ROM DIB LONG-CONTINUED AND SUCCESSFUL LABOURS IN THE INTEREST

OF

Science, Arts, Manufactures, and Commerce,

•WILL READILY APPRECIATE ITS EXTENDED RANGE AND GENERAL UTILITY,

THIS LITTLE FOBK IS DEDICATED,

BY HIS FAITHFUL AND OBLIGED SERVANT,

TIIE AUTHOR,

PREFACE.

THE present is especially a practical, commercial, and Industrial aget newspapers, lecturer*, popular authors, $a \mid$ lend their efforts towards the diffusion of sound and useful knowledge among the masses; and the commerand industrial element has become the leading feature of instruction. The reason of this is obvious, if we but glance at the amazing strides of British methorce, the wide range of products and Manufactures in which we are interested, the **constant** and rapid niter-communication carried on with Foreij countries, and the progress of **settlement** in our Colonies. The Trnde and Commerce of all Xiiiions are now daily brought before us prominently through the press; new Products are continually introduced, new Trades are :iblwhcd, and the **Raw Materials** of Commerce now imported, are so numerous, and so widely different from what they wdre a quarter of a century ago, that it is difficult for those who nre not specially engaged in a particular trade, to keep pace with the general information necessary to be acquir*

We have scientific dictionaries in abundance, purely technological, or dev to one or other of the arta and sciences. TVe have popular and useful commercial and nautical **dictionaries**, find cyclopedias—works, entering elaborately into the discussion of the l:nvs, history, and regulations of trade, the geography of countries &c—but-we have hitherto had no popular and concise rk of reference on TradeB and Trade Products, which might be conveniently consulted for the Bimple explanation of some strange term, some undefined **raw** material, or some new **manufacture**. The several International Exhibitions have rendered such a handbook more than ever necessary.

As the city editor of a daily paper, and contributing largely to many class journals, I especially found the want of a work of easy reference, defining the moneys, weights, and measures of the foreign countries with which wo arc engaged in trade. On the arrival of any foreign mail, extracts are made from the journals and prices-current thus received, in which such words as arrobas, piculs, maunds, garcee, contos, milreis, &c. arc mentioned; or products are named and quoted, probably under their local or native designations, of which the majority of readers know nothing, but to which they can now readily turn for a definition. Any one who glances through the various foreign tariffs will be especially struck with the number of articles which are perfectly unintelligible by the names in which they appear, and yet a word or two of explanation would suffice to point them out clearly and intelligibly. The attention which India has lately attracted, and the abstracts from letters and Eastern journals, led also to the continual recurrence of names and terms which were not understood by the ordinary reading public, and an explanation of which appeared to be exceedingly necessary.

Commencing with a limited list of definitions for my own use as a Journalist, t was gradually led *to* extend it, and have been induced to include in the work many foreign names for trades and products, which it appeared desirable to define, and to render accessible to those who had not various foreign dictionaries at hand.

The scope and objects of the work are specially stated on the title-page; and I trust it will be found useful to many classes young and old, and supply a want as yet unfilled by the bulky and expensive books previously published; for of the 22,000 words and upwards given, the greater proportion could not be found in any other work of reference. It is especially a dictionary of substances or articles manufactured, imported, bought, sold, or dealt in, at home or abroad, and of the makers or dealers in these.

It professes to define only the ordinary and popular names—English or foreign; and consequently an article must be sought for under its common designation. If an animal or vegetable product, its scientific name is given, and as much general information relating thereto a; the limited space at command, in order to secure a cheap and portable volume, would allow. The statistics h3TC been brought down, in all cases, to the latest period; and this feature ulone **will** be found exceedingly valuable for the ordinary purposes of ready consultation, by saving much time and trouble in referring to bulky Parliamentary papers and numerous trade reports.

