eſſe. Recte quidem in comp[illegible]anda rerum novarum notitia, ſollicite [illegible] vires inveſtigamus: ſed non minus intere[illegible] exiſtimo, etiam indies cognitarum herbarum & fructuum ulteriores dignitates latentes ſcrutari, ſicut in hoc & multis ſimilibus veriſſim[illegible] contigit, & procul dubio ſæpi[illegible] poſthac continget.

ANANAS.

Ananas hujus Cardui species, [illegible] do Strobylus aut nux Pinea di-
ctus, nemini credo ignotus, [illegible] optimus Indiarum [illegible] secundæ men-
[illegible], [illegible] sive crudus sive Saccharo conditus. [illegible] Cinaræ in mo-
dum spicis compactilibus instar cristarum, in summitatibus emergentibus naſcitur, &
[illegible] foliola ejus pro[illegible] potiſſimum cæru-

CAPUT XLII.

Variæ ſpecies [illegible] Mangles [illegible]

Q[illegible] loca, [illegible] vulgo vocant [illegible] Sed cum po[illegible] um, tam uſum, hactenus tradita fuerint, [illegible] F[illegible]rit peni[illegible]

Tres dantur ſpe[illegible], quæ *Mangue* eſt alba. Arbor inſtar Salicis pumilæ, tali ligno, ejuſdemque figuræ, foliis itidem ſimilibus, ſed [illegible]ulo craſſioribus & directè ſibi invicem oppoſitis. In extremitatibus autem ramulorum inter tria, quatuor, & interdum duo folia, duo proveniunt pediculi, quilibet tres, quatuor aut quinque floſculos habentes, congeſtos, ex albo dilute flaveſcentes, quatuor foliolis conſtantes, & in medio totidem ſtaminulis nigris ſurrectis, mellei odoris. Folia hujus arboris, lucente Sole ſalem albiſſimum continent in ſua ſuperficie: quando vero cœlum nubilum aut tempus nocturnum, ſal diſſolvitur & inſtar roris adhæret: interdiu autem ſiccus & albiſſimus, digitis detergi poteſt. Ac tantum ex [illegible] tribus foliis colligitur, quantum juſculo probe ſaliendo ſufficiat.

Secunda *[illegible]*, quæ non radices ex ramis in terram agit, nec tam tortuoſo flexu luxuriat. Folio eſt craſſo, glabro, rotundo, dilute viridi, flore albicante, fructu & valde amaro, nucis avellanæ magnitudine, quo cum Palumbi & cæteræ volucres, defectu melioris alimenti, ſe [illegible]gurgitarunt, adeo eorum [illegible] amareſcit, ut vix eſculenta ſit. Cortice exiſtit rubro, ex quo [illegible] coriaria, Europæa haud inferior, conficitur, piſcatoribus [illegible] tingenda, in quotidianum uſum.

GVAPARAIBA.

Tertia & poſtrema vera eſt [illegible] dicta Luſitanis *Mangue Verdadeiro* [illegible] teris magnitudine & præſtantia longe ſuperior. Æſtivis menſibus fert ſiliquas [illegible] fuſci coloris pulpa [illegible] refertas, oblongas duas ſimul copulatas [illegible] ejuſque admirandus [illegible]. Sicut enim ramo[illegible] inſtar frondeſcentes habet, [illegible] in ramos [illegible] in radices [illegible] deorſum tendant [illegible] ramis ſe ligant, aliiſque [illegible], ita copulentur, [illegible] rudant, nec minus firmiter [illegible] primarii arboris [illegible] ita ut ex multis [illegible] [illegible] tur, egre-

E [illegible] ſingulari arbore [illegible] ſtar ordinem obſervat [illegible] præbente. [illegible] ſolidum [illegible] ramos & folia ſibi oppoſita: atque hæc quidem [illegible] ſecundum longitudinem & multis venis ſecundum latitudinem.

De Muſtela, aliiſque fluviatilibus piſcibus lacuſtribus, ſine ſquamis.

NEſcio quid Plinio venerit in mentem, quod Muſtelis ſecundum, in fluviatilibus piſcibus, à Scaro dederit principatum, [illegible] 3, l. 9, c. 17. Nunc Scaro datur principatum, qui ſolus piſcium dicitur [illegible] herbiſque veſci, non aliis piſcibus. Et paulo poſt. Proxima eſt his menſa, generi duntaxat Muſtelarum. Et quæ ſequuntur, dum ipſas diſtinguit in fluviatiles, & marinas. Certe tanta copia hic Muſtelæ capiuntur, ut ſit è viliſſimis cibis, & ab Incolis *Sembilang* nominantur. Fateor equidem, Muſtelas ſapore excellere inter piſces, qui in fluviis degentes, ſquamis carent,

ANNOTATIO.

Ego cum noſtro Bontio, Oviedum, Cluſium, Scaligerum [illegible] quod [illegible] in deſcriptione [illegible] jus [illegible] ſed [illegible] poſſe [illegible] quod [illegible] figur. 1; [illegible] Arborem [illegible] procerani [illegible] Proinde vel diverſa plane ſpecies [illegible] Guanambani [illegible] ab hoc [illegible] fructum [illegible] varietati & perplexitati no- [illegible] impoſita [illegible] dum idem nomen [illegible] verſis autoribus, [illegible] rebus impoſitum eſt. Ex quibus amphibologiis obſcuritates infinitæ cauſantur. Cluſius fructum *Baobab* Alpini, non male mihi viſus eſſet Guanambano comparaſſe, ſi etiam non ex arbore penderet, & non foliis eſſet admodum à noſtro diſcrepantibus. Oviedus autem ſub nomine Guanambani, accurate. l. 8. c. 17, arborem in America undique familiarem eſſe teſtatur. Quæ ſi rite examinetur, exacte quadrat cum noſtro Braſilienſi *Araticupanha*, fol. 142, deſcripta. Quæ arbor revera in multis Americæ locis ſponte luxuriat, & cujus fructus pulpa, quidem eſt ſaporis & conſiſtentiæ, ſicut deſcripſit illam.

Hic autem Guineenſis Guanambanus planta quoque eſt fruticeſcens, foliis magnis Acanthi non diſſimilibus, cum profundis pro vario naturæ [illegible] inciſuris, eaque [illegible] ſarmentoſos cingunt. Ex his ſuperius [illegible] flavi, quibus fructus oblongi, craſſi, ſuccedunt, cum multis ſtriis, & eminentiis [illegible] inciſuris, per longitudinem excurrentibus, [illegible] ſuntque in coronam, ex octo fo[illegible] in tenuibus conſtantem, quæ corona his Guineenſibus fructibus peculiaris eſſe videtur. Num qualitatibus & [illegible] cum Bontii Javenſi conveniat, vel diſcrepet, nihil mihi hactenus certi compertum eſt, & proinde ulterio[illegible]
