

Indian Botanic Garden Library

* BOTANICAL SURVEY OF INDIA

CLASS NO. 5814(24) 61

BOOK No. WAL - 8

ACC. NO. B2341

Primum ~~hæc~~ ultimum hæc (sc. methodus naturalis) in Botanica
desideratum. - Linn. Phil. bot. 77.

Synopsis
Plantarum Indiae Orientalis
à
Roxburghis, Colebrookis et Wallichis
indagatarum,
justa ordines naturales
digesta.
Leontavit N. Wallich M. & Ph. Dr.

Ranunculaceae Lsp.

Clematis Sel.

- Clematis Gauriana Nash. Sel. Duz. C. vagans, Jack Wiff
- cuneata Sel. C. pinnatifida, Wall. N. N.
- geminiflora Sel. N.
- et Bhutanensis 3 spec. Dist. puda Sel.
- toosopolia 3 spec. Dist. puda Sel.
- extensa, Wall. Sph. mont.
- nepalensis Sel. N.
- pendula, Wall. N.
- montana, Buch. Sel. N.
- bitermata Sel. N.
- odorata, Wall. In bitermata Sel. ? Kumaon
- smilacifolia, Wall. Sph. mont.

Karsvelia Sel.

- zeylanica Sel.
- laurifolia, Wall. Clem. lauri smilacina, Blume Bijdr. ? Pany

Tremone Sel.

- Thalictrum cysticarpum Wall. Th. Chelidonii Sel. ? N.
- rotundifolium Sel. Thalictrum rotundifolium Wall. N. N.
- renigorum, Wall. Himal.
- bracteatum Nash. Beng.

Tremone rivularis Buch. & Sel. N.

- vitifolia, Sel. & Buch. N.
- sericea, Wall. Cho. Mons.
- longiscapa, Wall. N.
- lupida, Wall. N. et Cho. mont.
- gracillima, Wall. Himal.
- rupestris, Wall. Himal.

Ranunculus Sel.

- Ranunculus hydrocotylifolius, Wall. R. hederaceo L. aff. R. diffusus Sel. ? Test. Hecat. ?
- Bobasti 2 Nepal
- mollis, Wall. R. nepalensis Sel. ? N.
- fibrom, Wall. var. R. mollis Wall. ? N.
- cespitosus, Wall. Himal.
- carnosus, Wall. N.
- β miranthus. R. scleratus β Sel. ? N.
- scleratus β Sel. R. indicus Nash.

Helleborus Sel.

- Caltha pomiculata, Wall. Populag. natant. et flabellif. intomed. Himal.
- Jovianica, Wall. Populag. C. panic. Wall. nimis aff. Himal.
- Nigella sativa L. var 8 Sel. N. indica Nash.
- Hyilegia vulgaris L. ? Ledeb.
- pulchiflora, Wall. Hinazgwa
- Delphinium pilosum, Wall. D. scabriflorum, Don ? Himal.
- altipinnum, Wall.
- Scutellaria ferox Wall. etal.
- var. Nepalensis var. delatiniifolium Sel. ? Himal
- heterophyllum Wall. Sect. nov. duplicitif. Himal

Anonaceae

Urena tenax, Jack.

- exulsa Wall. Comp. c. U. dubii & japonica, Dun.
- concolorata, Wall. Haprop. & Syllab. Variet
- ? Padjambeg, Roxb. See descr. see from advent.
- ? undulata Jacq. (sub. Uvar.) based on anal
- triginta, Roxb. based Lam. In dictum. generis propter cavers. proprot. petal.
 in hunc via sibilat maxima et duar (carpell) 1-specim. Malina
- visica, Roxb. Kthl. In proprii generis intercedenti spec.
 accidens petal. inter. mac.
- subspilis Wall. U. toica R. simill. an eadem spec? Haprop.

Guatteria cerasoides, Dun. In una plures sub hac recandita spec. Uvar. Roxb

- tuberosa, Dun. Uvaria Roxb.
- obovata, Wall. Urena? Nominis ratione ignoro.
- ? ovata, Willd. Herb. Nees
- rufa Kun. ? G. cordata Dun? Simill U. macrophylla Roxb. In Pinis
 Musar. Numph. (va U. Musoria, Dun) Nominis Guatteria, est ampa
 percar. oosp; fol. fruct. et flor. simill U. macrophylla
- ? multinervis, Wall. Flor Uvar. macroph. Adest spec. hunc? fruct. oo basket.
 subglobos. 1-loc. 2-specim, pallidior.
- ? ovalis, Willd. G. rufa Dun? Pinang.
- scarpigularis, Labb. in lit. U. lobis. Seem pusta. Syllab?

Arthobotryx adoratissima, R.Br.

- cordata, Willd. Syllab Publican
- densiflora Wall. In U.
 apud Kerr. bot. rez. (tunc nomen nunc in A. Horsfieldianum,
 Syllab. Pinang. In Pinang plants her. very rare in
 Ceylon, almost like U. concolorata Labb.; Hany I may
 turn out a diff. species; perhaps the leaves will become
 broader beneath. Many note the Pinang & Syllab. In
 specimens belong to one and the same species

Conaraceae

pinnatus Lang. Wight & Carriote *Prodr.* 1. 1843
 Conarus ~~nitidus~~ *Rach.* see what Flamm described p. 88. Caper Wight &
 Arnott *Prodr.* ~~1. 1843~~ Considering the shape of the fruit of *C. pinnatus*
 as figured in *Prodr.* 1. 46 (under the name of *Omphal. indicum*) I must
 suppose it to be different; it being oval sepals in the
 calyx ^{is not always oval or obt.} clavate ^{or} stipitate as in
Prodr. in all other respects it is quite like the description of
C. pinnatus given by Wight & Arnott (l. cit.) - Pheedon figure of the
 fruit is copied verbatim 24 years ago - and in Racher's *Synops.*
Fl. Ind. If the name *nitidus* is struck out and *C. pentandrus*
 is written over it in pencil. His drawings contain but
 one spec. of flower which he calls *C. pinnatus* (on the back)
 and in part *C. pinnatus* ~~monocarpus~~ from Ceylon? Is this
 what Hooker & Arnott call *C. Racheri* in *Beach. Voyage*?
 So I understood rightly that it is a Chinese plant (*M. & Arn.* l. c. 149)
 But they refer it to *Rourea* - *Rourea pinnata* *Rach.* & *pentandrus* *Rach.*
 I suspect at any rate that *C. pinnatus* *Rach.* & *pentandrus* *Rach.*
 (*Fl. Ind.* 3. 139 + 140) are the one and the same spec. - In *Rach.*
Beach. Voyage the plant which Flamm to be *pinnatus* is called
C. nitidus and is obviously the same as *C. pentandrus* *R.*
Fl. Ind. - notwithstanding this is also quoted in the *Bot. Beech.*
 - *monocarpus* L.? spec. ~~from Ceylon from~~ *W. & Arn.* ¹⁸⁴³
 only 1 or 2 inch long *Poly* another spec

Rourea *scutaloides* W. & A. *Prodr.* 1. 144! *Conarus* *sambalensis* Wall.
 Decand. *Tabulae* *uniflorae* 5 ut auct. *M. & Arn.* l. c.
 - *monadelphae* W. & Arn. *Prodr.* l. c. (nomen pro mutandis quibus incorp.