I may state, without fear of contradiction, that few persons have possessed such peculiar facilities for the completion of a work of this kind. From my extended connection with periodical literature, and receiving regularly, for a long period, nearly all the brokers' circulars, the principal foreign and colonial journals, and prices-current, I have become familiarized with the products, terms, and customs of different countries.

As one of the editors of the Farmer's Encyclopedia, and a regular contributor to the Mark-lan& Express, the Farmer's Magazine, and the Edinburgh Journal qf Agriculture—as a writer for many years past in the Shipping and Mercantile Gazette, the Engineer, the Mining Journal, the Civil Engineer's Journal, the Building Xews, the Journal of the Society of Arts, the Pharmaceutical Journal, and other class publications, I have necessarily become acquainted with the technicalities, the subjects, and the products brought under discussion; and there is scarcely a trade article named which has not come under my notice, from specimens in my own private collection, or in the South Kensington Museum, at which I am engaged. The information and materials thus derived from so many original sources, have been carefully weighed, compared, and tested.

A work like this, however, can never be complete. With the extending range and wants of Commerce, new articles are brought in, new trades arise, new technical terms are introduced in the arts and manufactures, with which it is scarcely possible to keep pace, unless by an annual edition. Yet the ground-work has been here laid for a more extensive and comprehensive work, should it be considered desirable; and those readers into whose hands this little volume passes, will, at least, have the advantage of much useful information in n small compass, which has only been acquired by very extensive research, and years of assiduous plodding over volumes and journals and trade circulars in all languages.

During the progress of the work, I have experienced the advantage of a careful secgnd revision of the proof sheets by Dr. P. A. Nuttall, an experienced lexicographer; and amongst numerous other friends to whom I am indebted for much valuable information, arc Dr. Lyon Play fair, F.R.S.; Mr. Hyde Clarke, [2]

- ABROTANUM, a name 'giveir by Pliny to the southernwood, a species of Artemisi.i, A. *abrotanum;* hence Its specific name. ABSINTH, or -wormwood, is the produce of
- Artemisia absinthium, which is much used in medicine for its bitter properties

- STANDARD, an upright of iron, for fencing a flag; a test or rule of measure; a solid measure by which hewn timber is esti-mated, Tarring in different timber countiles. The St. Petersburg standard hundred of deals, and deal ends, con-tains 120 pieces, IS feet lomr, 1} inch thick, and 11 inches broad,•= 165 cubic feet. The Swedish standurd hundred contains 121 pieces, 14 feet Ion?, 3 inches thick, and 9 inches broad. The Norwegian standard hundred contains 120 pieces 12 feet long, 3 inches thick, and 9 inches broad. The standard hundred by which battens are a flag; a test or rule of measure; a solid standard hundred by which battens are commonly sold, contains 120 pieces, 12 feet long, 2} inches thick, and 7 inches broad. Itautzlc and Memel deck deals arc sold by a standard of 40 feet Ion?. 3 inches thick, and 12 inches wide. The arc sold by a standard of 40 feet Ion?. 3 inches thick, and 12 inches wide. The standard ot red deals would weigh about Sf tons, and that of white wood 2t tons. The term *standard* is used to designate the purity and weight of coins, that is, the fineness of the metal of which they are made, and the quantity of it contained in them. A pound troy, or 12 oz. of the metal of which English silver coins are made, contains 11 oz. 2 dwts. pure silver, and 18 dwts. alloy. This pound is coined into CO shillings, so that each shilling con-tains 80 727 grains flue silver, and 87-27 grains standard silver; and the *tyoney pound*, consisting of 20 shillings, contains JCI4-M3 grains pure sliver, and 1745 454 grainsstandard silver. The fineness of gold is obtiniit* d by carats, cold ot the highest degree of fineness, or pure, being said to be 24 carats Hue, 22 being the purity of our present gold coins. The sovereign, or 20 shilling piece, contains 113-001 grains fine gold, and 123*274 grains standard gold. The pound troy of standard gold, is coined Into 46 sovereigns, and 88-120thsof a sove-reign, or into £46:14: 6d. The mint, or

