The first part of the document
 discusses the general principles
 of the system and the
 various methods of
 application. It is
 divided into several
 sections, each dealing
 with a different aspect
 of the subject. The
 first section is
 devoted to the
 theory of the
 system, and the
 second to the
 practical details
 of its use. The
 third section
 contains a
 list of the
 various
 instruments
 and materials
 required for
 the work. The
 fourth section
 describes the
 various
 operations
 which are
 performed in
 the course of
 the work. The
 fifth section
 contains a
 list of the
 various
 diseases
 which are
 treated by
 the system. The
 sixth section
 contains a
 list of the
 various
 cases which
 have been
 treated by
 the system. The
 seventh section
 contains a
 list of the
 various
 results which
 have been
 obtained by
 the system. The
 eighth section
 contains a
 list of the
 various
 objections
 which have
 been raised
 against the
 system. The
 ninth section
 contains a
 list of the
 various
 advantages
 which are
 derived from
 the system. The
 tenth section
 contains a
 list of the
 various
 conclusions
 which have
 been drawn
 from the
 experience
 of the
 system.