- standard price of gold, therefore, is said to be $\pounds 40$: 14: 6d, per pound troy, or $\pounds 3$: 17: 10}d. an ounce. The alloy in coins is reckoned of no value; it is allowed in order to every the trouble and european coins is reckoned of no value; it is allowed in order to save the trouble and expense that would be Incurred, In refining the metals to their highest degree of purity; and because, when its quantity is small, it renders the coins harder, and less liable to be worn or rubbed. Were the quantity of alloy considerable. It would lessen the splendour and ductility of the metals, and would add too much to the bulk of the coins <u>M'Culloch's Principles of Com-merce</u>. There are several standards tor gold now used, as 22, 18, 15, 12, and 9 carats. čarats.
- STANDARD-BEARER, an officer who carries a banner or colours in a procession.
- TANDARD-MARK, a legal assay mark for gold of 22 carats fine, and for silver of 11 oz. 2 dwts. Articles of all standards, capa-ble of bearing a stamp, are maiked also with the initials of the maker's name, the arms or mark ot the Assay Office, and a letter for the date of the year. Office, and a letter for the date of the year. Different kinds of letters arc u»ed by the Goldsmiths'Company; the one. now em-ployed is the old black letter. The al-phabet was begun in 1856, C being the letter for the present year, 1858. It runs on to 20 letters, J being omitted; a fresh alphabet is then again commenced. The standard mark for England is a lion pas-sant : for Edinburgh, a thistle: for Glas-gow, a lion rampant: for Ireland, a hnrp crowned. Gold of 18 carats fine, a crown and the figures 18. Silver of the new stan-dard, which is 11 oz. 10 dwts. fine, bears the figure of Britannia. See HALL-MARK. MARK.

- YADUM, a weight in Mysore of 150 lbs.; also called a panckakum. YAGER, a rifleman; a huntuman.
- YAGKB (Spanish), a kind of palm sugar.
- YAGKB (Spanish), a kind of paim sugar. YAHO-BAKK. See MAHOE. YAK, a species of wild ox, the *Pcephagus* grunniens, found in Thibet. The Uesh serves lor food. The hair is made into tents and ropes, and jackets and caps are formed of the skin. Its bushy white tail is much esteemed in the Bust, where it is borne as an emblem of authority, and used as a fly flappor as a fly-flapper.
- YAM, a climbing plant, with large tuberous roots, forming one of the broad-stuffs of the W. Indies, and other tropical regions, the W. Indies, and other tropical regions, of which there arc several species The roots are very rich in nutritive fecula; hence they are much used us articles of diet The common yam is the *Dioscorea tativa*; the wing - stalked or red-yam (/>. *alata*); the pnckly-yam {D. aculeata}; and the bulb-bearing, or Grenada - yam (/>. *bulbi/era*). There are also other varie-ties, known under the names of Creale ties, known under the names of Creole, Portuguese. Barbados and Guinea yam. If sun-dried and packed in ashes yams will keep lor about a month or six weeks.
- YAK, a Chinese measure of length, equal'to 86-45833 yards.
- YAOURT, a fermented liquor or mllkbcer, similar to kounus, Hindu by the Turks.
- YAPAK, YIJNK, Turkish names for sheep's wooL
- YAPON, YOUPOS, the South Sea tea, the *Ilex Cassine* of Carolina, and the Southern States of America.
- YARD, a long piece of timber, suspended across a ship's mast, to spread the square sails on; an enclosure with walls at the back or around a house, «cc. as a court-yard, or prison-yard; a British standard measure of 3 feet, or 36 inches. As a linear measure, the yard varies considerably in different parts of the kingdom; at Hert-ford the land-yard is 3 feet; at Saltasii, IGJ feet; at Falmouth and Bridgend 18 lect; and at Downpatnek, 21 feet. The Dutcu cloth yard measure is equal to 87 17-20ths Rhynland inches. The Hungarian yard, used iu measuring cloth, is four-fifths ot the Austrian yard, and about 34 English Inches.
- YARD-ARM, the end or point of a shin's yard, the portion projecting on each side of the mast'
- YABO-LAND, a superficial English measure, of variable extent, iu some places 15 acres,

- In others running to 40 acres; but the mean may be taken at 80 acret.
- ARD-MAN, a manager or overlooker in a builder's yard.
- ARD-MEASURE, a shopkeeper's rod or stick of 3 feet, with subdivisions; a tape 36 inches long.
- (ARDS, Ion? spars of timber, tapering slightly at the end, suspended upon the masts of vessels for extending the sails, and which are specially named according to their position and the mast on which they are *hung.* In a large sbip there will be about twenty yards, some of very formidable dimensions. The main-yard of a liner or first-rate will be about 100 ieet in length and 2 feet In diameter.
- YARD-STICIC, a drapor's measuring wand of
- YABD-WIDE, carpeting, fabrics, Ac. 3 feet in width.
- YABE (Scotch), aweir for catching flsii. See WEIŔ.
- YARI-VARI, a local name in Guiana for tbe ARI-VARI, a local name in Guana for toe yellow lance wood *[Duguetia quitarensis]*, a slender tree. The wood is to be had from 15 to 20 feet in length, and from 4 to 6 inches In diameter. It is very close, tough, and elastic, and Is in great repute lor gig-shafts.
- YARN, a ropemaker's term for a collection of fibres spun together; simple spun thread; woo), cotton, flax, or hemp spun or twisted into lengths. *See* TWIST. Owing to the perfection of our spinning, the ex-port of yarn is now very large. The quan-tity nnd estimated value of that exported In 1856, were as follows:—

| 1 | Tons. | Value. |
|--------------------|----------|-----------|
| Cotton | .81.273£ | 8.065.671 |
| Linen | 11.1(0 | 1.865.656 |
| Woollen and worste | d11.922 | 2.745.658 |
| Do. mixed | 287 | 142.764 |
| Silk. | 268. | 294,172 |
| | | |

104,890 12,613,921

YARN-MEASURE. Tho various manufacturers have different measures. The quality of yarn is expressed in England by counts or *numbers*, denoting the number of hanks in a pound, signifying coarseness or fine-ness; reckoning the length of the hank of cotton yarn at 840 yards, or 7 leas or lays, of 12C yards each. These " counts " range technically, from 2 to 400 hanks In a Ib. The tank of worsted yarn is sometimes counted in the same way, but more gene-rally at 560 yards, or 7 leas of 80 yards each. Linen yarn is estimated In England by the number of leas or cuts, each of 3 vards, contained in a pound weight; but in Scotland, by the number of pounds in a spindle, or 43 leas; thus, No. 48 in Eng-land, is called 1 lb. yarn in Scotland. The following are the principal subdivisions of each manufacture :

COTTOX-TAKN MEASUKB.

- ZUKUUT, a name among some of the Arab
- tribes for durra, Sorghum vulgare.

THE END.

M^CCORQUODALE & Co., LIMITED, PRINTERS, LONDON: WORKS, NEWTOS.

MESSRS. GEORGE ROUTLEDGE & SONS believe that there is in England a very large public demand for good books. Thev believe it to be large enough to justify the production of a uniform series of very cheap volumes, advancing, in course of time, towards the realization of a UNIVERSAL LIBRARY that shall contain all the best and most significant books in the world, of all times outside the time of Copyright, and of all countries, so far as such books can be found written in or rendered into English. The Publishers wish to produce the best books at the cheapest rate—that is to say, in bound and well-printed volumes of 320 pages for a Shilling. The Editor to whom they have looked for aid in working out their purpose shares, their faith in the demand for easiest access to all forms of the world's thought, and all forms of opinion that have helped to shape the lives of men. He agrees therefore to be responsible for the selection of books published in this way, and he will issue each of them with a short Introduction, giving some account of its writer and some indication of its place in literature.

In the sequence of these volumes, as first published, there will be only the order in disorder that aims at variety. As they multiply upon the shelves, they will admit of any classification that most pleases their possessor. There will be in them the best Plays and Poems, the best works of Fiction, the best books of Travel, Histories, Biographies—all that is most characteristic in the speculations of philosophy and of political economy, the books of most mark in the world that seek to define or purify man's sense of his relation towards They may be arranged in sequence of time; from Confucius to God. Coleridge, or grouped into nations, with Homer to head the Greeks, Dante the Italians, Shakespeare the English, and so forth. The series of books is one that should outlive its present Editor, if English readers are really agreed that, for as far as lies within the compass of their own language, it is good to have in a Home Library as cheap, neat and compact as the modern art of publishing can make it, an toe best books of the world.

The first six books of the UNIVERSAL LIBRARY will be taken from writers of five nations-England, France, Germany, Italy and Spain. The series will begin cheerfully with Sheridan's Plays, because they are sure of an easy welcome from all readers. France will be represented, not by direct translation, but by a volume of the plays of English writers, Dryden, Wycherley, Fielding, plays such as ^{*tl*} Colley Cibber's Nonjuror," that have been founded upon plays of Molifcre. Literature of Spain will be represented by Southey's version of the "Chronicles of the Cid"; of Germany, by Goethe's "Faust"; of Italy, by Machiavelli's "Prince." A volume of Rabelais will be also withiik the number of the first half-dozen books. As the series advances, it is meant gradually to include a full representation of the English Drama, from the "Miracle Plays" downward; the most significant books upon the theory of Government and on Political Economy, such as Hobbes's "Leviathan," Locke's "Essays of Civil Government," the chief writings of Jeremy Bentham, and other books that are more quoted than read. There will be Hooker's "Ecclesiastical Polity." There will be books also of the Puritans whom it opposed. In Poetry and Fiction, many writers who now live chiefly as names will come back into fellowship, and the old coinages of wit again be current. Sometimes the work of different writers will be placed within one volume in significant juxtaposition. Thus, produced at the same time, and dealing in very different ways with the same thought of the time, Johnson's "Rasselas" will be associated with Voltaire's "Candide."

The text of the volumes published in the UNIVERSAL LIBRARY will be carefully printed from the copies indicated by the Editor, and it will be printed without annotation. Whatever explanation may be given will be found in the Introduction to each book. The length of each Introduction will depend upon the matter to be introduced; the average length will be about four pages. In some volumes, however, the text will require editing. Old writers will be printed as we print Shakespeare for common use, without suffering the swift passage of thought from mind to mind to be retarded by those obsolete forms of spelling which are no part of the thought of man, except when he is studying words as their historian. In literature words are but symbols, incomplete at best, of **the** stirrings of a life within life, compared to which the air itself is in its movement gross and palpable. As fax, therefore, as sense and rhythm allow, old spelling will, throughout this Library, be modernised. Also, it is the Editor's intention to respect that change in the convention of society which excludes now from our common acquaintance certain plainnesses of thought and speech once honestly meant and honestly allowed. By a little care in this respect, much of the best literature can, with slight injury to its best features, be rescued from neglect. The use and beauty of old monuments are, surely, separable from their dust and dirt.

No writer has ever felt of his own book that it attained his highest aim, but that has not been reason for regretting that it had an aim. "The UNIVERSAL LIBRARY will fall short of its mark, but it will not be the worse for having such a purpose as is here describe^ Considering, also, what a staff of writers it will have, and that in each book the Editor restricts his own talk to four pages, its volumes cannot easily be dull.

HENRY MORLEY.

ORDER OF PUBLICATION.

| 1. SHERIDAN'S PLAY^. | May, 1SS3. |
